A dynamic, competitive, elite research institution, Florida State University is world-renowned for the quality of its faculty, academic programs and a focus on developing graduates who are innovators and leaders. From its excellence in the sciences, arts and humanities, to a service-learning mission that is a model for the nation, an entrepreneurial culture, championship athletics and a prime location in the heart of the state capital, Florida State is widely known for offering an outstanding academic environment. It is one of the only two universities in the state to be designated as a preeminent university for meeting rigorous standards of excellence.

Located on Florida’s oldest continuous site of higher education, Florida State is proud of its rich heritage and core values that champion excellence at every level. Building on its unique strengths, it is one of the most student-centered universities in the United States, distinctively providing academic rigor and an amazing array of research, creative efforts and engagement opportunities to students in a personal and caring atmosphere.

Our Veterans House and programs designed to aid student-veterans’ transition to academic life, our Honors Scholars and Fellows House, Office of National Fellowships and Center for Undergraduate Research and Academic Engagement (CRE) are all examples of our strong commitment to help our more than 41,000 students reach their highest academic goals.

As evidence of their success, the University’s Garnet and Gold Scholar Society awards undergraduates a credential affirming their leadership and professional, citizenship, and research skills, demonstrating their ability to build collaborative relationships in the academic, local, or global community.

The University is creating a culture across all academic disciplines that embraces entrepreneurship, creativity, and innovation. Dubbed “The Entrepreneurial University,” Florida State is integrating the learning environment of classroom instruction, student and faculty business accelerators, and residential housing with entrepreneurial outreach services. An entrepreneur-in-residence program provides students with access to successful entrepreneurs whose coaching and expertise help accelerate promising entrepreneurs’ path to success.

Our dedication to excellence encompasses many realms. With many of our colleges ranked among the country’s best, we stand firmly among the nation’s top public universities. Led by a world-renowned faculty that has included six Nobel laureates and numerous eminent scholars in many areas of the arts and sciences, our academic programs continue to receive major recognition for their quality and overall strength.

Florida State University’s sixteen colleges and its Graduate School offer more than 320 undergraduate, graduate, doctoral, professional, and specialist degree programs, including medicine and law, covering a broad array of disciplines critical to society today. Each year the University awards approximately 3,000 graduate and professional degrees.

With its impressive breadth of leading graduate, professional, and undergraduate programs, Florida State University is a demanding, intellectually stimulating, yet warm and caring environment for students and faculty. Recognized nationally for its commitment to diversity, Florida State is a national leader in the number of doctorates awarded to African-American students and in the graduation rate of African-American undergraduates. Its College of Medicine and College of Law are ranked among the nation’s top schools for Hispanic students.

Florida State’s arts programs — dance, film, interior design, music and theatre — rank among the finest in the world, offering an arts education comparable to leading conservatories. Our creative writing program is ranked among the nation’s best and is home to the most consistently honored and published student body in the country. Florida State is responsible for governance of the John and Mable Ringling Museum of Art and associated arts programs, one of the largest museum/university complexes in the nation.

Other perennially recognized top programs include physics, chemistry, psychology, criminology, public administration, library science, information, education, business and law.

At the doctoral level, interdisciplinary programs draw on notable research faculty strengths that transcend the traditional disciplines, including neuroscience, molecular biophysics, computational science, materials science and research at the National High Magnetic Field Laboratory—home to the world’s most powerful magnets.

Our excellence also shines beyond traditional academic settings. Located in countries throughout the world, our international programs are unparalleled. In the area of athletics, our scholar-athletes continue to perform at championship levels on and off the field, and their hard work and dedication add to this University’s outstanding reputation. Our students supplement their academic pursuits each year with hundreds of thousands of hours of community-service time outside of the classroom. In immeasurable ways, this University reaches out to our community, region, state, and nation. This level of service has been recognized by the Carnegie Foundation, which has selected Florida State for inclusion in its prestigious Community Engagement classification.

With a dedicated faculty and staff, a commitment to strong graduate and undergraduate programs that prepare students well for the marketplace, and a research agenda that contributes to the nation’s economic well-being and quality of life, Florida State University is a leader in higher education. I hope that, as you become a part of our community, you will join us in our continuing pursuit of excellence.
President’s Statement on Equal Opportunity and Non-Discrimination

Florida State University is an equal opportunity employer and educational provider committed to a policy of non-discrimination for any member of the University’s community on the basis of race, creed, color, sex, religion, national origin, age, disability, veterans’ or marital status, sexual orientation, gender identity, gender expression, or any other protected group status. This policy applies to faculty, staff, students, visitors, applicants, and contractors in a manner consistent with applicable federal and state laws, regulations, ordinances, orders and rules, and University policies, procedures, and processes.

In pursuing its mission of excellence as a comprehensive, graduate-research university with a liberal arts base, the University strives to create and maintain a harmonious, high performance work and educational environment. It is my expectation that all members of our community are provided equitable opportunities to succeed and enrich the strength, skill, and character of the University. It is also expected that all members of our community will help create a work and educational environment that promotes fairness, respect, and trust, free from discrimination or harassment. Behavior that may be considered offensive, demeaning, or degrading to persons or groups will not be tolerated.

The University will continue to reinforce its commitment of non-discrimination to all groups protected by state and federal law. We will continue to monitor our methods of recruitment, retention, and advancement of qualified faculty, staff, and students and annually examine our affirmative action plan, as prescribed by federal guidelines, to measure how our campus is reflective of the community we serve.

The University further recognizes that forms of discriminatory or harassing behavior may create an unwelcomed or hostile environment and lead to an uncomfortable situation. As a result, the University has established internal complaint procedures available to all who believe their experience on any of our campuses has been less than appropriate.

To facilitate or otherwise strive to ensure University-wide compliance, I have appointed Renisha Gibbs, Assistant Vice President of Human Resources, Finance and Administration Chief of Staff, and University Title IX Coordinator, to develop, administer, and coordinate University-wide initiatives and complaint investigations. This will be accomplished through collaboration with the Dean of Students Department, the Athletics Department, the Office of Faculty Development and Advancement, and all University divisions, colleges, and departments.

Questions regarding the above may be directed to your supervisor or Renisha Gibbs at (850) 644-8082 or rgibbs@admin.fsu.edu. To view the University’s Equal Opportunity, Non-Discrimination, and Non-Retaliation Policy in its entirety, go to http://policies.vpfa.fsu.edu/personnel/3i.html#3.

Individuals with Disabilities

Florida State University adheres to Section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (ADA), as amended by the Americans with Disabilities Amendments Act of 2008, in prohibiting discrimination against any qualified individual with a disability. Any student with a disability may voluntarily self-report the nature of the disability and identify needed accommodations to the Student Disability Resource Center, 108 Student Services Building, or call (850) 644-9566. To request reasonable accommodations for employment or visitors, please contact the Florida State University Human Resources/Office of Equal Opportunity and Compliance, located at University Center, Bldg. A, Suite 6200, or call (850) 645-6519.

HIV/AIDS Policy

Students, employees, and applicants for admission or employment at Florida State University who have or who may become infected with HIV will not be excluded from enrollment or employment or restricted in their normal responsibilities and/or employment or activities due to their HIV/AIDS status, unless individual medically based judgments establish that exclusion or restriction is necessary for the welfare of the individual or of other members of the University community. That is, the University will not discriminate against otherwise qualified HIV-infected applicants, students, or employees.

The Florida State University Committee on HIV/AIDS is responsible for monitoring developments with regard to HIV/AIDS, acting upon and administering the policies of the Florida Department of Education Division of Colleges and Universities and the University concerning HIV/AIDS and coordinating the University’s efforts in educating the University community on the nature and prevention of the disease. In addition, the Florida State University Committee on HIV/AIDS meets as needed to consider special problems related to HIV/AIDS that require University action.

The University will be guided in its implementation of this policy by current authoritative medical information, applicable federal and state law, Florida Department of Education Division of Colleges and Universities’ HIV/AIDS Policy, and the guidelines suggested by the Centers for Disease Control, the Public Health Service, the American College Health Association, and the Florida Department of Health.

Florida State University has designated HIV/AIDS counselors who are available to the University community. Counselors are located at University Health Services (850) 644-8869; University Student Counseling, (850) 644-2003; or University Health Services Health Promotion Department (850) 644-8871. Confidential HIV testing is available for students and staff at University Health Services. Any interested individuals should call (850) 644-8871 to schedule an appointment.

Sexual Harassment Policy

1. **Policy Statement**: Sexual harassment is a form of discrimination based on a person’s gender. Sexual harassment is contrary to the University’s values and moral standards, which recognize the dignity and worth of each person, as well as a violation of federal and state laws and University rules and policies. Sexual harassment cannot and will not be tolerated by Florida State University, whether by faculty, students, or staff or by others while on property owned by or under the control of the University.

2. **Office of Equal Opportunity and Compliance**: The Office of Equal Opportunity and Compliance (EOC) is charged with receiving and investigating sexual harassment complaints as set forth in this policy and shall maintain the records pertaining thereto.

3. **Definition**: Sexual harassment is defined as unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature directed at an employee or student by another when:
   a. Submission to such conduct is made either explicitly or implicitly a term or condition of employment, academic status, receipt of University services, participation in University activities and programs, or affects the measure of a student’s academic performance; or
   b. Submission to or rejection of such conduct is used as the basis for a decision affecting employment, academic status, receipt of services, participation in University activities and programs, or the measure of a student’s academic performance; or
   c. Such conduct has the purpose or effect of unreasonably interfering with employment opportunities, work or academic performance or creating an intimidating, hostile, or offensive work or educational environment.

4. **Examples of Sexual Harassment**: Incidents of sexual harassment may involve persons of different or the same gender. They may involve persons having equal or unequal power, authority or influence. Though romantic and sexual relationships between persons of unequal power do not necessarily constitute sexual harassment, there is an inherent conflict of interest between making sexual overtures and exercising supervisory, educational, or other institutional authority. Decisions affecting an employee’s job responsibilities, promotion, pay, benefits, or other terms or conditions of employment, or a student’s grades, academic progress, evaluation, student status, recommendations, references, referrals, and opportunities for further study, employment or career advancement, must be made solely on the basis of merit.

Examples of sexual harassment include, but are not limited to, the following, when they occur within the circumstances described in Section (3) above:
   a. Use of gender-based verbal or written language, including electronic communications offensive or degrading to a person of that gender, whether or not the content is sexual.
b. Inappropriate display of gender-based pictorial images offensive or degrading to a person of that gender, including but not limited to sexual posters, photographs, cartoons, drawings, or other displays of sexually suggestive objects or pictures;

c. Use of inappropriate gestures or body language of a sexual nature, including leering or staring at another;

d. Unwelcome requests or demands for sexual favors or unwelcome sexual advances;

e. Inappropriate nonconsensual touching of another’s body, including but not limited to kissing, pinching, groping, fondling, or blocking normal movement;

f. Sexual battery. (Note: Some acts of sexual harassment may also constitute violations of criminal law, e.g., sexual battery, indecent exposure, sexual abuse, etc. In such instances, please refer to the FSU Sexual Battery Policy.)

5. Disciplinary and Other Actions: Sexual harassment is prohibited by Florida State University. The University will take appropriate action against any person found to be in violation of this policy.

   a. Disciplinary Actions. Any employee who has sexually harassed another or retaliated against another may also be subject to civil or criminal liability under state or federal law.

      b. Other Actions. The University will take such corrective action against any non-students or non-employees found to have violated this policy, as may be appropriate under the circumstances.

6. Retaliation: Retaliation against one who in good faith brings a complaint of sexual harassment or who in good faith participates in the investigation of a sexual harassment complaint is prohibited and shall be a violation of this policy and shall constitute misconduct subject to disciplinary action up to and including dismissal, in accordance with applicable law, rules, policies, and/or collective bargaining agreements. In addition, any student who has sexually harassed another student or an employee, retaliated against such person for bringing a complaint of sexual harassment, or otherwise violated this policy may be subject to disciplinary action up to and including expulsion, pursuant to the Student Code of Conduct. The term “employee” includes all persons employed by the University including faculty and graduate teaching assistants.

7. Filing of False Sexual Harassment Complaint: Knowingly filing a false sexual harassment complaint is prohibited and shall be a violation of this policy and shall constitute misconduct subject to disciplinary action as described in Section (5) above. A complaint that is investigated and deemed substantiated is not necessarily a false complaint.

8. Reporting Required: Any student or employee who has witnessed what is perceived to be a violation of this policy should promptly report that conduct to the EOC, who then will proceed as appropriate. Any supervisor who has witnessed or becomes aware of the alleged occurrence of sexual harassment by, or who receives a complaint of sexual harassment involving a person within that supervisor’s purview is required to take prompt corrective action as appropriate, and to report the matter, if possible, within two work days to the EOC. Failure of the supervisor to take appropriate corrective action or to report the incident shall be a violation of this policy and shall constitute misconduct subject to disciplinary action as described in Section (5) above.

   Note: For the purposes of this policy, the term “supervisor” shall be deemed to include vice presidents, deans, directors, department chairs, unit heads, supervisors, principal investigators, etc.; faculty when acting in a supervisory capacity or within the faculty-student role; and graduate research assistants, teaching assistants, lab technicians, residence hall coordinators, etc.

9. Complaint Procedure:

   a. Filing of Complaint. Any student or employee who believes that he or she is a victim of sexual harassment in violation of this policy is encouraged to promptly notify the alleged perpetrator (the “respondent”) verbally or in writing that his or her conduct is unwelcome. Such action may cause the unwelcome conduct to cease as well as help to maintain an environment free from sexual harassment. Assistance and support is available from the Office of Faculty Development and Advancement (for faculty), the Dean of Students Department (for students), or the Office of Human Resources. Regardless of having given notice to the respondent, the student or employee (the “complainant”) may initiate a complaint under this policy by promptly bringing the matter to the attention, preferably in writing by completing the complaint form, of any of the following:

      • The Office of Equal Opportunity and Compliance
      • The Office of Faculty Development and Advancement
      • The Dean of Students Department
      • The Office of Human Resources
      • A student’s school or college dean
      • An employee’s immediate or next immediate supervisor

   All complaints should be filed in a timely manner. Complaints filed for acts that occurred more than one year from the filing date of the complaint will generally not be investigated unless appropriate in the judgment of the EOC.

   b. Preparing a Complaint: The complainant should provide the following information to facilitate a prompt and thorough investigation:

      • The names, addresses, telephone numbers, administrative unit, and position or status of the complainant and the respondent, if known;
      • Specific acts alleged, including dates, times, and locations;
      • Names, addresses, and phone numbers of potential witnesses;
      • The effect the alleged acts have had on the complainant;
      • Actions the complainant may have taken to stop the harassment;
      • Complainant’s suggestion of proposed action to address or resolve the harassment;
      • Other information the complainant believes is relevant.

   c. Transmitting a Complaint to the EOC: The complaint shall immediately be forwarded to the EOC. If the complaint is verbal, the person receiving the complaint shall make a written summary thereof on the complaint form and request the complainant to sign it.

   d. Reviewing a Complaint. The EOC will make an initial determination whether the alleged perpetrator is a student or employee. If the alleged perpetrator is identified as one who is not a student or employee, then the EOC will refer the matter to the Office of the General Counsel for appropriate action. If the EOC determines that the alleged perpetrator is a student or employee, the EOC will review the complaint to determine whether the acts complained of, as stated by the complainant, constitute a violation of this policy, and if not, the complainant will be so informed. If the EOC determines the alleged acts may constitute a violation of this policy, investigation will proceed as set forth in Section (10) below, unless the matter is satisfactorily resolved as in the following paragraph (e).

   e. Notifying the Respondent and Supervisor; Informally Resolving a Complaint; Withdrawing a Complaint: The EOC will notify the respondent and his or her appropriate supervisor of the allegations contained in the complaint. In an effort to informally resolve the complaint, the EOC will elicit from the complainant, proposed actions the complainant believes are necessary to address or resolve the alleged harassment. The EOC will discuss these proposed actions with the respondent and with appropriate levels of management. The respective parties will also have the opportunity to propose other means of resolution. Thus, if the matter can be resolved informally, or if the complainant chooses to withdraw the complaint, the complainant will sign a statement outlining the informal resolution and releasing the University from taking any further action. If the matter is not resolved at this stage, the complaint will be investigated as set forth in Section (10) below.

10. Investigation: The following procedures will govern all investigations of complaints alleging violations of this policy:

   a. The EOC will thoroughly investigate complaints alleging violations of this policy with the assistance, as needed, of the following: the Office of Faculty Development and Advancement, the Office of Human Resources, and/or the respondent’s supervisor(s), except in cases where the respondent is a student. If the respondent is a student, the EOC will forward a copy of the complaint and any associated materials to the Dean of Students Department, which will, if appropriate, adjudicate the matter under the Code of Student Conduct. The Dean of Students shall notify the EOC of the outcome.
Florida State University 2015-16 General Bulletin Undergraduate Edition

Conflicts of Interest

The following policy concerning conflicts of interest applies to graduate students who are being supervised or evaluated by faculty as well as graduate students who are serving as teaching assistants and thus supervising or evaluating undergraduates.

Sexual relationships between faculty members and students where a direct supervisory or evaluative relationship exists are fraught with the potential for exploitation. The respect and trust accorded a faculty member by a student, as well as the power exercised by the faculty member in a direct supervisory or evaluative role, make voluntary consent by the student suspect. In their relationships with students, faculty members are expected to be aware of their professional responsibilities and to avoid conflict of interest, favoritism, or bias.

1. When any direct supervisory or evaluative role exists, a consensual sexual relationship between a student and a faculty member is a conflict of interest.
2. Any situation of direct supervision or evaluation will be ended immediately when a consensual sexual relationship between a student and a faculty member exists.
3. Any such relationship must be disclosed to the faculty member’s supervisor immediately.
4. Direct supervision includes any type of evaluative role. Examples of direct supervision of the student include teaching the student’s class, serving as a thesis or dissertation director, instructor of record, member of the student’s thesis or dissertation committee, member of the student’s comprehensive or doctoral exam committee, member of other committees where the focus is evaluation or supervision of the student’s academic competence or the student’s assistantship.

Florida State University Statement for Students on the Unlawful Possession, Use, or Distribution of Illicit Drugs and Alcohol

Florida State University Alcohol Policy

Introduction

Florida State University affirms the guiding ethical principle of responsible freedom. Students, staff and faculty are expected to show respect for order, ethical conduct, and the rights of others, and to model in daily living a high sense of personal honor and integrity. Florida State University neither encourages nor condems the legal consumption of alcoholic beverages. The University recognizes, however, that the majority of undergraduate students are below the legal drinking age and that there are serious health risks and behavior problems associated with the use of alcohol in the collegiate environment. Consequently, alcohol will be permitted at Florida State University or programs sponsored by Florida State University or its direct support organizations only in those settings which:

1. Comply with federal or state laws, local ordinances, University regulations, foreign country laws (in the case of study abroad programs conducted by Florida State University International Programs, Inc.), Student Conduct Code, and this policy;
2. Present minimal health and safety risks; and
3. In no way inhibit the full participation of those who choose not to drink alcohol.

Events and activities that encourage excessive drinking and/or lead to the endangerment of individuals will not be permitted. Any person or group in violation of federal or state laws, local ordinances, or of this policy will be reported to the proper federal, state, local or university authorities for appropriate action.

Policy Pertaining to All Members, Groups, Events, and Organizations in the University Community and Non-University Members, Groups, Events, and Organizations.

(a) No individual under the legal drinking age (minimum of 21 years of age permitted by the State of Florida or the minimum age prescribed by the laws of foreign countries, but in no case below the age of 18 years of age) may serve, sell, consume or possess alcohol on University properties, except to the extent allowed by law within licensed premises or designated areas of the University.

(b) Alcohol must be served by a licensed and insured third party vendor. No individual may serve or otherwise provide alcohol to persons under the legal drinking age.

(c) The Consumption of Alcohol: The consumption of alcohol on University properties will be restricted to the following areas:

1. Florida State University Law School Rotunda;
2. Licensed areas of the University (e.g., Center for Professional Development, Club Downunder, Crenshaw Lanes, Renegade Grill);
3. Academic food service facilities;
4. University Center areas include:
   i. Skyboxes
   ii. Miller Hall (C3300, UC)
   iii. President’s Box (Level 7, UC)
   iv. Booster/Alumni Board Rooms (C5300, C5301 UC)
   v. University Club (Building B, Floor 3, UC)
vi. Meeting Rooms (Building B, Floors 5 & 6, UC)

5. Lounges in Beth Moor at Longmire Building;

6. WFSU-TV and Radio Broadcast Center;

7. Premises in and around President’s house, Pearl Tyner Alumni Center, and surrounding grounds;

8. University property not located on the main campus, which has been leased by the University to private entities or persons, referred to in this rule as “private premises,” such as Heritage Grove;

9. Private University living quarters where those present are of legal drinking age (see the Guide to Residence Living, Community Expectations, for further restrictions that may apply in residence halls; or in the case of living quarters provided for study abroad programs, see policies promulgated by Florida State University International Programs Association, Inc.);

10. Premises in Doak Campbell Stadium area used or licensed for use on football game days;

11. At the following sites, when provided in conjunction with an artistic or municipal event:
   i. The Fine Arts Gallery;
   ii. The reception/hospitality room in the Opperman Music Hall;
   iii. The Fine Arts Building; and the
   iv. FSU Lab Theater.

12. Werkmeister Reading Room (201 Dodd Hall);

13. In common areas for special events approved by the University President or his/her designee. For faculty, the designee is the Vice President for Faculty Development and Advancement, for student groups, the designee is the Vice President for Student Affairs, and for all other groups the designee is the Vice President for University Relations.

(d) The Sale of Alcohol: The sale of alcohol on campus must be approved by the President or designee. Although the President or designee may approve the sale of alcohol on campus, only the Division of Alcoholic Beverages and Tobacco can issue the permit required to sell alcohol in the state of Florida.

(e) Promotional Guidelines: The promotion of activities or events shall not advertise alcohol or sponsorship by alcohol marketers without prior written approval of the Vice President for University Relations. Events that seek advertising approval must meet the following requirements:

1. Alcohol shall not be used as an inducement to participate in a University event and may not be offered as a prize or gift in any form of contest, drawing or competition. Social events which encourage drinking, drinking contests, or drunkenness, and the advertisement of such events, are prohibited.

2. Alcohol advertising on campus or in campus media, including that which promotes events as well as product advertising, shall not portray drinking as a solution to personal or academic problems of students or an enhancement to social, sexual, or academic status.

3. Advertising for any University event where alcoholic beverages are served shall mention the availability of non-alcoholic beverages as prominently as alcoholic beverages.

4. Promotional materials, including advertising for any University event, shall not make reference to the amount of alcoholic beverages available. This includes references to kegs or open bars.

5. Must adhere to University posting policy guidelines.

(f) Florida State University Police shall be notified of all on campus events that are not regularly scheduled that plan to serve alcohol.

(g) Laws and Regulations: All members of the campus community (students, faculty, staff, alumni, and guests) must adhere to all applicable federal or state laws, local ordinances, and University regulations related to the sale and use of alcohol. They include, but are not limited to the following:

1. It is unlawful for any person to aid or abet an underage person, as defined by Section 1 (a), in the purchase or attempt to obtain alcoholic beverages.

2. It is unlawful for any underage person to falsify a driver’s license or other identification document in order to obtain or attempt to obtain alcoholic beverages.

3. It is unlawful for any person to permit use of his/her driver’s license or any other identification document by an underage person to purchase or attempt to purchase alcoholic beverages.

4. No person may bring any type of alcoholic beverage into a licensed facility or area, nor may any person take alcoholic beverages out of the licensed facility or area, except that a bottle of wine purchased, but not fully consumed, at the University Center Club or similar restaurant establishment on campus may be removed by the person after it has been recorked as allowed by law.

5. Transportation of all alcoholic beverages on campus shall be in unopened and unobservable containers.

6. Damage to or destruction of property, or injury to person(s), which is caused by or can be shown to be related to the consumption of alcohol will be subject to disciplinary action, as will any other violation of this rule.

II. Guidelines for University Sponsored Events.

Definition: Large public and formal events where the University acts in symbolic ways to honor, celebrate, and reward achievements central to its mission (e.g., graduation, convocation, dedications, awards, ceremonies). These events convey important values about what is central to the University. Florida State University is concerned with the image conveyed when alcohol service is included as part of these events.

All University Sponsored Events are subject to the guidelines outlined in Section I of the alcohol policy. In addition, the following restrictions apply:

(a) Alcohol will not be served at any reception or other function, as defined above, sponsored by the University or taking place on the University campus where attendance is essentially open to the public and is not controlled by such means as individual invitation, registration, reservation and/or a fee payment process.

(b) At those functions where attendance will be predominately alumni and friends of the University, and controlled by individual invitation, registration, reservation, or a fee payment process, alcoholic beverages may be served with the following restrictions:

1. All persons will be required to show identification, including birth date, to ensure that they are a minimum of 21 years of age in the state of Florida;

2. The right to refuse to serve anyone who seems to be in danger of over consumption will be reserved and used; and

3. An ample supply and variety of food and non-alcoholic beverages will be available.

(c) At University sponsored functions where attendance will be predominately students, no alcoholic beverages will be served, regardless of the degree of control exercised over attendance.

III. Guidelines for University Related Events.

Definition: Any organization or group, consisting primarily of Florida State University students, employees, faculty or alumni, and/or which utilizes the Florida State University name or its premises, in which alcohol is served, must adhere to the following guidelines. These guidelines apply to all student organizations, whether or not they have received formal recognition or not.

All University Related Events, on or off campus, are subject to the guidelines outlined in Section I of the alcohol policy. In addition, the following apply:

(a) Sponsors are required to provide one or more alternative non-alcoholic beverage available in sufficient quantity throughout the event.

(b) Non-alcoholic beverages must be available at the same place as the alcoholic beverages and featured as prominently as the alcoholic beverages.

(c) If the alcoholic beverage is being sold, the alternative beverage should be available at a price equal to or less than the price of the alcohol being provided.

(d) Wherever alcohol is present, food must also be in sufficient quantity throughout the event.

(e) The cost of admission to an event may not include or cover the cost of alcoholic beverages.

(f) No state appropriated, federal funds or A & S fees may be used to purchase or sell alcohol.

(g) The burden of proof for showing legal age is placed upon the person desiring alcohol service. No service will be provided unless clear evidence of legal age is presented. Those of legal age and consuming alcohol will be identified by wrist bands, hand stamps, etc.
(h) It is the responsibility of the serving establishment, at the time that an alcoholic beverage is requested, to check the picture ID. If, for any reason, proof of legal drinking age cannot be provided upon request, it is the responsibility of the server to deny the request.

(i) At social functions where alcoholic beverages are served, direct access should be limited to a person(s) designated as the server(s) by a licensed insured vendor. Servers must not consume alcohol during the event.

(j) The server shall refuse to serve anyone who seems to be in danger of over consumption will be reserved and used.

Any organization found not to be in compliance with the University alcohol policy at their event may be subject to University disciplinary action and may forfeit its right to any fee support from the University.

IV. Tailgate Events.

Definition: Gatherings occurring in the designated parking areas surrounding the area of Doak Campbell Stadium prior to and after scheduled football games.

(a) Florida State University does not support or condemn the consumption of alcohol by individuals 21 years of age or older at tailgate events.

(b) Florida State University does not condone any act related to excessive consumption of alcohol that impairs, interferes, or endangers the safety or enjoyment of anyone attending these events, including the individual who chooses to consume alcohol.

(c) Individuals who choose to consume alcohol are responsible for their behavior and should not operate a motor vehicle after they have consumed alcohol.

V. Administration and Enforcement of Policy.

(a) The Vice President for Faculty Development and Advancement is the responsible University official for administration of the alcohol policy for all events involving primarily faculty. The Vice President for Student Affairs is the responsible administrator for students and student groups. The Vice President for University Relations is the responsible University official for administration of the alcohol policy for events managed by the direct support organizations and for those involving all other groups and individuals. Changes and revisions shall be coordinated by the Vice President for Student Affairs in consultation with other Vice Presidents and the General Counsel, subject to final approval of the President of the University.

(b) Enforcement of the alcohol policy shall reside in the Office of Student Rights and Responsibilities for individual student and student organization cases, and the Office of Faculty Development and Advancement for faculty related violations. Enforcement of the alcohol policy for all other groups, including outside groups, organizations, and individuals shall reside in the Vice President for University Relations.

(c) The University maintains the right to forward possible violations of federal or state laws, local ordinances, and University regulations, to the proper authorities through the Florida State University Police Department.

VI. Health Risks.

Alcohol consumption may cause a number of changes in behavior which are related to dose, rate of intake, body size and percentage of body fluid, expectations, social environment, physical conditions (disease or, more commonly, hormonal cycles can be factors), enzyme differences, and concentration of alcohol in a drink. It may increase aggressiveness, lower inhibitions, cloud judgment, reduce resistance, and hamper the ability to make decisions.

Alcohol first affects the area of the brain responsible for higher functions, such as decision-making and social inhibitions, suppressing an individual’s self-control. Alcohol in the blood can slow reaction time, reduce muscle coordination and impair eyesight, contributing to deficits in performance, judgment, memory, and motor skills. Even low doses can significantly impair the judgment and coordination required to drive a car safely. Florida State University reiterates that no one should ever drink alcohol and drive. The designated drive sanctioned by the Office of Student Affairs should never drink alcohol.

Moderate to high doses of alcohol may cause marked impairments in higher mental functions, altering a person’s ability to learn and remember information. Very high doses cause respiratory depression and death. If combined with other depressants of the central nervous system, much lower doses of alcohol may produce the effects just described above.

VII. Educational Resources and Support.

In support of responsible management of alcohol, the University provides numerous resources and support services available to students, faculty, and staff of Florida State University, including alcohol education, counseling, treatment, rehabilitation, re-entry, prevention, and intervention, as well as other educational programs and volunteer opportunities. Below are just a few of these resources and services.

(a) Health Promotion at University Health Services [644-8871; Web site is http://www.uth.usf.edu/]

(b) Office of Residence Life [644-2860; Web site is http://housing.fsu.edu/]

(c) FSU Police Department [644-1234; Web site is http://www.police.fsu.edu/]

(d) Volunteer opportunities for students seeking to work toward greater alcohol responsibility are available through Healthy Noles, which is an organization directed by Health Promotion at University Health Services. The Healthy Noles advocate for wellness on campus and alcohol responsibility is a significant component. For more information, contact Health Promotion [644-8871; or access the application at http://healthpromotion.fsu.edu].

(e) The Learning Resources Center of the College of Nursing has books, slides and videotapes on alcohol and other substances which are available to instructors in the College of Nursing. All other staff or faculty would need approval from the Dean of the College of Nursing to access these resources [644-1291]. More information is available at http://nursing.fsu.edu/.

(f) The Digital Media Center provides media resources, which include listings on alcohol topics, to all campus approved departments and organizations. There is no charge for this service when it is used for regularly scheduled classes [644-5924].

(g) SMART (Students Making Alcohol and Other Drug Responsibility Theirs) Choices consists of two, two-hour class sessions and an interactive online program at University Health Services that presents the legal and personal consequences of substance abuse. Students who are sanctioned by the Office of Student Rights and Responsibilities [644-2428, Dean of Students Department] or University Housing [644-2860] for on or off-campus violations of the University’s alcohol and drug policy must complete the course. Students may also enroll in the course free of charge if they would simply like to gain more knowledge about alcohol. Students may contact Health Promotion [644-8871] to sign up. The purpose of the course is to introduce the student to a process of self-examination that may lead to improved decision making and behavior change.

(h) The University Counseling Center (UCC) provides a structured two-session Alcohol and Other Drug (AOD) Evaluation for students who are sanctioned by the University for violations of the University’s alcohol and drug policy. In addition to mandated AOD sessions, AOD Evaluations are available on a voluntary basis to all FSU students. Following the AOD Evaluation sessions, a recommendation is made to the student regarding need for counseling treatment. Counseling treatment is provided to students on a voluntary basis only. Any fee-paying student currently enrolled at Florida State University is eligible for services at the UCC. Please contact the University Counseling Center for a current fee schedule [644-2003; Web site is http://www.counseling.fsu.edu].

(i) The Employee Assistance Program (EAP) at Florida State University was established to assist employees with behavioral, medical and substance abuse problems affecting employment. Employees can enter the program through a self-referral or supervisory referral. The EAP functions as a coordinator of counseling and other appropriate services available both within the University and the community [644-2288; Web site is http://www.eap.fsu.edu].

(j) Counseling services are also provided for students, staff, faculty, and the community by the Center for Couple & Family Therapy (CCFT), which fees are based on annual income [644-1588; Web site is http://ccft.fsu.edu/]

(k) The Human Services Center is a training clinic within the College of Education. Counselors are graduate students with counseling majors who offer service for students, staff, faculty, and the community. Services are free [644-3857; Web site is http://www.coe.fsu.edu/HSC].

(l) The Psychology Clinic is also a training clinic. Counselors are graduate students in clinic psychology programs. They provide one-on-one psychology services (no support groups) to students, staff, faculty, and the community. Fees are based on a sliding scale [644-3006; Web site is http://www psy.fsu.edu/community/clinic].

Florida State University Health Risks of Illicit Drugs

Illicit drugs all have some health-threatening qualities—some more than others. Examples include increased heart rate and lung damage from marijuana; central nervous system disorders from cocaine, heroin, and hallucinogens; and liver, lung and kidney damage from inhalants. HIV infection also is spread widely among intravenous drug users. Even infrequent use of illicit drugs can result in physical afflictions, such as hangovers, cardiovascular damage, digestive problems, tremors, impaired sexual response, and injuries due to lost coordination. Other possible effects include reduced alertness and impaired performance at school or work, interpersonal conflicts, and financial difficulties. Dependence and addiction are constant threats to users of illicit substances. Regular abuse of these substances generally exposes users to criminal elements, which may lead to involvement in further criminal activities.

Florida State University Illicit Drug Penalties

The penalty for possession (second-degree misdemeanor) is sixty days jail and $500 fine. Penalties for trafficking (first-degree felony) range up to thirty years imprisonment and fines of $500,000.

Note: These are only for information. State sanctions are subject to change by the Florida Legislature.

Florida State University Standards of Conduct

State of Florida statutes declare that it is unlawful for any person under 21 years of age to consume or possess alcoholic beverages. Consequently, no one under the legal drinking age may consume, distribute, or possess alcohol on University properties or as part of any University activity.

It is unlawful to sell, give, serve, or permit to be served alcoholic beverages to a person under 21 years of age. Furthermore, servers can be held civilly liable for damage caused by underage drinkers to whom they provided alcoholic beverages.

It is unlawful to be under the influence of, to use, possess, distribute, sell, offer, or agree to sell, or represent to sell, narcotics, hallucinogens, dangerous drugs, or controlled substances, except as where permitted by prescription or law.

Florida State University Use of Social Security Numbers

In accordance with Florida Statute 119.071(5), students and employees should be aware that Florida State University collects and uses social security numbers for the purpose of performing certain University duties and responsibilities as follows:

- Certain aspects of employment related to federal tax reporting, generation and reporting of I-9 documents, direct deposit, insurance policies, retirement benefits, state and federal reporting requirements;
responsibility. Upon request, the University discloses education records without consent to officials of another school in which a student seeks or intends to enroll.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the office that administers FERPA is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, S.W.
Washington, DC 20202-4605

Students have the right to obtain a copy of Florida State University’s student record policy. You can obtain a copy of the policy from the Office of the University Registrar, A3900 University Center, Florida State University, Tallahassee, FL 32306-2480.

Note: Under Federal Statute, the University is authorized to and may release records to other institutions without notification to the student, when the student is applying for admission.

Release of Student Information

The disclosure or publication of student information is governed by the policies of Florida State University and the State of Education within the framework of state and federal laws, including the Family Educational Rights and Privacy Act of 1974.

The written consent of the student is required for the disclosure or publication of any information that is: (1) personally identifiable of the student and (2) a part of the educational record. Certain exceptions to that generality, both in types of information that can be disclosed and in access to that information, are allowed within the regulations of the Family Educational Rights and Privacy Act, as described in the following paragraphs:

A. Subject to statutory conditions and limitations, prior consent of the student is not required for disclosure of information in the educational record to (or for):

1. Officials of the University with a legitimate educational interest. A school official is defined as a person employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his/her professional responsibility;
2. Certain government agencies;
3. Accrediting organizations;
4. Certain financial aid matters;
5. Certain research circumstances;
6. Health and safety emergencies;
7. A court pursuant to order or subpoena, so long as the student is notified in advance of the University’s compliance; and
8. As otherwise provided by law.

B. Subject to statutory conditions and limitations, prior consent of the student is not required for disclosure of certain types of information for:

1. Portions of the educational record for which the student has signed a waiver;
2. Portions of the educational record that are exempted by law including records of law enforcement agencies of the University; employment records of the student within the University as long as the student’s employment is predicated upon his or her status as a student; personal records of instructional, supervisory, or administrative personnel; and alumni records related to that student; and
3. Records transmitted to another school or school system in which the student seeks or intends to enroll, since the University generally forwards these on request.

Note: More specific information regarding such exempted information can be obtained by contacting the Office of the University Registrar, A3900 University Center. For the complete text of the applicable statutes refer to Section 1006.52, Florida Statutes, 20 U.S.C. 1232g, and 34 C.F.R. §99.1, et seq. or write the U.S. Department of Education at 600 Independence Ave., S.W., Washington, D.C. 20202.

C. Prior consent of the student is not required for disclosure of portions of the educational record defined by the institution as “Directory Information,” which may be released via official media of the University:

1. Name, date, and place of birth;
2. Local address;
3. Permanent address;
4. Telephone number (if listed);
5. Classification;
6. Major field of study;
7. Participation in official University activities and sports;
8. Weight and height of members of athletic teams;
9. Dates of attendance at the University;
10. Degrees, honors, and awards received;
11. The most recently attended educational institution; and
12. Digitized photo (Florida State University Card).

Important: The information above, designated by the University as “Directory Information,” may be released or published by the University without prior written consent of the student unless exception is made in writing by the student.

Request to Prevent Publication of Directory Information

Students may inform the University in writing of the student’s desire to prevent publication of such “Directory Information” or release of such information except as required by law. Appropriate forms for such action are made available by the Office of the University Registrar.

Caution: Until the University can develop the necessary sophistication in our data systems, a student’s request to prevent the release of publication of some of the items of “Directory Information” may result in preventing the publication of all items on that list, including graduation lists, honors, and award lists. The student can help avoid such errors with a gentle reminder to the Office of the University Registrar.

For complete information related to the procedures outlined above or concerning the procedures regarding waivers and consent forms, or to challenge the accuracy of the educational record, please contact: Office of the University Registrar, A3900 University Center, Florida State University, Tallahassee, FL 32306-2480.

Policy for the Use of Photographs and Videos in University Publications

Florida State University randomly and routinely photographs and makes videos on the main campus, branch campuses, and the international and departmental programs for educational and promotional purposes. These photographs and videos appear in official University publications and materials, which include but are not specifically limited to, General Bulletin (undergraduate and graduate), Registration Guide, Office of Admissions brochures, international program materials, departmental and college brochures, University Web sites, and other University information publications. For further information contact Media Relations at (850) 644-4030.

Illegal Downloading of Copyrighted Songs and Movies

Download and distribution of copyrighted music, movie and other entertainment files from online distribution sites that offer these items free of charge is illegal, in direct violation of the federal Digital Millennium Copyright Act, the Florida State University Student Conduct Code, and the Florida State University Policy OP-H-6 “Use of University Information Technology Resources.”

Illegal downloading and file sharing of copyrighted music, movies or other entertainment files is intellectual property/copyright infringement. Illegal downloading and file sharing activities maliciously expose the University’s network, computing systems and personal computers to destructive computer malware (viruses, spyware, worms, trojan horses, rootkits, keystroke loggers, etc.), and denial of service attacks. Illegal downloading activity significantly increases the risk of exposure to personal identity theft and irreparable or costly damage to both University and personally owned computing devices.

The potential consequences of illegal downloading and file sharing are extremely serious. There are both civil and criminal penalties for illegal downloading and file sharing:

• In a civil suit, an infringer may be liable for a copyright owner’s actual damages plus any profits made from the infringement. Alternatively,
the copyright owner may avoid proving actual damage by electing a statutory damage recovery of up to $30,000 or, where the court determines that the infringement occurred willfully, up to $150,000. The actual amount will be based upon what the court in its discretion considers just. See 17 U.S.C. § 504.

- Penalties to be applied in cases of criminal copyright infringement (i.e., violations of 17 U.S.C. § 506(a)), are set forth at 18 U.S.C. § 2319. Congress has increased these penalties substantially in recent years, and has broadened the scope of behaviors to which they can apply. Statutory penalties are found at 18 U.S.C. § 2319. A defendant, convicted for the first time of violating 17 U.S.C. § 506(a) by the unauthorized reproduction or distribution, during any 180-day period, of at least ten copies or phonorecords, or one or more copyrighted works, with a retail value of more than $2,500 can be imprisoned for up to five years and fined up to $250,000, or both. 18 U.S.C. §§ 2319(b), 3571(b)(3).
- Defendants who have previously been convicted of criminal copyright infringement under 18 U.S.C. § 2319(b)(1) may be sentenced to a maximum of ten years imprisonment, a $250,000 fine, or both. Finally, a defendant is guilty of a misdemeanor violation if he violated rights other than those of reproduction or distribution, or has reproduced or distributed less than the requisite number of copies, or if the retail value of the copies reproduced or distributed did not meet the statutory minimum, or if other elements of 17 U.S.C. § 506(a) are not satisfied. Misdemeanants can be sentenced a maximum of one year and can be fined a maximum of $100,000. See 18 U.S.C. §§ 2319(b)(3), 3571(b)(5).

Law firms representing the entertainment industry aggressively investigate instances of music and movie “pirating”, and upon identifying the offenders, are increasingly invoking the applicable laws to reap financial settlements and awards totaling thousands of dollars.

The University is not legally empowered to protect, represent, advise or otherwise assist students who become subject to legal proceedings because of copyright infringement. Students who are sued, offered an out-of-court settlement, or cited for criminal copyright infringement must obtain their own legal representation.

In addition to civil and criminal penalties, violators will be subject to the University’s disciplinary proceedings:

- **Student Conduct Code** ([http://dos.fsu.edu/srr/conduct-codes/student-conduct-code](http://dos.fsu.edu/srr/conduct-codes/student-conduct-code)): A student found to be in violation of provision (5)(c)(1) is subject to the sanctions defined in Section (9). Examples of sanctions that may be imposed for violations of the Student Conduct Code include reprimand, service hours, probation, suspension, and dismissal.

- **Florida State University Policy OP-H-6 “Use of University Information Technology Resources”** ([http://policies.vpfa.fsu.edu/bmanual/itpolicy.html](http://policies.vpfa.fsu.edu/bmanual/itpolicy.html)): A student found to be in violation of provision C.1.a (11) may lose University computer privileges as defined in paragraph F.2.

For further information regarding the downloading of electronic objects and media, please visit: [http://igs.fsu.edu/Copyright-Information/Guidelines/Electronic-Objects-and-Media](http://igs.fsu.edu/Copyright-Information/Guidelines/Electronic-Objects-and-Media).

**Notification to All Applicants for Admission and Students Attending Florida State University**

This General Bulletin is not a contract, either expressed or implied, between the University and the student, but represents a flexible program of the current curriculum, educational plans, offerings and requirements that may be altered from time to time to carry out the administrative, academic, and procedural purposes and objectives of the University. The University specifically reserves the right to change, delete or add to any provision, offering, academic curriculum, program, or requirement at any time within the student’s period of study at the University. The University further reserves the right to withdraw a student from the University for cause at any time. Students are on notice that admission to the University or registration for a given semester does not guarantee the availability of a course at any specific time. Likewise, admission to the University or registration for a given program of study within the University, or a department or college of the University, is not a guarantee of a degree or of certification in a program.

¹ Many graduate programs have earlier deadlines than the University-wide published dates. Contact the individual program or department for the applicable admission deadline. Programs that use the University-wide dates may have earlier deadlines for financial-award consideration.

² Includes the Tallahassee Community College/Florida State University Cooperative Program and the Florida Agricultural and Mechanical University/Florida State University Interinstitutional Registration Program.

*All information used to make an admission decision must be received by the published deadline. If the University deadline falls on a weekend, applicants have until the following Monday to submit applications and all supporting documents. Additionally, the University reserves the right to close admission earlier if warranted by enrollment limitations. Deadlines for applications and supporting documents at the FSU Panama City Campus are typically one month prior to the start of each term. Further information on the Panama City campus is available at [http://www.pc.fsu.edu](http://www.pc.fsu.edu).
## FALL 2015 ACADEMIC CALENDAR

### Note: Dates and times listed below are subject to change. Please refer to [http://registrar.fsu.edu/dir_class/fall/acad_cal.htm](http://registrar.fsu.edu/dir_class/fall/acad_cal.htm) for the most up-to-date information.

<table>
<thead>

Studio Art  B M
Theatre  B M D
Certificate Programs
Certificate in Global Pathways, Undergraduate/Graduate, Interdisciplinary

The Graduate School

Regular Degree Programs

Materials Science and Engineering [M, D]

Certificate Program
Certificate in Preparing Future Faculty, Graduate
Certificate in Preparing Future Professionals, Graduate

College of Human Sciences:
http://www.chs.fsu.edu/

Regular Degree Programs

Athletic Training [B]
Dietetics [B]
Exercise Science [B, M, D]
Family and Child Sciences [B, M, D]
Food and Nutrition [B, M, D]
Marriage and Family Therapy [D]
Retail, Merchandising and Product Development [B, M]

Joint Degree Program
Family Child Sciences and Law [MS/JD]

Certificate Program
Certificate in Retail Merchandising, Graduate

College of Law:
http://www.law.fsu.edu/

Regular Degree Programs

American Law for Foreign Lawyers [M]
Environmental Law and Policy [M]
Juris Master [M]
Law [JD]

Joint Degree Programs

Aquatic Environment Science and Law [MAES/JD]
Business and Law [MBA/JD]
Economics and Law [MS/JD]
Family and Child Sciences and Law [MS/JD]
Information Studies and Law [MS/JD]
International Affairs and Law [MS/JD]
Public Administration and Law [MPA/JD]
Social Work and Law [MSW/JD]
Sport Management and Law [MS/JD]
Urban and Regional Planning and Law [MSP/JD]

Certificate Programs
Professional Certificate in Environmental, Natural Resources, and Land Use Law, Graduate
Professional Certificate in International Law, Graduate

College of Medicine:
http://med.fsu.edu/

Regular Degree Programs

Biomedical Sciences [M, D]

College of Motion Picture Arts:
http://film.fsu.edu/

Regular Degree Program

Motion Picture Arts Production [B, M]
Motion Picture Arts Animation and Digital Arts [B]
Motion Picture Arts Writing [M]

College of Music:
http://music.fsu.edu/

Regular Degree Programs

Arts Administration [M]
Music Education [B, M, D]
Music Performance [B, M, D]
Music Theory and Composition [B, M, D]
Music Therapy [B, M]
Music-Liberal Arts [B, M]
Musicoology [M, D]
Opera Production [M]

College of Nursing:
http://nursing.fsu.edu/

Regular Degree Program

Nursing [B, M, D]
Nursing Practice [D]

Certificate Programs
Certificate in Nursing Education, Graduate
Certificate in Nursing Leadership, Graduate

College of Social Sciences and Public Policy:
http://www.coss.fsu.edu/

Regular Degree Programs

African-American Studies [B]
Applied Economics [M]
Asian Studies [B, M]
Asian Studies/ Business [B]
Demography [M]
Economics [B, M, D]
Geographic Information Science [M]
Geography [B, M, D]
International Affairs [B, M]
Latin-American and Caribbean Studies [B]
Latin-American and Caribbean Studies/Business [B]
Political Science [B, M, D]
Public Administration [M, D]
Public Health [M]
Russian and East European Studies [B, M]
Social Science [B]
Sociology [B, M, D]
Urban and Regional Planning [M, D]

Combined Degree Program

Master in Demography [BA or BS/MS]
Master of Public Administration [BA or BS/MPA]
Master of Public Health [BS/MPH]

---

1 Offered jointly by the College of Music and by the College of Fine Arts
2 Dual degree program  
3 Offered jointly by the College of Arts and Sciences, by the College of Communication and Information, and by the College of Education  
4 Open to qualified students in any undergraduate major who are accepted into the combined degree program.
RESEARCH FACILITIES AND SPECIAL PROGRAMS

Research and Research Facilities

Since its designation as a university in 1947, Florida State University has built a reputation as a strong center for research and creativity in the sciences, the humanities, and in the arts. During fiscal year 2013, Florida State University’s faculty generated over $200 million in external funding to supplement state funds used for research and creative activities. These funds, derived through contracts and grants from various private foundations, industries, and government agencies, are used to provide stipends for graduate students, to improve research facilities, and to support the research itself.

Many members of Florida State University’s faculty are renowned scholars in their fields. In the natural sciences, Florida State University is perhaps best known for its basic research programs in physics, chemistry and biochemistry, biology, psychology, meteorology, and oceanography. Its programs in materials science, high-field magnet research, superconductivity, geology, mathematics, computer science, and statistics also have strong research components, both basic and applied. Since 1982, Florida State has operated a College of Engineering as a joint program with Florida A&M University, an enterprise combining strengths in mechanical, electrical and computer, civil, environmental, chemical and biomedical, and industrial and manufacturing engineering. The Florida State University College of Medicine, founded by statute in 2000, has major research components in the biomedical and clinical sciences, family medicine and rural health, geriatrics, and medical humanities and social sciences.

Special Programs

The National High Magnetic Field Laboratory (NHMFL), which opened in 1994, is the only user-facility of its kind in the Western Hemisphere. The laboratory develops and provides a variety of research magnets at the highest fields available in the world. The laboratory plays a major role in the international race to enhance scientific disciplines as diverse as biology, chemistry, engineering, geochemistry, materials science, medicine, and physics.

This unique facility supports an extensive in-house research program that advances its scientific and technical capabilities. The in-house research program is built around leading scientists and engineers who concentrate on the study of strongly correlated electron systems, molecular conductors, magnetic materials, magnetic resonance, cryogenics, and new approaches to measuring materials properties in high magnetic fields. Research at the laboratory is opening new frontiers of science at high magnetic fields, which have enormous potential for commercial and industrial applications. The laboratory also has one of the world’s foremost magnet and science technology groups, which designs and builds this new generation of magnets. In 1999, the lab brought online a new 45-Tesla hybrid magnet, the most powerful steady-state magnet of its kind in the world. In 2004, the laboratory commissioned the world’s first ultra-wide bore 900 MHz NMR magnet for chemical and biomedical research. Another record fell in 2005, when lab engineers completed the 35-T—the world’s highest field “resistive” magnet. In 2011, a unique 25-Tesla “split magnet” was completed and put into operation. Currently under construction is a unique series connected hybrid magnet as well as the development of a 21-T ion cyclotron resonance mass spectrometer. The National High Magnetic Field Laboratory has many exciting research opportunities for graduate students who wish to pursue research at the edge of parameter space in any area of science utilizing these world-class resources and instrumentation.

Florida State University has made major investments in faculty and infrastructure in the area of materials science and engineering. The High Performance Materials Institute (HPMI), located in the new Materials Research Building, specializes in the synthesis and characterization of composite materials containing carbon nanotubes. These light weight but very strong materials have broad applications in transportation, armor, and energy. Associated with the NHMFL is the Applied Superconductivity Center (ASC). Researchers at the ASC study high temperature superconducting materials which can be used in magnet construction, motors, and energy storage or transmission devices. Integrative NanoScience is a collaborative program in materials science involving members of the University’s biology, chemistry and biochemistry, engineering, and physics departments. The current focus of this group is the application of hard and soft materials for future spintronics and biological applications. Other materials efforts of note take place in the departments of Chemistry and Biochemistry, Physics, and Scientific Computing, as well as in units of the College of Engineering. The University has a major faculty hiring initiative underway in the area of Energy and Materials focusing on scientists and engineers who work on materials for energy production, conversion, storage and utilization.

The Center for Advanced Power Systems is a multidisciplinary research center organized to perform basic and applied research to advance the field of power systems technology. The research focuses on electric power systems modeling and simulation, power electronics and machines, control systems, thermal management, high temperature superconductor characterization, and electrical insulation research. Development of cutting-edge technologies and a technology-savvy workforce in a broad range of aerospace and propulsion disciplines is the focus of the Florida Center for Advanced Aero-Propulsion (FCAA). FCAA is a Center of Excellence led by Florida State University with the University of Central Florida, the University of Florida, and Embry-Riddle Aeronautical University as partners. FCAA is housed in the newly constructed Aero-Propulsion, Mechatronics and Energy (AME) Center. The AME center contains a variety of unique instruments and facilities including wind tunnels and specialized device fabrication space.

The Program in Nuclear Research is highly ranked nationally, with emphasis on nuclear structure physics, nuclear astrophysics, radioactive beam studies, studies of nuclear reaction mechanisms using polarized Li beams, accelerator based atomic physics, electron scattering, hadronic nuclear physics, and relativistic heavy ion reactions. A large part of the program in experimental nuclear physics uses Florida State University’s Superconducting Linear Accelerator Facility, which ran its first experiment in 1987. The facility consists of a Super-FN tandem Van de Graaff electrostatic accelerator that injects into a heavy-ion superconducting linear accelerator. The facility utilizes state of the art instrumentation, provides forefront nuclear research capability, and is unique in the southeast.

Florida State University’s Coastal and Marine Laboratory (FSUCML) is located forty-five miles south of Tallahassee on Apalachicola Bay. This research facility gives scientists from all over the nation immediate access to the pollution-free marine environment of the north Florida coast. Facilities include a fleet of research vessels, classrooms, saltwater-equipped laboratories, guest housing, and a dive locker. FSUCML has recently acquired a new 65’ aluminum research vessel, the RV Apalachee. Faculty at the coastal and marine laboratory are playing a major role in research responding to the Deepwater Horizon oil spill. A scientific diving program provides support for and oversight of all scientific and educational compressed-gas diving conducted under the auspices of Florida State University. The Academic Diving Program also teaches or co-teaches courses in scientific diving methods.

The Center for Ocean-Atmospheric Prediction Studies (COAPS) trains oceanographers, meteorologists, and scientists in related disciplines. Research at COAPS focuses on ocean and atmospheric dynamics and their applications to interdisciplinary studies. In particular, COAPS scientists specialize in the modeling of ocean and atmospheric dynamics, climate prediction on scales of months to decades, air-sea interaction and modeling, and predictions of socio-economic consequences of ocean-atmospheric variations. COAPS hosts the University’s component of the Florida Climate Institute, a joint venture with the University of Florida.

Structural Biology, a collaboration of faculty from the Departments of Biological Science, Chemistry and Biochemistry, Mathematics, Medical Science, and Physics, is the research emphasis of the Institute of Molecular Biophysics. Research conducted by Structural Biology faculty focuses on the three-dimensional structure of biologically important macromolecules and the structural correlates of their functional properties. A variety of state-of-the-art research tools are available and include X-ray crystallography, cryoelectron microscopy, mass spectrometry, computer-based molecular modeling, electron paramagnetic resonance, fluorescence, laser and NMR spectroscopies. Graduate students working under Structural Biology faculty can enroll in either the molecular biology (MOB) PhD program or in the graduate programs of biological science, biochemistry or physics.

Essential to geologic investigation of Antarctica and global climate change are the analysis and preservation of marine sediments collected on Antarctic research expeditions. The largest collection of southern ocean sediment cores is located at the Antarctic Marine Geology Research Facility, located at the University. This forty-year old, National Science Foundation-funded facility holds more than ten miles of Antarctic marine sediment cores and is an invaluable resource for scientists both on campus and throughout the world.
All aspects of child behavior and learning are researched in Florida State University's Child Development Programs. The programs provide research sites and laboratory settings in which faculty and graduate students may observe and work with young children.

Research needs in Florida in the area of human services are accommodated by the Institute for Social Work Research. This institute is affiliated with the College of Social Work, but an open-door interdisciplinary approach is encouraged for most of the research funded by external sources.

Computing and information technology are widely used at Florida State University for both research and instruction. The University's Information Technology Services (ITS) manages a high-speed network that connects computers throughout the University to each other and to the world. ITS also provides wireless connectivity to the network from most locations on the FSU campus. In addition to the global Internet, Florida State University participates in the Florida LambdaRail and the National LambdaRail project, a special high capacity state and national network for academic and research purposes. The University maintains a shared high performance computing system, the Research Computing Center. The current setup has thirteen login nodes, 403 compute nodes and 6,464 CPU cores. The theoretical peak performance of the complete system is 75.4 TeraFlops.

Research centers within the institute are designed to respond to public and private sector needs. Specialists in the fields of biology, chemistry, geography, education, planning, public administration, physics, economics, law, and other areas carry out the University’s public service responsibility through programs in education, training, and applied research. The overriding objective is to successfully apply resources, human and technical, to policy problems within the state of Florida.

The Institute provides university students the opportunity to work on specific projects in institute centers under the supervision of experienced faculty and staff. These projects provide training for students in problem-solving environments. Government agencies and private sector organizations benefit from this institute's source of trained and skilled personnel.

Since 1951, students and faculty of Florida State University have benefited from its membership in Oak Ridge Associated Universities (ORAU). ORAU is a consortium of more than one hundred PhD granting universities and a management and operating contractor for the U.S. Department of Energy (DOE), located in Oak Ridge, Tennessee. ORAU works with its member institutions to help their students and faculty gain access to federal research facilities throughout the country; to keep its members informed about opportunities for fellowship, scholarship, and research appointments; and to organize research alliances among its members. Through the Oak Ridge Institute for Science and Education, the DOE facility that ORAU manages, undergraduates, graduates, postgraduates, and faculty enjoy access to a multitude of opportunities for study and research. Students can participate in programs covering a wide variety of disciplines, including business, earth sciences, epidemiology, engineering, physics, pharmacology, ocean sciences, biomedical sciences, nuclear chemistry, and mathematics. Appointment and program length range from one month to four years. Many of these programs are especially designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines.

In addition to membership in ORAU, Florida State University is one of the eight core university partners with Oak Ridge National Laboratory (ORNL). The other partner universities include Duke University, Georgia Tech, North Carolina State University, University of Tennessee, University of Virginia, Vanderbilt University, and Virginia Tech. Partnership with ORNL facilitates research collaborations and affords access to unique capabilities in neutron scattering, high performance computing, and materials science.

INTERNATIONAL EDUCATION

International Commitment

Florida State University recognizes that a great university builds and extends its service, its potential for research, and its scholarly standing, and enhances its contribution to the education of students and citizens of the state by providing an international dimension to its educational programs. This is true in the professions, the sciences, the arts, and the humanities.

The University recognizes that in an interdependent world, the welfare of the state and the well-being of its citizens are linked to the welfare of all peoples. Thus, it is vital that the teaching, research, and service of Florida State University support the economic and social development of the state, the nation, and other countries; protect the world environment; lead individuals and groups to better understanding of themselves and others; and contribute toward international understanding, world peace, and community self-awareness.

The University, in serving the community, recognizes that its major responsibility is to educate students in a manner that provides them with the understanding, skills, and knowledge that will allow them to be creative and useful citizens not only of the state, but of the world. In this process of education, students from other countries who study at our campus and Florida State University students who have studied overseas play an important role.

To accomplish these goals, Florida State University encourages and seeks students from abroad for its undergraduate and graduate programs, and professional colleges and schools in such numbers, and with such geographic origins, as to have an impact on the achievement of the University’s educational goals. It also seeks to provide opportunities for study abroad for its students and to afford them guidance and assistance in integrating these experiences with regular university study. Finally, the University encourages the development of an international dimension in the teaching, research, and service through the exchange of persons, ideas, and materials with other countries.

Florida State University seeks to accomplish these objectives through evaluation of existing and proposed international programs and services and by both short- and long-range planning for continued improvement and innovation to further the goals of international education in the University. Consistent with these goals, the University resolves to make available its facilities and resources to offer diversified international educational programs of quality and usefulness for all its students. The financial support needed for the accomplishment of these goals will be provided by University resources and is actively sought from state, federal, and foreign governments, as well as from international organizations, foundations, private organizations, and individual donors.

Center for Global Engagement

The mission of the Center for Global Engagement (CGE) is to facilitate international diversity and foster global understanding and awareness within the FSU community. The CGE is committed to enhancing FSU’s internationalization initiatives by offering academic classes and several certificate programs designed to help develop a more interculturally competent campus community. The Global Partners Certificate Program provides training and workshops to increase intercultural competence for faculty, staff and students and the Global Pathways Certificate helps students prepare for today’s global society through a combination of curricular and co-curricular programs. The CGE also offers the Intercultural Program Series and the Engage Your World Intercultural Dialogue series to provide all students with many enriching co-curricular opportunities to learn more about other cultures and current global issues. The CGE works to increase international student enrollment by supporting programs bringing in funded international students through foreign government or third-party sponsors; developing special programs through agreements with partner institutions abroad to attract talented students to the University to complete their senior year and apply to graduate school; and, facilitating international student exchanges with other universities. The CGE also provides immigration services and ongoing support to international students and visiting scholars to promote their integration into the campus community.

The Center for Global Engagement is located at the Global and Multicultural Engagement building (The Globe) on 110 S. Woodward Avenue, Tallahassee, FL 32306-4216. For more information, visit http://cge.fsu.edu/, call (850) 644-1702, or e-mail cge@admin.fsu.edu.

The Frederick L. Jenks Center for Intensive English Studies

Program Director: Patrick Kennell

The Frederick L. Jenks Center for Intensive English Studies (CIES) provides intensive instruction in the English language to non-English speakers. Its primary target audience is international scholars who are preparing to pursue degree work in American colleges and universities.

In addition, CIES evaluates the English speaking proficiency of FSU’s international Teaching Assistants (TAs) through its administration and scoring of the SPEAK test. Along with this assessment, the Center provides credit-bearing classes for those prospective international TAs who need further development of their speaking proficiency in English.

The Center also provides English-as-a-second-language services for the spouses of regular students at Florida State University, as well as for some already admitted international students who are experiencing difficulty in mastering the English language. CIES has an average of fifty to sixty students per session, representing approximately twenty different countries. Through its well-developed Conversation Partner program, CIES also serves as an integral part of FSU’s Global Pathways Certificate in providing many valuable and interesting opportunities for FSU students to meet, interact, and develop friendships with students from around the world. CIES truly is the place at Florida State “where the world comes to learn English”. For further information, please call us at (850) 644-4797 or visit our Web site at http://cies.fsu.edu.

International Programs

Director: James E. Pitts; Associate Director: Michele E. Ceci

Florida State University offers a wide variety of opportunities for students to study overseas. Students learn not only from their exposure to the cultural resources of the host countries but also through firsthand observations and participation in the political, economic, and social changes taking place outside the United States.

The University has operated international study centers in Panama City, Republic of Panama since 1957; in Florence, Italy since 1966; in London, England since 1971; and in Spain since 1997 (originating in Torremolinos and moving to its permanent home in Valencia in 2000). At each of these locations, courses are offered during the Fall, Spring, and Summer semesters. In addition to FSU students, the centers are open to students from other U.S. institutions and throughout the world.

Each of these study centers offers a broad curriculum, which includes courses that ideally lend themselves to their international location. In Florence, the courses focus on the areas of art history, classics, writing, English literature, history, humanities, Italian language, and politics. The London center offers courses in the areas of art history, education, English literature and writing, history, music, politics, social sciences, and theatre. In addition, the London Study Center serves as a base of operations for a number of curriculum-focused programs. Students may pursue specific topics such as British history, English literature, communications, international affairs, choral and instrumental music education, global sport management, multi-media, theatre, textiles, and merchandising. In Valencia, courses are offered in Spanish language, literature, and civilization as well as art, business, English literature, humanities, and music, mathematics, and science. In the Republic of Panama, the FSU-Panama campus offers courses in a variety of liberal arts disciplines including mathematics and the sciences. FSU-Panama also functions as a two- or four-year degree institution serving a large population of native Panamanians. Each study center offers an extensive internship program within a variety of disciplines.

In addition to the four Study Centers, International Programs offers programs in many other locations with sites varying from year to year. Programs are currently planned in locations including China, Costa Rica, Croatia, Czech Republic, Ecuador, England, Germany, Israel, Peru, Russia, Switzerland, and Turkey. These locations host a variety of study abroad faculty-led opportunities which are either broad curriculum offerings or programs focusing on a particular area or major. Internship opportunities are available in China and Peru as well as at the four study centers. Additionally, the First Year Abroad program, created especially for high-achieving, global-thinking students, allows students to complete the first twelve months of their Florida State career studying abroad with International Programs. Students can choose to spend their first year at any of the four study center locations. These students can
International Education

2015-16 General Bulletin Undergraduate Edition Florida State University

International Programs is constantly adding to and updating the program offerings and locations. For the latest information, visit the Web site at http://www.international.fsu.edu or contact us at: International Programs, A5500 University Center Tallahassee, FL 32306-2420; (850) 644-3272 or (800) 374-8581; IP-info@fsu.edu.

Florida–Costa Rica Institute

Co-Director: Gisela Fisher

Florida State University and Valencia Community College co-administer The Florida–Costa Rica Linkage Institute on behalf of the state’s higher education systems.

The Florida–Costa Rica Linkage Institute (FLORICA) is one of the three original linkage institutes established by the Florida Legislature in 1986. The International Linkage Institute Program has expanded since that time to include a total of eleven institutes throughout the state. The intent of the Florida Legislature is for the Florida–Costa Rica Linkage Institute to offer opportunities at both the university and community-college levels for education and training; state development; curriculum development; collaborative research; technical assistance; cultural, faculty, and student exchange; intensive Spanish instruction; library materials exchange; computer linkage; and joint commercial ventures. These activities are to be undertaken in conjunction with Costa Rica’s four public universities, its Ministry of Education, and the State of Florida’s eleven state universities and twenty-eight community colleges.

Law Program at Oxford University

Florida State University conducts an international law program in the prestigious academic atmosphere of Oxford University. The program utilizes its unique setting to enhance the study of international and comparative law and the history of common law. ABA-approved law courses are taught by a combination of Florida State University College of Law faculty and approved professors from Oxford University. The program is available to students in good standing at an ABA-approved law school who have completed at least one year of study. Visit our Web site at http://www.law.fsu.edu/academics/jd-program/study-abroad/oxford.
Florida State University students engage in a supportive and challenging environment designed to maximize learning and success. The University provides opportunities for student growth in the areas of social and cultural awareness, physical well-being, intellectual expansion, and spiritual and moral growth. The University is committed to creating a sense of community among students, faculty, and administrators that embodies respect, responsibility, and acceptance of all people.

Division of Student Affairs

Vice President for Student Affairs: Mary B. Coburn
Associate Vice President for Student Affairs: Allison Crume
Assistant Vice President for Student Affairs: Brandon Bowden

The goals of the Division of Student Affairs are to facilitate student development, celebrate differences, and promote civic and global responsibility in both formal and informal educational experiences. The Vice President for Student Affairs and staff are responsible for the following departments:

- Campus Recreation
- Career Center
- Center for Academic Retention and Enhancement (CARE)
- Center for Global Engagement
- Center for Leadership & Social Change
- Dean of Students Department
- Fraternity and Sorority Life
- New Student and Family Programs
- Student Disability Resource Center
- Student Rights and Responsibilities
- Victim Advocate Program
- Withdrawal Services
- Oglesby Union
- Art Center
- Askew Student Life Center
- Crenshaw Lanes
- FSU Flying High Circus
- Guest Services
- Oglesby Gallery
- Student Activities Center
- Union Board
- Union Productions
- Student Government Association
- Radio and Television
- University Counseling Center
- University Health Services
- University Housing and Child Development Programs

Some of these departments and their programs are highlighted below; however, for more complete information, refer to Florida State University Student Handbook or the Division of Student Affairs Web site at http://www.studentaffairs.fsu.edu. The Handbook is available at the Union Information Center. The University also offers the following student service programs, which are administered by their individual offices or departments:

- Assessment Services
- Parking and Bus Services
- Bicycle Parking
- FSU Police Department
- Seminole Dining
- StudentsFirst

For academic support services, refer to the “Academic Advising and Academic Support Services” chapter of this General Bulletin. For employment services, refer to the “Financial Information” chapter.

Campus Recreation

Campus Recreation’s purpose is to support every member of the FSU community in their pursuit of lifelong wellness by proving a diverse array of high-quality recreational programs, services, and facilities.

Two fitness facilities, the Bobby E. Leach Center and the Fitness and Movement Clinic, offer a variety of fitness and wellness services to students, faculty, and staff. Both facilities have cardiovascular and strength training equipment along with free weights available to all patrons. Over one hundred group fitness classes are available each week along with fitness consultations from the Strength and Conditioning staff. Instructors and personal trainers are nationally certified. Wellness testing is available at both facilities to help participants enhance their all-around personal wellness. The Leach Center also contains a sixteen-lane, twenty-five-yard lap pool, spa and sauna, indoor jogging track, basketball and racquetball courts, and smoothie bar. The FSU Aquatics staff provides health and safety instruction, including CPR/AED, First Aid, and Lifeguard training; adult and youth swim lessons, and other certification programs. Access to both fitness facilities is free for students. Faculty, staff, alumni, and affiliates may purchase monthly or annual memberships.

The FSU Reservation (the “Rez”) is the University’s seventy-three acre lakefront facility located just five minutes from campus. Students gain free entry into the Rez, where they can enjoy kayaking, canoeing, sailing, or stand-up paddle boarding on Lake Bradford. Sunning, swimming, sand volleyball, disc golf, a climbing wall, and picnic pavilions are also available. Student organizations, University programs, and other community groups can rent space in the FSU Reservation Retreat Center for meetings. The Rez is also home to Campus Recreation’s new high challenge (ropes) course and a low ropes course which host teambuilding and leadership development events by the FSU Challenge Program. The Outdoor Pursuits program at the Rez provides students the opportunity to enjoy outdoor adventure trips around the region including backpacking, kayaking, climbing, mountain biking, and paddling.

Campus Recreation also operates the Intramural Sports and Sport Club programs. Students may participate in over forty intramural sport leagues year-round, from flag football to soccer and basketball to kickball. Leagues are available for men’s, women’s and co-ed teams with various divisions to accommodate a wide range of skill and talent levels. Most IM sports are free for students. Nearly 2,000 students participate in one of over forty sport clubs. The clubs provide various instructional, recreational, and competitive opportunities for the more dedicated athlete. Sports clubs are over ninety percent self-funded, meaning that students fundraise tens of thousands of dollars annually to purchase new equipment, uniforms, and to fund travel. Students can also enjoy pick-up games virtually any time at FSU’s award-winning Rec SportsPlex outdoor sports facility, the Main Campus Fields, and Westside Courts.

For more information on Campus Recreation offerings, visit http://campusrec.fsu.edu.

Career Center

Nationally recognized for its comprehensive career services, the Florida State University Career Center provides students and alumni with the resources to prepare them for career success. With individualized career advising, a library offering over 3,000 information resources, employability skills workshops and mock interviews, the Career Center helps students plan their careers. Career advisors, career liaisons, and staff assist students and alumni with areas including choosing a major, researching occupations and employers, identifying internship opportunities, exploring post-graduate study and developing job search strategies. No appointment is necessary to speak with a career advisor or career liaison. For students who would like to map out their career plans with the assistance of an instructor, the Career Center offers a one-to three credit hour course, SDS 3340, Introduction to Career Development. This course gives students indispensable resources to help them make a successful transition to their next destination.

The Career Center links students directly with employers through career fairs, on-campus interviewing and a powerful network of Florida State alumni, parents, and friends of the University. These opportunities allow students to network with employers nationwide and apply for positions. Students can also apply for career-related work experience, such as internships, cooperative education, part-time and summer jobs, externships, volunteer opportunities or full-time jobs through SeminoleLink, an extensive online jobs database.

FSU students can stand out from the competition by taking advantage of Career Center tools. The Career Portfolio allows students in all academic disciplines to learn about, build and manage their skills and accomplishments through an online portal. Students can make themselves more marketable to employers or graduate programs by participating in the Garnet and Gold Scholar Society, a unique program which facilitates involvement and recognizes engaged, well-rounded students who excel within and beyond
multiculturalism enhances the quality of life. From this understanding, students belong to and create intercultural communities that benefit from the value of difference.

Students and alumni are known and respected for their leadership acumen, and public service initiatives. In their personal, professional, and creative communities, they readily seek and accept opportunities for life-long learning, meaningful influence, and positions of trust.

The Center offers over twenty-five programs that students can choose from which include: *service opportunities*, *leadership education*, and *identity development*. For more information, contact The Center for Leadership & Social Change, Division of Student Affairs, Dunlap Student Success Center, 100 S. Woodward Avenue, Tallahassee, FL 32306; (850) 644-3342; Fax (850) 644-3362; Web site: http://www.thecenter.fsu.edu; e-mail: thecenter@admin.fsu.edu.

**Dean of Students Department**

The primary focus of the Dean of Students Department is to support the academic mission of Florida State University and the Division of Student Affairs by providing services, programs, resources, and advocacy for the needs and interests of all students. This includes advocacy for students reporting alleged sexual harassment and students in crisis. Staff members provide educational opportunities for students to develop their values, decision-making skills, and leadership capabilities. For more information, contact Dean of Students Department at 4100 UCA, call (850) 644-2428 or (850) 644-8504 (TDD), or visit http://www.deanofstudents.fsu.edu.

The **Student Disability Resource Center (SDRC)** is the primary advocate for students with disabilities and a resource site for the University community on disability-related issues. The SDRC also provides academic support services such as extra time on exams, readers, note-takers, alternate texts, and sign language interpreters. All students, faculty and staff who have mobility impairments, temporary or permanent, are eligible to use the FSU Accessible Van. Applications for students to utilize this service can be found at the SDRC. The SDRC maintains the Theodore and Vivian Johnson Adaptive Technology Lab, a facility that houses computers and adaptive equipment that help students with disabilities successfully meet the requirements of their academic programs. Any student in need of specific services and reasonable accommodation should contact the Student Disability Resource Center, 108 Student Services Building, or call (850) 644-9566 or (850) 644-8504 (TDD), or visit http://www.disabilitycenter.fsu.edu.

The Office of **New Student & Family Programs** coordinates a series of programs designed to support a student’s transition to and experience at Florida State University. Orientation Programs are designed to help students transition to college and assist family members in understanding their students’ experiences during this exciting time. The Family Connection welcomes families to connect with, support, and encourage a university environment that allows students to excel in services, leadership, and academic excellence. The New ‘Nole resource is a one-stop-shop for key information students will need to make a successful transition to college life at Florida State. New Student and Family Programs interact with every student as they begin their journey at Florida State University.

All new undergraduate students are required to attend an orientation, advisement, and registration session coordinated by the Dean of Students Departments’ Office of New Student & Family Programs. During orientation, students are given essential information: the University’s policies and procedures, community values and standards, and academic requirements and opportunities. Students also receive practical advice on consumer survival: where to buy books, open checking accounts, or meet other students with similar interests.

In addition to meeting faculty and administrators, students are assigned to small groups led by trained staff, comprised of currently enrolled students, who inform and guide the newcomers. Students must meet with their academic advisors before registering for classes. Students may not register for their first term on campus until they have completed an orientation session. Although they may be admitted up to a year before they enter, students may only attend orientation immediately prior to their enrollment. New Student & Family Programs provides sessions preceding each academic term.

Orientation sessions include a concurrent session for family members. During these sessions family members learn about the University, its services and academic programs, and meet with administrators and faculty. Family members and students share tours of residence halls and visit booths set up in a fair-like atmosphere.

All admitted undergraduate students receive by mail information and instructions about registering for orientation. Attendance is by reservation only, and participants must pay a nonrefundable fee. For more information, please visit http://nsfp.fsu.edu.
The Office of Student Rights and Responsibilities administers student disciplinary procedures in accordance with the Student Conduct Code and maintains official disciplinary records. An emphasis is placed upon educating students about their rights and responsibilities as members of the University community. University codes and policies pertaining to students can be found in the Florida State University Student Handbook and the “Academic Regulations” chapter of this General Bulletin. For more information regarding student judicial procedures, call (850) 644-5136, or visit http://srr.fsu.edu.

The Withdrawal Services staff provides support to students and their families when a student’s enrollment is unexpectedly interrupted for personal, medical, or mental health reasons, and/or other crisis. The Withdrawal staff explains the withdrawal application process and its various stages, evaluates fee and grade liability for completed coursework, refers students to their Academic Dean and offers other University support services as needed, notifies each student of the final decision, and maintains a University record of the completed withdrawal. After meeting with the Withdrawal Services staff, students should expect to spend time in discussion with their Academic Dean about the implications of withdrawing, the viability of their withdrawal application, and any alternative academic options that may exist. Academic Deans and their staff possess the authority to decide and approve student withdrawals from a semester of enrollment. For more information call (850) 644-1741 or http://withdrawal.fsu.edu.

Staff of the FSU Victim Advocate Program provide confidential advocacy to victims of all types of crimes. An advocate is on-call twenty-four hours a day to respond to those Florida State University students, faculty, and staff who are victimized, and to any person victimized on Florida State University campus. The services offered include emotional support, court accompaniment, crisis intervention, instructor notification, academic support, referrals, and educational programming for the campus community. For information call (850) 644-1741 or text and email https://victimadvocate.fsu.edu. After hours, call (850) 644-1234 and ask for an advocate.

Case Management Services works with students to provide emotional support, brief crisis counseling, advocacy, and to identify immediate needs, making appropriate referrals to campus and community resources. Cases are monitored, as needed, to ensure that individuals receive the support necessary to improve their life situation. Case Managers may also assist in sending crisis notification letters to faculty. Case management is available to assist with questions and referrals from any faculty, staff, family, friend, or community member concerned about an individual’s well-being. For more information, please call (850) 644-2428.

Center for Global Engagement (CGE)

The Mission of the Center for Global Engagement (CGE) is to facilitate international diversity and foster global understanding and awareness within the FSU community. The CGE is committed to enhancing FSU’s internationalization initiatives by offering academic classes and several certificate programs designed to help develop a more interculturally competent campus community. The Global Partners Certificate Program provides training and workshops to increase intercultural competence for faculty, staff and students and the Global Pathways Certificate helps student prepare for today’s global society through a combination of curricular and co-curricular programs. The CGE also offers the Intercultural Program Series and the Engage Your World Events, and a variety of leadership skills. Students who participate in the many involvement opportunities available in Student Activities provide leadership and direction in all facets of social, cultural, and educational programming for the FSU campus. Students gain experience in booking events, marketing and advertising, hospitality, staffing events, and a variety of leadership skills.

Union Store, and Computer Lab.

The Student Government Association (SGA) is the student’s voice at Florida State University. The mission of SGA is to provide “quality leadership for, and accountability to, its constituency by recognizing that strength arises from diversity, engagement, and dialogue”. Elected and appointed officials enjoy many opportunities to acquire leadership and administrative skills and to serve their fellow students and the University. For more information, call (850) 644-1811 or stop by A205 Oglesby Union.

The Congress of Graduate Students (COGS) is an elected body of all post-baccalaureate, graduate, professional and doctoral students at the University. COGS is a unified voice and advocate for all graduate related matters. It also offers travel grants to graduate students, funds graduate organizations, and sponsors a variety of programs and services, including a computer lab for students. For further information, call (850) 644-7166 or stop by A205 Oglesby Union.

The SGA annually allocates approximately $13 million of activity and service fees. The SGA funds or partially funds activities of the student senate, the executive branch, student government agencies, and numerous student organizations and University units. Those units receiving funds include the Leach Center, Oglesby Union, Campus Recreation, COGS, Homecoming, the Golden Tribe Lecture Series, the Dean of Students, the FSU libraries, the Asian-American Student Union, the Black Student Union, the Center for Participant Education, the Hispanic/Latino Student Union, the Inter-Residence Hall Council, the Pride Student Union, the Women Student Union, the Veteran Student Union, First Responders Unit, SAFE (escort service), the SGA Publications Office, the Office of Governmental Affairs, WVFS V-89 (student-run radio station), College Leadership Councils, and the Student Sustainability Initiative. This means that a majority of events on campus are free to FSU students. For more information on these offices or services, please come by A205 Oglesby Union or visit our Web site at http://www.sga.fsu.edu.

Oglesby Union, Askew Student Life Center, and FSU Flying High Circus

The Oglesby Union is the center of student activity on campus, hosting a variety of cultural, educational, social, and recreational activities. Union facilities include a student activity center, a restaurant; a lounge area for study and television lounges; an arts center and gallery; a bowling, billiards, and games room; and lost and found; automatic teller machines; information center; student organization offices; meeting rooms; auditorium; and ballrooms. The Oglesby Union complex is also home to student campus post office, UPS Store, and Computer Lab.

The Oglesby Union coordinates multiple University-wide events including Seminole Sensation Week, Homecoming, Parents’ Weekend, and Family Weekend. Seminole Sensation Week welcomes incoming and returning students the week prior to the beginning of Fall semester classes. The events and activities provide students with an opportunity to learn more about campus life. Homecoming builds spirit on campus and in the community for Florida State University and welcomes alumni back. Student organizations come together to participate and compete in Homecoming activities. Parents’ and Family Weekends welcome parents and families to campus to share in the FSU experience with their students. Parents’ Weekend is in the Fall, and Family Weekend is in the Spring.

The Oglesby Union comprises multiple departments providing services, support, and programming for the university community. The Art Center offers a variety of classes and programs including Paint-a-Pot, Art in Low Places, and a full-service frame shop. You can enjoy rotating exhibits and art work at the Oglesby Gallery, located on the second floor of the Oglesby Union. Crenshaw Lanes has been a tradition at FSU since 1964. Featuring twelve bowling lanes and ten billiards tables, Crenshaw Lanes provides fun and healthy activities for FSU students. The Union provides space that can be reserved for a variety of events through the Guest Services department. Space may be reserved for meetings, conferences, social events, dances, and banquets. Recognized Student Organizations may request space by stopping by the Guest Services office in the Krentzman Lounge of Oglesby Union, visiting them online at http://unionreservations.fsu.edu or by calling them at (850) 644-6083.

The Student Activities Center (SAC) is here to help you create your FSU Experience! Located on the third floor of the Oglesby Union, Activities Building, SAC is your direct connection to getting involved on campus. Come meet with a Peer Involvement Mentor to start your involvement experience. Over six hundred student organizations are recognized annually by Student Activities. Departments within the SAC include Student Organization and Involvement, Union Productions (UP), Market Wednesdays, Homecoming, Dance Marathon, and Event Planning. Resources for students include copy, faxing, storage space, campus mailboxes, and meeting space all for student organization.

Students who participate in the many involvement opportunities available in Student Activities provide leadership and direction in all facets of social, cultural, and educational programming for the FSU campus. Students gain experience in booking events, marketing and advertising, hospitality, staffing events, and a variety of leadership skills. Union Productions sponsors over one hundred and twenty programs and events a year, including an array of bands, comedians, and special events through the Oglesby Union’s hottest—The Club Downunder, and other venues on and off campus.
The Office of Fraternity and Sorority Life advises and advocates for the more than 6,200 students involved with fraternities and sororities. These fifty-five organizations are divided into the following governing councils: twenty-three chapters of the Interfraternity Council (IFC), ten chapters of the Multicultural Greek Council (MGC), six chapters of the National Pan-Hellenic Council (NPHC), and seventeen chapters of the Panhellenic Association. Fraternities and sororities at Florida State University provide students with an opportunity to establish community and build a strong support group while furthering the ideals of scholarship, leadership and service. These organizations have been an integral part of the holistic education and development of students since 1904.

The Askew Student Life Center (ASLC) is home to one of the nation’s leading campus movie programs, showing a variety of films each week in the 380-seat state-of-the-art theatre. While at the ASLC, check out the Cyber Café where you can enjoy video games and computer gaming or get a drink and treat at Grindhouse coffee shop. The Congress of Graduate Students (COGS), Assembly Room, University Housing offices, and the University Counseling Center are all located in the ASLC.

Florida State University’s Flying High Circus, a component of the Union, is one of only two collegiate circuses in the nation. Founded in 1947, the circus has delighted audiences at home and abroad with performances such as juggling, balancing, and aerial acts. Students work as their own riggers, put up the big top, and assist with audio and lighting production. The Flying High Circus performs on campus in the Fall, during Parents’ Weekend, and in the Spring, for the Annual Home Show Series. A group of circus performers performs in the Summer in Callaway Gardens, and another group hosts a Camp for Kids in Tallahassee.

The Oglesby Union Board represents the University community to ensure that the facilities, services, and amenities offered by the Oglesby Union complement the needs and interests of its constituents. The Board is made up of twelve students, two faculty, two staff, and one alumnus. Union Board elections take place in the Spring semester. The Union Board office is located in the SAC (A305).

For more information on the Oglesby Union and all of the departments mentioned above, please visit http://union.fsu.edu.

Student Veterans Center

The Florida State University Student Veterans Center (SVC) provides programs and services for veterans, their dependents and active-duty personnel, including assistance with and certification of educational benefits offered through the federal departments of Veterans Affairs and Defense. The SVC coordinates an on-campus orientation session exclusively for current and former U.S. military members each Fall. The University also offers a free one hour/week course each Fall and Spring semester called Strategies for Veteran Success (SLS 3407). Additionally, approximately forty Veteran Liaisons are available for advice and assistance in academic and administrative units throughout campus. For more information, please visit A4300 University Center, call (850) 644-9562, fax (850) 645-9868, e-mail veteran@admin.fsu.edu, or visit http://veterans.fsu.edu/.

Radio and Television

The University-owned and operated WFSU-FM and WFSQ-FM are Tallahassee’s only listener-supported, noncommercial public radio stations. Listeners tune into classical music, jazz, big band, and new-age music on WFSQ, and listen to local and state news and information programs through National and Florida Public Radio on WFSU.

Florida State University students interested in a career in broadcasting are encouraged to participate in the station’s volunteer and internship programs. Participants are given an opportunity to work within a professional public radio setting and gain valuable experience in many facets of the station’s operation, including programming, production, announcing, public relations, and management.

WFSU-TV is an award-winning, noncommercial public television station licensed to the State Board of Education and operated by Florida State University. One of the fastest growing PBS stations in the nation, it recently extended coverage to the western area of the state transmitting on Channel 56, WFSQ-TV, Panama City. Both WFSG-TV and WFSU-TV broadcast PBS favorites and locally produced programs that offer news and feature stories, sports events, and community-interest spots.

Fund-raisers, staffed entirely by volunteers, give students an opportunity to gain broadcasting experience as members of the camera crew or production staff. Another way to learn production, public relations, or fund-raising techniques is through a professional-level internship, available only to a few students who are willing to invest a great deal of time and energy.

WVFS Tallahassee (89.7 FM), the Voice of Florida State, is the FSU student-run radio station. An affiliated project of the Student Government Association and the College of Communication and Information, it serves two purposes: to supply the student body with music and information not available on other local radio stations and to train Florida State University students in the basic concepts of broadcasting and radio station management. WVFS also airs a wide array of specialty shows, and sports programming pertinent to University students.

Anyone enrolled at Florida State University or in the FAMU—FSU Cooperative Program is eligible to work for WVFS. Most staff members work on a volunteer basis; however, in some instances class credit can be earned through Department of Communication courses. Students with writing, sales, public relations, audio production skills are welcome, but no experience is required. WVFS recruits for all positions three times a year, always during the first week of each semester; listen to 89.7 FM for details.

Health Care

University Health Services (UHS) provides primary out-patient medical care to eligible FSU students and their dependents age thirteen years and older. Currently enrolled, fee-paying students are not charged for illness or injury office visits. Additional services such as psychiatry, annuals, procedures, lab, diagnostic imaging, physical therapy, chiropractic, and massage are provided at a fee. UHS will bill the student’s insurance for any charges incurred. Services include general medical care, women’s care, psychiatry, allergy injection clinic, immunizations, nutrition, health promotion, confidential HIV testing, lab, x-ray, physical therapy, dental, chiropractic, and massage.

UHS clinical staff includes board-certified physicians, psychiatrists, advanced registered nurse practitioners, physician assistants, licensed practical nurses, x-ray technologists, registered nurses, and dieticians. The health center has more than one hundred full-time employees and also employs many part-time and student staff members.

The Florida State University Health and Wellness Center opened August 20, 2012. The 140,000 square foot facility is a collaborative effort between the Division of Student Affairs and Academic Affairs. The new facility has ample space dedicated to comprehensive prevention and treatment services for the campus community. UHS offers a volunteer Medical Response Unit which trains students as advanced first responders who then serve the campus community.

All students must meet State Board of Education immunization requirements. Immunization requirements for FSU are explained in the Health Compliance checklist which can be found at http://www.uhs.fsu.edu under the "Forms/Compliance" tab. Immunization documents can be faxed, mailed, hand-delivered, or submitted through the FSU electronic drop box to the Health Compliance Office. Immunization documentation and health history forms must be submitted to the Health Compliance Office in sufficient time to be processed before the student will be able to register for classes.

All incoming full-time students are required to have health insurance coverage. As a condition of their admittance to Florida State University, all non-United States citizens on a J-1 or F-1 visa must have appropriate health insurance regardless of their credit hour load. Florida State University sponsors reasonably priced policies that meet insurance requirements for both domestic and international students. Information about the policies available for students is posted on the student insurance Web site at http://www.studentinsurance.fsu.edu. For student insurance policy information, students may call the Health Compliance Office at (850) 644-3608. Other insurance options for international students are also accessible on the student insurance Web site.

Medical care outside the health center facility is the financial responsibility of the student.

The UHS Health Promotion Department is dedicated to assisting FSU students in their academic success through individual, group, and population-based health and wellness initiatives. The Health Promotion Department also addresses the Healthy Campus 2020 Mission. To maximize campus wellness, we support academic and personal success by:

- Addressing environmental factors that reduce risk
- Educating about healthy lifestyles
- Promoting positive choices and behaviors
- Providing a coordinated continuum of care
- The Health Promotion Department also offers internships and educational opportunities. The UHS Health Promotion Department mentors, trains, and advises peer health educators while encouraging creativity and leadership. The peer health educators:
  - Advocate for health and wellness to all FSU students under the auspices of Healthy Campus 2010/2020
  - Function as an extension of UHS’ Health Promotion Department, assisting with collective goals and objectives
• Create and deliver sustainable outreach and prevention initiatives
• Make healthy and safe lifestyle decisions and avoid high-risk behaviors
• Encourage their friends to develop responsible habits and attitudes toward high-risk health and issues

Students can also join the peer health education group, Healthy NoleS, a University and community based network focusing on comprehensive health and safety initiatives. All students are encouraged to visit the University Health Services Web site at http://www.uhs.fsu.edu for more complete information, or call (850) 644-6230 or (850) 644-8871.

Counseling Services

The University Counseling Center (UCC), a department in the Division of Student Affairs, provides counseling services and programs to help students resolve psychological issues and personal concerns that interfere with academic progress, social development, and emotional well-being. Our goal is to help students function to the best of their abilities and make the most of their years at FSU. Because student fees cover these services, there is no out-of-pocket expense for any visit for all currently enrolled FSU Students. Services include time-limited individual counseling, unlimited group therapy, crisis intervention, consultation, and referrals.

Outreach presentations on mental-health topics and life skills are available to students, residence halls, student organizations, faculty, and staff. Those interested can complete the online request form at http://www.counseling.fsu.edu. The UCC sponsors RENEW (Realizing Everyone’s Need for Emotional Wellness), a peer-educator student organization whose mission is the promotion of emotional health and coping skills to FSU students. Students can receive individual instructional sections by RENEW members on various topics including time management, stress management, and test anxiety.

Counseling sessions are by appointment except in cases of emergency. Records of visits to the UCC are strictly confidential and are not included in the student’s University records. Confidential information will not be released to anyone without written permission, unless there appears to be clear and imminent danger to the student or others. For an appointment, students can visit the UCC on the second floor of the Askew Student Life Center, Suite 250 between 8:00 a.m. and 4:00 p.m., Monday through Friday to see a counselor for a brief drop-in session. During the drop-in session, a counselor will determine the best plan for their needs, which may include scheduling another brief session, scheduling an intake appointment, or discussing referral options.

Students who are aware that they will require longer-term treatment are encouraged to make arrangements for private care in the community before entering the University. However, if necessary, the University Counseling Center’s staff will make referrals for ongoing treatment in the Tallahassee community. Treatment outside the center will be at the student’s expense.

The University Counseling Center is located in the Askew Student Life Center, Suite 250. For more information about UCC services, call (850) 644-2003 or visit our Web site at http://www.counseling.fsu.edu. The University Counseling Center is accredited by the International Association of Counseling Services, Inc.

The Florida State University Psychology Clinic provides scientifically supported therapy services for a variety of client concerns, including problems related to anxiety, depression, relationship issues, stress, and other personal issues. The clinic also conducts intellectual, academic, personality, and learning disability evaluations.

Therapy fees are on a sliding scale that is based on the client’s financial resources, and fees for assessments are at a low, flat rate. Clinic therapists are graduate students seeking their doctoral degrees in the Clinical Psychology Program, and all work is closely supervised by clinical psychology faculty.

To apply for services, call the clinic at (850) 644-3006. The clinic is located at the east end of the new Psychology Department Building, C122 PDB. Hours are Monday through Thursday from 8:00 a.m. to 9:00 p.m., and Friday from 8:00 a.m. to 4:00 p.m.

Housing

University Housing provides exceptional living opportunities for students to succeed academically. Housing is offered in over 6,500 beds for full-time, degree-seeking, fee-paying students. Residence hall staff members seek to create living environments that foster the lifelong learning of every resident through the promotion of responsible citizenship, scholarship, appreciation of differences, personal wellness, and involvement. Rental rates and information about contracting for on campus housing can be found at http://www.housing.fsu.edu. For more information, see the “Housing” chapter of this General Bulletin.

Child Care

FSU Childcare and Early Learning Programs provide, for a fee, care and educational experiences in two centers for a limited number of children, ages six weeks to five years of age. Children of Florida State University students, faculty, staff, Alumni, as well as children of the greater community are eligible for services. Children of Florida State University students are given priority for enrollment. Space is limited, so please apply early. Applications are available at http://www.childcare.fsu.edu and when completed may be faxed to (850) 644-8565.

Childcare and Early Learning Development Programs also provide services for research by faculty members and graduate students in a variety of areas as well as a laboratory setting in which students may observe, complete practicums/internships, or work with young children. For additional information, contact FSU Childcare and Early Learning Programs, 157-01 Herlong Drive, Tallahassee, FL 32310-4174, (850) 644-7970, or visit the Web site at http://www.childcare.fsu.edu.

The FSU Children’s Center, located at 169 Herlong Drive, provides, for a fee, an early learning program for children two and one-half to five years of age. The Infant and Toddler Child Development Center, located at 330 Pennell Circle, provides, for a fee, an early learning program for children ages six weeks to two and one-half years of age. The hours for both centers are 7:30 a.m. to 5:30 p.m. Monday through Friday when classes at FSU are in session.

Assessment Services

For information concerning Assessment Services, please refer to the Office of Distance Learning section in “The University” chapter of this General Bulletin.

Parking and Bus Services

Transportation & Parking Services (TAPS) is responsible for the administration of the parking and transportation program on campus. The University requires students, staff, faculty, and visitors who want to park on campus to have a valid Florida State University parking permit. Permit enforcement hours are from 7:30 a.m. to 4:30 p.m., Monday through Friday. All other parking regulations are enforced twenty-four hours a day. Temporary permits are distributed, when needed, by Transportation & Parking Services located at 104 North Woodward Avenue, 8:00 a.m. to 5:00 p.m., Monday through Friday. Student permits must be obtained online at http://transportation.fsu.edu.

The office has the authority to ticket, tow, or boot (auto cuff) illegally parked vehicles and to charge for late payments of citations. Appeals of citations are reviewed by the Parking Violations Appeals Board, an administrative body representative of the University community.

Parking is extremely difficult on the University campus. It is suggested that students walk, bike, or use the Seminole Express, the University’s free campus bus service. The Seminole Express has eight routes that serve on and off campus locations. The buses operate from 7:00 a.m. to 7:00 p.m., Monday through Friday during the Fall and Spring semesters, and from 7:00 a.m. to 5:00 p.m. in the Summer. Students with valid FSUCard IDs may ride the ‘Free Fare’ on the buses of StarMetro (city of Tallahassee public transportation) to any of the designated bus stops within the city. For more information about parking and bus services please visit: http://transportation.fsu.edu.

Bicycle Parking

In accordance with Florida Americans with Disabilities Act of 1993, the State of Florida Fire Marshal’s Rules and Regulations and University rules, it is unlawful and dangerous to park bicycles in locations where they impede pedestrian or vehicular traffic. Prohibited areas include:

• Any area within six feet in front and to the side of any entrance to or exit from any building;
• Within any sidewalk; or along a fence;
• On any access or egress ramp, steps, stairs or handrails;
• In corridors;
• Within any roadway or motor vehicle parking spaces.

Florida State University Police Department is authorized to cut security chains and remove for impoundment any bicycle parked or stored in violation of this rule.

Any person whose bicycle has been impounded may claim that bicycle within thirty days of impoundment by contacting Florida State University Police. The burden of proving ownership shall rest upon the person claiming the bicycle. Bicycles not claimed within thirty days shall be considered abandoned and will be disposed of in accordance with State and University rules governing abandoned property. For more information on bicycle registration, where to park your bike, and how to operate it safely, please contact Florida State University Police at (850) 644-1234. Regulations govern-
ing parking on campus, bus routes, and schedules are available upon request from: Transportation & Parking Services, 104 North Woodward Avenue, Tallahassee, FL 32306-4112.

**FSU Police Department**

Florida State University’s Police Department is responsible for all safety and law enforcement functions on campus. The four divisions of the department are administration, police operations, investigations, and support services. The office of police operations provides motor, bicycle, and foot patrol of the campus twenty-four hours daily. The Campus Police department is comprised of sworn law-enforcement officers and unsworn personnel to promote campus safety by presenting public-safety programs in classes, residence halls, and Greek and scholarship houses. The office of investigative services provides investigative expertise in matters involving violations on campus of municipal ordinances and applicable federal and state laws.

Florida State University’s Seminole Safety Guide, in compliance with the Campus Security Act of 1990, is published and distributed annually online, with hard-copy available upon request. The Safety Guide describes all safety programs and security services available at the University. It contains safety tips and emergency telephone numbers, policies concerning alcohol and drug use, crime prevention, the reporting of crimes, sexual assault, and other matters, as well as campus crime statistics. Copies are available through the FSU Police Department. The safety guide is available on the Web at http://police.fsu.edu/services.

The Student Government Association offers Student Alert Force and Escort (SAFE) Connection, a free service available to students, faculty, and staff. Arrangements for an escort should be made by calling 644-SAFE (7233). Operating hours vary throughout the year. For more details, please visit http://police.fsu.edu/services.

The Blue Light Trail, comprising over 400 strategically placed light poles with emergency call boxes, provides well-lit pathways around campus; additional light poles are currently under construction as part of ongoing renovation and construction projects. By pressing the call box button, students are connected with the campus police dispatcher. Students should take note of where the lights and call boxes are located and plan their routes at night accordingly. For more information, please refer to http://www.its.fsu.edu/Communications/Emergency-Blue-Light-Telephones-EBLT.

**FSU ALERT** is Florida State University’s emergency notification system. If there is a condition which threatens the health and safety of persons on campus, University officials will warn the campus community using one or more of the available twenty-eight methods.

**Seminole Dining**

Seminole Dining offers a variety of dining options for students, faculty, staff and guests. Choose from national brand favorites.

- **Residential Restaurants**—featuring unlimited servings of freshly made-to-order food.
  - Figg Players Dining Room—University Center D
  - Fresh Food Company—between Stone Building and Salley Hall
  - Suwannee Room—William Johnston Building between Bryan and Reynolds Hall

- **Retail Locations**
  - Chick-fil-A—Honors, Scholars, and Fellows House next to the William Johnston Building
  - Chili’s Grill & Bar—Oglesby Union
  - Denny’s All Nighter—Woodward and Traditions Way in Student Services Building
  - Einstein Bros. Bagels—Oglesby Union
  - Energy Zone—Bobby E. Leach Recreation Center
  - Freshens—Oglesby Union
  - Miso Sushi and Noodle Bar—Oglesby Union
  - Papa John’s—Oglesby Union
  - Pollo Tropical—Oglesby Union
  - Rising Roll Gourmet—Honors, Scholars, and Fellows House next to the William Johnston Building
  - Salad Creations—Oglesby Union
  - Subway—Oglesby Union

- **Convenience Stores**
  - Brew to Go—Turnbull Conference Center
  - Doctor’s Inn—College of Medicine
  - Garnet-n-Go—University Center A Bus Circle

All dining locations accept cash, Garnet Bucks, Flex Bucks, Visa, MasterCard, and the FSUCard. Meal Plans (prepaid amount of meals) are available at The Suwannee Room, Fresh Food Company, and Figg Players Dining Room (Lunch Only). Visit the Customer Service Office to sign up for a Meal Plan or to add money to a Garnet Bucks account. New locations are always in the works; for updated information on all Seminole Dining has to offer, please visit http://www.seminoledining.com, or call (850) 644-3663.

**Students First**

**Students First** is an information and service counter located on the ground floor of University Center A. Students can ask questions about financial aid, registration, fee payments, admissions, and anything regarding Florida State University. The Students First staff will assist students in the most convenient manner to solve their respective concern or issue.

Available at University Center A, Leach Center, and at University Health Services. **Students First Web Service kiosks** provide students with access to a variety of information regarding their current status. The kiosks allow students to access their semester grades, unofficial transcripts, class schedules, and student account statements, and enable students to change their address, view the status of their financial aid disbursement, and make payments online. For more information, please visit our Web site at http://www.studentsfirst.fsu.edu.
FLORIDA’S STATEWIDE COURSE NUMBERING SYSTEM

Courses in this General Bulletin are identified by prefixes and numbers that were assigned by Florida’s Statewide Course Numbering System (SCNS). This numbering system is used by all public postsecondary institutions in Florida and by participating non-public institutions. The major purpose of this system is to facilitate the transfer of courses between participating institutions. Students and administrators can use the online SCNS to obtain course descriptions and specific information about course transfer between participating Florida institutions. This information is available on the SCNS Web site, at http://scns.fldoe.org.

Each participating institution controls the title, credit, and content of its own courses and recommends the first digit of the course number to indicate the level at which students normally take the course. Course prefixes and the last three digits of the course numbers are assigned by members of faculty discipline committees appointed for that purpose by the Florida Department of Education in Tallahassee. Individuals nominated to serve on these committees are selected to maintain a representative balance as to the type of institution and discipline field or specialization.

Course Prefixes and Numbers

The course prefix and each digit in the course number have a meaning in the SCNS. The listing of prefixes and associated courses is referred to as the “SCNS taxonomy.” Descriptions of the content of courses are referred to as “statewide course profiles.”

The course prefix is a three-letter designator for a major division of an academic discipline, subject matter area, or sub-category of knowledge. The prefix is not intended to identify the department in which a course is offered. Rather, the content of a course determines the assigned prefix to identify the course.

The course number is a four-digit designator for the course level (first digit), century (second digit), decade (third digit), and unit (last digit). In the sciences and certain other areas, a "C" or "L" after the course number is known as a lab indicator. The "C" represents a combined lecture and laboratory course that meets in the same place at the same time. The "L" represents a laboratory course or the laboratory part of a course that has the same prefix and course number but meets at a different time or place.

Example of Course Identifier

For example, a freshman composition skills course is offered by eighty-four different public and non-public postsecondary institutions. Each institution uses “ENC_101" to identify its freshman composition skills course.

<table>
<thead>
<tr>
<th>Prefix</th>
<th>Level Code</th>
<th>Century Digit</th>
<th>Decade Digit</th>
<th>Unit Digit</th>
<th>Lab Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENC</td>
<td>1</td>
<td>1</td>
<td>0</td>
<td>1</td>
<td></td>
</tr>
</tbody>
</table>

In the SCNS taxonomy, “ENC” means “English Composition.”

General Rule for Course Equivalencies

Equivalent courses at different institutions are identified by the same prefixes and same last three digits of the course number and are guaranteed to be transferable between participating institutions that offer the course, with a few exceptions, as listed below in “Exception to the General Rule for Equivalency.”

Transfer of any successfully completed course from one participating institution to another is guaranteed in cases where the course is to be transferred is equivalent to one offered by the receiving institution. Transfer credit must be awarded for successfully completed equivalent courses and used by the receiving institution to determine satisfaction of requirements by transfer students on the same basis as credit awarded to the native students. It is the prerogative of the receiving institution, however, to offer transfer credit for courses successfully completed that have not been designated as equivalent. Equivalencies are established by the same prefix and last three digits and comparable faculty credentials at both institutions.

For example, ENC 1101 is offered at a community college. The same course is offered at a state university as ENC 2101. A student who has successfully completed ENC 1101 at a Florida College System institution is guaranteed to receive transfer credit for ENC 2101 at the state university if the student transfers. The student cannot be required to take ENC 2101 again since ENC 1101 is equivalent to ENC 2101.

Note: Credit generated at institutions on the quarter-term system may not transfer the equivalent number of credits to institutions on semester-term systems. For example, 4.0 quarter hours often transfers as 2.67 semester hours.

Authority for Acceptance of Equivalent Courses

Section 1007.24(7), Florida Statutes, states:

Any student who transfers among postsecondary institutions that are fully accredited by a regional or national accrediting agency recognized by the United States Department of Education and that participate in the statewide course numbering system shall be awarded credit by the receiving institution for courses satisfactorily completed by the student at the previous institutions. Credit shall be awarded if the courses are judged by the appropriate statewide course numbering system faculty committees representing school districts, public postsecondary educational institutions, and participating nonpublic postsecondary educational institutions to be academically equivalent to courses offered at the receiving institution, including equivalency of faculty credentials, regardless of the public or nonpublic control of the previous institution. The Department of Education shall ensure that credits to be accepted by a receiving institution are generated in courses for which the faculty possess credentials that are comparable to those required by the accrediting association of the receiving institution. The award of credit may be limited to courses that are entered in the statewide course numbering system. Credits awarded pursuant to this subsection shall satisfy institutional requirements on the same basis as credits awarded to native students.

Exceptions to the General Rule for Equivalency

Since the initial implementation of the SCNS, specific disciplines or types of courses have been excepted from the guarantee of transfer for equivalent courses. These include courses that must be evaluated individually or courses in which the student must be evaluated for mastery of skill and technique. The following courses are exceptions to the general rule for course equivalencies and may not transfer. Transferability is at the discretion of the receiving institution.

A. Courses not offered by the receiving institution
B. For courses at non-regionally accredited institutions, courses offered prior to the established transfer date of the course in question.
C. Courses in the _900-999 series are not automatically transferable, and must be evaluated individually. These include such courses as Special Topics, Internships, Apprenticeships, Practica, Study Abroad, Theses, and Dissertations
D. Applied academics for adult education courses
E. Graduate courses
F. Internships, apprenticeships, practica, clinical experiences, and study abroad courses with numbers other than those ranging from _900-999
G. Applied courses in the performing arts (Art, Dance, Interior Design, Music, and Theatre) and skills courses in Criminal Justice (academy certificate courses) are not guaranteed as transferable. These courses need evidence of achievement (e.g., portfolio, audition, interview, etc.).

Courses at Nonregionally Accredited Institutions

The SCNS makes available on its home page (http://scns.fldoe.org) a report entitled “Courses at Nonregionally Accredited Institutions” that contains a comprehensive listing of all non-public institution courses in the SCNS inventory, as well as each course’s transfer level and transfer effective date. This report is updated monthly.
SCNS Contact Information

Questions about the SCNS and appeals regarding course credit transfer decisions should be directed to Melissa Crawford in the Office of Faculty Development and Advancement or the Florida Department of Education, Office of Articulation, 1401 Turlington Building, Tallahassee, Florida 32399-0400.

Special reports and technical information may be requested by calling the Statewide Course Numbering System office at (850) 245-0427 or at http://scns.fldoe.org.
### How to Find a Course:

The following list presents course subjects alphabetically by letter prefix. The column to the right contains the school, department, and/or program(s) offering that course subject. The schools, departments, and/or programs can be found, alphabetically, in the “Academic Departments and Programs” section of this Bulletin, where each course offered in a given program is listed, including title, description, and credit hours.

Florida State University will be one of the world’s premier institutions of higher education, devoted to transforming the lives of our students, shaping the future of our state and society, and offering programs of national and international distinction in a climate of inquiry, engagement, collegiality, diversity, and achievement.

The Florida State University Mission Statement

Vision

Florida State University will be one of the world’s premier institutions of higher education, devoted to transforming the lives of our students, shaping the future of our state and society, and offering programs of national and international distinction in a climate of inquiry, engagement, collegiality, diversity, and achievement.

Mission

Florida State University preserves, expands, and disseminates knowledge in the sciences, technology, arts, humanities, and professions, while embracing a philosophy of learning strongly rooted in the traditions of the liberal arts. The University is dedicated to excellence in teaching, research, creative endeavors, and service. The University strives to instill the strength, skill, and character essential for lifelong learning, personal responsibility, and sustained achievement within a community that fosters free inquiry and embraces diversity.

University History

Florida State University, one of the largest and oldest of the twelve institutions of higher learning in the State University System of Florida, had its beginning as early as 1823 when the Territorial Legislature began to plan a higher education system. In 1825 the Federal Government reserved two townships for the purpose of maintaining two such institutions in the territory, and in 1845 the United States Congress, supplemental to the act admitting Florida as a state in the Union, added two more townships. This led to an 1851 act of the Florida Legislature establishing two seminaries, one to be located east and the other west of the Suwannee River.

By 1854 the city of Tallahassee had established a school for boys called the Florida Institute with the hope that the state could be induced to take it over as one of the seminaries. In 1856 the Legislature of Florida chose to accept the offer of the Institute’s land and building and designated Tallahassee as the site of one of the state seminaries because of its railroad connections, its “salubrious climate,” and its “intelligent, refined, and moral community.”

Francis Eppes, who spent his formative years on the estate of his grandfather, President Thomas Jefferson, at Monticello, in Virginia, and who shared his grandfather's views of the importance to a democracy of a liberally educated citizenry, was the Mayor of Tallahassee who made the offer. Eppes served as President of the Seminary’s Board of Education for eight years and instilled in the institution the Jeffersonian ideals that characterize it today.

In February 1857, the institution began offering postsecondary instruction to female students in the Seminary West of the Suwannee River. The school first became coeducational the following year when it absorbed the Tallahasse Female Academy, begun in 1843 as the Misses Bates School. Thus the West Florida Seminary, founded in 1851, began operating in 1857, only twelve years after Florida achieved statehood. It was located on the hill where the Westcott Building now stands, which has been the site of an institution of higher education longer than any other site in Florida.

Classes were held at the West Florida Seminary from 1857 until 1863, when the state legislature changed the name to The Florida Military and Collegiate Institute to reflect the addition of a military section that trained cadets. During the Civil War, cadets from the school, ranging in age from 12 to 18, fought in the Battle of Natural Bridge and helped make Tallahassee the only Confederate capital east of the Mississippi not captured during the war. As a result of the brave action of the West Florida cadets in this battle, Florida State University’s Army ROTC cadet corps is today one of only three in the nation authorized to display a battle streamer with its flag, a streamer which bears the words “Natural Bridge 1863.”

In 1883 the institution, now long officially known as the West Florida Seminary, was organized by the Board of Education as The Literary College of the University of Florida. Owing to lack of means for the support of this more ambitious project, and also owing to the fact that soon thereafter schools for technical training were established, this association soon dissolved. It remains to be remarked, however, that the legislative act passed in 1885, bestowing upon the institution the title of the University of Florida, has never been repealed. The more pretentious name is not assumed by the college owing to the fact that it does not wish to misrepresent its resources and purposes.

In a 1905 reorganization of Florida’s educational system by the legislature, the University of Florida in Gainesville was established and designated a men’s school, and the Florida State College became a women’s school called the Florida Female College. The male student body moved from Tallahassee to Gainesville, taking with it the fraternity system and the College football team, which had been state champions in 1902, 1903, and 1905. In 1909 the name of the college was changed to Florida State College for Women, an institution that grew to become the third largest women’s college in the nation during the 1930s. The College became one of the first six national honor societies of Phi Kappa Phi in 1925, the year after the College was placed on the list of standard colleges and universities approved by the Association of American Universities and became a member of the Association of American Colleges. In 1935 the first chapter of Phi Beta Kappa in the state, Alpha Chapter of Florida, was installed at the College, a mark of its status as a true liberal arts college.

In 1947 saw many changes. Demand by returning World War II veterans had brought men back to the campus in 1946 with the establishment of the Tallahassee Branch of the University of Florida and in 1947 caused the Legislature to return Florida State College for Women to coeducational status and name it Florida State University. A permanent president’s residence was acquired. The student body, numbering 4,056, chose a new alma mater and selected the Seminole as its mascot. The Flying High Circus was born, and football was started again when the first home game since 1905 was played in October. Three years later, Campbell Stadium was built. The first Student Union was established and housed in the “O Club” on West Campus, a former Army Air Base which mainly housed male students and provided some classroom space three miles west of the main campus.

The 1950s brought significant development and expansion to the University. To the colleges and schools that had existed since the Florida State College days—Arts and Sciences, Education, Home Economics, and Music—were added Library Science, Social Welfare (later split into Social Work and Criminology), Business, and Nursing. A student in the Department of Chemistry was awarded the University’s first Doctor of Philosophy (PhD) degree in 1952. A new building was completed for the Developmental Research School, which in 1905 had evolved from the High School and the College Academy of earlier days as the Observation and Practice School created to provide on-site opportunities for experience and research to students in education. Tully Gymnasium, Strozier Library, and the Business Building were completed to enhance the education of the ever-increasing student population. In 1957 the Panama Canal Branch was opened.

In the 1960s the University acquired the Shaw Poetry Collection, established the Institutes of Molecular Biophysics and Space Biosciences, and constructed nine new buildings, including the Oglesby Union and the Fine Arts Building. During this period, the Program in Medical Sciences was established. The first black student enrolled in 1962, and the first black PhD candidates graduated in 1970. Programs in African American Studies and Women's Studies were established. Continuing the liberal arts tradition begun in the 1890s, the Liberal Studies for the 21st Century Program required of all undergraduates was expanded and strengthened.

In each succeeding decade, Florida State University has added to its academic organization and now comprises sixteen colleges and the Graduate School. It has expanded from the original few acres and buildings to 539 buildings on 1,604 acres, including the downtown Tallahassee main campus of 475 acres; a farm, which for many decades supplied the Florida State College for Women with food; the Seminole Reservation—a recreational facility; the Marine Laboratory on the Gulf Coast; the FAMU–FSU College of Engineering facility; the National High Magnetic Field Laboratory and...
Division of Research at Innovation Park; and the branch campus in Panama City, Florida. One hundred and sixty-three years after its founding, Florida State University started the 2014-2015 academic year with a student population of over 41,000 and recognition as a major graduate research institution with an established international reputation.

In Fall 2014, Florida State University enrolled students from all fifty states, the District of Columbia, and 141 foreign countries. The enrollment breakdown by class included 665 law students, 482 medical students, a total of 32,621 undergraduate students, a total of 7,972 graduate students, and a total of 1,180 non-degree students. Out of 41,773 students enrolled at the University that semester, 45.1 percent were men and 54.9 percent women. The University employed a total of 2,408 faculty members in Fall 2014, 56.9 percent men and 43.1 percent women.

The Panama City Campus is located on beautiful North Bay, one hundred miles west of Tallahassee, near the Gulf of Mexico. The campus, with its modern classrooms and offices, has been designed to utilize the natural landscape of the site, creating an aesthetic and effective educational setting.

**University Organization**

Florida State University is one of twelve units of the State University System (SUS) of Florida. The State Board of Education (SBOE), established pursuant to Section 1001.01, Florida Statutes, on January 7, 2003, oversees education governance in the state through the Commissioner of Education, who serves as Secretary of the Florida Board of Governors (FOBO), established pursuant to Section 7(d), Article XI of the state constitution, coordinates the State University System. The FOBO oversees the thirteen-member Boards of Trustees for each of Florida’s public universities through the Chancellor of the State University System of Florida. Florida State University’s Board of Trustees sets the University’s policies and goals and serves as its legal owner and final authority responsible for efficient and effective use of its resources.

The main campus of the University is located in Tallahassee, the state’s capital. Additional program opportunities include Spring, Summer and Fall semester courses at the University’s study centers, short Summer terms in additional locations, First Year Abroad for incoming freshmen, international internships, and College for High School for students wishing to experience studying abroad while still in high school. The year-round study centers are located in Florence, Italy; London, England; Panama City, The Republic of Panama; and Valencia, Spain. Summer program locations include China, Costa Rica, Croatia, Czech Republic, France, Germany, Israel, Peru, Russia, Switzerland, and Turkey.

The chief executive officer of Florida State University is the President. The President is assisted by the Provost (who is also the Executive Vice President for Academic Affairs), the Vice President for Finance and Administration, the Vice President for Faculty Development and Advancement, the Vice President for Planning and Programs, the Vice President for Student Affairs, the Vice President for Research, the Vice President for University Relations, the Vice President for University Advancement, and the President of the Faculty Senate.

The Division of Academic Affairs is responsible for the operation of the academic program of the University. It includes the Office for Faculty Development and Advancement, which interprets all faculty personnel policy, including faculty development and welfare; monitors all academic rules and regulations, including those related to academic integrity and grade appeals, and facilitates the operation of the Faculty Governance System of the University; The Graduate School, which is responsible for the graduate enrollment, general advisement, university fellowships, and special programs; and the Division of Undergraduate Studies, which is responsible for undergraduate advisement, retention, and special programs. Further support is given by associated vice presidents and directors, who are responsible for such academic matters as continuing education, international programs, computing and information resources, learning systems, libraries, the Office of the University Registrar, the Office of Financial Aid, and the Office of Admissions.

The Division of Finance and Administration maintains the physical plant, administers the personnel program, and receives and disburses nearly all University funds.

The Division of Student Affairs offers and coordinates programs that provide housing, career guidance, health care, recreation, child care, self-governance, and enhancement of academic skills to students. It is also responsible for programs and services for international students, disabled students, and student activities and organizations.

The Division of Research coordinates all research programs and mediates between extramural sponsors and faculty conducting research, development, and training under such sponsorship.

The Division of University Relations coordinates alumni affairs and the solicitation of external funds to support scholarships and loans for students, capital construction, excellence in academic programs, and intercollegiate athletics. University Relations also coordinates programs to improve understanding and support of University academic programs and activities through its units, including governmental relations.

University Communications reports to the Division of University Relations, and coordinates efforts to improve the public’s understanding of the University’s academic programs and activities through internal and external media, both print and electronic. It includes the Public Broadcast Center (public radio, public television, and public access channel), Publications and Media Relations.

The Faculty Senate is an elected representative body of faculty that establishes academic policy regarding admission and graduation of students, curricula, and academic standards, and advises and recommends about all matters affecting the academic program of the University.

**Panama City Campus**

In 1982, the Florida Legislature established a campus of Florida State University at Panama City. Located one hundred miles west of Tallahassee on beautiful North Bay, the Panama City campus provides opportunities for undergraduate and graduate study in thirteen programs leading to the bachelor’s degree, and six programs leading to the master’s degree. Undergraduates may complete their entire bachelor’s degree at the Panama City campus in the programs offered or may transfer to the main campus with an associate in arts degree. The Panama City campus houses the College of Applied Studies and offers three baccalaureate degrees and one master’s degree independent of the main campus. The Panama City campus strives to offer a personalized university experience. Classes are relatively small, thereby permitting an individualized approach to instruction and facilitating interaction between students and faculty.

**Colleges**

The academic organization of the University comprises sixteen colleges. One of these, the College of Engineering, is a joint program of the Florida Agricultural and Mechanical University (FAMU) and Florida State University. In addition to the associate in arts (AA) degree, the University offers 105 authorized baccalaureate degree programs, 123 authorized master’s degree programs, 25 authorized advanced master’s and specialist degree programs, 3 authorized professional degree programs, and 78 authorized doctoral degree programs. The following outlines the academic divisions:

**College of Applied Studies**

- **Programs:** Corporate and Public Communication; Professional Communication; Public Safety and Security; Recreation, Tourism, and Events

**College of Arts and Sciences**

- **Departments:** Aerospace Studies; Anthropology; Biological Science; Chemistry and Biochemistry; Classics; Computer Science; Earth, Ocean and Atmospheric Science; English; History; Mathematics; Military Science; Modern Languages and Linguistics; Philosophy; Physics; Psychology; Religion; Scientific Computing; Statistics
- **Interdisciplinary Programs:** FSU-Teach; Geophysical Fluid Dynamics; History and Philosophy of Science; Interdisciplinary Humanities; Molecular Biophysics; Neuroscience; Women’s Studies

**College of Business**

- **School:** Dedman School of Hospitality
- **Departments:** Accounting; Finance; Management; Entrepreneurship; Strategy, and Information Systems; Marketing; Risk Management/Insurance; Real Estate and Development Studies
- **Interdisciplinary Programs:** Business Administration and Law; Business Administration and Social Work

**College of Communication and Information**

- **Schools:** School of Communication; School of Communication Science and Disorders; School of Information

**College of Criminology and Criminal Justice**

- **Interdisciplinary Programs:** Criminology and Public Administration; Criminology and Social Work

**College of Education**

- **School:** School of Teacher Education
- **Departments:** Educational Leadership and Policy Studies; Educational Psychology and Learning Systems; Sport Management
- **Interdisciplinary Programs:** FSU-Teach; Law and Sport Management
The University

FAMU–FSU College of Engineering

**Departments:** Chemical and Biomedical Engineering; Civil and Environmental Engineering; Electrical and Computer Engineering; Industrial and Manufacturing Engineering; Mechanical Engineering

College of Fine Arts

**Schools:** School of Art and Design; School of Dance; School of Theatre

**Departments:** Art; Art Education; Art History; Interior Design

Interdisciplinary Program: Arts Administration

The Graduate School

Interdisciplinary Programs: Materials Science and Engineering

College of Human Sciences

**Departments:** Family and Child Sciences; Nutrition, Food and Exercise Sciences; Retail, Merchandising and Product Development

Interdisciplinary Program: Law and Family and Child Sciences

College of Law

Interdisciplinary Programs: Law and Aquatic Environmental Science; Law and Business Administration; Law and Economics; Law and Family and Child Sciences; Law and Information Studies; Law and International Affairs; Law and Public Administration; Law and Sport Management; Law and Urban and Regional Planning; Law and Social Work

College of Medicine

**Departments:** Biomedical Sciences; Clinical Sciences; Family Medicine and Rural Health; Geriatrics; Behavioral Sciences and Social Medicine

Interdisciplinary Programs: Neuroscience and Molecular Biophysics

College of Motion Picture Arts

College of Music

College of Nursing

College of Social Sciences and Public Policy

**School:** Reubin O’D. Askew School of Public Administration and Policy

**Departments:** Economics; Geography; Political Science; Sociology; Urban and Regional Planning

Interdisciplinary Programs: African-American Studies; Applied Economics and Law; Asian Studies; Center for Demography and Population Health; Criminology and Public Administration; Economics and Law; Environmental Studies; International Affairs; International Affairs and Law; Latin American and Caribbean Studies; Interdisciplinary Program in Social Science; Public Administration and Law; Public Administration and Social Work; Public Health; Russian and East European Studies; Urban and Regional Planning and International Affairs; Urban and Regional Planning and Law; Urban and Regional Planning and Public Administration

College of Social Work

Interdisciplinary Program: Law and Social Work; Social Work and Business Administration; Social Work and Criminology; Social Work and Public Administration

Institutes and Research Centers

The work of the colleges is facilitated by institutes and centers in which faculty and students from throughout the University work as interdisciplinary teams on research and service projects. The centers and institutes are heavily supported by external funds. They serve as actual and potential sites for cooperative projects staffed by faculty and students, and personnel from business and industry, and are significantly involved in supporting state agencies through research, development, and training.

The following are the Florida Board of Governors approved institutes and research centers:

Professional Development and Public Service

Center for Academic and Professional Development
The Frederick L. Jenks Center for Intensive English Studies

Learning Systems Institute

Institute of Science and Public Affairs

Center for Biomedical and Toxicological Research and Hazardous Waste Management
Center for Economic Forecasting and Analysis
Center for Higher Education Research, Teaching and Innovation (CHERTI)
Center for Information Management and Educational Services (CIMES)
Center for Prevention and Early Intervention Policy
Center for the Advancement of Human Rights
Center for the Advancement of Learning and Assessment (CALA)
Center on Better Health and Life for Underserved Populations (joint with the College of Human Sciences)
Florida Conflict Resolution Consortium and FCRC Consensus Center
Florida Resources and Environmental Analysis Center (FREAC)
Florida State Climate Center
Institute for Academic Leadership
Institute for Cooperative Environmental Research (ICER)
Institute of Science and Public Affairs (ISPA)
John Scott Dailey Florida Institute of Government
The Florida Center for Prevention Research

International Institutes

Florida–Costa Rica Linkage Institute (FLORICA)

College of Applied Studies

Science, Technology, Engineering and Mathematics (STEM) Institute

College of Arts and Sciences

Antarctic Marine Geology Research Facility

The Florida State University *Center for Academic and Professional Development* (CAPD) is the continuing education and academic program outreach entity for the campus, the community, and students of all ages everywhere. Housed in the Augustus B. Turnbull III Florida State Conference Center, the experienced staff of CAPD support a variety of learning opportunities as they provide services to colleges, departments, and students on campus and online. CAPD can be reached online at http://learningforlife.fsu.edu.  
CAPD promotes lifelong learning and personal productivity enhancement. For example:  

**Professional Development/Personal Enrichment.** CAPD Online offers Introduction to Web Design and the Certificate in Financial Planning. These courses are instructor-led and offer an online interactive experience.  

**Face-to-Face Courses.** CAPD also offers face-to-face courses, such as Test Prep Classes for the GMAT, GRE, and LSAT.  

**Academic Credit.** CAPD provides academic credit courses, including part-time degree and certificate programs for the non-traditional student. Courses are offered on campus and at a distance. Special courses and teacher institutes are held each summer. CAPD also coordinates returning student scholarships for students twenty-three years of age or older.
CAPD continues to identify and develop new course offerings to support lifelong learners in their quest for personal enrichment and sustain successful careers.

The Florida State Conference Center

In December 2009, the Augustus B. Turnbull III Florida State Conference Center reopened at its 535 West Pensacola St. location, adjacent to FSU’s five-story St. Augustine parking garage. The Conference Center is approximately 47,000 square feet, featuring a gothic brick exterior and three floors to house a large auditorium, a 336-seat dining room, eight breakout rooms, an executive boardroom, food preparation facilities, and administrative offices. It employs the latest technology, including three video walls, LCD screens and live Webcasting, in its conferencing rooms and is capable of hosting anything from small meetings to large regional conferences.

The eMedia Studio, located in the Conference Center, is a fully functional studio outfitted with industry standard equipment and capability, including: chroma key and virtual set capture, high definition recording equipment, a full range of editing suites and various other studio capabilities such as teleprompting and Webcasting.

The Center’s eMedia group can assist you with your training needs, Webcapturing your lessons, creating a custom Web page with a unique URL to link your training and/or convert your Webcaptured materials to short videos with specific learning objectives.

The Center’s professional staff of meeting planners is readily available to put their expertise to work helping you organize events. For more information, please visit http://learningforlife.fsu.edu/fsu-conference-center/.

Center for Global Engagement

Center for Intensive English Language

FSU International Programs

The Florida Center for Public Management

Director: Ben Green

The Florida Center for Public Management (FCPM) was established in 1978 to provide assistance to elected leaders and public managers in state and local governments in Florida. Its staff of full-time, experienced management consultants is available to help these officials improve their operations through a variety of services, including executive development seminars, organizational improvement diagnoses, leadership and staff team-building workshops, and various problem-solving techniques. FCPM efforts include the Florida Certified Public Manager Program, a nationally recognized comprehensive training and development program for public sector managers. FCPM is a part of the Askew School of Public Administration and Policy.

To obtain further information about FCPM and its services, visit http://www.fcpm.fsu.edu or call (850) 644-6460.

FSU Online (see Office of Distance Learning)

FSU—Panama

Rector: Carlos R. Langoni

Florida State University’s Office of International Programs administers a permanent campus of approximately four hundred full-time students in the Republic of Panama. FSU-Panama offers a full program of courses at the lower-division level leading to the associate degree, undergraduate courses leading to the baccalaureate degree in selected majors, and graduate courses leading to the master’s degree in International Affairs. The campus serves U.S. citizens and residents in Panama, Panamanian citizens, and visiting scholars from throughout the world. Courses are taught by regular and adjunct faculty as well as rotating faculty from the Tallahassee campus; students from the Tallahassee campus also study at FSU-Panama, taking advantage of the resources of Panama and the ease of receiving full academic credit from the University. Internships are arranged for Tallahassee students majoring in fields ranging from biology to international business. A full range of facilities is offered at the FSU-Panama campus, including housing, an athletic complex, a variety of services, including executive development seminars, organizational improvement diagnoses, leadership and staff team-building workshops, and various problem-solving techniques. FCPM efforts include the Florida Certified Public Manager Program, a nationally recognized comprehensive training and development program for public sector managers. FCPM is a part of the Askew School of Public Administration and Policy.

To obtain further information about FCPM and its services, visit http://www.fcpm.fsu.edu or call (850) 644-6460.

Institute for Cognitive Sciences

Director: Michael Kaschak

The institute was founded in 1984 for the encouragement of interdisciplinary research, communication, and graduate study in the cognitive sciences. Its members include faculty and graduate students from the fields of computer science, psychology, philosophy, linguistics, education, business, and physics. Research has involved computer modeling of memory and problem solving, artificial and computational intelligence, knowledge-based computer systems, fuzzy logic and soft computing (e.g., genetic algorithms and neural networks), computer diagnosis of novice difficulties in problem solving, similarities and differences between human and lower-animal cognition, cultural aspects of cognition and language, linguistics and cognition, formal and natural languages, philosophy of knowledge and cognition, philosophy of artificial intelligence, study of the brain, robotics, education, and vision. Recently, research into cognitive aspects of the management of technology and of the perception of its affordability/cost has been included. A specialized studies program is offered for graduate study in cognitive sciences.

John and Mable Ringling Center for Arts

The FSU/John and Mable Ringling Center for the Arts in Sarasota, Florida is unique in the world of university museums. The complex houses the John and Mable Ringling Museum of Art, Ca’ d’Zan (The Ringling Mansion), the Tibbals Learning Center, two circus museums, the Historic Asolo Theatre, and the FSU Performing Arts Center.

Learning Systems Institute

Director: Jeffrey Ayala Milligan; Associate Director: Rabieh Razzouk

The Learning Systems Institute (LSI) is a multi-disciplinary research and development unit dedicated to improved human performance. LSI is a recognized world leader in the improvement of teaching, learning, and performance systems in school, business, industry, and military settings. LSI has generated more than $400 million in externally funded research over its four-decade history; for every dollar LSI receives in state funding, it attracts more than $15 in contracts and grants. LSI’s work provides a wealth of opportunities for graduate students to gain first-hand experience with cutting-edge research. LSI faculty and students have worked in over two dozen countries around the world, in addition to leading major research and development in the United States.

LSI is organized into two centers:  
- Florida Center for Research in Science, Technology, Engineering, and Mathematics (FCR-STEM)  
- Center for International Studies in Educational Research and Development (CISERD)

LSI’s learning research focuses on STEM (science, technology, engineering, and math), communities of instruction, learning technologies, international development, leadership, learning disabilities, libraries, literacy, school reform, assessment, accommodations, and modifications for students with special needs, and teaching and learning. LSI’s research into performance focuses on how individuals and organizations perform complex tasks and how to help them achieve performance goals.

To obtain further information about LSI, contact the Learning Systems Institute, 4600 UCC, Tallahassee, FL 32306-2540; or call (850) 644-2570. The Institute’s Web site may be accessed at http://www.lsi.fsu.edu.

Libraries

Dean of the University Libraries: Julia Zimmerman, 314 Strozier Library

The University Libraries provide print and electronic collections and a wide range of services to enhance the learning, teaching, research, and service activities of Florida State University. In support of this mission, the libraries’ collections are exceeding three million volumes. For those researchers unable to visit the libraries, the Web site offers access, from anywhere in the world, to hundreds of databases and more than 70,000 e-journals. Materials not available online or at the libraries may be requested through interlibrary loan or through the statewide UBorrow system, allowing FSU faculty and students to request delivery of books from over fifteen million volumes available at all state university libraries. Library faculty also offer classes and consultations to teach critical research and thinking skills. For those researchers unable to visit the libraries, online research services are available 24/7 and library staff offer outreach to dormitories and buildings across campus.

The Florida State University Libraries include eight libraries on campus: Strozier Library, Dirac Science Library, Claude and Mildred Pepper Library, College of Music Allen Music Library, College of Communication and Information Goldstein Library, College of Law Research Center, College of Medicine Maguire Medical Library, and FAMU-FSU College of Engineering Library. In addition, the Special Collections and Archives division of University Libraries supports and advances research, teaching, and
scholarship by acquiring, preserving, and providing access to collections of original manuscripts, rare books, and university archives for use by students, faculty, and researchers worldwide. The Claude and Mildred Pepper Library and the Heritage Protocol are archives of the University Libraries' Special Collections.

Library materials and services are also available at the FSU Panama City, Florida campus, as well as at FSU International Programs study centers in London, England; Florence, Italy; and Panama City, Republic of Panama. The John and Mable Ringling Museum of Art in Sarasota, Florida, has a library containing art-related research materials as well as a collection of rare books. The entire FSU community can search the University Libraries catalog via its Web site at https://www.lib.fsu.edu.

The Robert Manning Strozier Library, the University's main library, is located in the center of the main campus and occupies seven floors. Strozier Library is open one hundred and thirty-four hours each week during the Fall and Spring, providing around-the-clock research assistance and study spaces, and sees almost 1.8 million visitors each year. Its main floor is an undergraduate-focused Learning Commons, while its lower level is a graduate- and faculty-focused Scholars Commons. Strozier offers free academic tutoring and a robust range of academic support services and programming throughout the day and late into the night. Its collection includes a wide variety of research materials, primarily in the humanities and social sciences. The library serves as a regional depository for federal and Florida government documents as well as United Nations documents. In its technology labs, Strozier provides equipment, software, and facilities for listening to, viewing, creating, and editing multimedia materials. Internet-accessible computers with word-processing software, printers, and photocopiers are available throughout the library. Laptops, cameras, and other equipment are available for checkout. The Assistive Technology Lab provides adaptive equipment and software for students with disabilities.

University Libraries Special Collections and Archives has offices, an Exhibit Room, and a Reading Room in Strozier Library. Its collections comprise more than half a million items. Manuscript collections include Florida political collections, Southern business history, literary manuscripts, and local and regional Florida history. The rare books of Special Collections support a wide variety of disciplines and research interests. The collection includes books from small and private presses, first editions, limited edition works, cuniform, and other items. Notable book collections include Napoleon and the French Revolution, Shaw Childhood in Poetry, William Morris Kelmscott Press, and Carothers Memorial Rare Bibles. Special Collections and Archives, which includes University Archives, Heritage Protocol, and the Claude Pepper Library, welcomes class visits and provides a hands-on learning environment for students. Heritage Protocol maintains the Norwood Reading Room on the second floor of Strozier Library, where rotating exhibits of FSU memorabilia are displayed.

The Claude and Mildred Pepper Library, housed on-campus in the Pepper Center, was established in 1985 as the official repository for the Pepper Collection, a unique and multi-faceted collection of over a million items by and about U.S. Congressman Claude Pepper (1900-1989), including manuscripts, photographs, audio/video recordings, and memorabilia. For more information, visit https://www.lib.fsu.edu/pepper-library.

The Paul A. M. Dirac Science Library, located on the west side of campus in the heart of the Science Center complex, consolidates the University Libraries' scientific and technical books and periodicals in one central location. For more information, visit the library's Web site at https://www.lib.fsu.edu/dirc-science-library.

The Warren D. Allen Music Library, one of the Southeast's major music libraries, is located in the College of Music and contains a collection of recordings, scores, books, and periodicals that support the school's curriculum. For more information, visit the library's Web site at http://www.music.fsu.edu/Quicklinks/Music-Library.

The Harold Goldstein Library, located in the Louis Shores Building, supports the College of Communication and Information. The collection includes materials for linguistics, information technology, and juvenile literature, including graphic novels. For more information, visit http://goldstein.cc.fsu.edu.

The College of Law Research Center has a collection of nearly 500,000 volumes and offers an active program of legal research assistance, an experienced and helpful staff, and extensive collections of law and law-related information. Legal research is facilitated via an array of electronic databases, including the LexisNexis, WESTLAW, and Bloomberg Law legal research databases. For more information, visit the library's Web site at http://www.law.fsu.edu/library.

The College of Medicine Charlotte Edwards Maguire Medical Library cultivates physicians who are expert learners, problem solvers, and agents of change by providing a supportive environment with access to high quality, relevant, and current information from 21st century information resources. The library houses a collection of books and journals, and provides access to a number of electronic medical databases. For more information visit the library's Web site at http://www.med.fsu.edu/library.

The John and Mable Ringling Museum of Art Library is housed on the Ringling Museum Campus in Sarasota, Florida, the largest museum/university complex in the nation. The library contains more than 75,000 volumes, exhibition and sale catalogs, and more than one hundred current periodical titles supporting art-related research. Special collections contain circus history items including John Ringling's original collection of more than six hundred books. For more information, visit the library's Web site at https://www.ringling.org/art-library.

The Florida State University-Panama City Library and Learning Center is located in Panama City, Florida and provides computers, e-books, e-journals, and research help. Students and faculty at this location may borrow materials housed at the Tallahassee campus libraries and may access all of the electronic resources the libraries offer. The 6,000 items in its collection of printed books and journals are available at the library of the neighboring campus of Gulf Coast State College. For more information, go to http://pc.fsu.edu/Students/Library-and-Learning-Center-LLC.

The FSU Republic of Panama Branch Library offers services and a collection of over 45,000 items to students at the FSU branch campus in Panama City, Republic of Panama. Students and faculty at this location may borrow materials housed at the Tallahassee campus libraries and may access all of the electronic resources the libraries offer. For more information, visit https://www.lib.fsu.edu/libraries/panama.

L.L. Schendel Speech and Hearing Clinic

Director of Clinical Education: Lisa Scott

The dual mission of the speech and hearing clinic is to provide effective community service to improve the communication abilities of clients, and to provide a teaching and clinical research laboratory to develop exemplary assessment and treatment procedures for use by Florida State University students in speech-language pathology. Specific services include but are not limited to:

- Comprehensive speech-language assessment and intervention
- Hearing assessment, hearing aid dispensing, and other clinical services related to hearing impairment
- Assistance communication lab
- Dialect/Accent evaluation and reduction

Services are provided by graduate students under the direct supervision of faculty members. All professional staff members are licensed by the Florida Board of Speech Language Pathology and Audiology and certified by the American Speech Language Hearing Association.

Fees vary according to the nature of services. Students, faculty, and staff receive a reduced rate. Further information is available by calling: (850) 644-2238 (Voice and TDD).

Museum of Fine Arts

Located in Tallahassee, MoFA has a history of exciting projects—from lush painting to dynamic sculpture exhibitions, from challenging installations to provocative photography shows. Every season begins with an international competitive exhibition that embraces all media and every semester closes with the youth and exuberance of the graduating artist exhibitions.

The Florida State University Museum of Fine Arts is a member of Florida Association of Museums, Florida Art Museum Directors' Association, Florida Cultural Action Alliance, Southeastern Museums' Conference and is accredited by the American Association of Museums.

Naval Science

The Naval Reserve Officers Training Corps (NROTC) program at Florida Agricultural and Mechanical University (FAMU) is open to both men and women of Florida State University through the FAMU–FSU Cooperative Program. The NROTC Program at FAMU is administered by the NROTC staff. This program affords the opportunity for selected men and women to receive instruction in naval science courses, which, in conjunction with a baccalaureate degree, will qualify them for a commission in the United States Navy or the United States Marine Corps. Students enrolled in the University who are physically qualified, and who are United States citizens, are eligible to apply for the NROTC program.

The FAMU NROTC Unit offers five programs: (1) the Navy–Marine Corps College Program (non-scholarship); (2) the four-year Navy–Marine Corps Scholarship Program; (3) the two-year NROTC College Program; (4) the two-year Scholarship Program; and (5) the Tweedale Scholarship Program. Navy-Marine Corps College Program students are eligible to compete for available Naval Education and Training Command (NETC) scholarships anytime after one semester of participation in the program. Selection is based on academic
achievement and military aptitude. Scholarships include full tuition, lab fees, and a textbook allowance of $375.00 per semester. Additionally, a stipend of $250.00 (freshmen), $300.00 (sophomores), $350.00 (juniors), or $400.00 (seniors) is paid for an oath to help defray the cost of living expenses. Navy–Marine Corps College Program students, when selected for advanced standing in their junior or senior year, receive a $350.00 and $400.00 per month stipend, respectively.

The Tweedale NROTC Scholarship Program was established to provide NROTC scholarships to outstanding technical major college students with no prior affiliation with the NROTC program. To qualify for a Tweedale Scholarship, students must have completed at least one, but not more than four academic semesters of college coursework with a cumulative GPA that places the student above the peer mean (like major), or 3.00, whichever is higher. The student’s transcript must reflect a grade of “C” or better in all coursework attempted. The transcript must also show that the student has completed an academic term of college-level math or science and has the ability to complete successfully all of the NROTC academic requirements.

The NROTC Unit is located in the Perry-Page Building on the FAMU campus. For additional information, visit http://www.famu.edu/cesta/main/index.cfm/naval-sciences/nrotc-home/.

The Office of Distance Learning (ODL) provides a suite of services for developing, marketing, deploying and maintaining online academic courses and degree programs. Instructional development faculty provide guidance in instructional design, pedagogy, technologies, and media selection for online delivery with the support of instructional media development services. Online courses in development undergo rigorous quality assessment by ODL faculty and the departments they serve. ODL provides training on the use of Blackboard as well as best practices in teaching online for instructors, teaching assistants, and course mentors. The Faculty Development Lab provides hardware and software for instructors to develop media for online courses using supported technologies with guidance and direction from instructional technologists. For more information, call (850) 644-4635 and ask for an instructional development faculty member for assistance with the entire distance learning application and approval process.

Reserve Officers Training Corps

The University includes among its offerings both an Air Force and an Army Reserve Officer Training Corps (ROTC) program; students of Florida State University may apply for admission to the Navy ROTC Program offered through Florida Agricultural and Mechanical University (FAMU). Interested male or female freshmen and sophomores are encouraged to enroll and apply for a Navy or Marine Corps scholarship. Naval Science classes are listed in the FAMU General Catalog under “Division of Naval Sciences.” The Air Force ROTC program is offered to students at FSU, FAMU, TCC, and Embry-Riddle Aeronautical University extension campus at TCC. The classes are listed in this General Bulletin under “Aviation Studies.” For additional information, visit our Web site at http://airforcerotc.fsu.edu/, call (850) 644-3461, or stop by 212 Harpe-Johnson Hall. The Army ROTC Program is of-
ferred to FSU and TCC students. The classes are listed in this General Bulletin under “Military Science.” For additional information, visit our Web site at http://www.fsu.edu/~armysrots/, call (850) 644-8806, or visit in person at 201 Harpe-Johnson Hall.

Seminole Productions

FSU’s professional video production unit, Seminole Productions, housed in the College of Communication and Information, provides a variety of services to university departments. One major partner is the Florida State Athletics department. Seminole Productions produces over one hundred and twenty live events and over seventy-five television shows every year for Athletics alone. In addition, Seminole Productions has partnered with ESPN and Fox Sports to produce numerous live events and special television programming for their networks. Seminole Productions is also a leader in Stereoscopic (3D) production and programming. Mark Rodin and his team have been working in stereoscopic technology for close to ten years, outpacing universities across the nation in this medium. So whether it is working on live events, television shows, in pre- or post-production, graphics and animation, or even 3D stereoscopic production, students have numerous opportunities to become involved in Seminole Productions.

Undergraduate Education

Florida State University provides a strong liberal arts baccalaureate experience that helps students to engage and refine their skills in the areas of critical and creative thinking as well as information literacy and fluency. FSU’s innovative curriculum allows students to work with faculty in exploring and participating in cutting-edge scholarly and creative work across the wide range of disciplines. The close cooperation between FSU’s students and faculty fosters an ecology of learning that draws upon the life of the mind while helping students to become ethical, responsible, productive, cultured, and successful citizens of the world. The University is a concentrated resource of classroom-directed learning, research facilities, and intellectual talent that seeks to develop within each student the ability to view problems from many different perspectives and to find creative and humane solutions.

The Liberal Studies for the 21st Century Program, required of all undergraduates, provides an educational foundation for FSU graduates to thrive intellectually and professionally and to support themselves, their families, and their communities through a broad and critical engagement with the world in which they live and work. Liberal Studies thus offers a transformative experience, helping FSU students to become:

a. Critical analyzers of quantitative and logical claims;
b. Clear, creative, and convincing communicators, and critical readers;
c. Critical appraisers of theories and the facts that support them;
d. Ethically engaged and socially responsible citizens;
e. Thoughtful patrons of and participants in cultural practices;
f. Lifelong and independent learners; and
g. Interdisciplinary and flexible thinkers.

Graduate Education (see Graduate Bulletin for details)

Emphasis at Florida State University is placed upon advanced degree programs entailing extensive research activities and preparation for careers in science, the arts, the humanities, the professions, and technological fields. The University’s diverse curriculum leads to graduate degrees with flexible options allowing students to form the program most suited to their academic and career goals. Talented faculty ensure a steady exchange of ideas, information, and technical skills. Research and teaching assistantships and fellowships are available to allow graduate students the opportunity to work with these leaders in their fields while furthering their education. The exceptional research facilities available together with the Robert Manning Strozier Library, its eight branch libraries including the Paul A.M. Dirac Science Center Library, and the Law Library, keep the University on the leading edge of graduate education.

Faculty Distinction

It is the official policy of Florida State University to recruit the most talented faculty from leading centers of learning throughout the world. The University faculty has consistently included Nobel laureates, members of National and Foreign Academies, Pulitzer Prize winners, Guggenheim Fellows, and Fulbright Scholars. Many of its members have received national and international recognition, and the University enjoys national ranking in a number of disciplines. The Provost rewards faculty members who receive awards recognized by the National Research Council as “Highly Prestigious” and “Prestigious” with permanent salary increases. The diversity and quality of the educational backgrounds of the faculty are reflected in the institutions that have granted their graduate degrees. A listing of distinguished faculty appears in this General Bulletin.

Affiliations

The University participates in the Traveling Scholar Program (for graduate students), Academic Common Market, and Cooperative Programs within the State of Florida, Division of Colleges and Universities. Florida State University is a member of the University Research Association; the Oak Ridge Associated Universities, Inc.; The University Corporation for Atmospheric Research; The Southeastern Universities Research Association; EDUCOM: The Interuniversity Communications Council; the American Association for Laboratory Animal Science; ALA: the American Library Association; the State University System’s Institute for Oceanography; the University Space Research Association; CAUSE: The Association for the Management of Information Technology in Higher Education and is a founding member of the iSchools movement.

Accreditation

Florida State University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award associate, baccalaureate, masters, specialist, and doctoral degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097; or call (404) 679-4500 for questions about the accreditation of Florida State University. The Commission on Colleges is to be contacted only if there is evidence that appears to support the University’s significant noncompliance with a requirement or standard.

For departmental/field accreditations, refer to the respective college or school’s chapter in this General Bulletin.

Carnegie Foundation Classification

In its 2010 report, The Carnegie Foundation classified Florida State University in the Research Universities–Very High Research Activity category, its highest category for a graduate-research university. Florida State University is one of one hundred and eight American universities to have earned this designation at that time. In addition, the 2010 report selected Florida State University for the Community Engagement Classification. This competitive designation recognizes Florida State’s commitment to exemplary institutional practices of engagement within its local, state, and global community.
ADMISSIONS

Director of Admissions: Janice Finney
Senior Associate Director: Hege Ferguson
Associate Directors: Donna Bostwick, Julie Richardson
Assistant Directors: Melanie Booker, Lori Hamilton, Christina Klawinski, Mark Meleney, Amy Noyes, Mike Sklms
Panama City Campus Associate Director: Andrew Konopelsky

General Information

Florida State University encourages applications for admission from qualified students regardless of race, creed, color, sex, religion, national origin, age, disability, veteran or marital status, sexual orientation, gender identity, gender expression, or any other protected group status in accordance with all pertinent federal, state, and local laws on non-discrimination and equal opportunity. Admission of students to Florida State University is within the jurisdiction of the University, but subject to minimum standards adopted by the Florida Board of Governors. The admission requirements stated below are minimum requirements, and satisfaction of these requirements does not guarantee admission to Florida State University. Admission shall be on a competitive basis within curricular, spatial, and fiscal limitations.

The application for admission is available online at http://admissions.fsu.edu. When applying for admission, the Federal Privacy Act of 1974 allows colleges and universities to require the disclosure of social security numbers for the purpose of identification and verification of student records, including registration, financial aid, and academic records, and for verification of identity in connection with the provisions of its services. The University does not use social security numbers for student identification; instead, the University assigns a Florida State University student identification number (EMPLID).

The Office of Admissions operates on a scheduled notification system for beginning freshmen and a modified rolling cycle for transfers. An application cannot be submitted earlier than one year prior to the term for which admission is desired. In addition, the University reserves the right to close admission earlier than the published deadline(s), and/or increase requirements, if warranted by enrollment limitations and the number and quality of applications.

The Office of Admissions will post all decisions electronically on the Online Status Check (OSC), an applicant’s private account created at the time of application. Admission is for a specific term, and if the student is unable to enroll for the term indicated on the OSC, the Office of Admissions should be notified immediately. If the student wishes to be considered for a different term, the student must submit a new application and application fee. A change in term will result in a reevaluation of the application. The applicant should not assume that admission will automatically be granted.

The University reserves the right to request an evaluation of any international academic document. (For transfer credit, an official course-by-course evaluation is required.) We recommend this evaluation be done by a member of the National Association of Credential Evaluation Services or the International Education Credential Services provided by the American Association of Collegiate Registrars and Admissions Officers.

Offers of admission to the University are often contingent upon the subsequent receipt of official college, university, and/or high school transcripts indicating successful performance and verification of high school graduation. Poor performance and/or failure to meet the stipulated conditions of admission can result in the offer of admission being rescinded. Failure to submit such documents before enrollment can result in the cancellation of admission and registration.

Undergraduate applicants who are denied admission to the University may appeal the admission decision if they have evidence that, due to extenuating circumstances or prior unrevealed information, the admission decision rendered was inequitable. Applicants are required to appeal in writing to the Office of Admissions through the Admissions Committee.

An application or residency statement submitted by or on behalf of a student that contains false, fraudulent, or incomplete statements may result in denial of admission or denial of further registration and/or invalidation of Florida State University credit and related degrees.

Prior to registering for classes, accepted students must be health compliant. For information regarding this requirement, refer to http://ihs.fsu.edu. Florida State University reserves the right to cancel the admission of an applicant whose health record indicates the existence of a condition that may be harmful to members of the University community.

Admission from Secondary School

An applicant who desires admission as a beginning freshman student after graduating from a regionally accredited high school (or comparable international institution) and before attending an accredited post-secondary institution must provide the Office of Admissions with the following:

Application for Admission. The completed application for admission and a nonrefundable $30.00 processing fee should be submitted as soon as possible at the beginning of the senior year. The preferred method of payment is online at http://fees.fsu.edu. If payment is by check or money order, it must be made payable to Florida State University and drawn on a U.S. bank. The application will not be processed without this fee, and there are no provisions to waive or postpone it unless the applicant can document receipt of a fee waiver from the American College Testing (ACT) Program or College Board (SAT), or National Association for College Admission Counseling (NACAC).

Self-reported Student Academic Record. The Self-reported Student Academic Record (SSAR) is an online transcript, created by the student, that lists the classes and associated grades attempted (or those to be attempted) for high school and/or college credit. It replaces the high school and college transcripts used by the Office of Admissions during the initial review process. Detailed information on the SSAR can be found at http://admissions.fsu.edu/freshman/admissions/ssar.cfm. Since accuracy is critical, applicants are advised to have a copy of their high school transcript available to use as a reference when creating the SSAR.

Note: Applicants who have already graduated from high school, have not followed an educational curriculum patterned after the U.S. system (both U.S. and international students), or are GED graduates do not complete the SSAR. Instead, they must submit their secondary school credentials. For students following an educational curriculum not patterned after the U.S. system, refer to the ‘Academic Records’ portion of the “International Student Admission” section of this chapter for details on what to submit.

College Transcripts. Students who have registered for coursework at a college or university through dual enrollment or non-degree status must submit an official transcript from that post-secondary institution. Transcripts are considered official when they are sent directly from the college or university to the Office of Admissions and contain an official seal and/or signature. Transcripts bearing the statement “Issued to Student,” notarized transcripts, or transcripts submitted by the applicant are not considered official. [An official course-by-course evaluation is required of all academic records from non-U.S. institutions. Refer to ‘Transfer Credit’ in the “International Student Admission” section of this chapter for details.]

Test Scores. Official results from the ACT or SAT are required of all applicants for freshman admission. Applicants planning to take the ACT must also take the ACT Writing Test. Either one or both of these tests should be taken no later than the February testing date of the senior year. Since the highest combination of scores is always considered, students should feel free to repeat a test.

Note: In March 2016, the College Board expects to launch a new and redesigned SAT exam.

Letters of recommendation are not required and will not be used in the decision-making process. Applicants denied admission to the University may submit letters of recommendation and other information to support their appeal.

Auditions

Auditions are required of all applicants planning to major in music, dance, or the bachelor of fine arts (BFA) degree program in theatre. In addition to submitting the University application for admission and other supporting information, prospective students should visit the Web sites for the College of Music (http://music.fsu.edu) or the College of Fine Arts (http://c vatd.fsu.edu) for details.

Departmental Application

A departmental application is required of all applicants planning to major in animation and digital arts, motion picture arts-production, or theatre. In addition to submitting the University application for admission and other supporting information, prospective students should visit the Web sites for the College of Motion Picture Arts (http://film.fsu.edu) or the College of Fine Arts (http://c vatd.fsu.edu) for details.
All information used to make an admission decision must be received by one of the published deadlines. The University does not ordinarily accept freshman applications for the Spring term.

**Deadlines for Applications and Supporting Documents for Secondary School Applicants**

There are two notification dates for freshmen applying for either the 2016 Summer or Fall term.

<table>
<thead>
<tr>
<th>Applications and all supporting documents received by:</th>
<th>Decision by:</th>
</tr>
</thead>
<tbody>
<tr>
<td>October 15</td>
<td>December 9</td>
</tr>
<tr>
<td>January 13</td>
<td>March 16</td>
</tr>
</tbody>
</table>

All information used to make an admission decision must be received by one of the published deadlines. The University does not ordinarily accept freshman applications for the Spring term.

**Admission Requirements**

**Academic Qualifications**

Most students accepted to the University present at least a 3.8 grade point average (GPA) in all academic subjects (grades 9 through 12) and test scores of at least 26 (composite) on the ACT or 1760 (total) on the SAT. In addition to academic GPA and test scores, a variety of additional factors are considered. These include an essay, the pattern and quality of courses and curriculum, grade trends, minimum subscores on the ACT or SAT, and educational objectives. Applicants who bring other important attributes to the University community may also receive additional consideration. These applicants include first generation and low socioeconomic students applying to CARE, visual and performing artists, and skilled athletes.

For students taking dual enrollment classes either in high school or at the college/university, their college career has begun. A separate review will occur, looking only at the types of college classes taken and the grades earned. Any grade below “C” (2.0) is cause for concern, and could prevent the applicant from being admitted to the University, or cause the offer of admission to be rescinded.

**Required High School Course Units**

Specific high school course units are required for admission to the freshman class. An academic unit is the equivalent of a year-long course that is not remedial in nature. Upon graduation from high school, applicants must have earned four units of English (at least three with substantial writing requirements); four units of mathematics (algebra I level and higher); three units of natural science (at least two with laboratory); three units of social science (includes history, civics, political science, economics, sociology, psychology, and geography); two sequential units of the same world language; and two elective units (preferably from the English, mathematics, natural science, social science, or world language areas). The units listed above represent the minimum required for admission consideration but do not guarantee admission. Most students accepted to the University exceed the minimums.

**Calculation of High School Academic GPA**

Only the academic core subjects will be used in the calculation of the grade point average for admission purposes. We do not use the GPAs listed on the high school transcript or report card. Grades of “C–” or better in dual enrollment, AICE, AP, and IB coursework will be weighted and receive one full bonus point in the recalculation; grade of “C–” or better on honors, AICE, AP, and IB coursework will receive one half bonus point. For repeated courses, we will use all attempts in the recalculation.

Accuracy on the SSAR is extremely important because all students accepted to the University who have deposited will have their offers of admission validated upon receipt of the final high school and college transcripts sent to us upon graduation. At that time a final recalculation of the core GPA will be done by the Office of Admissions. Students with inaccurate data on the SSAR may have their admission revoked if admitted, or have their registration cancelled if enrolled.

**ACT/SAT Information**

Applicants should take both the ACT and SAT since Florida State University uses only the highest composite or total score for admission and scholarship purposes. Applicants planning to take the ACT must also take the ACT Writing Test. They should also take each exam more than once since the highest subscores are used to create the ACT composite and SAT total. In addition to the overall composite on the ACT or total score on the SAT, the following minimum subscores are required: Writing: 21 on the ACT English and English/writing or 500 on the SAT writing; Math: 21 on the ACT math or 500 on the SAT math; and Reading: 22 on the ACT reading or 500 on the SAT critical reading. These subscores represent the minimums required for admission consideration but do not guarantee admission.

**High School Students Earning the Associate in Arts (AA) Degree**

Applicants to Florida State University who are graduating from high school and earning the AA degree simultaneously must meet freshman requirements for admission and be approved by the academic program to which they are applying. All majors have individual milestones (prerequisite college courses and/or specific college grade point averages) that must be met. In addition, some majors require auditions, departmental applications, portfolios, or other information for consideration. Refer to the “Academic Departments and Programs” section of this General Bulletin or http://www.academic-guide.fsu.edu for details.

**Home Education and GED Information**

Applicants who have graduated from a home education program must submit a final, official home education transcript that includes a list of all coursework attempted, and grades and units for each course completed. If the applicant previously attended another school, or has completed coursework through a virtual school or dual enrollment at a college or university, official transcripts are required and those courses should be reflected on the home education transcript.

Applicants who present a GED transcript will also be considered for admission. An official GED transcript must be submitted and accompanied by an official high school transcript through whatever portion of high school was completed. ACT and/or SAT results must be submitted as well.

**Center for Academic Retention and Enhancement (CARE)**

Through the Center for Academic Retention and Enhancement (CARE), the University offers a special admission program dedicated to assisting students who are the first generation in their family to attend college and who are socio-economically disadvantaged. CARE provides a comprehensive program of orientation and academic support designed to ease the transition from high school to college, and to build a strong academic foundation. Students admitted to the University through CARE will begin their studies in the summer. Interested students should submit the application for admission to the University, a supplemental CARE Summer Bridge Application, two short essays, the Free Application for Federal Student Aid (FAFSA), and tax information. The minimum requirements for consideration include a 3.0 academic GPA as recalculated by the Office of Admissions and either an ACT composite score of 19 or SAT total score of 1330. Meeting the minimum requirements does not guarantee admission to the program.

**Freshman Scholarships**

All freshman applicants who are admitted to the University are automatically considered for merit-based scholarships. Recipients are selected based upon high school grades and test scores. Because scholarships are limited, students with strong academic records should apply to the University by the first notification deadline.

**Early Admission**

Florida State University provides outstanding high school students with an opportunity for early entry into the University. The following guidelines are used to consider these students: (1) sufficient maturity as evidenced by age at the time of admission and/or written recommendations supporting the candidate’s maturity; (2) a 3.9 or better weighted high school GPA in the academic subjects; (3) a minimum composite score of 28 on the ACT or total score of 1860 on the SAT; (4) sufficient strength in the academic units; (5) evidence of a lack of curricular opportunity in the existing high school setting; and (6) three letters of recommendation, one of which must be from the high school principal or a representative of the principal.

**Freshman Admission Deposit**

All freshman applicants who are admitted to the University are required to submit a $200.00 nonrefundable admission deposit by May 1 to secure a place in the freshman class. Upon enrollment, the deposit will be applied toward the student’s tuition.
Admission by Transfer

Applicants are considered transfer students if they have earned twelve or more semester hours of college credit from a regionally accredited college or university (or comparable international institution) as evaluated by the Office of Admissions after graduation from high school. Applicants desiring admission by transfer must provide the Office of Admissions with the following:

Application for Admission. The completed application for admission and a nonrefundable $30.00 processing fee should be submitted six to nine months prior to the desired term of enrollment. The preferred method of payment is online at http://fees.fsu.edu. If payment is by check or money order, it must be made payable to Florida State University and drawn on a U.S. bank. The application will not be processed without this fee, and there are no provisions to have it waived or postponed.

College Transcripts. Official transcripts from each college and university attended must be submitted to the Office of Admissions. Transfer credit posted on the record of another institution is not accepted in lieu of submitting the official transcript from the original institution. Transcripts are considered official when they are sent directly from the college or university to the Office of Admissions and contain an official seal and/or signature. Transcripts bearing the statement “Issued to Student,” notarized transcripts, or transcripts submitted by the applicant are not considered official. [An official course-by-course evaluation is required of all academic records from non-U.S. institutions. Refer to “Transfer Credit” in the “International Student Admission” section of this chapter for more details.]

Secondary School Record. An official high school transcript is required of all transfer applicants. The transcript must reflect all attempted high school credits and the date of graduation.

Test Scores. Official results from the ACT or SAT are required of all freshman/sophomore-level applicants. Applicants submitting the ACT must also provide the ACT Writing Test. It is recommended that junior and senior transfer applicants also submit test scores.

Exam Results. All AICE, AP, IB, and/or CLEP results should be submitted if college credit has been earned. Refer to the tables at the end of the “Academic Regulations and Procedures” chapter in this General Bulletin for required scores and course equivalents for which credit is granted.

Deadlines for Applications and Supporting Documents for Transfer Students*

| Spring term   | November 1 |
| Summer term   | March 1    |
| Fall term     | July 1     |

*Some departments may have earlier deadlines than those established by the University, or may admit only for a specific term. If the University deadline falls on a weekend, applicants have until the following Monday to submit applications and all supporting documents.

General Admission Requirements

World Language Admission Requirement

All transfer applicants must have satisfied the state of Florida’s world language admission requirement by having earned two sequential units in one world language (i.e. proficiency through Spanish II) in high school, or having completed through the second elementary/beginning course of one world language (i.e. proficiency through SPN 1121) in college (or documented equivalent proficiency). American Sign Language is accepted as a world language.

College Level Proficiency Skills in Reading, Writing, and Mathematics

All transfer applicants must have demonstrated college-level proficiency in reading, writing, and mathematics prior to being considered for admission. This can be achieved by having a minimum cumulative 2.0 GPA in six semester hours of approved college-level English composition and a minimum cumulative 2.0 GPA in six semester hours of approved college-level mathematics with no grade below “C-,” or by having the appropriate subscores on the ACT and/or SAT. The appropriate subscores can be found in the “ACT/SAT Information” section of this chapter.

Associate in Arts (AA) Diploma

Applicants who have received an Associate in Arts (AA) degree from a Florida public institution immediately prior to transfer will receive priority consideration for admission, provided an application and all supporting documents have been received by the deadline.

Junior/Senior-Level Applicants

Junior and senior applicants (sixty or more semester hours of transferable credit as determined by the Office of Admissions) must:

- Have at least a 3.0 (on a 4.0 scale) cumulative GPA on all college work attempted.
- Have at least a 3.0 (on a 4.0 scale) GPA on all college work attempted at the last institution.

Freshman/Sophomore-Level Applicants

Freshman and sophomore applicants (twelve to fifty-nine semester hours of transferable credit as determined by the Office of Admissions) must:

- Meet Florida State University’s freshman criteria (refer to ‘Admission Requirements’ in the “Admission from Secondary School” section of this chapter).
- Have at least a 3.0 (on a 4.0 scale) cumulative GPA on all college work attempted.
- Have at least a 3.0 (on a 4.0 scale) GPA on all college work attempted at the last institution.

Major Requirements

All transfer applicants must meet requirements for admission to the University and to the major/program of interest. For information about the major/program of interest, refer to the “Academic Departments and Programs” section of this General Bulletin or http://www.academic-guide.fsu.edu for more details.

Excess Credit Hour Surcharge

In 2009, the Florida Legislature implemented a new law (Section 1009.286, FS) to encourage students who enroll in a state university to complete the baccalaureate degree program as quickly and efficiently as possible. It established what is commonly referred to as an “Excess Credit Hour Surcharge” by charging an additional student payment to those students who do not complete the baccalaureate degree in a timely fashion. Accelerated coursework (AICE, AP, IB, CLEP, and dual enrollment) taken while in high school will not be considered in this hour count. To learn more about this surcharge, refer to http://registrar.fsu.edu/excess_hours.

Educator Preparation Programs

All students planning to pursue a teacher education program at Florida State University must be formally admitted to Teacher Education. Admission to Teacher Education is administered by the Dean of the College of Education and assigned to the Office of Academic Services and Intern Support, 2301 Stone Building.

Note: Application for admission to Teacher Education is distinct from admission to an upper-division college or program and is a required step for graduation and certification.

Professional Behaviors and Dispositions: While enrolled in teacher education programs, the student is expected to demonstrate behaviors and dispositions that conform to the “Code of Ethics” (State Board of Education Rule 6B-1.006, FAC) and the “Principles of Professional Conduct in Florida” (State Board of Education Rule 6B-1.006, FAC). The programs reserve the right to refuse or discontinue enrollment of any student who violates these expectations or in the judgment of a majority of the program faculty does not meet the program standards.

Section 1004.04, Florida Statutes, Public Accountability and State Approval for Teacher Preparation Programs, State Board of Education Rules 6A-4.0021 and 6A-5.066, and the Florida State University Council on Teacher Education require that all students seeking admission to undergraduate teacher education programs at Florida State University meet the following requirements prior to entering the program:

1. Have at least a 2.5 (on a 4.0 scale) GPA on all college work attempted; and
2. Have a grade of “C-” or better in each required general education English and general education mathematics course; and
3. Take and achieve a passing score on all sections of the General Knowledge portion of the Florida Teacher Certification Examination.

Note: There is no minimum composite/total score on the ACT or SAT for admission to Teacher Education. However, programs with limited enrollment status may require submission of these scores and may use them as criteria for determining which students will be admitted.

Prior to entry into the degree program (upper division), students must have completed the state of Florida Common Course Prerequisites, which include:

- a) three education core courses of EDF 1005, EDF 2085, and EME 2040; and...
Limited-Access Programs

A limited-access program utilizes selective admission to limit program enrollment. Limited access status is justified when student demand exceeds available resources (student/faculty ratios, instructional facilities, equipment, or specific accrediting requirements). Criteria for selective admission include indicators of ability, performance, creativity, or talent to complete required work within the program. Admission to such programs is governed by the Articulation Agreement and by the State Board of Education administrative rules.

For a number of degree programs, access is limited at the upper-division level to those students meeting certain additional criteria. These additional criteria are applied equally to AA degree transfers from Florida public institutions and rising juniors at Florida State University.

Limited-access programs are offered by a number of different colleges. For specific requirements for admission to a particular department or college, refer to the appropriate section of this General Bulletin.

Limited Access Degree Programs at Florida State University Include:

- Accounting
- Athletic Training
- Business Administration
- Communication
- Communication Science and Disorders
- Computer Science
- Dance
- Dietetics
- Early Childhood Education
- Economics
- Elementary Education
- Finance
- Hospitality Management
- Interior Design
- Management
- Management Information Systems
- Marketing
- Motion Picture Arts
- Music Education
- Music, Liberal Arts
- Music Performance
- Music Theory and Composition
- Music Therapy
- Nursing
- Psychology
- Real Estate
- Risk Management/Insurance
- Social Work
- Special Education
- Sport Management
- Studio Art, Bachelor of Fine Arts
- Theatre
- Visual Disabilities

Transfer Scholarships

Associate in Arts (AA) degree recipients from Florida public colleges who enroll directly at the University and who display high academic achievement are automatically considered for academic scholarships on a competitive basis by Florida State University.

International Student Admission

Applicants to Florida State University are considered international if they are not U.S. citizens, dual citizens, or Permanent Residents. The admission requirements and deadlines for international applicants can be found at the beginning of this chapter under “Admission from Secondary School” for freshmen and “Admission by Transfer” for transfers. In addition, international applicants must provide the Office of Admissions with the following:

- **Academic Records.** Official or certified copies of all academic records and/or examination results from every institution attended are required. Records are considered official only when sent directly from the issuing institution, and must bear the original seal of the institution or the original signature of the institution’s records official. All documents must be issued in the native language and be accompanied by certified English translations. Certified documents should be true copies that are signed and dated by an educational official familiar with academic records. Documents signed by a notary or other public official with no educational affiliation will not be accepted.

- **Transfer Credit.** An official course-by-course evaluation is required of all academic records from non-U.S. institutions. We recommend the evaluation be done by a member of the National Association of Credential Evaluation Services (http://naces.org) or the International Education Credential Services provided by the American Association of Collegiate Registrars and Admissions Officers (http://www.aacrao.org).

- **English Proficiency Test.** If an applicant’s native language is not English, the applicant must submit a minimum score of 550 on the paper-based or 80 on the Internet-based Test of English as a Foreign Language (TOEFL) or 6.5 on the International English Language Testing System (IELTS), or 55 on the PTE Academic examination, or 77 on the Michigan English Language Assessment Battery (MELAB). Score reports are considered official only when they are sent directly to the Office of Admissions from the testing agency, and are not valid after two years.

- **Certification of Finances.** The Certification of Financial Responsibility (CFR) must be completed before the Certificate of Eligibility (Form I-20 or DS-2019) is issued. The I-20 and DS-2019 are immigration forms presented to the United States Embassy/Consulate in order to obtain a U.S. student visa. The University is required by immigration authorities to verify the financial resources of each applicant prior to issuing the Form I-20 or DS-2019; therefore, it is important that the applicant knows the costs of attending the University and has the necessary funds. More information on the CFR is available at http://cge.fsu.edu/newStudents/cfr.html.

Notice of Admission

Formal notification of admission to Florida State University comes from the Office of Admissions and is for a specific term. The Center for Global Engagement will process the appropriate immigration form (Form I-20 or DS-2019) necessary to obtain the student’s visa when formal admission is granted and all required financial documentation is received.

If the student is unable to enroll for the term indicated on the Online Status Check, the Office of Admissions should be informed immediately. If the student wishes to be reconsidered for a different term, the student must submit a new application and application fee.

Finances

Before a United States Consul will grant a visa, international applicants must prove that they will have sufficient funding to meet all of their expenses while studying in the United States. Applicants provide documentation demonstrating the funding noted on their I-20 or DS-2019 and must certify that this funding will be available for the first year and that they understand funding must be available for the subsequent years of their degree program at FSU.

If the student’s government limits the amount of money that can be sent to students in the United States, the applicant should make sure that sufficient funds will be available to cover all costs while at the University. When applicants leave their country, they must have enough money to pay for travel expenses to the University, fees for the entire term, living expenses until more money arrives, and the return fare to their home country. If the applicant’s government requires verification of enrollment before money can be forwarded, the student may request verification from the Office of the University Registrar after registration is completed at the University.

A number of international students arrive at the University without being aware of the amount of money they will need. On-campus employment op...
portunities are limited, and most international students are not permitted to work off campus except under special circumstances. Students should have access to approximately half of the estimated total yearly amount at the beginning of each semester, since University fees must be paid upon registration at the start of each term. Students should also be prepared for initial expenses such as housing deposits, insurance, utilities, etc. The most up-to-date cost estimates for international students can be found at http://cgie.fsu.edu/newstudents/cfri.html. These estimates are for unmarried students with no dependents. Additional funds must be included for spouse and/or family.

Passports and Visas

International applicants need a current passport from their own government and a visa from the United States Embassy/Consulate to enter the United States. Applicants should apply for a passport as soon as possible, although in some countries it will be necessary to provide proof of admission to a school in the U.S. before a passport is granted.

Students already in possession of a passport must make sure it will remain valid for six months from the date they plan to enter the United States. It would also be prudent for students to check with the Embassy or Consulate of their native country to find out how passports are renewed while in the U.S. In some cases, students may need to get an extension of validity from their home country.

If students are coming to the University specifically for the purpose of studying, they need to apply for a Student Visa (F-1 or J-1). It is granted upon presentation of a Certificate of Eligibility (Form I-20 for the F-1 visa and Form DS-2019 for the J-1 visa that is typically granted to government-funded students) and proof that sufficient financial support to cover all expenses for the entire period of study in the U.S. is available. Undergraduate students holding F-1 or J-1 visas are required to carry at least twelve semester hours each semester.

Center for Global Engagement

The Center for Global Engagement (CGE) provides immigration advising and support services to international students. Upon arrival at Florida State University, international students must check in with the CGE and attend orientation for new international students. In addition to the International Student Orientation, all new freshman and transfer (undergraduate) degree-seeking students must attend an orientation session through the Office of New Student and Family Programs.

Health Insurance Requirement

University Health Services provides outpatient care. Because students are likely to incur costs for medical care beyond that provided through outpatient services, adequate health insurance coverage must be obtained before they will be permitted to register for classes or to continue enrollment. In addition, international students with “J” visa status who will be accompanied by dependents are required by federal regulations to purchase health insurance coverage for all dependents. For more information regarding the health insurance requirement, refer to http://uhs.fsu.edu.

All applicants are required to complete and submit an immunization form that provides proof of required immunizations. Students will not be allowed to enroll until they have submitted the immunization form with proof of required immunizations and have purchased insurance or provided proof of health insurance that meets the minimum coverage required by the state of Florida.

Center for Intensive English Studies

English is the language of instruction and communication at the University. International applicants who lack sufficient English language preparation must correct this deficiency before being admitted to the University. Students may do this in their home country or in the United States at a school that offers an intensive English language program. Florida State University offers such a program through the Frederick L. Jenks Center for Intensive English Studies. Detailed information on the Center may be obtained at http://cies.fsu.edu.

Admission to the Frederick L. Jenks Center for Intensive English Studies does not guarantee admission to Florida State University after the successful completion of English studies.

Admission to Graduate Study

Admission to graduate study involves admission to the department or college in which the applicant expects to study; therefore, final admission to the University is subject to approval by the specific program. While there are minimum University admission requirements, the departments can, and frequently do, set admission standards higher than these minimums. The student should determine departmental requirements first and then determine the University admission requirements. Consult the Graduate Bulletin for complete details.

Admission to the Panama City Campus

Undergraduate students who are interested in attending the Panama City campus should request information from the Panama City Office of Admissions and Records, Florida State University, 4750 Collegiate Drive, Panama City, FL 32405-1099, or apply online at http://pc.fsu.edu. The same policies, procedures, and requirements that pertain to freshman and transfer students at the Tallahassee campus apply to the Panama City campus, except the following:

- The required $30.00 application fee can be paid online immediately following the submission of the application, or by check or money order sent to the Panama City Office of Admissions and Records at the address listed above. Checks or money orders must be drawn on a U.S. bank and be made payable to Florida State University.
- All transcripts, test scores, and other admission documents must be submitted to the Panama City Office of Admissions and Records prior to the published deadline.
- International applicants cannot be considered for admission to the Panama City campus.

Deadlines for applications and supporting documents at the FSU Panama City campus are typically one month prior to the start of each term. Further information is available by calling the Office of Admissions and Records on the Panama City campus at (850) 770-2160 or by visiting http://pc.fsu.edu.

Continuous Enrollment

Please refer to the “Academic Regulations and Procedures” chapter in this General Bulletin for continuous enrollment policies.

Readmission

Returning undergraduate degree-seeking students who: (1) have been absent from the University for two or more consecutive terms (including Summer); (2) have been dismissed from the University and have been absent for two or more consecutive terms (including Summer); (3) have withdrawn from the University and have been absent for two or more consecutive terms (including Summer); (4) have had their last term of enrollment at the University administratively cancelled and have been absent for two or more consecutive terms (including Summer); or (5) have earned a bachelor’s degree from the University and wish to pursue a second bachelor’s degree, must submit an application for readmission to the Office of Admissions. Academically dismissed students are not eligible for readmission unless they have been reinstated by their academic dean. Reinstatement to continue does not guarantee a favorable readmission decision or admission into a specific major. Refer to the ‘Dismissal and Reinstatement’ section of the “Academic Regulations and Procedures” chapter of this General Bulletin.

Students who have attempted college work (including correspondence work) at any college or university since their last enrollment at Florida State University must have official transcripts sent to the Office of Admissions. Transcripts are considered official when they are sent directly from a college or university to the Office of Admissions and contain an official seal and/or signature. Transcripts bearing the statement “Issued to Student,” notarized transcripts, or transcripts submitted by the applicant are not considered official.

The University reserves the right to refuse readmission to any student who does not meet the University’s academic, conduct, or health requirements. Students who are denied readmission to the University may appeal that decision by filing a written petition with the appropriate academic dean’s office. Students who are denied readmission for judicial and/or conduct reasons may appeal by filing a written petition to the Admissions Committee through the Director of Admissions.

The readmission application and all supporting documents should be submitted by the published deadline of the term for which readmission is desired. (Consult the “University Calendar” chapter of this General Bulletin for specific deadlines.)

Readmitted students are subject to retention requirements in effect at the time of reenrollment. In addition, students claiming Florida residency must reestablish their eligibility for this classification when applying for readmission.

Readmission after Multiple Withdrawals

When a student has withdrawn from the University three or more times, subsequent readmission must first be considered by a committee whose charge is to assess the student’s capability of making satisfactory progress toward a degree. This committee, appointed by the Council of Associate and Assistant Deans, will make a recommendation to the dean of the student’s college who will make the final decision.
Non-Degree Student Regulations

Enrollment as a non-degree student is subject to approval by the Office of Admissions and may be open to high school and college graduates. Refer to the ‘Admission Requirements’ and ‘Admission by Transfer’ sections of this chapter for enrollment requirements. Applicants who have been denied admission as a degree-seeking student or who missed the deadline for submitting a degree-seeking application will not be considered for enrollment as a non-degree student. Students intending to register for graduate coursework under the non-degree status should consult the Graduate Bulletin for details.

The completed non-degree student application must be accompanied by a $30.00 nonrefundable processing fee and all supporting documents. Applications should be submitted for consideration one semester prior to the desired term of enrollment. Consult the “University Calendar” chapter of this General Bulletin for specific application deadlines. The University reserves the right to close the application process earlier than the published deadlines if warranted by enrollment limitations.

A non-degree student at Florida State University who subsequently decides to pursue a degree must apply for admission through the Office of Admissions. The student may be reclassified as a regular undergraduate student upon meeting undergraduate admission requirements. Enrollment as a non-degree student does not guarantee admission to an undergraduate program.

Work taken as a non-degree student does not automatically carry undergraduate degree credit; however, up to fifteen semester hours earned as a non-degree student may be applied toward an undergraduate degree with approval of the appropriate dean after degree-seeking status is obtained.

The University generally does not issue I-20 or DS-2019 visa documents for international non-degree students. At the request of a department, the University will provide a visa document for non-degree students who are accepted for full-time enrollment in a certificate program. The department must contact the Center for Global Engagement (http://cge.fsu.edu), and the student must provide evidence of financial support and other information required by the United States government. In addition, the student must purchase or provide proof of health insurance coverage prior to enrollment. Foreign nationals on a student visa may not use the non-degree student status other than to fulfill prerequisite requirements or for Summer enrollment if full-time status has been maintained during the academic year.

All registration by non-degree students is on a space-available basis, and, in some cases, may require departmental approval. For more complete details, see the “Academic Regulations and Procedures” chapter of this General Bulletin.

Tallahassee Community College/Florida State University Cooperative Program

A Tallahassee Community College student wishing to dual enroll at Florida State University must obtain specific approval from the designated representative in the Office of Enrollment Services at Tallahassee Community College and the Office of Admissions at Florida State University by the published deadline. (Consult the “University Calendar” chapter of this General Bulletin for specific application deadlines.) If the student is participating in a special program, a student must also obtain approval from the appropriate departmental representative before submitting the form to the Office of Admissions. If approval for dual enrollment is granted, the student follows the prescribed registration procedures and adheres to the fee schedule established by this institution. The approval of one institution does not bind the other to comply. Florida State University students wishing to enroll as a transient at another institution should refer to the “Academic Regulations and Procedures” chapter of this General Bulletin.

Note: Academic rules governing regular students (e.g., fees, drop/add, withdrawal, grading policies, etc.) apply to transient students.

Florida Agricultural and Mechanical University/Florida State University Interinstitutional Registration

A Florida Agricultural and Mechanical University (FAMU) student planning to participate in the Cooperative Program at Florida State University must obtain specific approval from the designated representative in the Office of the Registrar at FAMU. Approval is also required from the department offering the course at FSU. The completed co-op application must be returned to the Office of the Registrar at FAMU by the published deadline. (Consult the “University Calendar” chapter of this General Bulletin for specific application deadlines.) If approval to co-op is granted, the student will be registered for courses at Florida State University by a representative in the Office of the University Registrar at FSU. Some courses may have limited availability, and registration for these courses may be denied or delayed until drop/add at the beginning of the term. The approval of one institution does not bind the other to comply. All tuition and fees are paid at FAMU unless the course has additional departmental fees associated with it. Any departmental fees will be paid at FSU. Florida State University students planning to co-op at FAMU should refer to the “Academic Regulations and Procedures” chapter of this General Bulletin.

Interinstitutional Transient Students

A student at another institution who wishes to take advantage of special resources and/or programs not available at the home institution should submit an interinstitutional transient student application that has been approved by the home institution to the Office of Admissions by the published deadline. (Consult the “University Calendar” chapter of this General Bulletin for specific application deadlines.) If approval for transient status is granted, the student follows the prescribed registration procedures and adheres to the fee schedule established by this institution. The approval of one institution does not bind the other to comply. A Florida State University student wishing to enroll as a transient at another institution should refer to the “Academic Regulations and Procedures” chapter of this General Bulletin.

Note: Academic rules governing regular students (e.g., fees, drop/add, withdrawal, grading policies, etc.) apply to transient students.
**Office of New Student & Family Programs**

**Assistant Dean of Students/Director:** Patrick Heaton; **Associate Director:** Andrea Failing

All new undergraduate students are required to attend an orientation, advisement, and registration session coordinated by the Dean of Students Department’s Office of New Student & Family Programs. During orientation, students are given essential information: the University’s policies and procedures, community values and standards, and academic requirements and opportunities. Students also receive practical advice on consumer survival: where to buy books, open checking accounts, or meet other students with similar interests.

In addition to meeting faculty and administrators, students are assigned to small groups led by trained staff members, comprised of currently enrolled students, who inform and guide the newcomers. Students must meet with their academic advisors before registering for classes.

Students may not register for their first semester of courses until they have completed an orientation session. The Office of New Student & Family Programs provides sessions preceding each academic term.

Orientation sessions include a concurrent session for family members. During these sessions family members learn about the University, its services and academic programs, and meet with administrators and faculty. New Student & Family Programs also coordinates a shared reading program (One Book / One Campus) for first-year students. Family Members have the option to participate in Family Connection (http://family.fsu.edu), an association for the family members of current Florida State University students.

All admitted undergraduate students receive information and instructions about registering for orientation by mail upon admission. Attendance is by reservation only, and participants must pay a nonrefundable fee. For more information about orientation or other programs, please visit http://www.nsfp.fsu.edu or call (850) 644-2785.

**Persons with Disabilities.** Any student in need of specific services and reasonable accommodations should contact the Student Disability Resource Center, 1st Floor, Student Services Building; (850) 644-9566; http://www.disabilitycenter.fsu.edu.

---

**Center for Global Engagement**

**Director:** Cynthia Green; **Associate Director:** Kristen Hagen; **Assistant Directors:** Joy M. Ira, Leigh Ann Osborne

In addition to the University Orientation mentioned above (see ‘Office of New Student & Family Programs’), new international students are also required to attend an International Student Orientation. This mandatory orientation for new international students is held just before the start of the Fall, Spring, and Summer semesters (before each Summer session) for students coming directly from abroad, transfer students, and students readmitted to the University after an absence of two or more semesters. International students receive notification of International Student Orientation dates and times in the welcome letter sent to them along with the appropriate immigration form (I–20 or DS–2019).

During International Student Orientation, students are provided with important information on maintaining their legal non-immigrant student visa status while obtaining their academic degree at FSU. Federal regulations make it essential that students know and understand their responsibilities under federal immigration law.

Students receive the International Student Handbook, as well as information about Center for Global Engagement services and programs, and University and community resources. They receive information and guidance on various topics including housing, utilities and transportation, insurance, immunization and other health requirements, registration and fee payment, and more.

**Note:** Incoming students may register for classes only after presenting their immigration documents to the Center for Global Engagement staff, obtaining health insurance, clearing required immunizations at University Health Services, and attending the International Student Orientation.

To obtain more information on F1 and J1 student visa status and on the Center for Global Engagement and its services and programs, please visit http://cge.fsu.edu or contact the Center for Global Engagement at 110 South Woodward Avenue; phone (850) 644-1702; fax (850) 644-9951; e-mail: cge@admin.fsu.edu.
Purpose

Advising is a process that includes collection of information, interpretation of data, and dissemination of facts regarding educational programs, courses of instruction, resources, policies, procedures, and career options. Together, the advisor and the student can discuss educational goals and map out an academic program that will achieve the student’s long-range goals.

The Faculty's Role in Advisement

The Student's Role in Advisement

Undergraduate Studies to ensure that the advisors within the unit are kept abreast of changes in academic policies and procedures and to work with the Division of Undergraduate Studies to solve special advising problems. Units shall also monitor closely the quality of their advising and ensure that it meets the goals of the University.

3. The unit will not assign a first semester faculty member to advising unless there is ample evidence of prior college-level advising experience. Each advisor shall attend a workshop before beginning advising duties for the first time and at least every two years thereafter.

4. Recognizing that sound advisement and a successful undergraduate experience should begin even before the student arrives on campus, units shall communicate with students accepted as freshmen or transfer students who indicate an intended major, outlining requirements and preparatory work expected for specific degree programs. Such contact with admitted students shall be coordinated with the Office of Admissions.

5. Each unit will provide a planning guide for lower-division students working toward their majors—designed to help students understand course requirements, prerequisites, and sequences—to enable them to move into the major as efficiently and as well prepared as possible. A similar planning guide will be available for junior and senior students in the major. Both guides will be filed and updated annually with the Division of Undergraduate Studies.

6. Advisors should be aware that students transferring to Florida State University after the freshman year have as great a need for detailed information as do freshmen. Extra care should be taken to inform these students of Florida State University’s rules and regulations, which may differ from their previous college-level experience.

7. Advisors should also be aware of the special needs of the exploratory/undecided majors they advise. Directors or coordinators of advising in each unit should take care to inform advisors of Advising First, the Career Center, and other services on campus available to such students.

8. Advisors should inform students who may have other special needs (e.g., part-time students, disabled students, returning students, minority students, etc.) of the student support services available to them. Directors or coordinators of advising in each unit will ensure that advisors are aware of these student support services.

9. Advisors should take a role in identifying students who are working toward certain majors that may be inappropriate (e.g., a student with low math test scores and/or poor math preparation seeking a major in computer science or engineering). Such students may be referred to the Advising First Center for Academic Planning in A3200 University Center for information about their academic options and to the Career Advising and Counseling (CAC) unit of the Career Center for help in clarifying their interests and abilities; http://www.career.fsu.edu; Dunlap Student Success Center; (850) 644-6431.

10. Units should identify students who have declared a limited access major but who, it appears, are unlikely to be able to meet the special admission requirements of that major. Such students should be made aware as early as possible of the strong likelihood that their intended major will be closed to them; advisors may wish to refer these students to the Advising First Center for Academic Planning, A3200 University Center.

Advising Organization

The Advising First Office assigns most entering freshmen and lower-division transfer students to an advisor, with the exception of those accepted into the College of Music, the College of Motion Picture Arts, and the Departments of Dance and Theatre BFA Programs (College of Fine Arts). In these programs, advisors are assigned by the dean of the respective schools. Typically, students are assigned to either full-time professional or faculty advisors. Advisors of freshmen and sophomores assist students with understanding liberal studies requirements and other University policies and procedures. (See the "Undergraduate Degree Requirements" chapter of this General Bulletin for a discussion of the Liberal Studies for the 21st Century Program and other degree requirements.)

Upon entering a major, usually around the junior year, the focus of advising shifts from liberal studies to major and college requirements. In most cases, this means that the student is assigned to an advisor who will assist with all requirements for the chosen academic major.
Assignment of Advisors

Advisors are initially assigned based on information provided to the University during the admission process. The Advising First Office assigns advisors for most lower-division students. Upper-division students are assigned advisors through the Advising First Office or the dean’s office of their college or school. Academic advisor contact information may be located by visiting http://advisor.undergrad.fsu.edu/advisor_search/advisors.php.

Academic Interest Mapping (“Mapping”)

Mapping is Florida State University’s academic advising and monitoring system that provides students with a recommended eight-semester map for each major. The map is a plan for completing the bachelor’s degree in four years in most programs. The map for each major may be viewed online at http://www.academic-guide.fsu.edu.

Students’ academic progress is monitored Fall and Spring semesters to ensure that they are on course to earn their degrees within four years. Summer semesters are not included in degree mapping and may be used by students to either catch up or get ahead in their degree programs. Students are responsible for checking their own progress and are encouraged to contact their advisors with any questions concerning their programs of study. In addition, advisors will contact students who are not making appropriate progress. Students who intend to change their majors should do so as early as possible. This will enable appropriate advisor assignment and degree monitoring.

Entering students are strongly encouraged to select their majors at the time of admission so that advising may be tailored to their specific program requirements. For those students who are divided in their interests, however, the University permits the option of an exploratory category. Students in this category are expected to declare a formal departmental major early in their second year of enrollment. Students still deciding on a specific major should contact the Center for Exploratory Students in Johnston Ground at (850) 645-2847. Although the exploratory category is a good option for undecided students in their first semesters at the University, students must select a major before they can be certified into an upper-division degree program. See ‘Progression to Upper Division’ in the chapter “Undergraduate Degree Requirements” in this General Bulletin for additional details.

Minimum Progress

Students do not have to complete all of the recommended classes on their maps to remain on course; however, they must meet certain minimum requirements known as “milestones.” Milestones may include a minimum grade point average (GPA), completion of specific classes, and/or minimum grades in one or more of the milestone classes. Milestones are identified on each major map.

Students who are off course are notified of such status by the University. Before registering again, these students must meet with an advisor in order to either: (1) determine what is necessary to get back on course; or (2) identify possible alternative majors. If students are off course for two consecutive semesters, they will be required to change to more appropriate majors. Students will not be permitted to change to majors for which they would be off course for more than one semester.

Declaring or Changing Majors

Students are encouraged to declare an intended major and to meet with an advisor in that academic discipline. The declared major is extremely important because it may allow a student access to important prerequisite courses for that major.

Lower-division students are allowed to change their major at any time during the semester, provided they meet the eligibility requirements of the new major, by submitting a completed major change form to the Advising First Center for Academic Planning, A3200 University Center. Upper-division students should contact their academic dean’s office.

Advising Services

Orientation Advising

Incoming students may change previously provided information concerning their major at orientation check-in. The first academic advising experience for all students occurs during orientation. Due to time constraints, this session usually consists of brief general information and course selection. Students are strongly urged to contact their advisors early in their first semester for an individualized advising appointment.

Department Advising

All freshmen and sophomores are required to see their academic advisors prior to registration each semester. Some major departments prevent students from registering if they have not seen their respective advisors. Contact information for advisors is available at http://advisor.undergrad.fsu.edu/advisor_search/advisors.php or by calling either the dean’s office for the college or school or the academic department of the intended major. The Advising First Center for Academic Planning in UCA 3200 maintains a list of academic advisors for lower-division students.

The academic relationship should be a comfortable and personal one between the student and the advisor. Sometimes, due to personality conflicts or shifting academic interests, this relationship does not develop. Students in this situation may request reassignment to a different advisor through their dean’s office.

Exploratory Major

Students are encouraged to declare a major early in their academic career at Florida State University to ensure proper advisement and course selection. If students are unsure as to which major they wish to pursue, the University offers an exploratory major in which they can examine their academic options and receive specialized support from academic advisors who are specifically trained to provide this assistance. Freshman students still deciding on a specific major should contact the Advising First Center for Exploratory Students in Johnston Ground at (850) 645-2847. Sophomore students still deciding upon a specific major should contact the Center for Academic Planning located in University Center A3200 at (850) 644-3430.

Although the exploratory major is a good option for undecided students in their first semesters at the University, students must select a departmental major before they can be certified into an upper-division degree program. See “Progression to Upper Division” in the chapter “Undergraduate Degree Requirements” in this General Bulletin for additional details.

Advising First

Advising First is a program within the Division of Undergraduate Studies at Florida State University that places professional academic advisors throughout the University’s many academic units. Specifically, Advising First advisors provide academic advising to assist students in meeting liberal studies, major, and University requirements. Currently, the program has approximately 40 professional advisors in numerous locations throughout campus.

Along with being housed in colleges and departments, Advising First advisors are also available in the Center for Academic Planning (UCA 3200), the Center for Exploratory Students (Johnston Ground), the Classroom Building (Room 320 HCB), and Strozier Library (main floor). The Center for Exploratory Students focuses on advising freshman students who are not ready to declare an intended major when they enter the university. This center works closely with students to help them take the appropriate liberal studies and introductory courses while exploring their available academic and career options. The Center for Academic Planning, located in University Center A3200, focuses on working with sophomore Exploratory students, assisting students with major changes, and working with students who are required to change their majors under the University mapping system. Advising First Center for Academic Planning: A3200 University Center; (850) 644-3430; http://www.AdvisingFirst.fsu.edu.

Advising Report and Academic Planner

Florida State University has implemented a computerized advising system to help both students and advisors monitor academic progress. The Academic Requirements Report outlines requirements the student has already met and those the student has yet to complete. Students may view their reports online by selecting the “My Academics” option within the Student Center, available through the myFSU portal. Individual requests for Academic Requirements Reports may be made at the Advising First Center for Academic Planning, A3200 University Center.

Pre-professional Majors

FSU does not have a formal Pre-law major. Students can prepare for admission to law school through a variety of majors, ranging from the arts to technical/scientific disciplines. Often, a minor or emphasis in relevant legal related courses as well as out-of-classroom experiences, including leadership in student organizations, community service, international study and internships, add to student’s preparation for admission to law school. Students interested in pursuing law after their undergraduate degree may contact an FSU Pre-law Advisor to discuss their goals, plans, undergraduate engagement, and the application process. Information on Pre-law Advisors, student organizations, and other pre-law resources may be found at http://prelaw.fsu.edu.

The Pre-Health Professions Advising Office, part of the overall outreach effort of the Florida State University College of Medicine, provides career counseling to students interested in pursuing a career in the health sciences. Since there are no specific majors leading directly to individual health professions, advisors can assist students in developing strategies leading to acceptance into
medical, dental, veterinary, and other programs. Students are encouraged to meet with an advisor as soon as possible in their college careers and at least once each semester thereafter. Information about pre-health organizations is also available through this office. For further information, visit the College of Medicine, 1160A MSB, or call (850) 644-7678.

Student Athlete Academic Services

Student Athlete Academic Services (SAAS) assists student-athletes with the transition into college and provides continued support in all phases of academic and professional development throughout college, culminating with graduation, job placement, or graduate school. Program staff provides academic counseling, study skills development, and additional academic assistance through tutorial programs. This supplements the sound educational practices (class attendance, note taking, preparing properly for quizzes and exams, actively participating in class discussions, and staying current with all assigned readings) that are imperative for academic success. D2108 University Center and D3103 University Center, (850) 644-9201; http://undergrad.fsu.edu/Departments/Student-Athlete-Support.

Center for Academic Retention and Enhancement (CARE)

Florida State University and the Center for Academic Retention and Enhancement (CARE) are committed to recruiting, retaining, and graduating economically and educationally disadvantaged students who have the potential to do college level work. CARE is designed to provide first-time-in-college students from socially and/or economically disadvantaged backgrounds with services such as a limited number of exclusive, full-credit liberal studies courses, academic advising, financial aid advising, a tutorial lab, learning skills workshops, and cultural enrichment activities. The Center promotes a caring environment for students to discuss their academic, personal, and/or social concerns with a friendly, supportive staff. The Center provides a high-school-to-college Summer Bridge Program that includes intensive academic and social orientation to the University, introduction of participants to the responsibilities and opportunities of college life, encouragement of the development of useful study habits, and assistance with recognizing potential for success. In addition, the Unconquered Scholars Program, CARE provides additional academic and engagement support activities for students who were a part of dependency care, foster care, or homeless before their enrollment at FSU. Thagard Building, 109 Collegiate Loop, (850) 644-9569; http://www.care.fsu.edu.

Pre-Collegiate Programs

College Reach Out Program (CROP) is a state-funded program established to identify, motivate, and prepare disadvantaged middle and high school students to pursue post-secondary education. Through supplemental academic assistance, enrichment activities, educational field trips, and college tours, CROP prepares students for the rigors of a college education. The University Experience Program is the Summer residential component of CROP offering high school students from disadvantaged socioeconomic backgrounds the opportunity to visit the Florida State University campus during the Summer. They attend academic courses and take part in cultural enrichment and college exposure activities. The Upward Bound Program (UBP) is a federally-funded program that serves high school students from low socio-economic backgrounds. Located at East Gadsden High School in Gadsden County, Florida, Upward Bound offers developmental opportunities to students through a variety of educational activities, including an on-site computer lab dedicated to UBP participants. UBP staff also assists students in the development of personal and social skills that will help them complete high school and continue their formal education in a post-secondary setting.

Academic Center for Excellence (ACE)

The Academic Center for Excellence (ACE) is a University learning center focused on helping undergraduate students develop the study skills and personal success habits that enhance learning and encourage the highest level of academic achievement. ACE provides free peer tutoring, study skills workshops, individual consultations with faculty, preparation for graduate school entrance exams, and a one-credit study skills course (SLS 1122) available to all undergraduate students. The ACE Learning Studio, located at G051 Johnston Ground in the William Johnston Building, offers appointment-based tutoring in a wide variety of subjects including math, biology, chemistry, physics, accounting, economics, and more. Additionally, walk-in math tutoring is available any time the Learning Studio is open. For hours, visit http://ace.fsu.edu. ACE faculty teaching SLS 1122 are located in A3600 University Center; http://ace.fsu.edu.

Reading-Writing Center

Part of the English Department, the Reading-Writing Center (RWC) serves all Florida State University student-writers (e.g., first-year students writing for composition class, upper-level students writing term papers, seniors composing letters of application for jobs and graduate schools, and graduate students working on theses and dissertations). Like a laboratory for ideas, the RWC offers students the opportunity to think through and test out their ideas as they write. The RWC also provides students the chance to share their writing with a “practicing community” before they share it with their intended audience. Students can learn about the many RWC locations/hours and or schedule an appointment by visiting http://fsc.mywconline.com.

Also part of the English Department and affiliated with the RWC, the Digital Studio (DS) provides support to all FSU students working individually or in groups on a variety of digital projects, such as designing a Web site, developing an electronic portfolio for a class, creating a blog, selecting images for a visual essay, adding voiceover to a presentation, or writing a script for a podcast. The DS has both Macs and PCs and software such as Photoshop, InDesign, Windows Movie Maker, iMovie, and more. Like the RWC, the DS is an idea laboratory: a place to explore ideas in digital texts and to learn new technologies to communicate ideas in those media. Students can learn about the DS locations/hours and or schedule an appointment by visiting http://fsu.mywconline.com. For more information on English Department writing resources, please visit http://www.english.fsu.edu.

Career Advising and Counseling (CAC)

The Career Advising and Counseling (CAC) unit of the Career Center is a theory-based advising unit, located within the Career Center. Students can take advantage of drop-in career advising services, which include meeting one-on-one with a trained Career Advisor about issues such as choosing a major or occupation, the job and internship searching process, going to graduate school, and many other career-related topics. The Career Advisor guides them and offers access to CAC’s many career-related resources including books, files, guides, databases, and Web sites. The Career Center conducts frequent workshops for classes, student groups, and special events, offering a wide variety of topics such as Resume Writing and Interviewing. Special equipment and materials are available for distance students and students with disabilities. Dunlap Student Success Center, (850) 644-6431; http://www.career.fsu.edu.

Living-Learning Communities

First year students at Florida State University have an opportunity to participate in one of seven living-learning communites. Each community is directed by an FSU faculty member. Participants live together in University housing and enjoy academic experiences that focus on a theme or major. Information and applications are available through University Housing, http://housing.fsu.edu. The seven communities are: Bryan Hall Learning Community; Music Living-Learning Community; Nursing Living Community; Pre-Health Professional Learning Community; Social Justice Living-Learning Community; Public Affairs Learning Community; and Women in Math, Science, and Engineering (WMSE).

Freshman Interest Groups (FIGs)

All first-time-in-college students have the opportunity to enroll in a Freshman Interest Group (FIG) during their initial Fall term of enrollment. This program is an initiative of the Liberal Studies Coordinating Committee and was established to enhance the academic engagement of our incoming undergraduates. Each FIG is a pre-packaged cluster of high-demand freshman courses that have been structured to assist students with the initial selection of Liberal Studies courses by grouping courses with a common thread of interest. One of the most significant advantages of the program is the FIG Colloquium, HUM 1920. This course is designed to provide a set of experiences that will introduce students to the academic culture at Florida State University.

Office of National Fellowships

The Office of National Fellowships (ONF) assists students in pursuing opportunities for academic and personal enrichment by providing information and support for over sixty nationally competitive fellowships. Using a unique mentoring model, ONF staff challenges students to articulate and communicate their academic and career goals as they work through the fellowship application process. Students are provided a venue for identification and achievement of their academic, public service, creative, and leadership goals. Honors, Scholars and Fellows House, Suite 3002; (850) 644-7396; http://onf.fsu.edu/.
Center for Undergraduate Research and Academic Engagement (CRE)

The Center for Undergraduate Research and Academic Engagement (CRE) is committed to helping students become accomplished scholars and active citizens—people of character who can drive innovation and enrich our society. To that end, CRE works with faculty, staff, and students from across campus to support the engagement of FSU undergraduates in high-impact curricular and co-curricular experiences such as research and creative projects, social innovation, and international service learning. We help students take advantage of the resources of a major research university, deepen and expand their understanding of the world, and apply this understanding to improve the lives of others. Some of the programs offered by CRE are:

**Undergraduate Research Opportunity Program (UROP):** For first- and second-year students interested in a first research experience. UROP students gain research experience as a faculty research assistant for two semesters while participating in a research training colloquium and present at the Spring Undergraduate Research Symposium.

**Global Scholars:** The FSU Global Scholars program helps students secure Summer internships at nonprofit organizations in developing countries around the world. Global Scholars’ placements are low-cost and high-impact, providing a challenging academic and personal student development experience. FSU students in the program receive training before departure and must complete a capstone research project on an issue facing the overseas community after completing their internship.

**Summer Research Awards:** For students seeking funding for their research. Some of the awards include the $4,000 Undergraduate Research and Creative Activity Awards (URCAA), the $1,000 Mentored Research and Creative Endeavors Award (MRCE), the $3,000-$5,000 Public Service Research Fellowship (PSRF), and the $5,000 ACC Collaborative Summer Research Award.

**Publication and Presentation:** CRE helps students find venues for sharing their research with the community through presentations like the Showcase of Undergraduate Research Excellence, the Fall Research Day, and the Spring Undergraduate Research Symposium, or publishing in the FSU Undergraduate Research journal, The Owl.

All of these options are available to Florida State University students. Honors, Scholars and Fellows House, Suite 3002; (850) 645-8118; http://cre.fsu.edu.

Office of Undergraduate Studies

**Assistant Dean:** Nikki Raimondi

The **Office of Undergraduate Studies** provides information and services on all academic matters, including exemptions with credit, information on liberal studies courses, academic standing, dismissal, readmission, remediation, correspondence study, and enrollment in courses at other colleges and universities. The Office of Undergraduate Studies is located at A3400 University Center.

In addition to serving as the academic dean’s office for most freshmen and sophomores, the Office of Undergraduate Studies performs two important academic functions:

1. The office evaluates all transfer credit to determine how it applies to Florida State University’s liberal studies requirements and prepares liberal studies evaluations for each undergraduate transfer student who enters without an Associate in Arts (AA) degree from a Florida public post-secondary institution. See the “Undergraduate Degree Requirements” chapter of this General Bulletin for details. Decisions about transfer credit applying toward a major requirement are made in the office of the dean responsible for that major; and

2. The office monitors student progress in liberal studies through the Academic Report. The Academic Report will be reviewed with the student at the time of formal declaration of a major to transfer to an upper-division program.

Florida State University grants an AA certificate to qualified students upon request. The Office of Undergraduate Studies determines the eligibility of students for the certificate. See the “Undergraduate Degree Requirements” chapter of this General Bulletin for more information.

The cooperative enrollment program between Florida State University and area high schools is administered by the Office of Undergraduate Studies. See the “Academic Regulations and Procedures” chapter of this General Bulletin for descriptions of these cooperative programs.

Transfer from Undergraduate Studies to Major Advisement Program

Transfer from undergraduate studies to a major’s advisement program in any college or school of the University is accomplished between the Office of Undergraduate Studies and the appropriate baccalaureate dean after the student: (1) has declared a choice; (2) has been certified as eligible for transfer; and (3) has been accepted by the appropriate baccalaureate dean.

**Eligibility for Transfer to Major Advisement**

Students will be considered eligible to transfer from the advisement program of the Office of Undergraduate Studies after satisfying the following requirements:

1. Completion of at least fifty-two semester hours of credit;
2. Successful completion of at least one-half of the required semester hours in the Liberal Studies for the 21st Century Program, including all required liberal studies courses in freshman composition and freshman mathematics (see the “Undergraduate Degree Requirements” chapter of this General Bulletin);
3. Achievement of a minimum adjusted grade point average (GPA) of 2.0 or above on work attempted at Florida State University; and
4. Acceptance by a baccalaureate dean for admission to a major’s advisement program.

A student who has attempted seventy-five or more semester hours without fulfilling all of the above-listed requirements will not be allowed to register. Such students should consult the Office of Undergraduate Studies and the dean of the college or school in which the degree is to be sought before making final decisions on how to meet these requirements.
A Summons to Responsible Freedom

Values and Moral Standards at Florida State University

The moral norm, which guides conduct and informs policy at Florida State University, is responsible freedom. Freedom is an important experience that the University, one of the freest of institutions, provides for all of its citizens: faculty, students, administrators, and staff. Freedom is responsibly exercised when it is directed by ethical standards.

As the Florida public university most deeply rooted in the liberal arts tradition, Florida State University not only focuses on intellectual development, but also on the growth and development of students as human beings. The University believes in the importance of personal and social values. Responsible student behavior requires observance of the Student Conduct Code, which is designed to promote the achievement of these personal and social values. Responsible students recognize that freedom means the acknowledgment of responsibility to the following: to justice and public order; to fellow students, administrators, and staff; to the laws of the state and nation, as well as University rules and regulations; to the university experience and the educational experience as an opportunity to develop habits of responsibility and to the opportunity for specialized training and continuing education toward personal and professional goals.

The University is a place of both assent and dissent and is committed to academic freedom and civil dialogue. In a free and vigorous academic community an ongoing clash of ideas is to be expected and encouraged. The University has a special obligation to see that all have an opportunity to be heard. The University believes in equal opportunity practices that conform to both the law and the letter of all laws against discrimination.

The University enforces all laws relevant to alcohol and controlled substances and further strongly discourages the use of illegal substances at any time. The University disseminates and encourages the dissemination by others of information concerning the responsible use of alcohol.

Academic Honor Policy

Introduction

The statement on ‘Values and Moral Standards at FSU’ says: “The moral norm which guides conduct and informs policy at Florida State University is responsible freedom. Freedom is an important experience which the University, one of the freest of institutions, provides for all of its citizens — faculty, students, administrators, and staff. Freedom is responsibly exercised when it is directed by ethical standards.” (See above ‘Values and Moral Standards at FSU’ section of this chapter.)

The statement also addresses academic integrity: “The University aspires to excellence in its core activities of teaching, research, creative expression, and public service and is committed to the integrity of the academic process. The Academic Honor Code is a specific manifestation of this commitment. Truthfulness in one’s claims and representations and honesty in one’s activities are essential in life and vocation, and the realization of truthfulness and honesty is an intrinsic part of the educational process. The University is a place of both assent and dissent and is committed to academic freedom and civil dialogue. In a free and vigorous academic community an ongoing clash of ideas is to be expected and encouraged. The University has a special obligation to see that all have an opportunity to be heard.”

Florida State University is committed to nondiscrimination in matters of race, creed, color, sex, religion, national origin, age, disability, veterans’ or marital status, sexual orientation, gender identity, gender expression, or any other protected group status. This commitment applies in all areas with students, faculty, and other University personnel. It addresses recruiting, hiring, training, promotions, and applicable employment conditions. It is also relevant to those aspects of the University concerned with the choice of contractors, suppliers of goods and services, and with the use of University facilities. The University believes in equal opportunity practices that conform to both the spirit and the letter of all laws against discrimination.

A responsible student recognizes that freedom means the acknowledgement of responsibility to the following: to justice and public order; to fellow students’ rights and interests; to the University, its rules, regulations, and accepted traditions; to parents, teachers, and all others whose support makes one’s advanced education possible; to city, state, and national laws; to oneself; and to the opportunity for specialized training and continuing education toward the ends of personal fulfillment and social service. Students are urged to use their freedom in the University community to develop habits of responsibility that lead to the achievement of these personal and social values. Responsible student behavior requires observance of the Student Conduct Code, which is based on respect for the dignity and worth of each person and the requirements for successful community life.

Relations among all persons should be characterized by mutual respect and equality. Sexism, sexual harassment, and sexual coercion of any sort are wrong and constitute a violation of fundamental moral requirements and state law. Minimally responsible behavior requires that no one take sexual advantage of another.

The University enforces all laws relevant to alcohol and controlled substances and further strongly discourages the use of illegal substances at any time. The University disseminates and encourages the dissemination by others of information concerning the responsible use of alcohol.

The cultural, ethnic, and racial diversity of the University community provides an opportunity for learning about those different from oneself. The University expects each individual to make a special effort to ensure that all are treated with dignity and respect and accorded the full opportunities of the University. Racism, whether in assumptions, attitudes, acts, or policies, is incompatible with the concept of responsible freedom as espoused by Florida State University.

The University is a compassionate community. In its treatment of students, it recognizes the wisdom both of letting students experience the consequences of their actions and of providing the opportunity to learn and grow in ways that can overcome past difficulties. The University provides ongoing student support through the health center, counseling services, and the academic advising process.

The university experience is a time for adventure, fun, excitement, the making of new friends, and the discovery of new possibilities. There are numerous individual and organized opportunities for students to develop and to learn in the course of their university years to exercise newly acquired freedom deliberately and responsibly.

Matriculation to Florida State University, then, is a summons to the exercise of responsible freedom in a community of teaching, learning, and discovery.

Integrity in Research and Creative Activity

It is the policy of Florida State University to uphold the highest standards of integrity in research and creative activity, and to protect the right of its employees to engage in research and creative activity. Detailed policies and procedures can be found in the Faculty Handbook under “Section 6: Policies and Procedures.”

Academic Honor Policy

Introduction

The statement on ‘Values and Moral Standards at FSU’ says: “The moral norm which guides conduct and informs policy at Florida State University is responsible freedom. Freedom is an important experience which the University, one of the freest of institutions, provides for all of its citizens — faculty, students, administrators, and staff. Freedom is responsibly exercised when it is directed by ethical standards.” (See above ‘Values and Moral Standards at FSU’ section of this chapter.)

The statement also addresses academic integrity: “The University aspires to excellence in its core activities of teaching, research, creative expression, and public service and is committed to the integrity of the academic process. The [Academic Honor Policy] is a specific manifestation of this commitment. Truthfulness in one’s claims and representations and honesty in one’s activities are essential in life and vocation, and the realization of truthfulness and honesty is an intrinsic part of the educational process.” (See above ‘Values and Moral Standards at FSU’ section of this chapter.)

Guided by these principles, this Academic Honor Policy outlines the University’s expectations for students’ academic work, the procedures for resolving alleged violations of those expectations, and the rights and responsibilities of students and faculty throughout the process. The Academic Honor Policy Committee may take direct jurisdiction of a case under extraordinary circumstances when it is determined by a majority vote of the committee that taking direct jurisdiction is appropriate.

Students in the College of Law and the College of Medicine are governed by the academic integrity policies and procedures of their respective colleges, which are subject to approval by the Academic Honor Policy Committee.

FSU Academic Honor Pledge

I affirm my commitment to the concept of responsible freedom. I will be honest and truthful and will strive for personal and institutional integrity at Florida State University. I will abide by the Academic Honor Policy at all times.
Academic Honor Violations

Note: Instructors are responsible for reinforcing the importance of the Academic Honor Policy in their courses and for clarifying their expectations regarding collaboration and multiple submission of academic work. Examples have been provided for the purpose of illustration and are not intended to be all-inclusive.

1. **Plagiarism.** Presenting the work of another as one’s own (i.e., without proper acknowledgement of the source). Typical examples include: Using another’s work from print, web, or other sources without acknowledging the source; quoting from a source without citation; using facts, figures, graphs, charts or information without acknowledgement of the source; or utilizing ghostwriting or pay-for-paper services.

2. **Cheating.** Improper access to or use of any information or material that is not specifically conditioned by the instructor for use in the academic exercise. Typical examples include: Copying from another student’s paper or receiving unauthorized assistance during a quiz, test, or examination; using books, notes, or other devices (e.g., calculators, cell phones, or computers) when these are not authorized; procuring without authorization a copy of or information about an examination before the scheduled exercise; or unauthorized collaboration on exams.

3. **Unauthorized Group Work.** Unauthorized collaborating with others. Typical examples include: Working with another person or persons on any activity that is intended to be individual work, where such collaboration has not been specifically authorized by the instructor.

4. **Fabrication, Falsification, and Misrepresentation.** Unauthorized altering or inventing of any information or citation that is used in assessing academic work. Typical examples include: Inventing or counterfeiting data or information; falsely citing the source of information; altering the record of or reporting false information about practicum or clinical experiences; altering grade reports or other academic records; submitting a false excuse for absence or tardiness in a scheduled academic exercise; or lying to an instructor to increase a grade.

5. **Multiple Submissions.** Submitting the same academic work (including oral presentations) for credit more than once without instructor permission. It is each instructor’s responsibility to make expectations regarding incorporation of existing academic work into new assignments clear to the student in writing by the time assignments are given. Typical examples include: Submitting the same paper for credit in two courses without instructor permission; or making minor revisions in a credited paper or report (including oral presentations) and submitting it again as if it were new work.

6. **Abuse of Academic Materials.** Intentionally damaging, destroying, stealing, or making inaccessible library or other academic resource material. Typical examples include: Stealing or destroying library or reference materials needed for common academic purposes; hiding resource materials so others may not use them; destroying computer programs or files needed in academic work; stealing, altering, or intentionally damaging another student’s notes or laboratory experiments. This refers only to abuse as related to an academic issue.

7. **Complicity in Academic Dishonesty.** Intentionally helping another to commit an act of academic dishonesty. Typical examples include: Knowingly allowing another to copy from one’s paper during an examination or test; distributing test questions or substantive information about the material to be tested before a scheduled exercise; or deliberately furnishing false information.

8. **Attempting to commit any offense as outlined above.**

**Student Rights**

Students have the following important due process rights, which may have an impact on the appellate process:

1. to be informed of all alleged violation(s), receive the complaint in writing (except in a Step 1 agreement, described in the Procedures Section, where the signed agreement serves as notice), and be given access to all relevant materials pertaining to the case.

2. to receive an impartial hearing in a timely manner where they will be given a full opportunity to present information pertaining to the case. Students are also accorded the following prerogatives:

   1. when possible, to discuss the allegations with the instructor.
   2. privacy, confidentiality, and personal security.
   3. to be assisted by an advisor who may accompany the student throughout the process but may not speak on the student’s behalf.
   4. to choose not to answer any question that might be incriminating.

5. to contest the sanctions of a first-level agreement and to appeal both the decision and sanctions of an Academic Honor Hearing.

   The student has the right to continue in the course in question during the entire process. Once a student has received notice that he/she is being charged with an alleged violation of the Academic Honor Policy, or when as student has been found responsible for an Academic Honor Policy violation, the student is not permitted to withdraw or drop the course. Should no final determination be made before the end of the term, the grade of “Incomplete” will be assigned until a decision is made.

   Students should contact the Dean of Students Department for further information regarding their rights.

**Procedures for Resolving Cases**

**Step 1.**

Throughout the Step 1 process, the instructor has the responsibility to address academic honor allegations in a timely manner, and the student has the responsibility to respond to those allegations in a timely manner. For assistance with the Academic Honor Policy, students should contact the Dean of Students Department and instructors should contact the Office of the Vice President for Faculty Development and Advancement.

If a student observes a violation of the Academic Honor Policy, he or she should report the incident to the instructor of the course. When an instructor believes that a student has violated the Academic Honor Policy in one of the instructor’s classes, the instructor must first contact the Office of Vice President for Faculty Development and Advancement to discover whether the student has a prior record of academic dishonesty in order to determine whether to proceed with a Step 1 agreement. The instructor must also inform the department chair or dean. (Teaching assistants must seek guidance from their supervising faculty member and adjunct instructors must seek guidance from their department chair.) However, faculty members or others who do not have administrative authority for enforcing the Academic Honor Policy should not be informed of the allegation, unless they have established a legitimate need to know. If pursuing a Step 1 agreement (refer to http://fda.fsu.edu/Academics/Academic-Honor-Policy) is determined to be possible, the instructor shall discuss the evidence of academic dishonesty with the student and explore the possibility of a Step 1 agreement (refer to http://fda.fsu.edu/Academics/Academic-Honor-Policy). Four possible outcomes of this discussion may occur:

1. If the charge appears unsubstantiated, the instructor will drop the charge, and no record of academic dishonesty will be created. The instructor should make this decision using the “preponderance of the evidence” standard.

2. The student may accept responsibility for the violation and accept the academic sanction proposed by the instructor. In this case, any agreement involving an academic penalty must be put in writing and signed by both parties on the “Academic Honor Policy Step 1 Agreement” form (refer to http://fda.fsu.edu/Academics/Academic-Honor-Policy) which must then be sent to the Dean of Students Department. This agreement becomes a confidential student record of academic dishonesty and will be removed from the student’s file five years from the date of the final decision in the case. Any grade imposed as the result of an academic sanction will remain on the student’s transcript indefinitely and will not be subject to course drop or withdrawal.

3. The student may accept the responsibility for the violation, but contest the proposed academic sanction. In this circumstance, the student must submit the “Academic Honor Policy Referral to Contest Sanction” form (refer to http://fda.fsu.edu/Academics/Academic-Honor-Policy) along with supporting documentation to the Office of the Vice President for Faculty Development and Advancement. The student’s written statement must demonstrate specific reasons why the proposed sanction is extraordinarily disproportionate to the offense committed for any change to occur in the sanction. The Vice President for Faculty Development and Advancement (or designee) will review the submitted documentation to determine whether the proposed sanction should be imposed. The Vice President (or designee) may affirm or modify the sanction as appropriate. The decision that results from this review is final.

4. The student may deny responsibility. In this circumstance, the instructor submits the “Academic Honor Policy Hearing Referral” form (refer to http://fda.fsu.edu/Academics/Academic-Honor-Policy) along with supporting documentation to the Office of the Vice President for Faculty Development and Advancement for an Academic Honor Policy Hearing. The student is issued a letter detailing the charges within ten class days of the receipt of the referral, and the schedule for the hearing will be set.
as soon as possible and within ninety days from the date of the letter. These timelines may be modified in unusual circumstances. Unless all parties agree, the hearing will not be held any sooner than seven class days from the student’s receipt of the charge letter. The process then proceeds to Step 2.

If the student is found to have a prior record of academic dishonesty or the serious nature of the allegations merits a formal hearing, the instructor must refer the matter to Step 2 for an Academic Honor Policy Hearing by submitting the “Academic Honor Policy Hearing Referral” form (refer to http://fsu.edu/Academics/Academic-Honor-Policy) and appropriate documentation to the Vice President for Faculty Development and Advancement.

Allegations of academic dishonesty involving a graduate student engaged in any phase of the preliminary or comprehensive examination, thesis, or dissertation will be treated as egregious and will be resolved through the Step 2 process, in which the major professor will serve as the “instructor” under the hearing procedures. The Vice President for Faculty Development and Advancement and the student’s academic dean, (as well as the Vice President for Research in cases involving grant-funded research), should be informed as soon as possible of all such allegations. The decision regarding whether to submit a hearing referral will be made by a committee consisting of the department chair and two faculty members appointed by the academic dean, one of whom should be the student’s committee member serving as the University representative (if one has been identified), excluding the major professor. In rendering its decision, this committee should review all available information and consult with the major professor and the academic dean.

A panel consisting of five members shall hear the case. The panel shall include: one faculty member appointed by the dean from the unit in which the academic work is conducted; one faculty member appointed by the Vice President for Faculty Development and Advancement who is not from that unit; and two students appointed through procedures established by the Dean of Students Department. The panel shall be chaired by the Vice President for Faculty Development and Advancement (or designee), who votes only in case of a tie.

The hearing will be conducted in a non-adversarial manner with a clear focus on finding the facts within the academic context of the academic work. The student is presumed innocent going into the proceeding. After hearing all available and relevant information from the student and the instructor, the panel determines whether or not to find the student responsible for the alleged violation using the “preponderance of the evidence” standard. If the student is found responsible for the violation, the panel is informed about any prior record of academic honor policy violations and determines an academic sanction (and disciplinary sanction, if appropriate). In some cases, a Step 1 sanction may have been appropriately proposed prior to the convening of an Academic Honor Hearing. If the student is found responsible in these cases, the panel typically will impose a sanction no more severe than that which was proposed by the faculty member. In rendering its decision, this committee should review all available information and consult with the major professor and the academic dean.

Sanctions

Step 1.

This Step 1 procedure is implemented with first-offense allegations that do not involve egregious violations. The decision regarding whether an allegation is egregious is made by the Vice President for Faculty Development and Advancement (or designee) and the instructor. The instructor should consider the seriousness of the violation, the student’s circumstances, potential opportunities for learning and consistency with past sanction in determining a proposed sanction. The following sanctions are available in the Step 1 procedure.

1. Additional academic work, including re-doing the assignment
2. A reduced grade (including “0” or “F”) for the assignment
3. A reduced grade (including “F”) for the course

Step 2.

An Academic Honor Policy Hearing is held for all second offenses, for all first offenses that involve egregious violations of the Academic Honor Policy, for all offenses that involve simultaneous violations of the Student Conduct Code, and in all cases where the student denies responsibility for the alleged violation. The decision regarding whether an allegation is egregious is made by the Vice President for Faculty Development and Advancement (or designee) and the instructor. In some cases, a Step 1 sanction may have been appropriately proposed prior to the convening of an Academic Honor Policy Hearing. If the student is found responsible in these cases, the panel typically will impose a sanction no more severe than that which was proposed by the faculty member. The panel is required to provide a clear written justification for imposing a sanction more severe than the sanction proposed in Step 1.

Students will not be penalized solely for exercising their right to request a Step 2 hearing. The following sanctions are available in Step 2 (see the Procedures section) and may be imposed singly or in combination:

1. Additional academic work, including re-doing the assignment
2. A reduced grade (including “0” or “F”) for the assignment
3. A reduced grade (including “F”) for the course
4. Educational Activities – attendance at educational programs, development of an academic plan with the assistance of the Academic Center for Excellence, participation in an Ethics Workshop, tutoring regarding proper citation practices, meetings with appropriate faculty or administrators, writing essays, or other educational activities. Fees may be charged to cover the cost of educational activities.
5. Restitution, letter of apology, or other restorative act
6. Disciplinary Probation – a period of time during which any further violation of the Academic Honor Policy puts the student’s status with the University in jeopardy. If the student is found responsible for another violation during the period of Disciplinary Probation, serious consideration will be given to imposing a sanction of Suspension, Dismissal, or Expulsion. Restrictions that may be placed on the student’s activities during this time period include, but are not limited to: participating in student activities; representing the University on athletic teams or in other leadership positions; and participating in practice for athletic or other competitions.
7. Suspension – Separation from the University for a specified period, not to exceed two years.
8. Dismissal – Separation from the University for an indefinite period of time. Dismissal is considered a final sanction, but readmission is possible in some cases under documented exceptional circumstances. No consideration will be given to readmitting a dismissed student within the first three years after a dismissal is imposed. Dismissal is noted on the student’s transcript.
9. Expulsion – Separation from the University without the possibility of readmission. Expulsion is noted on the student’s transcript.
10. Withholding of diplomas, transcripts, or other records for a specified period of time.
11. Suspension of degree, in cases where an offense is discovered after the degree is posted.
12. Revocation of degree, in cases where an offense is discovered after the degree is posted.

Appeals

Decisions of the Academic Honor Policy Hearing Panel may be appealed to the Academic Honor Policy Appeal Committee, a standing four-member committee composed of two faculty appointed by the President and two students appointed by the Vice President for Student Affairs. The chair will be appointed annually by the President, and members will serve two-year renewable terms. In case of a tie vote regarding a case, the committee will submit a written report to the Provost, who will then make the final determination.

On appeal, the burden of proof shifts to the student to prove that an error has occurred. The only recognized grounds for appeal are:

1. Due process errors involving violations of a student’s rights that substantially affected the outcome of the initial hearing.
2. Demonstrated prejudice against the charged student by any panel member. Such prejudice must be evidenced by a conflict of interest, bias, pressure, or influence that precluded a fair and impartial hearing.
3. New information that was not available at the time of the original hearing.
Academic Honor Policy Committee

An Academic Honor Policy Committee shall be appointed by the University President. The Committee will include: three faculty members, selected from a list of six names provided by the Faculty Senate Steering Committee and three students, selected from a list of six names provided by the Student Senate. The Vice President for Faculty Development and Advancement or designee and the Dean of Students or designee shall serve ex officio. Faculty members will serve three-year staggered terms, and students will serve one-year terms. The committee will meet at least once a semester. It will monitor the operation and effectiveness of the Academic Honor Policy, work with the Faculty Senate and the Student Senate to educate all members of the community regarding academic integrity, and make recommendations for changes to the policy.

Amendment Procedures

Amendments to the Academic Honor Policy may be initiated by the Academic Honor Policy Committee, the Faculty Senate, the Student Senate, and/or the Vice President for Academic Affairs. Amendments to the policy must be approved by both the Faculty Senate and the Student Senate.

Grievance Procedure

Students who allege that academic regulations and procedures have been improperly applied in specific instances may have their grievances addressed through the general academic appeals process. In this process, the student brings a complaint first to the instructor, then to the department chair, and finally to the academic dean appropriate to the course involved, stopping at the level at which the complaint is resolved. If no resolution is reached, the student brings the complaint to the attention of the Vice President for Faculty Development and Advancement for either resolution or referral to the Student Academic Relations Committee of the Faculty Senate. A graduate student whose complaint is unresolved must see the Dean of the Graduate School prior to meeting with the Vice President for Faculty Development and Advancement. The Student Academic Relations Committee has the authority to direct, through the Vice President for Academic Affairs, that corrective action be taken when justified.

Grievance Procedure: Panama City Campus

Students who allege that academic regulations and procedures have been improperly applied in specific instances may have their grievances addressed through the general academic appeals process. In this process, the student brings a complaint first to the instructor, then to the department chair, and finally to the academic dean appropriate to the course involved, stopping at the level at which the complaint is resolved. If no resolution is reached, the student brings the complaint to the attention of the Dean of the Graduate School prior to meeting with the Vice President for Faculty Development and Advancement. The Student Academic Relations Committee has the authority to direct, through the Vice President for Academic Affairs, that corrective action be taken when justified.

Student Academic Relations Committee (SARC) of the Faculty Senate

The Faculty Senate Committee on Student Academic Relations hears appeals from students concerning decisions about their academic work which they have evidence to show have been arrived at improperly or unprofessionally in departments, schools, or colleges. The committee elects its chair annually from among the faculty representatives and reports its findings and recommendations to the Vice President for Academic Affairs. Students wishing to make appeals to the committee on student academic relations should consult the Office of Faculty Development and Advancement. Appeals to this committee are made after all other available remedies have been exhausted.

University Student Ombudsperson

The Office of the University Ombudsperson provides students of the University community an avenue for confidential exploration of decisions regarding academic issues. Once all other appropriate mechanisms have been exhausted, students may present their case to the University Ombudsperson. The ombudsperson is a neutral facilitator and will assist students with any academic problem or grievance that may arise during their interaction with the University. While he/she may be an instrument for change, the ombudsperson does not resolve issues by any direct use of authority or power, but rather requests a reexamination of the problem.

Grade Appeals System

The purpose of the grade appeals system is to afford an opportunity for an undergraduate or graduate student to appeal a final course grade under certain circumstances. Faculty judgment of students’ academic performance is inherent in the grading process and hence should not be overturned except when the student can show that the grade awarded represents a gross violation of the instructor’s own specified evaluation (grading) statement and therefore was awarded in an arbitrary, capricious, or discriminatory manner. The evaluation (grading) statement utilized during the grade appeals process is the one contained in the instructor’s syllabus at the beginning of the semester. This system does not apply to preliminary or comprehensive exams or to thesis or dissertation defenses; these issues are reviewed by the Student Academic Relations Committee via the Vice President for Faculty Development and Advancement.

Step 1. Within thirty calendar days following the date that final grades are made available to students, the student must contact the instructor in question to discuss the grade and attempt to resolve any differences. The student should document any attempts to contact the instructor in order to establish that the appeal was begun within this thirty-day period. In the event that the instructor is not available, the student should provide that documentation to the instruc-
tor’s program or department chair. It is expected that the student will first attempt to resolve the grade dispute with the instructor; however, either the student or the instructor may consult with the appropriate program or department chair during this process.

**Step 2.** If no resolution is reached within this thirty-day period, after the student’s documented attempt, the student has an additional fifteen calendar days to submit a written statement to the program or department chair. This statement must include an account of attempts to resolve the issue, as well as the evidence that forms the basis for the appeal.

Within twenty calendar days thereafter, the department or program chair will arrange for a meeting of a grade appeals screening committee composed of three students enrolled in the academic unit offering the course to review the appeal. Appropriate students who have no conflict of interest will be chosen to serve on this screening committee by a student organization associated with the program or department, if such an organization exists. If none exists or if members of such an organization are not available, the department or program chair will select appropriate students who have no conflict of interest. Both the student and the instructor may attend the meeting.

The role of the screening committee is solely to determine whether the student has presented sufficient evidence to warrant further review. Within five calendar days after this meeting, the screening committee will render its decision in writing (recommend/do not recommend further review) to the program or department chair, the student, and the instructor. A negative decision will end the appeal. A positive decision will trigger the next step in the process.

**Step 3.** Within twenty calendar days of a positive decision from the grade appeals screening committee, the program or department chair will appoint and arrange for a meeting of a grade appeals board. This board is composed of three faculty members and two students other than those who served on the screening committee.

The purpose of this board is to determine whether or not to uphold the final grade assigned by the instructor. The board will consider only the evidence provided by the student and the instructor in making the determination. Both the student and the instructor may attend the meeting.

The grade will be upheld unless the evidence shows that the grade was awarded in an arbitrary, capricious, or discriminatory manner, as a result of a gross violation of the instructor’s own evaluation (grading) statement. If the original grade is not upheld, the board will recommend that an alternative grade be assigned by the program or department chair.

If the student has evidence that this grade appeals process has deviated substantially from these established procedures, resulting in a biased decision, the student may consult with the Vice President for Faculty Development and Advancement regarding referral to the Student Academic Relations Committee.

**Note:** For additional information regarding general grading practices and approvals, please refer to the “Grading Practices” section in the “Academic Regulations” chapter of this General Bulletin.

### Religious Work-Restricted Holy Days

Per Section 1006.53, Florida Statutes, the Florida State University policy on observance of religious work-restricted holy days provides that students shall, upon notifying their instructor within the first two weeks of the semester, be excused from class to observe a religious work-restricted holy day of their faith. While students will be held responsible for the material covered in their absence, each student shall be permitted a reasonable amount of time to make up the work missed. Instructors and University administrators shall in no way arbitrarily penalize students who are absent from academic or social activities because of religious work-restricted holy day observance. Instructors will find the BBC Interfaith Calendar a useful resource as they respond to student requests for absence. Students who allege that this policy has been improperly applied in specific instances may have their grievances addressed through the general academic appeals process. In this process, the student brings a complaint first to the instructor, then to the department chair, and finally to the academic dean appropriate to the course involved, stopping at the level at which the complaint is resolved. If no resolution is reached, the student brings the complaint to the attention of the Vice President for Faculty Development and Advancement for either resolution or referral to the Student Academic Relations Committee of the Faculty Senate. This committee has the authority to recommend to the Vice President for Academic Affairs that corrective action be taken when justified. Consult the ‘Grievance Procedure’ section of this chapter for a complete description.
Required First Day Attendance Policy

University-wide policy requires all students to attend the first day of class meeting of all classes for which they are registered. Students who do not attend the first class meeting of a course for which they are registered will be dropped from the course by the academic department that offers the course. This policy applies to all levels of courses and to all campuses and study centers. It remains the student’s responsibility to verify course drops and check that fees are adjusted. Please refer to ‘Class Attendance’ below for additional information.

Note: Students who have received some or all of their financial aid prior to the end of drop/add for a term, may be subject to repayment of financial aid if there is a change in their financial aid eligibility. Examples of this may include, but are not limited to, reduction of course load below required levels, cancellation of schedule, failure to meet satisfactory academic progress requirements, and other conditions required to maintain financial aid eligibility.

Class Attendance

Attendance at the first class meeting is mandatory unless properly excused by the class instructor. Students who do not attend the first class meeting of a course for which they are registered will be dropped from the course by the academic department that offers the course. This policy applies to all levels of courses and to all campuses and study centers. It remains the student’s responsibility to verify course drops and check that fees are adjusted.

All students are expected to abide by the class attendance policy set forth by the instructor in each class in accordance with the Faculty Handbook. When possible, students also must provide advance notice of absences, as well as relevant documentation regarding absences, to the instructor as soon as possible following the illness or event that led to the absence. Any arrangement to make up work because of class absence is the responsibility of the student. The instructor, who will explain the evaluation (grading) statement at the beginning of the term, determines the effect of absences upon grades.

Students must attend the section of the course for which they are registered. No instructor has the authority to permit a student to shift from one section of the course to another without following official drop/add procedures. No student may drop a course after the seventh week of classes without the permission of his or her academic dean. Until a student is officially enrolled in a course, they are not permitted to attend class, submit assignments, or take tests. Exceptions include students auditing the course or making up work for a prior incomplete grade in the course. Students who are not officially registered for a course or do not appear on the course roster after the end of the second week of the semester should be referred to the appropriate office for documentation based on their circumstance. That may be the Office of Financial Aid, Student Business Services, the Office of the University Registrar, the Office of Admissions, etc. Students may contact the Office of the University Registrar if they are unsure of which office they need to contact for documentation.

The Director of the University Health and Wellness Center does not issue excuses to students. A card indicating date and time of admission, discharge or check that fees are adjusted.

Military Short-Term Absence Policy

Florida State University Military Short-Term Absence Accommodation Policy

The University recognizes and appreciates the important contributions made in service of our country by Active Duty, Reserve, and National Guard members and their dependents. In order to accommodate those students and their dependents, University faculty and staff will provide these students the following options to accommodate unexpected training/drill, deployment, or change-of-station orders:

1. For any training/drill, deployment, or change-of-station orders: Students will attempt to make arrangements with instructors to maintain and/or make up classwork as needed and to assign grades as appropriate (including Incompletes to be made up later). Registration for those courses in which instructors accommodate the absence will remain intact and tuition and mandatory fees will be assessed in full for those courses. Service members should provide instructors with maximum advance notice of absences, providing copies of training/drill, deployment, and/or change-of-station directives from the Military, Reserve, or National Guard.
2. Instructor’s must accommodate absences of up to two weeks in duration (or equivalent in Summer) in accordance with paragraph one.
3. When unable to make satisfactory arrangements with all instructors:
   Courses will be dropped and the tuition and mandatory fees for those courses will be rescinded.
4. When unable to make arrangements with any instructors for unexpected orders requiring longer than a two-week absence: The student’s entire registration will be withdrawn or cancelled and 100% of the tuition and mandatory fees will be rescinded.

Academic Career, Academic Level and Classification of Students

The University classifies students based on whether or not they are degree-seeking. Degree-seeking students are further classified based on the type and level of degree they are pursuing. This classification is the academic career of the student. The University recognizes six academic careers, four degree-seeking and two non-degree. Although rare, a student may be active in more than one career at a time, subject to the academic policies and requirements of each career and the degree requirements.

Degree-seeking careers:
- Undergraduate: students pursuing baccalaureate degree of any type
- Graduate: students pursuing graduate degrees at all levels except the juris doctorate or doctor of medicine degrees
- Law: students pursuing the juris doctorate (JD) degree
- Medicine: students pursuing the doctor of medicine (MD) degree

Non-degree-seeking careers:
- Non-Degree, without Baccalaureate: students without a baccalaureate degree
- Non-Degree, with Baccalaureate: students who have previously earned at a minimum one baccalaureate degree or higher level degree

Depending on the career of the student, the University may record the advancement of the student toward completion of the degree by tracking the academic level of the student. The academic level of undergraduate students is calculated on the basis of semester hours. Students with a career of Law or Medicine are classified based on their year within the program. Graduate students and various non-degree students do not have specific academic levels or classification.

- Freshman: zero through twenty-nine semester hours;
- Sophomore: thirty semester hours;
- Junior: sixty semester hours;
- Senior: ninety semester hours;
- Post-Baccalaureate: previously earned bachelor’s degree;
- Graduate: admitted to a graduate program;
- Law: first through third year;
- Medicine (MD degrees): first through fourth year;
Student Catalog Year

The matriculation catalog (i.e., the General Bulletin) governs each student’s graduation requirements—this catalog remains in effect for six years for the bachelor’s degree unless the student elects to meet the requirement of any subsequent General Bulletin published during the period of enrollment.

Non-Degree Student Regulations

Academic rules governing regular students (e.g., fees, drop/add, withdrawal, grading policies) also apply to non-degree students with the following exceptions:

1. Non-degree students may enroll for fewer than twelve semester hours (underload) without permission.
2. In place of the placement schedule for regular students, non-degree students without a baccalaureate degree must meet the following requirements: after attempting fifteen semester hours, undergraduate non-degree students must have achieved and must maintain a 2.0 (“C”) average in all courses attempted.
3. In place of the placement schedule for regular students, non-degree students with a baccalaureate degree must meet the following requirements: after attempting twelve semester hours, graduate non-degree students must have achieved and must maintain a 3.0 (“B”) average in all courses attempted.
4. Failure to achieve or maintain the appropriate grade point average (GPA) will result in a loss of registration privilege and dismissal from the University.
5. Non-degree students may register for any course or courses on an S/U basis. Non-degree students selecting courses for enrichment or other reasons where grades are not essential are advised to register on an S/U basis or on an audit basis.

Consult the “Academic Regulations and Procedures” chapter of the Graduate Bulletin for policies relating to non-degree student status at the graduate level.

Registration of Non-Degree Students

All registration by non-degree students is on a space-available basis. Because of excessive demand for some undergraduate and graduate courses, non-degree students may be enrolled in such courses only with the permission of the particular unit.

Reclassification from Non-Degree Student to Regular (Degree-Seeking) Status

Non-degree students wishing to change to regular-student status must apply for admission through the Office of Admissions. Refer to the “Admissions” chapter of this General Bulletin for admission procedures and deadline dates. Work taken as a non-degree student carries no degree credit. Up to fifteen semester hours earned as a non-degree student may be applied toward an undergraduate degree, with approval of the appropriate dean at the time of reclassification or later.

Course Loads

Florida State University regards fourteen to fifteen semester hours as a normal full-time load, and a student will not be considered full-time with fewer than twelve semester hours. Students should take into account the requirement to take nine semester hours of credit in the Summer. A student who maintains a twelve semester hour (low/normal) load will not graduate in four academic years unless a total of twenty-four semester hours are taken during Summer sessions.

A course load of more than eighteen semester hours or less than twelve semester credit hours must be approved by the academic dean, and in no case may a student register for or receive credit for more than twenty-one semester hours. A student on academic probation must enroll for no fewer than twelve and no more than fifteen letter-graded semester hours. Non-degree students are not required to obtain an underload permit.

International undergraduate students must enroll in at least twelve semester hours during each of the Fall and Spring semesters to maintain legal immigration status. An international student advisor may authorize a reduced course load in certain circumstances. Students who wish to enroll in a reduced course load for a given semester must submit a request for authorization to an advisor at the Center for Global Engagement before the end of the drop/add period for that semester. An unauthorized reduction in course load may result in serious immigration consequences. For a complete definition of the full course of study for immigration purposes, to access the reduced course load information and request forms, please refer to http://www.cge.fsu.edu/.

See the Graduate Bulletin for policies regarding course loads for graduate students.

Directed Individual Study Courses

Students may enroll in courses directed by an instructor for individual study of a particular area. Individual academic departments or programs determine directed individual study policies for students taking directed individual study courses in that department or program. The directed individual study course title must be approved in writing by the instructor offering the course and the departmental chair, or representative, and is posted on the student’s record.

Office of the University Registrar

Registrar: Kimberly A. Barber, Senior Associate Registrar: Dianne Skinner; Associate Registrars: Jeremy Johnson, Andrew Konapelsky, Aimee Leturmy
Location: A3900 University Center; phone: (850) 644-1050; e-mail: registrar@admin.fsu.edu; Web: http://registrar.fsu.edu/

The Office of the University Registrar is the official custodian of permanent academic records of all past and currently enrolled students at Florida State University. It is responsible for registering students and for maintaining student and departmental records for the term in progress, posting FSU credit, transfer credit, and grade changes, preparing transcripts, scheduling academic space, maintaining and updating curricula, certifying eligibility to receive credit for Credit by Examination, certifying attendance for loan purposes, implementing and monitoring academic regulations, certifying eligibility to graduate, and providing services and information to students, faculty, and administration. Reports and certifications of attendance and grade point average are made to governmental agencies, such as the Veterans’ Administration, with the student’s permission.

Students should consult this office with questions concerning registration, locations, and meeting times of courses; errors in registration records; dropping and adding courses; cancellation of registration; and grade problems.

All changes in permanent and local addresses, name, social security number, divisions and majors, and residency, should be made online or reported to this office immediately.

Persons with Disabilities. Any student in need of specific services and reasonable accommodations should contact the Student Disability Resource Center, 108 Student Services Building; (850) 644-9566, or visit http://www.disabilitycenter.fsu.edu.

Registrar Cancellation of Schedule

Students allowed to register in error are cancelled by the Office of the University Registrar.

Students who are dropped or deleted from their last or only course by an academic department because of nonattendance the first day of class are cancelled by the Office of the University Registrar. This cancellation is without liability for tuition. A student whose registration is cancelled by the University Registrar must apply for readmission if they have not been enrolled for two consecutive terms. For the purpose of this policy the cancellation term is considered a term of non-enrollment.

Note: Students who have received some or all of their financial aid prior to the end of drop/add for a term, may be subject to repayment of financial aid if there is a change in their financial aid eligibility. Examples of this may include, but are not limited to, reduction of course load below required levels, cancellation of schedule, failure to meet satisfactory academic progress requirements, and other conditions required to maintain financial aid eligibility.

Cancellation of Student Schedules for Non-Payment of Tuition and Fees

In accordance with Florida State University Regulation 6C2R-2.0248, students who do not pay tuition and fees or make arrangements for tuition and fee payment by the published deadline each semester may have their schedules canceled. Students will be notified using their FSU e-mail account concerning outstanding tuition delinquencies and given an opportunity to pay tuition and fees, or make arrangements for tuition and fee payment with the Office of Student Business Services prior to cancellation. Students whose schedules are canceled for non-payment of tuition and fees will have their academic progress discontinued for the term in question and will not be able to attend class or receive grades.
Cancellation of Student Health Insurance

Selection of the student health insurance places a charge on the student account at Student Business Services. Any cancellation of a student’s schedule does not automatically cancel the purchase of student health insurance. The student must contact the Health Compliance Office of University Health Services via e-mail at healthcompliance@fsu.edu to advise of the cancellation of schedule. If the student has attended the first thirty-one calendar days of classes for the term for which coverage was purchased, the student has met the eligibility requirement to retain the coverage through the termination date and the cost of the insurance premium must be paid.

Students leaving the University to enter the military may receive a prorated premium refund. The student must contact the Health Compliance Office of University Health Services via e-mail at healthcompliance@fsu.edu.

Reinstatement of Student Schedules Canceled for Non-Payment of Tuition and Fees

Students whose schedules are canceled for non-payment of tuition and fees may appeal to the University Registrar for reinstatement and continuation of academic progress for the term. A written appeal must be submitted to the University Registrar no later than the end of the seventh week of the Fall and Spring semesters (consult the Registration Guide for Summer term deadlines). Prior to a second appeal, the Office of Student Business Services must verify that payment for the current term has been received or that appropriate arrangements have been made for tuition and fee payment.

Students whose schedules are reinstated are subject to a $100.00 late registration fee and a $100.00 late payment fee. Check or credit card payments that are returned or refused will negate any tuition payment agreement for the reinstatement of a student’s schedule. The University reserves the right to deny reinstatement when a demonstrated pattern of tuition delinquencies over two or more semesters has occurred.

Student Cancellation of Schedule

A student may cancel registration during the first four days of classes for a semester or Summer session by submitting a written request to the Office of the University Registrar, A3900 University Center. Notification may also be sent from the student’s official e-mail account to Office of the University Registrar at registrar@admin.fsu.edu. Beyond the fourth day of classes, a student cannot voluntarily cancel registration but must apply for withdrawal from the University. Students who cancel their registration during the official drop/add period are not fee liable for tuition; if tuition has been paid, such students should request a full refund of fees. Students who cancel their registration and are not enrolled for the following term (non-enrollment for two consecutive terms) must apply for readmission. Students who must drop all classes after the official drop/add period should contact Withdrawal Services, A4300 University Center.

International students who wish to cancel their registration or withdraw from the term must request and receive prior authorization from a Center for Global Engagement advisor.

Note: Students who have received some or all of their financial aid prior to the end of drop/add for a term, may be subject to repayment of financial aid if there is a change in their academic attendance and aid eligibility. Examples of this may include, but are not limited to, reduction of course load below required levels, cancellation of schedule, failure to meet satisfactory academic progress requirements, and other conditions required to maintain financial aid eligibility.

Drop/Add or Changes of Schedule

During the first four days of classes, individual courses may be added, dropped, or sections of a course changed. Students are financially liable for all courses appearing on their schedule after the fourth day of classes. To add courses after the first four days of classes may require the academic dean’s approval. Courses dropped during this period do not appear on the student’s transcript. Courses may be dropped through the seventh week of classes with the exception of mandated college preparatory courses, freshman composition, and courses constituting an academic dishonesty; however, tuition charges will remain. Approval by the student’s academic dean is required to reduce the academic load below twelve semester hours or increase an academic load above eighteen semester hours (to a maximum of twenty-one semester hours). Dean’s approval for an overload or underload must be submitted to the Office of the University Registrar.

A cumulative maximum of two courses may be dropped between the eighth and twelfth week of classes during the semesters in which the student has earned fewer than sixty hours of college credit; tuition charges will remain. A student may only drop one course after earning sixty hours of college credit and until graduation; tuition charges remain. In addition to courses involved in allegations of academic dishonesty, other courses may be designated by the dean as not subject to this “late drop” provision. Courses dropped during this period appear on the student’s transcript with the notation “W.” See the “Academic Calendar” in the Registration Guide for the semester specific deadlines.

Except in cases where a student is petitioning to use one of the three drops allowed under the policy above, any course drop petition after the seventh week of classes (with dates prorated for individual Summer sessions), will be considered only in documented exceptional circumstances that are beyond the student’s control, as determined by the student’s academic dean. Academic deans exercise their administrative and academic judgment in making final determinations about drop eligibility. Course drops are never approved when there are unresolved allegations of academic dishonesty in a course or when a course grade reflects an Academic Honor Policy penalty.

Such courses appear on the student’s transcript with the notation “WD.” Students who register for courses but who do not attend the classes receive a grade of “F” if the courses are not officially dropped. Students changing from a previous bulletin year should consult their academic dean regarding limitations concerning the policy described above.

Students Called to Active Military Duty

Students called to active duty who wish to receive incompletes for the semester and complete the coursework at a later date should fax or present to their individual instructors a copy of the orders calling them to active duty along with a written request to receive an incomplete (“I”) in the course. Students called to active duty who prefer to have their schedules administratively cancelled should call the Office of Student Affairs at (850) 644-6140 or hand-carry a copy of their orders along with a statement requesting an administrative cancellation to the Office of the University Registrar, A3900 University Center. See also Military Short-Term Absence Policy.

Auditor Seating Privileges

All regularly enrolled students and persons not enrolled in the University are afforded seating privileges after registration on a space-available basis with permission of the instructor, payment of the prescribed fee for each course, and presentation of the appropriate form approved by the Office of the University Registrar. Since no credit is allowed for attendance via “seating privilege,” admission to the University is not required. The course(s) taken will not appear on the student’s permanent record.

Students are cautioned not to preregister for any course they intend to audit. They will have to drop the course(s) from their official schedule and will incur additional financial liability.

Note: Citizens 60 years of age or older who are Florida residents may attend classes under “seating privileges” criteria, and fees are waived except for those courses requiring individual instruction.

Transcripts

The Office of the University Registrar issues official transcripts at the written request of the student. Individuals needing official transcripts should make a written request directly to the transcript section of the Office of the University Registrar or online at http://my.fsu.edu under the “Academics” section of the Student Center.

Transcript service may be denied if a financial or judicial stop has been placed on a student’s record. Clearance from the Controller’s Office or the Office of Student Rights and Responsibilities must be obtained prior to the release of the transcript. Transcript service may also be denied if the request is made by a third party without the student’s written consent.

A charge of $5.00 will be assessed for each official transcript issued.

The University reserves the right to issue transcripts to other state of Florida schools for those students who attend the University under the state transient process. Students are responsible for any transcript fees incurred for providing these transcripts as required by the transient application process.

Unofficial transcripts are available to students free of charge. Visit http://my.fsu.edu, click Course Quicklinks and select View Unofficial Transcript.

Proof of Enrollment

All student enrollment verifications will be by official request only. Students in need of enrollment verification should submit an electronic request by logging in through http://my.fsu.edu. Select Enrollment Verification. Follow the instructions to obtain your enrollment verification letter. Your letter will be processed the following business day. Written requests may be submitted directly to:
Access to Records

Students have the right to access to their student records on file in the Office of the University Registrar. Students requesting access to information in their file, or a third party requesting information in a student’s file with the written consent of the student, have the right to a response from the Office of the University Registrar within thirty days. When the record includes information on more than one student, only the information pertaining to the student making the request will be given.

Required Preparatory Courses

Students entering as freshmen who have a score below 480 on the Critical Reading Subtest administered as part of the Scholastic Aptitude Test (SAT), a score below 19 on the English or Reading sub-sections of the Enhanced American College Testing Program examination (ACT), or have failed to pass an on-campus written test will be required to enroll in supplementary instruction for English Composition and/or Reading during their first term of enrollment.

Stop to Registration

Registration is prevented if all academic and/or administrative requirements have not been fulfilled prior to the term. A stop may be placed on the student record if one or all of the following deficiencies exist: academic dismissal; incomplete admissions documents, fiscal deficiency, or failure to process readmission papers after a withdrawal or after a two-term absence (including the Summer term) from the University. Also, failure to meet specific requirements of a University college, school, or department, the Office of Student Rights and Responsibilities, or the Office of Admissions may induce a registration stop.

Registration Responsibility

Undergraduate Studies students and first-time transfer students must see their academic advisors for assistance with their course selection prior to registration. New students may be required to register for preparatory mathematics and/or English composition courses to complete registration.

Undergraduate Students: Permission to Register for Graduate Courses

A student of senior standing or an upper-division honors student may carry graduate courses for undergraduate credit provided the student: (1) has earned either a grade point average (GPA) of 3.0, “B,” or better; (2) carries a course load of no more than fifteen semester hours; and (3) has the advance approval of the college dean, the department chair, and the instructor offering the course, prior to registration. Students must have eligibility certified in the Office of the University Registrar before seeking approval of those listed in item three.

Those students who register during late registration (normally the first four days of classes) will be assessed a $100.00 late registration fee.

Registration Permits

All permits, such as directed individual study (DIS), satisfactory/unsatisfactory (S/U) grading, and requests to take a graduate course by undergraduate students, ideally should be completed at the time of academic advisement. All permits must be completed by the end of the seventh week of classes of the Fall or Spring semester, or by the prorated term deadlines published in the Summer Academic Calendar. Many permits require the signature of the academic dean as well as the advisor. Students are responsible for ensuring that the Office of the University Registrar has copies of these permits on file prior to the deadlines published in the academic calendar.

Course/Credit Modification

Course credit may be modified downward with the approval of the chair of the department that is offering the course and the appropriate academic dean. No course may be modified upward. Any student wishing to modify credit may obtain the necessary forms in the Office of the University Registrar.

Registration Guide and Course Schedules

Florida State University publishes the Registration Guide. The Guide contains a list of all registration deadlines, fee and payment information, and important announcements. This information is published online at http://registrar.fsu.edu.

Lists of course offerings, meeting times, locations, and instructors (when known) are available online through the Course Search. This system is available twenty-four hours a day, year round. The Course Search is only available on the Web site of the University Registrar through the “Snapshot of Class Search as a PDF (refreshed weekly)” link (http://registrar.fsu.edu).

Prospective students and all others may access a PDF listing of courses available on the Web site of the University Registrar through the “Snapshot of Class Search as a PDF (refreshed weekly)” link (http://registrar.fsu.edu).

Students are advised to organize their materials and plan their schedule before attempting to register online. Course listings for an upcoming semester will be available fourteen days prior to the first enrollment appointment for that semester. Students must contact the appropriate departmental office for any clearances or authorization needed. Individual instructors should be contacted for courses requiring instructor permission. It is important to take care of any academic or administrative hold (stop) before attempting to register.
Florida State University 2015-16 General Bulletin Undergraduate Edition

4. Records and Certification. Each institution will maintain its own permanent record of courses taken. Unofficial grade reports will be exchanged by the institutions at the end of each term. Certifications of enrollment or progress will be made by each institution when requested by the student for Selective Service, Veteran’s Administration, or other purposes.

FSU students must complete their last thirty hours at FSU. The student must provide FSU with an official TCC transcript at the end of the dual enrollment term.

Interinstitutional Transient Students

This program enables students to take advantage of special resources and/or programs not available at their home institution. An interinstitutional transient student, by mutual agreement of the appropriate academic authorities in both the sponsoring and hosting institution, will receive a waiver of admission requirements of the host institution and a guarantee of acceptance of earned resident credits by the sponsoring institution except in the case of international credits. An official course-by-course evaluation is required for all academic records from non-U.S. institutions. We recommend the evaluation be done by a member of the National Association of Credential Evaluation Services (http://naces.org) or the International Education Credential Services provided by the American Association of Collegiate Registrars and Admission Officers (http://ies.aacrao.org).

Interinstitutional transient students must be recommended by their own academic dean, who will initiate a visiting arrangement with the appropriate dean at the host institution. Students will register at the host institution, paying tuition and/or registration fees established by that institution. The approval of one institution does not bind the other to comply.

Students from other institutions who wish to take courses at Florida State University should submit an approved Interinstitutional Transient Student application to the Office of Admissions by the published deadline. (Consult the “University Calendar” chapter of this General Bulletin for specific application deadlines.)

Note: Academic rules governing regular students (e.g., fees, drop/add, withdrawal, grading policies) also apply to transient students.

Undergraduate Course Examinations

Final examinations in undergraduate courses are discretionary within any given department, but all students, including graduating seniors and graduate students, who are enrolled in an undergraduate course having a final examination are required to take the examination. The scheduling of a final examination at any time other than the regularly scheduled final examination period is prohibited by University policy. A final examination may not be given during the examination period at a time other than that which appears online at http://registrar.fsu.edu. Unless an exam is given during the final examination period, no test may be given during the last week of classes.

Courses meeting every day at the same hour and classes meeting for more than one time period will hold examinations according to the time and day of the first scheduled class meeting of the week. For example, a class meeting for the first period on Tuesday and for the second period on Thursday will hold its examination at the exam time scheduled for the Tuesday first period.

Under special circumstances, exceptions to final examination policies for individual students will be given consideration by the academic dean of the college in which the course is taught.

Exceptions to the Examination Policy for an Individual Undergraduate Student. Approval by the academic dean of the school or college in which the course is taught is required for any change in examination time for an individual undergraduate student. The student must first receive written permission from the instructor if the instructor is willing to give a make-up examination at a specified time within the exam week. The student must then petition the dean, giving the reason for the requested exception, and supported by the instructor’s written permission. The dean will then notify the instructor in writing if approval is granted.

Make-up examinations are permitted for an undergraduate student who, justified by illness, conflicting examinations, four or more examinations in a twenty-four-hour period, or for certain emergencies. Arrangements should be made prior to the scheduled exam.

In case of conflicting examinations, group examinations take precedence over examinations scheduled by class meeting time. In the case of conflicts that cannot otherwise be resolved, the course meeting earlier by day and time takes precedence over a course meeting later.

Note: The possibility of a conflict between final exam times exists, particularly for courses that meet in the evening or only once each week. It is the student’s responsibility to identify if a conflict exists and immediately make special ar-
rangements with the instructor to take the exam at an alternate time. Conflicts not recognized one month in advance of the scheduled exam must be resolved by using the established make-up time.

Exceptions to the Examination Policy for an Undergraduate Class. Courses that utilize the University Assessment Center for a block exam, or which are otherwise limited to specific days and times because of seating and scheduling constraints, will take precedence in the case of final exam schedule conflicts. It is the student’s responsibility to identify such conflicts as early as possible and to notify all instructors in advance so that accommodations may be made. No instructor of an undergraduate course may give a final examination during the separate examination period at a time other than that which appears online at http://registrar.fsu.edu, unless the instructor has obtained prior approval from the Undergraduate Policy Committee. Such approval must be requested, in writing, at least three weeks prior to the scheduled final examination. To reschedule a final examination without such approval places the instructor in jeopardy of administrative reprimand by his or her dean and the Vice President for Academic Affairs.

Undergraduate Distance Learning Exams. If the instructor of an online course requires a final exam, the instructor shall have the prerogative to set the window during which a final exam is administered provided that the window is within the University’s official final exam period. A final exam window must be disclosed in the course syllabus. Make-up examinations are permitted for an undergraduate student when justifies by illness, conflicting examinations, four or more examinations in a twenty-four-hour period, or for certain emergencies. It is the student’s responsibility to identify if a conflict exists and immediately make arrangements with the instructor to take the exam at an alternate time during the University’s official final exam period. If a student has such conflicts, the final exams of the student’s non-online classes shall have priority and the time of the online exam will be the first exam subject to adjustment. If such agreement cannot be achieved between the student and the instructor, then the academic deans of the units housing the various courses will consult to achieve agreement.

This explanation is intended only to clarify existing University exam policy for online classes and all provisions of University exam policy that do not conflict with what is stated above remain in effect.

Grade Point Average

Quality points are assigned for each semester hour as listed above. In computation of the required grade point average (GPA) for retention and conferral of a degree, the total number of quality points is divided by the total number of semester hours for which letter grades are received.

All regulations tied to a specific grade average should be interpreted to mean the numerical average associated with that specific grade. Hence, the required “C” average or better” on all liberal studies courses is interpreted as “3.0 average or better.”

Students may repeat courses in which they received a grade of “D” or “F.” Both the original and repeat grades will be used in the computation of GPA but credit for only one attempt will apply toward graduation.

A student will not be allowed additional credit for a course repeated in which the student originally made a “C–” or better unless the course is specifically designated as repeatable to allow additional credit. Should a student enroll again in a non-repeatable course the quality points associated with the subsequent enrollment will be calculated into the FSU cumulative GPA. If a course listing is followed by an “r” it may be repeated, regardless of grade received, to the number of times or hours stated.

Dean’s List

Undergraduate students who are registered for at least twelve semester hours of letter-grade (A–F) courses are eligible for the dean’s list. The required grade point average is 3.5, in all colleges, for any given term.

President’s List

Undergraduate students who are registered for at least twelve semester hours of letter grade (A–F) courses are eligible for the president’s list. The required grade point average is 4.0, in all colleges, for any given term.

Satisfactory/Unsatisfactory Grading

A. Undergraduate Courses Approved on a Letter-Grade Basis

To encourage liberal arts education and focus on learning, the University permits limited enrollment in elective courses outside the major, minor, and liberal studies areas on a satisfactory/unsatisfactory basis. Except for students in their first term at FSU, at least a 2.5 grade point average is required. S/U permit forms must be obtained from and eligibility certified by the Office of the University Registrar no later than the end of the seventh week of classes. No undergraduate courses in the College of Business are offered under this option.

With the exception of courses in the College of Business, a course outside a student’s major, minor, and liberal studies areas normally approved for letter grades may be elected on the S/U basis and, if completed with an “S” grade, will count toward the minimum semester hours credit required for graduation and upper-division distribution but will not be included in the grade point average. The course grade will be recorded officially as satisfactory (“S”) or unsatisfactory (“U”). Registration on an S/U basis is limited to one elective course per term (exclusive of physical education activity courses) and to a maximum total of eighteen semester hours. (See exceptions under section B below.)

In addition to the one elective course, a student may elect to take concurrently a physical education course to be graded on the S/U basis by obtaining proper approvals prior to registration.

Students will be allowed seven weeks to decide whether or not they want to take a course on a satisfactory/unsatisfactory basis. They may change to S/U from a letter grade at any time before the end of the seventh week of the term. Courses initially elected on the S/U basis may be changed back to a letter-grade basis prior to the end of the seventh week of the term or the equivalent prorated Summer deadline.

Approval forms are available in the Office of the University Registrar.

B. Courses Approved on an S/U Basis

Certain other courses that are approved for S/U grades exclusively (practicum, internship, laboratory, student teaching, individual work, research) may be applied toward the major or minor. There is no student letter-grade option for courses approved on the S/U basis; all students must be graded on an S/U basis. The credits earned in these courses are excluded from the total stipulated in section A (above) as permissible. Also, enrollment in a course offered on the S/U basis only does not exclude enrollment in an elective course under the S/U option (in section A above) in the same term.

C. Graduate Students

Policies and procedures for satisfactory/unsatisfactory grades for graduate students are explained in the Graduate Bulletin.

Incomplete Grade Policy

Incomplete (“I”) grades should be recorded only in exceptional cases when a student, who has completed a substantial portion of the course and who is otherwise passing, is unable to complete a well-defined portion of a course for reasons beyond the student’s control. Students in these circumstances must...
petition the instructor and should be prepared to present documentation that substantiates their case. Incomplete grades should not be granted in order to allow students to do extra coursework in an effort to increase their grade.

Even in these circumstances, the authority for determining whether to grant an incomplete rests solely with the instructor. A graduate teaching assistant must have approval from a supervising faculty member to grant an incomplete. One exception to this guideline occurs when an incomplete is applied as a result of allegations of academic dishonesty that have not been resolved by the end of a semester. Deans’ offices can often provide guidance to instructors regarding the appropriateness of an incomplete grade in individual cases.

In order to assign an incomplete, an instructor is required to indicate on the grade roster the time frame for resolution of the grade and the default grade to be assigned if the student does not complete the remaining academic work. Some departments also require that an incomplete grade be documented with an “Incomplete Grade Agreement.” It is the student’s responsibility to complete the remaining academic work within the agreed-upon time frame.

Under University policy, an incomplete grade automatically reverts to the predetermined default grade at the end of the semester that has been specified by the faculty member as the time frame for resolution, unless one of two conditions is met:

1. Upon completion of the agreed-upon work, the instructor submits a grade-change form that replaces the “I” with the final grade for the course.
2. The instructor submits a separate “Incomplete Extension of Time” form to the evaluation and Posting Section of Admissions and Records before the end of the semester in which the “I” is set to expire.

In cases where no default grade or instructor-determined expiration semester exists, incomplete grades will expire to an IE (Incomplete Expired) at the end of the next term of enrollment unless the instructor submits a grade change form prior to the official grade posting deadline. No grade changes will be made to default grades or unresolved “I” grades after the degree has been granted. Thus, it is critical that an instructor work closely with the student and department staff regarding the clearance of an incomplete grade.

Grading Practices
At the end of each term, a report of each student’s grades is made available through Florida State University’s my.fsu.edu site.

Once a final grade in a course has been reported by the instructor to the Office of the University Registrar, it cannot be changed by the instructor except in cases of error in recording with permission of the department chair and the dean of the college, or as a result of a final determinant from a formal grade appeal.

The University will not automatically expire “I” grades earned prior to Fall 2010 or “NG” grades earned for any semester. Students must work with faculty and academic deans to resolve any outstanding “I” or “NG” grades prior to graduation. Outstanding “I” or “NG” grades that are not resolved prior to the degree posting will not be changed except in cases of error in recording. Faculty and academic deans reserve the right to expire an “I” or “NG grade to “IE” or “GE” respectively. These grades are considered final grades and will calculate as an “F” in the student’s overall GPA. In cases where the “I” or “NG” grade was earned in a course approved for S/U grades, the grade will expire to the lowest possible value, generally a zero or “C”. Grades of “I” or “NG” are not assigned to any course if a student withdraws from the University. A grade of “I” or “NG” in a course that is approved for “S/U” or numeric grades will follow the same grading and expiration policy.

Grades earned at another institution cannot be used to improve a grade point average or eliminate a quality point deficiency at Florida State University.

Grade changes to course earned prior to posted degree.

Once a degree has been awarded, all coursework leading to that degree is considered final and not subject to change. Grade changes or withdrawals for coursework that applies to the awarded degree may be considered only in cases of documented University error or in cases where the courses in question are documented as applying to a degree that is still in progress.

Forgiveness Policy
Effective Fall 2004, Florida State University discontinued the forgiveness policy for all students. Please refer to the ‘Drop/Add or Changes of Schedule’ section in this chapter for additional information.

Academic Standing and Retention
All students must demonstrate satisfactory academic progress for retention and continued enrollment at Florida State University. Satisfactory academic progress includes, but is not limited to, successful completion of credit hours and progression toward completing a degree. The University reserves the right not to retain students who do not demonstrate satisfactory academic progress.

Students should refer to the table below indicating the necessary grade point average (GPA) on all coursework taken at Florida State University required for retention at the University. The Retention Table takes into consideration the number of semester hours the student has attempted and indicates the GPA range that will place the student on academic warning or academic probation.

<table>
<thead>
<tr>
<th>Attempted Hours</th>
<th>Warning GPA Range</th>
<th>Probation GPA Range</th>
</tr>
</thead>
<tbody>
<tr>
<td>1—15</td>
<td>1.5—1.999</td>
<td>Less than 1.5</td>

<td>1.75—1.999</td>
<td>Less than 1.750</td>
</tr>
<tr>
<td>31 or more</td>
<td>--</td>
<td>Less than 2.0</td>
</tr>
</tbody>
</table>

Dismissal: Failure to remove probation by the end of next term.

Warning
As an aid to students in the Division of Undergraduate Studies and lower-division music, dance, and Bachelor of Fine Arts (BFA) in theatre students (freshmen and sophomores), an “academic warning” will be included with grade reports at the end of the term if the cumulative average has fallen below 2.0 but not low enough to place the student on academic probation.

Probation
When any student’s grade point average (GPA) falls within the probationary range, the student will be placed on academic probation for one term. A student on probation must enroll for not less than twelve and not more than fifteen semester hours during the probationary term. If the student fails to remove the probationary status by the end of the term, the student will be dismissed.

Students on academic probation who elect to enroll in a Florida public postsecondary institution (or in a regionally accredited institution within or outside the state) and who receive an academic Associate in Arts degree with an overall 2.0 average will have the probationary status and their previous Florida State University average removed upon application for readmission, and will be guaranteed a maximum of sixty semester hours, with approval of the academic dean.

Dismissal and Reinstatement
Academic dismissal constitutes a separation of the student from the University for academic reasons. The dismissed student must consult his or her academic dean at the time of dismissal about criteria governing possible reinstatement to the University. Students are not eligible for reinstatement after two academic dismissals. Students dismissed because of low grade point averages (GPA) may be reinstated only with approval of the academic dean under one of the following options:

1. Achieving the required minimum GPA through online courses taken in the Flexible Learning Program offered by the State of Florida, Division of Colleges and Universities;
2. Attending and graduating with an academic Associate in Arts (AA) degree from a Florida public postsecondary institution (or a regionally accredited institution within or outside the state) with an overall GPA of 2.0 or higher, with approval of the academic dean; or
3. Being immediately reinstated on academic probation by the academic dean (only in extraordinary circumstances). Under this option, if the student fails to achieve the required GPA for retention during the first term of reenrollment, the student will again be dismissed.

Each of these options is detailed below. Close consultation with the academic dean is required in order to determine if any of the following options are appropriate for a given student and his or her situation.

**Option 1:** Students must meet with their academic dean for approval to take courses in the Flexible Learning Program (correspondence coursework) and to determine the minimum GPA that must be earned in the course(s) to be eligible for reinstatement. Grades
earned in courses taken through the Flexible Learning Program will be applied to the student’s FSU GPA. Credit hours earned while on dismissal can be applied to the minimum one hundred twenty semester hours required for graduation, and all rules governing transfer credit will apply.

Option 2: The student’s FSU GPA will be reset to 0.00 upon readmission after earning an AA degree. In addition, the student earning an AA degree from a Florida public institution is guaranteed sixty semester hours when granted the GPA reset. Returning to FSU with an AA degree will not guarantee readmission to a limited access major or a major where prerequisite coursework has not been met.

Option 3: This option is only available to students in documented extraordinary circumstances and when the GPA deficit is minimal.

Consideration of the academic dismissal takes priority over any readmission application and must be resolved first. Students on dismissal are not eligible for readmission or the readmission appeals process unless they have first been reinstated by the academic dean. The academic dean is the final authority for reinstatement consideration. Reinstatement by the academic dean does not constitute automatic readmission. Students who have been out of the University for more than two consecutive semesters must go through the readmission process and meet University requirements and standards.

All students who enter Florida State University for the first time are assured retention for their second term. Students may, however, be placed on academic probation at the end of the first enrolled term.

Students pursuing multiple degrees under different careers (i.e., graduate and undergraduate simultaneously) are subject to the retention standards of the career associated with each degree. Dismissal from one career does not automatically constitute dismissal from the second career when those careers are different (i.e., undergraduate and graduate, or Law and graduate).

Graduate students should refer to the “Dismissal” section in the “Academic Regulations and Procedures” chapter of the Graduate Bulletin.

Continuous Enrollment

Continuous enrollment at Florida State University is defined as enrollment without an interruption of two or more consecutive semesters (including Summer term). Credits earned at other institutions during any semester while not registered at Florida State University will not constitute continuous enrollment at the University. Students who are not enrolled at the University for two or more consecutive semesters (or consecutive semester and Summer term) must apply for readmission before resuming their studies. Any break in continuous enrollment requiring readmission or reinstatement may cause the student to be subject to current legislative Excess Credit policies and fees. For more information on Excess Credit fees, refer to the “Financial Information” chapter of this General Bulletin.

Readmission

Please refer to the “Admissions” chapter in this General Bulletin for readmission policies for returning students who have not been dismissed.

Withdrawal from the University

All students who wish to leave the University during a term must formally withdraw. Dropping all classes does not constitute formal withdrawal. Students who do not attend classes and fail to withdraw will be assigned grades of “F” for each course. Withdrawals are initiated in the withdrawal services section of the Office of the Dean of Students in the University Center.

The statement “Withdrawn from the University” will appear on the transcripts of students who properly withdraw within the first seven weeks of class. Under documented exceptional circumstances (beyond the student’s control), as determined by each academic dean, students withdrawing from the University may receive “WD” grades in all courses taken that term.

Students who cancel their enrollment during the first five days of classes for a term are not held liable for tuition and registration fees. Those who have paid are eligible for a full refund. Students who withdraw after the first five days of classes but prior to the end of the fourth week of classes are eligible for a twenty-five percent refund of tuition and registration fees, less the building and capital improvement fees; this deadline is adjusted for shorter Summer terms. Students who withdraw after this deadline are fully liable for fees and are not eligible for a refund, except as provided in policies set forth by the State Board of Education and Florida State University. Students who receive Title IV funds and who decide to withdraw from the University may be required to repay some or all of the funds received.

A student wishing to reenter the University for the following two semesters after withdrawal must have the approval of their academic dean on the ‘Application for Withdrawal and Reentry’ form. For degree-seeking students wishing to reenter the University after two semesters, an application for readmission must be submitted to the Office of Admissions; non-degree students must complete the original application process. Formal application must be made to the Office of Admissions by the published deadline. Students who left the University on dismissal must resolve that and be reinstated by the academic dean before any decision can be made on the readmission application. (Consult the “University Calendar” chapter of this General Bulletin for specific application deadlines.)

International students who wish to withdraw must request and receive prior authorization from a Center for Global Engagement advisor.

For further information on refunds, see the ‘Refunds of Fees’ section in the “Financial Information” chapter of this General Bulletin.

Students who wish to withdraw must request and receive prior authorization from a Center for Global Engagement advisor.

For further information on refunds, see the ‘Refunds of Fees’ section in the “Financial Information” chapter of this General Bulletin.

Readmission after Multiple Withdrawals

When a student has withdrawn from the University three or more times, subsequent readmission must first be considered by a committee whose charge is to assess the student’s capability of making satisfactory progress toward degree. This committee, appointed by the Council of Associate and Assistant Deans, will then make a recommendation to the dean of the student’s college, who will make the final decision.

Medical Course Drop/Withdrawal

Medical course drops are generally recommended for approval by the dean for unforeseeable illnesses or injuries that have interfered with the student’s ability to complete specific course(s). Similarly, medical withdrawals (all courses dropped) may be approved for acute, severe illnesses, or injuries that incapacitate the student. Chronic conditions generally do not qualify unless the student has been stable for a sustained length of time and then experiences an unexpected change in health status. Students with chronic or recurring health problems should consult with their clinicians and carefully assess a realistic class schedule based on their condition and their likelihood of relapses. At the time this Bulletin went to press, these policies were under review and may be subject to change. For information regarding medical course drops and medical withdrawals, visit http://dos.fsu.edu/withdrawal/withdrawal-process/medical-mental-health-withdrawal or call the Office of Withdrawal Services at (850) 644-1741.

Guidelines for Field Placement Fitness

These guidelines apply to all student field placements, including internships, practicum experiences, and student teaching. The University has the authority to determine both the fitness of its students to be placed in field placements and the suitability of particular field placement sites. The academic judgment of qualified faculty, on issues relevant to the professional requirements of a given field, is critical to this process.

Students may either be denied a field placement or removed from a placement on the basis of the academic judgment of qualified faculty. Students have the right to be informed of the academic and non-academic requirements for obtaining a field placement early in their majors. They also have the right, except in emergency cases, to receive notice of their deficiencies and an opportunity to correct those deficiencies prior to a final decision. Students should consult the information provided by each specific college, department, or academic program of interest for more detailed information.

Florida Virtual Campus (FLVC) Information

All current and prospective students of higher education in the state of Florida may access the FLVC Web site. By logging on to http://www.flvc.org you can perform a variety of tasks, including the following:

- View a map indicating the location of every participating college or university
- Search course catalogs from all public and many private Florida colleges and universities
- Get questions answered about financial aid
- Plan your course of study and compare majors and degree requirements
- Get a copy of your unofficial transcript
- Investigate career options through your institution’s career center
- Find out general information about every participating college or university in the program.

Each FSU student may use their University FSUID and password to log on to the FLVC.org Web site.
Second Majors and Academic Regulations

Students pursuing a second major should be aware that the primary major only determines the selection of the student’s academic dean for the purposes of academic regulations at Florida State University. That is, rules regarding student dismissal, reinstatement, and all general academic qualifications at the University are governed and enforced by the primary major and that major’s corresponding academic dean. Conflicts between primary and secondary major policies shall in all cases be resolved in favor of the primary major. Second major academic policies shall only be concerned with the student’s completion of all requirements, prerequisites, etc., for that second major.

Dual degrees and double majors must be declared by the end of the semester in which a student will earn ninety cumulative credit hours toward their degree program at Florida State University. In special circumstances, students may petition their primary academic dean for an exception. If a dual degree or double major is declared, but not completed, the student will not be eligible for a refund of excess credit charges accrued while working on their dual degree or double major.

Correspondence Study

All correspondence instruction for the Florida State University System is administered through the University of Florida’s Division of Continuing Education, Department of Independent Study by Correspondence.

College credit, high school credit, and continuing professional education courses are available anytime, anywhere through regular mail and fax (some by e-mail). Independent Study offers more than 150 courses to students who would like either a flexible schedule or an opportunity to take extra classes. It is possible to enroll any time during the year.

Regularly enrolled students may not engage in correspondence study while in residence at the University. Students who expect to take correspondence courses during a break in residence should discuss these plans with their faculty advisor and then obtain written approval from their academic deans.

Any teacher in the state of Florida can now use correspondence course credit, as appropriate, to apply toward the recertification of their teaching licenses. Moreover, there is no limit to the number of courses that may fulfill the requirements.

The current catalog details enrollment procedures, fees, and course information. Call or write now for your free copy: University of Florida, Department of Independent Study, Division of Continuing Education, Suite D, 2209 NW 13th Street, Gainesville, FL 32609; (352) 392-1711 Ext. 200; or e-mail: Learn@nervm.medic.ufl.edu. Additional information can be found at their home page: http://flexible.dce.ufl.edu. Catalogs can also be picked up at Florida State University’s Center for Professional Development or from the student’s academic dean.

Transfer Credit

Transfer Credit. The University accepts transfer credit from all regionally accredited institutions (or comparable international institutions) for coursework with grades of “D–” or better. All grades earned at other institutions are entered exactly as earned on a student’s Florida State University permanent record at the time of transfer. The Florida State transcript displays the FSU GPA, the transfer GPA and a cumulative GPA comprised of FSU and transfer grades combined.

Vocational, Technical, or Below College-Level Credit. No credit is allowed for vocational, technical, or below college-level coursework. However, a student’s academic dean may allow credit for up to six hours of vocational or technical credit upon appeal.

Experiential Credit. The University does not award credit or accept transfer credits for work experience.

International Credit. An official course-by-course evaluation is required for all academic records from non-U.S. institutions. We recommend the evaluation be done by a member of the National Association of Credential Evaluation Services (http://naces.org) or the International Education Credential Services provided by the American Association of Collegiate Registrars and Admissions Officers (http://iex.aacrao.org).

Florida Statewide Common Course Numbering System (SCNS). The state of Florida utilizes a common course numbering system to facilitate the transfer of credit for equivalent courses among the state’s colleges and universities. SCNS is now used at all public and selected nonpublic institutions of higher education in Florida. Courses that have the same academic content and are taught by faculty with comparable credentials are given the same prefix and last three numerical digits, and are considered equivalent courses; thus, THE 1234 taken at one institution is equivalent to THE 3234 at another institution. Equivalent courses are guaranteed to transfer to any other institution participating in SCNS.

Florida Statewide Articulation Agreement. The state of Florida guarantees Associate in Arts (AA) degree recipients from Florida public institutions acceptance of a minimum of sixty semester hours of college credit toward the baccalaureate degree with no additional required remedial coursework.

Military Credit. Students who are or were eligible members of the United States Armed Forces may earn college credit based upon military experience, training, and coursework acquired while in the military. Academic credit will only be awarded if recognized by the American Council on Education (ACE) in the Guide to the Evaluation of Education Experiences in the Armed Services. ACE recommendations for vocational or technical credit are not accepted as transfer credit.

Credits earned will be evaluated after the application review process has been completed and admission to the University has been granted. The Office of the University Registrar will post all credit earned for military experience, training, and coursework to the student’s permanent record as recommended in the ACE Guide.

Graduate Credit. Coursework not counted towards a previous degree from another regionally accredited graduate school (or comparable international institution) is limited to six semester hours, and transfer coursework not counted towards a previous degree within Florida State University is limited to twelve semester hours, except when the departmental course requirements exceed the thirty-two hour University-wide minimum requirement. In the latter case, additional transfer credit may be allowed to the extent of the additional required hours. In all cases, the majority of credit must be earned through Florida State University or its official consortia institutions.

The Transfer Credit Process. Students who have taken college-level coursework are required to submit official transcripts from all institutions attended. Transfer credit will be evaluated and applied towards a student’s academic program in one of three ways: 1) applied as a major/minor requirement replacing the equivalent required or optional course taught by the University; 2) applied as a general core requirement replacing the equivalent required or optional course taught by the University; or 3) applied as a general elective that may or may not satisfy degree requirements.

At the undergraduate level, credit is first evaluated by the Office of the University Registrar’s Records Audit and Analysis section to determine if the institution is regionally accredited (or comparable accreditation at international institutions), and if the credit is college level, vocational, or technical. Vocational or technical credit is not normally accepted for transfer; however, the University Registrar will consider up to six semester hours of technical or vocational credit on appeal. The credit is then evaluated by the Office of Undergraduate Studies to determine if it is applicable to liberal studies (general education) requirements. Undergraduate-level or graduate-level courses are also evaluated by the student’s chosen major department to determine degree applicability for major/minor requirements. During the review by the Office of Undergraduate Studies or the Upper-Level Department, the individual course prefix, number, description, host institution catalog, syllabus, and other supporting documentation are reviewed to determine if the course is logically and qualitatively equivalent to a Florida State course. All college-level coursework that is not applicable to liberal studies or major/minor requirements will be designated as general elective credit.

At the graduate level, all transfer credit must: 1) be recommended by the major department; 2) be evaluated as graduate work by the Office of the University Registrar at Florida State University; and 3) have been completed with grades of 3.0 (“B”) or better.

Grievance Process. Students who allege that transfer credit was improperly evaluated and applied may have their grievances addressed through the Director of Admissions for initial posting of examination credit, the University Registrar for the initial posting of general elective credit, the academic dean of their selected major for major coursework and degree program requirements, and the dean of Undergraduate Studies for liberal studies equivalency. If no resolution is reached, the student may file a grievance with the University. The University grievance policy is outlined in the “Academic Integrity and Grievances” chapter of this General Bulletin.

Credit for Nontraditional Courses, Including Short Courses

Nontraditional courses have many different purposes, including the recertification of persons for various subject matters and professional special-
ties. Short courses for credit shall have the same number of contact hours as do regularly scheduled courses; i.e., a one-hour course must have fifteen total contact hours; a two-hour course must have thirty total contact hours; a three-hour course must have forty-five total contact hours. Alternatively, other nontraditional courses/settings must have an appropriate substitute(s) for the above contact hours, e.g., distance learning might include student/teacher interaction, student interaction with professor-designed materials, or other appropriate interactions. In no case can credit be given with less student participation than the above hours stipulate. Any alternative course(s) must document equivalency with traditional course(s) when such traditional courses exist.

Courses that follow nontraditional scheduling patterns, such as running over from one term to the next, may be scheduled through the Center for Professional Development and Public Service or through the Office of the University Registrar. Course hours must be scheduled in keeping with the above policy on credit for nontraditional courses, including short courses, adopted by the Faculty Senate.

Programs for Acceleration

Florida State University has established several avenues that permit a reduction in the normal amount of time required to complete the requirements for a baccalaureate degree.

Dual Enrollment

Students who are enrolled in college coursework prior to graduation from high school may be awarded college credit at Florida State University. Refer to the “Transfer Credit” section of this chapter for specific information concerning what may transfer. Dual enrolled students must meet immunization requirements before they can register for classes. The requirements are posted at [http://uhs.fsu.edu](http://uhs.fsu.edu) under the Compliance tab.

Credit by Examination

The University recognizes the following examination programs for which students may receive academic credit or exemption in lieu of coursework. These programs permit the qualified student to earn by examination up to thirty semester hours of credit toward liberal studies requirements and up to forty-five semester hours of credit toward total baccalaureate degree requirements.

Students earning credit by examination must still satisfy departmental major and/or minor requirements, the University’s coursework requirement of forty-five semester hours in courses numbered 3000 and above, and the Section 1007.25, Florida Statutes, writing requirement, which is met in the English Composition sequence and E-Series requirement at Florida State University (see the “Undergraduate Degree Requirements” chapter of this General Bulletin).

Credit toward the baccalaureate degree will not be granted for courses taken that are judged equivalent to credit already earned through one of the examination programs and vice versa. In addition, duplicate credit by examination will not be awarded. A course may not be dropped in anticipation of receiving examination credit. The successful score must be in hand at the time the request is made to drop an equivalent course.

Credit earned by examination may be declined. Students must notify the Office of the University Registrar, section of Records Audit and Analysis of this intention as soon as possible after successful scores have been received.

In accordance with the articulation agreement, students who have earned CLEP credit in partial fulfillment of the requirements for the AA degree from a Florida public institution will be awarded credit on the basis of their presentation of the AA degree. An individual evaluation will not be made.

Transfer students who have completed a general education program at a Florida public institution and whose transcript is so marked will be considered to have completed the Liberal Studies for the 21st Century Program at Florida State University. A second evaluation of CLEP credits in the liberal studies areas will not be made.

Advanced International Certificate of Education (AICE)

Students who have completed AICE examinations should submit their official score reports to Florida State University. Refer to the AICE Table at the end of this chapter for college course equivalents and credits earned.

Advanced Placement (AP)

Students who have participated in the AP Program in high school and received a score of three or better on the national examinations will receive college credit in the appropriate subject areas. Refer to the AP Table at the end of this chapter for college course equivalents and credits earned.

International Baccalaureate (IB)

Students in an IB Program will receive up to forty-five semester hours of credit for scores of four or higher on both higher-level and standard-level examinations. Refer to the IB Table at the end of this chapter for college course equivalents and credits earned.

College-Level Examination Program (CLEP)

Florida State University grants credit in lieu of coursework for the CLEP subject matter examinations. Credits are awarded to any regularly admitted, degree-seeking undergraduate student who scores at or above the 50th percentile level of the sophomore norms on the CLEP examinations. Students receive appropriate credit, provided they have not attempted credit, or received credit, at the college level in the subject area or received credit in the subject area through AICE, AP, or IB. Academic deans shall have the authority to make exceptions concerning examinations that may fall within a subject area for which a student has existing credit. Students must have the permission of the academic dean to take a CLEP exam for any mathematics or English composition course.

At Florida State University, CLEP examinations are administered through the Office of Evaluation Services, an open test center for CLEP. Eligibility to receive CLEP credit at Florida State will be verified by the Office of Admissions.

English Credit through SAT/ACT

Students who score 650 or higher on the verbal/critical reading portion of the SAT or 29 or higher on the English portion of the ACT will be granted three semester hours of credit equivalent to ENC 1101.

Note: University policy subject to change for SAT with the introduction of the writing subscore.

Mathematics Credit through SAT/ACT

Students who score 680 or higher on the mathematics portion of the SAT or 30 or higher on the mathematics portion of the ACT will be granted three semester hours of credit equivalent to MAC 1105.

Departmental Examinations

Departments and programs of the University may offer examinations for academic credit in lieu of coursework to undergraduate students upon request. Interested students should consult with their colleges or departments concerning the availability of examinations in lieu of specific courses.

General Credit Limitations

Courses taken by correspondence through the state of Florida, Board of Governors approved off-campus courses, and/or courses evaluated and recommended as suitable for credit by the American Council on Education (ACE) may be accepted by the University. The number of hours of such courses accepted in any individual case is at the discretion of the academic dean. The total number of such courses accepted cannot exceed thirty semester hours.

An undergraduate student may be granted a baccalaureate degree under degree requirements specified in the General Bulletin at the time of admission, insofar as course offerings will permit, provided the student graduates within a period of six years from date of first entry to the University. If a student exceeds six years in pursuit of the baccalaureate degree, the University may specify that the degree requirements of the most current General Bulletin will apply. A student may elect instead to meet the degree requirements specified in any subsequent General Bulletin covering a period of the student’s enrollment.

When credits are more than ten years old they are subject to reevaluation by the appropriate dean before they can be applied toward graduation.

Degree-Seeking Status at Two Separate Institutions

Under certain circumstances students may wish to pursue degrees at Florida State University and another institution simultaneously. In all cases students in this situation must consult their Florida State University academic advisor and academic dean to request approval in advance. If approval is granted, students may enroll at Florida State University and another institution under the following conditions:
1. Students are responsible for complying with all rules, regulations, and policies of both institutions, including but not limited to: admission standards; academic rules; residency; fees; graduation requirements; university, college and departmental deadlines; and student codes of conduct. Florida State University is under no obligation to waive or otherwise modify any polices, requirements, or deadlines to facilitate the student’s enrollment at another institution.
2. Enrollment certification and degree verification issued by Florida State University will be based solely on current registration hours with Florida State University and any awards, honors, or degrees posted by Florida State University. The University will not combine enrollment or degree verification with another institution.

3. Students receiving financial aid must designate one institution as the primary institution for financial aid distribution. The primary institution will be responsible for monitoring awards and delivery of aid. Florida State University will not combine enrollment hours with another institution for financial aid purposes.

4. Students who are planning to transfer courses to Florida State University should seek advising in advance of doing so. The University limits the number of transfer hours a student may bring in depending on the type of degree and program. Hours used to satisfy a previous degree, either at Florida State or another institution, cannot be counted toward the current degree the student is pursuing.

**Note:** Different conditions, rules, and policies may apply in the event that Florida State University has an approved consortial or cooperative agreement with the second institution. Students should be aware that approval by Florida State University to pursue degrees at Florida State and another institution in no way binds the other institution to a similar approval. Students are encouraged to consult with the second institution about its policies before enrolling in any courses.

**Official E-mail Accounts for All Students at Florida State University**

The official method of communication at Florida State University is your FSU e-mail account. In order to stay informed and aware, you are required to set up and maintain your account and check it three times per week. If you choose to have your official FSU account forwarded to another e-mail account, you are still held responsible for all information distributed by the University to your FSU account.

Florida State University’s Information Technology Services now offers new communication and online collaboration services for students and alumni, which includes:

- A free 10GB lifetime @my.fsu.edu e-mail account
- Up to 25GB of free cloud-based file storage
- Free online computer backup/synchronization utilities
- Free online collaboration tools
- Online MS Office Web Applications
- Mobile access to FSU e-mail and more...

The myFSU service, which is funded in part by the University’s Student Technology Fee, replaced the University’s former e-mail system (@fsu.edu) for all students and alumni at the end of Fall 2011. Students and alumni should go to http://fsu.edu/myfsu to confirm their settings.

Questions regarding the activation of myFSU accounts can be answered by calling 644-HELP (4357) or visiting http://www.helpdesk.fsu.edu.

**Student Addresses**

Students are required to maintain their current local and permanent addresses with the University. Address updates may be done online at http://my.fsu.edu by clicking on the address link under the “Personal Information” section of the Student Center or in person at the Office of the University Registrar, 3900 University Center A. Students are strongly encouraged to provide emergency text numbers and contact information.

UNDERGRADUATE DEGREE REQUIREMENTS

Degrees Offered

Florida State University confers at the bachelor’s level the Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Science in Nursing, Bachelor of Music, Bachelor of Music Education, Bachelor of Social Work, and the Bachelor of Science degrees, the requirements for which are described in detail below. Students may find requirements for all graduate degrees (master’s, specialist, professional, and doctoral) in the Graduate Bulletin.

Students pursuing a baccalaureate degree at Florida State University must meet a number of state- and University-wide degree requirements as they progress through their course of studies. In general, freshmen and sophomore students in most majors emphasize work in a broad-based liberal arts curriculum, described below as Liberal Studies for the 21st Century, and in consultation with their advisors select a major concentration. By the end of the freshman year, all students should have completed at least half of the Liberal Studies for the 21st Century Program, including the English Composition and Quantitative/Logical Thinking requirements.

At about the end of the sophomore year (fifty-two degree hours), students formally select a major and request acceptance by the college in which the major is taught. Students transferring into the University with an Associate in Arts (AA) degree from a Florida public community college or university, or transferring fifty-two or more semester hours of credit, are eligible to be admitted directly into the college of their choice provided they meet minimum requirements for the major selected.

Students at the junior and senior level complete the requirements of their chosen major and often of a minor field. They may also have to fulfill additional requirements specific to their college and/or certification requirements to engage in a particular profession for which their undergraduate major is preparatory.

Understanding these degree requirements is crucial to the smooth progression to graduation. Students are encouraged to consult with their academic advisors regularly throughout their undergraduate years to ensure that they are making appropriate progress toward their degree and to consult their academic deans’ offices, Advising First, and the Office of the University Registrar for assistance and clarification of degree requirements.

Baccalaureate Degree Requirements: An Overview

Florida State University will confer the bachelor’s degree when the following conditions have been met. Restrictions may be found under ‘Transfer Credit’ in the “Academic Regulations and Procedures” chapter of this General Bulletin.

Statewide General Education Core

The State of Florida Statute 1007.25 regarding General Education was revised in 2012 and again in 2013 to “improve articulation and reduce excess hours” for students entering the State University System (SUS) and Florida College System (FCS). Information on the statute, the implementation process, and the decisions made is posted on the official Web site at http://www.fldoe.org/articulation/hb7135gep.asp.

The Statewide General Education Core requirements apply to students initially entering the SUS or FCS in the 2015-2016 academic year and thereafter. Fifteen (three credit hours from each category) of the thirty-six general education credits must be earned from the five Statewide General Education Core requirement categories (at FSU, these are: English Composition, Quantitative/Logical Thinking, History/Social Science, Humanities/Cultural Practice/Ethics/Social Responsibility, and Natural Sciences). All SUS and FCS institutions must accept these courses for transfer credit, but no institution must offer all courses.

Liberal Studies for the 21st Century and Preeminence Coursework

Liberal Studies for the 21st Century provides an educational foundation for FSU graduates to thrive intellectually and professionally and to support themselves, their families, and their communities through a broad and critical engagement with the world in which they live and work. Liberal Studies thus offers a transformative experience, helping FSU students to become:

- critical analyzers of quantitative and logical claims (Quantitative/Logical Thinking Area)
- clear, creative, and convincing communicators; and critical readers (English Composition Area)
- critical appraisers of theories and the facts that support them (Social Science, History, and Natural Science Areas)
- ethically engaged and socially responsible citizens (Ethics and Social Responsibility Area)
- thoughtful patrons of and participants in cultural practices (Humanities and Cultural Practice Area)
- interdisciplinary and flexible thinkers (E-Series: Engage, Explore, Envision)

The Preeminence Bill SB 1076 encourages FSU to require twelve credits of unique coursework in all undergraduate programs that cannot be earned through any acceleration mechanism. In our continued efforts to improve the educational experience for all undergraduate students and to address the needs of the 21st Century FSU graduate, Florida State University has developed the Scholarship-in-Practice course series, focused on first-hand experience with the process of creative and scholarly work, and the E-Series: Engage, Explore, Envision, in which students consider broad and persistent questions from multiple perspectives.

General Requirements/Liberal Studies for the 21st Century

1. Satisfactory completion (a minimum adjusted grade point average of 2.0 on all courses used for liberal studies) of Florida State University’s Liberal Studies for the 21st Century Program, thirty-six semester hours, as follows:

   Quantitative/Logical Thinking: Students must complete a total of six semester hours in this area, of which at least three semester hours must be chosen from the Statewide Core list. Students must earn a “C” or higher in these courses.

   English Composition: Students must complete a total of six semester hours in this area, of which three must be chosen from the Statewide Core list (ENC 1101), and three must be drawn from the 2000-level ENC courses at FSU. Students must earn a “C” or higher in these courses.

   History/Social Sciences: Students must complete between six and nine semester hours in the combined area of History and Social Sciences of which at least three semester hours must be chosen from the Statewide Core list. Students must have at least one History and one Social Science course.

   Humanities and Cultural Practice/Ethics and Social Responsibility: Students must complete between six and twelve semester hours in the combined area of Humanities/Cultural Practice and Ethics/Social Responsibility, of which at least three semester hours must be chosen from the combined Statewide Core requirement list for Humanities. Students must complete at least one Humanities/Cultural Practice course and one Ethics/Social Responsibility course.

   Natural Sciences: Students must complete six semester hours in this area, of which at least three semester hours must be chosen from the Statewide Core requirement list. Note: All students must complete at least one laboratory science course as a graduation requirement (see below).

   Scholarship in Practice: Prior to graduation, students must complete two courses in this area drawn from two different departments. Students may take Scholarship-in-Practice coursework as part of Liberal Studies, but many will complete one Scholarship-in-Practice course in their own major. Students may complete one of the two courses required in this area by taking an approved course in the “Formative Experience” area. These courses include FSU Study Abroad offerings and select Internships.

   E-Series (Engage, Explore, Envision): Students must complete at least two liberal studies courses that, in addition to the relevant area designation, are also designated as E-Series courses. For more details, please see the relevant portions of this chapter below.
2. Satisfactory completion of state and University-wide mandates requiring specific coursework in English Composition and Quantitative/Logical Thinking. Students are expected to demonstrate proficiency in the use of spoken and written English in all of their courses.

3. Satisfactory completion of University-wide graduation requirements as follows:
   Diversity Requirement: Students must complete at least one Cross-Cultural Awareness course (X) and one Diversity in Western Culture course (Y).

   Laboratory Science Requirement: Students must complete at least one laboratory Science Course.

   Oral Communication Requirement: Students must complete at least one course designated as meeting the Oral Communication Requirement.

   Computer Competency Requirement: Students must complete at least one course designated as meeting the Computer Competency Requirement.

   Upper-Division Writing Requirement: Students must complete at least one course designated as meeting the Upper-Division Writing Requirement.

4. Satisfactory completion of major requirements in a chosen degree program, including additional requirements set by the college offering the degree. The student’s degree program will appear on the baccalaureate diploma. If a student satisfies all requirements for two degrees, including admission, prerequisite, core, etc., both degree programs may appear on the diploma. A list of degree programs is available in the “Academic Degree and Certificate Programs” chapter of this General Bulletin. Major names are not printed on university diplomas.

5. A minimum adjusted grade point average (GPA) of 2.0 on all coursework taken at Florida State University and an overall 2.0 average on all college-level work attempted.

6. Successful completion of a minimum of one hundred twenty unduplicated semester hours, only two hours of which may be in physical education activity courses.

7. Completion of at least forty-five semester hours in courses numbered 3000 and above, thirty of which need to be taken at this University.

8. Completion of the last thirty semester hours and half of the major course semester hours at residence at this University. In cases of emergency, a maximum of six hours of the final thirty semester hours may be completed by correspondence or residence at another accredited senior institution with the approval of the academic dean. College-Level Examination Program (CLEP) credits earned may be applied to the final thirty hour requirement provided that the student has earned at least thirty semester hours credit at Florida State University.

Note: Active-duty service members may complete university academic residency requirements and stated requirements in specific courses of study such as majors, at any time while enrolled. Reservists and National Guard on active duty are covered in the same manner. Please contact your academic advisor and the FSU Student Veterans Center to coordinate active duty residency waivers.

9. Students who have entered a university in the State of Florida, Division of Colleges and Universities, with fewer than sixty hours of credit in the Fall of 1976 or any time thereafter are required to earn at least nine hours prior to graduation by attendance in one or more Summer terms at one of the State University System institutions. The University President may waive the application of this rule in cases of unusual hardship to the individual. Students wishing waivers submit written requests giving the details of their hardships through their academic deans to the Vice President for Faculty Development and Advancement. Prior to 2011, students who had earned nine semester hours of credit through approved acceleration methods (AP, IB, CLEP, and approved dual enrollment courses) were exempt from the Summer residency requirement. Effective 2011, this exemption is no longer available.

10. Satisfaction of the foreign-language admissions requirement by having two sequential units of the same foreign language in high school, or eight semester hours of the same foreign language in college, or documented equivalent proficiency.

11. Successful completion of coursework constituting the student’s program of studies, minor, honors thesis, or certification examination does not guarantee the awarding of the baccalaureate degree. Faculty judgment of the academic performance of the student is inherent in the educational process in determining whether the awarding of the baccalaureate degree or admission into a higher level degree program is warranted.

Note: For the purpose of establishing residency, the various Summer sessions are considered one semester.

Following is a full discussion of state- and University-wide degree requirements at the undergraduate level. Requirements specific to a particular college may be found in the section of this General Bulletin describing that college. Major and minor requirements may be found under the appropriate department in the departmental listings.

State Mandated Academic Learning Compacts (SMALCs)

The State Board of Governors has directed each university to develop Academic Learning Compacts for every baccalaureate degree program. A State University System Academic Learning Compact (SMALC) identifies for each academic bachelor’s program what students will learn by the end of a program and how knowledge is measured above and beyond course grades. A SMALC must pinpoint the core learning expectations in the areas of communication, critical thinking skills, and content/discipline knowledge and skills. Additionally, it must identify the corresponding assessments used to determine how well the student has assimilated the articulated expectations.

Successful performance related to the State Mandated Academic Learning Compacts specific to your degree is a requirement for graduation. Visit http://learningforlife.fsu.edu/smalcs/plearningcompact.cfm to view the current version of the SMALCs for your degree. Simply select your major and detailed information is provided. You may also obtain information pertaining to SMALCs by contacting the academic departments.

Division of Undergraduate Studies

Dean: Karen Laughlin
Associate Deans: Gregory Beaumont, Sara Hamon, Bruce Janasiewicz
Assistant Deans: Craig Filar, Nikki Raimondi

The Division of Undergraduate Studies is responsible for the supervision and monitoring of all state- and University-wide degree requirements as well as University-wide academic support offices. Overseen by the Dean of Undergraduate Studies, the division includes the Office of Undergraduate Studies (the academic home of most freshmen and sophomores), Advising First, the Center for Academic Retention and Enhancement (CARE), the University Honors Program, Transfer and Information Services, the Academic Center for Excellence (ACE), the Office of National Fellowships, and the Center for Undergraduate Research and Academic Engagement. For further information on these academic support offices see ‘Honors Program’ in the “University Honors Program and Honor Societies” chapter and ‘Advising First’, the ‘Center for Academic Retention and Enhancement’, ‘Center for Undergraduate Research and Academic Engagement’, and ‘Transfer and Information Services’ in the “Academic Advising and Support Services” chapter of this General Bulletin.

Freshmen and sophomores have their programs and coursework supervised by the Office of Undergraduate Studies. Exceptions to this placement are students accepted into the College of Music, College of Motion Picture Arts, or into the Bachelor of Fine Arts (BFA) program in theatre or dance. Students in these majors are advised and supervised directly within their own schools or departments. The Office of Undergraduate Studies is the dean’s office that administers the academic and advisement program, regardless of intended major, for all other freshman and sophomore students.

Liberal Studies for the 21st Century Requirements

Students are required to complete (or be exempted from with credit): a minimum of six semester hours of Quantitative/Logical Thinking coursework and six semester hours of English Composition, six to nine semester hours in History/Social Science, three to nine semester hours in Humanities and Cultural Practice, three semester hours in Ethics and Social Responsibility, and six semester hours in Natural Sciences (with a laboratory to be required for graduation); and two courses drawn from the above areas that also carry an E-Series designation. At least two courses that carry a Scholarship-in-Practice designation are considered one semester.

The liberal studies requirements must be met by completion of appropriate coursework or by combination of coursework and credit by examination within the limits set below:

1. Credit by Examination. A maximum of thirty semester hours of credit earned through examination may be applied to the liberal studies requirements.
2. **Coursework.** An overall 2.0 average or better is required for coursework used to satisfy the liberal studies requirements.

3. To satisfy state mandates and University-wide requirements, students must also earn a grade of “C” or better in each of the courses used to fulfill the liberal studies requirements in Quantitative/Logical Thinking and English Composition. In addition, at least two of the liberal studies courses must be designated as E-Series (Engage, Explore, Envision), which include substantive instruction in college-level writing. A grade of “C” or better is required in order to meet the writing requirement in the E-Series courses.

4. Courses listed as “directed individual study” (DIS), “senior honors thesis,” or “senior seminar” cannot apply to the Liberal Studies for the 21st Century Program.

5. No courses taken on a satisfactory/unsatisfactory (S/U) basis may apply to the liberal studies requirement, with the exception that a single course that counts as a designated “formative experience” (study abroad or certain designated internships) may be awarded an S/U grade.

6. A student who transfers to Florida State University from a Florida public community/junior college or senior institution will be deemed to have satisfied the University’s liberal studies requirement if all general education requirements stipulated by the community/junior college or senior institution have been met and the student’s transcript has been so marked.

7. A course approved for liberal studies credit at the time the course was completed will meet liberal studies requirements, even if the course was not listed as a liberal studies course in the General Bulletin under which the student entered.

Courses for the Liberal Studies in the 21st Century Program shall be selected from the following areas. Students should check departmental curricular listings to determine prerequisites and course duplications prior to taking courses. In addition, students may search for current liberal studies listings here: http://liberalstudies.fsu.edu. Finally, it is important to note that designations may change periodically. An up-to-date listing of designations can be found on the liberal studies Web site and all appropriate designations are indicated in the course syllabus for individual courses.

**Note:** Some students will be required to take preparatory coursework prior to enrollment in English Composition and/or Quantitative/Logical Thinking courses. See ‘Required Preparatory Courses’ in the “Academic Regulations and Procedures” chapter of this General Bulletin.

### Symbol Legend

<table>
<thead>
<tr>
<th>Code</th>

</table>

### Quantitative/Logical Thinking

Students will become critical analyzers of quantitative and logical claims. They will demonstrate the ability to: analyze and address problems drawn from real-world scenarios by applying appropriate mathematical, statistical, logical, and/or computational models or principles; interpret and evaluate data information, using appropriate technology, and be able to clearly communicate a summary of their findings to peers.

Students must complete (or be exempted from with credit) a total of at least six semester hours in Quantitative/Logical Thinking, of which at least three semester hours must be chosen from the Statewide General Education Core for mathematics (see Statewide Core requirement list). Of those six required hours, three of those credit hours must be in the Department of Mathematics and three additional credit hours must be from a list approved by the Faculty Senate and maintained by the Office of Undergraduate Studies. Students must complete their first Quantitative/Logical Thinking course by the time they have attempted thirty hours, which includes any credit hours earned through acceleration (i.e., AP, IB, Dual Enrollment, etc.). Students must complete or be registered for their second Quantitative/Logical Thinking course by the time they have attempted forty hours. All six semester hours of the Quantitative/Logical Thinking liberal studies requirement should be completed by the time the student earns fifty-two hours. All courses used to satisfy this requirement must be completed with a grade of “C” or higher.

All incoming freshman students who intend to register for Analytic Trigonometry (MAC 1114), Pre-Calculus Algebra (MAC 1140), Calculus with Analytical Geometry I (MAC 2311), Calculus with Analytical Geometry II (MAC 2312), or Calculus for Business (MAC 2233) as their first mathematics course at FSU (in their first semester or subsequent semesters) will be required to take the ALEKS placement exam, regardless of SAT/ACT scores, AP/IB/AICE/CLEP scores, or incoming credit. Detailed information about taking the ALEKS placement exam can be found on the Department of Mathematics Web site: http://www.math.fsu.edu/~bellenot/ALEKS/.

### Statewide Core Courses:

| MAC 1105 | College Algebra (3) |
| MAC 2311 | Calculus with Analytic Geometry I (4) |
| MGF 1106 | Mathematics for Liberal Arts I (3) |
| MGF 1107 | Topics in Practical Finite Mathematics (3) |
| STA 2023 | Fundamental Business Statistics (3) |

**Note:** Any student who successfully completes a mathematics course for which one of the general education core course options in mathematics is an immediate prerequisite shall be considered to have completed the Statewide Core mathematics requirement.

### Additional Quantitative/Logical Thinking Coursework

| IFS 2084 | Understanding Uncertainty: Games of Skill and Chance (3) |
| IFS 3130 | Making the Argument: Symbolic Logic and the Forms of Good Reasoning (3) |
| MAC 1114 | Analytic Trigonometry (2) |
| MAC 1140 | Pre-Calculus Algebra (3) |
| MAC 1147 | Pre-Calculus Algebra/Trigonometry (5) |
| MAC 2233 | Calculus for Business (3) |
| MAC 2312 | Calculus with Analytic Geometry II (4) |
| MAC 2313 | Calculus with Analytic Geometry III (5) |
| PHI 2100 | Reasoning and Critical Thinking (3) |
| STA 1013 | Statistics through Example (3) |
| STA 1220h | In My Opinion: Introduction to Designing, Conducting and Analyzing Surveys (3) |
| STA 2122 | Introduction to Applied Statistics (3) |
| STA 2171 | Statistics for Biology (4) |

### English Composition

Students will become clear, creative, and convincing communicators and critical readers. They will demonstrate the ability to convey ideas in clear, coherent, grammatically correct prose adapted to their particular purpose, occasion, and audience. They will understand that writing is a process involving practice, revision, and editing. They will read, analyze, and interpret complex literature, texts, images, and graphs in a variety of media.

Students must complete (or be exempted from with credit) a total of at least six semester hours in English Composition, which shall include ENC 1101 (which meets the Statewide Core requirement) and a single 2000-level course with an ENC prefix. All students shall complete the required English Composition courses by the time they have attempted thirty credit hours, which includes any credit hours earned through acceleration (i.e., AP, IB, Dual Enrollment, etc.) or must show an appropriate exemption, as approved by the Faculty Senate, from six semester hours of English Composition courses. Each of these courses will require approximately 6,000 words of writing. All courses used to satisfy this requirement must be completed with a grade of “C” or higher.

### Statewide Core Course:

| ENC 1101 | Freshman Composition and Rhetoric (3) |

**Note:** Any student who successfully completes a course with an ENC prefix for which ENC 1101 is an immediate prerequisite shall be considered to have completed the Statewide Core communication requirement.

Students must complete both ENC 1101 and a single 2000-level course with an ENC prefix.

### Additional English Composition Coursework

| ENC 2135 | Research, Genre, and Context (3) |

### History/Social Science

Students will become critical appraisers of theories and the facts that support them. They will demonstrate the ability to: critically examine, interpret, and explain how personal, political, cultural, economic, and social experiences and/or structures shape the past and/or present; gather and analyze data using
social science and/or historical methodologies to evaluate causal arguments and analyze assertions, assumptions, and explanatory evidence; and evaluate and employ appropriate methods and technology in the collection and analysis of data.

Students must complete between six and nine semester hours in the combined area of history and social sciences (at least one history and one social science), of which at least three semester hours will be chosen from the combined Statewide Core requirement list.

Statewide Core Course in History:
- AMH 2020 A History of the United States Since 1877 (3)

Statewide Core Courses in Social Science:
- ANT 2000x Introduction to Anthropology (3)
- ECO 2013 Principles of Macroeconomics (3)
- POS 1041 American Government: National (3)
- PSY 2012 General Psychology (3)
- SYG 1000 Introductory Sociology (3)

History
- AMH 2010 The History of the United States to 1877 (3)
- AMH 2091y The African-American Experience in the United States (3)
- AMH 2095y American Indians in the United States (3)
- AMH 2096y Black Women in America (3)
- AMH 2097y Nationality, Race, and Ethnicity in the United States (3)
- AMH 2583y The Seminoles and the Southeastern Indians (3)
- ANT 3141x World Prehistory (3)
- ASH 1044x Middle Eastern History and Civilization (3)
- ASH 3100x History of Asia (3)
- ASH 3200r Middle East Survey: An Interdisciplinary and Introductory Course (3–6)
- CLA 2010sx Peoples of the Roman World (3)
- CLA 2110s Debates about the Past: Greek Civilization, History and Culture (3)
- CLA 2123s Debates about the Past: Roman Civilization, History and Culture (3)
- CLT 2049 Medical Terminology (3)
- EHU 2000 Ancient and Medieval Civilizations (3)
- EHU 3205x 19th-Century Europe (3)
- EHU 3530 England, the Empire and the Commonwealth (3)
- HIS 2050s The Historian’s Craft (3)
- HIS 2370s Interpreting Native America (3)
- HIS 3464y History of Science (3)
- HIS 3491y Medicine and Society (3)
- HIS 3505 Perspectives on Science and Mathematics (3)
- IFS 2005 Defining Moments and Identities: From the Persian Wars to September 11th (3)
- IFS 2006 Citizenship and Debate: Models from the Ancient World (3)
- IFS 2010 The American GI in War and Peace in World War II (3)
- IFS 2011 Empire and Revolution in Cold War Latin America (3)
- IFS 2019xx Heretics, Rebels and Militants in the Islamic World (3)
- IFS 2026 Environment and Society (3)
- IFS 2035 (Re)Imagining Florida: From Spanish Colonialism to Today (3)
- IFS 2042 Fight the Power: Protesting with Song in America: 20th Century versus 21st Century (3)
- IFS 2045 Making Chief Osceola (3)

Note that this list is subject to change. Please see http://liberalstudies.fsu.edu for an up-to-date list.

Humanities and Cultural Practice/Ethics and Social Responsibility

For the Humanities and Cultural Practice area, students will become thoughtful patrons of and participants in cultural practice. They will demonstrate the ability to: compare and interpret intellectual and artistic expressions of a variety of cultures and compare, interpret and create or model cultural artifacts that function as widely varied reflections of human perspectives and/or practices.

For the Ethics and Social Responsibility area students will become ethically engaged and socially responsible citizens. Students will examine views of morality and socially responsible behavior by developing and applying historically and culturally sensitive knowledge and skills to real-world ethical problems and their ramifications in a thorough and responsible manner and evaluate ethical positions; recognize and evaluate the historical and/or cultural contexts that shape ethical perspectives, and articulate views on the nature of social responsibility and its importance.

Students must complete between six and twelve semester hours in the combined area of Humanities/Cultural Practices and Ethics/Social Responsibility, of which at least three semester hours must be chosen from the combined Statewide Core requirement list for Humanities. Students must complete at least one Humanities/Cultural Practice Course and one Ethics/Social Responsibility course.

### Natural Science

Students will become critical appraisers of theories and the facts that support them. For non-lab courses only (Scientific Method and Reasoning), students will demonstrate the ability to: think critically and cogently about causal relationships with scientific reasoning; assess previous experimentation and published scientific results; critically examine and evaluate scientific observation, hypothesis or model construction; articulate a variety of issues created by the complex interactions among science, technology, and society; and use scientific perspectives to evaluate contemporary problems facing society. For lab courses only (Science in Practice), students will demonstrate the ability to: explain the process of scientific reasoning and apply scientific principles inside and outside of the laboratory or field setting; systematically evaluate evidence for accuracy, limitations, and relevance, and identify alternative interpretations of evidence; design and conduct experiments to make observations and test hypotheses, as well as to analyze and interpret data using quantitative and appropriate technological tools. Students must complete a minimum of six...
semester hours, of which at least three semester hours must be chosen from the Statewide Core requirement list. One of the courses must be accompanied by a corresponding laboratory.

Note: Certain restrictions exist regarding the allotment of course credit for the scholarship-in-practice courses listed above. Students should refer to the course descriptions of each department for specific credit information before registering for these courses. Also, this list is subject to change. Please see http://liberalstudies.fsu.edu for an up-to-date list.

E-Series: Engage, Explore, Envision

E-Series preeminence courses focus on persistent questions of humanity and the natural world, questions like “Is money the root of all evil?” or “How safe is your salad?” In these courses, students become interdisciplinary and flexible thinkers, lifelong learners, and team builders. Students will demonstrate the ability to: analyze and synthesize information from within and across disciplines to examine existing questions and problems from a variety of perspectives, formulate novel questions and ideas, and explain these questions and ideas in written and oral formats; think creatively and flexibly by employing a variety of approaches to real-world scenarios or questions; and learn, think, and solve problems independently and in teams, as is required to engage in the life-long consideration of, and the fostering of cooperative solutions to, complex problems.

Students must complete at least six semester hours E-Series courses as part of their thirty-six Liberal Studies semester hours. These courses will fall into one of the core Liberal Studies and/or Scholarship-in-Practice areas. To fulfill the College-level Writing Requirement, students must earn a grade of at least “C” in one E-Series course, and also earn at least a “C” average on the required writing assignments. If the student does not earn a “C” average or better on the required writing assignments, the student will not earn an overall grade of “C” or better in the course, no matter how well the student performs in the remaining portion of the course.

Courses with a course prefix of IFS are E-Series courses; see the course lists for the areas above.

How Transfer Credit Applies to the Liberal Studies for the 21st Century Program

The Office of Undergraduate Studies evaluates transfer credits as they apply to the Liberal Studies for the 21st Century Program. Students with the AA degree or General Education Statement from a Florida public university, state college, community college, or other colleges with which Florida State University maintains an official articulation agreement are exempted from the above evaluation.

Scholarship in Practice

Scholarship-in-Practice courses focus on the process of creative and scholarly work, with the end result being a scholarly or creative product. The courses provide students with direct experience of what it means to be an architect, biologist or journalist while engaging in a wide variety of approaches to disciplinary problems. Scholarship-in-Practice courses also allow fields that do not typically have a liberal studies presence, such as engineering and business, to offer hands-on opportunities to non-majors.

In these courses, students will become lifelong and independent learners. They will demonstrate the ability to: select, critically evaluate, and apply relevant areas of scholarship to produce an original analysis, project, creative work, performance, or other scholarly work that reflects a body of knowledge relevant to the course; articulate the process of producing a work, from initial plan, to critique, revision, and completion; and critique existing applications of scholarship in order to learn from past success and failures.

Students must complete six semester hours of Scholarship-in-Practice courses from two different departments. These courses may count within the thirty-six Liberal Studies hours, but it is also possible to fulfill the Scholarship-in-Practice requirement with upper-division Scholarship-in-Practice courses. Most students will complete one course as part of their thirty-six Liberal Studies semester hours and one upper-division Scholarship in Practice course within their major. Students may only count up to six hours of Scholarship-in-Practice courses that do not have some other Liberal Studies area designation towards their thirty-six hours of liberal studies. Scholarship-in-Practice courses at the 4000 level may not count towards liberal studies. In addition, students may include no more than three hours of approved “formative experiences” (internships and study abroad) in their thirty-six hours of Liberal Studies hours.

and their understanding of the contemporary cultural context, a context characterized by a rich diversity of cultures and experiences in which the Western intellectual tradition figures as one among many.

Students will demonstrate the ability to recognize and analyze differences between individuals and groups of people; identify and explain the potential benefits and/or conflicts arising from human differences within the current national and/or international landscape; examine and compare a variety of perspectives in the global community; distinguish one’s own cultural patterns; and respond flexibly to multiple worldviews.

To satisfy this requirement, students will be required to take one course from each of the two categories described below.

The multicultural requirement must be completed with the grade of “C-” or higher prior to the receipt of the baccalaureate degree.

Science Lab Requirement

Students must complete one semester hour of natural science lab as a graduation requirement. Students will demonstrate the ability to apply scientific principles in designing and conducting experiments, and in the evaluation, analysis, and interpretation of evidence. Lab courses are designated by the suffix “L” appended to the course number. Students will typically take this course concurrently with the associated course (e.g., students will enroll in both BSC1005 and BSC1005L).

Upper-Division Writing Requirement

Skill in professional writing is critical to the long-term success of all FSU graduates. As such, all students will be required to demonstrate competency in professional writing by taking upper-division coursework that includes a substantial writing component. For the purposes of this requirement, upper-division writing is defined as writing that requires time for reflection and revision; includes a clearly defined central idea, thesis or analytical angle; provides adequate support for that idea; uses clear and logical organization; adheres to the conventions of standard written language; and is formatted or presented in an appropriate way to the discipline within which it is being taught. This coursework may be completed outside or within a student’s major course of study, but all such coursework will be approved by a board designated by the Senate Steering Committee.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. The computer competency requirement may be satisfied in one of two ways:

1. Earn a grade of “C–” or better in a course(s) that has been approved by the Undergraduate Policy Committee for computer skills competency in the major.
2. Have a prior course, passed with a grade of “C–” or better, certified by the student’s major department as equivalent to the courses approved for computer skills competency in the major.

The specific computer competency skills needed vary from discipline to discipline, and while a minimum level of competency is required, means of assessing such competency must remain flexible. Thus, associated with each major is a required course(s) that provides instruction in the discipline-specific computer skills, and students passing this course(s) with a grade of “C–” or better will be considered to have completed the requirement. The list of required courses for each major will include at least one course flagged as satisfying the computer skills requirement. Students should check with their major department to identify the course(s) designated by the department as satisfying the computer skills competency in the major.

Through the vehicle used to satisfy the computer competency requirement, students must demonstrate:

• Competent use of a discipline-useful software package
• The ability to perform simple transactions using the Web/Internet

College-Level Communication and Computation Competencies

The state mandates and University-wide requirements for minimum communication and computation skills apply to the rules for academic progress to be followed by students in the states universities of Florida. The statewide graduation requirements of these rules follow.

State Mandates and University-wide Requirements

Procedures. Students will satisfy the requirements of this rule by completing, with a grade of “C–” or better in each course, the liberal studies requirements in Quantitative/Logical Thinking, English Composition, and two E-Series courses, which require college-level writing. These requirements must be completed prior to receipt of an associate in arts certificate from Florida State University or admission to upper division. For more information, see the ‘Progression to Upper Division’ section in this chapter.

Exemptions, Waivers, and Advanced Placement. A student shall be allowed to at least partially satisfy the computation requirement through exemption in one of the following ways:

1. By scoring appropriately on an examination administered on campus by the Department of Mathematics
2. By obtaining a score of at least 680 on the mathematics test of the SAT or the equivalent score (30) on the mathematics test of the Enhanced ACT
3. By satisfying College-Level Examination Program (CLEP) requirements in mathematics for post admission exemptions of coursework

Any student who has satisfied CLEP requirements in mathematics and whose high school transcript shows successful completion of higher mathematics coursework, including college algebra, trigonometry, and calculus, shall be certified as having satisfied the State’s computation requirement, through the student may still be required to complete the Quantitative/Logical Thinking requirement for liberal studies.

An Advanced Placement calculus score of 3 or higher will satisfy the second computation course requirement. A student may also be allowed to satisfy the English component through one of the following methods:

1. Students who score 650 or higher on the critical reading portion of the Scholastic Assessment Test (SAT-I) or 29 or higher on the English portion of the Enhanced American College Testing Program test (ACT) will be granted three semester hours of credit equivalent to ENC 1101.
2. For Advanced Placement (AP) scores of 3 on either English Language and Composition or English Literature and Composition a student will be awarded three semester hours of credit for ENC 1101. A score of 4 or 5 on a single exam earns the student three semester hours of credit for liberal studies and three semester hours of elective credit in English Composition. Students will still be required to take a 2000-level ENC course to fulfill the FSU requirement.

Transfer Credits or Correspondence Credits. Students transferring to Florida State University who have been certified by Florida State University as having completed the requirements of the Liberal Studies for the 21st Century Program by virtue of having received the AA degree or the equivalent from their previous institution will be deemed to have satisfied these state mandates and University-wide requirements.
Students transferring from other institutions that come under the provision of these state mandates, but who have not received the AA degree will be deemed to have satisfied these state mandates and University-wide requirements if they have: (1) successfully completed the equivalent courses as indicated by notation on the transcript or by some other form of written certification, that the student has satisfied these state mandates before leaving that institution. Students who meet the above transfer requirements will be required to complete all graduation requirements outside of Liberal Studies as described above, with the following exceptions: transfer students who meet the above requirements will only be required to take one Scholarship-in-Practice course and either an “x” or “y” course at FSU, but not both.

Transferring students who do not fall into either of the above categories will be required to satisfy Florida State University’s Plan for state mandates and University-wide requirements, with the exception that out-of-state transfer students, must have met the requirements for transfer from the admissions office at least one month prior to registration. All students, including assignment to undergraduate studies must do so through the undergraduate division degree program is completed by the student's baccalaureate dean after the student has declared a choice and has been declared eligible for transfer from undergraduate studies directly thereafter.

**Progression to Upper Division**

For progression to upper-division status at Florida State University, a student must meet the following minimum requirements: 1. Completion of at least fifty-two semester hours of college credit 2. Achievement of a minimum adjusted GPA of 2.0 on all work attempted at Florida State University

**Note:** Some degree programs require a higher GPA for admission to upper-division status.

3. Students who began college work prior to October 15, 1982 must complete a minimum of one-half of the required semester hours from the required liberal studies curriculum, including the completion of state mandates and University-wide requirements for specific coursework in writing and computation. A minimum grade of “C” is required in each of the courses used to fulfill the liberal studies requirements in Quantitative/Logical Thinking and English Composition.

4. Acceptance by a college for admission to a degree program Transfer from a lower-division major advisement program to an upper-division degree program is completed by the student’s baccalaureate dean after the student has declared a choice and has been declared eligible for transfer under the above requirements. Transfer from undergraduate studies directly into a baccalaureate degree program is accomplished between the Office of Undergraduate Studies and the appropriate baccalaureate dean under the same conditions. All transfer students admitted to the University who do not meet the above requirements for admission to an upper-division degree program (except those students majoring in music, dance, or the BFA in theatre) and who have fewer than fifty-two semester hours of transferable credit will be assigned to the Division of Undergraduate Studies. Students with fifty-two or more semester hours of transferable credit will be assigned to the lower-division major advisement program under the appropriate baccalaureate dean unless they request assignment to the Division of Undergraduate Studies. Students requesting assignment to undergraduate studies must do so through the undergraduate admissions office at least one month prior to registration. All students, including transfer students, must have met the requirements for transfer from the Division of Undergraduate Studies by the time they have attempted a total of seventy-five semester hours of college work.

**Transfer Among Colleges for Upper-Division Students**

For an upper-division student to change colleges within the University, the student must meet the following requirements:

1. Obtain a signed approval form from the dean of the college to which the student wishes to transfer.
2. Obtain an approval signature on that form from the dean of the college from which the student wishes to transfer.
3. Personally submit the original copy of the approved change form to the Office of the University Registrar.

**The Associate in Arts**

The Associate in Arts (AA) degree may be granted through the Division of Undergraduate Studies to students who have completed sixty semester hours with an adjusted GPA of 2.0 or better at Florida State University and an overall 2.0 GPA on all college work attempted. A minimum of twenty of the last thirty semester hours of work must be earned in residence. Successful completion of the Liberal Studies for the 21st Century Program with a 2.0 GPA or better is required for the AA degree. Students beginning their college program January 1983 or later must also meet state mandates and University-wide requirements for specific coursework in writing and computation.

Students cannot apply for both an Associate in Arts degree and a bachelor’s degree to be awarded in the same semester. Also, the Associate in Arts degree cannot be awarded once a bachelor’s degree has been conferred.

The awarding of the AA degree does not alter the calculation of the cumulative GPA at Florida State University. Certification for the AA degree in no way affects the requirements of individual colleges for the completion of the major/minor for a baccalaureate degree.

Students interested in receiving the AA degree and who are completing or have completed all the requirements listed above must officially apply at the Office of Undergraduate Studies.

**The Baccalaureate Degree**

Florida State University’s general requirements for all baccalaureate degrees (bachelor’s degrees) are listed at the beginning of this chapter under “General Requirements.”

**Graduation Checks**

All undergraduate students must request a graduation check from the Office of the University Registrar, Graduation Section, A3000 University Center. This check will be an overview of university requirements needed for graduation. This request should be made at the time the student has earned ninety semester hours of credit or two terms prior to the planned graduation date.

Request for a graduation check of major requirements must be made to the student’s academic dean one term prior to graduation. If a graduation check has not been requested by the time the student reaches one-hundred semester hours (hours earned plus current enrollment to equal 100), a stop will be placed on the student’s future registration.

**Application for Graduation**

Application for a degree must be made by the date stated in the academic calendar in this General Bulletin during the term in which the student expects to graduate. Students can apply for graduation online through the Apply for Graduation link under Course Quicklinks on the myFSU portal (http://my.fsu.edu). If the student is unable to graduate at the end of the term for which application was made, he/she must reapply for the degree no later than the deadline for the next term in which he/she expects to graduate.

**The Bachelor of Arts Degree**

The Bachelor of Arts (BA) degree requires all the general criteria listed at the beginning of this section, and:

1. Completion of a classical or modern foreign language through the 2000 level (2200 or equivalent course)
2. Nine semester hours in the fields of humanities and history, in addition to the liberal studies and the foreign language requirement; Courses may be selected from the following colleges, and departments: College of Fine Arts; College of Music; College of Communication and Information (not including work in communication disorders or
The Bachelor of Science Degree

The Bachelor of Science (BS) degree requires all the general criteria listed at the beginning of this section.

Second Baccalaureates and Second Majors

Students should note that there is a difference between a second major and a second baccalaureate degree.

Students may receive a second baccalaureate degree provided that: (1) the requirements for each major/minor as well as individual college requirements for both the first and the second degrees are satisfied; and (2) thirty semester hours in residence are completed, in addition to the hours required for the first degree. The additional thirty semester hours must be completed in residence after the completion of the first degree. Hours earned by the student during the completion of the first baccalaureate degree, over and above those extra credit hours actually required for the first degree, may not be included in the thirty semester hours. There are no liberal studies requirements for the second degree.

To obtain a second major, one must meet all requirements of the college of the primary major but only the major requirements of the secondary major. For information about the second major see “Second Majors and Academic Regulations” in the “Academic Regulations and Procedures” chapter of this General Bulletin.

University policy prohibits the awarding of more than one degree from a specific degree program due to the overlap of core requirements of that degree program. Students should seek guidance from their advisors or their college when choosing to pursue a double major or dual degree. This policy applies to both current and readmitted students.

Dual degrees and double majors must be declared by the end of the semester in which a student will earn ninety cumulative credit hours toward their degree program at Florida State University. In special circumstances, students may petition their primary academic dean for an exception. If a dual degree or double major is declared, but not completed, the student will not be eligible for a refund of excess credit charges accrued while working on their dual degree or double major.

Degrees of Distinction

Three degrees of distinction are granted to all native graduating students based on all college-level work attempted (excluding physical education activity courses) and including the term’s work in which baccalaureate degree requirements are completed:

- **Cum Laude** for an overall average of 3.500
- **Magna Cum Laude** for an overall average of 3.700
- **Summa Cum Laude** for an overall average of 3.900

Degrees with distinction are granted to transfer students who meet all three of the following requirements:

1. The student must complete at this University at least forty semester hours of letter-graded work, including the final term’s work.
2. The student must have the required minimum grade point average for each distinction level on all work taken at this University.
3. The student must have the required overall grade point average on all work attempted, including any transfer credit excluding any physical education activity courses or vocational courses, regardless of how many years have elapsed since the credit was earned. Transfer credit cannot raise a student’s Florida State University grade point average. Therefore, if the transfer grade point average is higher that the Florida State grade point average, the level of distinction will be based on the Florida State grade point average.

Graduation “With Honors”

Students who complete and successfully defend an upper-division honors thesis or equivalent honors projects (as defined by individual departments offering honors in the major) will graduate with the designation “With Honors.” Students may graduate with one of the three degrees of distinction described above and “With Honors.” The “University Honors Program and Honor Societies” chapter of this General Bulletin fully describes the Honors in the Major Program.

Policy for Awarding Degrees

Florida State University helps students meet their academic goals by monitoring academic progress toward their degree.
FINANCIAL INFORMATION, TUITION, FEES, AID, SCHOLARSHIPS, AND EMPLOYMENT

Financial Information, Tuition, Fees, Aid, Scholarships, and Employment

Assistant Vice President and Controller: Michael Williams; Vice President for Finance and Administration: Kyle Clark; Associate Controller, Office of Student Business Services: John Bembry

General Information
Tuition and fees are collected by the University Controller’s Office of Student Business Services. Payment of registration fees and tuition detailed below is an integral part of the registration process. Academic progress will be stopped and official University documents and services (transcripts, diplomas, registration, etc.) withheld if tuition and fees are not paid within the established time frame listed.

Tuition Payments and Arrangements. The student’s user name and password are required to access the Online Statement at http://my.fsu.edu (from myFSU Student Portal, click $ Make a Payment). Tuition and fees are due according to the established deadline at http://www.sfs.fsu.edu. Financial aid is disbursed during the second week of the semester, and as received thereafter. We encourage students to submit their third-party agency billings as soon as they have registered for classes. All third-party agency billings, departmental billings, FSU employee scholarships, and Veteran’s deferments are due by the third day of classes each semester. State employee tuition vouchers are due on the fifth day of classes each semester.

Assessment of Fees. Fees are established by the Florida State University Board of Trustees and the Florida State Legislature and are subject to change. The University will calculate and assess the charges to be settled for fees due based on the fee rates authorized by the Florida State University Board of Trustees and the student’s schedule. Students should review their Account Summary at http://my.fsu.edu (from myFSU Portal) to verify the accuracy of the charges. At the time of payment, students should also review their payment receipt to verify the payment made, any outstanding charges owed, or any outstanding arrangements. Credit and debit card payments can be made at http://www.feest.fsu.edu. Students who do not pay tuition and fees or make payment arrangements by the established deadline for each term will be assessed a $100.00 late payment fee and may have their course schedule cancelled.

Florida Residency Requirements for Tuition Purposes Policy

The Florida Residency for Tuition Purposes Policy is based upon state statute, rules of the two higher education governing boards in Florida, and state-wide guidelines developed by college and university administrators in conjunction with the Statewide Residency Committee and the Florida Department of Education. Section 1009.21, Florida Statutes, outlines the broad legal parameters for establishing residency for tuition purposes in Florida public higher education institutions. It is the highest level of authority regarding residency as established by the Florida Legislature. This statute also provides authority for the Department of Education to establish rules related to residency for tuition purposes.

At Florida State University there are four offices responsible for the review of residency for tuition purposes: the Office of Admissions, College of Law, College of Medicine Admissions, and the Office of the University Registrar. The first three offices determine residency for all first-time-on-campus students; the Office of the University Registrar is the only office to which students may apply for reclassification of residency once they are enrolled. First-time-on-campus or readmitted students will be classified in accordance with the information on their applications, including the “Florida Residency Declaration for Tuition Purposes.” The University reserves the right to request additional information if warranted.

For the full text of Florida Statute, Section 1009.21: https://www.flsenate.gov/Laws/Statutes/2014/1009.21
For the full text of State Board of Education Rule 6A-10.044: https://www.flrules.orggateway/RuleNo.asp?ID=6A-10.044

Residency Guidelines
A Residency Guidelines document was adopted by the Articulation Coordinating Committee to assist college and university administrators in implementing Florida Residency for Tuition Purposes Policy. The Guidelines are maintained by the Statewide Residency Committee which is comprised of residency experts from the state’s public colleges and universities.

For the full text of the Guidelines on Florida Residency for Tuition Purposes, visit https://www.fwc.org/partner-portal, go to the ‘College and University Academic and Profession Staff” section, and look at the link marked “Guidelines on Florida Residency for Tuition Purposes.”

Basic Definition of Residency for Tuition Purposes

A Florida resident is a student who has, or a dependent person whose parent or legal guardian has, established and maintained legal residency in Florida for at least twelve months preceding the first day of classes of the term for which residency is sought. Residence in Florida must be as a bona fide domicile rather than for the purpose of maintaining a residence incident to enrollment at an institution of higher education. To qualify as a Florida resident for tuition purposes, the student must be a U.S. citizen, permanent resident alien, or in legal status as determined by U.S. Citizenship and Immigration Services (USCIS).

Other persons not meeting the twelve-month legal residency requirement may be considered as Florida residents for tuition purposes only if they fall within one of the exception categories authorized by the Florida Legislature and State Board of Education. All other persons are ineligible for classification as a Florida resident for tuition purposes.

Living in or attending school in Florida will not, in itself, establish legal residence for tuition purposes. Each student shall submit a Florida Residency Declaration, electronically or in other form, and the documentation required to establish Florida residency for tuition purposes. The burden of providing clear and convincing documentation that justifies the University’s classification of a student as a resident for tuition purposes rests with the student. For documentation to be “clear and convincing,” it must be credible, trustworthy, and sufficient to persuade the University that the applicant has established legal residency in Florida. Students who depend on out-of-state parents for support are presumed to be legal residents of the same state as their parents.

Tuition and Instructional Fees

The “Academic Calendar” appearing in the Registration Guide each term sets forth the beginning and ending dates of each term and all deadlines.

Students enrolled in cooperative education courses with zero semester hours will be charged for one semester hour of Florida resident undergraduate work, unless also enrolled in other credit courses at Florida State University during the same academic term.

Students registered in courses for zero semester hours (master’s comprehensive examination, master’s thesis defense, dissertation defense, or other graduate-level zero semester hour courses) will be charged for one Florida resident graduate semester hour, unless also enrolled in other credit courses at Florida State University during the same academic term.

Special Fees, Fines, and Penalties

Note: All fees subject to change.

Application Fee: $30.00. Applicants for admission as degree-seeking or non-degree-seeking are assessed a nonrefundable application fee.

Admission Deposit: $200.00. Admitted freshman and law school students who plan to attend Florida State University must pay a nonrefundable fee that will be applied to their tuition.

New Student Orientation Fee: $35.00. This fee is assessed when new students register to attend the required University orientation program. Some orientation programs may have additional costs, based on the classification of the entering student, meals, and lodging, and the optional attendance of family members. These are nonrefundable fees.

Late Registration Fee: $100.00. A late registration fee is assessed when a student does not begin registration during the time provided under the academic calendar.

Late Payment Fee: $100.00. A late payment fee is assessed against students who do not pay their tuition in full by the required due dates (see the “Academic Calendar” in this General Bulletin).

Florida State University Identification Card (FSUCard): $10.00. This fee is assessed against first-time FSUCard recipients, including high school students. This fee may be paid when tuition is paid.

FSUCard Term Fee: An FSUCard semi-annual fee of $5.00 applies to all main-campus students each Fall and Spring semester.

Replacement FSUCards: $15.00. A fee for the preparation of a new card is assessed against those students, including high school students, who lose their FSUCards.

Duplication/Photocopying Fee: At cost. A fee is assessed for duplicating or photocopying documents.

Standard Tests Fee: At cost. A fee is assessed for test materials and related factoring or grading charges levied by an external agency used in standardized tests, such as the Graduate Record Examinations.

Transcript Fee: $5.00. This fee is assessed for each official transcript issued.

Installment Contract Fee: $10.00 per contract. This fee is assessed for executing an installment contract for tuition payment available during Fall and Spring semesters only.

Transportation Access Fee: $8.90 per credit hour. Rate subject to change.

This fee is assessed per credit hour to all main campus students. It covers all modes of transportation on campus such as sidewalks, bikes, mass transit (on- and off-campus buses), and vehicles. Revenue generated by this fee is used to improve the overall infrastructure of campus for all students. For additional information about parking locations, rules, regulations, and rates, go to http://transportation.fsu.edu.

Returned Check Charge/Stop Payment Charge: $25.00 or five percent of the amount of the check, whichever is greater (rate subject to change). A returned check/stop payment charge is assessed against the account of a student who has a check or electronic authorization for payment returned by the bank to Florida State University. Florida State University automatically submits all personal checks twice for payment if the check was returned once for insufficient or uncollected funds. This is an automated process, and the second submission cannot be stopped; however, there is no charge assessed by Florida State University for this second submission.

Returned check charges are assessed for all personal checks written and electronic payments authorized for tuition, fees, or any services provided by the University that are returned to Florida State University for insufficient funds, uncollected funds, wrong account numbers, closed accounts, and stop payments placed on checks. In addition to the returned check charge, if the initial payment is for tuition and redemption of the returned item is not made prior to the tuition payment deadline, a late payment fee is assessed to tuition and student may be subject to tuition cancellation. Florida State University places a hold on accepting any personal checks or electronic payment authorizations from anyone on the student’s account for ninety days after redemption for any services, tuition, or fees that are owed to the University if a personal check or electronic payment is returned. Redemption must be paid with cash, money order, or cashier’s check. If a second check is returned or a stop payment is placed on it, the student will be permanently listed on all departments’ ACCEPT CASH ONLY list, and no personal checks will be accepted from anyone on the student’s account from that day forward.

Notification will be sent to the student via mail to the address on the check or to the last maintained address in Florida State University’s records. A copy of the notification letter will be sent to the maker of the check at the address on the check, if the student is not the person on whose account the funds are drawn. After notification that a check has been returned, redemption including the service charge must be made by seven working days with cash, money order, or cashier’s check. Florida State University forwards all returned checks to the State Attorney’s office for redemption and prosecution after collection efforts are exhausted. After a returned check is forwarded to the State Attorney’s office, redemption of the check will not prevent prosecution.

Thesis, Treatise, and Dissertation Fees: All Thesis, Treatise, and Dissertation students are required to submit their manuscripts to ProQuest directly. There is no fee associated with traditional publishing. Students may choose to pay a copyright fee, an open access fee, or may order bound copies, if desired.

• Copyright Fee: Optional through UMI/ETD Web site, at cost.

• Open Access Fee: Optional through UMI/ETD Web site, at cost.

Loss and Damage Fees: At cost. Students who lose or damage equipment may be assessed a breakage or loss fee to pay for breakage or loss of equipment. Upon completion of the course, the instructor will prepare a listing of the cost of all such lost and damaged equipment and assess the student a loss or damage fee. The charge varies, based on the cost of the item, and generally applies to students taking laboratory courses.

Scientific Laboratory Fees: Varies. Students enrolled in certain laboratory courses are assessed a fee that is used to offset the cost of scientific materials or items consumed in the course of the students’ laboratory activities. These fees are assessed based on the course.

1 The tuition and fee estimate is based on fifteen semester hours for undergraduate students attending two terms (Fall and Spring) per year at the Tallahassee campus. Refer to the Student Business Services Web site at http://www.fsfu.edu for tuition rates for all campuses or specific programs.
2 The Tuition Differential fee applies to all undergraduate students (or graduate students if enrolled in an undergraduate class) who begin enrollment after 7/2007 (exception - students who have Florida Pre-Paid Tuition plan active as of 7/1/2007). Students who have been continuously enrolled prior to 7/2007 or who have active Florida Pre-Paid Tuition contracts purchased prior to 7/2007 may be eligible for a waiver of the Differential Fee.
3 Students at the Tallahassee campus may refer to http://housing.fsu.edu for on-campus rental rates.
4 Refer to http://www.seminolehousing.com for all meal plan options.
5 Cost of meeting this requirement is included in financial aid considerations. Students who currently have health insurance may show proof of comparable coverage and may not be required to purchase the University policy. Refer to http://www.uhs.fsu.edu for additional information.

Payment of Fees

Payment of registration fees and tuition detailed below is an integral part of the registration process. Registration (including payment of fees) must be completed on or before the proper due date. The appropriate University office must be provided a properly executed authorization to defer fees prior to the deadline published in the academic calendar in those cases where fees are to be paid by a previously approved loan, scholarship, or other third-party arrangement. Florida Prepaid College Program without local fees does not pay for subsequent semesters; consequently, the student will be required to pay tuition by the regularly scheduled deadline, and the University will refund to the student the amount that the agency pays (less University charges) after they have paid it. Students with agency payments that are contingent upon grade(s) received are not eligible for agency billing, and tuition must be paid in full within five days. It will not be covered under the previously executed contract. Failure to pay tuition in full for such a course will result in the assessment of a late payment fee.

Installment Contracts

The Student Business Services Tuition Installment Contract is the only form of tuition payment “plan” that the University offers. This plan is only available in the Fall and Spring terms. A Tuition Installment Contract is the only form of tuition payment “plan” that the University offers. This plan is only available in the Fall and Spring terms. Students must pay half (tuition and fees greater than $150.00) of their currently owed tuition, plus a $10.00 Installment Contract Fee, by noon on the main campus tuition payment deadline. The second half of the installment payment is due by the sixth week of class. The installment contract agreement may be executed in person or by calling Student Business Services. Failure to pay the balance of tuition by the due date will result in a late payment fee and a financial hold on your account and may result in the cancellation of your course schedule. Once an installment contract is executed, any course added at a later date must be paid in full within five days. It will not be covered under the previously executed contract. Failure to pay tuition in full for such a course will result in the assessment of a late payment fee.

Convenient Drop Box for Payments

The Office of Student Business Services has kiosks for student use at the first floor of the University Center Building A, near our office at A1500. Students may verify the amount due for tuition and fees (at the kiosks or through the Internet at http://www.fsfu.edu), insert a check, money order or cashier’s check in the provided envelope, and put the envelope in the drop box. Payments are processed the next business day. A late payment fee will be assessed by the fee payment deadline as posted at http://www.fees.fsu.edu or at kiosks located around campus. There is a $7.75 nonrefundable flat fee for each transaction.

Method of Payment

Students who enroll must pay fees and tuition in full, or initiate an installment contract by the tuition payment deadline. We encourage students to submit their third-party agency billings as soon as they have registered for classes. All waivers, agency billings, and department billings for all students must be submitted by the third day of the term. Financial aid depositories will be entered by the Office of Financial Aid for eligible student accounts. If tuition is not paid or arrangements have not been made by the posted deadlines, a late payment fee will be assessed. Any course added after the tuition payment deadline must be paid in full within five days or a $100.00 late payment fee will be assessed. The University does not send out a bill because students may change their course schedule and therefore the amount owed through the fourth day of the semester will be inaccurate. Tuition and fees should be paid by the fee payment deadline as posted at http://www.fsfu.edu. Note that online university-related fees have separate and earlier deadlines. Students can, however, get the amount of their tuition and fees due on the Internet at http://my.fsu.edu (from myFSU Student Portal, click Make a Payment) or when they register for classes through the Web. Other options include accessing the kiosks located on the first floor of University Center A Building, calling the Office of Student Business Services at (850) 644-9452, or going to A1500 University Center, 8:30 a.m.–4:30 p.m. Monday–Friday.

Students may pay by check, cash, money order, cashier’s check, or FSUCard when paying in person. Florida State University does not accept two-party checks or foreign checks for payment. Make checks payable to Florida State University and include one of the following on your check: your EMPLID, the last four digits of your social security number, or your FSU e-mail address, your driver’s license number, as well as your local phone and address. We accept FSUCards, American Express, Discover, MasterCard, Visa, and electronic checks via Internet only. Payment methods are described below. Credit card payments can only be made through the Internet at http://www.fees.fsu.edu or at kiosks located around campus. There is a $7.75 nonrefundable flat fee for each transaction.

Agency Billing

Students are responsible for all tuition and fees upon registration. Forms are available at http://www.sfs.fsu.edu. Students who are requesting their tuition paid by an agency must submit the required documents as soon as possible, but no later than the third day of the semester, and preferably thirty days in advance. Those students receiving financial aid should submit the documents by the third day of the semester; otherwise, tuition will be deducted from the student’s financial aid and refunds will not be made to the student until the agency or department makes their payment to the Office of Student Business Services. Financial aid students must report this payment as an income source on their application, or upon further evaluation by the Office of Student Financial Aid, the student may be “over-awarded” and may be required to repay financial aid to the University. If the agency or department has not paid the tuition by the end of the current semester, a late payment fee of $100.00 will be assessed to the student’s account and the student is required to pay the balance of tuition and fees by the due date. The Office of Student Business Services will not be able to receive University services (registration, transcripts, diplomas, etc.) Agencies that do not pay in a timely manner may cause the Office of Student Business Services to put the student’s account in a non-billable status for subsequent semesters; consequently, the student will be required to pay tuition by the regularly scheduled deadline, and the University will refund to the student the amount that the agency pays (less University charges) after they have paid it. Students with agency payments that are contingent upon grade(s) received are not eligible for agency billing, and tuition must be paid by the regularly scheduled deadline. The Office of Student Business Services does not bill agencies for housing, books, meals, etc.

Departmental Billing

Departmental billings must be submitted to the Office of Student Business Services by the appropriate college or school by the third
day of each semester. Financial aid students must report this payment as an income source on their application, or, upon further evaluation by the Office of Student Financial Aid, the student may be “over-awarded” and may be required to repay financial aid to the University. For information regarding departmental billings, undergraduate students should contact the Office of Faculty Development and Advancement at (850) 644-6876; graduate students should contact the Dean of the Graduate School at (850) 644-3501.

State Employee Registration

Full-time state employees may use the state employee tuition waiver to register for Florida State University classes. Registration in classes using the state employee tuition waiver is limited to a space-available basis. Individuals using the state tuition waiver must be fully admitted degree-seeking or non-degree students. Florida State University does not consider the following to be space-available courses: limited access programs; remedial courses; dissertation, thesis, and directed individual study (DIS) courses; internship courses; distance learning courses; online courses; Center for Academic Professional Development (CAPD) courses; College of Medicine courses; College of Law courses; all graduate program courses in the College of Business; and other one-to-one instruction courses. Accordingly, state employee tuition waivers may not be used for these courses.

Florida State University accepts only the official FSU State Employee Tuition Waiver form. Agencies may require additional paperwork or forms that will not be accepted at Florida State University unless accompanied by the FSU State Employee Tuition Waiver form.

State employees using a tuition waiver must complete the registration process and submit the tuition waiver to the Office of the University Registrar on the fifth day of classes only. State employee tuition waivers may not be used for any course that is registered for prior to this space-available registration window. Thus, for any class obtained prior to the fifth day of classes, the student assumes personal financial liability for tuition.

Additional instructions and deadlines apply. See the Office of the University Registrar’s Web site at http://registrar.fsu.edu/services/emp_tuit_waive for additional information, including the link to download the State Employee Tuition Waiver form.

Panama City Campus

Students who intend to enroll at the Panama City campus of Florida State University may pay their fees at: Cashier’s Office, 4750 Collegiate Drive, Panama City, FL 32405. Students may pay by check, cash, money order, or cashier’s check when paying in person. Credit card payments can ONLY be made via the Internet at http://www.fees.fsu.edu. There is a non-refundable flat fee for each transaction. Accepted forms of online payment include: American Express, Discover, MasterCard, Visa, and electronic checks. For further information, please call (850) 770-2119 or e-mail cashier@pc.fsu.edu.

Florida Prepaid College Program

This program was created by the State of Florida to guarantee payment of tuition and may include optional dormitory contract guarantees and an optional local fee plan. The primary plan excludes local fees and other fees (i.e., health, athletics, student activity, laboratory, transportation access, technology, student facilities use fee, and books) that are to be paid by the student using one of the options described above and by the deadlines stated above. The student is to verify that the billing is being processed by going to http://my.fsu.edu (from Student Account Quicklinks, click Account Statement). Students using the Florida Prepaid College Program are responsible for paying local fees and student fees by the tuition payment deadline of the main campus semester or they will be assessed a $100.00 late payment fee. (Rate subject to change.) Fees applicable to the 2015-2016 academic year had not been confirmed by the Florida Legislature at the time this document was published. Additional information may be obtained by writing: Florida Prepaid College Program, P.O. Box 6448, Tallahassee, FL 32314-6448 or by calling 1 (800) 552-4723 or at http://www.myfloridaprepaid.com/.

Fee Liability

Liability is incurred for all credit hours at the time of registration for classes. The student is responsible for dropping classes or withdrawing from school. For more information on policies regarding attendance and schedule cancellation, please refer to the section on ‘Cancellation of Student Schedules for Non-Payment of Tuition and Fees’. Out-of-state tuition and matriculation fee waivers will not cover dropped or withdrawn classes.

Repeat Course Surcharge

Section 1009.29, Florida Statutes, mandates that each student attempting the same non-repeatable undergraduate course more than twice beginning with the Fall Semester 1997 shall be assessed an additional per credit hour surcharge beginning with the third attempt. Attempted hours include those hours dropped, withdrawn, and repeated under FSU forgiveness that are fee liable. Undergraduate level courses are numbered 1000 to 4999.

Effective Fall 2011 Semester, the repeat course surcharge was $159.87 per credit hour.

Note: The rate is subject to change for the 2015-2016 academic year.

The only exceptions:

- Any course taken prior to Fall 1997;
- Attempts taken at an institution other than FSU;
- Graduate level courses (courses numbered 5000 and above);
- Any non-fee-liable course dropped or withdrawn;
- Courses taken through cooperative education, military, waivers, and audits; and,
- Individualized study, courses that are repeated as a requirement of a major, and courses that are intended as continuing over multiple semesters. However, courses repeated more than two times to increase GPA or meet minimum course grade requirements are eligible for the surcharge.

Repeat Course Surcharge Appeal

Section 1009.285, Florida Statutes, provides authority to universities to consider appeal of the repeat course surcharge based on documented evidence of financial hardship. Appeal forms are available in the Office of the Registrar, A3900 University Center, Tallahassee, Florida 32306-2480, (850) 644-3403. Appeals must be submitted to the Office of the University Registrar no later than the last day of classes for the term in which the surcharge is assessed.

Excess Credit Hour Surcharge

Section 1009.286, Florida Statute, mandates that each student shall be assessed an additional per credit hour charge equal to fifty percent of one hundred percent of the tuition for each hour in excess of a specified percentage of the total number of credit hours required to complete the baccalaureate degree, depending on their first term of enrollment in a post-secondary institution. This law is in effect for students who began their postsecondary education at any institution Fall 2009 or later. Any break in continuous enrollment requiring readmission or reinstatement may cause the student to be subject to current legislative Excess Credit policies and fees.

<table>

</tr>
</tbody>
</table>

Credit hours earned under the following circumstances are included in the calculation of the threshold for surcharge assessment, unless they otherwise meet one of the exception criteria provided for in statute:

- Failed courses;
- Hours dropped after the Universities’ drop/add period;
- Courses for which a student withdraws;
- Repeated courses, except repeated courses for which the student has paid the repeat course surcharge as provided in Section 1009.285, Florida Statutes;
- All credit earned at another institution and accepted for transfer and applied toward the baccalaureate degree program.

Credit hours earned under the following circumstances are not included as hours earned toward the baccalaureate degree for purposes of determining the threshold for surcharge assessment. They may otherwise count toward and satisfy university, college, or departmental hour requirements according to University policy:

- College credit earned through articulated accelerated mechanisms such as AP, IB, CLEP, dual enrollment, national standardized tests (ACT or SAT), etc. as defined in Section 1007.27, Florida Statute;
- Credit hours earned through internship;
- Credit hours required for certification, recertification, or certificate programs;
- Courses from which the student withdraws for reasons of medical or personal hardship;
Delinquent Fees

Students who have amounts owed to the University may not complete their registration, participate in graduation ceremonies, receive a diploma, receive an associate in arts certificate, view grades, or receive a transcript until all amounts owed to the University have been satisfactorily settled. This includes, but is not limited to, library charges, health center charges, parking fines, and University debt. All payments will be applied to the current tuition first and then to the oldest outstanding debt. Nonrefundable collection fees, as well as legal fees and interest assessment through court judgments, are added to a student’s account if the student has had an outstanding debt for 120 days or longer. When an account is sent to a collection agency, the customer must make payment arrangements directly with the agency. Payment arrangements do not permit student privileges such as registration, official transcripts, etc. Accounts must be paid in full to obtain further privileges.

Registration Stop for Outstanding Charges

A “stop” is placed on all academic progress for those students who have outstanding charges due to the University. Students owing any amount, including current semester tuition, are not permitted to register for classes. The “stop” will not be removed, and such students will not be permitted to register or receive other University services, until the debt is cleared.

Cancellation of Student Schedules for Non-Payment of Tuition and Fees

In accordance with Florida State University Regulation 6C2R-2.0248, students who do not pay tuition and fees or make arrangements for tuition and fee payment by the published deadline each semester may have their schedules canceled. Students will be notified using their FSU e-mail account concerning outstanding tuition delinquencies and given an opportunity to pay tuition and fees or make arrangements for tuition and fee payment with the Office of Student Business Services prior to cancellation. Students whose schedules are canceled for non-payment of tuition and fees will have their academic progress discontinued for the term in question and will not be able to attend class or receive grades.

Reinstatement of Student Schedules Canceled for Non-Payment of Tuition and Fees

Students whose schedules are canceled for non-payment of tuition and fees may appeal to the University Registrar for reinstatement and continuation of academic progress for the term. A written appeal must be submitted to the University Registrar by the end of the seventh week of the Fall and Spring semesters (consult the Registration Guide for Summer term deadlines). Prior to a student’s appeal being approved, the Office of Student Business Services must verify that payment for the current term has been received or that appropriate arrangements have been made for tuition and fee payment. Students whose schedules are reinstated are subject to a $100.00 late registration fee and a $100.00 late payment fee. Check or credit card payments that are returned or refused will negate any tuition payment agreement for the reinstatement of a student’s schedule. The University reserves the right to deny reinstatement when a demonstrated pattern of tuition delinquencies over two or more semesters has occurred.

Tuition Waivers, Deferments, and Financial Arrangements

Out-of-State

In the interest of the general welfare of the State of Florida, and in order for Florida to contribute to the fulfillment of national and international obligations, the State Board of Education authorizes the University to waive portions of out-of-state tuition for a limited number of students in specific categories. Students in the following categories may apply:

• Out-of-state graduate students having at least a one-quarter time assistantship (teaching or research) or a fellowship equivalent in value to at least a one-quarter time assistantship
• Foreign student programs, or student exchange programs
• Students having special skills in music, dance, theatre, or athletics
• Graduate students with outstanding academic credentials and abilities

Special and part-time students at the undergraduate and graduate level are not eligible for out-of-state tuition waivers. Tuition waivers must be submitted by the appropriate college or school preferably by the fourth day of each semester but definitely no later than the fifth class day of the semester. Tuition waivers do not cover the total amount of fees due and may have an effect on financial aid awards. For information regarding out-of-state waivers, undergraduate students should contact the Vice President for Faculty Development and Advancement; graduate students should contact the Dean of the Graduate School. Tuition and fees not covered by waivers must be paid in full by the deadline as posted at http://www.sfs.fsu.edu.

Florida Residents Over 60 Years of Age

When registering to audit courses not for credit, all fees are waived for citizens sixty years of age and older who are Florida residents. All requirements pertaining to auditing courses must be met, and, in addition, proof of age and residency must be presented. For further information, refer to the “Academic Regulations and Procedures” chapter of this General Bulletin.

Note: Audited courses do not earn credit hours or appear on a student’s permanent record.

Policy Concerning Late Fees

A student may request a waiver of the late registration fee at the Office of the University Registrar. Documentation supporting University error or extraordinary circumstances will be required.

A student may request a waiver of the late payment fee at the Office of Student Business Services if payment was not made by the established deadline because of a University error, administrative error, or extraordinary circumstances beyond the control of the student. Supporting documentation is required.

Note: Lack of funds, not applying for financial aid on time, or not being aware of the payment deadline are not valid reasons for waiving the late fee. Request to waive late payment fees must be completed as a waiver request form online at http://my.fsu.edu (from Student Account Quicklinks, click ‘Forms’). If the request is denied, the student may appeal to the Late Payment Fee Appeals Committee by contacting the Office of Student Business Services at (850) 644-9452. The committee meets once a month or as needed.

The Late Payment Fee Appeals Committee, which consists of representatives from the Office of the University Registrar, Office of Financial Aid, and the Office of Student Business Services, provides an opportunity for students to appeal a denial of their request for a late payment waiver. The appeals committee’s decision is the final step in the University’s late payment appeal process. Forms are available through the Internet at http://www.sfs.fsu.edu.

Deferments and Financial Arrangements

Financial aid is disbursed during the second week of the semester. Students must pay or make arrangements to pay all fees due by the tuition payment deadline.

Financial aid deferments are authorized by the Office of Financial Aid. Departmental billings are authorized by the school or college issuing the billing. Agency billings are authorized by the approved agency to pay fees on behalf of the student. The third party billings are to be completed by the student at A1500 University Center no later than the third day of the term. Outstanding tuition from a previous semester will be deducted from financial aid received during a current semester. A refund will not be processed until payment is made by the agency or department. Agency billing forms are available through the Internet at http://www.sfs.fsu.edu.

Veterans Deferments

A student in training under the auspices of the Veterans Administration receives an education and training allowance each month from the federal government. Since the first subsistence checks are sometimes delayed, it is advisable for the veteran to be prepared to meet all expenses for about two months.

Tuition and health fees for students receiving assistance from the Veterans Administration in accordance with provisions of Section 1009.27(2), Florida Statutes, may be deferred each time there is a delay in the receipt of benefits. This deferment is not automatic and must be explicitly requested by eligible students through the Office of Veterans Affairs, Office of the University Registrar, by the third day of the semester. Students with financial aid pending will have their tuition paid by their financial aid and will have their veteran’s deferments nullified.

Note: If a student receives a veteran deferment and tuition is still not paid by the deferment expiration date, the student will be assessed a $100.00 late payment fee and may have his or her course schedule cancelled. Moreover,
such students will not be eligible to receive a veteran deferment in the future. Registration, transcripts, and diplomas will not be processed until debts are paid in full.

Application Fee

Individuals who submit an application to Florida State University shall pay a nonrefundable application fee of $30.00. This fee may be waived for freshman applicants who can document that they have received a fee waiver because of economic need as determined by the College Board or the American College Testing Program, or for graduate applicants in designated sponsored programs.

Refund of Fees

Regulations Concerning Refund of Fees Paid

Students incur a liability for all credit hours that remain on their schedule of courses as of the end of the official drop/add period. The amount of this liability is identified on the Student Assessment Payment Schedule. Any amount paid in excess of the amount owed (assessed fees and outstanding University charges) during the term will be carried forward and will be applied against subsequent University charges incurred or may be refunded by request.

Full refunds of tuition fees may be granted in instances of withdrawal from the University under the following conditions:

1. Voluntary call to active military duty
2. Death of the student or death in the immediate family (parent, spouse, child, sibling)
3. Illness of the student of such duration or severity, as confirmed in writing by a physician, that completion of the term is precluded
4. Cancellation of the course by the University
5. Exceptional circumstances that could not have been foreseen and were beyond the control of the student, as approved by the University refund committee.

Students who drop a course without fee liability after their tuition and fees are paid may be eligible for a tuition refund. Any amount paid in excess of the amount owed to the University during the semester/term will be carried forward and may be applied against subsequent University charges incurred or will be refunded upon request; however, any outstanding charges owed to the University will be deducted and the balance will be issued as a refund. At the beginning of a semester, refunds will not be processed until the end of the third week of class to ensure that all checks have cleared the bank. Refunds requested during the fiscal year close-out, during the last two weeks of June, will not be processed until the first week of July. The refund will be processed as a credit to the student’s FSU Card account for currently enrolled students, unless the student requests a check to be mailed to the address on file. However, payments made by credit card will be refunded to the credit card. Checks will be mailed to those students who are no longer enrolled.

Students who withdraw after the fourth day of the semester/term but prior to the end of the fourth week of the semester (or for summer sessions by the first twenty-five percent of the term) are eligible for a twenty-five percent refund of tuition and fees. After this period, students who withdraw are held fully liable for fees. Students who withdraw and have received federal financial aid (Title IV programs), state or university aid may be required to repay to the aid source the amount of unearned financial aid funds disbursed to them as of their withdrawal date as described in the section on ‘Withdrawals and Return of Financial Aid.’

Note: In the case where a withdrawal petition is approved, a refund can only be provided if the refund withdrawal request is submitted within six months after the end of the semester/term in which the withdrawal occurred. If financial aid is received by the student during the term in which the refund is granted, state and federal regulations may require that the refund be returned to the aid source.

An application for a request for refund of fees should be submitted as follows:

- Tuition Fees. Office of Student Business Services, A1300 University Center, http://www.sfs.fsu.edu
- Food Plan. Director of Food Services, 144 Oglesby Union
- Housing Fees. Assistant Director of Housing for Contracts and Assignments, 109 Student Life Building
- Parking Decals. Director of Transportation & Parking Services, 104 North Woodward Avenue
- Textbooks. Manager of Florida State University Bookstore, Parking Garage, Main Level

Withdrawal and Return of Financial Aid

Effective Fall 2014, per 34 CFR 668.22, students who withdraw and have received financial aid will be required to repay to the program sources the amount of unearned financial aid funds disbursed to them as of their withdrawal date. The unearned amount of program funds are calculated based on the last date of academic activity which indicates the percentage of the semester completed.

Both the University and students receiving financial aid are required to repay the unearned financial aid to the aid source. Title IV aid programs are re-paid in the following order: Unsubsidized Stafford/Direct loans, Subsidized Federal Stafford/Direct loans, Federal Perkins Loans, Federal PLUS/Direct PLUS loans, Federal Pell Grants, Academic Competitiveness Grants, National SMART Grants, FSEOG Program Aid, and Teach Grants.

The University is required to return the unearned portion of the financial aid funds it received from withdrawing students that was used to pay institutional charges such as tuition, fees, housing, and other education-related expenses assessed by the institution. The funds returned to the aid source by the University will be credited against the students’ total liability of unearned funds. However, students will owe the University the amount returned to the aid source for institutional charges. In addition, any student who receives Title IV funds, stops attending classes during the semester, and does not officially withdraw from the University, is considered an unofficial withdrawal according to Title IV federal regulations. The University is required to return unearned financial aid to the federal government for all unofficial withdrawals in the same manner as students who withdraw officially.

Students must repay the unearned Title IV funds to any Title IV loan program in accordance with the terms of the loan. For Title IV aid programs, unearned grant-program funds are considered overpayments, and students are required to return fifty percent of the grant. Students who owe grant overpayments remain eligible for Title IV program funds for forty-five days if during those forty-five days the student: 1) repays the overpayment in full to the University; 2) enters into a repayment agreement with the University; or 3) enters into a repayment agreement with the Department of Education. Entering into a repayment agreement does not mean the student is eligible to register for additional classes, receive a transcript, diploma, etc. Students can lose financial aid eligibility if they do not comply with the options above and should consider their repayment responsibilities for these programs as part of any withdrawal decision. Please contact the Office of Financial Aid for the most current restrictions on eligibility.

Bright Future Repayment Requirement

Section 1009.53, Florida Statute states that funds for any scholarship within the Florida Bright Futures Scholarship Program may not be used to pay for courses dropped by a student or courses from which a student has withdrawn after the end of the drop and add period. However, a student who receives an award under this program and subsequently drops one or more courses or withdraws from all courses after the end of the drop and add period due to a verifiable illness or other documented emergency may be granted and exception pursuant to s. 1009.40(1)(b)4., unless the institution’s policy is to refund the cost of the courses. The department shall notify eligible recipients of the provisions of this subsection. Each institution shall notify award recipients of the provisions of this subsection during the registration process.

Student Cancellation of Schedule

A student may cancel registration during the first five days of a semester or Summer session by submitting a written request to the Office of the University Registrar, A3900 University Center, or to Withdrawal Services, A4300 University Center. Students who cancel their registration within this time frame are not liable for tuition; if tuition has been paid, such students should request a full refund of fees. Beyond the fifth day of the semester, a student cannot voluntarily cancel registration but must apply for withdrawal from the University. Students who cancel their registration and are not enrolled for the following term (not enrolled for two consecutive terms) must apply for readmission.

Financial Aid

Assistant Vice President - Financial Aid, Office of Financial Aid: Darryl Marshall; Senior Associate Director of Financial Aid: Somnath Chatterjee

General Information

Florida State University recognizes the high cost of education today and makes every effort to offer financial assistance through a variety of programs to qualified students. In addition to providing funds on the basis of demon-
strated financial need in the form of grants, work-study awards, and loans, the University offers scholarships to recognize and reward talent, academic achievement, and meritiorious performance.

The Office of Financial Aid is committed to serving and guiding students through the process of applying for financial aid. Help in completing the Free Application for Federal Student Aid (FAFSA) is available from professional financial aid counselors located in the University Center Building A, Room 4400.

After a student completes the FAFSA and is admitted, she or he can access the financial aid file and monitor its status by visiting http://www.my.fsu.edu/.

This site also provides information on any outstanding documents required to complete the financial aid file. Upon admission and completion of the financial aid file a student’s financial aid award may also be found on this site.

The hours of operation for the Office of Financial Aid are 8:30 a.m. to 5:00 p.m., Monday through Friday. Counseling is available by phone at (850) 644-0539 or at the information center A4400 University Center, Monday through Friday, 8:30 a.m. to 5:00 p.m.

Panama City Campus

Students who intend to enroll at the Panama City campus and are in need of financial support should contact: Coordinator for Financial Aid/Veteran Affairs, Office of Student Affairs, 4750 Collegiate Drive, Panama City, FL 32405, or by phone at (850) 872-4750.

Undergraduate Students

Undergraduate students may apply for many types of aid, including scholarships, grants, work study, and loans. To apply for federal and state grants, federal work-study, and/or federal loans, students must complete the Free Application for Federal Student Aid (FAFSA) at http://www.fafsa.ed.gov. Students who have previously completed a baccalaureate degree may not be eligible for all types of aid when seeking a second undergraduate degree.

Graduate Students

Graduate students may apply for federal loans and federal work-study by completing the Free Application for Federal Student Aid (FAFSA) at http://www.fafsa.ed.gov. Graduate fellowships and assistantships are awarded through the Graduate School and the respective academic departments.

Eligibility

Financial aid eligibility requirements normally include a minimum enrollment of twelve semester hours in a degree-granting program. Regulations governing federal and state financial aid programs require that students maintain satisfactory progress and good academic standing to receive financial aid. Twelve hours per semester constitutes a full-time load for graduate students and fellowship holders. Nine hours is defined as a full-time load for graduate assistantship holders on a quarter-time appointment or larger.

Deadlines

The federal financial aid application period for the 2015-2016 year begins January 1, 2015, and ends June 30, 2016. Some federal and institutional grant funds and federal work-study funds are limited, so students are encouraged to apply as soon as possible after January 1, 2015. Estimated student/parent tax data is needed for completion of the FAFSA document until current year taxes are filed. Once 2015 federal tax information is complete, it is recommended that applicants update their income information on the FAFSA through the use of the Federal Data Retrieval Tool, which is available as part of the FAFSA update application.

No additional application for financial aid is needed for Summer. Students enrolled in Spring terms will also receive a Summer financial aid award. Those not enrolled in Spring and who will attend Summer must contact the Office of Financial Aid to allow awarding.

Financial Aid Application Process

To apply for federal, state, and institutional aid at Florida State University, students must complete the Free Application for Federal Student Aid (FAFSA). Students are encouraged to apply directly over the Internet by accessing the following Web page: http://www.fafsa.ed.gov.

Internet applications can be completed from any home computer with secure Internet access, or through Internet capable computers in many libraries and schools. Continuing students have access to various computer labs on campus. To apply, the following materials will be necessary to complete the data required:

1. The student’s social security card and driver’s license
2. W-2 forms or other records of income earned
3. If the student is required to file as a dependent student, Federal Income Tax Returns for both student and parents are required. Estimated figures are acceptable for applications completed before filing of tax return

4. Student’s and student’s spouse’s (if married) Federal Income Tax Return (estimated figures are acceptable for application before filing of return)
5. Records of other untaxed income received, such as welfare benefits, social security benefits, TANF, and military or clergy allowances
6. Current bank statements and records of stocks, bonds, and other investments
7. Business or farm records, if applicable; and
8. Student’s alien registration card, if student is not a U.S. citizen.

Note: Students may apply for financial aid before being admitted to Florida State University, but while early application for aid is recommended (as soon as possible beginning January 1), a student cannot be awarded aid until he/she is officially accepted for admission to Florida State University.

Loan Entrance Counseling Sessions and Master Promissory Note

Federal regulations require all students receiving a Federal Stafford/ Subsidized Loan, Federal Stafford Unsubsidized Loan, or Federal Perkins Loan to participate in a loan entrance counseling session and endorse a master promissory note prior to receiving the first distribution of the loan. No Federal Stafford loan or Federal Perkins loan can be disbursed until this requirement is met.

A student accepting a loan award for the first time at Florida State University can complete the loan entrance requirement by accessing the Federal Department of Education Web site at https://studentloans.gov and clicking on the loan entrance counseling and the master promissory note links. Students will need their four digit federal pin number to access their profile. Students can obtain a federal pin number or request a duplicate pin number by visiting the federal pin number Web site at http://www.pin.ed.gov. The student will be asked to provide certain information, including reference addresses for future use. Students are strongly encouraged to print a copy of the completed confirmation page to retain for their records. Federal Perkins Loans require an institutional promissory note which can be accessed online at http://my.fsu.edu (from Secure Apps, click Perkins Loan Promissory Note). Students who prefer an alternative format or who have questions about loans, the loan entrance counseling, or the master promissory note information process may contact the Office of Financial Aid.

Fees and Financial Aid Students

The University distributes aid in three ways for all registered financial aid students whose funds are available to the Office of Student Business Services. Students must complete an Account Refund Setup form online at http://my.fsu.edu (from Student Account Quicklinks, click Disbursement Permissions) by choosing one of the following three ways to receive financial aid:

1. By Electronic Funds Transfer (EFT) to your FSUCard Account at Sun Trust. The University recommends this method as the most efficient option. Approximately eighty percent of the student body receiving financial aid at FSU have chosen to process their aid electronically and take advantage of the latest technology in banking services; or
2. By Electronic Funds Transfer (EFT) to any bank account. Students must provide the bank’s routing number and account number if this method is chosen; or
3. By a check mailed to your local address. It is the student’s responsibility to keep his or her address record current with Florida State University. Checks are not forwarded by the post office.

Exceptions:

a. Students who have a hold on their funds must clear it by the posted deadline. Loans must be returned to the lender within twenty days of receipt. The University will make every effort to contact students by phone and e-mail. Students whose aid has not been processed by the end of the second week of the term should contact the Office of Student Business Services at sfis@admin.fsu.edu or in person at A1500 University Center. In order to receive aid, a student must be enrolled for the required number of hours; and
b. Students whose financial aid has not arrived by the beginning of the semester should receive a tuition deferment if application was made by August 1 of each year. After the initial distribution dates at the beginning of the semester, additional funds that become available will be disbursed daily and mailed or sent to the FSUCard account in accordance with the selection made on the student’s Account Refund Setup form.

The minimum number of hours required to be eligible for financial aid is six semester hours.

All financial aid students must check their financial aid status at https://my.fsu.edu on the scheduled date. If their online billing statement says they
have a deferment or their tuition has been paid, they do not need to come to the Office of Student Business Services. Students should check the status of their financial aid award on the published dates.

Failure to confirm that financial aid has been processed by the deadline may result in a late payment fee assessment of $100.00. (Rate subject to change.) Students can confirm transactions and account history at http://my.fsu.edu (from Student Account Quicklinks, click Account Statement).

If you have any questions, please contact the Office of Student Business Services at (850) 644-9452, via e-mail at sfs@fsu.edu, or on the Web at http://www.sfs.fsu.edu.

**Deadline:** If the financial aid is not sufficient to cover all charges, the student is responsible for paying the balance by the tuition payment deadline (see date on the “Academic Calendar” in this General Bulletin). After this date, a $100.00 late payment fee is assessed and grades will be held at the end of the semester until fees are paid in full.

**Note:** Financial aid students who are having their tuition paid by an agency or department billing should submit the required documents no later than the third day of the semester, but preferably immediately after registration. Intern Participation Certificates and the Florida Prepaid College Program do not pay the full amount of tuition. Students must pay the remaining balance due by the tuition payment deadline. All state employee waivers must be turned into the Registration Office (A4400) no later than the expiration date. If the loan has already been disbursed, the student is required to notify Student Business Services in writing within fourteen days that they do not want part or the entire loan they have received. A form can be completed at the Office of Business Aid and repayment can be made to Florida State University by FSUCard, cash, cashier’s check, or money order, or the original check can be brought to the Office of Student Business Services, A1500 University Center. Students who want to refuse loans after the fourteen-day notification period must contact their lender for repayment.

**Deferments, Loans, and Check Cancellation**

**Deferments**

Students must confirm their application is complete by the first week of the semester by going to http://my.fsu.edu and viewing their Financial Aid Student Toolkit.

Financial aid deferments will be processed automatically for all financial aid students who meet the following criteria:

1. The student has completed the financial aid application process by the published deadline (indicated in the Financial Aid Application Packet);  
   **AND**
2. The student does not have financial aid available during financial aid distribution (the second week of the term).

Financial aid students who do not receive a financial aid deferment must pay their tuition in full by the tuition payment deadline. See the dates published in the “Academic Calendar” included in this General Bulletin. Failure to pay by the published deadline will result in a late payment fee assessment.

**Note:** Financial aid deferments expire before the end of the semester. See the Registration Guide for the expiration date. Students must confirm that their financial aid has arrived and all requirements have been met by the deferment expiration date. Go to http://my.fsu.edu (from Student Account Quicklinks, click Account Statement). You will then see your courses and fees detailed. With your temporary deferment, your total balance may show “Zerro” ($0.00) for the Current Term Tuition. When your financial aid arrives, the screen will show how much has been paid toward your tuition. You must e-mail your financial aid pays your tuition by the deferment deadline. If you have questions, contact us at sfs@fsu.edu or (850) 644-9452. Also, check your financial aid status at http://www.studentsfirst.fsu.edu. If the student’s aid is not available by the expiration date, it is the student’s responsibility to pay tuition in full. Failure to pay by the expiration date will result in a late payment fee assessment of $100.00, and your schedule for the next semester may be cancelled. Additionally, registration will not be permitted and transcripts and diplomas will not be mailed until debts are paid in full.

**Short Term Loans**

Students in need of funds as a result of financial aid being delayed may apply for a short term loan (also known by the name delayed delivery loan) by contacting the Office of Financial Aid. Eligibility for the loan will be determined by the type of aid awarded and the hours enrolled. Accounts in delinquent status (past due) are not eligible for loans. Short term loans will be disbursed approximately one business day after the loan has been approved and disbursed according to the disbursement method indicated on the student’s Account Refund Setup. Students must have either paid or deferred their full amount of tuition by the tuition payment deadline in order to be eligible for short term loans. Short term loans are due when the financial aid arrives, or by the financial aid deferment deadline, whichever comes first. Debts not paid will prohibit students from using University services such as registration, transcripts, etc.

Short term loans are **not available** until the financial aid distribution period. Students should come prepared to buy books, as financial aid distribution does not take place until the second week of the term.

**Emergency Loans**

Students who have emergency situations such as death in the family or unexpected major medical or dental bills may apply for an emergency loan at the Office of Financial Aid. Documentation and a picture ID are required to receive an emergency loan. Accounts in delinquent status are not eligible for loans. Loans must be paid by the due date, and University services will not be granted until paid in full.

**Check Cancellation**

Any Stafford Loan check available at financial aid distribution that is not disbursed by the check cancellation deadline will be returned to the lender for cancellation.

**Loan Cancellation and Refusals**

Students should notify the Office of Financial Aid to decline or refuse an awarded loan (Perkins, Subsidized Stafford, and Unsubsidized Stafford Loans) prior to it being disbursed to the student. Financial aid is processed at the end of the first week of each semester and it arrives thereafter. If the loan has already been disbursed, the student is required to notify Student Business Services in writing within fourteen days that they do not want part or the entire loan they have received. A form can be completed at the Office of Business Aid and repayment can be made to Florida State University by FSUCard, cash, cashier’s check, or money order, or the original check can be brought to the Office of Student Business Services, A1500 University Center. Students who want to refuse loans after the fourteen-day notification period must contact their lender for repayment.

**Loan Exit Interviews**

Federal and University regulations require that all recipients of federal loans participate in an exit interview counseling session upon graduation, withdrawal from the University, or dropping below six semester hours. These loans include Perkins (NDSL), Subsidized Stafford (GSL), and Unsubsidized Stafford (UGSL) loans. Students planning to continue their academic studies at Florida State University should contact the Office of Financial Aid at A4400 University Center to ensure that their exit interview stop is removed.

**Additional Sources of Financial Aid**

A listing of additional sources of financial aid such as scholarships or private educational loans can be found on the Financial Aid Web site at http://www.finaid.fsu.edu. Individual departments described in the “Academic Departments and Programs” section of this General Bulletin list scholarships, as well as assistantships available for students of specific majors.

**The Federal Work Study Program (FWSP)**

The FWSP is a federally funded financial aid program, administered by the Office of Financial Aid, that enables students to earn a portion of their financial aid award. This program offers a positive alternative to loan indebtedness through meaningful part-time employment. Weekly work schedules are mutually determined by the student and the employing department to suit the student’s class/exam schedule and the employer’s needs. By federal regulation, the work schedule cannot interfere with a student’s class schedule. Federal Work Study is a need-based program, and is awarded on a first-come, first-served basis.

Students may also utilize their Federal Work Study awards by participating in community service through the Community Service Work Study Program (CSWSP). This program is designed to locate and develop off-campus community service jobs and offer referrals for eligible students. Community service improves the quality of life of local residents, as well as encourages student awareness and continued participation in society at large. Students may assist with programs related to health care, child care, literacy training, education (including tutoring), welfare, and social services. Some students may serve as mentors for educational and recreational activities or work as counselors in areas such as career counseling.

To determine eligibility for the FWSP and CSWSP, students must apply for financial aid at Florida State University by completing the Free Application for Federal Student Aid (FAFSA), and by submitting all other required documentation.

The Federal Work Study Program (FWSP) works to provide financial assistance to eligible students through part-time employment opportunities. Students must apply for financial aid at Florida State University by completing the Free Application for Federal Student Aid (FAFSA), and submit all required documentation. The program aims to support students through meaningful part-time employment opportunities, enabling them to earn a portion of their financial aid award while gaining valuable work experience.
Scholarships

Florida State University recognizes and rewards high academic achievement and awards scholarships on a competitive basis. All eligible students will automatically be considered at the time of their admission for these scholarships, which are administered by the Office of Admissions.

In addition, the individual departments described in the “Academic Departments and Programs” section of this General Bulletin list scholarships and assistantships available for students of specific majors.

The Florida Department of Education, located in Tallahassee, FL, offers a number of programs for scholarships, grants, and loans to help defray a student’s cost of education. These programs are available only to Florida residents. Contact the Florida Department of Education at (888) 827-2004; http://www.fldoe.org. Residents of other states should check with their state’s Department of Education for additional aid that may be available to them.

Visit the Office of Financial Aid Web site at http://www.financialaid.fsu.edu to find a list of scholarships available through the State of Florida, Florida State University, and the FSU Foundation (private donor scholarships). There are also links to other legitimate scholarship search Web sites.

Students receiving scholarship checks directly from a benefactor must bring them to the Office of Student Business Services for processing at A1500 University Center.
Florida State University has a long history of providing recognition and support for outstanding students, beginning with a directive from a faculty committee in 1932. The program’s purpose, as described in a report to the President and the Faculty Senate, was “to provide enlarged opportunities for…students; to give them a challenge and an incentive; to develop initiative, resourcefulness and self-reliance; to present knowledge in terms of fields, not courses.” (Report on Honors Work, FSU Archives, 12/21/32)

Over the years, the scope and focus of honors work at Florida State University has evolved to address the changing needs of those students who demonstrate high academic achievement. The information below provides an overview of the opportunities available to students who choose to participate in the University Honors Program.

University Honors Office

**Director:** Paul Marty; **Associate Director:** Margaret R. Allen; **Assistant Director:** Jeffrey Badger

The University Honors Office supports the University’s long tradition of academic excellence by offering two programs, the University Honors Program and the Honors in the Major Program, which highlight the institution’s strengths in teaching, research, and community service. Please visit [http://honors.fsu.edu](http://honors.fsu.edu) for more information.

University Honors Program

The University Honors Program is designed for students who are entering full-time college studies for the first time. The program is intended to help the University’s most talented students develop into excellent scholars, leaders in their communities, and innovators in their professions. To do this, the program encourages students to take advantage of the special opportunities available at Florida State University due to its status as a major research university and its role in the community. Students who pursue honors credit through courses and honors-level project work that focuses on research, creative activity, or community service may earn the Honors Medallion. A student receives the medallion when she or he accumulates eighteen semester hours in honors courses and approved honors project activities (some non-credit activities may be substituted with the approval of the Director of the University Honors Office) or by completing an Honors Thesis for an Honors in the Major. The medallion may be worn during the University’s commencement exercises. In addition, this achievement is noted on the student’s transcript.

Students in the University Honors Program have the option of earning honors credits through several different types of courses described below.

**Honors E-Series courses:** engage students in broad, critical, and creative thinking about contemporary problems and the enduring issues of human existence. Since faculty members develop these courses from their own specific research interests, and because each course is temporary, the offerings vary from semester to semester. Honors E-Series courses are limited to nineteenth students per section, and also include substantive work in college-level writing. These E-Series courses fall into one of the six core liberal-studies disciplinary areas and/or Scholarship in Practice as part of the thirty-six Liberal Studies credit hours. Some also fulfill “x” or “y” Multicultural Awareness requirements or the Oral Communication Competency requirement. **Note:** All honors students are required to complete two Honors E-Series courses in their first two years.

Honors sections of regular courses are generally limited to twenty-five Honors students each. Honors-only sections are indicated by **HONORS Course Name or HON Course Name**. Such courses are not necessarily harder than regular courses, but they tend to move at a faster pace than the corresponding regular course. Because they are smaller, they also provide more chances for interaction between fellow classmates and between professors and students. Honors sections of regular courses can be used to meet liberal studies requirements. They may also meet the liberal studies “x” and “y” requirements depending on the topic.

**Honors-Augmented Courses:** In some cases where regular honors sections of courses cannot be made available, the faculty agrees to offer honors-augmented courses. These are regular courses open to all students in which the professor has agreed to engage in special projects with honors students for honors credit. Honors-augmented courses are arranged in advance by the University Honors Office and placed on the course schedule. They are indicated by **Course Name—Hon or Course Name—Honors**.

**Individual Honors-Augmented Courses:** The Individual Honors-Augmented Course Contract gives honor students additional opportunities to enrich course requirements in their majors and earn credit towards the Honors Medallion.

Honor students may earn up to eight individual honors-augmented credit hours in 2000-4000 level, non-honors courses in their major or minor by contracting with faculty to complete additional work in the courses. To earn individual honors-augmented credit, the honors student and faculty member must complete a contract within the first two weeks of the semester.

**University Honors Colloquium:** The University Honors Colloquium is required for honors students during their first year in the Honors Program at Florida State University. This one credit weekly forum features lectures by distinguished University faculty from across the scholarly and creative arts spectrum, as well as informative presentations from directors of academic programs that will be of interest to honors students. The Colloquium provides a common intellectual experience for new honors students and introduces students to the culture and opportunities of a modern research university.

**Graduate Classes:** Honors students may elect to take graduate classes for up to six credit hours that can count toward the Honors Medallion. Graduate courses that are basic competency review classes (e.g. a language-reading course) are excluded. The course must be taken for a grade; P/F and S/U courses will not count.

**Honors DIS:** Honors students may earn credit hours by registering to work with individual faculty. The Honors DIS is intended to be a project that meets the following five standards:

- The work must demonstrate intellectual initiative;
- The work must demonstrate engagement with the scholarship in the subject of the DIS, whether the work of the DIS is research or creative activity;
- The DIS must be graded (A-F);
- The DIS must be directed by a permanent member of the teaching faculty. An assistant, associate, or full professor would qualify;
- The DIS must involve at least thirty hours of work for each credit hour awarded.

**Earning the Honors Medallion:** There are two ways of earning an Honors Medallion: 1) by completing eighteen honors points, which are typically honors credit hours earned through coursework, to become an **Honors Finisher**, or 2) by completing an **Honors in the Major**, both of which are described below. These distinctions are noted on your transcript. During the semester you graduate you are given an Honors Medallion at a special ceremony. The medallion may be worn during commencement exercises.

**Honors Finisher:** Students who are considered to have finished the Honors program have the phrase “**Completed Requirements of Liberal Studies Honors Program**” noted on their transcripts. To become an **Honors Finisher** and have this distinction on your transcript, students must earn eighteen honors points, which are usually honors credits earned through coursework. These eighteen honors points must include a minimum of nine semester hours of honors coursework (honors sections of regular courses, honors E-series, the honors colloquium, honors-augmented courses). The remainder of the eighteen honors points can be earned through any combination of further honors coursework including honors Directed Individual Study (DIS), graduate courses, Individual Honors-Augmented courses, Honors in the Major work (also known as honors thesis).

**Honors in the Major**

Students may earn up to a **maximum of five** honor points toward the Honors Medallion by the achievements listed below. The amount of points for each achievement is indicated.

Three of the eighteen honors points for the Honors Medallion may be earned by:

- Completing a Garnet and Gold Scholar Society program that includes Research as one of its components
- Completing a Certificate Program or Specialized Study Program with Honors

One honor point toward the Honors Medallion may be earned by the following (an achievement may be duplicated for additional points):

- Sixty hours of service as noted on a student’s ServScript;
- Serving as a FIG (Freshman Interest Group) leader;
- Serving as a UROP (Undergraduate Research Opportunity) leader;
- Completion of the UROP program; and
- A conference presentation.

To count towards the Honors Medallion requirements, an honors course must be completed with a grade of “C-” or better. Honors-augmented courses
will be counted towards the medallion if a grade of “B–” or better is earned and the honors-augmented project is completed satisfactorily. Students using honors thesis hours towards the medallion must earn a “B–” or better.

Honsors in the Major: An Honors Medallion is also awarded to students who finish the Honors in the Major program by completing six or more credits hours of honors thesis work and successfully defending their thesis. A student who finishes eighteen credit hours of honors coursework that includes completion of the Honors in the Major (nine to twelve hours coursework plus six to nine hours of thesis) is given special recognition at the awards ceremony and has both distinctions described here noted on their transcripts.

Admission Requirements

Standard Admission. Admission into the University Honors Program is by invitation only. Decisions about admission are based on an evaluation of the entire record of the student who has completed or is enrolled at Florida State University during the general undergraduate admissions process, including the strength of their academic curriculum. There is no separate application form for the Honors Program. Letters of invitation to the University Honors Program are sent by mail approximately two weeks after notification of general admission to the University. The average academic profile of students that were offered honors invitations in 2014 was as follows: 4.3 academic GPA; 31 ACT composite; 2060 SAT total.

Conditions of Admission: Acceptance into the Honors Program is subject to receipt of student’s written response to the Honors invitation by the stated deadlines, successful senior year performance, and high school graduation.

Admission by Application. Students who are accepted to Florida State University as freshmen but do not receive a letter of invitation may apply for admission to the Honors Program by submitting an application portfolio. When available, the application portfolio requirements are posted at http://honors.fsu.edu/University-Honors-Program/Admission-to-the-FSU-Honors-Program.

Conditions of Admission: Acceptance into the Honors Program is subject to receipt of student’s written response to the Honors invitation by the stated deadlines, successful senior year performance, and high school graduation.

Lateral Admission. Any incoming freshman student who was not admitted to the Honors Program through the standard admission process or by submitting an application portfolio has the opportunity to apply for lateral admission. When available, the lateral admission application is posted at http://honors.fsu.edu/University-Honors-Program/Admission-to-the-FSU-Honors-Program.

College freshmen may apply for lateral admission during their first Fall semester at Florida State University. Students offered lateral admissions to the University Honors Program join the program the Spring semester following their first Fall semester. Students will be evaluated on the basis of their FSU cumulative and term GPAs, college coursework, and expressed interest in the Honors Program as reflected in the application. Typically, students offered lateral admission enroll in at least twelve graded credit hours and earn at least a 3.8 FSU GPA during their first Fall term.

Note: Decisions about lateral admission are made after Fall term grades are posted. Students offered lateral admission to the University Honors Program are required to attend an Orientation prior to the start of the Spring semester. Students who are admitted laterally are held to the same program requirements as students admitted by standard admission.

Transfer Policy

Transfer Students. Students transferring to FSU may apply for admission to the Honors Program through the end of their sophomore year. To be admitted, students must be in good standing in an Honors Program or Honors College at their current institution. Transfer students from Community Colleges may also apply. Students will be evaluated on the basis of cumulative and term GPAs, college coursework, and expressed interest in the Honors Program as reflected in the application. If accepted, a maximum of six honors credits earned at a previous institution in Honors Seminars or comparable honors courses may be accepted toward the Honors Medallion.

Retention

To remain in the University Honors Program, students must enroll in and pass the University Honors Colloquium during their first year in the University Honors Program. Incoming freshman and laterally admitted freshman are required to take HIM 2944 section 01 or section 02. In addition, to remain in the program students must maintain at least a 3.2 FSU cumulative GPA and must complete seven hours of honors credits by the end of the Spring semester of their sophomore. Students must complete twenty service hours in the first two years, as noted on the student’s ServScript.

Honsors Housing

The Honors Residence Complex provides an excellent environment for honors students to socialize and study together. Since many students share the same rooms, both planned and spontaneous study sessions are common.

Students admitted into the University Honors Program may request housing in Landis Hall or Gilchrist Hall honors-residences; however, honors students are not required to live on campus. Students wishing to live in Landis Hall or Gilchrist Hall must submit a separate housing application listing their desired residence as their first hall preference. General residence hall assignment is determined on a first-come, first-served basis; placement is determined by the order in which housing applications are received by the Office of University Housing. Please refer to the “Housing” chapter of this General Bulletin for additional information concerning Landis Hall or Gilchrist Hall.

Acceptance into the University Honors Program does not guarantee University housing in Landis Hall, Gilchrist Hall, or elsewhere. Students who intend to live on campus are strongly encouraged to submit an application to University Housing as soon as possible after their admission to the University.

Honors in the Major

Many colleges and departments of Florida State University participate in the Honors in the Major Program, which is intended to encourage talented juniors and seniors to undertake significant independent and original scholarship as part of the undergraduate experience in a framework similar to that of a thesis-based master’s degree program. While many students conduct traditional research, the Honors in the Major program also supports the creative endeavors of those students in majors such as Creative Writing, Dance, Film, Music, Studio Art, and Theatre.

Students who successfully complete the requirements of the program, including completion and defense of an honors thesis or creative project, become eligible to graduate “with honors,” which is noted on the transcript. Honors thesis work is carried out by the student over a period of two or three semesters in collaboration with a thesis director and two or three other faculty members who serve on the student’s honors thesis supervisory committee. For more information, visit http://honors.fsu.edu/Honors-in-the-Major.

Eligibility

Students must contact the University Honors Office in the semester before they intend to register for thesis hours in order to submit formal application to the program. The application must show that the student has the required grades and credits, a proposed thesis topic, sufficient time prior to graduation to complete the project, a thesis director, and the approval of the chair or director of the academic department or program in which the student is majoring.

Detailed information on procedures for initiating and completing the Honors in the Major Program can be found at the program Web site, http://honors.fsu.edu/Honors-in-the-Major.

The University Honors Office requires that prospective students have at least sixty semester hours and at least a 3.2 cumulative FSU GPA. Transfer students must have a 3.2 overall FSU GPA, including all transfer work, and a 3.2 GPA on at least twelve FSU semester hours. Students should note that they may choose not to count credits that are five or more years old, as long as the most recent sixty semester hours average a 3.2 GPA. Departments retain the right to set their own specific eligibility criteria which may include, but are not limited to, cumulative and/or major course GPA higher than 3.2 and pre-requisite or corequisite courses or seminars. Please contact your department’s undergraduate faculty liaison for specific information.

Thesis Director and Supervisory Committee

Each student in the program works with a thesis supervisory committee comprising a thesis director and two or three other members. The members of the committee are selected by the student. Most often, the thesis director and members of the supervisory committee are tenured or tenure-track faculty members. However, a non-tenure track faculty member or other permanent member of the University’s instructional or research staff can be designated thesis director or a member of the supervisory committee with the approval of the Director of the University Honors Office (a supervisory committee including completion and defense of an honors thesis or creative project is not required for Honors Director approval). At least two members of the supervisory committee must be tenured or tenure-track faculty members. At least one member of the supervisory committee must have a home academic department different from that of the thesis director. A “visiting scholar” who is not an employee of Florida State University can be included on the supervisory committee with the approval of the Director of the University Honors Office. Academic departments and programs may elect to have more specific criteria for the thesis director and supervisory committee.

The duties of the thesis director include:
Completion of the Honors Thesis

Typically, each student in the program works on the thesis project for two or three semesters. A prospectus is due to the University Honors Office during the first semester of research. This brief paper states the nature of the honors thesis, its scope, and its methodology. The prospectus must be approved by all members of the supervisory committee. Further details and specific forms regarding the prospectus are available from the Honors in the Major Blackboard organization site through http://my.fsu.edu.

During each of these semesters, the student must enroll in one to three semester hours of thesis credit using the appropriate course number provided by the student’s major department. Students must earn a total of six to nine honors thesis credits and must receive at least a “B-” in each of these courses. A student who does not have six credit hours of work graded “B-” or better will not be eligible for program completion and graduation with Honors. Students must also maintain at least a 3.2 cumulative FSU GPA until graduation. Several departments have additional requirements; students should contact the undergraduate faculty advisor in their major department in which the thesis work will be based for further information.

The student orally defends the completed honors thesis in a meeting with the supervisory committee. Following a successful defense, the student must submit the required defense forms (available from the Honors in the Major Blackboard organization site) and one electronic copy of the completed thesis to the University Honors Office no later than the official last day of classes in the defense semester. Further details and specific deadlines are available from the administrative coordinator of the Honors in the Major program or at the Honors in the Major Blackboard organization site through http://my.fsu.edu.

University-Recognized Honor Societies

Through the University Honors Program, Honors in the Major Program, and honor societies, the University encourages excellence in all of its students. Florida State University is the home of the first Phi Beta Kappa chapter in the state of Florida. On Honors Night, a ceremony that was first held on May 4, 1936, the University salutes students who have received institution-wide recognition for academic achievement.

Honor societies that are formally recognized by Florida State University have met the standards as set by the Undergraduate Policy Committee. Some organizations are University-wide and some are specific to individual disciplines. These societies recognize students who have excelled academically and in some cases provide opportunities for service to Florida State University and the community.

Standards for the Recognition of University-wide Honor Societies

General Standards for Recognition

I. A society may be recognized as a Scholastic Honor Society or as a Leadership/Scholastic Honor Society.
II. The society must be approved for recognition by a body to be appointed by the University President or his/her designee.
III. The society must demonstrate membership participation in governance and control at both the national (if a national organization) and chapter levels.
IV. Full financial disclosure is required at both the national (if applicable) and chapter levels.
V. Only the institutional chapter may extend invitations to individuals for membership.
VI. To be considered University-wide, a society must receive into membership persons from a broad range of academic disciplines.

Standards for Membership Eligibility

I. Membership shall be conferred on the basis of character and specified scholastic, leadership, and service eligibility.
II. Eligibility criteria here specified are minimum ones; societies may have higher standards.

Scholastic Honor Societies

Eligibility is primarily based upon scholarship.

I. Upper-division/Graduate Societies.
   A. Must be in the top twenty percent of their class scholastically;
   B. Undergraduates must have earned at least sixty semester hours, with at least twenty-four graded semester hours at this institution; and
   C. Graduate and professional students must have earned at least twenty-four graded semester hours at this institution.

II. Lower-division Societies
   A. Must be in the top twenty percent of their class scholastically;
   B. Must have earned at least twelve graded semester hours at this institution.

Leadership/Scholastic Honor Societies

Eligibility is based upon scholarship, leadership, and service to campus and the community. There is no distinction made by class.

I. Minimum overall 3.0 GPA, with at least twelve graded semester hours at this institution; and,
II. Leadership and service to be determined by the society.

University-wide honor societies officially recognized by Florida State University are listed below, and can also be found at the Honors program Web site. The discipline-specific societies listed next are under the jurisdiction of the appropriate college, or department. For complete details of activities and membership requirements, contact the individual organizations.

Scholastic Societies

Phi Beta Kappa is a scholastic honor society for those studying the liberal arts and sciences. The society was formed in 1776 and is the oldest student honorary society in the U.S. The Florida State University chapter, chartered in 1934 and established in 1935, was the first in Florida. The FSU chapter became an RSO in 2008 and became a partner organization of FSU’s Center for Leadership and Social Change in 2012. The chapter’s activities include recognition of outstanding juniors and graduating seniors and sponsorship of visiting speakers of University-wide interest. In the Fall and Spring, the chapter gives the Marion Jewell Hay Award to the top graduating student member. In the Spring, student officers honor an FSU faculty member with the Phi Beta Kappa Excellence in Teaching Award. New members are automatically invited each Fall, Spring, and Summer based on major, grades (minimum 3.9 GPA for freshmen and 3.65 GPA for seniors), language study, and other criteria. For information, please visit http://pbk.fsu.edu/, or contact Dr. Annelise Leysieffer, (850) 645-1282, aleysieffer@gmail.com.

Phi Kappa Phi recognizes academic excellence among undergraduates, graduate students, and faculty in all disciplines. The society was founded in 1896; the Phi Kappa Phi chapter was chartered in 1925. The chapter recognizes outstanding student scholars and artists and recommends them for national awards. New members are automatically invited each Spring. Second-term juniors must rank in the upper two and one-half percent of their respective colleges. Seniors must be in the upper ten percent of their respective colleges. Graduate and professional students must rank in the upper ten percent of their respective college. All students must have at least twenty-four graded semester hours at Florida State University. For information, call (850) 645-9793 or e-mail mmelton@fsu.edu.

Founded in 1977, Golden Key International Honour Society honors undergraduate and graduate academic achievements. The Florida State University chapter was chartered in 1984. The University chapter presents a yearly Outstanding Scholar Award and regularly sponsors projects in local schools and within the community. The chapter has been named Florida State University Campus Organization of the Year and has been recognized for excellence by the national organization. Every Fall, the chapter automatically invites those students with at least thirty semester hours and in the top fifteen percent of the sophomore, junior, senior, or graduate class. For information, e-mail rbuckan@fsu.edu.

Phi Eta Sigma is the oldest and largest national honor society that encourages and rewards academic excellence among first year university students.
Every Spring full-time FSU undergraduates who earned a cumulative grade point average of at least 3.5 during their first year in college are offered membership to Phi Eta Sigma. The other societies offer similar membership opportunities. Students who rank in the 20th percentile with a minimum GPA of 3.4. For more information, contact Dr. Lisa Liseno, lliseno@fsu.edu.

Leadership/Scholastic Societies

The W.E.B. DuBois Honor Society, established in 1991, is named for the black scholar, editor, and author of The Souls of Black Folk, who set high standards for educating African-Americans in the late nineteenth and twentieth centuries. The purpose of the W.E.B. DuBois Honor Society is to honor the memory of the outstanding educator, Dr. W.E.B. DuBois by promoting the pursuit of academic excellence in all fields of higher education, engaging the community of scholars in service to others, and recognizing the outstanding achievements of the society’s members. The DuBois Society supports, guides, and encourages member involvement in other leadership and honorary organizations at Florida State University. Membership is open to all full-time undergraduate students of sound character who have achieved a 3.3 cumulative GPA at Florida State University, are in the top twenty percent of their class, and have earned at least thirty semester hours at this university. Letters of invitation will be sent to eligible students at least once each academic year. Transfer students and seniors will be considered for membership on an individual basis. For more information, contact the Undergraduate Studies Dean’s Office, (850) 644-2740, or the Center for Academic Retention and Enhancement, (850) 644-9699.

Omicron Delta Kappa is the national leadership honor society for faculty and students. The society was founded in 1914 and came to Florida State University in 1950. The society recognizes achievement in scholarship; athletics; social, service, and religious activities; campus government; journalism, speech, and mass media; and creative and performing arts. Annual activities include the homecoming breakfast honoring outstanding Florida State University Graduates Made Good, the faculty-staff Spring mixer, and the 7:50 a.m. Breakfast Club, where faculty, staff and alumni meet with current ODK students to discuss campus issues. The Florida State University circle has been named “Circle of Distinction.” Applications are sought twice a year, and members are chosen on the basis of scholarship (upper third [thirty-three percent] of junior, senior, or graduate class), leadership, and service. For more information, visit http://osa.fsu.edu/organizations/odk/, or call (850) 644-3342, or e-mail odk@fsu.edu.

Mortar Board is a national honor society that recognizes students for distinguished achievement in scholarship, leadership, and service. In 1931, the Torchbearer chapter of Mortar Board was established on the campus of FSCW, the forerunner of Florida State University. Nationally, Mortar Board was founded in 1918 and is among the most prestigious honor societies in the United States, with chapters at 205 colleges and universities in forty-six states. Each year Mortar Board sponsors and participates in events to provide service, advance the spirit of scholarship, and facilitate cooperation among honor societies. Every Fall, students with a minimum of sixty hours (twenty-four of which must be earned at FSU), an FGU GPA of 3.25 or in the top twenty-fifth percentile of their class (whichever is higher) in their respective colleges are invited to participate. Local Mortar Board chapters are composed of student members. Mortar Board members are not only recognized as the top scholars and leaders on campus, but are presented with the unique opportunity to join a diverse group of students from vastly different disciplines and interests. Nationally, Mortar Board provides career networking, fellowships, and awards. For more information call (850) 644-7141 or e-mail kcloyd@fsu.edu.

Garnet Key Honor Society of the Panama City campus, founded in 1986, recognizes students primarily for service and scholarship, but also for spirit and leadership. Activities are generally service projects and functions for the Panama City campus. Applicants must have completed fifteen semester hours at that campus with a GPA of 3.5 or higher. For information, e-mail critos@pc.fsu.edu.

The Oscar Arias Sanchez Hispanic Honor Society (OAHSHS) was formed in the Fall term of 1992 to recognize academic excellence among students of Hispanic heritage and those interested in Hispanic/Latino culture. The OAHSHS is a multicultural, scholastic/leadership society that promotes participation in and collaboration with other campus organizations, honors societies, and service organizations that serve the Tallahassee community. Membership into the OAHSHS shall be granted to those sophomores, juniors, seniors, and transfer students who have attained a 3.3 GPA or above and who have fulfilled the event requirements for two consecutive semesters. Letters of invitation will be sent to eligible students during the Fall semester of each academic year. To become a member of this organization, contact Undergraduate Studies Dean’s Office, (850) 644-2740, or The Center for Retention and Enhancement, (850) 644-9699.

Garnet and Gold Key, founded in 1924, is the oldest leadership honorary society on the FSU campus. The society was formed to recognize the spirit of leadership and service, and to certify leadership and character. The society’s annual activities now include Torch Night, which recognizes the top one hundred incoming freshmen and the conferral of the Ross Oglesby Award, given to one outstanding faculty or staff member who has dedicated ten years of service to the University, its students, and various community service projects. Juniors and seniors are able to apply twice a year for membership. Membership is granted on the basis of outstanding academic achievement and a diversified leadership experience.

For more information please visit http://sga.fsu.edu/ggkey/ or e-mail woodyard@coh.fsu.edu.

Other Societies

Phi Theta Kappa is the international honor society of two-year colleges. Florida State University’s alumni chapter offers former active members the opportunity to remain affiliated after they transfer. Phi Theta Kappa was founded in 1918; the University has had a chapter since 1932.

For more information, contact Dr. Lisa Liseno, lliseno@fsu.edu.

Discipline-Specific Academic Honor Societies

College of Arts and Sciences

The Department of Biological Science sponsors Beta Beta Beta, a national and professional fraternity dedicated to improving the understanding and appreciation of biology students and extending boundaries of human knowledge through scientific research. Tri-Beta promotes undergraduate research in biology through publishing its undergraduate-only journal, Bios; holding meetings at which undergraduate research papers are presented in the style of graduate meetings; and awarding competitive research stipends to support undergraduate research publications. New members (any major) are invited twice a year to join the Sigma Tau chapter at FSU. To qualify, new members must have completed one professional writing course and two biology courses. For further information, e-mail professor Debra Ann Fadool, dfadool@bio.fsu.edu, for access to Blackboard announcements or Facebook.

The honors organization of the Department of Classics is Eta Sigma Phi, founded in 1919 to promote the study and appreciation of classical languages and literature. The University chapter, organized in 1926, is the oldest active chapter in the United States. The chapter arranges lectures, poetry readings, translation contests in Greek and Latin, and tours. New members are invited twice a year, based on a “B” or above average in Greek and Latin courses. For further information, contact fchark@fsu.edu or visit http://www.etasigmaphi.org.

The Department of Computer Science sponsors a chapter of Upsilon Pi Epsilon, the national honor society for the computing sciences. The society is student-run and works closely with the local student chapter of the Association for Computing Machinery (ACM). Both undergraduate computer science majors and graduate students in computer science are eligible for membership. For further details on the current UPE membership requirements, please visit http://upe.acm.org/membership.html. For comprehensive information about UPE, visit http://upe.acm.org or contact Dr. D. Gaitros, dgaitros@fsu.edu.

The Department of English sponsors a chapter of the Lambda Iota Tau, a national honor society. The society is open to majors and minors in English and Modern Languages and Linguistics who have completed sixty semester hours or more with GPAs of 3.0 and higher. The society is student-run, and activities change with student interests. Recent activities have included book sales, forums on applying to graduate and law schools, marathon readings of favorite texts, publication of a literary journal, and an annual poetry and fiction contest for Leon County middle schools. Interested students should submit an initiation paper and fee to the Director of Undergraduate Studies in English.
The Department of History boasts the fourth chapter in the nation (founded in 1926) of Phi Alpha Theta, an honor and professional society dedicated to promoting the study of history. The chapter sponsors speakers, seminars, and publications. Junior and senior students need not be history majors, may apply for membership twice a year. Undergraduates need twelve semester hours in history with a 3.2 GPA and a 3.0 overall GPA. Graduate students need twelve semester hours in history and a 3.5 overall GPA.

The honors society of the Department of Mathematics is Pi Mu Epsilon, founded nationally in 1914 and at Florida State University in 1956. Members are selected by invitation, based on national standards for mathematics credits and GPA, and overall GPA. Both undergraduate and graduate students are admitted. These exemplary students also participate in mathematics competitions and professional organizations, the Florida State Mathematical Society, the Florida State Student Actuarial Society, and the student-led Graduate Student Seminar. For more information, e-mail advisors@math.fsu.edu.

Chi Epsilon Pi is the honor society for outstanding meteorology students in the Department of Earth, Ocean, and Atmospheric Science. The Florida State University chapter has existed since 1966. In order to be eligible for membership, graduate students must have at least nine semester hours of approved graduate level EOS courses while in graduate status, a 3.5 or better GPA in all meteorology coursework, and overall GPA of 3.25 or greater. Undergraduate students are eligible upon completion of at least seventeen graded semester hours of meteorology coursework at 2000 level or higher, and must have at least a 3.5 GPA in this meteorology coursework, a 3.25 or greater GPA overall from the period starting with the first semester as a junior and ending with the last complete semester, and at least one year in the Meteorology program. Other criteria exist for non-degree students. Students are inducted each Spring.

The Department of Modern Languages and Linguistics has five honor societies, each with a different language focus:

- French. Pi Delta Phi has long been established at Florida State University and inducts major and minor students on the undergraduate and graduate levels. Prospective undergraduate members must have a 3.0 GPA overall and in French classes, with at least one French class on the 3000-level and sophomore standing. Undergraduate students do not need to be French or French Studies majors or minors to be nominated for regular membership. Graduate students must have a 3.0 GPA in French as well as an overall GPA of 3.0, and must have at least 12 semester hours of French work in French. For more information, contact Dr. V. Osborn, (850) 644-8601.

- German. Delta Phi Alpha is the national honor society for students of German. The chapter at Florida State University, organized in 1979, is Iota Eta. Minimum requirements include a 3.5 GPA in German and a 3.0 overall GPA, and at least three German courses above the language requirement; students may be enrolled in the third course at the time of application. One of the 3000-level courses may have the prefix GET (film or literature). Students wishing to be considered for membership should contact Dr. Christian Weber, cweber@fsu.edu.

- Italian. Gamma Kappa Alpha is the national honor society. “Gamma Kappa Alpha” is a nationally recognized honor society organized in 1983. The Florida State University chapter followed in 1984. Prerequisites: you must be at least a junior or have a BA with a minor or a major in Italian. You need a 3.5 GPA in Italian and a cumulative GPA of 3.0. GKA organizes Italian review sessions, fundraisers, community outreach, parties and day trips. There is a $30 membership fee. Induction into the society takes place in the Spring. For more information, contact Dr. Irene Zanini-Cord at izaninicondi@fsu.edu.

- Slavic (including Russian). Dobro Slovo was founded in 1926; the University has had a chapter since 1972. Each Spring, students apply, or are invited, based on two years of study of Slavic languages and related subjects with a 2.35 average and an overall average of 3.0. For more information, contact Dr. L. Wakamiya, (850) 644-8391 or lwakamiya@fsu.edu.

- Spanish. Sigma Delta Pi is the honor society for students in Spanish and has had a chapter at the University since 1935. Sigma Delta Pi offers students competitive opportunities to study abroad. Undergraduates must have a 3.2 GPA in Spanish. Applicants must complete nine hours of Spanish at or above the 3000-level; at least one course must be in Spanish literature or culture/civilization. Graduate students are also eligible after completion of two graduate courses in Spanish with a GPA of 3.0 or above. New members may apply annually. For more information, contact Dr. A. Brandl, (850) 644-2343.

Sigma Pi Sigma is the national honor society for majors in the Department of Physics. The organization was founded in 1921, and the University Chapter was organized in 1954. New members are inducted once a year, chosen from among majors in the Department of Physics. To qualify, juniors must have completed a minimum of seven graded PHY, PHZ, and AST courses with a GPA of at least 3.5 in those courses. Qualifying seniors will have completed a minimum of twelve graded PHY, PHZ, and AST courses with a minimum GPA of 3.25 in those courses.

The Department of Psychology fosters a chapter of Psi Chi, a national honor society founded in 1929. The University chapter, in existence since 1959, has concentrations on three goals: a) providing high-impact service opportunities for students that allow them to gain career-relevant experience while serving the community; b) connecting members to the professional knowledge and advice of Psychology faculty, graduate students, alumni and other members; and c) providing opportunities for the campus community to be exposed to the knowledge of our science. Students may apply for membership twice a year. Psychology majors or minors must have completed twelve semester hours of psychology with a minimum 3.2 overall GPA and a 3.2 psychology GPA. For more information, visit http://psxpathi.weebly.com or contact pschi@psy.fsu.edu or faculty advisor Adam Johnson at ajohnson@psy.fsu.edu.

College of Business

Beta Gamma Sigma was founded in 1913 and established at the University in 1962. Both undergraduate and graduate business students are eligible for election. New members are automatically invited in the Fall and Spring semesters; a 3.8 overall GPA is required. For more information, contact Dr. W. Woodyard, wwoodyard@business.fsu.edu.

Beta Alpha Psi is the national scholastic and professional organization of the Department of Accounting. Established in 1962, the University chapter recognizes outstanding academic achievement in accounting and business, promotes the study of accounting and business, provides opportunities for interaction among members and practicing business professionals, invites speakers from the profession, and undertakes campus and community service activities. Prospective undergraduate and graduate accounting, finance, and management information systems majors who intend to major in the aforementioned areas and have met grade point requirements in their majors and overall, may apply for membership. New members are initiated in the Fall and Spring semesters. For more information, contact the chair of the Department of Accounting, fhefling@fsu.edu.

Four majors in the Dedman School of Hospitality are eligible forEta Sigma Delta, the international hospitality honor society. The society was founded in 1978 and came to the University in 1981. The local chapter emphasizes career preparation activities. Students who are hospitality majors in the junior year with a 3.0 overall GPA are invited to apply at the beginning of each semester. For more information, contact the Director of the Dedman School of Hospitality, johlin@fsu.edu.

A chapter of Sigma Iota Epsilon, a management fraternity, has been sponsored by the Department of Management since 1969. Both undergraduate and graduate students are eligible for membership, and both must have a 3.2 GPA, among other requirements. For more information, contact the chair of the Department of Management, cdouglass@cob.fsu.edu.

College of Communication and Information

Lambda Pi Eta, a national communication honor society, had its charter year at the college in 1989. The purposes of the society are: (1) to foster and reward outstanding scholastic achievement in communication; (2) to stimulate interest in the field of communication through community outreach and service; (3) to promote and encourage professional development among communication majors; (4) to provide an opportunity to discuss and exchange ideas in the discipline of communication; (5) to establish and maintain closer relationships and mutual understanding between communication faculty and students; and (6) to explore options for graduate education in communication. The criteria for being a member require a student to be a communication, communication science and disorders, or information technology major; to have completed at least fifteen semester hours in a communication or information technology major and sixty hours overall; and have a minimum of a 3.5 GPA overall and in communication studies grading. For application at the College of Communication and Information, contact Dr. Hall-Mills at gary.burnett@cci.fsu.edu or contact Dr. W. Woodyard, wwoodyard@business.fsu.edu.

Psi Chi is the national honor society for Psychology majors or minors. Psi Chi was founded in 1913 and established at the University in 1966. Both undergraduate and graduate students are eligible for membership, and both must have a 3.2 GPA, among other requirements. For more information, contact Dr. Gary Burnett, gary.burnett@cci.fsu.edu.
College of Criminology and Criminal Justice

Alpha Phi Sigma is a nationally recognized honor society for students in criminology and criminal justice. The society recognizes academic excellence by undergraduates and graduate students.

To become a member, students must have completed one-third of the total hours required for graduation at Florida State University. The student must be recommended by the local chapter advisor or a faculty member. Undergraduates must maintain a 3.2 overall GPA and a 3.2 GPA in their major courses. Students must also rank in the top thirty-five percent of their class and have completed a minimum of four courses within the criminology and criminal justice curriculum. The society is open to students with a declared criminology and criminal justice major or minor. For more information, contact coakley@fsu.edu.

College of Education

Kappa Delta Pi is an international honor society in education and has maintained a chapter at the University since 1925. Students are invited twice a year to apply. Prospective undergraduate members must have completed twelve semester hours of professional education courses and have a minimum 3.0 GPA. Prospective graduate members must have completed at least six credit hours of graduate coursework, have completed or are in the process of completing twelve semester hours of professional education courses, and have a minimum 3.25 GPA. For more information, contact Dr. A. F. Davis, (850) 645-1739, afdavis@fsu.edu.

Phi Delta Kappa has maintained a chapter at the University since 1953. The group frequently participates in national research projects in education. Students are invited or may apply once a year. Members must have obtained a baccalaureate degree and be admitted to a graduate degree program or have five years successful professional experience. For more information, contact Dr. A. Guerette, (850) 644-6885, aguerette@fsu.edu.

College of Engineering

The Civil Engineering Honor Society is an organization dedicated to recognizing and promoting academic excellence within the civil engineering major. While in the process for recognition as a chapter of Chi Epsilon, the national civil engineering honor program, CEHS provides service opportunities such as tutoring. CEHS also gives top civil engineering students an exclusive means to serve other students, the College of Engineering, and Tallahassee at large. Potential members are selected from the upper one-third of civil engineering juniors and seniors.

The Tau Beta Pi engineering honor society was founded in 1885 at Lehigh University and is the oldest engineering honor society in the United States. The society was founded “to mark in a fitting manner those who have conferred honor upon their alma mater by distinguished scholarship and exemplary character as undergraduates in the field of engineering.” The society now exceeds two hundred and thirty active chapters across the country. The FAMU-FSU College of Engineering chapter of Tau Beta Pi, Florida Eta, was installed on February 29th, 1992. New members are selected based on scholarship (upper one-fifth of engineering seniors and upper one-eighth of engineering juniors), character, and integrity.

The Pi Tau Sigma international mechanical engineering honor society was founded in 1915 at the University of Illinois. The society recognizes students who show sound engineering ability, high scholarship (upper thirty-five percent of juniors and upper twenty-five percent of seniors), personality, and probable future success in the field of Mechanical Engineering. The FAMU-FSU College of Engineering chapter, Alpha Iota, was founded April 16th, 1994. The Alpha Iota chapter supports the Mechanical Engineering department through community outreach, undergraduate mentoring, tutoring, and social activities.

IEEE-HKN is the international honor society for electrical and computer engineering, which grew from the national honor society Eta Kappa Nu (HKN), that was founded at the University of Illinois on April 9th, 1990. The Lambda Delta Chapter of Eta Kappa Nu was chartered at the FAMU-FSU College of Engineering. Student members are selected based on scholarship, character, and attitude. New members must be in the upper one-third of electrical and computer engineering seniors or upper one-fourth of electrical and computer engineering juniors.

Founded in 1949 and chartered at FSU in 1995, the Alpha Pi Mu industrial engineering honor society confers recognition upon students of industrial and manufacturing engineering who have shown exceptional academic interest and abilities in the field, encourages the advancement and quality of industrial and manufacturing engineering education, and unifies the student body of the Industrial and Manufacturing Engineering Department in presenting its needs and ideals to the faculty. Candidates are selected from outstanding members of junior, senior, and graduate classes in industrial engineering. New members must be in the upper one-third for the senior industrial engineering students or in the upper one-fifth of the junior industrial engineering students.

College of Human Sciences

Kappa Omicron Nu was established in 1990 with the consolidation of Kappa Omicron Phi and Omicron Nu. Omicron Nu was established at the University in 1922. The local chapter is Omicron Pi Chapter. Kappa Omicron Nu recognizes and encourages excellence in scholarship, research, and leadership. Undergraduates must have sixty semester hours (at least fifteen of which were completed at Florida State University in a major within the College of Human Sciences) with a minimum FSU GPA of 3.3. Graduate students must have at least twelve semester hours that were completed at Florida State University in a major within the College of Human Sciences with a minimum FSU GPA of 3.5. New members are initiated at least once a year.

The Glenn Society was established in 2004 and named in honor of Hortense Glenn, who served as Dean of the College of Human Sciences from 1958 to 1972. The purpose of this honor society is to recognize students who have exhibited outstanding leadership and service while maintaining a high level of academic achievement. Each year no more than one percent of the student body of the College of Human Sciences is selected for membership. Undergraduate students are required to have completed ninety six semester hours (at least thirty hours at Florida State University and twenty five percent declaring a major in the College of Human Sciences), a minimum FSU GPA of 3.3 and evidence of leadership and service. Graduate students at the MS level must have completed at least two semesters of coursework as a major in the college, and PhD students are required to have completed at least four semesters in the college. For graduate students, a minimum FSU GPA of 3.8 is required in addition to evidence of leadership and service. New members are inducted once per year, in the Spring semester.

Iota Tau Alpha is an honorary society in the Department of Nutrition, Food and Exercise Sciences. It was established in 2004 at Troy University, and the Alpha Chi chapter, now the largest in the nation, was organized at The Florida State University in 2009. The objective of the Society is to foster a high standard of ethics and professional practices and to create a spirit of loyalty and fellowship, specifically for those students in Athletic Training. To be considered for membership undergraduates must be in the major of Athletic Training, have completed at least one term of their second year of a four year curriculum, have completed at least three term courses in Athletic Training with an average grade of “B” or better, and be in good academic standing— with at least a 3.5 cumulative college GPA or in the top thirty-five percent of their class. The Alpha Chi chapter also uniquely requires that each initiated member participate in at least one research study conducted within the College of Human Sciences. Initiation is held at the beginning of each Spring semester, with 2010 marking the first initiated class at FSU.

College of Law

The Order of the Cof was founded in 1902 and came to the University in 1979. New members are invited once a year from the top ten percent of the graduating class.

College of Medicine

Alpha Epsilon Delta is the Pre-Health Professional honor society. This society welcomes members who are planning careers in medicine, podiatry, dentistry, veterinary medicine, optometry, pharmacy, or other medical fields. To become a national member, students must be in the second semester of their sophomore year and have an overall and a science GPA of 3.2. Freshmen and sophomores are encouraged to participate in activities of the society. The Florida-Beta chapter at Florida State University was founded in 1946 and is one of the oldest chapters in the Southeast. The society invites speakers who represent the health professions, plan trips to area professional schools, and participates in community service. For additional information, call (850) 644-7678 or e-mail Rob Borger, rob.borger@med.fsu.edu.

College of Music

Pi Kappa Lambda is an honor society dedicated to fostering scholarly interest in the theoretical and historical aspects of music and to the pursuit of eminent achievement in performance, composition, music education, music therapy, and research. Pi Kappa Lambda was founded in 1918 and established the Phi Chapter at the University in 1943. New members are chosen once a year based on scholarly achievement and musicianship. Juniors must be in the top ten percent of the class; seniors, in the top twenty percent; graduate students must have an "A" in at least two-thirds of their courses.
College of Nursing

Sigma Theta Tau International, the scholastic honor society of nursing, was established in 1922. The University chapter, Beta Pi, was chartered in 1974. The society’s vision is to create a global community of nurses who lead by using knowledge, scholarship, and service to improve the health of the world’s people. Student candidates shall have demonstrated superior academic achievement, academic integrity and professional leadership potential. Undergraduate nursing students are eligible for consideration once they have completed one-half of the nursing program and must rank in the upper thirty-five percent of their class, with a minimum overall GPA of 3.0. Graduate students are eligible for consideration once they have completed one-fourth of the graduate nursing program, provided they have an overall GPA of 3.5 or better.

College of Social Sciences and Public Policy

Pi Gamma Mu is open to students in anthropology, Asian studies, criminology, economics, geography, history, international affairs, political science, psychology, public administration, Russian and East European studies, social science, social work, sociology, and urban and regional planning. The University chapter was founded in 1975. Students must have a minimum of twenty semester hours in the above subjects with at least a 3.0 GPA and no social science grade of “F”, and (except for graduate students,) must be in the upper thirty-five percent of their classes. Prospective members are also expected to have extracurricular activities related to the social sciences. For more information, contact Dr. Crew, 211 Bellamy, (850) 644-4418, or rcrew@fsu.edu.

Gamma Theta Upsilon is the honor society in the Department of Geography. The society was founded in 1931 and came to the University in the mid-1950s. The local chapter organizes lectures and field trips. Both undergraduate and graduate students are eligible, and invitations go out twice a year. A student must have a 3.0 overall GPA, must have a “B” in geography in at least three courses, and must have completed at least three semesters of college coursework. For more information, contact Dr. V. Mesev, vmesev@fsu.edu, or (850) 644-1706.

The honor society of the Department of Political Science is Pi Sigma Alpha. The society was founded in 1920, and a chapter was established at the University in 1954. Undergraduate and graduate students may apply if they have at least twelve semester hours in political science (including public administration) with a 3.2 GPA and a 3.0 overall GPA.

Pi Alpha Alpha is the national honor society for the field of Public Administration. New members are invited semi-annually based on a 3.75 grade point average GPA or better and a minimum of twenty-one completed semester hours, both in their degree program.

The honor society for the Department of Sociology is Alpha Kappa Delta. The aim of the University chapter, Alpha, is to stimulate scholarship and maintain a fellowship for students, both at the graduate and undergraduate levels. Requirements for undergraduates include the following: junior or senior classification; a minimum of twelve semester hours of sociology courses completed; a minimum overall GPA of 3.0; and a minimum 3.0 GPA in sociology courses. Graduate students must have completed at least one semester of graduate work with at least a 3.0 GPA. For more information, contact the Department of Sociology.

College of Social Work

The College of Social Work was the national founding chapter of Phi Alpha honor society. Phi Alpha fosters high standards of achievement for students and promotes humanitarian ideals through community service. Applications are taken twice a year. Undergraduates must have an overall GPA of 3.0, with a 3.25 GPA in at least nine semester hours of social work courses. Graduate students must have a 3.5 overall GPA with nine semester hours completed in social work.

The College of Social Work also sponsors the FSU chapter of Sigma Phi Omega, the national academic honor and professional society in gerontology. Sigma Phi Omega was established to recognize excellence of those who study gerontology and aging and the outstanding service of professionals who work with or on behalf of older persons. Membership is open to undergraduate and graduate students who are majoring or minoring in gerontology/aging studies and related fields, and who are in at least their second term of enrollment. Undergraduates must have a grade point average of at least 3.3 on a 4.0 scale, and graduate students must have at least a 3.5 GPA to be eligible for membership. Faculty, alumni, professional, and honorary memberships are also available.
UNIVERSITY-WIDE STANDARDS FOR UNDERGRADUATE TEACHING ASSISTANTS
AT FLORIDA STATE UNIVERSITY

These are University-wide standards that any undergraduate student must meet to fulfill one of the various instructional roles. bedroom to be University-wide minimum standards; departments may adopt additional or more stringent standards. Programs which do not use undergraduate students in instructional roles would not be affected by these standards. They are meant to cover the formal use of undergraduate teaching assistants, whether paid or working in a credit earning capacity, in course instruction.

As a general rule, undergraduate teaching assistants should not engage in grading the work of their peers when grading requires subjectivity. The companion policy, University-wide Standards for Graduate Teaching Assistants at Florida State University, details the policies that apply to the use of graduate students as teaching assistants.

General

Administrative responsibility for the teaching assignment rests within the department or program in which the student is employed as an undergraduate teaching assistant (UgTA). Each department is responsible for providing orientation, training, supervision, and evaluation of its UgTAs, and for assigning a faculty member to work closely with the individual undergraduate student to assist him or her in carrying out teaching responsibilities and to facilitate professional development. There should be a departmental orientation for UgTAs prior to beginning their teaching responsibilities. Departments must also ensure that all UgTAs receive training about sexual harassment, FERPA, the Academic Honor Policy, and how to identify and handle situations of potential conflicts of interest.

It is recommended that each program have a discipline-specific teaching manual for its undergraduate teaching assistants to supplement the University teaching manual, Instruction at FSU which can be viewed online at http://dist
tance.fsu.edu/instructors/instruction-fsu-guide-teaching-learning.practices.

Undergraduate Assistantship Job Code

To monitor compliance with University policies and Fair Labor Standards Act (FLSA) requirements, it is imperative that the proper appointment classifications be used for undergraduate teaching assistants. It is the responsibility of departments that employ undergraduate teaching assistants to establish the appropriate job code according to teaching responsibility. The Human Resources Office will verify the requirements for each classification and is the office to contact if there are any questions. Job codes can be accessed at http://hr.fsu.edu/PDF/Forms/compensation/OPS_Job_Codes.pdf.

Note: In regards to undergraduate students being employed, HR would advise that they be appointed in an A003 (Teaching Assistant), A004 (Research Assistant), A005 (Laboratory Assistant) or an A022 (Instruction/Teaching). The correct job code should be determined at the department level based on their job duties. A003, A004, and A005 are hourly appointments and should be used for those assisting instructors, researchers, or in a laboratory.

Minimum Requirements for Different Levels of Instruction
(provided face-to-face or online)

All UgTAs must:

1. attend training on Sexual Harassment, the Academic Honor Policy and the Federal Educational Rights and Privacy Act (FERPA);
2. receive supervision by the instructor of record and by the administrator in charge of departmental and/or program curriculum;
3. participate in planned and periodic evaluations of the teaching assistant; and
4. demonstrate successful completion of the course or equivalent.

In addition:

A. Grading Assistant
must follow program specific guidelines for grading
must be an undergraduate majoring in the discipline or related field

B. Proctor for Computerized Exams and Laboratories
must follow program specific instruction on proctoring exams and laboratories
must be an undergraduate majoring in the discipline or related field

C. Lab Section Assistant
must follow program specific instruction in laboratory demonstration

D. Recitation/Discussion Section Assistant
must be an undergraduate majoring in the discipline or related field

E. Class Tutor
must demonstrate successful completion of the course or equivalent

Sexual Harassment, Academic Honor Policy, and FERPA policies and equivalency

University policy on sexual harassment training is provided by the Office of Equal Opportunity and Compliance (EOC) within Human Resources (http://www.hr.fsu.edu), the Academic Honor Policy training is offered by the Office of the Vice President of Faculty Development and Advancement (http://fda.fsu.edu/) and the FERPA training is offered by the Office of the University Registrar (http://registrar.fsu.edu/).

Certification of Spoken English for Undergraduate Teaching Assistants

Departments who choose to employ international undergraduate students who are not native speakers of English as UgTAs must certify the student’s ability to communicate in spoken English using either the SPEAK exam or the speaking portion of the IBTOEFL. A score of 50 or higher on the SPEAK test, or 26 or higher on the speaking portion of the IBTOEFL, certifies a student to teach at any level. A score of 45 on SPEAK, or 23 to 24 on the Speaking section of TOEFL iBT, certifies a student to teach at levels 1 and 2. The Center for Intensive English Studies (CIES) offers courses in Spoken English (EAP courses). CIES also administers and scores the SPEAK test. For more information, please see http://www.cies.fsu.edu. Departments must send documentation regarding those UgTAs it has certified in English competency to the Office of the Vice President for Faculty Development and Advancement.
Housing

Director of University Housing: TBD, 109 Student Life Building

Residence Halls

The Office of University Housing is responsible for all on-campus housing facilities and programs for residents. The office provides living accommodations for full-time, degree-seeking, fee-paying students. All assignments are made without regard to race, religion, sexual orientation or national origin. Some rooms and apartments are adapted for residents who have physical disabilities.

University facilities on the main campus include eighteen residence halls accommodating approximately 6,579 single undergraduates and graduate students in a variety of community, suite, and apartment-style housing spaces. The chart below lists each residence hall; its visitation policy; whether the facility’s residents are male, female, or coed; and the special programs available in each residential area.

For the security of the residents, entrances to residence halls are locked at all times. Residents must use their FSUCards to enter. Visitors must be escorted in the building at all times by a resident.

Each room is furnished with a bed for each resident, study desks, chairs, dresser space, a small refrigerator, and internet access for each resident. Phone services can be contracted for an additional charge. Residents must provide their own linens. Bicycle pads for parking are situated outside each hall, but residents must provide their own lock and chain.

Costs

Semester rate includes utilities, mail service, wired and wireless internet, cable, and a refrigerator. Rental rates and payment due dates are provided on the University housing Web site at http://housing.fsu.edu.

*All housing rental fees are established by Florida State University. University Housing is a self-supporting auxiliary, and rental rates must reflect operating costs.

Visitation Options

Limited Visitation. Visitation within student rooms by members of the opposite gender is permitted during the following hours: Sunday through Thursday, 11:00 a.m. to 12:00 midnight; and Friday and Saturday, 11:00 a.m. to 2:00 a.m.

Self-Regulated. Visitation within student rooms by members of the opposite gender is determined by mutual agreement among roommates or subtenants at the beginning of the year and whenever occupancy changes.

Contracts

Upon notice of admission, students receive information about housing which includes information about how to submit a housing contract electronically. The contract is available at http://housing.fsu.edu.

As space is limited, interested students are urged to submit their contract and advance payment as quickly as possible. Assignments are made on a priority basis: 1) returning residents—based on the number of completed credit hours on file with the Office of the University Registrar, and 2) all new residents—based on the date the contract is submitted. Although students are given the opportunity to express preference, no guarantee can be given that specific room or hall preferences can be met.

The Housing Contract for residence hall students is for the contract period for the semester(s) for which the student contracts. All students who submit the Housing Contract and enroll in the University are rent obligated for the period of the contract. Academic year contracts include both Fall and Spring semesters and are not eligible for cancellation except as stated in the contract terms and conditions.

Special Living Units

Although no student is required to reside in University housing facilities, entering freshmen are encouraged to do so to avail themselves of the opportunities provided by the University Housing staff. University Housing has developed a housing program that is committed to providing a comfortable environment that promotes and supports the educational mission of the University. Great effort is taken to provide students with a variety of alternatives and choices in residence hall living.

In addition to its variety of facilities, University Housing is committed to providing students with a wide range of activities and programs that are designed for their needs. Full-time student affairs professionals, graduate as-

Dean: Carol D. Edwards; Associate Dean: Gary Bliss

Established in 2010, the College of Applied Studies is the newest college at the University. The administrative offices of the College of Applied Studies are located on the Panama City campus, which is about one hundred miles southwest of Tallahassee, on beautiful North Bay.

General Information

All students must meet the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin. In order to enroll in the College of Applied Studies, an undergraduate must be certified by the Division of Undergraduate Studies as the central utility plant for the entire campus. The Academic Center will accommodate significant growth in enrollment, approximately doubling the academic capacity of the campus. The three-story facility in excess of 100,000 square feet provides twenty-one general purpose classrooms, student seminar rooms, study and meeting rooms, a library and learning center, a 500-seat multi-purpose lecture hall/community room, and ten academic laboratories in support of programs in criminology, civil and environmental engineering, computer science, electrical engineering, advanced scientific diving and underwater crime scene investigation. Groundbreaking for the Florida State Panama City Academic Center was held in January 2007. The Academic Center was formally dedicated the Alfred P. and Mamie V. Holley Academic Center on January 21, 2009. The Holley Academic Center was named in recognition of Russell C. Holley’s naming gift in honor and memory of his parents.

Scholarships

Students enrolled at FSU Panama City in the College of Applied Studies are eligible for the endowed scholarships listed below. For more information on how you can apply or an application, please visit the Web site of the FSU Panama City Foundation at http://pc.fsu.edu/Alumni-Friends/Scholarships.

- Adam Arias Memorial ABA Endowed Scholarship
  For a graduate student in the Psychology Applied Behavior Analysis Program.
- Atkins Endowed Scholarship
  For an undergraduate student pursuing a degree in Civil and Environmental Engineering with a 3.0 GPA.
- AT&T Employees Endowed Scholarship
  For a student that is an active employee or dependent of active or retired AT&T employee.
- Dempsey Barron Endowed Scholarship
  For an undergraduate or graduate student.
- Bob Barth Underwater Research Endowed Scholarship
  For a student with a minimum of a 3.0 GPA enrolled in at least six credit hours, three of which are under water research course.
- Bay County Teacher of the Year Endowed Scholarship
  For an undergraduate student in that is a graduate of Gulf Coast State College that has been admitted to an education program with a minimum 3.0 GPA.
- Jeff Berberich Family Endowed Scholarship
  For an undergraduate or graduate student that has: 1) been placed in foster care or adoption services, 2) has served as a volunteer of Guardian ad Litem, or 3) has been through the Guardian ad Litem program.
- Fredericka Berger Benton Memorial Endowed Scholarship
  For an undergraduate or graduate student with a minimum of a 2.8 GPA.
- Mabelle Williams Benton Memorial Endowed Scholarship
  For an undergraduate or graduate student with a minimum of a 2.8 GPA.
- Berg Steele Pipe Corporation Endowed Scholarship
  For an undergraduate student with a minimum of a 2.8 GPA. Priority consideration is given to dependents of Berg Steele Pipe Corporation and eb Pipe Coating, Inc.
- Flo Bilelo Social Work
  For an undergraduate or graduate student with a minimum 3.0 GPA and demonstrated financial need completing the internship/field study curriculum in the Social Work program.
- Larson M. and Beverly J. Bland Endowed Scholarship
  For an undergraduate student with a minimum of a 2.75 GPA.
- Gary and Hollis Bliss Endowed Scholarship
  For an undergraduate student pursuing a degree in the College of Business or Communication.
- Frank Brown Memorial/Optimist Club of the Beaches Endowed Scholarship
  For a full-time undergraduate student with a course load of at least twelve hours, with a minimum 2.8 GPA.
- John A. Centrone Endowed Scholarship
  For an undergraduate or graduate student. Priority consideration is given to graduates of the Panama City Marine Institute.
- Century 21 Bay Brokers Council Endowed Scholarship
  For an undergraduate student with a minimum of 3.0 GPA.
- Linda Arnold Christoff Memorial Endowed Scholarship
  For an undergraduate or graduate female student demonstrating academic ability and financial need.
- Charles W. Clary, III Endowed Scholarship

Programs Offered

The College of Applied Studies offers curricula leading to the Bachelor of Science (BS) degree. Students pursuing a baccalaureate degree in the College of Applied Studies may choose from the following degree programs:

- BS degree in Public Communication
- BS degree in Public Safety and Security with a major in Police Science
- BS degree in Public Safety and Security with a major in Law Enforcement Operations
- BS degree in Public Safety and Security with a major in Law Enforcement Intelligence
- BS degree in Public Safety and Security with a major in Crime Scene Investigation
- BS degree in Recreation, Tourism and Events
- MS degree in Corporate and Public Communication

Certificates

In addition to the degree programs, the College of Applied Studies offers certificate programs that provide additional specialized areas of emphasis. The certificate programs offered include: Graduate Certification in Event Management, Undergraduate Certificate in Underwater Crime Scene Investigation, and Graduate Certificate in Underwater Crime Scene Investigation. Additional information regarding the certificate programs may be found at http://appliedstudies.pc.fsu.edu/.

Institutes and Centers

The Science, Technology, Engineering and Mathematics (STEM) Institute at FSU Panama City promotes educational excellence by providing educators with professional skills and research based practices that foster exemplary teaching and inspire meaningful learning in STEM disciplines. The FSU Panama City STEM Institute is the Florida Engineering Affiliate for Project Lead the Way (PLTW). For more information, please visit http://www.stem institute.org.

Facilities

The College of Applied Studies is housed in seven buildings on the Panama City campus. The campus occupies just over twenty-five acres. The most recent additions to the campus are a $7.9 million Administrative Services Center and a $32 million Academic Center. The 14,000-square-foot Administrative Services Center, completed in March 2007, houses the police department, postal services center, maintenance department and receiving area, as well as the central utility plant for the entire campus.
For an undergraduate student with a minimum 3.0 GPA that has been admitted to the Elementary Education program.

Community Services Foundation of Bay County Endowed Scholarship
For an undergraduate or graduate student that is a resident of Bay County, Florida.

Dr. Hulon and Dinah Crayton Endowed Scholarship
For an undergraduate minority student enrolled in any academic program.

Don Crisp Endowed Scholarship
For an undergraduate student with a minimum 2.8 GPA. A personal statement is required and should include information pertaining to community service and student leadership activities.

Andol David Memorial Endowed Scholarship
For either a full-time undergraduate or graduate student with a minimum 3.0 GPA.

Death By Chocolate/Emerald Coast Business Women’s Association Endowed Scholarship
For an undergraduate or graduate student who is a resident of Bay County, Florida and is at least twenty-three years of age.

Alfred I duPont Foundation Endowed Scholarship
For an undergraduate student from the following areas in order of preference: 1) Port St. Joe, 2) Wewahitchka, 3) Gulf County, 4) Franklin County, 5) Bay County, 6) Northwest Florida, and 7) Florida.

Endowed General Scholarship Fund
For an undergraduate or graduate student with a minimum of 2.5 GPA.

FICPA Endowed Scholarship
For an undergraduate or graduate student with a minimum 3.0 GPA that has been admitted to the Accounting program.

Anita Darlene Freeman Memorial Endowed Scholarship
For an undergraduate or graduate student with a physical disability.

FSU Panama City Student Government Council Endowed Scholarship
For a full-time undergraduate or graduate student with a minimum 3.5 GPA.

GAC Contractors, Inc. Endowed Scholarship
For an undergraduate or graduate student with a minimum 2.8 GPA pursuing a degree in Civil and Environmental Engineering. Priority consideration is given to graduates of a high school in Calhoun, Gulf, Holmes, Jackson, Liberty, and Washington counties.

Hubert Green Endowed Scholarship
For an undergraduate or graduate student with a minimum 3.0 GPA. A personal statement is required and should include information pertaining to demonstrated community service.

Walter B. Hall, Sr. Endowed Scholarship
For an undergraduate or graduate student pursuing a degree within the College of Business that is a dependent or spouse of an active-duty or retired military member.

Karen Hanes Endowed Scholarship
For an undergraduate or graduate student with a minimum 3.0 GPA enrolled in at least six credit hours per semester with demonstrated financial need and academic ability.

HDR Endowed Scholarship
For an undergraduate student with a minimum 3.0 GPA enrolled in at least six credit hours pursuing a degree in Civil and Environmental Engineering.

John Hutt, Sr. Memorial Endowed Scholarship
For an undergraduate or graduate student enrolled in the College of Business.

Michelle Green Endowed Scholarship
For an undergraduate or graduate student with a minimum 3.0 GPA. A personal statement is required and should include information pertaining to demonstrated community service.

Jaqueline Isler Memorial Endowed Scholarship
For an undergraduate student in any degree program.

Wally Jenkins Memorial Optimist Club of the Beaches Endowed Scholarship
For a full-time (twelve semester hours) undergraduate student with a minimum 2.8 GPA. Priority consideration is given to students of the Beaches area of Bay County, Florida and to students who have not attended college within the past five years. A personal statement is required including information on academic and/or leadership awards received as well as participation in community activities and any affiliation with Optimist Clubs.

Walter B. Hall, Sr. Endowed Scholarship
For an undergraduate student seeking a degree in Civil and Environmental Engineering.

Mary Ola Reynolds Miller Endowed Scholarship
For an undergraduate or graduate student. Priority consideration is given to employees and qualified dependents of employees or Regions Bank’s Florida Panhandle Banking Group.

Dr. David Skinner Endowed Scholarship
For an undergraduate or graduate student seeking a degree in electrical engineering.

Society of American Military Engineers Panama City Post Endowed Scholarship
For an undergraduate student admitted to any engineering program at FSU Panama City who has demonstrated financial need.

St. Joe Community Foundation Endowed Scholarship
For an undergraduate or graduate student.

St. Joe Community Foundation Challenge Grant Endowed Scholarship
For an undergraduate or graduate student.

Stantec
For an undergraduate student enrolled in the Civil and Environmental Engineering program that has demonstrated financial need and academic achievement.

Estelle Cawthon Starling Memorial Endowed Scholarship
For an undergraduate or graduate student with residency in Bay or Walton County, Florida for a minimum of ten years with a 2.8 GPA. A personal statement is required and should include residency information.
Sussex-Bay Foundation Endowed Scholarship
For an undergraduate or graduate student with a minimum 3.0 GPA that has been admitted to one of the communication programs.

George G. Tapper Memorial Endowed Scholarship
For an undergraduate student. Preference is given to Gulf Coast State College graduates pursuing undergraduate degree. Demonstrated academic ability and financial need required.

Col. William W. Wood Memorial Endowed Scholarship
For a full-time (twelve credit hours per semester) undergraduate student who is a graduate of Gulf Coast State College and a high school in Bay County, Florida. Student must have a minimum 2.8 GPA to receive the scholarship and a minimum 2.5 GPA to maintain the scholarship. Recipients have priority for future scholarship awards for up to five semesters or until graduation without reapplication. Applicants must submit an essay consisting of a minimum of 500 words on the topic “What is the cost of freedom?”

Edward N. and June G. Wright Endowed Scholarship
For an undergraduate or graduate student. Preference is given to children (dependent or independent status) of full-time FSU Panama City employees (USPS or A&P) with 3.0 GPA.

Dr. Robert L. Young/First Union Bank Endowed Scholarship
For an undergraduate or graduate student that has demonstrated academic excellence in one of the following fields: Business/Finance, Fine Arts, or Education.

University Honors and Honor Societies
The College of Applied Studies encourages eligible students to participate in university honors and in the honors in the major program. For a list of University-wide honor societies officially recognized by Florida State University, requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin. College-wide honor societies officially recognized by the College of Applied Studies are listed below followed by the discipline-specific societies. For complete details of activities and membership requirements, contact the individual organizations.

Leadership/Scholastic Societies
Garnet and Gold Scholar Society facilitates involvement and recognizes the engaged, well rounded student who excels within and beyond the classroom in the areas of Leadership, Internship, Service, International, and Research. For more information, visit http://garnetandgoldscholar.fsu.edu or contact the FSU Panama City campus advisor Chelsea Snowden by e-mail at csnowden@pc.fsu.edu.

Garnet Key Honor Society of the Panama City campus, founded in 1986, recognizes students primarily for service and scholarship, but also for spirit and leadership. Activities are generally service projects and functions for the Panama City campus. Applicants must have completed fifteen semester hours at that campus with a GPA of 3.5 or higher. For more information, e-mail crios@pc.fsu.edu.

Student Activities
The Scuba, Hyperbaric, and Recreational Club (SHARC) is a dive club established to coordinate and facilitate SCUBA training due to FSU Panama City student interest in scientific and recreational diving. Membership is open to all regardless of certification status. Certified divers that are members have access to club resources such as regulators, dive lights, and buoyancy compensators. For more information, contact Darren DeDario by e-mail at sharcfsupc@gmail.com, the FSU Panama City Dive Locker at (850)770-2206, or visit the club’s Web site at http://pc.fsu.edu//Students/Student-Organizations/SHARC.
Dean: Sam Huckaba; Associate Deans: Rob Contreras, Lois Hawkes

The oldest college at the University, the College of Arts and Sciences has provided generations of undergraduate students instruction in the liberal arts disciplines that are essential for intellectual development and personal growth: English; history; humanities; and the physical, biological, mathematical, computational, and behavioral sciences. At the graduate level, too, the contributions of the College of Arts and Sciences have been integral with the growth of the University. The first recorded master’s degree at the Florida State College for Women was awarded by the College of Arts and Sciences in 1908, and the first doctorate at Florida State University was awarded in chemistry in 1952.

College of Arts and Sciences faculty have earned national and international recognition for research, teaching, and distinguished service to the profession. In addition to awarding Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), Master of Fine Arts (MFA), and Doctor of Philosophy (PhD) degrees, and heavily supporting the Liberal Studies Program, the College of Arts and Sciences offers an extensive array of foundation courses for pre-professional and professional programs.

Requirements

All students must meet the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin. In addition, all students receiving a degree from the College of Arts and Sciences must satisfy the requirements listed in the following paragraphs.

In order to enroll in the College of Arts and Sciences, an undergraduate must be certified by the Division of Undergraduate Studies or be a transfer student with fifty-two or more semester hours of accepted credit. Admission to the College of Arts and Sciences requires at least a 2.0 grade point average (GPA) and completion of at least half of liberal studies including the required English Composition and Qualitative/Logical Thinking. Since individual departments may stipulate higher admission standards, students should consult the appropriate chapters of this General Bulletin for specific requirements.

Foreign Language. The College of Arts and Sciences requires that Bachelor of Arts and Bachelor of Science students be proficient at the intermediate level in one language other than English. Students may satisfy the requirement by completing college coursework through the 2000 level (2200 or equivalent course) of a classical or modern foreign language. Students enrolled in their first term at FSU and students with a 2.5 FSU GPA may take these courses on a satisfactory/unsatisfactory (S/U) basis, as long as they meet the published University deadline for declaring this intention. For information on University deadlines, refer to the “Academic Calendar” located on the Office of the University Registrar Web site at http://registrar.fsu.edu. A student taking coursework to fulfill the College’s foreign language requirement must earn at least a “C–”. Exceptions to this policy are rare.

Hours used to fulfill the foreign language requirement may not be counted toward a major or minor. Native speakers of a language other than English and students who wish to demonstrate proficiency by means other than coursework should consult the Department of Modern Languages and Linguistics.

Please note that the College’s foreign language requirement is different than the University’s foreign language admissions requirement. It is important to understand that, although completion of two years of high school foreign language courses or two semesters of postsecondary foreign language will satisfy the University’s admissions requirement, these courses do not satisfy the College of Arts and Sciences’ foreign language graduation requirements for BA and BS students. Please consult the “Admissions” section of this General Bulletin for more information.

All students who intend to continue study of a modern foreign language at Florida State University in which they have previous experience (such as high school study or study abroad) must be placed into the appropriate course by the Department of Modern Languages and Linguistics. Students in French, German, and Spanish who continue with the same language must take the placement test before they enroll in a course in the Department of Modern Languages and Linguistics. Students in other languages must consult the department for the appropriate placement procedures before enrolling.

Minor. Majors in the College of Arts and Sciences require the completion of an FSU approved minor. Exceptions include certain programs with collateral minors. Students completing a double major do not have to complete a minor. Students pursuing two degrees (dual degree or a second baccalaureate degree) must have a separate minor for each degree that is awarded by this College.

If one of the degrees is to be awarded by another College in the University, that dean’s office will specify any minor requirements. While many minors require only twelve semester hours, others require more. No courses used for satisfying liberal studies requirements, the College foreign language requirement or major requirements may also be counted toward the minor. Normally, the student’s minor will be in a different department than the major. In a few cases it may be possible to take the minor in a different program, but within the same department as the major. Students wanting to pursue that possibility must consult with an advisor in the dean’s office. Students must choose a minor from the list of approved FSU minors. See http://www.academic-guide.fsu.edu/minors.html for a list of FSU minors. Please note that completion of an FSU certificate program will satisfy the college minor requirement.

Requirements for the Major. See departmental entries for specific requirements. If courses from the major department are used to meet the liberal studies requirements, no more than four semester hours of these liberal studies courses may also be counted toward the major requirements.

Non-Degree Granting Interdisciplinary Program

Program in Interdisciplinary Computing: The College of Arts and Sciences supports the Program in Interdisciplinary Computing (PIC) with representation on the PIC Steering Committee. PIC is a non-degree granting program for non-computing majors, established to develop, support, and promote computing and information technology courses that empower FSU students to innovate and lead in their respective fields. Courses listed with PIC cover a wide range of computer skills with each course focusing on the application of those skills to the student’s discipline. See http://www.pic.fsu.edu for more information about PIC and a list of current PIC courses.

Second Baccalaureate Degree or Dual Degree

A student completing a second bachelor’s degree in the College of Arts and Sciences must complete at least thirty semester hours and a minor at Florida State University. This is in addition to the required hours that were completed for the first degree. Hours earned by the student during the completion of the first baccalaureate degree, over and above those extra credit hours actually required for the first degree, may not be included in the thirty semester hours. The student must complete a new major and a new minor and demonstrate satisfaction of the College of Arts and Sciences foreign language requirement.

Note: To distinguish between second baccalaureate degrees and second majors, see the appropriate paragraph under “Undergraduate Degree Requirements” in this General Bulletin.

Non-Degree Granting Departments

Aerospace Studies

Military Science
The Master of Business Administration (MBA) program is an accelerated, thirty-nine semester hour program. The program is offered on a full-time and part-time basis. The full-time program begins once each year in the Summer term. The part-time MBA program is offered on campus or online and begins each semester. An online MBA with a major in Hospitality Management is also offered. Students are encouraged to have at least two years of work experience prior to entering the MBA program.

Students in the Master of Accounting (MAcc) program may major in either assurance services, accounting information systems, corporate accounting, or tax accounting. This program provides students with greater breadth and depth in accounting education than can be accomplished in the baccalaureate program. Students are admitted each semester.

The Master of Science in Management Information Systems program prepares students for careers in information systems analysis and design. The program is designed for students with a background in business who are looking to enhance their information systems development skills and/or change careers to management information systems. The program is taught online.

The Master of Science in Marketing (MSM) prepares students to manage the complexities faced by today's global organizations. MSM students may choose to pursue one of the following two concentrations: managing supply chain operations and professional sales. The program is taught on campus.

The Master of Science in Risk Management and Insurance is taught online. It is designed for professionals who wish to study part-time to advance and enhance their careers in the risk management/insurance industry.

The objective of the Doctor of Philosophy (PhD) in Business Administration is to prepare students for careers in university teaching and research. Students receive the Doctor of Philosophy in business administration and concentrate in one of the following areas: accounting, finance, management information systems, organizational behavior and theory, strategic management, marketing, or risk management/insurance.

Certificate and Minor Programs

The Minor in Business is available to students in non-business programs. Students interested in completing a minor in general business should contact the College of Business Undergraduate Programs Office for additional information. This information is also available at http://www.business.fsu.edu. Course availability for students interested in a minor in general business is limited.

The Minor in Entrepreneurship offers a certificate program for business students (thirteen credit hours) and non-business students (twelve credit hours). The Certificate in Entrepreneurship is designed for students who want to complement their majors with exposure to entrepreneurial concepts and practices. The curriculum will provide students with the tools and confidence to consider starting their own businesses.

The Minor in Free Enterprise and Ethics is a twelve-hour course of study which helps students develop an awareness of ethical choices viewed from a variety of economic, societal, civic, legal, and personal value system perspectives, as they relate to business practice in a free enterprise economy. It provides business students experience grappling with the kinds of realistic decisions they will encounter as practitioners.

The Certificate in International Business is part of the FSU Global Pathways initiative. Through a course of study which includes required and individually selected courses and activities, students will complement their business majors with global and cultural awareness that will be beneficial for entry-level positions in multinational corporations and domestic-based import/export businesses.

Institutes and Centers

The Jim Moran Institute for Global Entrepreneurship provides services to small businesses throughout Florida and provides students with opportunities to consult with and learn from successful entrepreneurs. The Marketing Institute conducts a wide range of marketing research and offers developmental support services to professionals in the public transportation, tourism, and sports. The Carl DeSantis Center for Executive Management Education sponsors numerous outreach programs that strengthen the relationship between College of Business faculty and the business community. The Center for Real Estate Education and Research fosters interaction among students, faculty, and the
real-estate community through forums in which executives and world-class scholars exchange ideas and share their insights with students. The Center for Human Resource Management facilitates networking among HR professionals and FSU faculty and students, aiming to establish and transfer best practices that support the advancement of human-resource management. The Florida Catastrophic Storm Risk Management Center is funded by the State of Florida to support the state’s ability to prepare for, respond to, and recover from catastrophic storms. The Gene Taylor/Bank of America Center for Banking and Financial Studies encourages excellence in education through research and service activities related to banking and finance. The BB&T Center for Free Enterprise supports initiatives that offer students various perspectives on free enterprise and ethics.

Facilities

The Charles A. Rovetta Business Building is ideally located near the center of campus adjacent to Strozier Library and the Oglesby Union. It contains modern classrooms, faculty and staff offices, and numerous support facilities. The College of Business Technology Center houses state-of-the-art computer laboratories and training rooms. It provides students access to the latest technology used in business. The College of Business Undergraduate Programs Office and Advising Center provides students a wide variety of advising services.

The Dedman School of Hospitality is located in the University Center Building B, which provides for the specialized academic/training objectives established by the school. In addition to classrooms, this state-of-the-art facility provides hospitality students with teaching kitchens, a technology center, a publication resource center, and a placement center. The building also contains an affiliated professionally managed city club that provides hospitality students with real-world food and beverage experience in elegant surroundings.

Scholarships/Awards

Faculty

The College of Business possesses several eminent scholar chairs and numerous endowed professorships. These prestigious faculty positions are occupied by outstanding scholars. These faculty not only conduct research, but teach at both the graduate and undergraduate levels.

Student Awards and Honors

A number of organizations are available to students in the College of Business. These organizations include service clubs as well as honor societies. The most prestigious honor society in business is Beta Gamma Sigma. This national honor society for business students was founded in 1913. The Florida State University chapter was established in 1962. Election to membership is the highest honor one can achieve in academics in the business area. Membership is available to both undergraduate and graduate students and is based upon outstanding academic achievement.

Scholarships

The College of Business offers several types of scholarships and financial aid for both undergraduate and graduate students. At the undergraduate level, the funding sources for the scholarships include the College of Business, specific individuals and firms, and various state and national industry associations. The amount and selection criteria of each award vary according to the program the award supports and the funding source. In addition to scholarships, the College of Business and the University provide numerous opportunities for part-time work as student assistants.

At the graduate level, the College of Business provides a number of fellowships to master’s and doctoral students. Graduate research and teaching assistantships are also provided to doctoral students and master’s students.

Requirements

All of the undergraduate programs in the College of Business are designated as limited access programs. To pursue any major in the College of Business, students must meet the admission requirements for the limited access program they wish to pursue.

Students should complete the prerequisite courses required for admission during their first three to four semesters of college work. Students attending Florida community colleges should complete the prerequisite courses required for admission while fulfilling general education requirements leading to the Associate in Arts (AA) degree.

Admission Requirements

Admission to the AACSB accredited undergraduate business programs is based on availability of faculty and space in the business departments. For each admission cycle (academic year), a minimum grade point average (GPA) is established by the College of Business that limits enrollment to a number of students consistent with the available faculty and space. The AACSB accredited undergraduate business programs include the following majors: accounting, finance, management, human resource management, management information systems, marketing, professional sales, real estate, risk management/insurance, and entrepreneurship.

To be eligible for admission to one of the business majors above, each student must complete the following requirements:

1. Must have completed at least fifty-two acceptable semester hours;
2. Must have compiled the required GPA (based on all attempted coursework at the college level) that is in effect for the term in which application is made. The required GPA may change each year; information regarding the current required GPA is available at http://www.business.fsu.edu; and
3. Must have completed the following courses with a grade of “C−” or better in each course (or an equivalent course): ACG 2021, ACG 2071, CGS 2100 or CGS 2518, ECO 2013, ECO 2023, MAC 2233, and STA 2023.

Admission to the hospitality management program is based on faculty and space availability in the Dedman School of Hospitality. To be eligible for admission to the hospitality management major or the professional golf management major, each student must complete the following requirements:

1. Must have completed at least fifty-two acceptable semester hours;
2. Must have compiled an overall grade point average (GPA) of at least 2.50 computed on all prior college level work;
3. Must have completed the following courses with a grade of “C−” or better in each course (or an equivalent course): ACG 2021, ACG 2071, CGS 2100 or CGS 2518, ECO 2013, ECO 2023, MAC 2233, and STA 2023.

The required GPA may change; information regarding the current required GPA is available at http://www.dsh.fsu.edu.

Academic Policies

1. Students are required to meet graduation requirements specified in the University General Bulletin in effect at the time they are admitted to one of the limited access programs in the College of Business, or subsequent General Bulletins including the General Bulletin in effect at the time they graduate, provided they graduate within a period of six years from the date of first entry.
2. Changes to this General Bulletin that have been formally approved prior to Fall 2015, but not in sufficient time to meet publication deadlines, will be effective Fall 2015. Students can receive information on these changes in the undergraduate programs office of the College of Business.
3. All students must complete an official pre-graduation check in the undergraduate programs office of the College of Business during the semester prior to the semester in which they plan to graduate.
4. All students must apply for graduation through the myFSU portal during the first three weeks of the semester in which they plan to graduate.
5. In all AACSB accredited undergraduate business programs, a minimum of thirty semester hours of the general business and major area requirements must be completed at Florida State University. Transfer of upper-level business courses must be from business colleges at other senior institutions, must carry prerequisites similar to those of the courses they are replacing, and must be approved by the College of Business. In evaluating this transfer credit, emphasis will be given to courses taken at other AACSB accredited business programs.
6. In the hospitality management program, transfer of hospitality courses from other institutions must be approved by the Dedman School of Hospitality.
7. Students are not allowed duplicate credit hours for courses repeated in which they have made a “D” or better.
8. The only courses offered by the business departments that may be taken on a satisfactory/unsatisfactory (S/U) basis are those courses restricted to S/U grades only.
The Program in Interdisciplinary Computing

The College of Business supports the Program in Interdisciplinary Computing (PIC) with representation on the PIC Steering Committee. PIC is a non-degree granting program established to develop, support, and promote computing and information technology courses that empower FSU students to innovate and lead in their respective fields. Courses listed with PIC cover a wide range of computer skills with each course focusing on the application of those skills to the student’s discipline. See http://www.pic.fsu.edu for more information about PIC and a list of current PIC courses.
COLLEGE OF COMMUNICATION AND INFORMATION

Dean: Lawrence C. Dennis; Associate Deans: Stephen McDowell, Ebrahim Randeree, Juliann Woods

The College of Communication and Information offers undergraduate degrees in Communication, Communication Science and Disorders, and Information Technology. These degree programs attract and prepare leaders who take responsibility for meeting the communication and information needs of all people and for engaging a diverse population in solving complex communication and information challenges. A world-wide transformation is changing both the way we communicate and the way we create, store, find, share, and use information. The College’s educational programs provide classroom and experiential learning opportunities that help students understand the changing communication and information environment and make communication and information useful and accessible to everyone. If you have a passion for helping others, a desire to be at the heart of communication and information transformations and want to get started on a rewarding and professional career, visit our Web site at http://cci.fsu.edu or contact our advisors.

Undergraduate Degree Programs

School of Communication

The School of Communication offers a degree in communication with two majors (digital media production and media/communication studies), and a degree in professional communication with two majors (advertising and public relations). These majors are organized according to various applications of communication skills and expertise in our society. Advertising majors focus on account management, strategic planning, and creative media planning. Public relations majors concentrate on public relations writing, tactics, and campaign management skills. These majors prepare for careers in advertising and public relations agencies and organizations. Media/Communication Studies majors are applicable to a number of career fields including law, media industries, media research, and communications. Digital media production majors pursue management or production careers in broadcasting, cable, video production and related fields. Visit http://comm.cci.fsu.edu/ for more information.

School of Communication Science and Disorders

The mission of the School of Communication Science and Disorders is to prepare students to demonstrate broad-based knowledge in communication processes and disorders and to integrate theoretical knowledge and research findings with clinical practicum experiences. The curriculum leading to the bachelor’s degree combines pre-professional preparation for the graduate program in the school. At the undergraduate level, students are provided experiences relating to the basic processes of hearing, language, and speech. Undergraduate students learn anatomy and physiology of the speech and hearing mechanisms; sound and its perception; the development of language and communication systems; the components of the English sound system; the neurological bases of speech, language, and hearing; basic concepts related to disorders in language, phonology, and fluency; as well as professional issues in communication disorders. The major professional, educational, and clinical experiences occur during graduate studies leading to the master’s degree. Visit http://commdisorders.cci.fsu.edu/ for more information.

School of Information

Information, communication, and technology influence almost all forms of human activity in our increasingly interconnected society. As such, there is a growing demand for Information Technology (IT) professionals who can think critically and innovatively about how technology can support the information and communication needs of various stakeholders in different sociotechnical environments.

The School offers a Bachelor of Science in Information Technology (IT) program with two majors: (1) Information Technology (IT) and (2) Information, Communication, and Technology (ICT). The curriculum provides students with the knowledge and skills they need to apply and manage information systems and technologies effectively and ethically, as well as to communicate and work collaboratively with diverse users and stakeholders in various contexts and sociotechnical settings. IT majors hone skills in areas such as network administration and security, design and development, health informatics, and social informatics. ICT majors learn how to strategically apply and manage Web-based and social media, and other digital and interactive technologies to support a variety of communication needs in areas such as public relations, news delivery, promotion and advertising, and social marketing.

The Bachelor of Science in IT draws upon the service tradition of the information fields by underscoring the importance of service learning and user-centered approaches in solving a variety of information, communication, and technology challenges. A combined bachelor’s to master’s degree program (BS to MS) combining a bachelor’s degree in Information Technology with a master’s degree in Information Technology is also available and offers eligible undergraduate students the opportunity to take up to twelve semester hours of graduate coursework, which may be counted toward both the BS and MS degrees. Check the Web site for more details: http://school.cci.fsu.edu. For more information, visit http://school.cci.fsu.edu/academics/undergrad.

Admissions Information

All three Schools within the College of Communication and Information (CCI) offer Bachelor of Science (BS) degree programs.

Programs of study leading to the Bachelor of Arts (BA) and Bachelor of Science (BS) degrees are offered through the School of Communication Science and Disorders and the School of Communication. Each major within the Schools is part of a limited access program requiring a separate application. Admission to each major is competitive. Interested students should indicate their major preference on their University application and seek advising through the College of Communication and Information. Candidates for the baccalaureate degrees also must comply with general University regulations governing these degrees and must complete the major and minor requirements of one of the Schools identified above. See School entries for specific area concentrations and requirements. To be awarded the BA degree, the student must complete the specified university-wide requirements for that degree.

Students seeking admission into the Bachelor of Science (BS) in Information Technology (IT) program in the School of Information must have completed specific program prerequisites and a program of liberal studies with an overall grade point average (GPA) of 2.0 or better. To be awarded the BS in IT degree, the student must complete the specified University-wide requirements for that degree including forty-two credit hours for either the IT or ICT majors. Students are advised to seek advising through CCI to prepare a program of study for their chosen major area.

See School entries in this General Bulletin and the College Web site, http://cci.fsu.edu/ for specific information regarding each Schools’ admission requirements.

Requirements for the Second Baccalaureate Degree (Dual Certificate)

A student completing a second bachelor’s degree in the Schools must complete at least thirty semester hours at Florida State University, in addition to the required hours for the first degree. The student must complete a new major and a new minor (with no overlap between these and the first major and minor).

Note: To distinguish between second baccalaureates and second majors (also known as double majors), see the appropriate paragraph under “Undergraduate Degree Requirements” in this General Bulletin.

Honors in the Major

The Schools of Communication, Communication Science and Disorders, and Information offer an honors program in the major. It is designed to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Dean’s List

Students who in any term carry a full-time course load of twelve or more letter-grade semester hours with a grade point average (GPA) of 3.5 or above earn the distinction of being on the dean’s list.

Bachelor’s to Master’s Degree Program

The College of Communication and Information has developed a combined bachelor’s to master’s degree program (BS to MS) combining a bachelor’s degree in Communication, Professional Communication, or Information Technology and a master’s degree in either the Integrated Marketing Communication or Media and Communication Studies programs in Communication. This program provides eligible undergraduate students...
the opportunity to take up to twelve semester hours of graduate coursework. These twelve semester hours may count toward both the BS and MS degrees. Check the Web site for more details: http://comm.cci.fsu.edu.

The College of Communication and Information has also developed a combined bachelor’s to master’s degree program (BS to MS) combining a bachelor’s degree in Information Technology with a master’s degree in Information Technology. This program offers eligible undergraduate students the opportunity to take up to twelve semester hours of graduate coursework, which may be counted toward both the BS and MS degrees. Visit the Web site for more details: http://ischool.cci.fsu.edu.

Graduate Degree Programs
Students making application for admission to one of the School’s graduate programs must also apply through the University Office of Admissions see http://admissions.fsu.edu for more information.

Communication
The graduate programs in Communication offer several specialized emphases leading to the Master of Arts, Master of Science, and Doctor of Philosophy degrees (see the departmental entry in the Graduate Bulletin and the Web site http://comm.cci.fsu.edu/ for more information.)

Communication Science and Disorders
Programs of study leading to the Master of Science, Master of Arts, Advanced Master’s, and Doctor of Philosophy degrees in the School of Communication Science and Disorders are described in the Graduate Bulletin and on the Web site, at http://commdisorders.cci.fsu.edu/.

Information
Established in 1947 as a professional school, the School of Information (iSchool) offers several graduate degree programs. The Master of Arts (MA) and Master of Science (MS) degree programs in Library and Information Studies (LIS) are accredited by the American Library Association (ALA). The iSchool also offers a Master of Science in Information Technology (MSIT), a specialist degree, and a Doctor of Philosophy (PhD) degree, as well as certificate programs in areas such as Information Architecture, Leadership and Management, Reference, Social Library Media Leadership and Youth Services. The School is a member of the Association for Information Science and Technology (ASIS&T): http://www.asis.org/, the Association for Library and Information Science Education (ALISE): http://www.alise.org/, and is a founding member of the iSchools movement: http://ischools.org/. For more information, visit the Graduate Bulletin or our Web site at http://ischool.cci.fsu.edu/academics/graduate/.

Facilities
The College of Communication and Information offers undergraduate students opportunities to enrich their learning experiences through participation in a variety of research centers, service, classroom facilities, and student professional organizations. These include the following centers and institutes:

- Center for Adult Language Laboratory
- Center for Augmentative and Alternative Communication Laboratory
- Communication and Early Childhood Research and Practice Center
- Center for Hispanic Marketing Communication
- Center for Information Analysis and Organization
- Goldstein Library
- Information Use, Management & Policy Institute (Information Institute)
- Institute for Digital Information and Scientific Communication (iDigInfo)
- Institute for Intercultural Communication and Research
- L. L. Schendel Speech and Hearing Clinic
- Neurolinguistic-Neurocognitive Research Center
- North Florida Center for Stuttering
- Project Management Center
- Research and Language and Literacy Lab
- Seminole Productions
- Speech and Voice Science Laboratory

In addition, the College provides students with access to state-of-the-art facilities and support through a wide range of computer and media production labs and technical support services, including the following:

Computer classrooms in University Center for advanced media production and statistical analysis

iSpace virtual computer system for developing Web pages and remote applications access

IT Help Desk and Computer Lab in the Goldstein Library to provide access to technology support, advanced software systems, and high-end computer systems

New Technology center in the William Johnston Building for instruction in networking, databases, media production, health information technology, mobile and enterprise information systems

WVFS, the university’s “college radio station”

Students within the college are very active in professional development organizations including the following:

- Advertising Club
- American Library Association Student Chapter
- Association of Information Technology Professionals
- Beta Phi Mu Honor Society
- Communication Graduate Student Association
- Forensics (Debate and Speech)
- International Communication Association
- National Communication Association
- National Student Speech Language Hearing Association
- Public Relations Society of America
- STARS Alliance for Broadening Participation in Computing
- Women in Communication
- Women in Computing
- Women in IT/ICT Sharing Experiences

The Program in Interdisciplinary Computing (PIC)
The College of Communication and Information (CCI) supports the Program in Interdisciplinary Computing (PIC) with representation on the PIC Steering Committee. PIC is a non-degree granting program established to develop, support, and promote computing and information technology courses that empower FSU students to innovate and lead in their respective fields. Courses listed with PIC cover a wide range of computer skills, with each course focusing on the application of those skills to the student’s discipline. See http://pic.fsu.edu for more information and a list of current PIC courses.
COLLEGE OF CRIMINOLOGY AND CRIMINAL JUSTICE

Dean: Thomas G. Blomberg
Florida State University has one of the oldest criminology programs in the world. The College of Criminology and Criminal Justice at FSU is an intellectual community where students are involved in and learn about advancing criminological research that links science and theory to matters of effective and responsible public policy. The College values scholarly collaboration and emphasizes the importance of research that has real-world implications.

At Florida State University, the discipline of criminology and criminal justice is viewed broadly as encompassing the scientific study of crime, criminals, the lawmaking process, the criminal justice system, crime prevention, and the treatment of offenders. The program is interdisciplinary and integrative in nature, drawing upon many different disciplines and paradigms for theoretical and methodological approaches. Among these disciplines are anthropology, biology, computer science, demography, economics, geography, history, law, philosophy, political science, psychology, public administration, social work, sociology, and urban studies.

The College’s programs focus both on theory and on practice in the belief that neither stands alone. Sound practice demands sound theory, and theories are developed and modified through careful study as they are put into practice. Based on this perspective, the undergraduate programs prepare individuals for a career in the criminal justice system, a related field, or additional study at the graduate level in criminology or law.

The College of Criminology and Criminal Justice offers undergraduate and graduate programs leading to the Bachelor of Science (BS) and Bachelor of Arts (BA) in criminology, and in computer criminology; Master of Science (MS); Master of Arts (MA); and the Doctor of Philosophy (PhD). An accelerated bachelor’s to master’s degree program is offered for qualified criminology and criminal justice students. A distance-learning Master of Science degree program in criminal justice studies is available. Also available is a dual master’s degree program with the School of Public Administration and Policy and the College of Social Work. For undergraduates, a certificate is available in criminology (distance learning). A distance learning Bachelor of Science degree program in criminology is also available. Evening courses are offered for undergraduate and graduate students.

Students in the College have an important opportunity for hands-on experience that is afforded by the College’s internship program. The University’s location in Tallahassee gives students access to extensive research and employment opportunities in various state and federal courts as well as several state correctional facilities, drug treatment facilities, a federal prison, and a variety of private sector institutions and organizations. The Legislature, governor, cabinet, attorney general, and the Florida Departments of Corrections, Probation/Parole, and Law Enforcement are located in Tallahassee. Study in the College of Criminology and Criminal Justice provides access to criminological facilities that match or exceed any in the nation.

University Requirements
All students of Florida State University must fulfill the Liberal Studies Program requirements set forth in the “Undergraduate Degree Requirements” chapter of this General Bulletin. Transfer students who have earned an Associate in Arts degree from a Florida public community college or state university will be considered to have met the liberal studies requirement.

Academic Performance and Retention
The College of Criminology and Criminal Justice reserves the right to discontinue enrollment of any student in the College at any time if satisfactory academic progress is not being made. Specifically, students majoring in criminology must make a grade of "C" or better in the three core courses and maintain a major GPA of 2.0. A student who has accumulated three unsatisfactory grades, (D+, D, D−, F, U, IE) in criminology and criminal justice courses taken for college credit at Florida State University or elsewhere, whether repeated or not, will not be readmitted, permitted to continue, or permitted to graduate for college credit at Florida State University or elsewhere, whether repeated or not, will not be readmitted, permitted to continue, or permitted to graduate for college credit at Florida State University or elsewhere, whether repeated or not.

A student who applies for readmission to the College must meet the major and degree requirements of the General Bulletin in effect on the date of readmission.

Major Requirements for Criminology
To major in criminology, a student must complete thirty-six semester hours in criminology and/or criminal justice studies coursework, including three core courses. The three core courses are Introduction to Criminal Justice (CCJ 2020), Criminology (CCJ 3011), and Introduction to Research Methods in Criminology (CCJ 4700). Two core courses (CCJ 3011 and CCJ 4700) are expected to be taken at Florida State University; CCJ 2020 may be taken at the community college. A minimum grade of "C" must be obtained in each core course. For acceptable core course substitutions, see the department for an approved list. An optional one-semester, full-time (fifteen semester hour) or part-time (eight semester hour) internship is available. If a student chooses to take the internship, only three of the fifteen semester hours will count toward the required thirty-six hours in the major. Students in the major are required to complete either a full-time internship, a minor, or second major in another department or program outside the College of Criminology and Criminal Justice, and must meet all requirements stipulated by the respective department or program.

For students transferring from another four-year university, at least twenty-seven semester hours must be earned at Florida State University in the College of Criminology and Criminal Justice; the University requires that the last thirty semester hours prior to graduation be taken at Florida State University. In addition, all University requirements must be met for either the Bachelor of Arts (BA) or the Bachelor of Science (BS) degrees.

Major Requirements for Computer Criminology
To major in computer criminology, a student must complete fifty-two semester hours in criminology and criminal justice, computer science and mathematics. Students must complete twenty-four hours in criminology and criminal justice and twenty-five hours in computer science coursework, including eight core courses. The required core courses from criminology and criminal justice are CCJ 2020, CCJ 3011, CCJ 4700, and CJE 3110. The required core courses from computer science are CDA 3100, COP 3014, COP 3330, and COP 3353. A total of six hours of capstone coursework representing criminology and criminal justice and computer science is required. Students must also complete three hours of Discrete Mathematics (MAD 2104). From an approved list, students must choose nine additional hours in criminology and criminal justice and twelve additional hours in computer science coursework. Students must earn a grade of "C" or better in CCJ 2020, CCJ 3011 and CCJ 4700, a "C-" or better in all other courses for the major, and maintain an overall GPA of 2.0. A minor is not required.

For students transferring from another four-year university, transfer courses within the major are evaluated on an individual basis; the University requires the last thirty semester hours prior to graduation be taken at Florida State University. In addition, all University requirements must be met for either the Bachelor of Arts (BA) or the Bachelor of Science (BS) degrees.

Approved criminology and criminal justice and computer science courses include: CCJ 3644, CCJ 3666, CCJ 4497, CCJ 4614, CIC 3010, CJE 4610, CJE 4010, CJE 4610, CJE 4010, CJL 3510, CJL 4064.

Internships
A variety of internships are available at the local, state, and federal levels. Internships can be chosen from the fields of law enforcement, courts, corrections, criminal justice planning, criminological research, and private sector opportunities. The internship is available for juniors and seniors who have completed the core courses (CCJ 2020, 3011, 4700). The intern receives a satisfactory/unsatisfactory (S/U) grade, and full credit is given upon successful completion of both the academic component and the work hours.

Students are advised that information pertaining to all matters of public record, such as arrests and convictions, may be required by the agencies accepting interns. Although a reasonable effort is made to place a student in an internship, the University will not be liable if a student cannot be placed. Students are responsible for all living and transportation expenses during the field experiences.
Minor Requirements

A minor in criminology may be obtained upon completion of four classes. Introduction to Criminal Justice (CCJ 2020) and nine additional semester hours in criminology and criminal justice are required for a total of twelve hours. CCJ 2020 may be taken at the community college prior to admission to Florida State University. Students cannot take CCJ 4905r, Directed Individual Study, CCJ 4933r, Seminar in Criminology, or CCJ 4938r, Special Topics in Criminology, to fulfill the minor. Grades of “C–” or better are required for all coursework in the minor.

Certificates

The College of Criminology and Criminal Justice offers a distance learning certificate program in criminology.

Honors in the Major

The College of Criminology and Criminal Justice encourages eligible students to participate in the honors in the major program. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Bachelor’s to Master’s Degree Program

The College of Criminology and Criminal Justice offers a combined bachelor’s to master’s degree program (BS to MS). This program provides eligible undergraduate students the opportunity to take up to twelve semester hours of graduate coursework (with the permission of the appropriate instructor). These twelve semester hours may count toward both the BS and MS degrees.

Program Requirements

Participants in the BS to MS program must:
1. Have completed ninety semester hours of undergraduate coursework
2. Have a minimum GPA of 3.25
3. Be a major/double major in the College
4. Take the GRE and earn a score between 148 and 160.
5. Meet with an academic advisor to determine eligibility for the combined degree program

Note: Enrollment in the combined program does not guarantee acceptance to the graduate program in the College of Criminology and Criminal Justice. Students must still apply to the graduate program and meet all graduate requirements to earn the master’s degree. Effective August 2011, the GRE Revised General Test replaced the GRE General Test. To learn more about this new test, go to http://www.ets.org/gre.

Student Activities

Alpha Phi Sigma is the nationally recognized honor society of students in the College of Criminology and Criminal Justice. The society recognizes academic excellence of undergraduate and graduate students with a declared criminology/criminal justice major or minor. To become a member, a student must have completed one third of the total hours required for graduation at his or her institution. The local chapter advisor or faculty member must recommend the student. Undergraduate students must maintain a 3.2 overall GPA and a 3.2 in their criminology and criminal justice courses. Students must also rank in the top thirty-five percent of their class and have completed a minimum of four courses within the criminology and criminal justice curriculum. Graduate students are required to maintain a GPA of 3.4 in all courses. For additional information about the history of Alpha Phi Sigma and application forms, please stop by the Student Services Office in the Hecht House.

The American Criminal Justice Association-Lambda Alpha Epsilon is devoted to continuing high levels of professionalism in all areas of criminal justice. Any student committed to the field of criminal justice is invited to participate. The chapter holds regular meetings to provide members opportunities to exchange ideas and information. The Lambda Chapter of ACJA has much to offer students, including a pistol team, a crime scene team, and an academic team.

Scholarships, Awards, and Financial Aid

There are several scholarships available to students majoring in criminology and criminal justice or in computer criminology. The online application can be found at http://criminology.fsu.edu/degrees/undergraduate-programs/scholarships/. A committee appointed by the Dean selects the recipients.

Undergraduate scholarships and awards include: Frank A. and Lynn W. Baker, Eugene and Rosalind Czajkoski, Corey D. Dahlem, Jerry A. and Carolyn S. Glass, Kelley R. Ivey, Ernest Kearns Ponce De Leon, Reigall, James C. Sweat, Frederick Simon Family Memorial, Doyle E. Young Endowed Memorial, sgt. Daniel “Dale” Green Memorial, and Rob Williams. In addition, the Robert L. Clark Memorial Award, Joe Harris Memorial Award, and The Florida Sheriffs Association Law Enforcement Academy Scholarship are presented yearly to outstanding graduate students.

Small loans are available to undergraduates from the Tompkins Student Loan Fund. Further information on loans, grants, work-study opportunities, and scholarships is available from the College or from the University’s Office of Student Business Services.
College of Education

Dean: Marcy Driscoll; Associate Dean for Academic Affairs: Amy R. Guerette; Associate Dean for Faculty Development: James Sampson; Interim Chair, School of Teacher Education: Sherry Southerland

Teacher education at Florida State University is conducted within a conceptual framework that engages faculty, professional partners, and teacher candidates in a continuing process of preparing educational leaders for our global and diverse society. Florida State University prepares educational leaders who uphold high professional and academic standards and employ scientific inquiry and assessment as a basis for the continual improvement of student learning. They address the needs and abilities of diverse students through the use of appropriate instructional strategies and technology. These qualities are developed as candidates study and work within a community of professional partners.

The primary purpose of the College of Education is to prepare teachers and a variety of human services practitioners for a wide range of educational careers. The faculty of the College of Education provides experiences that enable students to acquire the professional competencies required by each field.

The College believes that all of its students should acquire a solid grounding in the liberal arts, as well as an understanding of human learning and behavior and social action. The responsibility for meeting these academic goals is shared by the College of Education and its collaborative partners in other units within the University and around the state.

The College of Education offers undergraduate programs leading to the Bachelor of Arts or Bachelor of Science degree in nine fields of study (majors). These programs prepare students for positions primarily in elementary and secondary schools, colleges and universities, vocational centers, and organizations that provide counseling services, recreational services, athletic training, or instructional design.

Undergraduate Departments, Majors, Certificates, and Teacher Preparation Programs

Department of Educational Leadership and Policy Studies
Certificate in Leadership Studies, Undergraduate

School of Teacher Education
Early Childhood Education
Education of Students with Exceptionalities
Elementary Education
English Education
FSU-Teach Program in Secondary Science or Mathematics Teaching
Social Science Education
Visual Disabilities
Visual Disabilities Studies (Non-certification)

Department of Sport Management
Sport Management

Admissions Standards for University Educator Preparation Programs

All teacher education programs at Florida State University are governed by the State of Florida Department of Education rules and the National Council for Accreditation of Teacher Education standards. These rules require that all students must meet specific criteria to be admitted into a teacher education program. See ‘Planning Guide to Teacher Education Programs’ later in this chapter.

In addition, early childhood education, education of students with exceptionalities, elementary education, and visual disabilities education are limited enrollment programs with capped enrollments. Students who satisfy the minimum requirements listed in this General Bulletin are not guaranteed admission to these programs. Admission to limited enrollment programs is competitive and regularly exceeds the minimum qualifications described in the next section.

Many departments have retention and exit standards that exceed normal University requirements. Refer to the department section for specific admission requirements and check with a departmental advisor.

The College of Education is committed to increasing the proportion of teacher candidates who have historically been underrepresented among Florida’s public school teachers. Applicants representing such groups are encouraged to apply.

Planning Guide to Educator Preparation Programs

Florida Statute 1004.04 and State Board of Education Rule 6A-5.066

Florida State University’s teacher education programs stress the importance of democratic values and institutions, the contributions of various ethnic groups to society, and the development of individual character as a means for appreciating the diversity of a pluralistic society. Students planning to complete one of the following undergraduate teacher education programs at Florida State University must meet all the conditions listed below to be granted the baccalaureate degree.

Undergraduate Educator Preparation Programs at Florida State University

- Art Education (College of Fine Arts)
- College of Education (see listing earlier in this chapter of the General Bulletin)
- FSU-Teach Program (double major with College of Arts & Sciences for those who wish to teach mathematics and/or science, grades 6-12)
- Music Education (College of Music)

Educator Preparation: General Education Requirements

Note: Students should consult with an advisor to determine how to simultaneously satisfy Florida State University liberal studies requirements and the teacher preparation general education core curriculum requirements.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fldoe.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Education Core Prerequisites
1. EDF X005
2. EDF X085
3. EME X040

In addition to EDF X085, the student must take six additional semester hours with an international or diversity focus. The eligible courses will be determined by the institution where the student is currently earning his or her Associate in Arts (AA) or baccalaureate degree. Foreign Language courses may be used to meet this requirement. Education courses may not be used to meet these communications, mathematics, natural and/or physical science, humanities, or social science requirements. Contact department and/or advisor for details.

Department/Program Prerequisites

See department listings in the General Bulletin for each department/program’s specific prerequisite requirements.

Common prerequisites and admissions criteria for state-approved teacher preparation programs are subject to revision based on changes in Section 1004.04, Florida Statutes, Public Accountability and State Approval for Educator Preparation Programs, State Board of Education Rule 6A-4.0021, Florida Teacher Certification Examinations, and State Board of Education Rule 6A-5.066, Approval of Educator Preparation Programs.
Criteria for Admission and Application to a Teacher Education/Educator Preparation Program

1. Have at least a 2.5 (on a 4.0 scale) grade point average (GPA) on all attempted college-level credits
2. Have a grade of “C-” or better in each required general education (liberal studies) English and each general education (liberal studies) mathematics course
3. Take and achieve a passing score on all sections of the General Knowledge portion of the Florida Teacher Certification Exam
4. Complete an application for admission to a teacher education program in the Office of Academic Services and Intern Support, 2301 Stone Building. This step is distinct from admission to the ‘upper division’ college or school.
5. Be approved by the appropriate teacher education department in accordance with departmental criteria
6. Be admitted to Teacher Education, a Florida Department of Education status requirement recognizing candidate eligibility for certification (application available in 2301 Stone Building)
7. Receive final approval by the Office of Academic Services and Intern Support

Professional Behaviors and Dispositions: While enrolled in teacher education programs, the student is expected to demonstrate behaviors and dispositions that conform to the “Code of Ethics” (State Board of Education Rule 6A10.080 FAC) and the “Principles of Professional Conduct in Florida” (State Board of Education Rule 6A10.081 FAC). The programs reserve the right to refuse or discontinue enrollment of any student who violates these expectations or in the judgment of a majority of the program faculty does not meet the program standards.

Note: These are minimum standards. Many programs have higher standards.

Note: There is no required minimum composite score on the ACT or the SAT for admission to Teacher Education. However, programs with limited enrollment status may require submission of the score and may use that score in determining which students will be admitted.

Subject Area Specialization/Professional Education/ Clinical Experience Curricula

1. At least thirty semester hours completed in the subject specialization area as determined by the student’s program
2. Professional education coursework to include: (a) reading-literacy acquisition for the appropriate certification level; (b) integrated classroom management, school safety, professional ethics, and educational law; (c) human development and learning; and, (d) assessment to include understanding the content measured by state achievement tests, reading and interpreting data, and using data to improve student achievement;
3. A series of clinical experiences in diverse settings throughout the program that culminates with a full-time student teaching experience of at least ten weeks duration in an approved setting; and
4. A Level II Security Check is required for all FSU students who will have direct contact with PreK-12 students. Students should be aware that if you have been arrested for certain crimes you may not be considered for a teaching position. Fingerprinting and Level II background clearance are required for any placement in a PreK-12 setting.

Note: Students should consult with a program advisor for specific course requirements.

Program Completion Requirements for candidates in the School of Teacher Education

Students must complete the following requirements to graduate from a teacher education program:
1. Maintain an overall GPA of 2.5 or above in all upper-division coursework (some programs may require a higher GPA)
2. Demonstrate achievement of standards and completion of specific coursework requirements set by the program
3. Meet all University graduation requirements, including requirements mentioned above under ‘Planning Guide to Teacher Education Programs’
4. Achieve a passing score on the General Knowledge, Professional Educator, and Subject Area portions of the Florida Teacher Certification Exam (FTCE) prior to entry to the final-term internship
5. Successfully complete the student teaching experience including successful demonstration of the Florida Educator Accomplished Practices (FEAPs) at the pre-professional level
6. Receive verification from the appropriate academic program of successful demonstration of the Florida Educator Accomplished Practices (FEAPs) at the pre-professional level, which includes the knowledge, skills, and dispositions necessary to help all students learn; and
7. Obtain final approval of the appropriate academic program and the Office of Academic Services and Intern Support.

Recommendation for a Teaching Certificate

Upon completion of an approved teacher education program and conferral of a degree from Florida State University, students are eligible to receive a recommendation for a standard teaching certificate.

Honors Program

The College of Education offers honors in the major work in several departmental and interdepartmental programs. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Emphasis in Special Education

Undergraduate students currently enrolled in the School of Teacher Education who wish to earn an emphasis in Special Education may choose to complete the following sequence of courses for a total of twelve semester hours. An emphasis in Special Education does not constitute adequate preparation for teacher certification in Florida or any other state.

- EEX 4770 Study of Human Exceptionality (3)
- EEX 4751 Collaboration with Families, Schools, and the Community (3)
- EEX 4014 Introduction to Mental Disabilities (3)
- EVI 4011 Introduction to Visual Disabilities (3)
- EEX 4201 Typical and Atypical Development and Learning (3)

Office of Academic Services and Intern Support (OASIS)

The Office of Academic Services and Intern Support (OASIS) provides a wide array of professional and administrative services to students and faculty in the College and throughout the University. Under the direction of the Associate Dean for Academic Affairs, OASIS is responsible for:

1. Providing centralized academic advisement for Basic Division students interested in majoring in education;
2. Collecting and processing applications for admission and readmission to the College of Education;
3. Maintaining the Dean’s academic records for all students formally admitted to COE programs;
4. Monitoring students’ progress toward the degree;
5. Collecting and processing applications for admission to other education programs;
6. Conducting graduation checks and clearing students for teacher certification;
7. For providing other consultative and administrative services for the students and faculty in the College.

OASIS is also responsible for the assignment and placement of teacher candidates in their final-term student teaching experiences. The Intern Coordinator works with teacher education programs in the University and the public schools of Florida in the organization of student-teaching placements and the selection of supervising teachers for candidate internships. Faculty members work closely with supervising teachers and candidates in the planning and coordination of the student teaching experience. OASIS is responsible for the final identification and screening of all students who make application for student teaching.

Students are assigned to the student teaching experience in the counties listed below. Academic programs have the discretion to establish a minimum group size of two or more student teachers per county. Academic programs may also restrict placement to particular counties. Exceptions to this policy will be made only through successful appeal on the part of a student to the University Student Teaching Appeals Committee. Candidates representing communication disorders, visual disabilities, music, school media, and school psychology will also be concentrated in those counties listed but may
be placed in additional locations should program certification requirements so dictate. Student Teaching assignments are subject to availability and district and school or agency acceptance. Therefore, placements are not guaranteed.

**Placement Locations**

- **Area I**: Gadsden, Jefferson, Leon, Madison, Taylor, and Wakulla counties
- **Area II**: Bay, Calhoun, Franklin, Gulf, Jackson, Liberty, Okaloosa, Walton, Holmes, and Washington counties (Area II placements are restricted to candidates enrolled in COE programs at the Panama City Campus.)
- **Area III**: Orange and Lake counties
- **Area IV**: Hillsborough, Manatee, Pasco, Pinellas, Polk, and Sarasota counties
- **Area V**: Pembroke Pines K-5 Charter School in Broward County
- Florida State University College of Education Professional Development Schools
- Other areas as determined by the University Director of Teacher Education

Academic programs are expected to inform their students of departmental placement policies well in advance of the semester of student teaching so that students may have the opportunity to plan appropriately. Also note that final term placement is conditionally based on the successful completion of all relevant program requirements, including passage of all required sections of the Florida Teacher Certification Exam (FTCE), and acceptance by an approved school district or agency.

Applicants are specifically not guaranteed assignment to their home county nor to the immediate and general vicinity of the campus. Submission of an application by a candidate constitutes an agreement to accept assignment in the school and county where it is determined that the candidate’s academic program objectives for student teaching can best be achieved.

A candidate is expected to meet professional standards as expressed in the pertinent school laws of the state of Florida. Candidates are also informed that, consistent with applicable law, information pertaining to all matters of public record, such as arrest and/or convictions in a court of law, may be routinely furnished to public schools as well as prospective employers. Finally, **fingerprinting** and **Level II-background clearance** are **required** for final-term placement in a public-school setting.

**Application to Student Teaching**

An application to student teaching must be submitted to OASIS, 2301 Stone Building, according to the following schedule:

<table>
<thead>
<tr>
<th>Semester</th>
<th>Deadline</th>
</tr>
</thead>
<tbody>
<tr>
<td>Spring Semester</td>
<td>No later than the deadline published in the Student Teaching Calendar.</td>
</tr>
<tr>
<td>Fall Semester</td>
<td>No later than the deadline published in the Student Teaching Calendar.</td>
</tr>
</tbody>
</table>

**Note:** Application materials, the Student Teaching Calendar, and the Student Teaching Handbook are only available online at [http://www.coe.fsu.edu/oasis/](http://www.coe.fsu.edu/oasis/). All student teachers are required to obtain copies of the student teaching handbook for their cooperating teacher and for themselves.

**Eligibility Requirements for Internship Placement**

To be eligible for final field placement as a student teacher, candidates must complete the following steps:

1. Admission to teacher education outlined above under ‘Criteria for Admission and Application to a Teacher Education Program’;
2. Successful completion of at least one semester of residence at Florida State University;
3. Successful completion of all required courses prior to the student teaching semester;
4. Successful completion of subject area specialization and professional education coursework outlined above under ‘Subject Area Specialization/Professional Education/Clinical Experience Curricula’ prior to student teaching;
5. Achievement of an overall GPA of 2.5 in all upper-division coursework (a higher GPA may be required by some academic programs for particular core courses);
6. Achievement of senior status (or graduate standing for ESE majors in the combined BS/MS program); and
7. Successful completion of specific clinical experiences as required by the program or University (see [http://www.coe.fsu.edu/oasis/](http://www.coe.fsu.edu/oasis/)).
FAMU–FSU COLLEGE OF ENGINEERING

Facilities

The College occupies over 200,000 sq. ft. of classroom, office, and laboratory space in a building complex especially designed for engineering education. It is located off the main campus of the university, in an area adjacent to Innovation Park, which also houses the National High Magnetic Field Laboratory, the Center for Advanced Power Systems (CAPS), the High Performance Materials Institute (HPMI), the Aero-propulsion, Mechatronics and Energy Center (AME) and other university, public and private organizations engaged in research, development, and clean industry operations. Each department of the College operates specialized laboratories for teaching and research that are listed in the College description of programs. In addition, the College operates computing facilities, a library and reading room, as well as machine and electronic shops for the common use of all programs.

Library

The mission of the College of Engineering Library is to support and enhance the learning, teaching, research, and service activities of the FAMU–FSU engineering communities by providing organized access to quality information in all formats, promoting information literacy, preserving information, and engaging in collaborative partnerships to disseminate ideas to advance intellectual discovery. The main book and journal collections for engineering are housed in the Dirac Science Library at Florida State University and in the Coleman Library at Florida A&M University. The newly renovated College of Engineering Library is a satellite for both university libraries and houses a small collection along with extensive access to electronic collections. Materials not available at the library may be requested through Interlibrary Loan or U-Borrow.

The library is staffed by a full-time librarian and several assistants who offer research assistance in person, over the telephone, and via e-mail and text. Instruction in library and information literacy is available to classes and groups upon request.

Library services also include Flip video cameras, laptops, headphones, and other technology that is available for check out upon request. Group study tables, lounging stations, and tutoring areas were all part of the innovative transformation of the engineering library in May 2011.

Computing Facilities

Students have access to various computing resources at the College of Engineering. Due to the unique requirements of engineering computing and the off-campus location of the College, the College is relatively autonomous in providing service to engineering students. The College has over 2,000 computing devices connected to its local network, managed by the College’s Communication and Multimedia Services (CMS) unit. Computers connect to the College’s network via 1Gbps and 100Mbps Ethernet connections. Over 200 high-end Intel-compatible workstations are provided for general student use. These computers are housed in four labs: one of the computer labs is open twenty-four hours a day when classes are in session, while the other three are used primarily as classrooms. The College also provides workstations in public areas that are available to students twenty-four hours a day, 365 days a year. A group of Sun Solaris and Linux servers backed by a Storage Area Network, as well as a number of independent Solaris, Windows, and Linux server platforms, provide a range of computing services to the College user community. CMS continues to evaluate and upgrade computer capabilities as computational needs grow. Additionally, both universities provide on-campus facilities that are available to all students. To support the instructional and research missions of the College, a variety of software packages are provided, including major general-purpose packages, as well as special applications oriented toward particular disciplines. The College’s research labs contain dozens of computational systems to provide enhanced research capabilities including complex number crunching for simulations. College researchers also take advantage of shared computational clusters located at the College and at each university. The College’s computing infrastructure uses high-end core router switches interconnected to edge switching via gigabit fiber. The College Internet connection is a gigabit link connecting through the Florida State University backbone (Florida State University acts as the Internet services provider for the College) allowing for fast access to the Internet and the LambdaRail network. Florida A&M University’s computing facilities are also connected to the Tallahassee MAN, thus providing a link to the College for its students. In addition to the local wired network, the College provides
wireless LAN services throughout the facility for students who may want to use their own laptops to connect to the College’s computing resources. The College has state-of-the-art instructional classrooms. The multimedia equipment in every classroom generally includes LCD projector, overhead projector, and/or document camera, VCR, and sound system. The ceiling-mounted LCD projector is used for large-scale projection and is linked to the PC at the instructor’s console. Multiple rooms are used for distance learning and the Florida Engineering Education Delivery System (FEEDS); these rooms have two studio cameras and one document camera connected to a desktop PC with a scan converter to display Web pages. Distance delivery of classes to/from the FSU Panama City campus occurs regularly, and distance-learning collaborations with other universities are frequent. Live and recorded programs, classes, and events are streamed via the Internet to authorized viewers. Multi-point IP videoconferencing is also available.

Supporting Facilities
Other nearby resources include the Office of Technology Integration (OTT); the National High Magnetic Field Laboratory (the ‘Mag Lab’); the Center for Advanced Power Systems (CAPS); the High Performance Materials Institute (HPMI); and the Aeropulsion, Mechatronics and Energy Building. The college also operates the Tallahassee Challenger Learning Center, a K-12 STEM outreach facility serving the Southeast region of the U.S. Located in downtown Tallahassee, the Center houses a 3-D IMAX theatre, planetarium, and a Challenger Space Mission simulator with Control Center. Other supporting facilities are Northwest Regional Data Center (NWRDC), Florida Department of Transportation research facilities, WFSU Public Broadcasting television and radio stations, as well as FAMU Computing Services.

Scholarships
Thanks to the donations from industry partners, educational programs, and private donors, the College of Engineering is able to offer a limited number of scholarships to qualified engineering students. Students can obtain scholarship information from the Office of Associate Dean for Student Affairs and Curriculum or by visiting the College Web site at http://www.eng.fsu.edu/scholarships/.

Career Services
The College provides a Career Center Office for students to obtain career related services. In addition, the University maintains a satellite office in the College Career Center to assist students in career and employment advising, including résumé, cover letter, and personal statement writing, internship oppor- opportunity, and permanent job searches nationwide. Career Center staff also aid in preparing engineering students for interviews and presentations at career expositions, such as Engineering Day in the Fall and Spring semesters.

Honors in the Major
The College of Engineering offers honors in the major in several departmental programs. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Requirements for Admission and Retention in an Engineering Major
Engineering is a demanding discipline, and students majoring in engineering must follow a required sequence of courses and achieve a high level of proficiency. All engineering students are subject to a uniform set of academic requirements agreed to by both FAMU and FSU, in addition to any other academic requirements stated in the respective university catalog and bulletin. These requirements, which are reviewed and revised as needed by the College of Engineering, have been established to ensure that program graduates receive a quality education and make progress toward satisfying engineering major degree requirements.

Pre-Engineering Requirements
All first-year engineering students (first-time-in-college or first-year trans- fer students) are initially coded as pre-engineering students until they satisfy the following pre-engineering requirements:

1. Students must have an overall GPA of 2.0 or better and achieve a grade of “C” or better in EGN 100FL First Year Engineering Laboratory (one semester hour), Calculus I, Calculus II, General Chemistry I, and General Physics I from any institution attended. Intended Chemical Engineering students shall replace General Physics I with General Chemistry II. A single repeated attempt in only one of the five courses listed above with no more than one grade of “C–” is allowed. Students who meet the following conditions may be eligible to receive an exemption from having to complete the First-Year Engineering Laboratory course: (1) students who are seeking a second bachelor’s degree, (2) students who have completed a similar course at another institution, or (3) students who transfer into the College having already received credit for all of the other pre-engineering courses listed above. Students who receive the exemption based on the third condition above (transfer to the College with credit for all of the other pre-engineering courses) must declare a major during their first semester at the College or they may lose their eligibility for the exemption. Students should contact the College of Engineering if they feel they qualify for the exemption. Any student who transfers out of pre-engineering before completing the course and then desires to transfer back to engineering must complete the course or its equivalent. Any student who needs two repeated attempts to complete the five courses or has two or more grades of “C–” may be considered for continuation in engineering if additional grade and coursework requirements are satisfied. Contact the Office of Student Services at the College of Engineering for details. Any student who needs three or more repeated attempts to complete the five courses listed above does not satisfy this requirement and will not be allowed to continue in the engineering program. There are NO exceptions to this requirement. Grades of “W” are not considered as repeated attempts.

2. Once a pre-engineering student satisfies all of the pre-engineering requirements, he/she may visit the Office of Student Services to initiate the transfer process to his/her intended engineering major prior to the beginning of the following semester.

Course Grade Requirement and Practice
1. It is the practice of the College not to use “plus and minus (+/-)” grading for any undergraduate engineering course.
2. Engineering majors must earn a grade of “C” or better in all engineering courses that apply toward the degree. One course grade of “D” may be waived by the academic dean upon recommendation from the department chair; and
3. A student who is failing a course cannot receive a grade of Incomplete (I). Students who receive a grade of Incomplete must complete all course requirements during the next term of the student’s enrollment.

Repeated Course Attempts Policy
A student who fails to earn a grade of “C” or better after a second attempt in the same engineering course or who has an excessive number of repeated engineering course attempts may be transferred from his/her current engineering major to the pre-engineering major. The student may be reinstated back to his/her original engineering major only upon the approval of his/her academic department.

Engineering Course Prerequisite Policy
It is the student’s responsibility to be aware of the prerequisites of an engineering course prior to enrollment in that course. A student may contact the engineering dean or department chair for additional information concerning course prerequisites and this policy. Failure to fulfill course prerequisites may result in the removal of the course from the student’s enrollment at any time during the semester, with no refund of tuition or fees.

College of Engineering Council of Academic Program Coordinators
The College of Engineering Council of Academic Program Coordinators (CAPC) has been assigned the responsibility to ensure that these academic requirements are equitably and consistently applied to all engineering students.

Course Withdrawal/Drop Policy
The Course Withdrawal/Drop Policy at the College of Engineering is different from the policy used by the University. Students who seek to withdraw from the University or drop a course should do so by the drop deadline established by the College of Engineering as outlined below:

1. Current Semester Withdrawal/Drop
   Engineering students may drop any course in the current semester for any reason up to the end of the seventh week of classes. After the seventh week and up to the Late Drop deadline of each semester is considered the Engineering “Late Drop” Period. There may be financial aid and other implications for dropping a course, so students should always contact their academic advisor first. All pre-engineering students and those classified as Basic Division (BD) are limited to a
total of two “late drops” during their tenure in the pre-engineering or Basic Division programs. Students who have reached their “two late drops” limit will not be permitted another late drop until they enter their intended engineering major and leave Basic Division. Students who are coded in a degree granting engineering major and are classified as Upper Division (IE) are permitted an unlimited number of “late drops.” Students wishing to withdraw from the University by dropping all of their courses may do so up to the Late Drop deadline. Engineering students will not be permitted to drop or withdraw after the Late Drop deadline except in documented cases in which the justification for the drop/withdraw is due to extenuating circumstances which are beyond the student’s immediate control. The drop/withdrawal deadlines are posted on the College of Engineering Web site (http://www.eng.fsu.edu) each semester. Students will be responsible for the grade they receive in all courses they are enrolled in any semester once the course drop/withdrawal deadline has passed.

2. Retroactive Withdrawal/Drop
A student may apply for a retroactive drop or withdrawal in a course which the student received a grade of “D” or “F” for extenuating circumstances beyond the control of the student. Extenuating circumstances must fall into one of these four categories: (1) personal illness, (2) death of an immediate family member, (3) military service, or (4) other. Each application is reviewed by a committee of engineering faculty to determine the merit of the request. Applications must be submitted before the deadline set each semester. This deadline is posted on the College of Engineering Web site (http://www.eng.fsu.edu). Additionally, no application for a course withdrawal will be accepted beyond one year from the semester in which the course was attempted.

Transfer Students
Students who plan to enroll in another institution for the first two years and then transfer into the College of Engineering should use great care in selecting freshman and sophomore coursework. To be admitted to an engineering major, transfer students must have satisfied the same pre-engineering requirements as students who take all their coursework at FSU. Transfer students who will earn an AA degree prior to enrollment at the College must have completed Calculus I and at least one other pre-engineering course (excluding First-Year Engineering Lab) listed in the Pre-Engineering Requirements section above. Students are strongly advised to consult with the College as early as possible concerning their first two years of study. Students who transfer out of an engineering major and then desire to transfer back to the college may be subject to additional academic requirements before their request to transfer is considered. Please consult with the Office of Student Services for more information.

Bachelor of Science Degree Requirements
A student who has taken a college preparatory curriculum in high school including algebra, geometry, trigonometry, physics, and chemistry can complete the requirements for the Bachelor of Science degree in four years and one Summer with an average load of sixteen hours per semester. A student with superior high school training may take advantage of opportunities for advanced placement through the University’s programs for acceleration. In order to satisfy the State of Florida, Division of Colleges and Universities, requirement of Summer attendance, it is recommended that students enroll in the Summer session at the end of the first year. Students who are not prepared to begin with Calculus I (MAC 2311) may need to attend one or more additional Summer sessions.

The engineering curriculum is made up of five components: liberal studies, first-year engineering laboratory, engineering core, required courses in the engineering major area, and technical electives.

Liberal Studies
All students must meet University requirements for baccalaureate degrees stated in the “Undergraduate Degree Requirements” chapter of this General Bulletin. Of the thirty-six semester hours required in liberal studies, twelve of these semester hours are automatically satisfied by the engineering core courses listed herein. The engineering student must take a total of twenty-four semester hours in the areas of English, ethics/social responsibility, history, humanities/cultural practices, natural sciences, and social sciences. Students unprepared to begin calculus at the university level must, of course, also complete the necessary mathematics coursework preparatory to calculus. All prospective engineering students should select humanities and social science courses to meet University requirements.

Engineering Core
All graduates of the College must master a common body of knowledge about their profession. This has been addressed by the adoption of an engineering core for all students seeking the BS in Engineering. Some of these courses may be completed at a community college that offers a pre-engineering track. Others are only offered within the College.

The engineering core, which consists of basic science, mathematics, and professional courses, ensures that every student is provided with a solid background education regardless of his or her option. The required courses are listed below:

1. 

2. 

3. 

4.
Undergraduate Courses

**EEL 3003. Introduction to Electrical Engineering (3).** Prerequisites: MAC 2312 and PHY 2049C. This course is an introduction to electrical engineering concepts for non-electrical engineering majors. Covers a broad range of topics including basic circuit theory, semiconductor devices, instrumentation, amplifiers, and machines. Not accepted for credit toward BSEE and BSCPE.

**EEL 3003L. Introduction to Electrical Engineering Laboratory (1).** Prerequisites: MAC 2312 and PHY 2049C. Corequisite: EEL 3003. This laboratory supports EEL 3003. Must be taken concurrently with first enrollment in EEL 3003. Must be dropped if EEL 3003 is dropped.

**EGM 3512. Engineering Mechanics (4).** Prerequisites: MAC 2312, PHY 2048. Corequisite: MAC 2313. This course covers statics and dynamics of particles and rigid bodies using vector analysis, free body diagrams, equilibrium of particles and rigid bodies, particle and general rigid body motion, work/energy, and impulse and momentum methods.

**EGN 1004L. First Year Engineering Laboratory (1).** This laboratory includes an emphasis on student time management, a variety of products and processes, and computer-aided problem solving. Product/process involves sketching and drawing pertinent diagrams by hand, and learning the history and engineering concepts involved.

**EGN 2123. Computer Graphics for Engineers (2).** Corequisite: MAC 2311. This course covers principles of engineering graphics: visualization, spreadsheet applications, graphical calculus, and descriptive geometry. Also introduces the engineering design process and CAD systems.

**EGN 3613. Principles of Engineering Economy (2).** Prerequisite: MAC 2313. This course emphasizes discrete cash flow diagrams, cash flow equivalence factors, standard criteria for comparing project proposals, special cash flow topics, special analysis, and case studies.

**EML 3100. Thermodynamics (2).** Prerequisites: CHM 1045, MAC 2312, and PHY 2048. This course discusses the fundamentals of thermodynamics. System description, common properties, Properties of pure substances, Mathematical foundations, First and Second Laws of Thermodynamics, closed and open systems. Equations of state and general thermodynamic relations. For non-mechanical engineering majors.
The College of Fine Arts was formed in 2005, with the combination of the former School of Visual Arts and Dance and the School of Theatre. The College has three academic units: the School of Art and Design, the School of Dance, and the School of Theatre. These academic units offer an extensive program of instruction in all areas of the visual arts, theatre, and dance. In fact, every level of undergraduate and graduate degree that a university can offer in these areas is represented within the College, including the established terminal degree in each discipline. Accordingly, the College is unique in the state of Florida.

Enhancement of the fine and performing arts is one of Florida State University’s specific goals as presented in its mission statement. The comprehensive nature and consistent quality of the College may be credited in large part to the recognition and support of the arts evident in the University. The very idea of arts training within a university context is held to be fundamentally important to an individual’s education in today’s society. The College of Fine Arts shares much in common with an independent arts school, but the differences are more important than the similarities. The University strives toward education of the whole person, and it has a great variety of cultural and curricular resources to reach this end. Therefore, our students have the opportunity to benefit from the entire University, a warm and friendly residential college and major graduate research institution. There is no substitute for this environment.

The College promotes the visual arts, theatre, and dance within this community. Its goal is to provide a broad-based liberal arts education for students, while at the same time training them to be dancers, actors, designers, artists, scholars, teachers, or other professionals in the field. It functions to enrich their lives and to provide them with the means of self-expression in an increasingly complex and impersonal technological society—a society ever more dependent upon visual language and information. The study and practice of the arts are therefore viewed as a necessary link in the educational system, both as a learning process and as a means of personal fulfillment. Measures are applied within the College—and indeed throughout Florida State University’s campus—to keep the spirit of open inquiry vital and productive.

Regardless of the department of a student’s major, the College of Fine Arts provides an unusual opportunity for working with a distinguished faculty of nationally and internationally recognized artists and scholars, all of whom teach undergraduate as well as graduate students.

Requirements of the College

By and large the College has few requirements that go beyond those stipulated by the University. As appropriate, these requirements are provided in the narratives describing the individual departments and programs. No minor is required by the College. Three programs grant degrees categorized as “limited access” in the sense that they are proficiency based: (1) the Bachelor of Fine Arts (BFA) in art (studio) and Master of Fine Arts (MFA) in art (studio); (2) the BFA and MFA in dance; and (3) the BFA in acting and in music theatre and the MFA in acting, costume design, directing, technical production, and theatre management. Entrance is gained through portfolio review or audition.

The Program in Interdisciplinary Computing

The College of Fine Arts supports the Program in Interdisciplinary Computing (PIC) with representation on the PIC Steering Committee. PIC is a non-degree granting program established to develop, support, and promote computing and information technology courses that empower FSU students to innovate and lead in their respective fields. Courses listed with PIC cover a wide range of computer skills with each course focusing on the application of those skills to the student’s discipline. See http://www.pic.fsu.edu for more information about PIC and a list of current PIC courses.

Facilities

In addition to the lecture rooms, general classrooms, seminar rooms, and media-specific laboratories (e.g., printmaking, electronic imaging, ceramics, sculpture, photography, and the like), four specialized facilities merit particular mention. Art students in designated degree programs are provided individual studios, making it possible for them to work in a healthy environment that promotes the cross-fertilization of ideas and constructive debate. Students at different stages of development learn from each other as well as from their professors, who regularly come to their studios for tutorials and critiques. These studios are housed in the Carnegie Arts Building. Second, dance students train in what are arguably the best university dance facilities in the nation, including seven spacious, comfortable studios and their own fully-equipped professional dance theatre, experimental black box theatre, and grand studio; in addition, students explore dance technology in state-of-the-art labs. Lastly, theatre students train and perform in four specialized venues, including two traditional prosenium theatres, a lab theatre, and a stage for student-produced works. Finally, students in art education, art history, and interior design work in specifically designed and dedicated spaces in the newly renovated William Johnston Building located in the center of campus.

Honors in the Major

The College of Fine Arts offers honors in the major in several departmental and interdisciplinary programs. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Study Abroad

The University offers many opportunities for international study open to all qualified state university students. Study-abroad programs range in nature from long-established study centers in Florence, Italy, and London, England, to recently developed programs in countries such as Spain, France, and South Africa. Operated by Florida State University, they provide the opportunity for a truly rewarding educational and cultural experience. Representing as it does a collegial body of students of art, the College of Fine Arts has a particular affinity for the Florence program, one that has led to a history of involvement since the founding of the program in 1966, largely through the efforts of the art history faculty. In every year that it has existed, at least one member of the College faculty has taught in Florence, and the College has significant representation among the students studying there. Of particular significance to students of theatre is the London program, with its year-round theatre offerings. Students of theatre, art, dance, design, and art history flourish in the rich, humanistic environments of these magnificent cities and cultural centers. This they can do usually without disrupting their sequence of courses and without loss of residency, since the Florence and London campuses are true extensions of the Tallahassee campus.

Museum Theory and Practice

The College of Fine Arts is the academic home of Florida State University’s museum theory and practice specialized study program. Open to graduate students of all departments, the program offers theoretical, practical, and methodological training in museum management, curatorship, fundraising, collections management, education and interpretation, marketing, exhibition development, and other museum topics. The curriculum includes courses taught by full-time faculty and practicing museum professionals, internships, and special museum projects. Emphasis is placed on career guidance and finding a position in the museum profession. Students have opportunities for firsthand experience at the College’s Museum of Fine Arts, the Ringling Museum of Art, and in other regional and national museums. Florida State University’s International Programs offer museum internships at international institutions in cities such as London and Florence.

On the undergraduate level, students studying art history may obtain a concentration in museum studies.

The Florida State University Museum of Fine Arts

The Florida State University Museum of Fine Arts is first and foremost an extension of the teaching mission of the College. Large, modern, and spacious, it houses the permanent collection and several times a year hosts student and faculty shows. In addition, the school faculty and museum staff pride themselves on originating shows of national prominence, documented through professional catalogs distinguished for their scholarship. The Florida State University Museum of Fine Arts is a community resource of regional significance in the Southeast, and is fully accredited by the American Association of Museums.

The John and Mable Ringling Museum of Art

Florida State University has been charged by the state of Florida with administration of the Ringling Museum of Art in Sarasota, Florida. This incredible museum complex with its superb internationally renowned art collection, circus museums, and Ringling mansion, offers multiple opportunities for stu-
Maggie Allesee National Center for Choreography

The mission of the Maggie Allesee National Center for Choreography (MANCC) is to raise the value of the creative process in dance by providing (1) a model of support for professional choreographic creativity within a comprehensive, graduate research university, (2) access to a stimulating environment where experimentation, exploration and life-long learning are both valued and encouraged, and (3) opportunities for engagement with the creative process in dance to the national field as well as our students, staff, faculty, and community.

Facility for Arts Research

The Facility for Arts Research (FAR) is a new venture of The Florida State University College of Fine Arts offering space and specialized equipment for experimental printmaking, spatial audio, electronics and digital fabrication to researchers, faculty and students as part of a rigorous interdisciplinary investigation into artmaking. FAR engages and educates 21st century makers in the collaborative, cross-disciplinary experiences of contemporary arts research, supporting and promoting the integration of digital and traditional art and design methods to create unique objects that might be impossible to make in other ways.

Accreditation

The College of Fine Arts is fully accredited according to discipline as appropriate by the National Association of Schools of Art and Design, the National Association of Schools of Dance, the National College Association for Teacher Education, the Council for Interior Design Accreditation, and the National Association of Schools of Theatre.
THE GRADUATE SCHOOL

Dean: Nancy H. Marcus; Senior Associate Dean: Judith Devine; Assistant Dean: Brian Barton, Lisa Liseno
The first graduate degree was a Master of Science (MS) degree in psychology that was awarded to Barbara Elizabeth James in 1903. Boris Gutbezahl, a student in the Department of Chemistry was awarded the University’s first Doctor of Philosophy (PhD) degree in 1952. The mission of the Graduate School is to advance the quality and integrity of graduate education. The Dean of the Graduate School is responsible for the broad oversight of all graduate programs. Florida State University offers an extensive range of graduate and professional programs through the fifteen colleges. Graduate education at FSU includes 121 master’s degrees, twenty-five specialist and advanced master’s degrees and seventy-eight doctoral degrees. Professional degrees are also offered in Law, Nursing and Medicine. In addition, a variety of opportunities are available for students interested in advanced degrees, including interdisciplinary degree programs, joint degrees, dual degrees, and combined bachelor’s/master’s degree programs. Florida State University also offers several online academic degree programs and graduate certificate programs. Details about these programs can be found in the appropriate department chapter of the Graduate Bulletin, and online at The Graduate School Web site http://gradschool.fsu.edu.

Combined Bachelor’s/Master’s Degree Programs
The combined bachelor’s/master’s degree programs provide academically talented students an opportunity to complete a bachelor’s and a master’s degree in a shorter time span. These programs allow students to double-count graduate courses for both degrees, thus reducing the time it would normally take. For more information visit the Graduate School Web site at http://gradschool.fsu.edu/Academics-Research/Degree-Programs/Combined-Bachelors-Masters-Degree-Programs.

Offices, Centers, and Special Programs
The Office of Graduate Fellowships and Awards, a unit of The Graduate School, assists current graduate students in identifying and applying for external fellowships, grants, and awards. The office provides a variety of workshops and events to introduce national funding opportunities, teach strategies for creating competitive applications, and discuss relevant campus policies and procedures. Additionally, students may seek one-on-one support as they polish their proposals. Entering graduate students may learn more about getting started with external funding opportunities at The Graduate School’s New Graduate Student Orientation. For more information, call (850) 645-0850, e-mail ogfa-info@fsu.edu or visit the Web site at http://ogfa.fsu.edu.

Current undergraduate students can obtain similar support services from the Office of National Fellowships as they begin their graduate planning. For further details, please visit their Web site at http://onf.fsu.edu.

The Frederick L. Jenks Center for Intensive English Studies (CIES) provides intensive instruction in the English language to non-English speakers. Its primary target audience is international scholars who are preparing to pursue degree work in American colleges and universities. In addition, CIES evaluates the English speaking proficiency of FSU’s international Teaching Assistants (TAs) through its administration and scoring of the SPEAK test. Along with this assessment, the Center provides credit-bearing classes for those prospective international TAs who need further development of their speaking proficiency in English. CIES also offers a seven-week Certificate in Teaching English as a Foreign Language for FSU students, or any in the community, who wish to go abroad to teach English. For further information, call (850) 644-4797 or visit the Web site at http://cies.fsu.edu.

The Program for Instructional Excellence (PIE) is a University program that helps prepare graduate student TAs for their instructional role at FSU and their future career in academia. The PIE program also supports departmental TA training. Through its programs, PIE creates opportunities to foster a sense of collaboration and community among graduate student TAs. For more information, visit the PIE Web site at http://pie.fsu.edu.

The Fellows Society is an interdisciplinary scholarly community consisting of graduate students who hold competitive national fellowships and university-wide fellowships administered by The Graduate School. The mission of the Fellows Society is to have Fellows participate in regular events, including the Fellows Forum, the Annual Orientation and Leadership Training, President’s Social, and other special events, designed to expand the intellectual horizons of its members through interdisciplinary engagement and leadership development. For more information, visit http://gradschool.fsu.edu/Fellows-Society.

Fellowships, Assistantships, and Awards
The Graduate School administers several internal University-wide fellowship and award programs to support or recognize the achievements of new and returning graduate students. Many graduate students receive financial support (stipend and tuition waivers) as Teaching Assistants, Research Assistants, or Graduate Assistants. Interested students should contact departments and administrative units directly for more details and information.

Details of these programs, with updated deadlines and due dates, are provided each year on the Graduate School Web site at http://gradschool.fsu.edu.
COLLEGE OF HUMAN SCIENCES

Dean: Michael Delp; Assistant Dean: Gregory J. Harris; Mack and Effie Campbell Tyner Eminent Scholars: Konrad Bloch (deceased), John Kinsella (deceased), Francis D. Fincham, William Ruben, William Jerome Vereen, Richard Lerner, James Banks, Richard Palmiter, Susan Watkins; Deans Emeriti: Margaret A. Sitton, PennyRalston, Billie Collier

The College of Human Sciences, which began in 1905, is the flagship program in human sciences in Florida and has as its mission to address global challenges and opportunities related to the physical, behavioral, and economic factors influencing the health and development of individuals, families, and communities. The College, which through its mission focuses on some of the most urgent issues in society, includes:

- bachelor’s programs in three academic departments: (1) Family and Child Sciences (FCS), (2) Nutrition, Food, and Exercise Sciences (NFES); and (3) Retail, Merchandising and Product Development (RMPD),
- master’s and doctoral programs in two of the departments: (1) Family and Child Sciences (FCS); (2) Nutrition, Food, and Exercise Sciences (NFES).

The baccalaureate degree programs are sufficiently broad to provide graduates with choices upon entering the job market. The reputation of the programs through the years means that graduates are regularly sought for professional positions in corporations, human services, public schools, hospitals, and other health agencies, among others.

Although the programs within the College are diverse, students graduate with an integrative approach in addressing societal concerns; critical thinking skills regarding issues affecting individuals, families, and communities; and fundamental competencies necessary to carry out professional roles. In addition, select programs require faculty supervised practica and internships, which provide students with the experience of applying theoretical and research knowledge.

The various student organizations in the College provide opportunities to extend interaction with faculty and professional leaders through a variety of activities, including field trips, service projects, and seminars. Many students increase their leadership and communication skills through involvement in these organizations.

The College is fully accredited by the American Association of Family and Consumer Sciences (AAFCS). In addition, the College has a Didactic Program in Dietetics (DPD) and a Dietetic Internship (DI) accredited by the Commission on Accreditation for Dietetic Education (CADE), an athletic training program accredited by the Commission on Accreditation of Athletic Training Education (CAATE), a doctoral program in marriage and family therapy accredited by the Commission on Accreditation for Marriage and Family Therapy Education (COAMFTE), and a Certification in Family Life Education approved by the National Council on Family Relations (NCFR). The College has an Eminent Scholar in Family and Child Sciences who directs the Family Institute. The department of Family and Child Sciences also operates the Center for Couple and Family Therapy and the Center for Better Health and Life in Underserved Populations. Other centers and institutes within the College include the Center for Advancing Exercise and Nutrition Research on Aging, the Center for Retail, Merchandising and Product Development, and the Institute of Sports Sciences and Medicine.

Facilities

The College has several new state of the art instructional laboratories in the newly renovated and expanded William Johnston Building. Included in this space are laboratories that enhance and enrich the student’s education in merchandising (the Macy’s Laboratory), technology (the Office Depot Technology Center), product development, nutrition informatics, experimental foods, food science, food sensory analysis, exercise testing and prescription, body composition assessment, blood chemistry analysis, and athletic training. Specialized laboratories in the Sandels Building include the textiles laboratory complex, which provides students chemical and physical testing facilities for end-use performance of textile products; and the historic clothing and textiles laboratory, which houses the Carter Collection of Peruvian Textiles and an extensive collection of accessories and children’s and women’s wear. Additionally, the Family and Child Sciences Department has several new teaching and research laboratories.

Opportunities

Undergraduate students may participate in Honors in the Major (see the “University Honors Office and Honor Societies” chapter of this General Bulletin) and may pursue a double major consisting of a combination of two degree programs. Practica are required in family and child sciences and athletic training. Internships are an integral part of the degree program in retail, merchandising and product development. Students majoring in family and child sciences may opt to have an internship if required academic criteria are met. Students who complete the DPD Program are eligible to apply for post-baccalaureate accredited dietetic internships in selected hospitals and community settings. The College of Human Sciences also offers a Living-Learning Center at Reynolds Hall with an emphasis on pre-health professions.

Scholarships/Awards

The College awards monetary scholarships annually. In addition, monetary scholarships are awarded annually by each department. Some of the awards are based on academic performance, some on need, and some on a combination of both.

Undergraduate Degree Programs in Human Sciences

Department of Family and Child Sciences
Family and Child Sciences

Department of Nutrition, Food, and Exercise Sciences
Food and Nutrition with majors in:
- Dietetics
- Food and Nutrition Science
- Athletic Training
- Exercise Science

Department of Retail, Merchandising and Product Development
Clothing, Textiles, and Merchandising with a major in:
- Retail, Merchandising and Product Development

Core Requirements for all Baccalaureate Degrees in Human Sciences

To receive a baccalaureate degree from the College of Human Sciences, students must complete FAD 2230 and a minimum of three semester hours outside their own major in one of the three departments in the College of Human Sciences.

Bachelor of Science and Bachelor of Arts Degrees

Candidates for baccalaureate degrees must comply with the general regulations governing baccalaureate degrees. Students in the College of Human Sciences may not receive more than nine semester hours of credit toward the degree from courses in office skills or in applied music and music activities. Also, students may receive up to two semester hours in physical education activities, which can be counted toward the degree. Candidates for the bachelor of arts degree must meet the foreign language requirement and other special requirements of the University.
Admission Requirements for College of Human Sciences

To transfer from undergraduate studies into one of the departments in the College of Human Sciences, the student must have a GPA of at least a 2.0. In addition, students who are not subject to mapping must satisfy the following departmental prerequisites:

- For the Department of Family and Child Sciences, at least a “B–” in FAD 2230, FAD 3343, CHD 2220, CHD 3243, and STA 2XXX, with two repeats of each course allowed to meet requirements.
- For the Department of Nutrition, Food, and Exercise Sciences, at least a “B–” in HUN 1201 and at least a “C+” in PET 3322.
- For the Department of Retail, Merchandising and Product Development, specified courses for the major of retail, merchandising and product development must be completed with a grade of “C” or better (see department listing).

Academic Performance and Retention

The College of Human Sciences reserves the right to discontinue enrollment of any student in the major at any time if satisfactory academic progress is not being made. In addition to satisfying academic mapping milestones or the above departmental prerequisites for students who are not subject to academic mapping, the following are the specific departmental academic performance and retention policies:

- For the Department of Family and Child Sciences, students majoring in family and child sciences must have a minimum overall GPA of 2.50 in major courses to graduate.
- For the Department of Nutrition, Food, and Exercise Sciences, students majoring in dietetics, food and nutrition science, athletic training, or exercise science must achieve a “C–” or better in all other required courses unless specified for certain courses.
- For the Department of Retail, Merchandising and Product Development, students majoring in retail, merchandising and product development must achieve:
  - a “C” or better in all other required courses and have a cumulative GPA of 2.50 or better to apply for the internship;
  - a cumulative GPA of 2.50 or better to take courses in the internship block.
COLLEGE OF LAW

Dean: Donald J. Weidner; Associate Deans: Nancy L. Benavides, Rosanna Catalano, David E. Landau, David L. Markell, Mark B. Seidenfeld, Manuel Utset, Jr.; Assistant Deans: Janea Daniels Ingram, Catherine Miller; Director of Development: Jeanne B. Curtin; Director of the Research Center: Faye Jones

U.S. News & World Report (2014) ranks the College of Law as the number one law school in Florida, and forty-fifth best nationally. The College encourages close working relationships between students and faculty—relationships that are characteristic of the best liberal arts colleges. Expert faculty members are accessible to students inside as well as outside the traditional classroom setting.

Prelegal Education

The College’s liberal arts orientation helps foster a strong sense of community in its students. This sentiment translates into student pride in the College of Law as an institution and a mutually held pride in one another. The liberal arts orientation also places great value on the insights of other disciplines that can be brought to bear upon the study of law. It is important to the faculty to integrate insights from such diverse disciplines as history, philosophy, psychology, sociology, economics, and finance.

Florida State offers law students a wealth of law-related employment opportunities. Located in Tallahassee, a city with more than 500 law firms and numerous government agencies, the College of Law is just steps away from the state capitol, the Florida Supreme Court, and the United States District Court for the Northern District of Florida.

The College of Law receives more than thirteen applications for every seat in its entering class. The College values students from a wide variety of backgrounds. Currently, the talented and diverse student body represents thirty U.S. states and territories, nineteen countries, and 147 colleges and universities. Florida State University’s College of Law has been repeatedly recognized by Hispanic Business magazine as one of the nation’s “Top Ten Law Schools for Hispanics.”

The College of Law offers unique programs to undergraduates who want to continue on to law school. Under a 3+3 Accelerated Bachelor’s/JD Program specifically for Florida State University undergraduates, students who meet certain admission requirements can complete a bachelor’s degree and a law degree in six years rather than the traditional seven, saving a year of time and cost. Undergraduate students who gain admission into the JD program through the 3+3 program will follow the usual prescribed course of study for full-time, first-year law students. Upon successful completion of the first year of law school, the thirty credits earned will be counted toward the undergraduate degree, sufficient to complete university requirements for the bachelor’s degree. The Juris Doctor degree will be awarded upon successful completion of the required minimum eighty-eight total course credits in the law school (including the thirty hours earned as part of the 3+3 program) and all other JD graduation requirements. The College of Law has similar 3+3 programs with other institutions.

The Summer for Undergraduates Program is the largest of its kind and has become a national model for other law schools. Sixty undergraduate college students are chosen to participate in this month-long program, which exposes students to the law school experience. During the program, undergraduates attend daily classes taught by law school professors and writing instructors. Lectures familiarize students with the functions of the American legal system and the process by which conflicts are resolved. Writing workshops help students develop their writing and communication skills. In addition to classes, the program provides guest lecturers from the legal community and includes observation of courtroom proceedings and visits to local law firms. The College of Law provides room and board, course materials, and a $500 stipend to all participants. Students are responsible for their travel to and from Tallahassee. For more information on this program, please contact the Office of Student Affairs at (850) 644-7338 or salfairs@law.fsu.edu.

The College of Law also offers an honors program to FSU undergraduates. Each year, a number of honors program undergraduate students are invited to apply to the FSU Honors Legal Scholars Program. This competitive program provides FSU honors students the opportunity to become members of the law school community as undergraduate students. As a member of the Honors Legal Scholars Program, students have a unique opportunity to meet and interact with FSU law faculty and administrators, observe law classes, attend law school events and lectures, and gain valuable information and insight into law school and the legal profession. Upon completion of their bachelor’s degrees, these scholars will receive automatic admission to the FSU College of Law provided that they complete and submit an FSU law school application; have an LSAT score of 162 or higher and an undergraduate GPA of at least 3.6; and have a record that reflects the fitness of character to study law. For more information on the honors program, please contact the Admissions Office at (850) 644-3787 or at admissions@law.fsu.edu.

Students from all majors have completed programs in law school. Undergraduate students considering law school are encouraged to visit the College of Law. Tours of the College and class visitations may be arranged through the Admissions Office. For more information please call (850) 644-3787 or e-mail admissions@law.fsu.edu.

Curriculum

The College of Law offers a rich and diverse three-year curriculum for the Juris Doctor (JD) degree. It begins with traditional courses and expands to include the latest in theoretical and interdisciplinary analyses. The first-year curriculum is rigorous, traditional, and prescribed. It provides a foundation in history, doctrine, process, and analysis. The second- and third-year curriculum is deliberately structured to provide students with the opportunity to obtain a broad, interdisciplinary exposure to various areas of law.

The College of Law has five co-curricular academic organizations, including three student-edited journals and trial and appellate advocacy teams. The journals include the Florida State University Law Review, the Journal of Land Use & Environmental Law and the Journal of Transnational Law & Policy. The College of Law’s advocacy teams are competitive regionally and nationally.

Requirements for Admission

For August admission, students must apply one year in advance, between September 1st and May 15th, or the deadline published by the College of Law. The College of Law enroll only one class in the Fall of each year, and does not offer a part-time or evening program. Submit and complete law school applications as early as possible. Files must be complete by May 15th to receive full consideration. Factors considered by the admissions committee include numerical credentials (LSAT and GPA), exceptional personal talents, interest in or experience with law or legal issues, leadership potential, rigorousness of the undergraduate course of study, maturity, a history of overcoming economic or other social hardships, ability to communicate effectively, and other factors. Decisions on applicant files are made as early as October.

The College of Law is a competitive process. For more information about the admissions process, please call (850) 644-3787 or visit the Web site http://www.law.fsu.edu/prospective_students/index.html. All registrants are required to have a baccalaureate degree from a regionally accredited college or university prior to commencing law study. Every prospective student must take the Law School Admissions Test (LSAT) given by the Law School Admissions Services. For more information about the LSAT, please visit the Web site http://www.lsac.org. Registration with the Credential Assembly Service is also required.

Special Programs

The College of Law has especially strong programs in three areas: environmental law, international law, and business law, with certificate programs in all three areas. The law school’s program in environmental law is recognized as one of the best in the country. For more information on these programs, please visit http://www.law.fsu.edu/academic_programs/index.html.

The College of Law offers ten joint-degree programs in cooperation with other colleges, schools, and departments at Florida State. The joint degree brings together law and aquatic environmental science, business, economics, family and child sciences, information studies, international affairs, public administration, social work, sport management, as well as urban and regional planning.

Building on its highly ranked environmental law program, Florida State Law offers a Master of Laws (LLM) in Environmental Law and Policy. The law school’s newest degree offering gives Juris Doctor (JD) holders the opportunity to earn a graduate degree in environmental law. The LLM in environmental law is especially strong in environmental law, natural resources law, and energy law. Florida State Law’s program is designed to provide LLM students with individualized, one-on-one attention. Incoming students are matched with program faculty members who will mentor them and help design a curriculum that will best suit their interests, educational background and professional needs.
The College of Law also offers an LLM program for foreign lawyers, which provides foreign graduate students trained in law with the opportunity to develop an understanding of the American legal system and the role of law in the United States.

The law school’s newest degree offering is a one-year program in law that is intended for those who possess a bachelor’s degree and who want to advance their careers with a year of legal studies and training. The program is flexible with few required courses – students can tailor their curriculum for their specific professional advancement goals.

Additionally, the College of Law has one of the most extensive externship programs in the United States. The clinical externship program places students in more than one hundred offices throughout Florida and elsewhere.

Clinics at the law school’s Public Interest Law Center provides “live-client” training for second- and third-year students. Students are certified by the Florida Supreme Court to practice law as interns and, under the supervision of licensed attorneys, are responsible for all facets of cases to which they are assigned, specializing in everything from foster care and health care access cases to child support and juvenile delinquency. In addition, students in the Business Law Clinic learn transactional skills and earn academic credit by helping advise business and social entrepreneurs within the Florida State University community.

The College of Law also sponsors a Summer program at Oxford University in England. As the oldest ongoing program in Oxford sponsored by a U.S. law school, it provides students with a unique opportunity to study comparative law and the history of the common law and its institutions in their original setting. For information write to: Director, The Florida State University Summer Program in Law at Oxford, Tallahassee, FL 32306-1600; call (850) 644-4578; or visit http://www.law.fsu.edu/academics/jd-program/study-abroad/oxford.
Premedical Education

The practice of medicine requires a sound science background, and most medical schools have the same standard list of premed requirements. Medical schools recruit, and the medical profession needs, individuals from diverse educational backgrounds who bring to the profession a variety of talents and interests. Medical schools review personal qualities, academic qualifications, communication skills, and motivation when considering candidates for selection.

Students considering medicine as a profession should consider carefully their undergraduate major area of study. Students should select a major area of study that is of interest and that will provide a foundation of knowledge necessary for the pursuit of several career alternatives. Students who select a major area of study solely, or primarily, because of the perception that it will enhance the chance of acceptance to medical school are not making a decision in their best interest. A science major is not a prerequisite for medical school, and students should not major in science simply because they believe this will increase their chances for acceptance. The most common majors for matriculating students include biology, biochemistry, psychology, exercise science, and business, and various other non-science majors.

The AAMC describes the medical profession as demanding in terms of the time, energy, and responsibility for other people’s lives, and states that the commitment to continuing service and education is essential. The practice of medicine requires physical, emotional, and intellectual stamina; the desire to work with and for people; and, particularly, the ability to use critical thinking to solve problems. The undergraduate years should be a time for students to discover if they possess these characteristics.

Undergraduate students who are thinking about medical school are encouraged to visit or contact the College of Medicine Pre-health Professions Advising Office, 1115 West Call Street, (850) 644-7678; or e-mail the school at medinformation@med.fsu.edu.

Degree Programs

Doctor of Medicine (MD)

The FSU College of Medicine trains students in allopathic medicine, which includes the diagnosis, management, and treatment of disease. The College confers upon its graduates the degree of Doctor of Medicine. Upon completion of the four-year Doctor of Medicine educational program, these physicians pursue graduate medical education (internship, residency, and sometimes fellowships), which is necessary for eventual licensure. Training in residency programs may take from three to nine additional years after completion of medical school.

To be considered for graduation from the FSU College of Medicine, a student must be judged by the Student Evaluation and Promotion Committee to be in good standing, must successfully complete and pass all required courses and clerkships, must successfully complete the end-of-third-year OSCE (Observed Structural Clinic Examination), must complete all required surveys and evaluations, and must have a passing score on the United Stated Medical Licensing Examination (USMLE) Steps 1, 2CK, and 2CS. Further information may be found in the Graduate Bulletin and in the College of Medicine Student Handbook at [http://www.med.fsu.edu/](http://www.med.fsu.edu/).

Honors Medical Scholars Program

The FSU College of Medicine, in conjunction with the FSU Honors Office, has established a program that is open annually to qualified students. The program allows eligible FSU honors students to pursue a Bachelor of Science degree of their choice while also participating in the Honors Medical Scholars Program, which includes a seminar course, mentorship program, and required pre-medical courses and experiences. Students participating in the program may be eligible for early admission to the FSU College of Medicine upon completion of pre-med requirements. Applications and program details are available from the FSU Honors Office at (850) 644-1841.

Doctor of Philosophy (PhD) in Biomedical Sciences

The Doctor of Philosophy in Biomedical Sciences Program is designed to prepare the next generation of health scientists for medical research and teaching in an era of increasing coordination and integration of traditional disciplines. Undergraduate majors in biology, biochemistry, chemistry, microbiology, or other life sciences are suitable for graduate studies in biomedical sciences. Research rotations during the first year allow students to make an informed choice of the research area and major professor with whom they will conduct their Doctor of Philosophy work. A core curriculum of the fundamentals, a wide array of electives from other departments, and intellectual interaction with faculty and post doctoral fellows encourage graduate students to mature into independent scientists.

To be considered for graduation from the FSU College of Medicine with the Doctor of Philosophy in Biomedical Sciences, the student must successfully complete all course requirements within five calendar years from the time the student gains admittance to candidacy by passing the preliminary exam. Other requirements for graduation include attending the Health Sciences Seminar Series; successfully completing the preliminary doctoral examination; submitting a doctoral research proposal approved by the major professor and the supervisory committee after admission to doctoral candidacy; registering for a minimum of twenty-four semester hours of dissertation credit; and submitting, publicly presenting, and successfully defending a dissertation.

Admission Requirements

Admission to the Doctor of Medicine (MD) Program

All inquiries regarding admission should be sent to College of Medicine, Florida State University, Tallahassee, FL 32306-4300; or e-mail at medadmissions@med.fsu.edu.

To apply to the College of Medicine at Florida State University (FSUCOM), an applicant should apply through the American Medical College Application Service (AMCAS) and should have taken the Medical College Admission Test (MCAT). To receive the FSUCOM formal secondary application, an applicant should be a U.S. citizen, should meet academic standards predictive of success in medical school (academic grade point average and MCAT score), and should have completed the required prerequisite courses. A listing of prerequisites courses may be obtained by contacting the Pre-health Professions Advising Office in the College of Medicine or on the College of Medicine Web site at [http://www.med.fsu.edu](http://www.med.fsu.edu). An applicant’s MCAT score should be dated no more than three years prior to the beginning of the year of the application cycle. A bachelor’s degree is required by the time of matriculation to medical school. If an applicant currently is enrolled in a degree program, the program must be completed and transcripts provided to the College of Medicine Admissions Office prior to the beginning of classes in June.

Doctor of Medicine (MD)

The FSU College of Medicine trains students in allopathic medicine, which includes the diagnosis, management, and treatment of disease. The College confers upon its graduates the degree of Doctor of Medicine. Upon completion of the four-year Doctor of Medicine educational program, these physicians pursue graduate medical education (internship, residency, and sometimes fellowships), which is necessary for eventual licensure. Training in residency programs may take from three to nine additional years after completion of medical school.

To be considered for graduation from the FSU College of Medicine, a student must be judged by the Student Evaluation and Promotion Committee to be in good standing, must successfully complete and pass all required courses and clerkships, must successfully complete the end-of-third-year OSCE (Observed Structural Clinic Examination), must complete all required surveys and evaluations, and must have a passing score on the United Stated Medical Licensing Examination (USMLE) Steps 1, 2CK, and 2CS. Further information may be found in the Graduate Bulletin and in the College of Medicine Student Handbook at [http://www.med.fsu.edu/](http://www.med.fsu.edu/).

Honors Medical Scholars Program

The FSU College of Medicine, in conjunction with the FSU Honors Office, has established a program that is open annually to qualified students. The program allows eligible FSU honors students to pursue a Bachelor of Science degree of their choice while also participating in the Honors Medical Scholars Program, which includes a seminar course, mentorship program, and required pre-medical courses and experiences. Students participating in the program may be eligible for early admission to the FSU College of Medicine upon completion of pre-med requirements. Applications and program details are available from the FSU Honors Office at (850) 644-1841.

Doctor of Philosophy (PhD) in Biomedical Sciences

The Doctor of Philosophy in Biomedical Sciences Program is designed to prepare the next generation of health scientists for medical research and teaching in an era of increasing coordination and integration of traditional disciplines. Undergraduate majors in biology, biochemistry, chemistry, microbiology, or other life sciences are suitable for graduate studies in biomedical sciences. Research rotations during the first year allow students to make an informed choice of the research area and major professor with whom they will conduct their Doctor of Philosophy work. A core curriculum of the fundamentals, a wide array of electives from other departments, and intellectual interaction with faculty and post doctoral fellows encourage graduate students to mature into independent scientists.

To be considered for graduation from the FSU College of Medicine with the Doctor of Philosophy in Biomedical Sciences, the student must successfully complete all course requirements within five calendar years from the time the student gains admittance to candidacy by passing the preliminary exam. Other requirements for graduation include attending the Health Sciences Seminar Series; successfully completing the preliminary doctoral examination; submitting a doctoral research proposal approved by the major professor and the supervisory committee after admission to doctoral candidacy; registering for a minimum of twenty-four semester hours of dissertation credit; and submitting, publicly presenting, and successfully defending a dissertation.

Admission Requirements

Admission to the Doctor of Medicine (MD) Program

All inquiries regarding admission should be sent to College of Medicine, Florida State University, Tallahassee, FL 32306-4300; or e-mail at medadmissions@med.fsu.edu.

To apply to the College of Medicine at Florida State University (FSUCOM), an applicant should apply through the American Medical College Application Service (AMCAS) and should have taken the Medical College Admission Test (MCAT). To receive the FSUCOM formal secondary application, an applicant should be a U.S. citizen, should meet academic standards predictive of success in medical school (academic grade point average and MCAT score), and should have completed the required prerequisite courses. A listing of prerequisite courses may be obtained by contacting the Pre-health Professions Advising Office in the College of Medicine or on the College of Medicine Web site at [http://www.med.fsu.edu](http://www.med.fsu.edu). An applicant’s MCAT score should be dated no more than three years prior to the beginning of the year of the application cycle. A bachelor’s degree is required by the time of matriculation to medical school. If an applicant currently is enrolled in a degree program, the program must be completed and transcripts provided to the College of Medicine Admissions Office prior to the beginning of classes in June.
Admission to the Doctor of Philosophy (PhD) in Biomedical Sciences Program

To apply for the PhD in Biomedical Sciences Program, students should contact the College of Medicine Office of Research and Graduate Programs at (850) 643-6420 or check the program’s website (http://med.fsu.edu/index.cfm?page=biomedicalsciences.phdBioMed). Admissions requirements for the Doctor of Philosophy in Biomedical Sciences Program are as follows: a prospective candidate must:

1. Have or be a candidate for a baccalaureate degree from an accredited college or university and be in good standing at the last institution attended.
2. Have a minimum GPA of 3.0 (on a 4.0 scale).
3. Have a minimum combined verbal and quantitative score of 1000 or above on the Graduate Records Examination (GRE).

The GRE Subject test is strongly recommended and may include biochemistry and cell biology, general biology, chemistry, or physics. Applicants whose native language is not English and who have not received a degree from an English language institution are required to take the Test of English as a Foreign Language (TOEFL), receiving a minimum score of 80 for the internet based (IB) test or 550 for the paper test. Special admission consideration may be requested based on disability.

Applicants may send the required material to the University Admission Office at https://admissions.fsu.edu/gradapp/

The Pre-Health Professions Advising Office

The Florida State University College of Medicine provides academic advising and counseling to students interested in pursuing careers in the health professions. Currently, over 1,300 students are enrolled in this advising program. Many of the students who seek advising in the advising office are pre-medical students. However, the program is open to all pre-health students including pre-dentistry, pre-veterinary, pre-pharmacy, pre-physician assistant, and pre-optometry. Full-time pre-health professions advisors meet regularly with these students throughout their college years, assisting with career goals, course scheduling, long-term academic planning, and professional school admission procedures.

In addition to one-on-one advising, the advising office also sponsors programs of special interest to pre-health students. Programs include panel discussions with admissions representatives from various medical and professional schools and workshops on succeeding in the application process and on interviewing strategies. The Pre-Health Professions Advising Office also sponsors a number of student organizations (refer to Organizations and Societies below).

Florida State University has a competitive acceptance rate to medical and professional schools nationwide, and many of our graduates have been recognized for their outstanding contributions and achievements in the field of medicine.

To register with the College of Medicine Pre-Health Professions Advising Office, call (850) 644-7678 or visit Suite 2140 at the College of Medicine to set up an appointment with a health professions advisor.

Organizations and societies sponsored by the Pre-Health Professions Advising Office are listed below:

- **Alpha Epsilon Delta** is the Pre-Health Professional honor society. The society welcomes members who are planning careers in medicine, podiatry, dentistry, veterinary medicine, optometry, pharmacy, but with an emphasis on the medical field. To become a national member, students must be in the second semester of their sophomore year and have an overall and a science GPA of at least 3.2. Freshmen and sophomores are encouraged to participate in activities of the society. The Florida-Beta chapter at Florida State University was founded in 1946 and is one of the oldest chapters in the Southeast. The society invites speakers who represent the health professions, plans trips to area professional schools, and participates in community service.

- **The American Medical Student Association (AMSA)** provides information, support, and leadership for future physicians in training. This organization stresses a strong commitment to service and is open to all FSU students.

- **The American Medical Women’s Association (AMWA)** supports women in medicine on the community, national, and international levels by increasing the awareness of health concerns that are exclusive to women.

- **The Aspiring Medical Professionals** provides an avenue for academic, professional, and social activities to the students taking Pre-Medical Professional coursework at Florida State University. Meetings include and foster interaction between faculty and students across campus from the departments of Biological Science; Nutrition, Food and Exercise Sciences; Psychology; and the College of Medicine. The main goals of this organization are to develop

a mentorship program between upper and underclassmen, facilitate academic and professional development of its members, and to promote undergraduate research and service.

**Hands of Hope** organizes consistent volunteering projects that aim to provide assistance to people with disabilities. We are officially affiliated with Tallahassee Memorial Hospital (TMH) and have a variety of volunteering opportunities open within TMH and many other institutions that further reinforce our mission to integrate students with and without disabilities. Regular volunteering events include Stroke Awareness Group and Afternoon Bingo with patients at the TMH Rehabilitation Center, monthly Build-A-Ramps, and nursing home visits. We also host speakers from various health professions and hold social events.

- **The Health Occupations Student Association (HOSA)** caters to those students interested in a health care profession. HOSA at FSU participates in many volunteer opportunities, competitive events, and allows students to meet current health care professionals. The mission of HOSA is to “enhance the delivery of compassionate, quality health care by providing opportunities for knowledge, skill and leadership development of all health science technology education students, therefore, helping students to meet the needs of the health care community.” To do that, HOSA participates in state and national leadership conferences where students attend workshops and interact with other students from all over the nation. Joining HOSA is a fun and rewarding way to gain knowledge of the health care field!

- **The Multicultural Association of Pre-Medical Students (MAPS)** works to enhance the recruitment of culturally diverse students into health care fields and to assist members in becoming more successful candidates for professional health and medical programs.

- **The Physical Therapy and Occupational Therapy Club** provides an opportunity for the pre-physical/occupational therapy students of Florida State University to assist one another in preparation for graduate school. The club provides a means by which pre-physical/occupational therapy students can get to know each other and help each other with planning, GRE preparation, and physical/occupational therapy school applications. We bring in practicing physical and occupational therapists, current physical/occupational therapy school students, and physical/occupational therapy school recruiters in order to help students understand the profession and gain knowledge of the physical/ occupational therapy school admissions processes.

- **The Pre-Dental Society** is an organization established to further educate those students who plan to enter dental school. The organization strives to advance the education of members by providing an information network in directing their pre-dental education. Members may access information about coursework, dental schools, test preparation, and the application process. Guest professionals from the local dental community in Tallahassee are invited to speak at meetings. Membership is available through the Pre-Health Professions Advising Office.

- **The Pre-Optometry Club** encourages and educates students who express an interest in pursuing a career in optometry. Students have opportunities to shadow optometrists and to meet representatives from optometry schools. The club seeks to encourage an exploration of the field while providing its members with information to better prepare for optometry school.

- **The Pre-Pharmacy Informational Leadership and Learning Society (PILLS)** is a student organization for those interested in pursuing a career in pharmacy.

- **The Pre-Physician Assistant Club** is an organization for students interested in a career as a physician assistant. Monthly meetings are held at the College of Medicine. The meetings include guest speakers from the community as well as presentations from physician assistant programs.

- **The Pre-Student of Osteopathic Medicine Association (P-SOMA)** is an affiliated chapter of the national Pre-Student Osteopathic Medical Association. We are dedicated to promoting the osteopathic tradition at Florida State University, and in the Tallahassee area, and to creating stronger, more knowledgeable students for entry into osteopathic medical institutions around the country. The chapter invites school admissions representatives, practicing physicians, and medical lecturers to speak at its meetings, and provides scholarships, shadowing opportunities, and volunteering experiences, tutoring, and opportunities for meaningful leadership to its members.

- **The Pre-Veterinary Society** is an organization that provides an environment where students can expand their interests in veterinary medicine. Members build a strong support group to share information about coursework, the application process, and volunteer opportunities in the Tallahassee area. A focus is on assisting the community with animal-related issues. Membership information is available through the Pre-Health Professions Advising Office.
Dean: Frank Patterson

Established in 1989, the College of Motion Picture Arts is one of only seven university-based film conservatories in the country. In the short time the College has been in operation, it has quickly become recognized nationwide as an outstanding motion picture production program. At the undergraduate level, the College offers Bachelor of Fine Arts (BFA) degrees with majors in Production and in Animation and Digital Arts. At the graduate level, the College offers Master of Fine Arts (MFA) degrees to those admitted. The College provides state-of-the-art motion picture equipment and studio facilities for production and post-production operations, and it funds all student workshops and projects, including the graduate and undergraduate thesis productions.

The expertise of the College’s faculty reflects the direction and range the school will take in the future. Frank Patterson, Dean of the College of Motion Picture Arts, has more than twenty years experience in the film and television industry as a writer, director, producer, editor, and consultant. He is joined by twenty-five faculty members, all of whom are specialists in the areas of producing, writing, directing, cinematography, visual effects, editing, sound recording, production design, motion picture history, theory, and aesthetics.

Faculty Distinctions

The College of Motion Picture Arts has a strong commitment to hiring experienced working professionals who have both teaching skills and professional goals. The full-time faculty comprises working filmmakers with various specializations as writers, directors, production designers, and editors in both the theatrical and non-theatrical film and television industries, many of whom have won national and international awards and honors for their work. Some also have strong records as research scholars and fiction writers. The faculty also includes visiting professors in the fields of motion picture law, business distribution, exhibition, and promotion.

Facilities

The College of Motion Picture Arts operates extensive production facilities for its graduate and undergraduate programs in University Center A on Florida State University’s campus in Tallahassee, and in an off-campus site in Midway, Florida, known as the Torchlight Center.

Considered one of the finest facilities in the world devoted exclusively to film education, it includes: professional sound stages, a green-screen/motion capture stage, a cinematography and set operations teaching stage, grip and electric trucks fully equipped with industry standard G&E equipment, an ADR and Foley recording studio, re-recording stages, QC and dailies screening rooms, digital animation/VFX production labs, color correction suites, a 120-seat screening room, digital animation/VFX production suites, seminar rooms, writer rooms, interactive classrooms, individual post production suites, teaching labs and student production planning rooms.

The College is equipped for and supports industry-standard acquisition in HD, 2k, 4k, digital formats, and digital sound recording formats.

In addition, the College hosts a resource center of over 5,000 motion picture titles, and other resources which include screenplays, books, and an archive of 35mm and 16mm film prints.

Undergraduate Degree Program

The programs of study leading to the Bachelor of Fine Arts degrees are designed to lead students through the complete process of creating short films, while incorporating a well-rounded liberal arts education that includes writing courses. Core courses in the majors include producing, directing, cinematography, screenwriting, sound, editing, production management, motion picture history, theory, and aesthetics. Students may be accepted into the programs at the freshman level or transfer into the programs once at least thirty semester hours of the liberal studies requirements have been completed.

The College’s world-class facilities aid in meeting the goals of the undergraduate programs—to educate students in the art and craft of motion picture storytelling and to help them become integral members of the academic community of Florida State University. Graduates are trained to be members of the entertainment profession and participants in a creative and professional enterprise.

Admission to the Undergraduate Program

Admission to the College of Motion Picture Arts is limited access, making admission highly selective and competitive. Applicants must apply to Florida State University’s Office of Admissions by their Fall admission deadline and must submit a separate application to the College of Motion Picture Arts. Each applicant must submit a résumé, three letters of recommendation, copies of high school and college transcripts, a creative portfolio (which can include film work, photographs, animations, etc.), a writing sample, and a 500–1000 word essay describing his or her motivation for becoming a filmmaker. Any application that does not contain all these items will be considered incomplete and will be denied automatically. All application materials must be received online by the College of Motion Picture Arts no later than the University’s Fall admission deadline for the applicant to be considered for admission the following Fall semester. More information concerning the undergraduate application is available online at http://film.fsu.edu.

Health Insurance

Students seeking degrees in certain majors, including film, assume any exposure to the particular hazards associated with that major. As protection for our students, the College of Motion Picture Arts requires that majors present proof of health and accident insurance (name of insurer and policy number) prior to registration in the Fall semester of each year. Students are expected to maintain this insurance throughout their enrollment in the program.
The College of Music provides a music minor for the divisions of the University that require a minor course of study. Admission to the minor program requires the following:
1. approval of the major department;
2. approval of the College of Music; and
3. an approved placement audition level on an acceptable instrument or voice.

Detailed information can be obtained from the College of Music’s undergraduate studies office.

The following are the graduate degrees offered by the College of Music:

- Master of Music with majors in:
  - Performance
  - Music Accompanying
  - Piano Pedagogy
  - Choral Conducting
  - Instrumental Conducting
  - Jazz Studies
  - Music Theory
  - Music Composition
  - Musicology (both historical and ethnomusicology)
  - Opera Production
  - Music Therapy

- Master of Music Education
- Master of Arts in Music – Liberal Studies
- Master of Arts in Arts Administration
- Doctor of Philosophy in Music Education
- Doctor of Philosophy in Music
  - Musicology
  - Music Theory and Composition
- Doctor of Music in Composition
- Doctor of Music in Performance

Consult the Graduate Bulletin for information on the graduate programs offered by the College of Music.

Facilities

**Music Facilities**

The College of Music enjoys excellent teaching, research, and performance facilities. The two College of Music buildings are located on Copeland Street on the east side of the campus. The Kuersteiner Building, completed in 1948, is a four-story structure that is connected to the Wiley L. Housewright Music Building, which was completed spring 1979. The College of Music also occupies a number of offices in the Longmire Building. These buildings house the administrative offices; teaching studios; classrooms; band, orchestra, choral, opera, and ensemble rehearsal halls; music education and music therapy research laboratories; electronic music studios; ethnomusicology studios; early music studios; concert and recital halls; the Warren D. Allen Music Library; the Center for Music Research; and 130 practice rooms. All music facilities are structurally designed for maximum effectiveness.

**Concert Facilities**

The Opperman Music Hall is a 430-seat recital hall located in the Kuersteiner Building. The facility is used for faculty and student recitals, concerts, and lectures. The Ernst von Dohnanyi Recital Hall, located in the Housewright Music Building, is a 218-seat facility used for recitals and lectures. The Lindsay Recital Hall, located in the Kuersteiner Building, is a 125-seat facility used for recitals and lectures. The Longmire Recital Hall in the Longmire Building is a 120-seat facility used for recitals and lectures. The Owen F. Sellers Music Amphitheatre is used for outdoor performances in the Fall and Spring. The Ruby Diamond Concert Hall is a large concert facility used for opera and major concert productions.
Music Library

The Warren D. Allen Library is conveniently located in the Housewright Building, where it serves the students and faculty of the College of Music as well as many users from other areas of the University. One of the major music libraries of the southeastern United States, the music library provides a pleasant setting conducive to the efficient utilization of the extensive collection of over 160,000 scores, sound recordings, videos, books, periodicals, and microforms. Housed in 18,000 square feet of space with comfortable furnishings and excellent sound equipment, the music library provides students with impressive resources and surroundings for the pursuit of their studies. Three librarians and other library staff are on duty to assist students and faculty in their use of the library.

Opera Shops

Built in 1977 and 1978, the Opera Scene Shop provides 6,000 square feet of construction space with some storage area. The building features a drafting office, elevated grid area for constructing wagons and assembling scenic flats or drops, complete hand and table tools, and a wooden “stage” area for painting drops. An opera production is built there each semester, as well as sets for opera scenes and opera majors’ projects.

The Opera Costume Shop is located in the Kellogg Building. Costumes are constructed or alterations are made on rental costumes each semester. In addition, costumes are constructed for various opera workshop scene programs.

Organs

A 1975, thirty-four stop Holtkamp tracker (mechanical action) organ in Opperman Music Hall is used for recitals, concerts, and lessons. Practice organs include tracker and electric action instruments by Holtkamp and Wicks. Two portable continuo organs are available for performances requiring small gans include tracker and electric action instruments by Holtkamp and Wicks. Two portable continuo organs are available for performances requiring small.

Specialized Studies Programs

In addition to the degree programs, the College of Music offers specialized studies programs that provide additional areas of emphasis. The specialized studies programs offered include:

- Arts Administration, Graduate
- College Teaching, Graduate
- Early Music, Graduate
- Jazz Studies, Undergraduate
- Music Education and Leadership, Graduate
- Music of the Americas, Graduate
- Music Therapy Equivalency, Graduate
- Pedagogy of Music Theory, Graduate
- Performance, Undergraduate
- Piano Pedagogy, Undergraduate
- Sacred Music (instrumental or vocal emphasis), Undergraduate
- Special Music Education, Undergraduate
- World Music, Graduate

Opportunities

Honors Program

The College of Music offers honors work in several degree programs to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Specialized Studies Programs

In addition to the degree programs, the College of Music offers specialized studies programs that provide additional areas of emphasis. The specialized studies programs offered include:

- Arts Administration, Graduate
- College Teaching, Graduate
- Early Music, Graduate
- Jazz Studies, Undergraduate
- Music Education and Leadership, Graduate
- Music of the Americas, Graduate
- Music Therapy Equivalency, Graduate
- Pedagogy of Music Theory, Graduate
- Performance, Undergraduate
- Piano Pedagogy, Undergraduate
- Sacred Music (instrumental or vocal emphasis), Undergraduate
- Special Music Education, Undergraduate
- World Music, Graduate

Additional information regarding the specialized studies programs may be obtained from the College of Music’s undergraduate or graduate studies offices.

Special Events

The College of Music provides students an opportunity to participate in many special events and experiences each year. Students interested in receiving additional information should contact the College of Music’s publicity office or the College’s undergraduate/study offices. A partial listing includes the following:

- The Festival of New Music. This biennial festival features recent works by composers from throughout North America.
- Housewright Scholar Residencies. The College of Music enjoys the residencies of visiting scholars each year through the Lucilla and Wiley Housewright Eminent Scholar Chair in Music.
- Summer Music Camps. Each year the College of Music provides a performance institute for high school and middle school musicians.

Other Special Events. The College of Music regularly hosts various conventions and workshops, presents festivals, and gives special courses.

Work-Study. Students eligible for work-study through the Office of Financial Aid may request employment through the College of Music.

Faculty Citations. The College of Music may award faculty citations to outstanding students who are pursuing the baccalaureate degree or to graduates who hold a baccalaureate degree from the College of Music. These citations bear the names of distinguished former members of its faculty: the Ernst von Dohnanyi citation for excellence in performance or composition; the Ella Scoble Opperman citation for distinguished achievement in the teaching of music and outstanding leadership; and the Warren D. Allen citation for excellence in scholarship. With faculty approval, additional citations may be awarded to graduates who hold master’s or doctorate degrees from the College of Music.

Scholarships/Awards

College of Music financial assistance is available in the form of undergraduate music scholarships and out-of-state tuition waivers. These awards are available to undergraduate applicants who demonstrate superior musical ability and are normally renewable provided satisfactory academic and musical progress is demonstrated.

College of Music scholarship assistance ranges from $500 to $3,000 for in-state students and $500 to $16,000 for out-of-state students. All undergraduate music major applicants are considered for College of Music financial assistance when they audition, provided they audition no later than the deadline established annually by the College of Music.

Additional information regarding College of Music financial assistance may be obtained from the College of Music Web site or by contacting the College of Music’s undergraduate studies office.

Requirements

Undergraduate Studies

Program Director: Dr. Ted Stanley

- All students working toward the Bachelor of Music degree, the Bachelor of Music Education degree, or the Bachelor of Arts degree in Music register directly in the College of Music.
- Students enrolled in other divisions of the University may take courses in music with the approval of the instructor and the Dean of the College of Music.

Liberal Studies for the 21st Century Program. Undergraduates are required to meet the liberal studies requirements as specified in the various music curricula.

Specific Requirements for all Music Majors

Placement Audition. All entering students are required to take a placement audition in applied music. All applicants must meet appropriate minimum standards through this audition before being granted admission to the College of Music. This audition is heard by a faculty jury and is closed to all except the area faculty concerned. Students are expected to be prepared to play or sing representative works of acceptable repertoire.

- If students meet the minimum standard requirement but are below freshman level, they must enroll in the applied music MV_ 101_ series until prepared for the MV_ 131_ or MV_ 141_ series.
- All students have the option of a reexamination for a higher course number at the end of any semester.

Jury Examinations. All students must meet the applied music proficiencies for their individual degree program each term for continuation in the music major. Jury examinations are required of all majors and principals at the completion of a two-semester sequence.

Note: At their discretion, applied teachers may require a student to take a jury examination at the end of any semester.
Curriculum Regulations

Auditions. Placement auditions for all undergraduate majors and music minors are required prior to registration. Jury examinations are given following two semesters of study in each applied music series (MV_1311–4346 series for all majors except performance majors; MV_1411–4446 series for performance majors).

Liberal Studies Requirements. Liberal studies requirements for all undergraduate curricula are listed by areas in the “Undergraduate Degree Requirements” chapter of this General Bulletin. Undergraduate music majors will fulfill the History requirement by selecting MUN 3121 (three semester hours), and the Humanities and Cultural Practice requirement by selecting MUL 2110 and MUH 2512 (four semester hours). Therapy, choral, instrumental, and general music education majors will select PSY 2012 General Psychology (three semester hours) as the Social Science requirement.

All Music Majors. A candidate for a baccalaureate degree must satisfy the following University requirements:

1. Liberal studies cumulative grade point average (GPA) must be 2.0 or higher
2. Cumulative GPA on all college work must be 2.0 or higher. Cumulative GPA for all music courses must be 2.0 or higher
3. Courses in liberal studies used to fulfill State Board of Education Rule 6A-10.030 must each be completed with a grade of “C”– or higher
4. A minimum of forty-five semester hours of upper division must be completed (3000 and 4000 level courses)
5. The final thirty semester hours must be completed at Florida State University; and
6. A minimum of one hundred twenty semester hours is required for graduation.

Each student is strongly urged to be knowledgeable of curricular requirements and University regulations that govern the student’s selected academic program. Although a faculty advisor is assigned to aid and assist a student in academic advisement matters, it is imperative for a student to assume the personal responsibility regarding academic progress and successful completion of the program.

Curricula Leading to the Bachelor of Music Degrees

Note: Students are encouraged to obtain specific program of study guides from the College of Music Web site, at http://music.fsu.edu/.

Performance Majors. Candidates for the Bachelor of Music degree in performance must select an area of concentration—piano, organ, voice, harp, guitar, percussion, or a string, woodwind, or brass instrument—and follow the curriculum in the chosen area of concentration. Bachelor of music degree candidates in all areas of performance are required to present a joint recital during the junior year (MV_3970) and a complete recital during the senior year (MV_4971). An examination will precede every such recital by at least two weeks.

All performance majors except piano and organ majors are required to demonstrate proficiency in playing piano accompaniments of medium difficulty (completion of second-year class piano [MVK 2121r] requirements). Credit earned in class piano may be used to satisfy the applied music secondary requirement. This requirement must be met before the end of the junior year.

Piano Performance Majors. Total of one hundred twenty semester hours: thirty-four semester hours and jury competency in applied music, including junior and senior recitals; four semester hours in keyboard literature; twenty-two semester hours in theory; ten semester hours in music history and literature; eight semester hours of ensemble; eight semester hours of piano pedagogy and piano accompanying; student recital attendance; one semester hour of music technology; one semester hour of conducting, and thirty-six semester hours of liberal studies.

Organ Performance Majors. Total of one hundred twenty semester hours: thirty-two semester hours and jury competency in applied music, including junior and senior recitals; two semester hours in applied music secondary; six semester hours in pedagogy and repertory; twenty-two semester hours in theory; ten semester hours in music history and literature; four semester hours of ensemble; student recital attendance; twelve semester hours of foreign language; one semester hour of music technology; one semester hour of conducting, and thirty-six semester hours of liberal studies.

Voice Performance Majors. Total of one hundred thirty-three semester hours: twenty-four semester hours and jury competency in applied music, including junior and senior recitals; four semester hours in applied music secondary; twenty-two semester hours of theory; ten semester hours in music history and literature; eight semester hours of ensemble; student recital attendance; twenty-one semester hours in diction/foreign language; five semester hours of choral literature and conducting and vocal pedagogy; six semester hours of vocal solo literature; four semester hours of opera/music theatre electives; one semester hour of music technology; and twenty-eight semester hours of liberal studies.

Strings Performance Majors (Violin, Viola, Cello, Double Bass). Total of one hundred twenty semester hours: thirty-two semester hours and jury competency in applied music, including junior and senior recitals; four semester hours in applied music secondary; twenty-two semester hours of theory; ten semester hours in music history and literature; twelve semester hours of ensemble; student recital attendance; eight semester hours of repertory and pedagogy; one semester hour of conducting; one semester hour of music technology; and twenty-eight semester hours of liberal studies.

Harp Performance Majors. Total of one hundred twenty semester hours: thirty-six semester hours and jury competency in applied music, including junior and senior recitals; four semester hours in applied music secondary; four semester hours in harp pedagogy and literature; twenty-two semester hours of theory; ten semester hours of music history and literature; student recital attendance; twenty semester hours of ensemble; four semester hours of electives; one semester hour of music technology; one semester hour of conducting; and twenty-eight semester hours of liberal studies.

Guitar Performance Majors. Total of one hundred twenty-four semester hours: thirty-two semester hours and jury competency in applied music, including junior and senior recitals; four semester hours in applied music secondary; twenty-two semester hours of theory; ten semester hours of music history and literature; four semester hours of ensemble; student recital attendance; twelve semester hours in pedagogy and repertory; eight semester hours of foreign language; one semester hour of conducting; one semester hour of music technology; and twenty-eight semester hours of liberal studies.

Woodwind, Brass, or Percussion Majors. Total of one hundred twenty semester hours: twenty-eight semester hours and jury competency in applied music, including junior and senior recitals; four semester hours in applied music secondary; six semester hours in wind and percussion instrument literature and pedagogy; twenty-two semester hours of theory; ten semester hours of music history and literature; student recital attendance; twelve semester hours of ensemble; six semester hours of electives; one semester hour of music technology; one semester hour of conducting; and twenty-eight semester hours of liberal studies.

Composition. Approval by the composition faculty is required for admission to the program. Total of one hundred twenty semester hours: sixteen semester hours and jury competency in applied music; six semester hours in applied music secondary; thirty-two semester hours of theory; fifteen semester hours of composition; ten semester hours of music history and literature; student recital attendance; senior recital of compositions; six semester hours of ensemble; one semester hour of electives; one semester hour of music technology; one semester hour of conducting; and twenty-eight semester hours of liberal studies.

Candidates for the Bachelor of Music degree in composition must pursue, and complete by jury exam, the study of a principal instrument through the MV_4341–4446 series. If keyboard is not chosen as the principal instrument, the candidate must fulfill the requirements of the completion of third-year (MV_3311r) class piano. A recital of compositions by the composition major is required during the senior year.

Music Theory. Approval by the theory faculty is required for admission. Total of one hundred twenty semester hours: sixteen semester hours and jury competency in applied music; six semester hours in applied music secondary; thirty-two semester hours of theory; three semester hours of composition; ten semester hours of music history and literature; student recital attendance; two semester hours of electives; two semester hours of thesis; six semester hours
of ensemble; twelve semester hours of German; one semester hour of music technology; one semester hour of conducting, and twenty-eight semester hours of liberal studies.

Candidates for the Bachelor of Music degree in theory must pursue, and complete by jury exam, the study of a principal instrument through the MV 4341–4346 series. If keyboard is not chosen as the principal instrument, the candidate must fulfill the requirements of the completion of third-year (MVK 3131r) class piano. A senior thesis by the theory major is required during the senior year.

**Music Theatre.** Approval by the music theatre faculty is required for admission. Total of one hundred twenty-seven semester hours: twelve semester hours and jury competency in applied music; seven semester hours in applied music secondary; six semester hours of music history and literature; twenty-nine semester hours of music therapy; three semester hours of other music; two semester hours of senior project; student recital attendance; seven semester hours of ensemble; twenty-eight semester hours of liberal studies. Following the completion of the academic program, candidates must serve a six-month resident internship at an affiliated, approved clinical site. Certain courses may satisfy both liberal studies and degree requirements. Candidates for the Bachelor of Music degree in music therapy who complete by jury exam the MV_2321–2326 level in the principal performance area may continue principal instrument study or may elect to study in two or three secondary performance areas. Dance may be used as one of the secondary performance areas. If piano is not the principal instrument, the candidate is required to meet the minimum internship requirements in piano either by completion of second-year class piano requirements (MVK 2121r) or by examination. A total of nineteen semester hours in applied music is required. Students completing the bachelor’s degree in music therapy are eligible to sit for the National Certification Examination and earn the credential MT-BC (Music Therapist Board Certified).

**Curricula Leading to the Bachelor of Music Education Degrees**

**Music Education Majors.** Candidates for the Bachelor of Music Education degree in choral music must choose as a principal instrument voice, piano, harp, guitar, or organ. Candidates for the Bachelor of Music Education degree in instrumental music will choose as a principal instrument piano, organ, guitar, or an orchestral or band instrument. Candidates for the Bachelor of Music Education degree in music education with an emphasis in music for the general student must choose as a principal instrument voice, piano, harp, guitar, organ, or a band or orchestral instrument. All music education majors must complete applied music requirements as specified in the respective curricula. All music education majors are required to meet the minimum requirements in class piano and class guitar prior to internship.

Florida has placed the following requirements on entry to a teacher certification program:

1. Grades of "C–" or better in all freshman English and basic mathematics courses; and
2. Additional requirements as stipulated by each department.

**Admission to the Music Education Professional Sequence.** The music education professional sequence comprises the following upper-division courses in the music education curriculum: MUE 3311, 3334, 3343, 3344, 3443, 3491, 3492, 3493, 3494, 3495r, 3496r, 4342, 4392, 4411, 4433, 4480, 4481, 4940; MUS 4970r.

Students pursuing the bachelor of music education degree in general, choral, or instrumental music may apply to the Internship Committee for admission to the professional sequence upon completion of the equivalent of forty-five semester hours at Florida State University or transfer of forty-five semester hours from an accredited community college or senior institution. Students may not enroll in courses listed in the professional sequence prior to formal approval by the Internship Committee.

Qualification for admission to the professional sequence is based upon the following minimum criteria:

1. Cumulative GPA of 2.5
2. Cumulative music GPA of 3.0
3. Successful completion of MUE 2040 with minimum grade of "C–".
4. Successful completion of the FTCE
5. Completion of liberal studies requirements in English and mathematics with minimum grade of "C–".
6. Successful completion of sophomore level applied jury; and
7. Satisfactory faculty evaluations in the areas of music education, applied music, music theory, class piano/guitar, and ensembles.

Transfer students who do not meet all of the above criteria may be admitted to the professional sequence on a provisional basis and may enroll in a maximum of five semester hours of professional sequence coursework during the first term of residence. Students assigned provisional status must complete all requirements and achieve a minimum overall GPA of 2.8 at the conclusion of the first term.

Students may be required to appear before the Internship Committee for an interview. The committee will approve or reject the petition on the basis of the criteria stated above as well as other factors that relate to teaching competency. Applicants denied admission may appeal during the subsequent semester. Those who reapplied must appear in person, document the removal of deficiencies that previously prevented admission, and present any other pertinent information to support reconsideration of the application.

Students applying for teacher certification in the state of Florida upon completion of the degree program should request that the certificate be assigned under the status of music education K–12.

**Bachelor of Music Education—Instrumental.** Total of one hundred thirty-four semester hours: twelve semester hours and jury competency in applied music; three semester hours in applied music secondary; six semester hours of theory; ten semester hours of music history and literature; four semester hours of ensemble; student recital attendance; fifty-four semester hours of music education including internship (students intending to intern in an elementary school must complete MUE 3344 [3] the semester preceding internship); two semester hours of senior project/recital; three semester hours of psychology; two semester hours of electives; and twenty-eight semester hours of liberal studies.

**Bachelor of Music Education—Choral.** Total of one hundred thirty-four semester hours: twelve semester hours of applied music; five semester hours of applied music secondary; sixteen semester hours of theory; ten semester hours of music history and literature; four semester hours of ensemble; student recital attendance; fifty-four semester hours of music education including internship (students intending to intern in an elementary school must complete MUE 3344 [3] the semester preceding internship); six semester hours of ensemble; three semester hours of psychology; and twenty-eight semester hours of liberal studies.

**Bachelor of Music Education—General Emphasis.** Total of one hundred thirty-four semester hours: twelve semester hours of applied music; five semester hours of applied music secondary; sixteen semester hours of theory; ten semester hours of music history and literature; four semester hours of ensemble; student recital attendance; thirty-four semester hours of music education including internship; two semester hours of senior project; three semester hours of psychology; and twenty-eight semester hours of liberal studies.

**Curriculum Leading to the Bachelor of Arts Degree in Music**

Total of one hundred twenty semester hours: eight semester hours and jury competency in applied music; sixteen semester hours of theory; ten semester hours of music history and literature; four semester hours of ensemble; twelve semester hours of upper-division music electives; student recital attendance; twelve semester hours of foreign language; thirty semester hours of electives/minor requirements; and twenty-eight non-music semester hours of liberal studies. At least sixty-six semester hours must be earned in non-music coursework.

**Requirements for a Minor in Music**

Admission to the program is by approval of the College of Music and by a placement audition at the principal level on an acceptable instrument or voice.

**Music Minor.** Total of twenty-five semester hours: four semester hours in applied music; twelve semester hours of theory; seven semester hours of music history and literature; two semester hours of ensemble; and two semesters of student recital attendance.
College of Nursing

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students must be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. BSC X085C or BSC X085/X085L or BSC X093 or BSC X093/X093L
2. BSC X086C or BSC X086/X086L or BSC X094C or BSC X094/X094L
3. CHM XXXX or BCH XXXX or BSC XXXX or PCB XXXX or PHY XXXX
4. DEP X004 or DEP X054 or DEP X000 or DEP X414
5. HUN X201 or NUR X192
6. MCB X010C or MCB X010/X010L or MCB X013C or MCB X013/ X013L or MCB X000/X000L or MCB X004/X004L
7. PSY XXXX or SOP XXXX or SYG XXXX
8. STA X014 or STA X023 or STA X122 or STA X022

BSN Program Requirements

Students desiring to enter the nursing profession should indicate their major preference on the University application and seek guidance from an academic advisor in the College of Nursing. A separate application to the College of Nursing is required for upper division admission to the nursing program. The College of Nursing reserves the right to interview applicants at its discretion. Application deadline for Fall is February 1st.

The College of Nursing program is an upper division limited access major accepting students in the junior year. Admission is competitively based on previous academic performance. The Florida Board of Nursing and several state and/or private agencies require the disclosure of conviction records for misdemeanors and/or felonies; therefore, this information will be required at the time of admission. Legislation aimed at protecting the public has made it necessary to require a Level II criminal background check (this includes FDL, FBI, and Certified Background Check) for all students admitted to the College of Nursing. The Level II report must be on file at the College of Nursing before students can enroll. If the background check reveals violations resulting in students being denied admission to a clinical agency and/or access to patients in the agency, and if a comparable assignment cannot be made to meet course objectives, the student will be unable to progress and complete the program in the College of Nursing. Completion of the curriculum does not guarantee the Florida Board of Nursing (or any other licensing body) will allow students with criminal records to take the licensing examination to become a registered nurse. The cost for these background checks must be paid by the student. The Certified Background Check will include the following: Patriot Act, Social Security Alert, Nationwide Healthcare Fraud and Abuse Scan, Sex Offender Index, local criminal check, residence history, and employment verification. Students will be required to submit a notarized Affidavit of Good Moral Character on an annual basis following the initial background check. Additional background checks may be required during the program based on clinical agency requirements. Drug screening will be required upon admission, and additional screening may be required throughout the program.

Students enrolled in the nursing program are expected to exhibit behavior that conforms to the Nurse Practice Act of the State of Florida. The College of Nursing reserves the right to refuse or discontinue enrollment of any student if the student violates the Nurse Practice Act of the State of Florida or in the judgment of the faculty the student does not meet the College’s standards. A drug math requirement is included in specified nursing clinical courses. A student must achieve one hundred percent accuracy to meet the drug math requirement of each clinical course. If a student fails to achieve one hundred percent on a third, repeat testing, the student fails the specified lab course.

To support the clinical competence of each student and promote patient safety, the College of Nursing has adopted a requirement for clinical skills testing. Each student is required to successfully complete clinical skills test-

Facilities

A variety of clinical laboratory settings are utilized for meaningful learning experiences. The College of Nursing Simulation Laboratories, Tallahassee Memorial HealthCare, Capital Region Medical Center, Florida State Hospital, Archbold Medical Center Thomasville, GA, county health departments, and other agencies in Leon and surrounding counties are used for the clinical component of the program. In addition, Wolfson Children’s Hospital in Jacksonville, Florida is used for pediatric clinicals. Internship clinical sites are available in partnership with acute care facilities. All experiences are under the direction of the faculty of Florida State University’s College of Nursing.

Opportunities

The College of Nursing offers honors coursework in the baccalaureate program. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Scholarships

Students requiring financial assistance should file an application with the Office of Financial Aid or confer with an academic advisor at the College of Nursing. Numerous scholarships and loans from federal, state, private, and College of Nursing sources are available.
ing. A student who fails to perform the testing correctly and safely is permitted one repeat testing. Inability to demonstrate skills successfully and safely by the second attempt affects the student’s progression in the program and s/he may not continue in clinical coursework.

A student who is passing a nursing course but has not completed all the required work for the course at the end of the term may, with the permission of the instructor, be assigned a grade of “I”, or incomplete. Students may not carry an incomplete grade in a prerequisite course through the next term. If the incomplete grade is not changed to a passing grade by the end of the drop/add period at the beginning of the next term, the student will be dropped from the continuing course(s).

A student must achieve a grade of “C” (2.0 on a 4.0 scale) or higher in each nursing theory and a “S” (Satisfactory) in clinical (both elective and required) course. Any course in which a grade below “C” is earned must be repeated before the student will be allowed to progress. Students who earn two final course grades below “C” (including a grade of “U”) in theory and/or clinical courses, whether repeated or not, will not be permitted to continue in the College of Nursing. Students may repeat a nursing course only one time. Students will not be permitted to repeat a clinical course in the same semester in which the course was originally taken. Students are not permitted to take two different level clinical or theory courses at the same time.

Nursing majors are responsible for transportation expenses related to clinical experiences. They are required to carry health and accident insurance. To safeguard the health of clients, nursing students are required to submit proof of health examination and immunizations upon entry into the nursing program. Students must maintain proof of BLS for Healthcare Provider certification, personal health insurance, and annual tuberculin skin testing throughout enrollment in the College of Nursing. Additional requirements may be imposed by individual clinical facilities/Agencies.

Candidates for the Bachelor of Science degree in the undergraduate nursing program must comply with University regulations governing Baccalaureate degrees and must complete the following:

1. All University undergraduate degree requirements, including specific prerequisites as outlined above
2. Required nursing courses
3. Required testing throughout the program (a fee, subject to change without notice, must be paid)
4. Completion of an achievement exam in the final senior semester
COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY

Dean: David W. Rasmussen; Associate Deans: Timothy Chapin, Robert E. Crew, Jr., Graham C. Kinloch

The University established social sciences as a separate College in 1973. The departments and programs that make up the College date from the earliest days of the University.

Students in the College excel in all aspects of University life. Graduates of the College have won some of the most prestigious academic awards available to undergraduate students, including the Truman, Cooke Foundation, and Rhodes Scholarships. Twenty-one students from the social sciences have served as president of student government. Our graduates have been ambassadors, senators, governors, and corporate CEOs, and have excelled in virtually all areas of the government, academic, non-profit, and private sectors.

The College’s faculty teach courses and do research related to every socioeconomic and political issue that confronts the United States at home and abroad. Among the distinguished faculty are nine eminent scholar chairs: the Mildred and Claude Pepper Eminent Scholar Chair in Social Gerontology, Jerry Collins Eminent Scholar Chair in Public Administration, Reubin O’D. Askew Eminent Scholar Chair in Florida Government and Politics, Rod and Hope Brim Eminent Scholar Chair in Economics, DeVoe Moore Eminent Scholar Chair in Economics, John and Hallie Quinn Eminent Scholar Chair for the Renewal of American Heritage and American Free Enterprise, Gus Stavros Eminent Scholar Chair in Economic Education, LeRoy Collins Eminent Scholar Chair in Civic Education, and Syde P. Deeb Eminent Scholar Chair in Political Science. A significant number of other faculty have been honored with named professorships because of their outstanding teaching and important research contributions.

In the social sciences, there is a variety of needs within the College as part of their program of study (e.g., all College of Business majors take two courses in economics) or choose to do so as part of their electives. The College encourages and welcomes diversity in student background in its courses. Finally, the College has a large graduate program, offering the master’s degree in twenty-three areas, the Doctor of Philosophy in six fields, and numerous graduate certificates. For details of graduate programs of the College, refer to the University’s Graduate Bulletin.

The College views its role in undergraduate education as having at least three main parts. First, in its contributions to liberal studies and its courses taken by students as electives, the primary objective is to introduce students to the methods and modes of thought of the social sciences. Second, in its undergraduate degree programs, the College seeks to prepare its students both to be responsible and informed citizens with an appreciation of how the world works and to be ready for employment. Third, the College seeks to prepare students for further study in the social sciences or professional schools. Each undergraduate program has a faculty member as director, and academic advice is provided by the faculty. Professional academic advisors located in the College’s student academic affairs office assist undergraduates with academic advising, career counseling, and graduation checks. The College actively participates in the liberal studies honors program and offers honors in the major in all of its programs. The College of Social Sciences and Public Policy’ Residential Program in Public and International Affairs provides opportunities for students to take courses on a variety of topics related to government and public policy. Participants involved in this living and learning community benefit from a variety of academic and social enrichments and enjoy interaction with their instructors and fellow students.

The Reubin O’D. Askew School of Public Administration and Policy, the Departments of Economics, Geography, and Political Science, and the Interdisciplinary Programs in International Affairs and Social Science offer interdisciplinary programs that may be of interest to students. Some are open not only to majors, but to other students who meet the programs’ criteria (see relevant entries in this General Bulletin for details). The University’s location in the state capital provides excellent opportunities for internships. All departments and programs in the College engage in contract and grant research, and there are often opportunities for work-study employment for qualified undergraduates either on outside-funded research or on University-funded activities.

The College regularly sends faculty and students to the University’s London Study Center, the Florence Study Center, Valencia Study Center, and other international programs throughout the world. A semester in either the London, Florence, or Valencia center will usually fit into a student’s program of study without delaying graduation and is very appropriate to most of the College’s undergraduate programs. Other international activities include studies at the University of Costa Rica, the Republic of Panama, Japan, the Netherlands, Croatia, China, and Turkey.

Programs and Structure

The College of Social Sciences and Public Policy focuses upon both basic knowledge and the application of that knowledge to policy questions and public affairs. In applied policy, the College’s interests center on regional, national, and international affairs, and it has a particular interest in state issues, befitting the University’s location in the capital of the state of Florida.

The College consists of one school, the Reubin O’D. Askew School of Public Administration and Policy; five departments: Economics, Geography, Political Science, Sociology, and Urban and Regional Planning; a number of research units: the Pepper Institute on Aging and Public Policy, the Center for Demography and Population Health, the DeVoe L. Moore Center for the Study of Critical Issues in Economic Policy and Government, the Collins Center for Public Policy, the Stavros Center for Economic Education, and the Florida Public Affairs Center; and interdisciplinary programs in Asian Studies, African-American Studies, Social Science, International Affairs, Latin American and Caribbean Studies, Law and Society, Environmental Studies, Russian and East European Studies, Public Health, and Demography.

The instruction offered by the College meets a variety of needs within the University. Social science is a component of the liberal studies and Honors programs, and each of the departments offering a bachelor’s degree has course offerings in liberal studies and Honors. The social sciences residential program in public and international affairs also helps students develop the critical capacities necessary for active participation in the affairs of the state, the nation, and the international community. The College offers nine programs of study for the bachelor’s degree with departmental majors in economics, geography, political science, and sociology, and the interdisciplinary programs listed above. In addition to these programs, undergraduate minors are offered in African-American studies, law and society, public administration, urban and regional planning, health and aging, and population studies. Many students in other colleges of the University are either required to take some courses in the College as part of their program of study (e.g., all College of Business majors take two courses in economics) or choose to do so as part of their electives. The College encourages and welcomes diversity in student background in its courses.

General Requirements

1. Compliance with general University regulations governing baccalaureate degrees
2. For the bachelor of arts degree, completion of the special University-wide requirements for that degree
3. Completion of a major and a minor, with the exception that the interdisciplinary majors, international affairs, environmental studies,
African-American studies, Russian and East European studies, Asian studies, interdisciplinary social science, and Latin-American and Caribbean studies do not require completion of a minor.

4. Not more than two semester hours in physical education activities may count toward the minimum credit-hour requirements for the baccalaureate degree. The limitation on applied music credit is not enforced on majors in the College with a music minor; and

5. International affairs, Asian studies, Latin-American and Caribbean studies, and Russian and East European studies majors must meet University foreign language requirements in a relevant language whether they wish to receive a BA or a BS. The African-American studies major has a BA track in which the foreign language requirement must be met. Other majors in the College have no foreign language requirement if the student wishes to receive a BS.

Majors. Each candidate for the baccalaureate degree must complete major requirements in one of the departmental or interdepartmental programs listed below. The major consists of thirty to forty-two semester hours. For specific requirements, refer to the individual departments in this General Bulletin.

Departmental Majors. Economics, geography, political science and sociology.

Minors. Each candidate for the baccalaureate degree must complete a minor, unless he or she is pursuing an interdepartmental major. The minor may be taken in a program offered through the College of Social Sciences and Public Policy or through another college of the University. The College offers minors in the programs that offer majors, as well as public administrations, law and society, urban and regional planning, health and aging, and population studies. There is no minor in interdisciplinary social science. Students should consult their academic advisors on the choice of appropriate minor(s).

The minor will consist of at least twelve semester hours that meet both the requirements of the program offering the minor and the minor requirements of the student’s major. Students pursuing two degrees (dual degree or a second baccalaureate degree) must have a separate minor for each degree that is awarded by this College if that major requires a minor. If one of the degrees is to be awarded by another college in the University, that dean’s office will specify any minor requirements.

Work used in meeting minimal requirements for liberal studies or a foreign language requirement for the bachelor of arts degree may not be used to complete a minor offered by the College or a minor offered by another college in the University if the student is pursuing a degree awarded by this College. Generally, work used to complete the major may not also count for a minor. Students should consult their academic advisor.

Consult program and departmental entries in this General Bulletin or see http://www.academic-guide.fsu.edu/minors.html for specific minor requirements. Please note that completion of an FSU certificate program will not satisfy the college minor requirements.

Double Majors

Many students take two majors, i.e., a double major, rather than a major and a minor, and an increasing number of students follow this route to the baccalaureate degree. For a double major, the student must meet the program requirements of both majors, with the following exception: The second major may be taken in a college other than the College of Social Sciences and Public Policy. Any specific questions about the overlap between majors should be directed to your academic advisor.

Combined Bachelor’s/Master’s Degree Programs

The College’s combined bachelor’s/master’s degree programs provide academically talented students an opportunity to complete a bachelor’s and a professional master’s degree in a shorter time span. Qualified upper-division undergraduate students may take up to twelve hours for graduate credit, while counting those credits towards their bachelor’s degree as well. Students from any undergraduate major taught at FSU may be accepted to the combined degree programs of either the Department of Urban and Regional Planning (Master of Science in Planning) or the Askew School of Administration and Policy (Master of Public Administration), Public Health (Master of Public Health), or Center of Demography and Population Health (Master of Science in Demography).

Preparation for the Study of Law

Many of the College’s graduates enter law school. There are no required courses for admission to law schools, and law schools advise strongly against attempts to construct “prelaw” majors. Appropriate law school preparatory study is, thus, very flexible, and all of the College’s undergraduate majors are appropriate. Students intending to apply to law school may consult their undergraduate program director or the College’s academic support program coordinator (see http://prelaw.fsu.edu).

Preparation for a Teaching Career

In order to teach in the state of Florida, a student must complete a teacher preparation program. The teacher education program may be combined with a baccalaureate degree from the College; however, students must formally apply and be admitted to teacher education, administered through the College of Education’s Office of Academic Services, 203 Stone Building. Admission to teacher education is distinct from admission to a College or undergraduate major, and has different admission criteria. For details, consult the “College of Education” chapter of this General Bulletin. Undergraduates who may wish to teach should consider taking teacher education simultaneously with their major programs.

Honors in the Major

The College of Social Sciences and Public Policy offers honors in the major in all of the College’s programs. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Dean’s List

Students in good standing who in any term carry a full-time course load of twelve or more graded semester hours with a term GPA of 3.5 or better earn the distinction of being on the dean’s list.
The social work program at Florida State University has its origins in the early history of the institution, with social welfare content first being introduced into the curriculum in the 1920s. By the mid-30s, during the Great Depression, undergraduate courses in casework and group work were offered, as well as field placements at the Leon County Welfare Association and the Leon County Unemployment Relief Council.

In 1947, the year that the Florida State College for Women was named Florida State University, the graduate program in social work accepted its first class of students. In 1949, Dr. Coyle Moore became the Chair of the Department of Social Welfare and the master of social work program was accredited by the Council on Social Work Education, which has earned reaccreditation continuously since that time. The School of Social Welfare was created in 1950. The undergraduate program was accredited in 1974, the first year that undergraduate programs were granted accredited status.

The PhD program in social work was approved by the Board of Regents in 1974 and accepted its first student in the fall of that year. In June 1973, as part of an overall University structural reorganization, the social work program became identified as the School of Social Work, and in the spring of 2005 became the College of Social Work. It is currently one of twenty-nine schools in the United States that offers social work degrees at the baccalaureate, master’s, and doctoral levels and the first master’s program in the U.S. with a complete online curriculum.

The College of Social Work is dedicated to the preparation of tomorrow's social workers who demonstrate awareness of the impact of the many social changes that have taken place in our contemporary world. The College’s curriculum is continually updated, recognizing and responding to the changing demands made on the profession. The curriculum is rooted in the ecosystems perspective, which serves as an organizing framework for the entire program, thereby providing an effective basis for studying people and their environment. The combination of class and field work provides students with a rich educational experience and the opportunity for the integration of research, theory, and practice.

The College of Social Work is committed to the pursuit and delivery of excellence in social work education. Through teaching, research, and service, the College educates its graduates for productive careers as professional social workers in diverse arenas, contributes to the knowledge base guiding social welfare practice and policy decisions, and offers expertise and energy to local, state, and national concerns.

The College’s initiatives build on the traditional heritage of social work, and are guided by a commitment to community-based social services. Recognizing that communities function as political, social, and familial entities, the College’s efforts emphasize, but are not limited to, health care, mental health, and the special concerns of children, families, women, and the aged. In all of its capacities, the College recognizes and values mutuality among diverse community groups, and promotes models of service delivery empowering the poor and disadvantaged and ensuring the social services of all community members.

**Degree Programs**

**Bachelor of Social Work (BSW)**

**BSW Program Director:** Pamela W. Graham, MSW

The curriculum offered at the baccalaureate level is designed to enable students to provide services to individuals, families, groups, communities, and organizations in generalist social work practice.

**Master of Social Work (MSW)**

**MSW Program Director:** B. Craig Stanley, PhD

The curriculum at the MSW level is designed to provide quality preparation for high-quality advanced practitioners who will work with diverse client systems and problems. Students may choose an advanced curriculum in either clinical or social policy and administrative concentrations.

**Doctor of Philosophy in Social Work (PhD)**

**PhD Program Director:** Karen Randolph, PhD

The PhD program in social work is designed to advance the social work profession through the development of researchers/scholars and educators.

**Overseas Study**

**International Program Director:** Neil Abell, PhD

Florida State University offers students the opportunity to study abroad and gain valuable experience through international internships. For information concerning eligibility, fees, and other details of these programs, contact the College’s Director of International Programs. Social work majors are encouraged to consider these opportunities for study overseas.

**Requirements**

**Requirements for a Major**

The BSW Program is limited access and the admission requirements include a 2.8 grade point average (GPA) in all college work attempted. Students must meet the following prerequisites by the end of Term 4 (or before admission to FSU if the student is transferring from a community college):

1. Completion of a course in each of the following cognates with a grade of “B–” or better: (a) American Government (American National Government or American Government); (b) Biology (Human Biology or Human Anatomy and Physiology); (c) Economics (Introduction to Economics, Microeconomics or Macroeconomics); (d) Introductory Psychology; and (e) Introductory Sociology or Social Problems

2. Complete a formal application to the BSW Program.

A minimum of fifty semester hours in social work is required for graduation. It is expected that each student, with counsel from the advisor, will move through the required courses in the sequence specified in the academic map. Required courses in the major are SOW 3203, 3350, 4104, 4232, 4323, 4341, 4360, 4403, 4414, 4510, 4522, and 4620 and two social work electives for a total of fifty credit hours towards the required sixty to earn a bachelor degree.

Students must earn a minimum GPA of 3.0 in all courses attempted to be eligible to complete an internship in their final semester. No social work course with a “U” or a letter grade below “C–” will apply toward a social work major.

The College of Social Work does not require a foreign language as part of its undergraduate program of studies. However, in order to graduate from Florida State University all students must provide the University with verification of completion of two units of the same foreign language in high school or at least eight semester hours of the same foreign language (or equivalent proficiency) at the college level. Students are expected to have satisfied this requirement upon admission to the University.

Students majoring in social work are not required to complete a minor in another department, but must have a total of sixty hours to graduate.

**Field Education**

**Field Director:** Katrina Boone, MSW

The purpose of field education is to provide students with a structured learning opportunity for development and reinforcement of appropriate levels of competence in the field of social work. Field education allows students to apply knowledge, values, and skills learned in the classroom to social work practice settings. As students undertake learning tasks within the reality of agency life, a vehicle is established whereby knowledge and theories can be applied, attitudes and values examined, and skills developed and refined.

The field education component of the College of Social Work is designed to ensure that each student completes a high quality educational experience in a supervised agency placement. This learning experience is designed to enhance a student’s ability to integrate theory into effective evidence-based social work practice, broaden the range of skills for performing social work functions, and strengthen awareness of attitudes, motivations, and judgments identified with the profession of social work. The Office of Field Education selects field placements based on the potential for providing the range and depth of learning experiences necessary to achieve the educational objectives established for those students. Agencies affiliating with the College of Social Work represent the diversity found in social services throughout our community. The College offers a wide array of internships in both public and private agencies, and with diverse populations of clients so that students will be provided opportunities for exposure to a wide range of social work roles and learning tasks.
Undergraduate field education, SOW 4510, is a twelve semester hour course (512 clock hours) that requires the student to register for and successfully complete a sixty-two hour per week field placement for one semester. Students must register concurrently for SOW 4522, Integrative Seminar. The field education course is designed to help students develop the skills necessary for generalist social work practice.

The course is restricted to social work majors and can only be taken after the completion of all courses necessary for the completion of the degree. The student must have a GPA of 3.0 or better in all social work courses and an overall GPA of 3.0 in order to register for SOW 4510.

Honors Programs

The College of Social Work encourages students to apply for the honors program. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Minor in Social Welfare

A minor in social welfare requires twelve hours in social work courses with a grade of “C–” or better in each of the following courses: SOW 3203, 3350, and two social work electives. At least six hours must be completed at FSU. Students must complete an application for the minor and register for SOW 3350 and SOW 3203. Please note that the minor does not qualify a student to apply for advanced standing graduate programs in social work or for professional certification or licensure.

Research and Outreach Programs

The Florida Child Welfare Institute

The Florida Institute for Child Welfare (FICW) seeks to promote safety, permanency, and well-being among the children and families of Florida involved in the child welfare system. To accomplish this mission, the FICW proposes to engage in interdisciplinary research and evaluation, the foundation of which lies in partnerships between Florida universities, schools of social work, the Department of Children and Families (DCF), sheriffs, community-based care lead agencies and provider organizations and others across Florida. The FICW proposes to collaborate with community agencies and statewide training resources to translate knowledge generated through research, policy analysis, and evaluation into practical, developmentally appropriate strategies for children and families. The FICW will serve as a resource for policymakers, programs, and practitioners on best-practices related to safety, permanency, and well-being with attention to diverse and underserved populations. The FICW will also work to strengthen the child welfare workforce through assessing the readiness of workers to assume job responsibilities, evaluating pre- and in-service training, determining adaptive and resilient responses of workers to stressful work environments, developing leadership capacity, and identifying innovative and effective methods in the management of human service organizations.

Institute for Family Violence Studies

The endowed Institute for Family Violence Studies has been established within the College of Social Work to research family violence as it occurs in all age groups, including children, adults, and the elderly; identify and explore related research domains, including supervised visitation, homelessness, and women’s issues; disseminate the findings of this research at the local, state, national, and international levels; evaluate the effectiveness of family violence intervention; support the development of innovative programs for reducing family violence; analyze legislation addressing family violence issues; develop curricula that strengthen social work studies on family violence; provide continuing education and training opportunities to those working in agencies that provide services for those experiencing family violence; serve as a regional clearinghouse on resources related to family violence; and collaborate with the courts and community organizations on family violence concerns.

Institute for Social Work Research

The Board of Regents of the State of Florida University System established the Institute for Health and Human Services Research (IIHHSR) in 1986. First called the Center for Human Services Policy and Administration, it was created as an interdisciplinary University-wide research institute, with a mission to conduct research for both the public and the private sector. Its goal is to develop and disseminate knowledge to support evidence-based practice and policy decisions. In 1999, IIHHSR was relocated to the College of Social Work at Florida State University, and in 2005 was subsequently renamed the Institute for Social Work Research to reflect this move.

Multidisciplinary Evaluation and Consulting Center

The Florida State University Regional Multidisciplinary Evaluation and Consulting Center is a full-service, University-based diagnostic and training center that has been in operation since 1983. Comprehensive diagnostic and consultative services are provided to eighteen school districts in the Panhandle region of north Florida. Referrals also are accepted from the research schools at Florida State University and Florida A&M University, as well as Children’s Medical Services and other state and community agencies. Multidisciplinary collaboration is an integral part of center services. The staff includes professionals from school, counseling, and clinical psychology, counseling education, and social work. Consultation with professionals from speech and audiology and pediatric medicine also is available.

Trinity Institute for the Addictions

The Trinity Institute for the Addictions is an endowed social work institute focused on biopsychosocial approaches toward the prevention and treatment of substance use, abuse, and dependence across all domains of practice. To that end, the Institute is dedicated to advancing translational research with an emphasis on intervention strategies to address the effects of addictive processes on body, mind, and spirit. The scope of the Institute encompasses the conduct of etiological, epidemiological, and clinical research, as well as training and services that leverage evidence-based practices from the leading edge of addiction science.

Student Organization

The Association of Student Social Workers (ASSW) is an organization of and for social work students. It is open to undergraduates as well as graduates, and participation by all is welcomed. The association is a good vehicle for socialization into the profession and orientation to the College. It can be used as a channel for handling feedback to the school about the program and is an excellent way for students to get to know one another as well as to participate in a wide array of community service activities.

The Phi Alpha Honor Society serves as a means of recognizing outstanding academic students. The society involves itself in fundraising and community service.

Sigma Phi Omega recognizes excellence of those who study gerontology and aging and the outstanding service of professionals who work with or on behalf of older persons.

College of Social Work Scholarships

The following scholarships are offered to Social Work majors. If you would like information on how you can apply, please contact the BSW Program office at the College of Social Work at (850) 644-5713 or e-mail bsw@fasu.edu.

Citrus Health Network Scholarship

Established in 2002, this scholarship serves as a lasting tribute to the community services provided by Citrus Health Network, Inc. It is awarded annually to graduate students who are interested in working in the behavioral health field in the Miami-Dade County area.

Mark DeGraff and Lula Hamilton DeGraff Scholarship

This award, first presented in 1985, is given to a senior undergraduate or graduate student who intends to conduct research on factors influencing the growth and development of youth, or who intends to work professionally with youth.

Joanna F. Gorman Scholarship

This scholarship was established to honor Dr. Gorman who had a deep commitment to the profession’s development and a clear vision of social work’s mission to create a more just society. Full-time social work students receiving this award show evidence of outstanding academic achievement, exemplify the highest standards of character and plan to work for one year in the area of child welfare, health, or mental health.

Herndon Scholars Program

The Herndon Scholars Program, sponsored by the Helios Education Foundation, is an endowed fund that was created in 2007 and first presented in Fall 2008. It provides annual scholarships to graduate students in the FSU College of Social Work. Recipients of the award must be Florida residents. Preference is given to students who have social work practice experience prior to graduate school.

Walter W. Hudson Doctoral Scholarship

This scholarship honors Dr. Walter Hudson, a former faculty member who was named the first recipient of the prestigious Lifetime Achievement Award from the Society of Social Work and Research in 1999. Dr. Hudson was an
international leader in measurement theory, development and testing of assessment and outcome evaluation tools, statistics, evidence-based practice methodology, and computer applications for practice. This award is intended for a PhD student at the College of Social Work.

Margaret H. Jacks Scholarship in Aging

Ms. Jacks was a formidable and outspoken advocate for elderly Floridians for more than five decades. This award is directed to graduate students studying gerontology. Recipients must have completed one course on aging or demonstrated a commitment to the field of aging through volunteer or work experiences.

Richard M. King Scholarship in Social Work and Business Administration

This endowed scholarship was established by alumnus Richard King (MSW ‘69) to encourage graduate students who demonstrate interest in earning both an MSW and a Master’s in Business Administration (MBA). Social work students who take electives in the College of Business are also eligible for the award.

James and Mary Koalska Undergraduate Scholarship

This memorial scholarship fund was set up by Professors Paul and Betty Piccard in memory of Betty’s parents, James Koalska and Mary Brennan Koalska. The Koalskas were the children of Irish and Polish immigrants and entered the work force at a very young age. While they could not benefit from a college education themselves, they valued education and provided their daughters with opportunities in higher education – one in nursing, the other in social work. This award is intended to cover tuition for a social work undergraduate student whose parents did not attend college.

Joyce Harper Laidlaw Scholarship in Child Welfare

The Laidlaw Scholarship, established by FSU alumna Joyce Harper Laidlaw and her husband Don, was first presented in 2003. It is for graduate students who have decided to focus their studies on child welfare.

M. Sharon Maxwell Ferguson Scholarship in Family Violence

Dr. Maxwell retired in 2006, after serving nearly two decades on the faculty of CSW and establishing the Institute for Family Violence Studies (IFVS). She is a nationally recognized expert in intimate partner violence and a champion of community-based services for survivors and their children. This scholarship is designed to encourage undergraduates to work with the IFVS and explore career opportunities designed to help end family violence.

C. Aaron McNeese Field Education Scholarship

Separate application required. Applications are available online and in the CSW field office, 2510 UCC. The deadline is March 1st. For information, contact Katrina Boone at kboone@fsu.edu or call (850) 644-4860 or 1 (888) 232-6416 (toll-free). Dr. McNeese retired in 2008 after serving on the CSW faculty for thirty years. He is internationally recognized for his work in chemical dependency and treatment for criminal offenders. He held various leadership positions at the College of Social Work and served as dean from 2004 to 2008. This Scholarship in his honor was established by the CSW Field Advisory Committee to provide assistance to graduate and undergraduate students during their internships.

Coyle and Mabel Moore Scholarship

Dr. Coyle Moore came to Tallahassee in 1928 to develop a course of instruction in social work at the Florida State College for Women (FSCW). When FSCW became a University in 1947, Dr. Moore was appointed dean of the School of Social Welfare. Mrs. Moore, who had a degree in social work from the University of North Carolina, was an active advocate of community service. This award, created in honor of Mr. and Mrs. Moore, supports full-time undergraduate and graduate students who demonstrate a commitment to the social work profession through strong character and service.

Sarah Sealey Morrill Scholarship

Mrs. Morrill graduated from the FSU School of Social Work in 1955 and was a pioneering activist who planned and established counseling and guidance services for children in Leon County. Later, she assumed leadership roles in planning and managing programs for the elderly. This scholarship serves as a tribute to Sarah Sealey Morrill’s life-long commitment to community mental health services and is for undergraduate and graduate students specializing in community mental health.

MSW Class of ’75 March Graduates Scholarship

The idea for this scholarship arose during a class reunion in March 2000, as attendees were sharing stories about their lives and they realized that FSU had a defining influence on their successes. They created this award for full-time MSW students who are interested in community-based practice, advocacy or public policy, with a demonstrated commitment to social justice concerns.

Bernhard Scher Undergraduate Scholarship

This scholarship, first presented in 1978, was established by the family of Dr. Scher. He served as dean of the School of Social Work from 1968-1973 and was a member of the faculty until his death five years later. The undergraduate recipient of this award demonstrates a strong commitment to social work values through actions and words.

Guy and Delores Spearman Scholarship

This scholarship was created by 1975 MSW Alumnus Guy Spearman and his wife to support exemplary undergraduate and graduate social work students who come to FSU from Brevard County, Florida. Mr. Spearman is well known as a legislative lobbyist and an enthusiastic supporter of FSU.

John P. and Jane W. Wakeman Memorial Scholarship for Arts in Social Work

This endowed scholarship has been established by Mary Wakeman in honor of her parents. It is for undergraduate or graduate students in the College of Social Work with an expressed interest in the study and practice of the arts in social work.

Victoria E. Warner Scholarship

This award was established to honor Dr. Victoria Warner, a long-time faculty member and chair of the Department of Social Work at Florida A & M University in Tallahassee. The scholarship is awarded to an MSW student who received a bachelor’s degree from FAMU and intends to pursue a career working within the African-American community.

Patricia Vance Scholarship

Ms. Patricia V. Vance, MSW, “Pat” was the Associate Dean and served on faculty from 1966 to 1986 for the College of Social Work. Pat provided her gentle and thoughtful counsel with a tremendous level of support for students and other faculty members. She worked unstintingly to promote the profession of social work through her service and teaching. When she retired in 1986, she and her husband, Dr. Maurice Vance, established a scholarship for social work students to support their education. Upon Professor Kim Maddox’s retirement it is her wish to have this scholarship endowed.

Cheryl Rowland Endowed Scholarship

This endowed scholarship was established by Cherie Rowland, an alumna and a strong advocate for women. The award goes to a student with interest in women’s studies and had the first recipient in 2013.

Dianne F. Harrison Scholarship

Created to honor former Ph.D. Program Director and Dean, Dr. Harrison, this is a competitive award given to doctoral students with the best dissertation prospectus.

Lamar F. Everett Scholarship

This scholarship was established in 2009 as the result of a bequest from Mr. Everett’s estate. The award is specifically earmarked to benefit economically disadvantaged and academically worthy undergraduate or graduate College of Social Work students.

Mary DiNitto Endowed Scholarship

Dr. Diana DiNitto established the Mary DiNitto Endowed Scholarship in honor of her mother’s 90th birthday. This generous gift will provide support to students in the College of Social Work with strong interests in the profession and creative ideas for practice broadly defined. Preference will be given to students who exhibit financial need. An alumna and former faculty member of the College, Dr. DiNitto is the Cullen Trust Centennial Professor in Alcohol Studies and Education and Distinguished Teaching Professor at the University of Texas at Austin School of Social Work.

Violet Crook Scholarship

Opened in 2006 after Wendy Crook, a professor in the College of Social Work, created an endowment to support doctoral students in the college. Sadly, Dr. Crook passed away in 2007 prior to the pledge being fulfilled. At the passing of her mother in 2012, the scholarship was honored to Wendy and her love for the college and social work.

Program Opportunities

The College of Social Work offers other opportunities that afford students the ability to focus on specialized areas of interest. With guidance from advisors, students may create a program of study that meets their specific educational and career goals.
Child Welfare Practice Certificate Program

This certificate program offers both undergraduate and graduate students an opportunity to focus their curriculum on issues related to child welfare. Coursework addresses: the prevention of neglect, abuse, exploitation, or delinquency of children; the protection of homeless, dependent, or maltreated children; the strengthening of families to maintain children in their own homes; the development of advocacy groups, and analysis of social policies and mental health issues related to this population. Child welfare practitioners provide a continuum of services in both public and private settings. For further information, visit [http://csw.fsu.edu/academics/certificate-programs/child-welfare-practice-certificate/](http://csw.fsu.edu/academics/certificate-programs/child-welfare-practice-certificate/).

Certificate in Gerontology

The mission of this certificate is to educate students about gerontological theories and practices and provide students with gerontological internship and service learning experiences. These educational objectives will give students the skills they need for frontline positions in practice and administrative positions in social service organizations. An in-depth curriculum that emphasizes leadership, decision-making, client-centered management, team building, negotiating, budget and finance, and the successful management of grants will guide FSU students in successfully managing social service agencies and affecting policy and practice on all levels. For more details, visit [http://csw.fsu.edu/academics/certificate-programs/certificate-in-gerontology-aging-studies/](http://csw.fsu.edu/academics/certificate-programs/certificate-in-gerontology-aging-studies/).
Accounting

Department of ACCOUNTING

COLLEGE OF BUSINESS

Chair: Frank Hefflin; Professors: Fennema, Hefflin, Icerman, Morton, Paterson; Associate Professors: Bathe, Billings, Blay, Gerard, Reynolds; Assistant Professors: Beck, Lee, Mauler, Penn, Pierce, Zhang; Senior Lecturers: Greenberg, Piro, Sudano; Assistant Lecturers: Jarnagin, McClung, Woodward; Andersen Professors: Fennema, Paterson; Deloitte Professor: Morton; EY Professor: Hefflin; KPMG Fellow: Billings

The Department of Accounting is committed to providing students the general education and technical knowledge necessary to enter the accounting profession and to pursue a successful professional career. The field of accounting offers challenging and rewarding opportunities in public accounting, tax accounting, industry, government, and not-for-profit organizations.

Prospective accountants must be prepared to work in an increasingly complex environment. In addition to accounting knowledge, the successful accountant must possess a broad knowledge of business. Other essential skills include the ability to communicate well verbally and in writing, the ability to work well with and motivate others, the ability to organize and manage tasks and other people, and the ability to use sound professional judgment.

The Bachelor of Arts (BA) or Bachelor of Science (BS) degree satisfy the following areas: assurance services, corporate accounting, accounting applications, and the related functional areas of business necessary for a successful accounting career in industry, government, and nonprofit organizations. Students preparing for a professional career in public accounting, tax accounting, and others who wish to obtain more advanced and specialized knowledge in the field of accounting, should plan to complete the four-year undergraduate program followed by the one-year Master of Accounting (MAcc) program. The MAcc program allows students to specialize in one of the following areas: assurance services, corporate accounting, accounting information systems, or taxation. A detailed description of the MAcc program can be found in the Graduate Bulletin.

Students planning to qualify to become a Certified Public Accountant in the state of Florida must complete a five-year education program (150 semester hours) with a concentration in accounting. Completion of the MAcc program satisfies this requirement.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in accounting satisfy this requirement by earning a grade of “C–” or higher in CGS 2100 (state mandated business prerequisite requirement) or CGS 2518.

Note: CGS 2518 is required for students in the Accounting Major and is a prerequisite for ACG 4401.

Required Risk in Business and Society Course

All undergraduates at Florida State University intending to enter a business major must complete RMI 2302, Risk in Business and Society, with a “C–” or better by the end of their sophomore year. Transfer students will be required to complete this course in their first semester at FSU.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to the program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ACG X021 or ACG X022, or ACG X001 and ACG X011
2. ACG X071 or ACG X301

Note: ACG X071 will count toward the degree as elective credits for transfer students; however, it is recommended that native students take another non-accounting elective

3. CGS X100 or demonstrated competency, or CGS X100C or CGS X530 or CGS X570 or CGS X060 or CGS X531 or CGS X000 or ISM X000 or CGS X518
4. ECO X013
5. ECO X023
6. MAC X233 or MAC X230
7. STA X023 or STA X122 or QMB X100

Requirements for a Major in Accounting

All students must complete: (1) the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin; (2) the state of Florida common prerequisites for accounting majors; (3) at least sixty semester hours of courses in non-business disciplines, which includes CGS 2518, Spreadsheets for Business; (4) the general business core requirements for accounting majors; (5) the general business breadth requirements for accounting majors; and (6) the major area requirements for accounting majors.

Note: To be eligible to pursue an accounting major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements

All accounting majors must complete the following four courses. A grade of “C–” or better must be earned in each course.

FIN 3403 Financial Management of the Firm (3)
GEB 3213 Business Communications (3)
MAN 3240 Organizational Behavior (3)
MAR 3023 Basic Marketing Concepts (3)

General Business Breadth

All accounting majors must complete the two courses as follows. Each course must be completed with a grade of “C–” or better.

FIN 3244 Financial Markets, Institutions, and International Finance Systems (3)
QMB 3200 Quantitative Methods for Business Decisions (3)

Capstone Course

All accounting majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements

All accounting majors must complete the ten courses listed below. In addition, accounting majors must complete a total of ninety semester hours of non-accounting courses.

To enroll in the required upper-level accounting courses (those with ACG and TAX prefixes), students must have completed ACG 2021, Introduction to Financial Accounting and ACG 2071, Introduction to Managerial Accounting, with a grade of “B” or better (“B–” is not acceptable). Students must also receive a grade of 76% or higher on FSU’s ACG 2021 final examination or complete a competency examination with a score of 76% or higher before they can enroll in upper-level accounting courses. Students will have a maximum of two attempts to pass the competency examination. A grade of “C” or better (“C–” is not acceptable) in ACG 3101 is required to enroll in ACG 3111 or any 4000 level ACG or TAX course. A grade of “C–” or better must be earned in all required upper-level courses. Any student receiving two grades below “C–” in the same required upper-level accounting course (prefix ACG or TAX) will not be permitted to enroll in that course again; that is, a student may repeat a required upper-level accounting course only once.

ACG 3101 Financial Accounting and Reporting I (3)
ACG 3111 Financial Accounting and Reporting II (3)
ACG 3341 Cost Accounting (3)
ACG 4642. Auditing Theory and Application II (3). Prerequisite: ACG 4632 with a grade of “C–” or better. This course covers topics of auditing and development of audit programs; sampling; procedures of obtaining audit evidence; auditor responsibility under Securities and Exchange Commission requirements; and auditing computerized systems. Subsequent credit for ACG 5635 is not permitted.

ACG 4682. Investigative Accounting (3). Prerequisite: ACG 3101 with a grade of “C–” or better. This course provides an introduction to issues in forensic accounting. Topics include criminal statutes related to financial crimes, rules of evidence, interviewing techniques, and forensic accounting procedures.

ACG 4683. Fraud Examination (3). Corequisite: ACG 4632. This course provides an introduction to the field of fraud examination. Topics include the nature of fraud, who commits it and why, deterring fraud, financial statement fraud, and fraud resolution.

ACG 4901r. Directed Individual Study (1–3). May be repeated to a maximum of five semester hours.

ACG 4930r. Special Topics in Accounting (1–3). Prerequisite: Instructor permission. This course content varies to provide an opportunity to study current issues in accounting and topics not offered in other courses. May be repeated to a maximum of twelve semester hours as content changes.

ACG 4941. Accounting Internship (3). (S/U grade only.) Prerequisite: Instructor permission. This internship is designed for College of Business students who desire to gain real-world experience in the accounting field through on-the-job practice. Students work under the direction of an approved industry professional, a faculty advisor, and the internship director.

ACG 4970r. Honors Thesis (1–6). Prerequisite: Admission to the honors program. Six semester hours of thesis are required to complete honors in the major. May be repeated to a maximum of nine semester hours.

CGS 2518. Spreadsheets for Business Environments (3). This course provides an in-depth study of spreadsheets utilizing a problem-solving approach. Spreadsheet-based solutions are explored for common business tasks and problems. The course presents a thorough coverage of spreadsheet functions and tools, along with a deeper understanding of their purpose in a business environment. The course is ideal for students with professional interests related to business and economics, as well as for students wishing to obtain a deeper understanding of spreadsheets in general.

TAX 4001. Federal Tax Accounting I (3). Prerequisite: ACG 3101 with a grade of “C–” or better. This course covers concepts and methods of determining income of individuals for tax purposes, as well as the interpretation of Internal Revenue Code, related regulations, and tax advisory services.

TAX 4001r. Federal Tax Accounting II (3). Prerequisite: TAX 4001 with a grade of “C–” or better. This course covers concepts and methods of determining income of corporations, partnerships, estates, and trusts for tax purposes, as well as the interpretation of Internal Revenue Code, related regulations, and tax advisory services. Subsequent credit for TAX 5015 is not permitted.

Graduate Courses

ACG 5065. Fundamentals of Accounting and Finance (3).

ACG 5175. Financial Statement Analysis (3).

ACG 5356. Advanced Management Accounting (3).

ACG 5458. Emerging Technologies in Accounting and Auditing (3).

ACG 5466. Enterprise Systems and Accounting (3).

ACG 5565. Government and Not-for-Profit Accounting and Auditing (3).

ACG 5655. Auditing Theory and Application II (3).

ACG 5685. Forensic Accounting (3).

ACG 5695. Challenges in Professional Accounting (3).

ACG 5905r. Directed Individual Study (1–3). (S/U grade only.)

ACG 5906r. Special Studies in Management (1–3).

ACG 5915r. Supervised Research (1–3). (S/U grade only.)

ACG 5935r. Special Topics in Accounting (1–3).

ACG 5945r. Supervised Teaching (1–3). (S/U grade only.)

ACG 6696. Seminar in Financial and Auditing Research (3).

ACG 6835. Seminar in Behavioral Accounting Research (3).

ACG 6885. Introduction to Accounting Research (3).

ACG 6896. Seminar in Capital Market-Based Accounting Research (3).

ACG 6916r. Supervised Research (1–5). (S/U grade only.)

ACG 6939r. Seminar in Accounting (3).

ACG 6946r. Supervised Teaching (1–3). (S/U grade only.)

GEB 5907r. Special Studies in Business (1–3).

GEB 6904r. Readings for Examination (1–12). (S/U grade only.)

TAX 5065. Research in Federal Taxation (3).
Program in
ACTUARIAL SCIENCE

COLLEGE OF ARTS AND SCIENCES

Web Page: http://www.academic-guide.fsu.edu/actuarial_science.html
Coordinator: Steve Paris (Mathematics); Advisory Committee: Kercheval (Mathematics); Beaumont, Benson (Economics); Whalley (Computer Science); Born (Risk Management/Insurance); Gatzlaff, Maroney (Risk Management/Insurance, MBA); Chicken, Huffer (Statistics); Icerman (Accounting); Christiansen (Finance)

This interdisciplinary degree provides broad instruction in the mathematical and statistical concepts underlying the operations of life, property, and casualty insurers; governmental regulatory agencies; pension and insurance consulting firms; and financial firms. Along with strong mathematical and computational skills and a solid grounding in each of the component disciplines, the program is designed to enhance leadership ability and communications skills. The program is also flexible enough to provide background for graduate or professional study in many areas beyond actuarial science, e.g., business, economics, finance, law, and statistics. The program is classified by the professional actuarial societies as advanced undergraduate and graduate education and research. All three of the actuarial professional societies’ Validation by Educational Experience credit areas are approved; this provides FSU students an opportunity to directly advance their careers through their regular classes.

Students in the program are also assisted in moving forward professionally through seminars and tutorials in preparation for national actuarial examinations and by guest lecturers who are actuaries discussing the varied available employment.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in actuarial science satisfy this requirement by earning a grade of “C–” or higher in COP 3014 or ISC 3313.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. COP XXXX: a scientific programming course for three credit hours designed for computer science majors
2. ECO X013
3. ECO X023
4. MAC X311
5. MAC X312
6. MAC X313

Note: A “C” grade or better in all coursework is required for admission.

For curriculum information, please see the “Department of Mathematics” chapter in this General Bulletin and the departmental Web site at http://www.math.fsu.edu.
Department of AEROSPACE STUDIES

AIR FORCE ROTC
COLLEGE OF ARTS AND SCIENCES

Web Page: http://airforcerotc.fsu.edu/

Professor: Colonel Gregory J. Reese

The Department of Aerospace Studies provides pre-commissioning education for qualified students who desire to serve on active duty as commissioned officers in the United States Air Force. The department offers pre-commissioning education programs which vary in length from three to four years. The programs consist of academic courses, leadership laboratories, physical fitness training, and a field training experience which supplement students’ primary courses of study. Additionally, students have the opportunity to participate in professional development training during the summer at various locations throughout the world. Upon successful completion of the program, students will commission as Second Lieutenant in the United States Air Force. The Aerospace Studies curriculum is divided into two phases: (1) the General Military Course (GMC); and (2) the Professional Officer Course (POC). Entry into the POC is done on a competitive basis. To obtain specific information, please e-mail the Department of Aerospace Studies at det145@us.af.mil, visit us at Florida State University, 212 Harpe-Johnson Hall, Tallahassee, FL 32306-4270, call (850) 644-3461, or view our Web page at http://airforcerotc.fsu.edu/.

Note: Students not currently enrolled in the Air Force Reserve Officer Training Corps (AFROTC) program must have the permission of the department chairman prior to enrolling in any AFR course. Class enrollment size is limited, and priority will be given to FSU, FAMU, TCC, and ERAU students seeking a commission in the Air Force and needing AFR courses. Non-AFROTC program students are not eligible for scholarships, incentive pay, or stipends as a result of enrollment in AFROTC program courses.

General Military Course

This program of instruction is open to any student and consists of the AFR 1XXX and AFR 2XXX courses in the AFROTC program. These courses deal with the Air Force structure and the development of air power. They strengthen interest in becoming a professional Air Force officer, develop knowledge of world military forces, and enable the student to understand how the United States Air Force supports national objectives and policies. Class enrollment size is limited, and priority will be given to FSU, FAMU, TCC, and ERAU students enrolled in the AFROTC program.

Professional Officer Course

Entry into the POC courses is done on a competitive basis and consists of the AFR 3XXX and AFR 4XXX courses. The criteria for entry/selection into the POC courses are listed below. Completion of the POC is required by all students who seek a commission through AFROTC. These courses are designed to prepare college students to serve as active duty Air Force officers upon graduation and commissioning. The curriculum stresses national security in contemporary American society, leadership, management, and professionalism. Special emphasis is placed on developing the cadet’s communication skills. Students not currently enrolled in the AFROTC program must have permission of the department chairman prior to enrolling in these courses. Class enrollment size is limited, and priority is given to those FSU, FAMU, and ERAU students enrolled in the AFROTC program.

Required Criteria for Admission into the POC

1. Pass a military physical examination
2. Pass a physical fitness test
3. Pass height/weight standards
4. Have a 2.5 cumulative GPA or higher for undergraduates or a 3.0 cumulative GPA or higher for graduate students
5. Compete favorably with students enrolled in AFROTC programs throughout the nation
6. Sign a contract obligating the student to military service upon completion of the AFROTC program.

Note: Call the Department of Aerospace Studies (850) 644-3461 for specific requirements.

Leadership Laboratory

Leadership Laboratory (LLab) is required for members of the AFROTC program. LLab is the formalized phase of leadership training conducted by the students. Students in the POC plan and conduct all activities associated with LLab, providing these students the opportunity to develop fundamental leadership and management skills. For students in the GMC, LLab focuses on the topics of Air Force customs and courtesies, health and physical fitness, and drill and ceremonies. All uniforms and equipment required for cadet activities are furnished.

Physical Training

All students enrolled in the AFROTC program will participate in Physical Training (PT) at least two days per week (for a total of no more than three hours per week). PT will consist of various forms of exercise, to include running, calisthenics, plyometrics, sports, etc. A Department of Defense Medical Examination Review Board (DoDMERB) physical or sports physical is required prior to participation.

Monetary Allowances

All students selected for entry into the POC will receive a monthly tax-exempt stipend ranging from $300.00-$500.00.

AFROTC College Scholarship Programs

The opportunity to earn a scholarship is possible, but not guaranteed. Scholarships are awarded on a competitive basis. Go to http://www.afrotc.com for current information or contact the Department of Aerospace Studies at (850) 644-3461.

Field Training

Students are required to attend a field training course before they may formally enroll in the POC. Field training is designed to evaluate military leadership and discipline, determine students’ potential for entry into the POC, and stratify students among their peers. All uniforms and equipment required for field training are furnished.

Officer Commissions

Upon graduation from the University, students who complete the POC are commissioned as Second Lieutenants in the United States Air Force. As graduates they incur a minimum active duty service commitment of four years. Graduates chosen for entry into select Air Force Specialty Codes (AFSC) (e.g. pilots, combat systems officers, etc.) will incur additional years of active duty service commitment. For more information on active duty service commitments, contact the Department of Aerospace Studies at (850) 644-3461.

Minor

A minor in aerospace studies is offered and may be selected by the student with the approval of the major department and the Department of Aerospace Studies. Requirement for a minor is twelve semester hours in aerospace studies courses.

Oral Communications Competency

Florida State University requires students to demonstrate competency in oral communications prior to graduation. Students who meet the specific criteria below may be awarded the competency through AF courses.

1. Student must earn a “C-” or better in each of the following courses: AFR 1101, AFR 1102, and AFR 2130.
2. Student must earn a “C-” or better on the verbal presentation portion of the three AFR courses listed above.
3. Apply for oral communications competency credit through the Department of Aerospace Studies. Students must apply for credit prior to completion of the last of the three required courses listed above. Students should be advised that application alone does not guarantee credit toward the completion of the oral communication competency requirement will be awarded. All applications must be reviewed, and if all guidelines have been met, the University will be notified the requirement for competency has been met.

Special Activities

Special activities provide for the development of teamwork and esprit-de-corps. Included are the Arnold Air Society, a national honorary organization, and Silver Wings, a community service oriented organization open to all students.

Awards and Decorations

Awards and decorations, made available by national organizations, Florida State University, and local/national military organizations, are presented to
both GMC and POC cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in AFROTC and other University academic courses and in outstanding campus and cadet corps leadership.

Definition of Prefix
AFR—Aerospace Studies

Undergraduate Courses
AFR 1101. Foundations of the Air Force I (1). This survey course briefly covers topics relating to the Air Force and defense. It focuses on the structure and mission of Air Force organizations, officership and professionalism. Additionally, the course is a good introduction into the use of communication skills.

AFR 1102. Foundations of the Air Force II (1). This course is a continuation of AFR 1101.

AFR 2130. The Evolution of Aerospace Studies I (1). This course is a survey course concerned with the beginnings of manned flight and the development of aerospace power in the United States, including the employment of air power in WWI, WWII, Korea, Vietnam, the Gulf War and the peaceful employment of U.S. air power in civic actions, scientific missions and support of space exploration.

AFR 2140. Evolution of Aerospace Studies II (1). This course is a continuation of AFR 2130.

AFR 2233L. AFROTC Leadership Lab (0). (S/U grade only.) This course is a weekly laboratory that touches on the topics of Air Force customs and courtesies, health and physical fitness, drill and ceremonies. It also provides the opportunity to develop fundamental management skills while planning and conducting cadet activities.

AFR 2340. Basic Aerospace Internship (4). (S/U grade only.) Prerequisites: Selection for the professional officer course portion of the AFROTC program and permission of the professor of aerospace studies. This internship provides AFROTC field training.

AFR 3201. Leadership Studies I (3). Prerequisite: AFR 2140. This course is a study in the anatomy of leadership, the need for quality and management leadership, the role of discipline in leadership situations and the variables affecting leadership. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts. Students deal with actual problems and complete projects associated with planning and managing the Leadership Laboratory.

AFR 3202. Leadership Studies II (3). This course is a continuation of AFR 3201.

AFR 4211. National Security Studies and Preparation for Active Duty I (3). Prerequisite: AFR 3202. This course examines the role of the professional military leader in a democratic society; societal attitudes toward the armed forces; the requisites for maintaining adequate national defense structure; the impact of technological and international developments on strategic preparedness and the overall policy-making process; and military law. In addition, students study topics that prepare them for their first active-duty assignment as an officer in the Air Force.

AFR 4212. National Security Studies and Preparation for Active Duty II (3). Prerequisite: AFR 4211. This course is a continuation of AFR 4211.

Note: If stated prerequisites are not met, permission of the professor of aerospace studies is prerequisite to all courses.
Bachelor of Science (BS) Track Requirements

Completion of six hours in African and/or African-American history courses selected from the following:

- **AFH 1000** African History and Civilization (3)
- **AFH 3451** Sub-Saharan Africa Since 1800 (3)
- **AFH 4302** North African History: A Survey (3)
- **AMH 1091** The African-American Experience in the United States (3)
- **AMH 2096** Black Women in America (3)
- **AMH 2097** Nationality, Race, and Ethnicity in the United States (3)
- **AMH 4571** Black America to 1877 (3)
- **AMH 4572** Black America Since 1877 (3)
- **LAH 4470** History of the Caribbean (3)
- **LAH 4723** Race and Class in Colonial Latin America (3)
- **HIS 4930r** Special Topics in History (3) (*with approved topic)

History Requirement

Completion of six hours in African and/or African-American history courses selected from the following:

- **AFH 1000** African History and Civilization (3)
- **AFH 3451** Sub-Saharan Africa Since 1800 (3)
- **AFH 4302** North African History: A Survey (3)
- **AMH 1091** The African-American Experience in the United States (3)
- **AMH 2096** Black Women in America (3)
- **AMH 2097** Nationality, Race, and Ethnicity in the United States (3)
- **AMH 4571** Black America to 1877 (3)
- **AMH 4572** Black America Since 1877 (3)
- **LAH 4470** History of the Caribbean (3)
- **LAH 4723** Race and Class in Colonial Latin America (3)
- **HIS 4930r** Special Topics in History (3) (*with approved topic)

Bachelor of Science (BA) Track Requirements

Completion of an economics, political science, or sociology specialty area as described below.

Economics Specialty

The economics specialty consists of twenty-one hours of coursework from the following set of courses. Students should consult with their academic advisor for necessary prerequisite coursework.

1. Required courses (six hours):
   - **ECO 4421** Introduction to Econometrics (3)
     AND
   - **ECO 3104** Applied Microeconomic Analysis (3)
     OR
   - **ECO 3101** Intermediate Microeconomic Theory (3)

2. Additional specialty courses (nine hours):
   - **ECO 4704** International Trade (3)
   - **ECP 3143** Afro-Americans in the American Political Economy (3)
   - **ECP 3203** Labor Economics (3)
   - **ECP 4613** Urban Economics (3)
   - **ECS 4013** Economics of Development (3)

3. Supplementary courses (six hours) selected from the approved African-American Studies supplementary course list.

Political Science Specialty

The political science specialty consists of twenty-one hours of coursework from the following set of courses. Students should consult with their academic advisor for necessary prerequisite coursework.

1. Required course (three hours):
   - **POS 3713** Understanding Political Science Research (3)

2. Additional specialty courses (twelve hours):
   - **CPO 3034** Politics of Developing Areas (3)
   - **POS 3142** Urban Politics (3)
   - **POS 3931** Special Topics in Government (1–3)
   - **POS 4624** The Supreme Court, Civil Liberties, and Civil Rights (3)
   - **PUP 3002** Introduction to Public Policy (3)
   - **PUP 4024** Interest Groups, Social Movements, and Public Policy (3)
   - **URP 4741** Introduction to Issues in Housing and Community Development (3)

3. Supplementary courses: (six hours) selected from the approved African-American Studies supplementary course list.

Sociology Specialty

The sociology specialty consists of twenty-one hours of coursework from the following set of courses. Students should consult with their academic advisor for necessary prerequisite coursework.

1. Required courses (six hours):
   - **SYA 4010** Sociological Theory (3)
   - **SYA 4400** Social Statistics (3) or **POS 3713** Understanding Political Science Research (3)

2. Additional specialty courses (nine hours):
   - **SYA 4930** Selected Topics in Sociology (3)
   - **SYD 4700** Race and Minority Group Relations (3)
   - **SYD 4730** Africans in Modern Society (3)
   - **SYO 3530** Social Classes and Inequality (3)
   - **SYP 3350** Collective Action and Social Movements (3)

3. Supplementary courses: (six hours) selected from the approved African-American Studies supplementary course list.

Bachelor of Arts (BA) Track Requirements

Completion of a foreign language requirement through the intermediate college level in French, Spanish, Portuguese or Arabic for the Bachelor of Arts (BA) degree and completion of requirements for the humanities specialty area:

Humanities Specialty

The humanities specialty consists of twenty-one hours from the following set of courses. Students should consult with their academic advisor for necessary prerequisite coursework.

1. Humanities specialty courses (fifteen hours)
   - **AFH 3451** Sub-Saharan Africa Since 1800 (3)
   - **AFH 4302** North African History: A Survey (3)
   - **AMH 1091** The African-American Experience in the United States (3)
   - **AMH 2096** Black Women in America (3)
   - **AMH 2097** Nationality, Race, and Ethnicity in the United States (3)
   - **AMH 4571** Black America to 1877 (3)
   - **AMH 4572** Black America Since 1877 (3)
   - **LAH 4470** History of the Caribbean (3)
   - **LAH 4723** Race and Class in Colonial Latin America (3)
   - **HIS 4930r** Special Topics in History (3) (*with approved topic)

2. Supplementary courses: (six hours) selected from the approved African-American Studies supplementary course list.

African-American Studies Supplementary Course List (six hours)

- **AFA 3101** Theory and Dynamics of Racism and Oppression (3)
- **AFA 3330** Black Families in America (3)
- **AFA 3930r** Special Topics (1–3)
- **AFA 4905r** African American Studies Directed Individual Study (1–4)

Anthropology

- **ANT 4352** Peoples and Culture of Africa (3)

Art History

- **ARH 4118** Archaeology of Ancient Egypt (3)

Communications

- **SPC 4710** Interracial/Intercultural Communication (3)

Criminology

- **CCJ 4662** Minorities, Crime, and Social Policy (3)
- **CCJ 4938** Special Topics in Criminology (3)

Dance

- **DAN 3185** African American Dance in American Culture (3)
African-American Studies

**Economics**
- **ECO 4704** International Trade (3)
- **ECP 3143** Afro-Americans in the American Political Economy (3)
- **ECP 3203** Labor Economics (3)
- **ECP 4613** Urban Economics (3)
- **ECS 4013** Economics of Development (3)

**English**
- **AML 2600** Introduction to African-American Literature (3)
- **AML 3682** American Multi-Ethnic Literature (3)
- **AML 4604** The African-American Literary Tradition (3)
- **LIT 4329** African American Folklore (3)

**History**
- **AFH 3451** Sub-Sahara Africa Since 1800 (3)
- **AFH 4302** North African History: A Survey (3)
- **AMH 1091** The African-American Experience in the United States (3)
- **AMH 2096** Black Women in America (3)
- **AMH 2097** Nationality, Race, and Ethnicity in the United States (3)
- **AMH 4571** Black America to 1877 (3)
- **AMH 4572** Black America Since 1877 (3)
- **LAH 4470** History of the Caribbean (3)
- **LAH 4723** Race and Class in Colonial Latin America (3)
- **HIS 4930r** Special Topics in History (3) (*with approved topic)

**Music**
- **MUH 4801** History of Jazz I (2)
- **MUH 4802** History of Jazz II (2)

**Philosophy**
- **PHM 2121** Philosophy of Race, Class and Gender (3)

**Political Science**
- **CPO 3034** Politics of Developing Areas (3)
- **POS 3142** Urban Politics (3)
- **POS 3931** Special Topics in Government (1–3)
- **POS 4624** The Supreme Court, Civil Liberties, and Civil Rights (3)
- **PUP 3002** Introduction to Public Policy (3)
- **PUP 4024** Interest Groups, Social Movements, and Public Policy (3)

**Psychology**
- **SOP 3782** Psychology of the African-American (3)

**Religion**
- **REL 3936r** Special Topics in Religion (1–3). (*with approved topic)
- **REL 4190r** Undergraduate Religion and Culture Seminar (3) (*with approved topic)

**Sociology**
- **SYD 3600** Cities in Society (3)
- **SYD 4700** Race and Minority Group Relations (3)
- **SYD 4730** African Americans in US Society (3)
- **SYG 2010** Social Problems (3)
- **SYO 3530** Social Classes and Inequality (3)
- **SYO 4352** The Sixties: Social Change, Social Movement (3)
- **SYP 3350** Collective Action and Social Movements (3)

**Urban and Regional Planning**
- **URP 4741** Introduction to Issues in Housing and Community Development (3)

*Note: Special topics and seminar courses receive credit toward the African-American Studies major or minor only when it is appropriate for them to do so. Where appropriate, courses offered at Florida A&M University that are not offered at FSU may be used to fulfill the requirement for a Bachelor’s degree with permission of the academic dean.

**Definition of Prefix**

**AFA**—African-American Studies

**Undergraduate Courses**

**AFA 1003. Diversity and Justice (1).** This course integrates African authors, pre- and post-Apartheid, to demonstrate the problems of living in a diverse world. It fosters awareness and acceptance of people different from students through the study of African-American culture, and stimulates an appreciation and respect for people of all cultures.
Program in

AMERICAN AND FLORIDA STUDIES

College of Arts and Sciences

Web Page: http://phas.fsu.edu/

Program Director: Martin Kavka; Undergraduate Advisor: Kathryn Stoddard

Effective as of December 2009, the Program in Interdisciplinary Humanities has suspended admission into the American and Florida Studies major for all new students. However, current students in the major will be allowed to complete their programs of study as outlined in the catalog of the year of admission. For questions and further advising, please contact Dr. Kathryn Stoddard in the Program in Interdisciplinary Humanities at (850) 645-8292.

American Studies is concerned with the culture of the United States studied from cross-disciplinary interdepartmental perspectives. The aim of the program is to extend forward dimensions of awareness rather than to further refinements of disciplinary analysis. A wide variety of courses are available from many departments. The flexibility of the program gives students an opportunity to develop a curriculum commensurate with their own interests and needs.

In addition, students may focus on Florida Studies, that is, on Florida in the Americas. The same cross-disciplinary mode of study is utilized to interpret the Florida experience in the context of the way(s) Florida has been perceived by Americans, past and present.

Course Overlap with Liberal Studies and/or Other Majors: A maximum of three semester hours may overlap between the American Studies major and the Liberal Studies requirements. A maximum of six semester hours may overlap between American Studies and another major. No courses taken toward the minor in American Studies can overlap with any other requirements (exclusive of writing or Multicultural X and Y classes).

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in American and Florida Studies satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 (preferred) or CGS 2100.

Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Major

Thirty semester hours are required, distributed in a way satisfactory to both the student and the director, not including courses used to satisfy liberal studies requirements. All students are required to take at least nine semester hours in American studies courses, including a special topics course, and at least three semester hours in each of the areas of study listed below. No more than twelve semester hours in any one area may be counted toward the major. The areas of study are literature, history, fine arts, and social sciences. Any course in the University that deals primarily with the United States may be included under one of these areas. Interested students may obtain from the director a list of courses generally used in the program. In addition, students must complete an approved minor.

Honors in the Major

American Studies participates in the honors in the major program to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Minor

The minor in American and Florida studies offers an excellent complement to a major in Humanities, the social sciences, and fine arts. The minor requires fifteen semester hours in history, literature, fine arts, or social sciences that have been approved by the director.

Combined Bachelor’s/Master’s Degree Program

American and Florida Studies offers a combined Bachelor of Arts/Master of Arts (BA/MA) program designed for academically strong students who wish to pursue an accelerated program culminating in a Bachelor of Arts (BA) degree and a Master of Arts (MA) degree. This five-year program allows up to twelve semester hours of coursework to be dually counted toward both the BA and the MA degree.

Before applying to the combined BA/MA program in American and Florida Studies, an undergraduate student should have declared American and Florida Studies as the major, completed at least twelve semester hours of coursework toward the major with a GPA of 3.5 in that coursework, and completed at least sixty semester hours at Florida State University with a GPA of 3.0. Transfer students must have completed at least two semesters and twenty-four semester hours at Florida State while maintaining a GPA of 3.0 before applying.

Undergraduate students may apply as early as the second semester of their sophomore year. If accepted, they should take the GRE at the end of their junior year and apply to the graduate school during the first semester of their senior year. Students who fail to be admitted into the graduate school may not continue with the accelerated program. In order to remain in the accelerated program, a student must maintain at least a 3.0 GPA in all coursework and at least a 3.2 GPA in courses counting toward the major in American and Florida Studies at or above the 4000 level.

Definition of Prefix

AMS—American Studies

Undergraduate Courses

AMS 1363r. Issues in American Civilization: The University (1–2). (S/U grade only.) This course covers issues in American civilization and places emphasis on the University. May be repeated to a maximum of two semester hours.

AMS 3310r. Changing Concepts of the American Character (3). This course is a study of American culture and values. May be repeated to a maximum of six semester hours. May be repeated within the same semester.

AMS 3810r. The Life of the Mind in America (3). This course addresses topics in American intellectual history. May be repeated to a maximum of six semester hours. May be repeated within the same semester.

AMS 3932r. Lecture Series in American Problems (3). This course explores American problems. May be repeated to a maximum of six semester hours. May be repeated within the same semester.

AMS 3949r. Cooperative Education Work Experience (0). (S/U grade only.)

AMS 4905r. Directed Individual Study (1–3). May be repeated to a maximum of six semester hours. May be repeated within the same semester.

AMS 4913r. Honors Work (1–6). May be repeated to a maximum of nine semester hours.

AMS 4935r. Senior Seminar (3). May be repeated to a maximum of twelve semester hours. May be repeated within the same semester.

AMS 4941r. Internship in an Approved American Studies Field (3–9). (S/U grade only.) Prerequisite: Must have completed one full semester of major courses (twelve credit hours or more) before registering for internship. May be repeated to a maximum of nine semester hours.

Graduate Courses

AMS 5809r. Seminar in American Culture (3).

AMS 5815r. Seminar in American Thought (3).

AMS 5908r. Directed Individual Study (1–3).

AMS 5915r. Supervised Research (1–3). (S/U grade only.)

AMS 5940r. Supervised Teaching (1–3). (S/U grade only.)

AMS 5942r. Internship in an Approved American Studies Field (3–9). (S/U grade only.)

For listings relating to graduate coursework for thesis, dissertation, and master’s examination and defense, consult the Graduate Bulletin.
The department offers an undergraduate degree in anthropology. Anthropology investigates humankind in all its diversity. It includes the study of human origins, physical characteristics, adaptations, distributions, customs, artifacts, languages, beliefs, and practices. Anthropologists divide their work among four sub-disciplines: archaeologists study material objects left behind by prehistoric and historic peoples and document stability and change in human behavior over long time periods. Physical (biological) anthropologists study living primates, the fossil record of primates and early humans, comparative anatomy and osteology, contemporary forensic anthropology, medical anthropology, human variation, and the evolutionary and biological bases for cognition and culture in humans. Cultural anthropologists live among and study contemporary peoples; their social institutions; their history; their political, religious, and medical practices; and the creative products of their social lives. Anthropological linguists study the evolution and structure of human language and the relationships between language, culture, and society.

The department also participates in the undergraduate programs in Latin American and Caribbean studies, Middle Eastern studies, and in the honors in the major program. For further information on the program and its offerings, please visit http://www.anthro.fsu.edu.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Anthropology satisfy this requirement by earning a grade of "C-" or higher in CGS 2060 or CGS 2100.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program. At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flserv.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ANT XXXX: two introductory anthropology courses (ANT prefix) for six credit hours

Requirements for a Major in Anthropology

To complete a BA or BS degree with a major in anthropology, a student must take, in addition to other college requirements, thirty semester hours of anthropology courses, including the following: ANT 2100, 2410, 2511, 3610, 4034, and fifteen additional semester hours of anthropology coursework at the 3000-4000 level. No more than three semester hours of credit in fieldwork courses and no hours of directed individual study (DIS) or satisfactory/unsatisfactory (S/U) credits may be used to meet the specific requirement of fifteen semester hours of work at the 3000-4000 level, except upon approval of a peti-
ANT 3520. Introduction to Forensic Anthropology (3). Prerequisite: ANT 2511. This course is an introduction to forensic anthropology as a scientific discipline within the field of anthropology and what is involved in examining bodies after death, the process of decomposition, and taphonomic changes. The course also examines what is required of a forensic investigation of such a body from search to documentation, collection, processing, and analysis.

ANT 3510. Language and Culture (3). This course is an introduction to and examination of human language, its relation to perception and cognition, and its role in social interaction. This includes verbal as well as nonverbal communication modes, their variety and complexity, the evolution of language, and language change.

ANT 4034. History of Anthropology (3). Prerequisites: ANT 2100, 2410 and 2511. This course is a survey for majors that reviews the development of the central ideas that have shaped the emergence of anthropology as a science. The approach is critical and objective, the presentation is chronological, and the emphasis is to evaluate the scope and limitations of modern theories.

ANT 4122. Wetlands Archaeology (3). Prerequisite: ANT 2100. This course provides an introduction to wet site archaeology, incorporating an overview of wet sites, their geographic distribution, time depth, the process of excavation, conservation requirements, and the field's contribution to our understanding of the past.

ANT 4133. Introduction to Underwater Archaeology (3). Prerequisite: ANT 2100. This course is a survey of the history, theory, methods, and problems of underwater archaeology, with attention given to the types of investigations and environments in which underwater archaeology is conducted and to the field's particular contributions to anthropology.

ANT 4134. Nautical Archaeology of the Americas (3). Prerequisite: ANT 2100. This course studies human interaction with bodies of water, particularly in the maritime environment. Illustrated presentations, readings, and discussions focus on a variety of cultures and periods and issues involved in the study of shipwrecks and submerged sites.

ANT 4135. Nautical Archaeology: Global View (3). Prerequisite: ANT 2100. This course studies human interaction with bodies of water, particularly in the maritime environment. Illustrated presentations, readings, and discussions focus on a variety of cultures and watercraft from Asia, Australia, the Mediterranean, and Europe.

ANT 4142. European Prehistory (3). Prerequisite: ANT 2100. This course introduces students to the archaeology of the European continent from its initial colonization by early hominids during the Lower Paleolithic through the archaic state civilizations of the Aegean Bronze Age.

ANT 4145. Origins of Complex Society (3). Prerequisite: ANT 2100. This course examines the evolution of ancient complex societies and theories of state origins using a comparative method involving ecological, economic, and social approaches to investigate the origins, collapse, and sustainability of complex societies.

ANT 4153. North American Archaeology (3). Prerequisite: ANT 2100. This course examines the prehistory of North America from the earliest big-game hunters who exploited extinct faunata to the societies existing at the time of historic contact. Regional variation and continuity in subsistence and settlement patterns and material culture are examined.

ANT 4163. Mesoamerican Archaeology (3). Prerequisite: ANT 2100. This course investigates the development of high civilization in ancient Mesoamerica. Evidence is drawn from archaeology, art, architecture, ethnohistory, and ethnography.

ANT 4166r. Regional Civilizations in Ancient Mesoamerica (3). Prerequisites: ANT 2100 and ANT 4163r. Focuses on the archeological civilization of ancient Mesoamerica (such as Maya, Olmec, or Mixtec) with each topic. Aspects of prehistoric society covered include: subsistence systems, trade, social and political organizations, ideology, calendrics and astronomy, language and writing, artifacts, architecture, sculpture, and painting. Format is seminar presentations, research reports, and discussion. May be repeated to a maximum of three semester hours.

ANT 4175. Archaeology of the Islamic World (3). Prerequisite: ANT 2100. This course covers the cultural conceptions of the early Islamic world and its development, focusing on the nature of and theories concerning human conflict from the interdisciplinary perspectives of biological and cultural anthropology, political economy, and the history of warfare. Particular emphasis is placed upon cross-cultural applications.

ANT 4241. Anthropology of Religion (3). This course covers the development of high civilization in ancient Mesoamerica. Evidence is drawn from archaeology, art, architecture, ethnohistory, and ethnography.

ANT 4242. Symbol and Ritual (3). Prerequisite: ANT 2410. This course is an introduction to symbols and their use in anthropology and ritual. It critically analyzes the theoretical mechanisms that anthropologists use in analyzing symbolic activity. Material comes from various parts of the world.

ANT 4277. Human Conflict: Theory and Resolution (3). This course provides an introduction to the nature of and theories concerning human conflict from the interdisciplinary perspectives of biological and cultural anthropology, political economy, and the history of warfare. Particular emphasis is placed upon cross-cultural applications.

ANT 4302. Sex Roles in Cross–Cultural Perspective (3). Prerequisite: ANT 2410. This course explores sex roles in anthropological perspective with emphasis on data from archaeology and ethnology. Special emphasis on the interpretation of sex roles by anthropologists in the field.

ANT 4309. Conquest of the Americas (3). This course examines the conquest of the Americas. It explores the arts of domination, power, and resistance and specific historical events.
Graduate Courses

ANG 5909. Seminar in Research Methods (3).
ANG 5910. Seminar in Archaeological Method and Theory (3).
ANG 5915. Seminar in Archaeology (3).
ANG 5916. Regional Analysis in Archaeology (3).
ANG 5917. Core Seminar in Archaeology (3).
ANG 5924. Archaeobotany (3).
ANG 5929. Wetlands Archaeology (3).
ANG 5934. Nautical Archaeology of the Americas (3).
ANG 5937. Nautical Archaeology: Global View (3).
ANG 5945. Origins of Complex Society (3).
ANG 5955. Archaeology of the Southeastern United States (3).
ANG 5963r. Regional Civilizations in Ancient Mesoamerica (3).
ANG 5972. Historic Archaeology (3).
ANG 5913r. Seminar in Archaeology (3).
ANG 5914r. Analysis and Interpretation of Archaeological Research (3).
ANG 5920. Anthropology of Religion (3).
ANG 5922. Symbol and Ritual (3).
ANG 5926. Economic Anthropology (3).
ANG 5927. Human Conflict: Theory and Resolution (3).
ANG 5939. Conquest of the Americas (3).
ANG 5932. Peoples and Cultures of Africa (3).
ANG 5946. Kinship and Social Organization (3).
ANG 5947. Technology and Social Change (3).
ANG 5948. Cultural Evolution (3).
ANG 5941r. Seminar in Social Anthropology (3).
ANG 5943. Core Seminar in Culture Anthropology (3).
ANG 5951r. Seminar in Physical Anthropology (3).
ANG 5953. Core Seminar in Physical Anthropology (3).
ANG 5958. Biocultural Adaptation and Paleodemography (3).
ANG 5951. Method and Theory in Human Biology (3).
ANG 5961. Linguistic Prehistory (3).
ANG 5964. Ethnozoology (3).
ANG 5975. Core Seminar in Linguistic Anthropology (3).
ANG 5977r. Seminar in Linguistic Anthropology (3).
ANG 5973. Medical Anthropology (3).
ANG 5981. Field Methods in Cultural Anthropology (3).
ANG 5984r. Anthropological Fieldwork: Archaeology (1–9).
ANG 5985. Directed Individual Study (1–3). (S/U grade only.)
ANG 5986. Directed Individual Study (1–3).
ANG 5989. Supervised Research (1–3). (S/U grade only.)
ANG 5990. Supervised Teaching (1–3). (S/U grade only.)
ANG 5942r. Internship in Museum Studies (3–9).
ANG 6484. Cultural Analysis (3).
ANG 6907r. Directed Independent Study (1–3). (S/U grade only.)
ANG 6908r. Directed Independent Study (1–3).
ANG 6903r. Advanced Seminar in Anthropology (3).

COLLEGE OF FINE ARTS

Web Page: http://art.fsu.edu/
Chair: Carolyn Henne; Professors: Garcia-Roig, Hanessian, Henne, Lindbloom, Messersmith, Stewart, Weishar, Williams; Associate Professors: Baade, Bookwalter, Mann, Mundy, Roberson, Rushin, Rutkovsky; Assistant Professors: Beekman, Cheung, Duarte, Torop; Assistant Teaching Professors: Curry, Dietrick; Associate in Art: Stagg; Professors Emeriti: Bell, Blakely, Bunggrafl, Fichter, Hartwell, Rubini

The Department of Art offers diverse opportunities for creative development and expression, provides instruction in the skills necessary for artistic creation, and guides students to an understanding of contemporary issues in the visual arts in an academically challenging environment. The department is committed to excellence in all programs and strives to combine curricular flexibility and a rigorous mix of experiences with opportunities for serious, focused study in art and digital media. The department benefits from the Museum of Fine Arts (MoFA) for student and faculty exhibitions. Additionally, the department serves as a resource to the rest of the University, providing exhibitions, visiting artist lectures, and foundation courses for related programs.

The Department of Art offers an undergraduate degree program leading to the Bachelor of Arts (BA) in studio art and a limited access Bachelor of Fine Arts (BFA) degree program in studio art. In the Master of Fine Arts (MFA) degree program, graduates may pursue studies in either a studio or digital media area. Course selection encompasses history, theory, and practice. Studies may include ceramics, electronic media, drawing, installation, painting, photography, printmaking, and sculpture. Depending upon personal development, graduate students may choose to work in a variety of media or to concentrate in an area of interest. Each degree program mandates specific entry requirements, a certain sequence of courses, and graduation requirements. Information on each program beyond that explained in this General Bulletin is available through the Department of Art academic advisor.

Students entering the department should visit the department’s Web site at http://art.fsu.edu/ for specific details regarding major requirements.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors satisfy this requirement by earning a grade of “C–” or higher in ART 1002C.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Studio/Fine Art
1. ART X201 or ART XXXX (2D)
2. ART X202 or ART X203 or ART XXXX (Design II, 3D)
3. ART X300
4. ART X301 or ART X330 (Figure drawing) or ART X205 (Color, color composition) or ART X310 (Intermediate drawing) or ART X305 (Observational)
5. ARH X050
6. ARH X051
7. ART XXXX: one course for six credit hours

Note: All courses except ARH X050 and X051 require a “C” or higher.
Undergraduate Programs

Admission and Readmission

Students desiring to enter the department should visit the department’s Web site at http://art.fsu.edu/Undergraduate for specific details regarding major requirements.

Students who apply for readmission to the department must meet the studio art degree requirements listed in the General Bulletin that is current at the time of readmission.

Academic Performance and Retention

The Department of Art reserves the right to discontinue enrollment of art major students at any time if satisfactory academic progress is not being made. Students who have accumulated three unsatisfactory grades (U, F, D–, D, +) in art courses taken for college credit at Florida State University or elsewhere will not be permitted to continue, be readmitted, or graduate with a major in studio art. Courses in which a grade below the minimum is received may only be repeated once. Repeated courses designated as non-repeatable (such as foundations courses) will not be counted toward overall credit hours per University requirements. BA students must maintain a minimum GPA per University requirements. BFA students must maintain a minimum cumulative GPA of 2.5 and a GPA of 3.0 in studio art classes. If a BA/BFA student’s GPA falls below the minimum, s/he is placed on probation for the following semester. If the student’s grade or GPA remains below the minimum standards by the end of the probationary semester, s/he is dismissed from the Department of Art. The Department of Art retains the right to refuse admission or terminate enrollment at any time if a student fails to maintain the standards of the program.

The Foundations Program

The Department of Art requires that students receive a sound foundation in basic visualization and conceptualization skills and in the fundamentals of studio theory and practice. To this end, students must complete a foundations program before taking other art courses. The program consists of a sequence of basic drawing, design, art theory, and imaging courses. Students are encouraged to complete their foundations-level courses by the end of the freshman year. Entering students should contact the department for specific details regarding foundations requirements or visit the department’s Web site at http://art.fsu.edu/Undergraduate.

Mission

The Art Foundations Program provides beginning art students with the fundamentals, knowledge, and experiences essential to their further development as visual arts professionals.

Philosophy

In the Foundations Program, students are encouraged to expand their technical skills, develop their critical judgment, explore interdisciplinary connections, refine their personal goals, and increase their understanding of contemporary art and design. Inventive concepts are used to fuel development of compelling composition and constructions. The curriculum provides the basis on which the BA and BFA programs are built in the Department of Art. The Bachelor of Arts (BA) in Studio Art

The Bachelor of Arts (BA) in Studio Art

The Bachelor of Arts (BA) in studio art is a fundamental liberal arts program totaling one hundred twenty semester hours. Requirements include: liberal studies, thirty-six semester hours; completion of the foundations program, sixteen semester hours; art history, nine semester hours; additional studio, twenty-one semester hours; the successful completion of a foreign language course through the intermediate level; and nine semester hours of additional humanities. Within the twenty-one semester hour studio requirement, the BA student is required to complete one focus area. For specific details, including all focus area templates, please visit http://art.fsu.edu/Undergraduate/BA.

Bachelor of Fine Arts (BFA) Admission Application

Upon completion of the sixteen semester hours in the foundations program, application for the Bachelor of Fine Arts (BFA) is by portfolio review by the faculty. Admission to the program is highly selective. Students are required to have a “C–” or above in all foundation requirements. The admission process includes a review of the student’s portfolio by faculty members who may recommend that the work be submitted to the entire faculty for consideration. Students are advised to apply to the BFA program after completing sixteen hours in the foundations program and prior to completing ninety credit hours.

The Bachelor of Fine Arts (BFA) in Studio Art

The Bachelor of Fine Arts (BFA) in studio art is a limited access, one hundred twenty semester-hour program. It differs from the BA degree in that it provides the graduate with a more intensive background in professional skills and theoretical knowledge. The BFA degree seeks to develop in students an informed personal vision, a high level of competence in technique, and the ability to make sound artistic decisions. It is a proficiency-based program characterized by continuous assessment. Upon completion of the sixteen semester hours in the foundations program, application for the BFA degree is by faculty portfolio. The process includes an individual review of the student’s portfolio by faculty members who may recommend that the work be submitted to the entire faculty for consideration.

In addition to the thirty-six semester hours of liberal studies, coursework includes sixteen semester hours of foundations, fifty-one semester hours of studio art courses, and twelve semester hours of art history. An important aspect of the program is that students are taught to make their own decisions with regard to media selection or concentration. Within the fifty-one semester hour studio requirement, the BFA student is required to complete one focus area and a second focus area is recommended. The BFA student must also complete the Thesis Project and Exhibition Practicum in the final semester. Students admitted to the BFA program are exempt from the language requirement and they must maintain a minimum cumulative GPA of 2.5 and a GPA of 3.0 in art classes. They are required to fulfill the additional requirements and responsibilities of this program including attending and satisfactorily performing in all BFA reviews, culminating in the advancement review and graduation exhibition. In addition to the thirty-six semester hours of liberal studies, coursework includes sixteen semester hours of foundations, fifty-one semester hours of studio art courses, and twelve semester hours of art history. An important aspect of the program is that students are taught to make their own decisions with regard to media selection or concentration. Within the fifty-one semester hour studio requirement, the BFA student is required to complete one focus area and a second focus area is recommended. Graduate Program

The Master of Fine Arts (MFA)

The Master of Fine Arts (MFA) in studio art is a residency program with a minimum requirement of sixty semester hours at the graduate level. In addition to University admission requirements, the department requires that all applicants submit a portfolio of slides or original work for review. The program includes a minimum of thirty-two semester hours in studio art, eleven semester hours of electives toward the entire faculty for consideration.

For information regarding the MFA degree, please contact the Department of Art academic advisor and refer to the Graduate Bulletin.

Student Safety

Students in each course will be instructed in safe practice with both tools and materials and will be responsible for following safety regulations.

PGY—Photography
Undergraduate Courses

Correlating Courses

ARH 2630C. Survey in African-American Art (3). This course surveys special topics in African-American art and aesthetics. Students explore power dynamics, social protest, artistic accomplishment, criticism, perception, content, and motivation as historical and contemporary influences on and in African-American art.

PGY 2100C. Photography for Non-Art Majors (3). This course is an introduction to camera operation and the development of the concept of contemporary and historical work. Emphasis on 35mm slide projects rather than printing techniques. (This course may be offered as part of FSU International Programs curriculum.)

Studio Courses

ART 1000. Success Strategies in Art and Design (1). (S/U grade only.) This course provides an orientation designed to increase first-year student success, introduce departmental concentrations, and explore career possibilities.

ART 1201C. Two-Dimensional Foundations (3). This course provides experience in conceptualizing, creating, and critiquing two-dimensional compositions using the elements and principles of design.

ART 1203. Three-Dimensional Foundations (3). This course provides experience in designing and constructing three-dimensional forms using a variety of materials and methods.

ART 1300C. Drawing Foundations (3). This course includes creative expression and communication using a variety of black and white media.

ART 1602C. Digital Foundations (3). This course offers an introduction to the theory and practice of digital imaging and the basics of time-based art and design.

ART 203C. Contemporary Art Scholarship and Practice (3). This course provides an introduction to the theories and creative processes that propel contemporary art and design. The course studies a wide range of media and methods used by visual artists and designers to create meaning in their images, objects, and experiences. Offered to all non-art majors.

ART 2204C. Contemporary Art and Design Foundations (3). This course is an investigation of the creative processes and critical thinking that propel contemporary art and design.

ART 2205C. Color Theory Foundations (3). This course offers experiments in color perception and in the uses of color in visual communication and expression.

ART 2301C. Drawing II (3). Prerequisites: ART 1201C and ART 1300C. This course builds on the technical and conceptual skills learned in Drawing I. Artistic expression and communication through drawing in both black and white and color media.

ART 2330Cr. Figure Drawing Foundations (3). Prerequisite: ART 1300C. This course explores the anatomical and conceptual complexities of the human form.

ART 2400C. Introduction to Printmaking (3). Prerequisites: ART 1201C and ART 1300C. This course is an introduction to relief printing in wood block, linoleum block, and collograph.

ART 2430C. Fundamentals of Printmaking: Silkscreen (3). Prerequisites: ART 1201C and ART 1300C. This course is an introduction to the basic techniques of serigraphy using non-toxic processes.

ART 2441C. Fundamentals of Printmaking: Etching (3). Prerequisites: ART 1201C and ART 1300C. This course is an introduction to intaglio printing with line etch, aquatint, and softground using non-toxic processes.

ART 2500C. Beginning Painting (3). Prerequisites: ART 1201C and ART 1300C. This course is an introduction to personal expression in painting medium; emphasizes color, composition, and painting techniques through historical examples and technical demonstrations.

ART 2600. Introduction to Digital Imaging (3). Prerequisites: ART 1201C and ART 1300C. This course includes beginning training in digital arts and graphic design.

ART 2607. Digital Color Theory and Management (3). Prerequisite: ART 1602C. This course includes digital experiments in color perception combined with uses of color in visual communication and expression.

ART 2701C. Sculpture I (3). Prerequisites: ART 1201C, ART 1203, and ART 1300C. This course is an introduction to basic sculptural processes of fabrication, carving, modeling, and casting. Emphasis on developing ideas through analytical responses to assignments.

ART 2752Cr. Wheel Throwing (3). Prerequisite: ART 1203. This course is the first in which the student learns to throw on the potter’s wheel. From the basic cylinder, the student learns to form a pitcher, covered jar, and other functional shapes. Some alteration of thrown forms is also covered. Experience with clay and glazing is helpful but not required. This course may be repeated to a maximum of nine semester hours, with requirements increasing in difficulty each time.

ART 2893r. Contemporary Art Seminar (1). (S/U grade only.) This course, conducted by studio faculty, is a lecture and discussion course. It provides students with insight into the current work by resident faculty and visiting artists. May be repeated to a maximum of three semester hours.

ART 3333C. Figure Drawing II (3). Prerequisites: ART 1300C and ART 2330C. This course explores the anatomical, conceptual, and expressive complexities of the human form.

ART 3380C. Experimental Drawing (3). Prerequisites: ART 1300C, ART 2301C and ART 2330C. This course explores a variety of approaches to drawing using a wide range of media, materials, and techniques.

ART 3420C. Fundamentals of Printmaking: Lithography (3). Prerequisites: ART 1201C, ART 1203, and ART 1300C. This course is an introduction to the basic lithographic techniques of gravure, letterpress, lithography, and lithography on metal.

ART 3522. Intermediate Painting (3). Prerequisite: ART 2500C. This intensive studio course offers painting as a means of investigating content and concepts. The emphasis is on developing ideas while refining techniques of handling paint.

ART 3542C. Aqueous Painting (3). Prerequisite: ART 2500C. This course is an investigation of acrylic, watercolor, gouache, and flash processes and techniques. A very wide variety of work that explores the relationships of watercolor to its fullest potential.

ART 3560r. Figure Painting (3–9). Prerequisites: ART 2330C and ART 2500C. This course uses the nude figure as the focus of study. The emphasis shifts towards the development of more personal expressions and personal development in terms of painting style and technique. May be repeated to a maximum of nine semester hours.

ART 3561. Experimental Painting (3). Prerequisites: ART 1201C and ART 1300C. This course is an exploration of non-traditional painting materials and approaches in the context of “hybridization.” Over the course of the semester, several topics in the use of new technologies of production are covered.

ART 3590r. Painting Materials and Techniques (3–6). Prerequisites: ART 2500C and ART 3522. This course explores the relationships between art and electronic media and the implications of such experiments on the future of painting. The course focuses on the shift from industrial to information-driven economies, the curriculum outlines digital arts historical trajectory, from the invention of photography to recent digital tools. Special attention is given to film, gaming, 3D printing, architecture and interdisciplinary art practices.

ART 3710C. Sculpture II (3). Prerequisite: ART 2701C. This course allows continued experimentation in more complex three-dimensional techniques, emphasis on individual projects and conceptual approach.

ART 3764C. Beginning Ceramics (3). Prerequisite: ART 1203. This course covers hand-building processes and fundamental glazing techniques. Emphasis is on the development of a high degree of technical proficiency and a keen sense of form in ceramic objects.

ART 3845. Entering the Public Sphere: How to Apply for Public Art Commissions (3). Prerequisites: ART 1000, ART 1201C, ART 1203, ART 1300C, ART 1602C, and ART 2204C. This course provides information about the process of applying for public art commissions including in-depth information about each component of the application. Students go through the process of designing a public art project and creating a complete proposal. The course provides insight into the business side of public art and the experiences of creating a proposal that elucidates the beginning steps of creating work for the public sphere.

ART 3930r. Special Topics in Art (1–3). (S/U grade only.) This course covers faculty directed topics of importance to students’ interests and needs. May be repeated to a maximum of three semester hours.

ART 4312C. Drawing II (3). Prerequisite: ART 2301C. This course focuses on creative expression and communication through a variety of drawing tools, media, and processes.

ART 4334C. Figure Drawing II (3). Prerequisite: ART 3333C. This course offers extensive development of figurative imagery, concepts, and presentation strategies in support of personal aesthetic development.

ART 4382C. Advanced Experimental Drawing (3). Prerequisite: ART 3380C. This course offers an advanced exploration of drawing as research, concept, communication, and collaboration.

ART 4520r. Advanced Painting (3–9). Prerequisites: ART 2500C and ART 3522. This course provides an advanced undergraduate studio experience, where students direct their semester projects. This course is designed for students in the BFA program with a concentration in 2-D art. Each student is provided with opportunities to expand their understanding, production, and quality of their work through critique, group discussion, lectures, and presentations. May be repeated to a maximum of nine semester hours.

ART 4782. Ceramics II: Wheel As Tool (3). Prerequisites: ART 1000, ART 1201C, ART 1203C, ART 1300C, ART 1602C, ART 2204C, ART 4922. This course includes demonstration of ceramic techniques and presentation strategies in support of personal aesthetic development using a potter’s wheel.

ART 4800. Criticism Seminar (3). This course covers aspects of contemporary art scene, galleries, and markets. Stress on developing portfolio/resume, critical attitude, and skills necessary for presenting work.

ART 4851. Graduating BA Course (3). In this course, BA students in their final year of study present a portfolio of projects, discuss the skills learned earlier in their studies, and apply these toward a summative exhibition. The various ways others who have earned a BA in studio art have found to apply their experiences toward their future endeavors are discussed. The course also includes guests who talk about a full range of opportunities and resources, as well as an exploration of some basic tools for sustaining a life in the arts post-graduation.

ART 4905r. Directed Individual Study (3–9). May be repeated to a maximum of nine semester hours.
ART 4943r. Internship in Creative Art (1-12). (SU grade only.) Prerequisites: Sixteen credits completed in Foundations and "B" average in all related courses. This course facilitates internships in a variety of work situations. Must be approved by department chair. Preference given to seniors. May be repeated to a maximum of twelve semester hours.

ART 4970. BFA Thesis Project and Exhibition (3). Pre- or corequisites: This course is taken in the student’s final semester; therefore, all degree requirements are pre- or corequisites. Any remaining art courses for the degree must be taken during the semester this course is taken. This course is the capstone course for all BFA students in the Department of Art. Students develop and execute a capstone thesis project to be exhibited publicly. Additionally, the students organize an artist’s talk to be delivered to an audience.

ART 4981r. Honors Work (3). May be repeated to a maximum of twelve semester hours.

DIG 3025. Design History and Theory (3). Prerequisites: ART 1201C, ART 1203, ART 1300C, ART 1602C, and ART 2003C or ART 2204C. This course examines the historical development of design styles and techniques and their influences on contemporary culture.

DIG 3118. Digital Graphic Design (3). This course is designed for any student who is interested in learning how to create and edit well-designed digital graphics for professional use. Topics include skills related to developing vector and pixel based graphics for print and Web using commercial-grade graphics software as well as fundamental 2-D design principles. Gauged for beginners who are computer competent.

GRA 2190C. Graphic Design I/Introduction (3). Prerequisites: ART 1201C, ART 1300C, and ART 1602C. This course is a continuation of the basic concepts introduced in foundations. Exploratory design problems include iconography, signs and symbols, and two-dimensional and three-dimensional compositions. These problems extend the methodology and conceptualizing/problem-solving skills of design.

GRA 3112C. Graphic Design II/Typography (3). Prerequisites: ART 1201C, ART 1300C, and ART 1602C. This course introduces students to typography and how type works as a pure design creating form, value, direction, etc., as letter forms or marks, as well as on a communication level as a message carrier.

GRA 3193C. Graphic Design III/Production (3). Prerequisites: ART 1000, ART 1201C, ART 1203, ART 1300C, ART 1602C, and ART 2003C or ART 2204C. This course explores the design process by solving specific design problems in video and sound, going from conceptualization to refinement and final implementation.

PGY 2401C. Photography I (3). Prerequisites: ART 1201C, ART 1203, ART 1300C, ART 1602C, and ART 2003C or ART 2204C. This course offers a study of photography as a creative means of expression. Topics include 35mm technology and fine black-and-white printing.

PGY 2941C. Digital and Photographic Imaging (3). Prerequisites: ART 1201C and ART 1602C. This course introduces students to lens-formed image production through both liquid (traditional darkroom) and dry processes (digital). It includes image analysis within both critical and historical frameworks.

PGY 3401C. Photography II (3). Prerequisite: PGY 2401C. This course explores photography as a fine art. Students develop a series of portfolios of images based on their personal vision and understanding of the medium.

Media Workshops

Note: The media workshops allow students to pursue intensive technical studies in one specific medium under the appropriate instructor. Workshops serve as an extension of intermediate courses in corresponding media.

ART 4921Cr. Media Workshop: Painting/Drawing (3). Prerequisite: ART 2500C. This course consists of independent studies under painting instructors; emphasis on competence in medium and development of individual solutions to problems. May be repeated to a maximum of twelve semester hours.

ART 4922Cr. Media Workshop: Ceramics (3). Prerequisites: ART 1203 and ART 3764C. This course involves intensive studies in sculpture. May be repeated to a maximum of twelve semester hours.

ART 4923Cr. Media Workshop: Printmaking (3). Prerequisite: ART 2400C or ART 2430C. This course covers advanced techniques of silkscreen, relief printing, etching, and lithography, as well as photo-silkscreen, relief printing, and papermaking, depending on appropriate instructor. May be repeated to a maximum of twelve semester hours.

ART 4924Cr. Media Workshop: Photography (3). Prerequisite: PGY 2401C. This course covers various areas of photographic study, including nonsilver and advanced silver printing techniques, offset lithography, and conceptual approaches to image making. May be repeated to a maximum of twelve semester hours.

ART 4925Cr. Media Workshop: Digital Media (3). Prerequisites: ART 1000, ART 1201C, ART 1203, ART 1300C, ART 1602C, and ART 2203C or ART 2204C. This course is an intensive study in intermediate graphic design. Course topics may include issues in word and image, typography, or image and production techniques. May be repeated to a maximum of twelve semester hours.

ART 4926Cr. Media Workshop: Electronic Media (3). This course covers electronic imaging, video, computer graphics, animation. May be repeated to a maximum of twelve semester hours.

Advanced Workshops

Note: The advanced workshops continue the intensive level of study of the media workshops while providing students with more flexibility. Under this workshop system, a student may work with any instructor, regardless of media affiliation, in any area of study. Instructors are designated by section number. Each course may be repeated to a maximum of twenty-seven semester hours.

Prerequisites for all advanced workshops include the following foundation courses: ART 1000, ART 1201C, ART 1203, ART 1300C, ART 1602C, and ART 2003C or ART 2204C. Students should have completed one or more areas-specific intermediate level class prior to taking advanced workshops in that area.

ART 4928Cr. Advanced Workshop (3). Prerequisites: All foundations courses. This tutorial course is available only to BFA and BA students. May be repeated to a maximum of twenty-seven semester hours.

ART 4928Cr. Advanced Workshop: Animation (3).

ART 4928Cr. Advanced Workshop: BFA All Media (3).

ART 4928Cr. Advanced Workshop: Ceramics (3).

ART 4928Cr. Advanced Workshop: Painting (3).

ART 4928Cr. Advanced Workshop: Photography (3).

ART 4928Cr. Advanced Workshop: Printmaking (3).

ART 4928Cr. Advanced Workshop: Print Design (3).

ART 4928Cr. Advanced Workshop: Sculpture (3).

ART 4928Cr. Advanced Workshop: Web Design (3).

ART 4929Cr. Advanced Workshop (3). Prerequisites: All foundations courses. This tutorial course is available only to BFA and BA students. May be repeated to a maximum of twenty-seven semester hours.

ART 4929Cr. Advanced Workshop: 3-D Animation (3).

ART 4929Cr. Advanced Workshop: Animation (3).

ART 4929Cr. Advanced Workshop: Ceramics (3).

ART 4929Cr. Advanced Workshop: Digital Cinema (3).

ART 4929Cr. Advanced Workshop: Painting (3).

ART 4929Cr. Advanced Workshop: Photography (3).

ART 4929Cr. Advanced Workshop: Printmaking (3).

ART 4929Cr. Advanced Workshop: Print Design (3).

ART 4929Cr. Advanced Workshop: Sculpture (3).

ART 4929Cr. Advanced Workshop: Web Design (3).

ART 4930Cr. Advanced Workshop (3). This course explores critical issues in contemporary art. Course varies each semester to cover topics of critical significance in twentieth-century contemporary art. May be repeated for a maximum of twenty-seven semester hours.

ART 4931r. Instruction in Advanced Technical Problems (3-6). May be repeated to a maximum of six semester hours.

Art Related Courses

Note: Some University courses are designated art related and may be accepted toward the BFA degree with written approval from the director of the BFA program and the chair of the department. Students who wish to take art related courses that significantly contribute to their media focus should contact the department regarding requirements. Requirements are currently being reviewed.

Graduate Courses

ARE 5387. Teaching College Art (3).

ART 5898. Art, Technology, and Critical Theory (3).

Graduate Workshops

Department of ART EDUCATION

COLLEGE OF FINE ARTS

Web Page: http://arted.fsu.edu/

Chair: David E. Gussak; Professors: Anderson, Gussak, McRorie, Rosal, Villeneuve; Assistant Professors: Broome, Cuyler, Love, Scott Shield, Van Lith

Note: The undergraduate Art Education degree is no longer offered. The department offers a five-year BA in Art/MS in Art Education combined degree program to prepare students for a career as an art teacher. This program enables undergraduate students who receive a bachelor’s degree, with one additional year of coursework from the department of art education, to fulfill teacher certification requirements. Please contact the Department of Art Education for the requirements for this program and refer to the Department of Art Education chapter in the Graduate Bulletin.

The primary mission of the five-year combined program is to prepare certified art teachers for public and private school service. Students have the opportunity to participate in the University’s Florence, London, or other international programs as part of their course of studies prior to their junior year. Extensive in-school observation and participation are required.

The Department of Art Education’s paradigm program is art for life. The department focuses on authentic, socially centralized teacher preparation, emphasizing studio art, critical inquiry into art and visual culture, appropriate technologies, and creative activity. Our goal is to prepare candidates who are well prepared for their roles as art educators in real-world communities.

Arts and Community Practice Specialist Studies Program

The specialist studies program in the arts and community practice is designed for undergraduate and graduate students who wish to develop a focused concentration on the application of the arts to community development. This is inclusive of groups and families and addresses all stages of human development. Particular attention will be given to prevention, enrichment, and response to social concerns.

Program requirements are based on the integration of the theoretical and practical aspects of dance, art education/therapy, and community-based generalist/clinical/social work. Requirements include coursework in art education/therapy, dance, and social work totaling at least twelve semester hours with at least three semester hours taken from each program in certificate-approved courses (see department). Students must earn a “B” average in all courses taken for the certificate. An additional requirement is the completion of a major paper or project linking theory and practice. The program of study must be approved by the department.

Students must have a minimum 3.0 GPA to be accepted into the certificate program.

Definition of Prefix

ARE—Art Education

Undergraduate Courses

ARE 3313C. Art in the Elementary Schools (3). This course is a study of significant literature and research in the field; laboratory investigation of materials, ideas, and methods currently used in elementary schools. On-site clinical experiences required.

ARE 4042. Theory and Practice I (3). Prerequisite: Admission to the Art Education Teacher Certification program. Corequisite: ARE 4144. This course includes the theoretical, historical, philosophical, and sociological underpinnings for the development of curriculum for and the practice of art education in both primary and secondary schools. Observation in the public schools is required.

ARE 4043. Theory and Practice II (3). Prerequisites: ARE 4042 and ARE 4144. Corequisite: ARE 4550C. This course develops an understanding of the concepts needed for teaching studio, art history, art criticism, and aesthetics, and develops the skills for creating curriculum in these areas for both elementary and secondary schools. Observation in the public schools is required.

ARE 4144. Human Development and Learning in Art (3). Prerequisite: Admission to the Art Education Teacher Certification program. Corequisite: ARE 4042. This course provides a theoretical foundation for understanding what children know and learn through artistic inquiry and expression. The course emphasizes practical application of this knowledge to curriculum development and lesson planning. Observation in the public schools is required.

ARE 4294. Art Museum Education (3). Prerequisite: ARE 4930. This course builds on the base established in the prerequisite course ARE 4930, Museum Education. This course addresses education in the art museum context.

Graduate Courses

ARE 4455. Computer Graphics in Art Education (3). Prerequisite: Admission into the Art Education Teacher Certification program. This course is an introduction to computer functions for preservice art teachers. The primary emphases are on the development of visual technological literacy through practice and adaptation of computer processes, including the use of graphic software and Web site design for teaching and learning in art.

ARE 4550C. Art Therapy/Special Populations (3). This course explores definitions of art therapy, the development of the discipline, the exploration of special populations, human relations, and the related concepts in art education and art therapy.

ARE 4905r. Directed Individual Study (1–3). May be repeated to a maximum of nine semester hours.

ARE 4930r. Introduction to Arts Administration (3). This seminar style course introduces students to arts administration by exploring basic administration and management principles as they relate to the visual and performing arts. The course also features off-campus site visits to local arts and culture organizations and applied hands-on interaction. May be repeated to a maximum of six semester hours.

ARE 4931. Computer Graphic Design in Education and Art (3). This course is an introduction to computer functions. Emphasis is on visual literacy through practice and adaptation of computer processes to educational and art purposes.

ARE 4940. Student Teaching in Art (9). (S/U grade only) This course facilitates clinical experience teaching art in a public school assignment.

ARE 4950. Portfolio in Art Education (3). Prerequisites: ARE 4042, ARE 4043, ARE 4550C. Corequisite: ARE 4940. This course, taken in conjunction with student teaching, documents student progress in mastering the 12 Accomplished Practices by preparing professional portfolios for both the elementary and secondary art teaching levels.

Graduate Courses

ARE 5046. Art Education Theory and Practice I (3).

ARE 5047. Art Education Theory and Practice II (6).

ARE 5145. Human Development and Learning in Art (3).

Department of ART HISTORY

COLLEGE OF FINE ARTS

Web Page: http://arthistory.fsu.edu/

Chair: Adam Jolles; Professors: Freiberg, Neuman, Weingarden; Associate Professors: Bearor, Carrasco, Jolles, Jones, Leitch; Assistant Professors: Bauer, Neill; Instructional Support Specialist III: Hudson; Professors Emeriti: Draper, Gerson, Nasgaard; Courtesy Professors: Brillant, de Grummond, Lee, McLendon, Palladino-Craig, Pfaff, Pohl, Pullen

The Department of Art History offers programs leading to the Bachelor of Arts (BA), Master of Arts (MA), and the Doctor of Philosophy (PhD) in the history and criticism of art. The faculty includes specialists in Islamic art, Pre-Columbian art, Spanish Colonial and Caribbean art, Early Medieval and Byzantine art, Romanesque and Gothic art, Italian and Northern European Renaissance art and architecture, Baroque and 18th-century art and architecture, modern architecture, 19th- and 20th-century art and criticism, American art, contemporary art and critical theory, history of photography, word-image studies, and museum studies. Members of the classics faculty trained in archaeology and art history offer courses in Aegean, Greek, Etruscan, Roman, and Egyptian art.

The Department of Art History is supported by a rich array of resources, including classrooms, seminar rooms and a teaching lab fully equipped for multimedia presentations and a media center under the direction of a full-time curator. The media center houses a comprehensive collection of digital resources, including a database of more than 45,000 images. Additionally, the School of Art and Design Library includes over 6,500 art-related books. The University library holdings are extensive and include a rare book and facsimile collection. The library supports many electronic resources and an excellent interlibrary loan division. The resources of the Ringling Museum Library are also available.

The University Museum of Fine Arts houses several permanent collections and is used for temporary exhibitions. The University administers the Ringling Museum in Sarasota, with its internationally known collection of European and Asian art. Internships are available at each of the Florida State University’s museums.

The Florida State University Study Centers in Florence, London, and Valencia offer a range of art history courses and opportunities for the study of art, and the Department of Art History maintains a Summer program in Paris, France. Students may also take advantage of art history coursework and other opportunities at the Florida State University Panama Canal campus. Additionally, art history students use the international programs to study language and to pursue museum studies. Museum internships are available through the programs in Florence and London. Students may gain archaeological experience at the Florida State University excavation at the Etruscan site of Cetamura in Chianti and at the site in Poggio delle Civitelle at San Venanzo.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. In art history, undergraduate majors must satisfy this requirement by earning a grade of “C” or higher in ARH 2814.

Oral Communication Competency

All undergraduates at Florida State University must demonstrate the ability to transmit clearly ideas and information orally in a way that is appropriate to the topic, purpose, and audience. Undergraduates must also demonstrate the ability to discuss ideas clearly with others, to listen and respond to questions, and to assess critical responses appropriately. The need for specific oral communication skills, such as formal lectures/presentations, interviewing skills, or group dynamics varies from discipline to discipline. In art history, undergraduate majors must satisfy this requirement by earning a grade of “C” or higher in SPC 2067, Communication for Arts and Design, offered through the Department of Art History.

State of Florida Common Program Prerequisites

The State of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ART X201 (Design I, basic design) or ART X202 (Design II, 3D, methods and concepts) or ART X203 (Design II, 3D, concepts and practices) or ART X205 (Color, color and composition, color design, color theory)
2. ART X300 (Drawing I, drawing foundations) or ART X301 (Drawing II) or ART X310 (Intermediate drawing)
3. ARH X050
4. ARH X051
5. XXX XXXX: coursework in a single foreign language for nine to twelve credit hours to satisfy the foreign language competency requirement

Note: All courses except the foreign language coursework require a “C” or higher.

Major in Art History

The Bachelor of Arts (BA) program in the history and criticism of art requires a total of forty-eight semester hours of which thirty-nine will be in art history and nine in studio art. The foundation courses (ARH 2050, ARH 2051, and ARH 3XXX World Arts Survey) provide a broad view of major artists and movements from Western and World Art History and are to be taken as early as possible. Majors are required to take an additional eight upper-level courses, two of which must be in World Arts. One of the nine courses must be a seminar in art history (ARH 4800), prior to which eighteen credit hours in art history must be completed. Only a grade of “C” or better is acceptable for courses in Art History to be credited toward the major. Students must also satisfy the University language requirement for the BA degree. Art History majors satisfy the University Oral Competency and Computer Skills Competency with SPC 2067 and ARH 2814, respectively.

Honors in the Major

The Department of Art History offers honors in the major to those who wish to pursue an extended independent research project. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Minor in Art History

A minor in art history requires fifteen semester hours of coursework in the department. The student may choose any five art history courses in completing this requirement.

Minor in Medieval Studies

The undergraduate minor in medieval studies provides students focused, interdisciplinary training in the culture of the pre-modern era in the lands of Europe, both West and East, as well as the cultures of the Middle East. The minor will consist of fifteen semester hours beyond the liberal studies and major requirements. The selection of a pair of courses in one of the following fields of concentration provides a focus for the minor: medieval art history (two ARH courses from an approved list); medieval history (two EUH courses from an approved list); and medieval texts and cultures (one ENL and one modern languages course from an approved list). Having established a concentration in one medieval field, the student then chooses three more courses from an approved list. These courses are to be distributed over two or three departments other than that of his/her concentration. Additional courses are certified on a semester-by-semester basis. Qualified students also may enroll in certified graduate-level courses for minor credit, with permission of the instructor.

Minor in Museum Studies

A minor in museum studies requires fifteen semester hours. Of these, six semester hours are in museum studies courses, three hours are in a related elective, and the remaining six hours are taken in supervised internship. Students with a minor in museum studies may not apply any internship hours toward the major in Art History.

Definition of Prefix

ARH—Art History
IFS—Interdisciplinary Florida State
Undergraduate Courses

ARH 2000. Art, Architecture, and Artistic Vision (3). This course focuses on a thematic approach to the understanding and appreciation of works of art.

ARH 2050. History and Criticism of Art I (3). This course is an introductory survey from prehistoric through ancient Greece and Rome.

ARH 2051. History and Criticism of Art II (3). This course is an introductory survey from early Renaissance through modern art history including developments in American art.

ARH 2581. Survey of “Tribal Arts” Past and Present (3). This course studies the non-Western arts as tools for interacting with other people, or with environmental or universal forces.

ARH 2630C. Survey in African-American Art and Aesthetics (3). This course surveys special topics in African-American art and aesthetics. Students explore power dynamics, social protest, artistic activism, imagination, criticism, perception, content, and motivation as historical and contemporary influences on and in African-American art.

ARH 2814. Information Technology for the Art Historian (3). Prerequisite: Admission to the Art History major. This course introduces students to computer-based research, writing, and presentation tools essential in art history.

ARH 3130. Survey of Greek Art and Archaeology (3). This course reviews the major accomplishments in Greek art from early times through the Hellenistic period through a survey of principal monuments, works, and archaeological evidence.

ARH 3150. Art and Archaeology of Ancient Italy (3). This course is a survey of Italian art and archaeology including early Italy, the Etruscans, and Rome with reference to the major monuments, works, and archaeological evidence.

ARH 3405. Contemporary Art in Public Spaces (3). Prerequisites: ART 1000, ART 1200, ART 1300, ART 1500, ART 2100, ART 2200. This undergraduate survey course addresses key conceptual issues regarding the functions and siting of contemporary public art, providing students with a working knowledge of the relevant critical literature. Students also learn the basic components of writing a public art project proposal.

ARH 3515. History of African Art (3). This course surveys the history of African art, covering numerous regions of the vast continent. Students examine artistic expressions and visual traditions in the Sahara; along the Nile, Congo, and Niger rivers; in the Central and Western Sudan; the Atlantic Forests; the Cameroon grasslands; and eastern and southern Central Africa. The course covers a range of visual and material expressions, including painting, sculpture, architecture, costuming, ritual implements, cultural landscapes, and ephemera.

ARH 3530. The Arts of Asia (3). This course is a general introduction to the visual arts of Asia, covering primarily India, central Asia, China, and Japan. The course is organized along thematic lines, with topics such as the ancient world, Buddhism, Chinese aesthetic theory and painting, and native and foreign currents in Japanese art.

ARH 3612. Visual Cultures of the Americas (3). This course in an introductory survey of the visual and material culture of the Americas from the archeaic period to the present.

ARH 3794. Museum Basics: History and Theory (3). This course introduces students to the history and theory of museums and museum practices, museum administration, exhibition planning, museum education, and museum careers.

ARH 3854. The Museum Object (3). Prerequisite: ARH 3794. The course covers the philosophy and practice of acquiring, processing, preserving, displaying, and interpreting museum objects. Material culture and the museum objects are addressed from the perspective of various disciplines, such as art history, anthropology, archaeology, history, and the natural sciences. Hands-on experience is gained in designing and executing an exhibition of the students’ conception.

ARH 3930r. Special Topics (1–3). May be repeated to a maximum of six semester hours.

ARH 4067. History of Modern Architecture (3). This course traces the major shifts in architectural thinking and design from the 19th to 21st centuries. While focused on European and American debates and movements, the course makes links to the architectural implications of Western territorial ambitions in the colonies such as the Indian subcontinent, the Muslim heartland, and North Africa.

ARH 4110. Art and Archaeology of the Bronze Age in the Aegean (3). This course studies the major archaeological evidence related to the Bronze Age in Crete and Greece; the major sites, monuments, and artistic works.

ARH 4118. Archaeology of Ancient Egypt (3). This course surveys the archaeology and art of ancient Egypt from the Predynastic to the Ptolemaic and Roman periods. An emphasis is placed on the art, architecture, and culture of the Old and New Kingdoms.

ARH 4120. Etruscan Art and Archaeology (3). This course is a study of Etruscan culture, art, and archaeology.

ARH 4131. Greek Art and Archaeology of the Fifth and Fourth Centuries B.C. (3). This course surveys the accomplishments of classical Greek art through an examination of the monuments, works, and archaeological evidence.

ARH 4151. Art and Archaeology of the Early Roman Empire (3). This course examines Roman art and archaeology from Augustus through the Antonines with a survey of the major artistic accomplishments and the archaeological remains.

ARH 4154. Archaeology of the Late Roman Empire (3). This course comprises a study of Roman art and archaeology from the second to sixth century CE with emphasis on important sites and monuments.

ARH 4173r. Studies in Classical Archaeology and Art (3–9). This course studies specific aspects of the archaeological and art of Greece and Italy. May be repeated to a maximum of nine semester hours.

ARH 4210. Early Christian and Byzantine Art (3). This course explores Byzantine art and architecture from the rise of Christianity in the second and third centuries to the end of the sixth century. Emphasis is placed on how imperial rulers used art to further their political and religious agendas.

ARH 4211. Early Medieval Art (3). Prerequisite: ARH 3056 or instructor permission. This course explores the development of the uses of art in the European Middle Ages, from Barbarian metal work to the acceptance of the classical tradition, to the first mature Christian art. Principal European art forms and sources and their development through the Carolingian period will be studied. Special interest include pilgrimage, imperial imagery, manuscripts, and monuments.

ARH 4212. Late Antique and Early Christian Art (3). This course focuses on the art and architecture produced in Late Antiquity, a time of transition from the Roman and Medieval periods. Emphasis is on the processes of transmission, adoption, and adaptation in the establishment of a geographic and cultural form of Christian art.

ARH 4230. Later Medieval Art (3). Prerequisite: ARH 3056 or instructor permission. This course covers what is generally called Gothic art, including the cathedrals and their sculpture built by bishops and towns, as well as the castles, sumptuous arts, and culture of the nobility. The course is concerned with the continuing relationship of the Church and secular powers. The course of special interest include the Black Death, devotional art, civic expression, and the arts of the courts.

ARH 4304. History of Renaissance Architecture (3). Prerequisite: ARH 3057 or instructor permission. This course is a survey of 15th- and 16th-century architecture in Italy with emphasis on works by Brunelleschi, Alberti, Bramante, Michelangelo, and Palladio. Discussion centers on how the major architectural types developed and why, including: churches, city palaces, public piazzas, and country villas. Particular attention is paid to the impact of antiquity and the emergence of urban planning.

ARH 4310. Early Italian Renaissance Art: 15th Century (3). Prerequisite: ARH 3057 or instructor permission. This course examines how social and historical issues influenced the rise of the great artists during the Renaissance in Florence, Rome, Milan, Bologna, and Venice. Discussion centers on how the requirements of the patron, the vitality of local traditions, and the interaction among the arts all contributed to the creation of the new Renaissance vocabulary.

ARH 4312. Later Italian Renaissance Art: 16th Century (3). Prerequisite: ARH 3057 or instructor permission. This course examines works by the great masters of the Renaissance, including Leonardo da Vinci, Michelangelo, and Titian, against the backdrop of the social and political realities of the day. Discussion includes the rise of the artist-hero, the sources and meaning of Manerism, and the impact of the religious controversies of the age.

ARH 4331. Northern European Renaissance Art (3). Prerequisite: ARH 3057 or instructor permission. This course focuses on developments in northern European 15th- and 16th-century art with emphasis on painting and printmaking: Flemish, French, German, and Dutch artists.

ARH 4352. Southern Baroque Art (3). Prerequisite: ARH 3057 or instructor permission. This course examines Southern Baroque art. Particular attention will be paid to the major paintings and sculpture in Italy and Spain during the 17th century, stressing the theatrical, ecstatic, and virtuosoc character of works produced for royalty, the Church, and the rising middle class by such masters as Caravaggio, Bemini, and Velazquez.

ARH 4353. Northern Baroque Art (3). Prerequisite: ARH 3057 or instructor permission. This course examines Northern Baroque art and how social and historical issues influenced the rise of the great masters of the Renaissance, including: churches, city palaces, public piazzas, and country villas. Particular attention is paid to the impact of antiquity and the emergence of urban planning.

ARH 4372. Spanish Colonial Art: The Hapsburg Period, 1492/1506-1700 (3). Prerequisite: ARH 3057 or instructor permission. This course surveys the art, architecture, and visual culture of Spain’s overseas colonies during the period of early exploration and Austrian Hapsburg rule in Spain (1506-1700). It examines a wide array of visual expressions, including painting, sculpture, architecture, urban space, prints, ephemera, ceramics, furniture, and clothing. In the course of this survey, the relationship between art and such issues as colonialism, race, gender, and social hierarchy are considered.

ARH 4413. Spanish Colonial Art: The Bourbon Period, 1700-1821/1898 (3). Prerequisite: ARH 3057 or instructor permission. This course surveys the art, architecture, and visual culture of Spain’s overseas colonies during the period of Bourbon imperial rule in Spain (1700-1821/1898). It examines the major painting schools of the period, sculpture, architecture, urban space, prints, ephemera, ceramics, furniture, and clothing. In the course of this survey, the relationship between art and such issues as colonialism, race, gender, and social hierarchy are considered.

ARH 4414. Modern European Art: Neoclassicism through Impressionism (3). Prerequisite: ARH 3057 or instructor permission. This course surveys the art, architecture, and visual culture of Europe during the period that witnessed the development of the neoclassical and romantic styles, and in the development of modern art from 1780-1880, concentrating on the evolving dialogue between academic and anti-academic practices through an examination of the relationship between theory, criticism, and techniques of representation. Topics of inquiry include: David and Neo-classicism; British landed painting: Delacroix and Romanticism; Courbet’s Realism and Manet’s Naturalism; and French Impressionism.

ARH 4416. Paris Avant-Garde (3). Prerequisite: ARH 3057. This course examines the art of the avant-garde in France from 1800 through the middle of the twentieth century. The course focuses on select themes related to the urban culture and intellectual currents that shaped contemporary art and its public reception in the modern era. All classes are taught in museums and at historical sites.
ARH 4450. Modern European Art: Post-Impressionism through Surrealism (3).
Prerequisite: ARH 3057 or instructor permission. This course covers the development of art from 1880 to 1940. Topics of discussion include abstraction, Symbolism, Surrealism, as well as the relationship between the techniques and forms of abstract representation and contemporary philosophical, social, scientific, and political events. The writing of artists and critics provides the basis for this inquiry.

ARH 4540. Arts of India (3). This course introduces an introduction to the visual culture of South and Southeast Asia with an emphasis on the Indian Subcontinent. The course examines the role that artistic production has played in the transmission of religious beliefs and the development of cultural systems from the Indus Valley to the present day. Students are encouraged to explore the forms and functions of art in a variety of media, including but not limited to architecture, urban form, sculpture, painting, and performance.

ARH 4551. Arts of China (3). This course introduces the visual arts of China, covering the Neolithic to the modern period. The framework for the course is both chronological and thematic, with special emphasis on how the Chinese have viewed themselves and the world in which they have lived and represented themselves. Topics include ancient China, the introduction of Buddhism, aesthetic theory and painting, and masters of landscape.

ARH 4571. Islamic Art and Architecture, 7th - 21st Centuries (3). This course surveys the art and architecture of the Islamic world from its early days in the mid-seventh century to the present day. While the concept “Islamic world” is both vague and vast, stretching from Spain to Indonesia and beyond, the course focuses on several geographic areas to explore the visual culture produced by Muslims.

ARH 4583. The Arts of Oceania, Africa and Native America (3). This course discusses, analyzes and examines the arts of people from Oceania, Africa, and Native America. It provides students with a valid framework for understanding the complexities involved with these art forms from inside and outside specific social and cultural contexts.

ARH 4620. U.S. Art: Centennial through Late Modernism (3). Prerequisites: ARH 3057 or instructor permission. This course surveys painting, sculpture, architecture, photography, and multimedia culture from 1876 to the 1950s, reflecting regional and multicultural responses to questions of subjectivity and modernity such as “What is ‘American’ about our country and its art?” The course also explores how developing a national identity in this culture was a central concern during this period.

ARH 4621. U.S. Art: Colonial Era to the Centennial (3). Prerequisites: ARH 3057 or instructor permission. This course examines the art and architecture of Mesoamerica from the rise of the Olmec (1500 BC) to the Spanish conquest of the Aztec capital of Tenochtitlan. Focus is placed on how changes in art and architecture reflect major events such as the Spanish conquest.

ARH 4675. The Art and Culture of the Maya (3). This course examines the art and culture of the Maya from approximately 350 BC to the present, focusing primarily on the Classic period (AD 250-900). The course highlights the role of art in Maya religion, politics, and ritual, addressing both the Maya conception of time and their hieroglyphic script. The course also examines the role of art in the development of a distinct Maya identity and the role of art in the transmission of religious beliefs.

ARH 4717. History of Photography (3). This course surveys the history of photography from its invention in the 1830s up to the present. It addresses the historical development of the medium, its uses, and its impact on society. Topics include the development of photography and its role in society, the relationship between photography and art, and the impact of photography on contemporary art.

ARH 4810. Art History Methods and Media (3). Prerequisites: ARH 3506, ARH 3507, twelve prior credit hours in upper-level art history, and instructor permission. This seminar is designed for undergraduate and graduate art-history majors who plan to continue at the graduate level. The seminar introduces art media and research methods.

ARH 4815r. Honors Work in Art History (1–6). This course requires a written thesis. May be repeated to a maximum of nine semester hours, subject to approval of faculty advisor.

ARH 4846. Museums of Paris (3). Prerequisite: ARH 3507. This course introduces students to the history of museums and to debates on the philosophical nature of museums. The course surveys the history of the Louvre from antiquity to the present, from the perspectives of its museums and monuments.

ARH 4876. Global Women’s Art (3). This course covers global women’s art in the 20th and 21st centuries, with investigations into women’s painting, sculpture, installation, performance, photography, film, and multimedia, often challenging conventional perceptions of visual art and expanding possibilities for themselves and their communities. The course also includes coverage of immigrant and exiled women’s contributions to the arts in the United States.

ARH 4882. Visual Cultures of the African Diaspora (3). Prerequisite: ARH 3507 or instructor permission. This course engages the visual cultures of the African Diaspora with geographic attention to the contemporary nations of Cuba, Haiti, Brazil, Puerto Rico, the Bahamas, and Jamaica. After background on the visual cultures of West Africa, particularly those of Yoruba origin, we discuss the transformative impact of Atlantic World slavery and colonial institutions on African traditions. We consider the material and visual landscapes of new African ethnic formations in the Americas in relation to slavery, religious institutions, such as confraternities, ritual life, and the formation of symbolic economies. We then investigate how various traditions and their attendant visual cultures were remade in the post-slavery era.

ARH 4884. Walt Disney and the American Century (3). This course considers Disney and his company in relation to art, society, and politics during the twentieth century. Special attention is paid to Disney’s contributions in the realms of film, architecture, and theme park. Through assigned readings and visual material such as cartoons, slides, and documentaries, the course assesses the relationship between high art and popular art and evaluates Disney’s influence on creation and consumption of leisure.

ARH 4905r. Directed Individual Study (3).

ARH 4933r. Special Topics in Art History (3). This course is an undergraduate, upper-level lecture course in art history with changing topics. May be repeated to a maximum of twelve semester hours.

ARH 4941r. Internship in Museum Studies (3–12). This course is an internship in a collaborative museum to provide students with firsthand knowledge of, and practical experience in, museums. May be repeated to a maximum of twelve semester hours, only three of which may be applied toward the major in art history. May be repeated within the same semester.

IFS 2066. Museums: Three Promises for Humanity (3). This course provides an in-depth view of museums and their commitment to learning, equality and social advancement. The seminar traces the development of museums from early traditions through the paradigm shift of the past two decades that has produced uniquely humanistic and socially responsible institutions. Through investigations of museum environments and interaction with museum professionals, the class examines how museums can build a healthy, safe and meaningful future for diverse regional and global communities.

SPC 2067. Communication for Arts and Design (3). This course provides majors in the College of Fine Arts with a course designed to fulfill the university’s oral communication requirement using examples drawn from a diverse range of artistic contexts.

Graduate Courses

ARH 5068. History of Modern Architecture (3).

ARH 5076. Word and Image Studies (3).

ARH 5111. Art and Archaeology of the Bronze Age in the Aegean (3).

ARH 5119. Archaeology of Ancient Egypt (3).

ARH 5125. Etruscan Art and Archaeology (3).

ARH 5140. Greek Art and Archaeology of the Fifth and Fourth Centuries B.C. (3).

ARH 5160. Art and Archaeology of the Early Roman Empire (3).

ARH 5174r. Studies in Classical Art and Archaeology (3).

ARH 5220. Early Christian and Byzantine Art (3).

ARH 5221. Early Medieval Art (3).

ARH 5222. Medieval Illustrated Manuscripts (3).

ARH 5223. Late Antique and Early Christian Art (3).

ARH 5240. Later Medieval Art (3).

ARH 5241. Early Italian Renaissance Art: 15th Century (3).

ARH 5242. Later Italian Renaissance Art: 16th Century (3).

ARH 5340. Northern European Renaissance Art (3).

ARH 5360. Southern Baroque Art (3).

ARH 5361. Northern Baroque Art (3).

ARH 5363. 18th-Century Art (3).

ARH 5420. Modern European Art: Neoclassicism through Impressionism (3).

ARH 5445. Modern European Art: Post-Impressionism through Surrealism (3).

ARH 5556. Arts of Japan (3).

ARH 5558. Arts of China (3).

ARH 5575. Islamic Art and Architecture, 7th - 21st Centuries (3).

ARH 5605. Native American Arts and Architecture of the Southwest (3).
ARH 5625. American Art before 1940 (3).
ARH 5648. Art after 1940 (3).
ARH 5659. Great Traditions in Mesoamerican Art and Culture (3).
ARH 5715. History of Photography (3).
ARH 5725. History of Graphics (3).
ARH 5797. Seminar in Museum Studies (3).
ARH 5799. Cultural Heritage Theory and Practice (3).
ARH 5806r. Seminar in the History and Criticism of Art (3).
ARH 5813. Seminar in the Methods of Art History (3).
ARH 5838. The Museum Object (3).
ARH 5864. Methods and Theory for the Study of World Arts (3).
ARH 5885. Introduction to Appraising Personal Property (4).
ARH 5886. Uniform Standards of Professional Appraisal Practice (USPAP) (4).
ARH 5887. Walt Disney and the American Century (3).

ARH 5907r. Directed Individual Study (1–5).
ARH 5913r. Supervised Research (1–15). (S/U grade only.)
ARH 5940r. Supervised Teaching (1–15). (S/U grade only.)
ARH 5942r. Internship in Museum Studies (1–6).
ARH 6292r. Topics in Medieval Art: Seminar (3).
ARH 6394r. Topics in Renaissance Art: Seminar (3).
ARH 6398r. Topics in Baroque Art: Seminar (3).
ARH 6592r. Topics in Eastern Art: Seminar (3).
ARH 6694r. Topics in 19th-Century Art: Seminar (3).
ARH 6695r. Topics in 20th-Century Art: Seminar (3).
ARH 6718. Documentary Photography and Film (3).
ARH 6904r. Readings for Examinations (1–12). (S/U grade only.)
ARH 6920r. Teaching Colloquium in Art History (1–12). (S/U grade only.)
ARH 6936. Topics in World Arts: Seminar (3).
ARH 6937r. Doctoral Seminar in Classical Archaeology (3).

Program in
ASIAN STUDIES

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY

Web Page: http://www.coss.fsu.edu/asian/

Director: Lee Metcalf (Social Sciences); Director of Undergraduate Studies: Whitney Bendeck (History); Director of International Economic Education: Oursung Norrbin (Economics); Director of Internships and Professional Development: Na’ama Nagar (Political Science)

The Program in Asian Studies is an international area-studies program that is designed to develop a student’s competence in the language, history, culture, and the contemporary political and economic setting of a particular country or cultural region. This area-studies program is focused on Asia, broadly defined as including East Asia, South Asia, and the Middle East. A major or minor in this program serves the needs of: (1) general liberal arts students who wish to learn more about these important areas of the world; (2) students who wish to pursue graduate work in these or related fields; and (3) students who seek employment in or related to Asia. The program also combines area- or country-specific courses that give students the needed cultural immersion with more general comparative courses that provide them with the necessary intellectual tools, concepts, and theories to make sense out of their particular disciplinary concentrations. Students are to select language and thematic specializations in line with their intellectual interests and career goals and design their program of studies accordingly.

In addition to the regular major in Asian studies, the program also offers a second option designed for students who want to combine linguistic, cultural, and other relevant knowledge of Asia with business skills. Students electing this option will take a significant proportion of their coursework in the College of Business. This option is intended to prepare students for a career that capitalizes on their knowledge of Asia.

The undergraduate program in Asian studies is administered through the College of Social Sciences and Public Policy. As an interdisciplinary program, no minor is required, except in the case of the Asian studies/business option, in which the business coursework constitutes a minor. Students interested in either of these degree program options should consult with the Director of Asian Studies.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Asian studies satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

Requirements

Asian Studies Major

Students majoring in the program are to construct their study program around three components: (1) a language requirement, (2) an area-specific coursework requirement, and (3) a concepts and theories tool requirement. The total hour requirements for the major are a minimum of twelve semester hours in an approved area language plus an additional thirty-six semester hours beyond the liberal studies requirements with a grade of “C–“ or better in each of the Asian studies courses. As this is an interdisciplinary program, no minor is required.

In addition to a 2.0 overall GPA, all students must meet “mapping” requirements. See http://www.academic-guide.fsu.edu for more information.

Language Requirement

All students are required to take twelve semester hours of coursework in a relevant area language (Chinese, Japanese, Arabic, or some other Asian language), or demonstrate proficiency at the intermediate college level. Students will be encouraged to bring their chosen language up to an effective level of proficiency in both reading and speaking by either taking additional coursework on the campus of Florida State University or by participating in a semester- or Summer-abroad program in their relevant cultural area as such programs become available. These programs should be administered by, affiliated with, or approved by Florida State University. To encourage the achievement of language proficiency, language coursework hours taken beyond the twelve semester hour minimum or demonstrated intermediate college-level proficiency may be counted toward the required thirty-six semester hours for the major.

ARTS ADMINISTRATION, CENTER FOR
see Graduate Bulletin
Area Specific Course Requirement

Students are to select at least twenty-four semester hours of area specific coursework from the approved area-specific courses listed further down in this document. Note that special topic area-specific courses may be approved from time to time; for the most current list, students are encouraged to view the term-specific courses posted at their International Studies Blackboard Organization site.

Concept and Theory Course Requirement

Students are to select at least six semester hours of coursework from among the concept and theory courses listed further down in this document. Students should carefully select these courses in consultation with their academic advisor, to ensure that the courses meet any required prerequisites for the approved courses.

Asian Studies Major with an Emphasis in Business

This degree program combines the regular Asian Studies major with a planned series of economics and business courses. The requirements for this degree are twelve semester hours in an approved language (Chinese, Japanese, or Arabic), twenty-one semester hours in Asian studies coursework, and fifteen semester hours in multinational business courses. The Asian studies coursework is to be selected from the area specific courses. With this degree there is no concepts and theories requirement. Students are also to select between two fifteen semester hour business coursework options listed below, an international marketing/management track or an international finance track. The prerequisites for both tracks include ECO 2013 and 2023, which may be taken as part of the student’s basic studies requirements. In addition, students opting for the international finance track must complete ACG 2021 as a prerequisite. Students should seek advising from the Asian Studies program advisor in 211 Bellamy about registering for business courses.

International Marketing/Management

MAN 3240 Organizational Behavior
MAN 3600 Multinational Business Operations (Prerequisites: ECO 2013, ECO 2023)
MAR 3023 Basic Marketing Concepts (Prerequisites: ECO 2023 and one behavioral science course)

And six hours selected from:

MAN 4401 Management of Labor and Industrial Relations (Prerequisite: MAN 3240)
MAN 4605 Cross-Cultural Management (Prerequisite: MAN 3240)
MAN 4680 Selected Topics in International Management (Valencia, Spain) (Prerequisites: ECO 2013, ECO 2023, MAN 3600)
MAN 4701 Business and Society (Prerequisite: MAN 3240)
MAR 4156 Multinational Marketing (Prerequisites: MAR 3023, MAN 3600)

Or approved substitution

International Finance

FIN 3244 Financial Markets, Institutions, and International Finance Systems (Prerequisites: ACG 2021, ECO 2013)
FIN 3403 Financial Management of the Firm (Prerequisites: ACG 2021, ECO 2023)
MAN 3600 Multinational Business Operations (Prerequisites: ECO 2013, ECO 2023)

And six hours selected from:

FIN 4424 Problems in Financial Management (Prerequisites: CGS 2518, FIN 3244, FIN 3403)
FIN 4504 Investments (Prerequisites: CGS 2518, FIN 3244, FIN 3403)
FIN 4514 Security Analysis and Portfolio Management (Prerequisites: CGS 2518, FIN 4504)
FIN 4604 Multinational Financial Management (Prerequisites: CGS 2518, FIN 3244, FIN 3403)
FIN 4604 Multinational Financial Management (Prerequisites: CGS 2518, FIN 3244, FIN 3403)
GEB 4455 Perspectives on Free Enterprise (Prerequisites: FIN 3244, FIN 4193)

Or approved substitution

Study Abroad

Students majoring in Asian Studies are strongly encouraged to study abroad. See https://international.fsu.edu/ for more information on the various options available through Florida State International Programs. Students should consult with the Asian Studies Director about any other study abroad programs they wish to pursue. Coursework taken in overseas locations must be approved in advance for credit toward the major.

Internship

The Asian Studies program encourages students to take advantage of internships with an area focus. Information on possible placements can be found on the International Studies Blackboard Organization site. All application materials, which are also available on the International Studies Blackboard Organization site, must be submitted and all internships must be approved the semester before the internship takes place. See the Asian Studies program advisor in 211 Bellamy for further information.

Honors in the Major

The program in Asian Studies offers honors in the major to encourage talented juniors and seniors to undertake independent and original work as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Second Majors

Majors in Asian Studies may pursue a second major. When students pursue a second major in the College of Social Sciences and Public Policy, they may count nine semester hours of coursework toward both majors. For a second major in the College of Arts and Sciences, only six semester hours may count toward both majors.

Asian Studies Minor

Students pursuing a minor in the program must complete eighteen semester hours of Asian studies coursework beyond the liberal studies requirement. In this case, none of the broader comparative concepts and theories courses will count toward the eighteen semester hour minimum. Students may select freely from all area-specific requirements.

Approved Courses

Note: Descriptions of specific courses can be found under the individual departments in which they are taught. In addition to the courses listed below, special topics courses may be approved by the program director in any particular term. These courses appear on the term course lists and are available at the International Studies Blackboard Organization site as well as the program office in 211 Bellamy.

Area Specific Courses (twenty-four credit hours)

ASH 1044 Middle Eastern History and Civilization (3)
ASH 3100 History of Asia (3)
ASH 3200 History of the Ancient Near East (3)
ASH 3230d Middle East Survey: An Interdisciplinary and Introductory Course (3–6)
ASH 4223 Modern Middle East (3)
ASH 4261 Central Asia (3)
ASH 4520 Traditional India (3)
ASH 4550 Modern India (3)
CPO 3034 Politics of Developing Areas (3) [with CPO 2002 as a prerequisite]
CPO 3403 Comparative Government and Politics: The Middle East (3) [with CPO 2002 as a prerequisite]
CPO 3520 Emerging Democracies in Northeast Asia: Korea, Taiwan, Japan (3) [with CPO 2002 as a prerequisite]
CPO 3541 Politics of China (3) [with CPO 2002 as a prerequisite]
CPO 3553 Politics of Japan (3) [with CPO 2002 as a prerequisite]
ECS 3200 Economics of Asia (3) [with ECO 2013 and ECO 2023 as prerequisites]
ECS 4504 Economics of the Middle East (3) [with ECO 2013 and ECO 2023 as prerequisites]
INR 4274 Studies in International Politics: The Middle East (3) [with INR 2002 as a prerequisite]
ANT 4175 Archaeology of the Islamic World (3)
ANT 4363 Japanese Society and Culture (3)
ARH 3530 The Arts of Asia (3)
ARH 4540 Arts of India (3)
ARH 4551 Arts of China (3)
ARH 4554 Arts of Japan (3)
ARH 4571 Islamic Art and Architecture, 7th–21st Centuries (3)
CHI 3440 Business Chinese (3)
CHI 3501 Readings in Chinese Short Stories and Essays (3)
CHI 4503 Readings in Chinese History (3)
CHI 4930 Special Topics (3)
Concept and Theory Courses (six credit hours)

Department of BIOLOGICAL SCIENCE

COLLEGE OF ARTS AND SCIENCES

Web Page: http://www.bio.fsu.edu/

Chair: Don Levitan; Associate Chair (Graduate Studies): D. Fadool; Associate Chair (Undergraduate Studies): Bates; Associate Chair (Academic Programs): Winn; Professors: Bates, Chase, Deng, Ellington, Erickson, D. Fadool, Fajer, Gaffney, Gilbert, Houle, Houpt, Hughes, Levitan, Meredith, Miller, Stepan, Taylor, Travis; Associate Professors: Bass, J. Fadool, Iouye, L. Keller, T. Keller, Lyons, Mast, Rokyta, Tang, Trombley, Underwood, Winn, Wulff, Yu, Zhu; Assistant Professors: Burgess, Chadwick, Cui, Dennis, DuVal, Jones, Lemmon, Lenhart, M’Gonigle, McGinnis, Stroup; Professors Emeriti: Abele, Anderson, Caspar, DeBusk, deKloet, Elam, Epstein, Freeman, Heard, Herrkind, Hofer, Homann, James, Livingston, Marsical, Outlaw, Quandago, Reeves, Roeder, Roberts, Roux, Tschinkel

The Department of Biological Science offers an undergraduate major in biological science that includes programs of study in most contemporary areas of biology. Specific academic concentrations within the major include cell and molecular biology; ecology, evolution, and environmental biology; marine biology; physiology and neuroscience; invertebrate and vertebrate zoology; plant sciences; and pre-professional health sciences. The requirements for the baccalaureate degree in biological science include most prerequisite courses necessary for admission to medical, dental, optometry, veterinary, osteopathic, and other allied health professional schools.

The department also offers a major in computational biology in conjunction with the Computer Science Department. This interdisciplinary major provides a top-notch educational program for students interested in the areas of computational biology and bioinformatics. The program seeks to achieve two goals: (1) to develop an understanding of the issues associated with developing biologically meaningful computational models, and (2) to give students the broad-based education that is needed to create a set of models directed toward solving a practical biomedical problem.

In addition, students interested in marine science may complete the program in marine biology and living resource ecology.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competencies vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in biological science and in biology/FSU-Teach satisfy this requirement by earning a grade of “C–” or higher in BSC 2010L.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.f vite.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Biology, General
1. BSC X100/X100L or BSC X100C or BSC X040/X040L
2. BSC X011/X011L or BSC X011C or BSC X041/X041L
3. CHM X045/X045L or CHM X045C, or CHM X040 and CHM X041
4. CHM X046/X046L or CHM X046C
5. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C, or PHY X053/X053L and PHY X054/X054L, or PHY X048/ X048L and PHY X049/X049L
6. MAC X311 or MAC X233 or MAC X253 or MAC X281 or MAC X241
7. MAC X312 or MAC X282 or MAC X234 or STA X023 or STA X024 or STA X321

Biology, General FSU-Teach
1. BSC X100/X100L or BSC X100C or BSC X040/X040L

2. BSC X011/X011L or BSC X011C or BSC X041/X041L
3. CHM X045/X045L or CHM X045C, or CHM X040 and CHM X041
4. CHM X046/X046L or CHM X046C
5. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C, or PHY X053/X053L and PHY X054/X054L, or PHY X048/ X048L and PHY X049/X049L
6. MAC X311 or MAC X233 or MAC X253 or MAC X281 or MAC X241
7. MAC X312 or MAC X282 or MAC X234 or STA X023 or STA X024 or STA X321

Requirements for a Major in Biological Science

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

1. Prerequisites for Upper-Division Biological Science Courses:
   Registration in all 3000- and 4000-level biological science courses is allowed only after meeting the following criteria:
   a. Satisfactory completion (“C–” or better) of BSC 2010/L (Biological Science I with lab) and BSC 211/L (Biological Science II with lab)
   b. Satisfactory completion (“C–” or better) of CHM 1045/L and CHM 1046/L or CHM 1050/L and CHM 1051/L (General Chemistry I and II with labs)
   c. A minimum combined 2.0 GPA in all biology, chemistry, physics, mathematics, and statistics courses, and their prerequisites, that are applicable to the major, from any institution attended.

2. Academic Performance:
   a. All courses applicable to the major, including biological science, chemistry, physics, mathematics, and statistics must be completed with a grade of “C–” or better;
   b. Designation, continuation, and graduation as a biological science major requires a minimum combined 2.0 GPA in all courses taken for the major from any institution, including biology, chemistry, physics, mathematics, and statistics, and their prerequisites;
   c. A biological science major who applies for readmission to the college must meet the biological science degree requirements of the catalog in force on the date of readmission.

3. D/F Policy:
   a. A student who has not yet completed the prerequisite courses required for upper-division status (CHM 1045 and lab, CHM 1046 and lab, BSC 2010 and lab, BSC 2011 and lab) and earned more than one unsatisfactory grade (U, F, D–, D, D+) in courses required for the major in biological science (biological science, chemistry, physics, mathematics, and statistics) and their prerequisites at Florida State University or elsewhere, whether or not repeated, will not be permitted to graduate from Florida State University with a degree in biological science;
   b. A student who has completed the prerequisite courses required for upper-division status (CHM 1045 and lab, CHM 1046 and lab, BSC 2010 and lab, BSC 2011 and lab) and earned more than three unsatisfactory grades (U, F, D–, D, D+) in courses required for the major in biological science (biological science, chemistry, physics, mathematics, and statistics) and their prerequisites at Florida State University or elsewhere, whether or not repeated, will not be permitted to graduate from Florida State University with a degree in biological science.

4. Co-op and Transient Study:
   Florida State University biological science majors who intend to take courses for the major (biological science, chemistry, physics, mathematics, statistics) at other institutions must receive approval from the Department of Biological Science Academic Advising Office prior to enrollment. This policy applies to courses taken as part of the FAMU–FSU and TCC–FSU co-op programs, as well as courses taken elsewhere.

5. Required Courses in Biological Science:
   Thirty-eight semester hours of biological science coursework are required for the degree. At least twenty of the required semester hours must be taken in residence at Florida State University. The following shall be included in the thirty-eight semester hours:
b. PCB 3063 General Genetics (3)
c. BSC 4933r Selected Special Topics in Biological Science (1-4)
   Note: Required Topic: Eukaryotic Diversity (3)
d. BSC 3402L Experimental Biology Laboratory (3)
e. PCB 4674 Evolution (3)
f. At least one course from two of the three areas:

   **Area I: Cell and Molecular Biology**
   - MCB 4403 Prokaryotic Biology (3)
   - PCB 3134 Cell Structure and Function (3)
   - PCB 4024 Molecular Biology (3)
   - PCB 4253 Animal Development (3)

   **Area II: Physiology**
   - PCB 3743 Vertebrate Physiology (3)
   - PCB 4843 Fundamentals of Neuroscience (3)

   **Area III: Ecology and Environmental Science**
   - BSC 3052 Conservation Biology (3)
   - PCB 3043 General Ecology (3)
   - ZOO 4513 Animal Behavior (4)

   g. Additional courses for major credit at the 3000 or 4000 level to complete the thirty-eight semester hour requirement. No more than six semester hours of honors work in biological science (BSC 4970h), six semester hours of directed individual study (BSC 4900r), four semester hours of internship (BSC 4941r), one semester hour of undergraduate supervised teaching (BSC 4945), and two semester hours of senior tutorial (BSC 4931r) can be used to meet the thirty-eight hour requirement.

   h. Completion of at least five biology laboratory/field courses (the letter “C” listed after the course number indicates that the course is a lecture and a lab/field combined, and the letter “L” indicates the course is a laboratory or field course).

6. **Required Courses in Collateral Areas:**

   a. **General Chemistry:** Two semesters of general chemistry with laboratory equivalent to CHM 1045/L plus CHM 1046/L or CHM 1050/L plus CHM 1051/L

   b. **Organic Chemistry:** Two semesters of organic chemistry equivalent to CHM 2210 and 2211. Many health professions programs also require CHM 2211L (Organic Chemistry II Laboratory), BCH 4053 (General Biochemistry I), and BCH 4054 (General Biochemistry II), which do not apply to the major

   c. **Mathematics/Statistics:** Either two semesters of calculus with analytical geometry equivalent to MAC 2311, MAP 2480 and MAC 2312, or MAC 2311, MAC 2480 and STA 2171

   d. **Physics:** Two semesters of general physics with laboratories equivalent to PHY 204C8 and 204C9 (prerequisite of MAC 2311) or two semesters of college physics with laboratories equivalent to PHY 2053c and 2054C (prerequisites are MAC 1114 and MAC 1140).

7. **Exit Survey:** All seniors must complete the online exit survey in the semester in which they plan to graduate. For details, contact an advisor in the Biological Science Academic Advising Office.

8. **Minor:**

   The required collateral courses in chemistry constitute a chemistry minor and fulfill the College of Arts and Sciences requirement for a minor; however, the student may select other minors in consultation with an advisor.

**Marine Biology**

Marine biology is the study of saltwater organisms, including algae, plants, and invertebrate and vertebrate animals, with respect to a specific aspect of their biology, for example, ecology, physiology, behavior, reproduction. Students who follow this academic track generally prepare for academic, government agency, consulting or conversation-oriented careers. Some of these careers require the BS degree while others require a graduate degree (i.e., MS, PhD, or DVM). A helpful Web site for understanding career choices is: http://www.marinecareers.net.

**Requirements**

Marine Biology (BSC 3312) should be taken as a background course as early as possible following completion of the major prerequisite courses. Conservation Biology (BSC 3052) and General Ecology (PCB 3043) are recommended for all students interested in marine biology. Students who plan to pursue graduate study in marine biology are strongly encouraged to take a Directed Individual Study (BSC 4900r) or apply to the Honors in the Major in Marine Biology Program. Students should determine which elective courses to take based on educational interests and career goals. The following represents a list of recommended elective courses based on educational interests and career goals:

- **BSC 3312** Marine Biology (3)
- **BSC 3402L** Experimental Biology Laboratory (2) (Marine only)
- **BSC 4473C** Introduction to Scientific Diving (3)
- **BSC 4900r** Directed Individual Study (3) (Marine only)
- **BSC 4933r** Biology of Elasmobranch Fishes (3)
- **BSC 4933r** Field Marine Science (4)
- **MCB 4403** Prokaryotic Biology (3)
- **MCB 4403L** Prokaryotic Biology Laboratory (2)
- **ZOO 3205** Advanced Invertebrate Zoology (2)
- **ZOO 3205L** Advanced Invertebrate Zoology Laboratory (2)
- **ZOO 4343C** Biology of Lower Vertebrates (4)
- **ZOO 4454C** Biology of Fishes (4)
- **ZOO 4513** Animal Behavior (4)

**Additional Recommended Electives (Not for Biological Science major credit):**

- **OCB 4631** Estuarine and Coastal Ecology (3)
- **OCE 4008** Principles of Oceanography (3)
- **OCE 4930r** Marine Pollution (1–4)

**Honors in the Major in Marine Biology Program**

Biological Science majors who are interested in the Honors in the Major in Marine Biology Program may apply if they have completed at least sixty credit hours with at least a 3.2 cumulative GPA on all coursework and at least a 3.2 GPA in the required introductory biology courses, BSC 2010 and BSC 2011, and their labs. Students typically apply at the end of their sophomore year, choose a research topic by the end of their junior year, and complete an honors thesis by the end of their senior year. Those interested in the program should visit an academic advisor for more information or contact Dr. Janie Wuliff, the program director.

**Honors in the Major**

The Department of Biological Science offers a program in honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

**FSU-Teach Program in Science Teaching**

For those interested in teaching Biological Science, FSU-Teach is an innovative approach to teacher education that involves a collaboration between scientists, mathematicians, and education faculty at Florida State University. In this program, students develop deep science or mathematics knowledge and the skills and experience needed to be an effective science or math teacher. FSU-Teach pays for tuition for the first two courses (Step 1 and Step 2). Work study positions with scientists, mathematicians and local schools are available. Prerequisites for admission to the Biological Science/FSU-Teach major are the same as the prerequisites for the Biological Science major. The program is a double-major only curriculum requiring students to complete a primary major in Biological Science in addition to a secondary major in Science and Mathematics Teaching. The discipline area has a special track for FSU-Teach majors enabling students to complete the double major in four years. The program culminates with conferral of the baccalaureate degree with two majors and all coursework and state testing requirements for initial Florida teacher certification. Note that students seeking certification must be formally admitted to the School of Teacher Education and meet all of the requirements for pursuing a state-approved program. For information regarding the requirements for the second major in Science and Mathematics Teaching, please see the chapter in this General Bulletin for School of Teacher Education. For additional information, see our Web site: http://FSU-Teach.fsu.edu.
Graduate Study

The Department of Biological Science offers work leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees; consult the Graduate Bulletin for details.

Requirements for a Minor in Biological Science

A minimum of twelve semester hours of biological science courses approved for major credit, including BSC 2010/L and BSC 2011/L and one additional biology course that counts in the major (PCB 3063 recommended); a minimum of four semester hours of the twelve semester hours must be taken at Florida State University. Grades below “C-” will not be accepted for minor credit.

Definition of Prefixes

BCH—Biochemistry (Biophysics)
BOT—Botany
BSC—Biological Sciences
IFS—Interdisciplinary Florida State University Courses
ISC—Interdisciplinary Sciences
MCB—Microbiology
PCB—Process Biology (Cell/Molecular/Ecology/Genetics/Physiology)
PSB—Psychobiology
SCE—Science Education
ZOO—Zoology

Undergraduate Courses

Courses Not for Major or Minor Credit

BSC 1005. General Biology for Nonmajors (3). This course consists of four selected topics in contemporary biology.
BSC 1005L. General Biology Laboratory for Nonmajors (1). This course may be taken concurrently with lecture or subsequent to completion of lecture with passing grade.
BSC 1005C. General Biology for Nonmajors (4).
BSC 2085. Anatomy and Physiology I (3). This course is the first of a two-semester human anatomy/physiology sequence emphasizing the cell, stimulus-response concept, and the skeletal-muscular and first half of the nervous systems.
BSC 2085L. Anatomy and Physiology I Laboratory (1). Corequisite: BSC 2085. This lab explores microscopic and gross anatomy of the human body. Physiology of muscle contractions and nerve signaling are explored using computer simulated experiments.
BSC 2086. Anatomy and Physiology II (3). Prerequisite: BSC 2085 or instructor permission. This course is a continuation of a two-semester human anatomy/physiology sequence beginning with the second half of the nervous system, then continuing with endocrine, cardiovascular, respiratory, digestive, excretory, and reproductive systems. Also included are fluid-electrolyte balance and immunity.
BSC 2086L. Anatomy and Physiology II Laboratory (1). Corequisite: BSC 2086. This lab focuses on sensory and organ systems found in the human body. Physiology of the sensory and organ systems are explored with lab activities and computer simulated experiments.
IFS 2081. Busting Common Biology Myths (3). This course explores areas of biology popularized in the media, politics and global health policies. Students determine strengths and weaknesses of opposing arguments of controversial current biological issues using information found in the scientific literature to support or critique positions.
IFS 2082. The Ecology of Food (3). This course explores the basic ecology of agriculture and fisheries and considers how conventional and alternative food-production practices generate and solve emerging problems. The course focuses on several major current issues (e.g. genetically modified organisms, pollinator declines, organic agriculture, and fisheries), and for each students learn the science behind the issue and the social forces shaping the problem. Students also learn through discussions of scientific and popular writings, lectures, hands-on and written projects, oral presentations, local speakers and field trips.

Biotechnology: Impact of Life Sciences on Society (3). This course addresses the important impacts that new biotechnological innovations have on society. Using examples from genetically modified crops to advances in personalized medicine, students explore the scientific and ethical issues of emerging biotechnologies and compare the scientific data with societal perception and acceptance.
IFS 3044. Living Green, Theory to Action (3). This course examines environmental issues, the three “E’s” of sustainability (ecology, equity, and equality), ways to integrate sustainability into infrastructures and social structures, and practical solutions and skills for making personal and professional decisions that support living a sustainable life.
IFS 3092. Broken Clocks and Disrupted Sleep: Impacts of Technology (3). This course explores the impact of changing technology on circadian rhythms and sleep patterns and the consequences to human health. The course is suitable for all majors.

BSC 3076. Science, Technology, and Society (3). Prerequisite: Junior standing or instructor permission. This course examines interrelations among science, technology, and society. Science is considered as an enterprise in modern society that produces technological advances and new perspectives on reality. This course cannot be used as credit toward a major or a minor in a science department.

BSC 3084L. Microbiology for Health Services (3). Corequisite: MCB 2004L. This course covers microbiology for students planning careers in the health services, with emphasis on infectious disease, food microbiology, and public health.

BSC 3093L. Microbiology for the Health Services Laboratory (1). Corequisite: MCB 2004. This course covers microbiological techniques including the isolation, typing, and identification of bacteria, properties of pathogenic bacteria, and food microbiology.

BSC 2099. Human Physiology (3). This course surveys the major systems and their regulation in normal function and disease in the human body.

SCE 4939R. Seminar in Contemporary Science, Mathematics, and Science Education (1). This course includes presentations of contemporary and interesting issues in science, mathematics, or academic methods. Content varies from semester to semester. May be repeated to a maximum of four semester hours.

Courses for Major Credit

Note: All 3000- and 4000-level biological science courses have the following minimum prerequisites: BSC 2010/L, 2011/L, CHM 1045/L and 1046/L. Additional prerequisites, if any, are included in the course listing.

Botany

BSC 3015. Plant Biology (2). This course is an introduction to evolutionary relationships, natural history, ecological adaptations, and physiology of plants, fungi, autotrophic protists, and prokaryotes.
BSC 3015L. Plant Biology Laboratory (1). Corequisite: BOT 3015. This lab explores anatomy, development, and morphology and life cycles of autotrophs and fungi and other microorganisms.

BSC 3143C. Field Botany (4). This course is an introduction to plant taxonomy with emphasis on laboratory and field study. Orientation to principles of identification, classification, and rules of botanical nomenclature.

BSC 4384. Plant Molecular Biology (3). Prerequisite: BOT 3015. Pre- or corequisite: PCB 3063. This course explores molecular biology and biotechnology of plant growth and development.
BSC 4503L. Plant Physiology Laboratory (1). Prerequisite: BOT 3015.

Biological Science

BSC 2010. Biological Science I (3). This is the first part of a two-semester introductory biology course designed for those interested in pursuing a career in life sciences. The course provides the building blocks necessary for a student to gain a strong foundation in general biology. Topics covered provide an overview of biological processes and functions at the molecular, cellular and organismal level.
BSC 2010L. Biological Science I Laboratory (1). This course introduces basic chemistry, energetics, metabolism, and cellular organization; molecular genetics and information flow; animal and plant function.
BSC 2011. Biological Science II (3). Prerequisite: BSC 2010. This is the second of a two-semester introductory biology course designed for those interested in pursuing a career in life sciences. The course provides an overview of the processes underlying the animal embryonic development, inheritance genetics, evolution and ecology.
BSC 2011L. Biological Science II Lab (1). Prerequisites: BSC 2010 and BSC 2010L. Corequisite: BSC 2011. This course focuses on reproduction and development (Mendelian) genetics, population biology, ecology, and evolution.
BSC 3016. Eukaryotic Diversity (3). This course provides an overview of the diversity of eukaryotic organisms (protists, plants, fungi and animals), the evolutionary origin of this diversity, and its societal relevance. Comparisons of exemplar organisms are used to illustrate broad themes in the anatomy, physiology, behavior, life cycles, and ecologies of all eukaryotes.
BSC 3052. Conservation Biology (3). This course focuses on the history of the conservation movement, the research on populations of animals and plants that is relevant to man’s impact upon the environment, pollution in terrestrial and aquatic ecosystems, endangered species, government regulation, and sustainable development.
BSC 3312. Marine Biology (3). This course explores marine geology, chemistry of the oceans, oceanic circulation, oceanographic techniques, the marine environment and marine life.
BSC 3402L. Experimental Biology Laboratory (3). This course discusses the methodology of biological experimentation, data analysis, and reporting.
BSC 3390. Seminar in Biological Frontiers (1). (S/U grade only.) This course is a weekly seminar covering topics in biological research. Not repeatable for credit toward major requirements.
BSC 3398. Careers in the Biological Sciences (1). (S/U grade only.) This course is intended for biology sciences majors at any point in their undergraduate career, but is most beneficial to those in their first three years. Career options in biology-related fields (including health professions) and the preparation they require are presented for students planning to immediately enter the job market or to continue their academic careers upon graduation. Not repeatable for credit toward major requirements.
BSC 3394R. Experiential Learning (0). (S/U grade only.) This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.
BSC 4473C. Introduction to Scientific Diving (3). Prerequisites: Open water certified by national organization, clear diving medical exam, ability to pass swimming evaluation. This course is designed for the scientist or scientist in training who plans to use SCUBA diving as a tool for underwater research. Skills covered include dive planning, emergency management, underwater navigation, survey techniques, and instrument deployment and recovery.

BSC 4813. Systematics (3). This course explores the history of systematic theory; methods of phylogenetic analysis including distance, parsimony, and likelihood; classification of the diversity of life; the comparative method; analysis of within species variation.

BSC 4821C. Biogeography (4). This course emphasizes ecological and evolutionary biogeography, the physical processes and organismal characteristics that determine distribution and diversity of organisms, and methods used to describe distributions and test processes. Geographic data sets are analyzed in lab sessions to search for patterns and test hypotheses with the scientific method.

BSC 4900r. Directed Individual Study (1–4). Prerequisites: A combined 3.0 GPA in biology, chemistry, physics, math, and statistics courses applied to the major; permission from a biological science instructor, and Department of Biological Science Advising Office permission. This course is a supervised study of a special topic or research participation in the area of the faculty member’s research. Graduate students may not register for this course. A maximum of six semester hours may be applied to biological science major credit. May be repeated to a maximum of twenty-four semester hours.

BSC 4910. Directed Independent Study (0). (S/U grade only.) Pre- or corequisite: BSC 4900. In this course, students communicate the results of their research in writing or through an oral presentation.

BSC 4931r. Senior Tutorial in Biological Science (1). (S/U grade only.) Prerequisite: Senior standing. This course focuses on selected topics in contemporary biological science; maximum enrollment of five students in each tutorial.

BSC 4933r. Selected Topics in Biological Science (1–4). Prerequisites: Courses as specified and junior or senior standing. May be repeated to a maximum of eight semester hours.

BSC 4933Lr. Selected Topics in Biological Science Lab (1–4). Prerequisites: Courses as specified and junior or senior standing. May be repeated to a maximum of eight semester hours.

BSC 4934r. Selected Topics in Applied Biology (1–4). (S/U grade only.) May be repeated to a maximum of eight semester hours. Some sections are not for major credit.

BSC 4937. Seminar in Living Marine Resource Ecology (1). Prerequisite: Instructor permission. This seminar course in marine resource ecology is designed to introduce students to a broad array of current research priorities and interests in marine ecology. Students have the opportunity to meet with resource managers and scientists from both the biological and social fields. Lecture topics range from life history studies of marine fish to the economic consequences of marine policy.

BSC 4940. Research Internship in Marine Biology (3–9). Prerequisites: PCB 3043, junior or senior standing, 3.0 GPA in biology, a course in the area of research, and associate chair approval. This special supervised internship is available at the National Marine Fisheries Services Laboratory in Panama City, the Mote Marine Laboratory, or other approved location. Students may receive up to nine semester hours of credit, of which four semester hours would apply to the biological science major. Offered during the Summer only.

BSC 4941r. Internship in Biological Science (1–4). Prerequisites: In addition to the required introductory courses in biology and chemistry, junior or senior standing, a 3.0 or greater GPA in biology, and permission of the Associate Chair of Undergraduate Studies. This course is intended for students who are working off campus in some activity related to biological sciences and who wish this work to be reflected on their transcript. The course may be repeated, but only four credit hours may count toward the major.

BSC 4945. Undergraduate Supervised Teaching (1). Prerequisites: Senior standing and instructor permission. In this course, students serve as Laboratory Assistants in BSC 1005, or as Tutors in BSC 2010 or BSC 2011, or BSC 1005. Students also receive training in interactive techniques and use this training to lead classroom discussions and interactive exam review sessions.

BSC 4970r. Honors Work in Biological Science (1–6). Prerequisite: Admission to the department’s honors-in-the-major program. This course involves participation in a supervised research problem. May be repeated to a maximum of nine semester hours, of which six semester hours may count toward a minor.

Microbiology

MCB 4403. Prokaryotic Biology (3). Prerequisites: CHM 2210 and PCB 3063. Corequisite: MCB 4403. This course focuses on the evolution and functional characteristics of microorganisms, with emphasis on prokaryotes (bacteria and archaea), and viruses. Topics include: prokaryotic cell structure and function, physiology and genetics of prokaryotes and viruses, physiological and molecular aspects of microorganisms and human disease, and biotechnological applications of microbial physiology (environmental, food, and industrial microbiology).

MCB 4403L. Prokaryotic Biology Laboratory (2). Prerequisites: CHM 2210 and PCB 3063. Corequisite: MCB 4403. This course covers laboratory methods for growth, handling, and study of prokaryotes and other types of microorganisms. Topics include: aseptic technique and isolation of pure cultures; microscopic methods; effects of environment on growth; viruses; physiological characterization methods; and methods related to medical, environmental, and food microbiology.

Process Biology

PCB 3043. General Ecology (3). This course focuses on topics such as: population biology; population growth; community processes, successions, group selection, and energy flow; species interactions; ecological efficiency; and biogeographical ecology.

PCB 3043L. Lab for Ecology (2). Corequisite: PCB 3052 or PCB 3043. In this course, topics covered include quantifying populations and population growth; species interaction; community processes, successions, group selection, and energy flow; species interactions; ecological efficiency; and biogeographical ecology.

ZOO 4204C. Biology of Higher Marine Invertebrates (5). Prerequisites: PCB 3043 or PCB 3063 or ZOO 3713C or instructor permission. Corequisite: ZOO 3205L. This laboratory deals with the structure, function, behavior and ecology of the invertebrate phyla, especially those taxa living in the sea.

ZOO 4317C. Comparative Vertebrate Anatomy (4). This course emphasizes form and function and origin and evolution of structure.

ZOO 4204C. Biology of Higher Marine Invertebrates (5). Prerequisite: BSC 3312 or PCB 3043 or ZOO 3205 or ZOO 3205L. This course focuses on the biological specializations of crustaceans, mollusks, and echinoderms, including life history, behavior, ecology, biogeomorphology, and environmental adaptations.

ZOO 4343C. Biology of the Lower Vertebrates (4). This course explores the systematics, ecology, and evolution of fishes, amphibians, and reptiles.

ZOO 4454C. Biology of Fishes (4). This course provides an overview of the systematics, morphology, ecology, behavior, and life history of the most diverse group of vertebrates on earth, the fishes. It includes conservation and management issues and laboratory exercises balanced with field trips to different northwest Florida habitats, including freshwater springs, salt marshes, seagrass beds, and offshore reefs.

ZOO 4513. Animal Behavior (4). This course discusses modern perspectives of the behavior of animals.

ZOO 4753C. Histology (4). This course explores the microscopic anatomy and functions of the cells, tissues, and glands composing the organs and systems of humans.

ZOO 4823. Insect Biology (3). This course discusses the morphology, classification, natural history, physiology, and evolution of insects.

ZOO 4823L. Insect Diversity of North Florida (2). Prerequisite: MAC 2311. Pre- or corequisite: ZOO 4823. This course includes topics such as: collection, keying, and curation of local insects.

Graduate Courses

Biochemistry

BCH 5886r. Special Topics in Biochemistry and Cell Biology (1–3).
The Department of Biomedical Sciences is a community of scholars dedicated to educating future physicians and scientists and advancing knowledge through discovery.

The Doctor of Philosophy (PhD) in Biomedical Sciences at the Florida State University College of Medicine is designed to train modern biomedical scientists who use genomics, proteomics, bioinformatics, and other contemporary approaches to address questions of developmental, cell, and molecular biology related to human health. The program is appropriate for students with majors in biochemistry, biology, or other health-related fields. Three broad areas of research are emphasized: development, neuroscience, and the molecular basis of human disease. Research rotations during the first year allow students to make an informed choice regarding the research area and major professor with whom they will conduct their PhD work. A core curriculum of the fundamentals, the choice of electives from other departments, and intellectual interaction with faculty and postdoctoral fellows encourage graduate students to mature into independent scientists.

### Admission Requirements

To apply for the PhD in Biomedical Sciences Program, students should contact the College of Medicine’s Office of Research and Graduate Programs at (850) 645-6560 or visit the program’s Web site (http://med.fsu.edu/?page=phdadmissions.home) for other contact information. A prospective candidate must: (1) have or be a candidate for a baccalaureate degree from an accredited college or university and be in good standing at the last institution attended; (2) have a minimum GPA of 3.0 (on a 4.0 scale); and (3) have a minimum combined verbal and quantitative score of 1000 or above on the Graduate Record Examination (GRE). A GRE Subject Test is strongly recommended and may include Biochemistry and Cell Biology, General Biology, Chemistry, or Physics. Applicants whose native language is not English and who have not received a degree from an English language institution are required to take the Test of English as a Foreign Language (TOEFL), receiving a minimum score of 80 on the internet based (IB) test or 550 for the paper test. Applicants must also send all required material to the University Admissions Office at https://admissions.fsu.edu/gradapp/.

**Note:** Effective August 2011, the GRE Revised General Test replaced the GRE General Test. To learn more about this new test, go to http://www.ets.org/gre.

### Degree Requirements

The College of Medicine grants the PhD in Biomedical Sciences through an interdisciplinary program with the goal of training students to do research in the broad area of the molecular basis of human disease, including the function of the human genome in development, neurobiology, aging, cancer, and other disease.

The curriculum for the Biomedical Sciences degree includes core courses in statistics and ethics in research, as well as specialized biomedical coursework and laboratory research. The direction and supervision of graduate work at the doctoral level resides primarily with the major professor and supervisory committee, which is made up of four faculty members. Laboratory rotation in at least three laboratories during the first year is a degree requirement, designed to assist students in making informed choices regarding their courses of study.

To be considered for graduation from the College of Medicine with the PhD in Biomedical Sciences, the student must successfully complete all course requirements within five calendar years from the time the student gains admittance to candidacy by passing the preliminary exam. Other requirements for graduation include attending the Health Science Seminar Series; teaching at least two semesters; successfully completing the preliminary doctoral examination; submitting a doctoral research proposal approved by the major professor and the supervisory committee after admission to doctoral candi-
dacy; registering for a minimum of twenty-four semester hours of dissertation credit; and submitting, publicly presenting, and successfully defending a doctoral dissertation.

Additional details are available at http://med.fsu.edu/?page=phdadmissions. home. Also, for complete details of degree requirements, plus a description of the college, its facilities, opportunities, and available financial assistance, refer to the “College of Medicine” chapter of the Graduate Bulletin.

Definition of Prefixes

BMS — Basic Medical Sciences
ENT — Entrepreneurship
GMS — Graduate Medical Sciences
IHS — Interdisciplinary Health Sciences
MDU — Undergraduate Medicine Courses

Undergraduate Courses

BMS 4861. Multicultural Health Care and Health Disparities (3). This course reviews the impact of culture and ethnicity on health, illness, and health care practices. The course exposes students interested in a career in health care to the challenges of providing care to a multicultural society through exposure to theory, evidence-based practices, and self-exploration through service learning with an underserved population.

BMS 4901r. DIS in Biomedical Sciences (1-4). Prerequisite: Instructor permission. Corequisite: Must have a combined GPA of 3.0 in biology, chemistry, and physics coursework. This directed individual study course in biomedical sciences offers a unique opportunity for undergraduate students to perform research in the biomedical science laboratories in the College of Medicine. Students perform special supervised study or research in the area of the faculty member’s research. An oral presentation and a final report of the research in the format of a short scientific publication is required. May be repeated to a maximum of fifteen semester hours.

IHS 4120. Frontiers in Medicine (3). This course aims to provide advanced undergraduate students the opportunity to gain an understanding of common human disease conditions through a highly interactive set of learning activities. We recommend that students have taken physiology, genetics and biochemistry. Examples of topics covered include heart failure, cancer, diabetes, depression and Alzheimer’s disease.

IHS 5906r. Seminar in Biomedical Sciences (1–2).

Interdepartmental Minor in
BRITISH STUDIES, LONDON CENTER

College of Arts and Sciences

Web Page: http://international.fsu.edu/londonbroad.html
Coordinator: James E. Pitts (International Programs)

The British Studies London Center minor is concerned with the culture of Great Britain from ancient times to the present. The minor is built around the student’s program of studies at the Florida State University London Study Center, allowing the student to study British culture from the perspective of various disciplines and to pursue the minor before, during, and after the student attends the London Center. The minor gives greater focus to and enhances the quality of the student’s program of studies in Britain. The sojourn in London is the essential element in the minor, providing direct involvement in contemporary British civilization as well as exposure to Britain’s historical and cultural artifacts.

Requirements for a Minor in British Studies

The interdisciplinary minor requires the completion of fifteen semester hours in courses approved by the British Studies London Center Coordinator Committee. At least nine semester hours of approved courses must be taken while the student is in residence at the London Study Center. A maximum of nine semester hours may be counted in any single academic discipline. A minimum grade of “C–” must be earned for all courses taken for the minor. In addition, a minimum grade point average of 2.0 must be maintained in all courses counted toward the minor. Students who intend to minor in British Studies should declare this intention with International Programs at the end of the semester in London. Contact Betty Seymour at bsseymour@fsu.edu for further information.

Core Courses

These courses will be counted in the minor whether they are taken on the Tallahassee campus or in London. Descriptions of these courses can be found under the individual departments in which they are taught.

CPO 3123 Comparative Government and Politics: Great Britain (3)
ECO 3303 History of Economic Ideas (3)
ENL 2012 British Authors: Beginnings to 1790 (3)
ENL 2022 British Authors: Early Romantics to the Present (3)
ENL 3184 British Drama: History, Text and Criticism (3)
ENL 3210 Medieval Literature in Translation (3)
ENL 3334 Introduction to Shakespeare (3)
ENL 4112 The 18th-Century British Novel (3)
ENL 4122 The 19th-Century British Novel (3)
ENL 4132 The Modern British Novel (3)
ENL 4161 Renaissance Drama (3)
ENL 4171 Restoration and 18th-Century Drama (3)
ENL 4218 Middle English Romance (3)
ENL 4220 Renaissance Poetry and Prose (3)
ENL 4230 Restoration and 18th-Century English Literature (3)
ENL 4240 British Romantic Literature (3)
ENL 4251 Victorian British Literature (3)
ENL 4273 Modern British Literature (3)
ENL 4311 Chaucer (3)
ENL 4333 Shakespeare (3)
ENL 4341 Milton (3)
EUH 3501 The Making of Modern England (3)
EUH 3530 England, the Empire, and the Commonwealth (3)
EUH 4502 England Since 1870 (3)
EUH 4512 Stuart England (3)
EUH 4520 England, 1714-1870 (3)
EUH 4544 Sex and Class in England, 1750–1914 (3)
LIT 4184 Irish Literature (3)

Related Courses

These courses may be counted in the minor only when they are taken at the London Study Center.

ANT 2410 Introduction to Cultural Anthropology (3)
ANT 2511 Introduction to Physical Anthropology and Prehistory (3)

## Department of CHEMICAL AND BIOMEDICAL ENGINEERING

**FAMU–FSU College of Engineering**  
**Web Page:** [http://www.eng.fsu.edu/cbe](http://www.eng.fsu.edu/cbe)  
**Chair:** Teng Ma; **Professors:** Alamo, Kalu, Locke, T. Ma, Siegrist, Yeboah; **Associate Professors:** Chella, Grant, Guan, B. Ma, Paravastu, Ramakrishnan, Telotte; **Assistant Professors:** Chung, Hallinan, Li, Mendoza-Cortes; **Senior Research Associate:** Finney; **Research Faculty I:** Rosenberg; **Visiting Assistant Scholar Science:** Hunter; **Professor Emeritus:** Collier; **Affiliate Faculty:** Chen, Hsu, Meeker, Sachdeva, Shanbhag

### Program Overview

The vision of the Department of Chemical and Biomedical Engineering as an educational unit is to be recognized as a place of excellence in fundamental and applied chemical and biomedical engineering education and lifelong learning, and to maintain a national research leadership in modern areas of engineering challenge. To attain this vision, the department realizes that it has to continually satisfy its major stakeholders: students, industrial employers, alumni, departmental faculty, the college, the universities, the community, the Accreditation Board for Engineering and Technology, Inc. (ABET), and other professional societies.

Chemical engineering encompasses the development, application, and operation of processes in which chemical, biological, and/or physical changes of material are involved. The work of the chemical engineer is to analyze, develop, design, control, construct, and/or supervise chemical processes in research and development, pilot-scale operations, and industrial protection. Chemical engineers are employed in the manufacture of inorganic chemicals (e.g., acids, alkalies, pigments, fertilizers), organic chemicals (e.g., petrochemicals, polymers, fuels, propellants, pharmaceuticals, specialty chemicals), biological products (e.g., enzymes, vaccines, biochemicals, biofuels), and materials (e.g., ceramics, polymeric materials, paper, biomaterials). The graduate in chemical engineering is particularly versatile. Industrial work may involve production, operation, research, and development. Graduate education in medicine, dentistry, and law, as well as chemical engineering, biomedical engineering, and other engineering and scientific disciplines are viable alternatives for the more accomplished graduate.

The Department of Chemical and Biomedical Engineering has made a long-term commitment to emphasize a biological component in its curriculum. The increasing importance of biological and medical subjects within the field of engineering cannot be underestimated. Many of the remarkable breakthroughs in medical science can be directly attributed to advances in chemicals, materials, and devices spearheaded by biochemical and biomedical engineers. Currently, biomedical engineering represents the fastest growing engineering discipline in the U.S., and it is likely to continue as such. The biomedical/biotechnology industries are also the fastest growing of all current industries that employ engineers. Training in biological and biomedical engineering provides an excellent background for graduate and/or medical school, especially in light of the increasing technological complexity of medical education.

The Department currently offers the Bachelor of Science (BS) degree in Chemical Engineering with three major options (Chemical Engineering, Biomedical Engineering, and Chemical-Materials Engineering). The BS degree takes between four and five years to complete. The undergraduate curriculum emphasizes the application of experimental and computer analysis to classical chemical engineering principles. This includes laboratory instruction in modern, state-of-the-art facilities in the transport phenomena, unit operations, and process control laboratories. Students are instructed in and utilize state-of-the-art computational programs such as MATLAB, Aspen and COMSOL Multiphysics. In order to meet newly developed interests in chemical engineering and related fields, elective courses are available in bioengineering, polymer engineering, materials engineering, electrochemical engineering, environmental engineering, and biomedical engineering. The major options in Materials Engineering and Biomedical Engineering build upon the core classical chemical engineering principles developed initially for the original major in Chemical Engineering. Consult an advisor for specific requirements for the three major options.

Please contact the Department of Chemical and Biomedical Engineering at Suite A131, 2525 Pottsdamer Street, Tallahassee, FL 32310-6046; phone: (850) 410-6149 or (850) 410-6151; fax: (850) 410-6150; e-mail: chemical@eng.fsu.edu; or Web site: [http://www.eng.fsu.edu/cbe](http://www.eng.fsu.edu/cbe).

### Program Objectives and Outcomes

The Department of Chemical and Biomedical Engineering is nationally accredited by the Accreditation Board for Engineering and Technology, Inc. (ABET). As part of the accreditation process, the department has developed

---

**BUSINESS LAW:** see Risk Management/Insurance, Real Estate, and Legal Studies

**CELL BIOLOGY:** see Biological Science
program educational objectives and program outcomes to reflect the educational goals of the department. These objectives and outcomes are continually assessed and modified to meet the changing demands of the departmental stakeholders.

Program Educational Objectives

The Department of Chemical and Biomedical Engineering shall prepare its students for academic and professional work through the creation and dissemination of knowledge related to the field, as well as through the advancement of those practices, methods, and technologies that form the basis of the chemical engineering profession. Accordingly, the Department of Chemical and Biomedical Engineering has established the following educational objectives that our graduates are expected to attain within five years of graduation from our undergraduate program:

1. Successfully pursue careers in a wide range of industrial, professional, and academic settings through application of their rigorous foundation in chemical engineering principles and strong communication skills.
2. Successfully adapt and innovate to meet future technological challenges and evolving regulatory issues, while addressing the ethical and societal implications of their work at both the local and global level.
3. Successfully function on interdisciplinary teams and assume participatory and leadership roles in professional societies, and interact with educational, community, state, and federal institutions.

Program Outcomes

These objectives are further expanded and detailed through nine program outcomes:

- **Program Outcome 1: Scientific Knowledge.** Students graduating from the program will have the ability to apply knowledge of mathematics, physics, chemistry, biology, and chemical engineering to analyze chemical engineering processes (c3.a).
- **Program Outcome 2: Chemical Engineering Process Experimentation.** Students graduating from the program will be able to design and conduct chemical engineering experiments, and analyze and interpret fundamental data of importance to the design and operation of chemical processes (c3.b).
- **Program Outcome 3: Design Skills.** Students graduating from the program will have the ability to design and analyze new and existing chemical systems and processes to meet desired needs (c3.c).
- **Program Outcome 4: Multidisciplinary Teams.** Students graduating from the program will have the ability to function on multidisciplinary teams (c3.d).
- **Program Outcome 5: Problem Solving.** Students graduating from the program will have the ability to identify, formulate and solve chemical engineering problems (c3.e).
- **Program Outcome 6: Professional and Ethical Responsibility.** Students graduating from the program will have an understanding of professional and ethical responsibility (c3.f).
- **Program Outcome 7: Effective Communications and Team Participation.** Students graduating from the program will have the ability to communicate effectively (c3.g).
- **Program Outcome 8: Contemporary Global and Societal Issues, and Lifelong Learning.** Students graduating from the program will demonstrate an understanding of the contemporary global and societal issues in chemical engineering practice and the need for continuing education and lifelong learning (c3.h,i,j).
- **Program Outcome 9: Modern Engineering Skills and Tools.** Students graduating from this program will be able to use the modern engineering skills and tools necessary for chemical engineering practice either in industry, or in pursuit of advanced education (c3.k).

Note: Identifiers beginning with c3, such as c3.a above, refer to specific outcomes in Criterion 3 of the ABET Engineering Criteria 2000. They indicate the ABET outcome that the Department of Chemical and Biomedical Engineering outcome addresses.

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary, computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in chemical and biomedical engineering satisfy this requirement by earning a grade of “C-” or higher in ECH 3854.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions necessary for admission into this upper-division degree program:

1. MAC X311 or MAC X281
2. MAC X312 or MAC X282
3. MAC X313 or MAC X283
4. MAP X302 or MAP X305
5. CHM X045/X045L or CHM X045C, or CHS X440/X440L
6. CHM X046/X046L or CHM X046C
7. PHY X048/X048L or PHY X048C, or PHY X043 and PHY X048L
8. PHY X049/X049L or PHY X049C, or PHY X044 and PHY X049L

Undergraduate Laboratory and Computational Facilities

Undergraduate teaching laboratories in measurements and transport phenomena, unit operations, and process control are designed to augment classroom instruction. Our undergraduate chemical engineering laboratory experiments feature a twenty stage distillation column for the study of organic chemical separations, several reactor vessels for the design and analysis of batch and continuous reactor configurations, and a liquid/liquid continuous extraction process system, among others. All experiments include computer data control and data acquisition systems in order to provide a “real world” experience for our students.

The department has extensive computational and laboratory facilities in a number of areas. In addition to the University computing center facilities accessible by remote terminals, students have access to College of Engineering computer labs that have workstations connected to college-wide servers. Within the Department of Chemical and Biomedical Engineering, undergraduate students working on research projects utilize laboratory computer terminals connected to the college servers and workstations dedicated to research use. The department requires the use of computers for data acquisition, process control, experimental design and analysis, report writing, and homework problem calculations in the chemical engineering curriculum.

Areas of Study ( Majors )

Although the department offers one Bachelor of Science degree (BS) in Chemical Engineering, students may choose from among three diverse areas of study that reflect new directions in the broader field of chemical engineering. These major options include chemical engineering, chemical-materials engineering, and biomedical engineering.

- **Chemical Engineering.** The most common major, it prepares students for employment or further study in traditional areas of chemical engineering (described above).
- **Chemical-Materials Engineering.** Chemical engineers have extensively developed and studied the molecular structures and dynamics of materials—including solids, liquids, and gases—in order to develop macroscopic descriptions of the behavior of such materials. In turn, these macroscopic descriptions have allowed the construction and analysis of unit processes that facilitate desired chemical and physical changes. This constant interplay between molecular scale understanding and macroscopic descriptions is unique and central to the field of chemical engineering.
- **Chemical-Biomedical Engineering.** Biomedical engineering concerns the application of chemical engineering principles and practices to
large scale living organisms, most specifically human beings. As one of the newest sub-disciplines of chemical engineering, the field is a rapidly evolving one involving chemical engineers, biochemists, physicians, and other health care professionals. Biomedical research and development is carried out at universities, teaching hospitals, and private companies, and it focuses on conceiving new materials and products designed to improve or restore bodily form or function. Biomedical engineers are employed in diverse areas such as artificial limb and organ development, genetic engineering research, development of drug delivery systems, and cellular and tissue engineering. Many chemical engineering professionals are engaged in medical research to model living organisms (pharmacokinetic models), and to make biomedical devices (e.g., drug delivery capsules, synthetic materials, and prosthetic devices). Because of increasing interest in biomedical sciences and biotechnology, the major in chemical–biomedical engineering also provides an avenue for students interested in pursuing a career in medicine, biotechnological patent law, or biomedical product sales and services.

Requirements for a BS Degree in Chemical Engineering

A program of study encompassing at least 131 semester hours is required for the Bachelor of Science (BS) degree in chemical engineering. A candidate for the bachelor’s degree is required to earn a “C–” or higher in all engineering courses, and must achieve a 2.0 grade point average (GPA) in the forty-five semester hours of engineering major courses. In addition, students must achieve a grade of “C–” or higher in all courses transferred into the Department of Chemical and Biomedical Engineering. Students should contact the department for the most up-to-date information concerning the chemical engineering curriculum requirements.

There are three majors within the chemical engineering bachelor’s degree program. These include Chemical Engineering, Chemical-Materials Engineering, and Biomedical Engineering. Most of the curriculum is common to all three majors, and includes topics in liberal studies, mathematics, basic science, computer science, advanced chemistry, general engineering science, and chemical engineering science and design. History/social science/humanities electives are to be selected to satisfy the Florida State University liberal studies requirements. Students in all three majors should successfully complete the following courses in addition to the liberal studies, other University, and College of Engineering requirements:

Math and Science Prerequisites

- MAC 2311 Calculus with Analytic Geometry I (4)
- MAC 2312 Calculus with Analytic Geometry II (4)
- MAC 2313 Calculus with Analytic Geometry III (5)
- ECH 3301 Process Analysis and Design (4)
- BSC 2010 Biological Science I (3)
- CHM 1045 General Chemistry I (3)
- CHM 1045L General Chemistry I Laboratory (1)
- CHM 1046 General Chemistry II (3)
- CHM 1046L General Chemistry II Laboratory (1)
- PHY 2048C General Physics A (combined lecture/lab) (5)
- PHY 2049C General Physics B (combined lecture/lab) (5)

Advanced Chemistry

- CHM 2210 Organic Chemistry I (3)
- CHM 2211 Organic Chemistry II (3)
- CHM 4410 Physical Chemistry I (3)
- CHM 4410L Physicochemical Measurements and Techniques I (1)
- CHM XXXX Advanced Chemistry Elective (3–4) (not required for Biomedical Engineering majors)

General Engineering

- EGN 1004L First Year Engineering Lab (1)
- EGM 3512 Engineering Mechanics (4)
- EEL 3003 Introduction to Electrical Engineering (3) (not required for Biomedical Engineering majors)

Chemical Engineering Science and Design

- ECH 3023 Mass and Energy Balances I (3)
- ECH 3024 Mass and Energy Balances II (3)
- ECH 3101 Chemical Engineering Thermodynamics (3)
- ECH 3266 Transport Phenomena I (3)

- ECH 3274L Transport Phenomena Laboratory (3)
- ECH 3418 Separations Processes (3)
- ECH 3854 Chemical Engineering Computations (4)
- ECH 4267 Transport Phenomena II (3)
- ECH 4323 Process Control (3)
- ECH 4323L Process Control Laboratory (1)
- ECH 4404L Unit Operations Laboratory (3)
- ECH 4504 Kinetics and Reactor Design (3)
- ECH 4604 Chemical Engineering Process Design I (4)
- ECH 4615 Chemical Engineering Process Design II (3)
- ECH 4XXX Chemical Engineering Electives (6) (Chemical and Chemical-Materials Engineering Majors)

Chemical Engineering Electives

The two chemical engineering electives (three semester hours each) are to be selected from the 4000-level elective courses offered in the Department of Chemical and Biomedical Engineering.

Note: A six credit-hour sequence in the Department’s Undergraduate Research Program, consisting of the course designations ECH 4904 (ECH URP), ECH 4906 (ECH Honors in the Major), BME 4904 (BME URP), or BME 4906 (BME Honors in the Major), will substitute for this requirement.

Major in Chemical Engineering

Advanced Chemistry Elective

- CHM 3120 Analytical Chemistry I (3)
- CHM 4080 Environmental Chemistry I (3)
- CHM 4081 Environmental Chemistry II (3)
- CHM 4411 Physical Chemistry II (3)
- CHM 2211L Organic Chemistry II Laboratory (3)
- BCH 4053 General Biochemistry I (3)

Chemical Engineering Electives

Select from two of the following courses:

1. ECH 4823 Introduction to Polymer Science and Engineering (3)
2. ECH 4824 Chemical Engineering Materials (3)
3. ECH 4825 Polymer Process Engineering (3)
4. ECH 4937 Special Topics in Chemical Engineering [Electrochemical Engineering] (3)

Note: A six credit hour sequence in the Department’s Undergraduate Research Program, consisting of the course designations ECH 4904 (ECH URP), ECH 4906 (ECH - Honors in the Major), will substitute for the Chemical Engineering Electives requirement.

Major in Chemical-Materials Engineering

Advanced Chemistry Elective

- CHM 3120 Analytical Chemistry I (3)

Chemical Engineering Electives

Select from two of the following courses:

1. ECH 4823 Introduction to Polymer Science and Engineering (3)
2. ECH 4824 Chemical Engineering Materials (3)
3. ECH 4825 Polymer Process Engineering (3)
4. ECH 4937 Special Topics in Chemical Engineering [Electrochemical Engineering] (3)

Note: A six credit hour sequence in the Department’s Undergraduate Research Program, consisting of the course designations ECH 4904 (ECH URP), ECH 4906 (ECH - Honors in the Major), will substitute for the Chemical Engineering Electives requirement.

Major in Biomedical Engineering

Biomedical Engineering Science and Design

- BME 3009 Introduction to Biomedical Engineering (3)
- BME 4403C, 4404C Quantitative Anatomy and Systems Physiology I and II [two course sequence] (3,3)

Biomedical Engineering Elective (take one)

- BME 4007 Biomedical Engineering (3)
- ECH 4743 Biomechanics (3)
Academic Requirements and Policies

In accordance with ABET criteria, all engineering students are subject to a uniform set of academic requirements agreed upon by Florida State University and Florida A&M University. Students should consult the “FAMU-FSU College of Engineering” chapter of this General Bulletin and the Department of Chemical and Biomedical Engineering Web site (http://www.eng.fsu.edu/che) for a list of all academic requirements and policies.

Prerequisite Grade Requirements

In addition to the college course prerequisite requirements, the Department of Chemical and Biomedical Engineering requires students to have obtained a grade of at least “C–” in all courses listed as prerequisites for the department’s engineering courses.

Undergraduate Research Program (URP)

The Department of Chemical and Biomedical Engineering offers an Undergraduate Research Program (URP) in chemical and biomedical engineering to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. The program is two-tiered, with those students meeting a more stringent set of academic requirements being admitted to the Honors in the major (Chemical and Biomedical Engineering) program. For requirements and other information, contact the department, and see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Definition of Prefixes

BME—Biomedical Engineering
ECH—Engineering: Chemical
EGS—Engineering: Support

Undergraduate Courses

Biomedical Engineering

BME 3009. Introduction to Biomedical Engineering (3). Prerequisites: BSC 2010, MAC 2312, and PHY 2048C, all with a grade of “C” or higher. Corequisites: ECH 3024, ECH 3301, MAC 2313, and PHY 2049C. This course presents an introduction to the field of biomedical engineering; building on previous basic coursework in biological science, physics, and calculus. Topics in cell physiology and modeling, bioinstrumentation, biomaterials, tissue engineering, and bioimaging are covered. The course provides sophomore-level biomedical engineering students with both fundamentals and applications in contemporary biomedical science and engineering.

BME 4007. Biomedical Engineering (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4268, ECH 4269, and ECH 4604. This course introduces the major principles of the life sciences (microbiology, cell biology, and genetics) that are important for biomedical engineering applications. The application of the chemical engineering principles of kinetics, mass transport, bioreactor design, and separation processes to solve the important problems in the biomedical engineering are emphasized.

BME 4082. Biomedical Engineering Ethics (3). Prerequisites: BME 4404C, ECH 3274L, ECH 3418, and ECH 4267. This course is an introduction to the key theories, concepts, principles, and methodology relevant to the development of biomedical engineering professional ethics. The student is facilitated in his/her development of a code of professional ethics through written work, class discussion and case analysis.

BME 4403C. Quantitative Anatomy and Systems Physiology I (3). Prerequisites: BME 3009, ECH 3024, and ECH 3301, all with a grade of “C” or higher; and PHY 2049C. Corequisites: ECH 3101, ECH 3266, and ECH 3854. This course introduces engineering students to engineering principles of the anatomy and physiology of the human body. The course portion of the course focuses on relating fundamental biomedical engineering concepts to the human physiological system. The laboratory portion of the course involves a practical, in-depth study of the physical and chemical interrelationships in the form and function of specific human anatomical and physiological subsystems.

BME 4404C. Quantitative Anatomy and Systems Physiology II (3). Prerequisites: BME 4403C, ECH 3301, ECH 3418, ECH 3854, and ECH 4267. This course focuses on introducing the fundamental concepts of anatomy and physiology of the human nervous, digestive, and urinary systems, quantitative aspects of systems, and scientific principles underlying the systems, diseases and disorders, and biomedical engineering techniques related to the systems.

BME 4801. Biomedical Engineering Process Design I (3). Corequisites: ECH 4053 and BME 4404C. Corequisite: Senior standing. This course is the first of a two-semester sequence on the design of biomedical engineering processes and products. The first semester consists of introducing students to the principles of engineering economics and cost estimation techniques relating to principles of biomedical engineering design. Infection is an integral part of this course.

BME 4802. Biomedical Engineering Process Design II (3). Prerequisites: BCH 4053, BME 4403C, and BME 4801. Corequisite: Senior standing. This course is the second of a two-semester sequence on the design of biomedical engineering processes and products. The second term focuses on the actual design of a biomedical engineering process or system using computer-aided design calculations. This is the capstone senior design course in biomedical engineering. An individual design project is completed by each student.

BME 4904r. Directed Individual Study (1). Prerequisite: Department chair permission. This course offers a supervised program of study approved by the department chair. May be repeated to a maximum of twelve credit hours.

BME 4906. Honors URP in Biomedical Engineering (1–3). Prerequisites: BME 4403C, BCH 4410, ECH 3101, ECH 3266, ECH 3854, a 3.0 GPA, and instructor permission. Corequisites: ECH 3274L, ECH 3418, and ECH 4267. This course involves the completion of an Honors Undergraduate Research Program (URP) for six hours with a minimum grade of “C”. This program requires independent student research on a topic relevant to biomedical engineering and may be used to satisfy the Chemical Engineering Elective requirement. May be repeated to a maximum of six credit hours.

BME 4937r. Special Topics in Biomedical Engineering (1). Prerequisite: BME 4404C, ECH 3274L, ECH 3418, and ECH 4267. Corequisite: ECH 4504. This course emphasizes recent developments in the field of biomedical engineering. Selected readings are assigned by the instructor. Structure of the course varies by instructor and topic, but generally involves 12–15 hours of class time per week.

Chemical Engineering

ECH 2050. Engineering Communications (2). Prerequisite: ENC 1101. Corequisite: EGN 1004L. This course includes techniques for effective oral communication in settings most frequently encountered by the practicing engineer. Speaking skills are applied in informal presentations, formal presentations, and interviews.

ECH 3023. Mass and Energy Balances I (3). Prerequisites: CHM 1046 and MAC 2312. Corequisites: CHM 2210, MAC 2313, and PHY 2048C. This course covers mass and energy balances related to chemical process systems and measurements, as well as the development of problem-solving methodologies in mass and energy balances.

ECH 3024. Mass and Energy Balances II (3). Prerequisites: CHM 2210, MAC 2313, and PHY 2048C. Corequisites: ECH 3023 and BSC 2010, ECH 3301, and PHY 2049C. This course introduces the general concepts of chemical engineering. In this course, the applications of mass and energy balances are extended to include reactive systems, and systems undergoing phase changes as well as transient processes. Computational tools such as Excel and MATLAB are used to demonstrate the use of a structured programming language for material and energy balances.

ECH 3101. Chemical Engineering Thermodynamics (3). Prerequisites: ECH 3023, ECH 3024, and ECH 3301, all with a grade of “C” or higher; and PHY 2049C. Corequisites: ECH 3266 and ECH 3854. In this course, students learn the basics of classical and solution thermodynamics. The course forms the link between the mass and energy balance courses, and separation.

ECH 3266. Transport Phenomena I (3). Prerequisites: ECH 3024 and ECH 3301, both with a grade of “C” or higher; and PHY 2049C. Corequisites: ECH 3101 and ECH 3854. This course examines integral balance equations for conservation of momentum, energy, and mass. Topics include the following: analysis of chemical processes involving fluid flow and heat and mass transfer, estimation of friction factors, and heat and mass transfer coefficients, pump selection and sizing, piping network analysis, and design of heat exchangers.

ECH 3274L. Transport Phenomena Laboratory (3). Prerequisites: ECH 3101, ECH 3266, ECH 3301, and ECH 4504, and course enrollment. This course enables students to design and conduct experiments on fluid mechanics and heat transfer; analyze and interpret data; apply spreadsheets, statistical methods, and process models; as well as gain proficiency in operating basic chemical-engineering equipment and instruments. Emphasis is placed on safety, professionalism, teamwork, and oral/written communication.

ECH 3301. Process Analysis and Design (4). Prerequisite: MAC 2312. Corequisites: ECH 3023 and MAC 2313. This course examines the development and analysis of process models for systems that arise in chemical engineering applications.
Prerequisite: Permission of department.
Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 3274L and ECH 4267. This course examines the principles of equilibrium and mass and energy balances. Topics include analysis and design of stagewise and continuous separation processes, including distillation, absorption, extraction, filtration, and membrane separations.

ECH 3854. Chemical Engineering Computations (4). Prerequisites: ECH 3024, ECH 3360, and PSY 4900, all with a grade of “B” or higher. Corequisites: ECH 3101 and ECH 3266. This course covers topics such as structured programming techniques; numerical techniques useful in the solution of chemical engineering processes; root-finding techniques, direct and iterative approaches to solve linear systems, linear and nonlinear regression, interpolation, numerical differentiation and integration, statistical analysis of data; solutions of ordinary differential equations.

ECH 3394r. Experiential Learning (0). (S/U grade only.) This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

ECH 4267. Transport Phenomena I (3). Prerequisites: ECH 3101, ECH 3266, and ECH 3854. Corequisites: ECH 3274L and ECH 3418. This course focuses on the critical analytical and mathematical skills for analyzing fundamental concepts in transport phenomena (including fluid mechanics, heat transfer, and mass transfer) and the application of these concepts to the solution of problems relevant to chemical and biomedical engineering. This course covers topics such as structured programming techniques; numerical techniques useful in the solution of chemical engineering processes; root-finding techniques, direct and iterative approaches to solve linear systems, linear and nonlinear regression, interpolation, numerical differentiation and integration, statistical analysis of data; solutions of ordinary differential equations.

ECH 4323r. Process Control (3). Prerequisites: ECH 4404L, ECH 4504, and ECH 4604. Corequisites: ECH 4615. This course focuses on the design and implementation of model-based control systems for chemical and biochemical systems. Topics include formulation of dynamic models, time and Laplace domain analysis of open-loop and closed-loop systems, and design of single variable and multivariable controllers. MATLAB and SIMULINK are used. Students gain proficiency in operating basic chemical engineering equipment and instruments. Emphasis on safety, professionalism, teamwork, oral and written communication.

ECH 4504. Kinetics and Reactor Design (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. This course covers the following topics: homogeneous and heterogeneous reaction kinetics; analysis of batch, mixed, plug, and recycle reactors; analysis of multiple reactions and multiple reactors; reactor temperature control; and catalytic reactor design.

ECH 4604. Chemical Engineering Process Design I (4). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L and ECH 4404. This course is the first in a two-semester sequence on the analysis, synthesis, and design of chemical processes, preparing students for engineering practice. Students integrate knowledge from prior courses with process economics, computer-aided design, engineering standards, and realistic constraints to solve open-ended process problems.

ECH 4615. Chemical Engineering Process Design II (3). Prerequisites: ECH 4404L, ECH 4504, and ECH 4604. Corequisites: ECH 4323 and ECH 4323L. This course is the second in a two-semester sequence on the analysis, synthesis, and design of chemical processes, requiring students to use computer programs and software to solve engineering problems, from prior courses with process economics, computer-aided design, engineering standards, and realistic constraints to the design of chemical-process facilities.

ECH 4743. Bioengineering (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L, ECH 4504, and ECH 4604. This course introduces chemical engineering to major processes of life sciences and biotechnological applications, and extends and applies the students’ knowledge of the chemical engineering principles of kinetics, mass transfer, separation, purification, and characterization to important problems in bioprocess engineering.

ECH 4781. Chemical Engineering—Environmental (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L, ECH 4504, and ECH 4604. This course is an introduction to the history and development of environmental regulation and its scientific basis. Application of fundamental chemical engineering techniques involving mass transfer theory and reaction kinetics to problems associated with the fate of contaminants in the environment.

ECH 4800C. Distilled Spirits Processing and Properties (3). Prerequisites: Completion of sophomore-year academic requirements in chemical engineering, other engineering disciplines, or in a related science; and instructor permission. This course involves the production of a distilled-spirit sample at a commercial facility, followed by an in-depth chemical analysis of the product through the use of sophisticated instrumentation located at a University of Florida facility. This intensive course takes place over a two week period in which students are instructed in the operational procedure of the plant and given hands-on involvement in an actual production run. Lecture and laboratory sessions following the production run focus on a detailed chemical and physical analysis of the distilled spirit sample using spectroscopic, chromatographic, and NMR techniques.

ECH 4823. Polymer Science and Engineering (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L, ECH 4504, and ECH 4604. This course offers an introduction to different types of polymers and their physical properties. Students explore major synthetic pathways and reaction kinetics, properties of macromolecules in solution, methods of molecular weight determination, and the role of phase transitions in amorphous and crystalline polymers.

ECH 4824. Chemical Engineering Materials (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L, ECH 4504, and ECH 4604. This course provides an introduction to engineering materials, with emphasis on understanding the relationship between structure, properties, and in particular, the role of the atomic structure and arrangement, as well as the microstructure, in determining the physical properties of these materials is examined. In addition, polymers and modern processing techniques for improving material performance are studied. Finally, the resistance of materials to environmental factors, and factors in selection of materials for engineering applications are discussed.

ECH 4825. Polymer Process Engineering (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L, ECH 4504, and ECH 4604. This course explores polymeric systems, interrelationships between material properties, processing conditions and final properties, and microstructure. The study of viscoelastic rheological behavior of polymer melts, concentrated solutions, and the relationship to the processing operations.

ECH 4904r. Undergraduate Research Project in Chemical Engineering (1–3). Prerequisites: CHM 4410, ECH 3101, ECH 3266, ECH 3854, a 3.0 GPA, and instructor permission. Corequisites: ECH 3274L, ECH 3418, and ECH 4267. This course involves the completion of an Honors Undergraduate Research Program (URP) for six hours with a minimum grade of “C”. This program requires independent student research on a topic relevant to biomedical engineering and may be used to satisfy the Chemical Engineering Elective requirement. May be repeated to a maximum of six semester hours.

ECH 4905r. Directed Individual Study (1–3). Prerequisite: Permission of department chair. This is a supervised program of study. May be repeated to a maximum of twelve semester hours.

ECH 4906r. Honors—URP in Chemical Engineering (1–3). Prerequisites: BME 4030, CHM 4410, ECH 3101, ECH 3266, ECH 3854, a 3.2 GPA, and instructor permission. Corequisites: ECH 3274L, ECH 3418, and ECH 4267. This course involves the completion of an Honors Undergraduate Research Program (URP) for six hours with a minimum grade of “C”. This program requires independent student research on a topic relevant to biomedical engineering and may be used to satisfy the Chemical Engineering Elective requirement. May be repeated to a maximum of six semester hours.

ECH 4937r. Special Topics in Chemical Engineering (3). Prerequisites: ECH 3274L, ECH 3418, and ECH 4267. Corequisites: ECH 4404L, ECH 4504, and ECH 4604. This course covers selected topics in chemical engineering with emphasis on contemporary developments in the field. May be repeated within the same term to a maximum of twelve semester hours.

General Engineering

EGS 3032. Engineering Ethics (3). Prerequisite: EGN 1004L. This course introduces the key theories, concepts, principles, and methodology relevant to the development of professional engineering ethics and professional judgment, and the development of a code of professional ethics through written work, class discussion, and case analysis.

Graduate Courses

BME 5066. Biomedical Engineering Ethics (3).
BME 5620. Biophysical Chemistry and Biothermodynamics (3).
BME 5905r. Directed Individual Study (1–3).
BME 5910. Supervised Research (3). (S/U grade only.)
BME 5935r. Biomedical Engineering Seminar (0). (S/U grade only.)
BME 5937r. Special Topics in Biomedical Engineering (3).
BME 6530. NMR and MRI Methods in Biology and Medicine (3).
BME 6938r. Special Topics in Biomedical Engineering (3).
BME 6502. Research Methods in Chemical Engineering (3).
BME 5126. Advanced Chemical Engineering Thermodynamics I (3).
BME 5261. Advanced Transport Phenomena I (3).
BME 5262. Advanced Transport Phenomena II (3).
BME 5526. Advanced Reactor Design (3).
BME 5828. Introduction to Polymer Science and Engineering (3).
BME 5840. Advanced Chemical Engineering Mathematics I (3).
BME 5841. Advanced Chemical Engineering Mathematics II (3).
BME 5852. Advanced Chemical Engineering Computations (3).
BME 5905r. Directed Individual Study (1–3).
BME 5910. Supervised Research (3). (S/U grade only.)
BME 5935r. Special Topics in Chemical Engineering (3).

Department of CHEMISTRY AND BIOCHEMISTRY

COLLEGE OF ARTS AND SCIENCES

Web Page: http://www.chem.fsu.edu/

Chair: Timothy M. Logan; Associate Chairs: Gregory B. Dudley, Mark Kearley, Michael Shatruk; Professors: Alabugin, Cooper, Cross, Dalal, Dudley, Dorsey, Holton, Kroto, Li, Logan, Marshall, Mattoussi, McQuade, Saltiel, Sang, Schlenoff, Steinbock, Stiegemann, Strouse; Associate Professors: Goldsby, Hilinski, Knappenberger, Lattimer, Miller, Roper, Shatruk, Stagg, Yang, Zhu; Assistant Professors: Bleiholder, DePrince, Frederich, Hanson, Hu, Kemenour, Saha; Honors Lecturer: Kearley; Coordinator of General Chemistry Laboratories: Dillon; Coordinator of Organic Laboratories: Profeta; Professors Emeriti: Choppin, Clark, DeTar, Dougherty, Fitch, Jansen, Light, Linder, Mellon, Safron, Schwartz, Sheline, Vickers; Professors Emerita: Gilmer, Hoffman

The Department of Chemistry and Biochemistry offers the undergraduate degrees of Bachelor of Science (BS) and Bachelor of Arts (BA) in chemistry, biochemistry, and chemical science. Students seeking BS or BA degrees in chemistry may major in chemistry or environmental chemistry. Students seeking BS or BA degrees in chemical science may major in chemical science or chemical science/FSU-Teach. Please note that student cannot receive more than one BS or BA degree from the Department of Chemistry and Biochemistry. For example, a student cannot double major in chemistry and biochemistry, due to substantial course overlap between the two majors.

A degree in chemistry or biochemistry is suitable preparation for a variety of career choices, including immediate employment in the chemical, biochemical, environmental, or related industries, or graduate study in chemistry, biochemistry, chemical physics, biophysics, medicine, or other health-related fields. Chemistry majors should take note of the possibility of earning certification by the American Chemical Society in completing their degree requirements. Details of this program are given below. Additional work in mathematics and physics is appropriate for students planning to conduct graduate work in physical chemistry and chemical physics. For those interested in graduate work in biochemistry or biophysics, the baccalaureate degree in biochemistry or the degree in chemistry with electives including BCH 4053, 4054, and selected biology courses is recommended. Students interested in careers in the environmental sciences, ecology and ecosystem management, and environmental toxicology are encouraged to obtain the chemistry degree with a major in environmental chemistry. In every case students should plan their programs in consultation with an academic advisor. Normally students begin taking courses required for the major in the first year, and it is important to consult with a chemistry advisor as early as possible.

The baccalaureate degree in chemical science is offered to meet the needs of those students whose career goals lie outside chemistry but require a strong foundation in science. This program is appropriate, for example, for a student interested in forensic science, medical technology, oceanography, the earth sciences, or health-related sciences, or for students planning a career in business, public policy, or law with an emphasis in science and/or technology. Compared to the other degree programs in this department, chemical science has a smaller core of required courses to which students are expected to add elective work in other areas after consultation with their advisor. Students interested in teaching chemistry in middle school or high school should consider majoring in chemical science/FSU-Teach; the FSU-Teach Program is described below. The chemical science degree is not appropriate for students interested in graduate study in chemistry or closely related disciplines such as biochemistry, environmental chemistry, or marine chemistry, or for students seeking employment in the chemical industry immediately upon graduation.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in chemistry, biochemistry, and chemical science satisfy this requirement by earning a grade of “C-” or higher in CHM 3120L. Undergraduate majors in chemical science/FSU-Teach satisfy this requirement by earning a grade of “C-” or higher in CHM 3120L or ISC 3523C.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at ei-
tner a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

### Chemistry
1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MAC X281
4. MAC X312 or MAC X282
5. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C
6. PHY X048/X048L and PHY X049/X049L, or PHY X048C and PHY X049C, or PHY X053/X053L and PHY X054/X054L, or PHY X053C and PHY X054C

**Note:** The PHY X048/X049 sequence is required for the Bachelor in Science degree; it is an option for the Bachelor in Arts degree. The PHY X053/X054 sequence is not accepted for the Bachelor in Science degree.

### Biochemistry
1. BSC X010/X010L or BSC X010C or BSC X040/X040L or BSC X040C
2. BSC X011/X011L or BSC X011C or BSC X041/X041L
3. CHM X045/X045L or CHM X045C, or CHM X040 and CHM X041
4. CHM X046/X046L or CHM X046C
5. CHM X210/X210L or PHY X048/X048L or PHY X053/X053L
6. CHM X211/X211L or PHY X049/X049L or PHY X054/X054L
7. MAC X312

**Note:** Although MAC X312 is required for the degree, students may be admitted prior to completion of this course

8. MAC X311 or MAC X233 or MAC X253 or MAC X281

### Chemical Science
1. CHM X045/1045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MAC X281
4. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C

### Chemical Science FSU-Teach
1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MAC X281
4. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C
5. SMT X043
6. SMT X053

**Note:** Transfer students will be able to take SMT X043 and SMT X053 when admitted to upper division.

### Honors in the Major
The Department of Chemistry and Biochemistry offers Honors in the Major to encourage students to undertake independent and original research. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin, or the departmental Web site at http://www.chem.fsu.edu.

### FSU-Teach Program in Teaching Chemistry
For those also interested in teaching chemistry in middle school or high school, FSU-Teach is an innovative approach to teacher education that involves a collaboration between scientists, mathematicians, and education faculty at Florida State University. In FSU-Teach, students will acquire knowledge in science or mathematics and the skill and experience needed to be an effective science or math teacher. The program will pay for tuition for the first two courses, and work study positions with scientists, mathematicians and local schools are available. For more information, see the FSU-Teach Web site at http://FSU-Teach.fsu.edu.

### Requirements
Please review all college-wide degree requirements, including the foreign language requirement, summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

The Bachelor of Arts (BA) degree can be obtained by completion of the Bachelor of Science (BS) degree requirements plus additional courses required by the University as set forth in the “Undergraduate Degree Requirements” chapter of this General Bulletin.

Current majors in the Department of Chemistry and Biochemistry are generally discouraged from taking courses required for the major as transient students unless taken over the Summer, in order to meet milestones in their major. All upper-level chemistry courses (i.e. courses at the 3000 or 4000 level) applied toward any of the department’s majors must be taken at Florida State University, unless specifically exempted by the chair by written request. Students planning to transfer to Florida State University, either as a transfer or transient student, should make note of this requirement.

Prospective majors should note the mathematics and physics requirements. To allow optimal flexibility in planning the upper-division programs, fulfillment of the mathematics requirements should be started in the freshman year. Chemistry, biochemistry, and environmental chemistry majors are required to take General Physics A and B (PHY 2048C and PHY 2049C) as preparation for Physical Chemistry I and II (CHM 4410 and CHM 4411). Chemical science majors may meet the physics requirement with either the calculus-based or non-calculus-based (PHY 2053C and PHY 2054C) physics sequence.

The calculus courses required for the chemistry major constitute a minor in mathematics, and no other minor is necessary. The biology courses required for the baccalaureate degree in biochemistry constitute a minor in biological sciences, and no additional minor is necessary. The two courses in calculus (MAC 2311 and MAC 2312) and the two calculus-based physics courses (PHY 2048C and PHY 2049C) required for the environmental chemistry major constitute an interdepartmental minor approved by the Department of Chemistry and Biochemistry. This interdepartmental minor may be used for the chemical science majors who substitute calculus-based physics for the required non-calculus-based physics. Otherwise the baccalaureate degree in chemical science must include a minor of at least twelve semester hours in an approved minor field. No courses used for satisfying liberal studies requirements may also be counted toward the minor.

Final clearance for all majors is made by the Department of Chemistry and Biochemistry. Students graduating must complete an exit survey, without which the department will not approve graduation.

### Academic Performance
No required course in which a student has earned a grade below “C–” may be applied toward any of the degrees in chemistry. Students must also make a “C–” or better in the first semester of a year-sequence course (or obtain the instructor’s permission) to continue the sequence.

A student who has received more than two unsatisfactory grades (U, F, D–, D, D+) in the following courses will not be permitted to graduate with a degree offered by the Department of Chemistry and Biochemistry: CHM 1045, CHM 1045L, CHM 1046, CHM 1046L, CHM 2210, MAC 1105, MAC 1114, MAC 1140, MAC 2311. This rule applies whether these courses are taken at Florida State University or elsewhere, and it includes repeated unsatisfactory grades in the same course.

A student who has received more than five unsatisfactory grades (U, F, D–, D, D+) total in science or mathematics courses (and their prerequisites) required for any major offered by the Department of Chemistry and Biochemistry, taken at Florida State University or elsewhere, including repeated unsatisfactory grades in the same required course, will not be permitted to graduate with a degree in that major.

### Baccalaureate Degree in Chemistry
#### Major in Chemistry
Complete the two-semester sequences in general chemistry (CHM 1045, 1045L, 1046, 1046L, or CHM 1050, 1050L, 1051, 1051L); organic chemistry (CHM 2210, 2211, 2211L); analytical chemistry (CHM 3120, 3120L, 4130, 4130L); physical chemistry (CHM 4410, 4410L, 4411, 4411L); and one semester of inorganic chemistry (CHM 4610) and the associated laboratory (CHM 4610L). Also required are mathematics through calculus III and two semesters

---

2015-16 General Bulletin Undergraduate Edition Florida State University
Chemistry, biochemistry, and chemical science majors cannot double major in chemistry.

**Major in Environmental Chemistry**

Complete the two-semester sequences in general chemistry (CHM 1045, 1045L, 1046, 1046L, or CHM 1050, 1050L, 1051, 1051L); organic chemistry (CHM 2210, 2211, 2211L); analytical chemistry (CHM 3120, 3120L, 4130, 4130L); physical chemistry (CHM 4410, 4410L, 4411, 4411L); and two semesters of advanced work in chemistry of the environment, including some aspects of aquatic, atmospheric, and geological chemistry. Courses that satisfy this requirement include: CHM 4080, CHM 4081, CHM 4905 (three credit hours), CHM 4906 (three credit hours), EOC 4631, GYL 4240, GYL 4780, GYL 4854, and OCC 4002. Also required are mathematics through calculus II, two semesters of calculus-based physics, two semesters of either biology or geology (at least one of these courses must include a lab), and one semester of computer programming, numerical modeling, advanced statistics, or calculus III. Courses that satisfy the computational/statistics requirement include: ISC 3222, ISC 4302, OCC 4060, STA 3032, STA 4102, STA 4321, and MAC 2313. Calculus III is recommended as preparation for physical chemistry. The physics and math requirements should be met before taking physical chemistry. Students may obtain an elective from a list obtained from the environmental chemistry advisor or the departmental Web site. Chemistry, biochemistry, and chemical science majors cannot double major in environmental chemistry.

**American Chemical Society Certification**

Students obtaining the baccalaureate degree in chemistry may obtain certification from the American Chemical Society (ACS). Certification requires completion of the core chemistry curriculum listed above, plus CHC 4053 or BCH 4624 and one additional upper-level chemistry course. Independent research taken as CHM 4905r, Directed Individual Study, or 4906r, Honors Work, may be counted as the upper-level chemistry course, provided that a final report is written by the student and approved by the supervising faculty, and a copy of the report submitted to the Student Affairs Office. Students planning to obtain ACS certified degrees should have their program of studies approved by an advisor in the department.

**Baccalaureate Degree in Biochemistry**

Students must complete the two semester sequences in general chemistry (CHM 1045, 1045L, 1046, 1046L, or CHM 1050, 1050L, 1051, 1051L); organic chemistry (CHM 2210, 2211, 2211L); analytical chemistry (CHM 3120, 3120L, 4130, 4130L); physical chemistry (CHM 4410, 4411); and biochemistry (BCH 4053, 4054) along with one of the following laboratories: physical chemistry (CHM 4410L and 4411L), biochemistry (BCH 4053L), or honors research (CHM 4906r). Mathematics through calculus II and two semesters of calculus-based physics are also required and should be completed before taking physical chemistry. Calculus III is recommended as preparation for physical chemistry. Further, the following biology courses are required: general biology (BSC 2010, 2010L, 2011, 2011L), genetics (PCB 3063), and a biology elective from a list obtained from the biochemistry advisor or the departmental Blackboard site. Chemistry, environmental chemistry, and chemical science majors cannot double major in biochemistry.

**Baccalaureate Degree in Chemical Science**

Students must complete the two-semester sequences in general chemistry (CHM 1045, 1045L, 1046, 1046L, or CHM 1050, 1050L, 1051, 1051L); organic chemistry (CHM 2210, 2211, 2211L); analytical chemistry (CHM 3120, 3120L, 4130, 4130L); physical chemistry (CHM 4410, 4411); and biochemistry (BCH 4053, 4054) along with one of the following laboratories: physical chemistry (CHM 4410L and 4411L), biochemistry (BCH 4053L), or honors research (CHM 4906r). Mathematics through calculus II and two semesters of calculus-based physics are also required and should be completed before taking physical chemistry. Calculus III is recommended as preparation for physical chemistry. Further, the following biology courses are required: general biology (BSC 2010, 2010L, 2011, 2011L), genetics (PCB 3063), and a biology elective from a list obtained from the biochemistry advisor or the departmental Blackboard site. Chemistry, environmental chemistry, and chemical science majors cannot double major in chemical science.

**Major in Chemical Science/FSU-Teach**

Students must complete the two-semester sequences in general chemistry (CHM 1045, 1045L, CHM 1046, CHM 1046L, or CHM 1050, CHM 1050L, CHM 1051, CHM 1051L); organic chemistry (CHM 2210, CHM 2211, CHM 2211L); plus at least one semester of analytical chemistry (CHM 3120, CHM 3120L); physical chemistry (CHM 3400 or both CHM 4410 and CHM 4411); inorganic chemistry (CHM 4610); biochemistry (BCH 3023C or BCH 4053); as well as one or more of the following electives for at least three credit hours: Advanced Analytical Chemistry (CHM 4130), Environmental Chemistry I (CHM 4080), Directed Individual Study (CHM 4905r), or Honors Research (CHM 4906r). Mathematics through calculus I; and a two-semester sequence in physics, either with or without the use of calculus. Chemistry, biochemistry, and environmental chemistry majors must receive permission from the department to double major in Chemical Science/FSU-Teach. Students in the FSU-Teach Program must also complete a Science Teaching major; for more information, see the FSU-Teach Web site at [http://FSU-Teach.fsu.edu](http://FSU-Teach.fsu.edu).

**Suggested Specialized Electives for Chemical Science**

**Medicine**

Students intending to study medicine are advised to satisfy the minimum requirements with BSC 2010, 2010L, 2011, 2011L; PCB 3063; and the four credit hour premedical Human Biochemistry (BCH 4624) course. Vertebrate Physiology (PCB 3743) is recommended elective. Furthermore, calculus II, the calculus-based physics courses, and certain other upper-level biology courses may provide additional preparation for the MCAT and subsequent coursework in medical school. These students should prepare programs of study in consultation with advisors in the Department of Chemistry and Biochemistry and with the College of Medicine.

**Forensic Science**

Students intending to pursue a career in forensic science may choose to major in chemical science with the addition of the following courses: BSC 2010, 2010L, 2011, 2011L and a biochemistry course with lab (BCH 3023C, or BCH 4053 and BCH 4053L). Certain government agencies (e.g. the FBI) may recommend a background in accounting.

**Oceanography**

Students intending to specialize in oceanography are advised to include OCE 4008 in the program of studies, along with selected electives in biological and earth sciences (e.g., GYL 4240; OCC 5050).

**Business**

The baccalaureate degree in chemical science with a minor in business can prepare students for management and marketing positions in the chemical and other technical industries and also provide a strong technical background for students interested in entering programs such as that for the Master of Business Administration (MBA) degree. Suggested minor courses are at least one course each in accounting, management, marketing, and finance and one or more business electives. In addition, courses in economics and behavioral science (satisfying liberal studies social sciences requirement) and in computer programming, statistics, and written composition beyond basic English are recommended. Consult with an advisor in the Department of Chemistry and Biochemistry and with a representative of the College of Business in preparing a specific program.

**Requirements for a Minor in Chemistry**

The requirements for a minor in chemistry include the two-semester sequence in general chemistry (CHM 1045, 1045L, 1046, 1046L, or CHM 1050/1050L, 1051/1051L) and at least one of the following course sequences: CHM 2210–2211, CHM 3120–3120L, CHM 4310–4411. A minimum of twelve semester hours is required. Grades below “C–” will not be accepted for minor credit.

**Advanced Placement in Chemistry**

Students with an Advanced Placement (AP) score of 3 will receive four semester hours of credit in CHM 1020 and 1020L; an AP score of 4 earns the student credit for CHM 1045 and 1045L; an AP score of 5 earns the student credit for CHM 1045, 1045L, 1046, and 1046L. Students with an AP score of 3 are eligible to take a departmental placement exam for CHM 1045 and 1045L.

**International Baccalaureate Diploma**

International Baccalaureate (IB) diploma holders with a score of 4 will receive three semester hours of credit in CHM 1020. Those with a score of 5 or higher will earn credit for CHM 1020 (two hours) and 1045/1045L (four hours).

**Policy on Reduced Credit**

Students may register for reduced credit if CHM 102 is taken after passing CHM 101 or CHM 104 is taken after passing CHM 102, or if CHM 1045 is taken after passing CHM 1032, as indicated in the following table:
Sequence of Lecture Courses | Semester Hours Awarded for Each Course
--- | ---
CHM 1020, CHM 1032, CHM 1045 | 3 3 3
CHM 1020 only | 3
CHM 1032 only | 3
CHM 1045 only | 3
CHM 1020, then 1032 | 3 2
CHM 1020, then 1045 | 3 2 1
CHM 1020, then 1045, then 1045L | 3 2 1
CHM 1032, then 1045, then 1045L | 3 2

* Students seeking admission to professional programs such as medicine or pharmacy should not take courses for reduced credit.

**Note:** CHM 1020 and 1032 are not preparatory courses for CHM 1045 and should not normally be taken prior to beginning the general chemistry sequence.

**Definition of Prefixes**

**BCH**—Biochemistry (Biophysics)

**CHM**—Chemistry

**ISC**—Interdisciplinary Sciences

**PSC**—Physical Sciences

**SCE**—Science Education

**Undergraduate Courses**

**General Chemistry**

**CHM 1020. Chemistry for Liberal Studies (3).** This course introduces basic chemical principles without an extensive use of mathematics and illustrates with applications in health, energy, and the environment. This course strives to show chemistry as a human endeavor that provides insight into the natural world and informs our decisions as citizens and consumers. Specific topics vary by semester. Designed as a course for students who wish to fulfill the liberal studies science requirement with chemistry and will take no further chemistry courses, but as a preparatory course for CHM 1045. Credit is not allowed for CHM 1020 after taking CHM 1032, 1045, or equivalent.

**CHM 1025C. Chemistry for Liberal Studies (4).** This course introduces basic chemical principles without an extensive use of mathematics and illustrates with applications in health, energy, and the environment. The course strives to show chemistry as a human endeavor that provides insight into the natural world and informs our decisions as citizens and consumers. Specific topics vary by semester. Designed as a course for students who wish to fulfill the liberal studies science requirement with chemistry and will take no further chemistry courses, but as a preparatory course for CHM 1045. Credit is not allowed for CHM 1020 after taking CHM 1032, 1045, or equivalent.

**CHM 1020L. Chemistry for Liberal Studies Laboratory (1).** Pre- or corequisite: CHM 1020. This laboratory emphasizes major topics from CHM 1020 relating chemistry concepts and techniques to everyday life experiences. This laboratory-based course meets two hours a week. No credit allowed after taking CHM 1045.

**CHM 1032. Survey of General Chemistry (3).** Prerequisite: MAC 1105 with a grade of "C–" or better or placement beyond MAC 1105. Lecture, three hours; recitation, one hour. This lecture-based course is the first course in general chemistry for students in nursing, nutrition and fitness, and other areas requiring a short course leading to CHM 2200. Students taking CHM 1032 after taking CHM 1020 may register for reduced credit; see Policy on Reduced Credit.

**CHM 1045. General Chemistry I (3).** Prerequisite: MAC 1105 with a grade of "C–" or better or placement beyond MAC 1105. This course includes topics such as chemical symbols, formulas, and equations; states of matter; reactivity in aqueous solution; electronic structure, bonding, and molecular geometry. Students taking CHM 1045 after taking CHM 1020 and/or CHM 1032 may register for reduced credit, as indicated in the department’s policy on reduced credit.

**CHM 1045L. General Chemistry I Laboratory (1).** Prerequisite: MAC 1105 with a grade of "C–" or higher or placement beyond MAC 1105. Corequisite: CHM 1045. This laboratory offers an introduction to quantitative techniques and to the chemical laboratory. Topics include stoichiometry, atomic spectra, gases, as well as acids and bases.

**CHM 1046. General Chemistry II (3).** Prerequisites: CHM 1045 and CHM 1045L or CHM 1050 and CHM 1050L, each with a grade "C–" or better. This course includes topics such as intermolecular forces, chemical kinetic, equilibrium, acids and bases, elementary thermodynamics, and electrochemistry.

**CHM 1046L. General Chemistry II Laboratory (1).** Prerequisites: CHM 1045 and CHM 1045L or CHM 1050 and CHM 1050L. Corequisite: CHM 1046. This laboratory offers an introduction to quantitative techniques and to the chemical laboratory. Topics include intermolecular forces, solutions, kinetics, equilibria, acids and bases, buffers, solubility, thermodynamics and electrochemistry.

**CHM 1050. Honors General Chemistry I (3).** Prerequisite: MAC 1105 with a grade of "C–" or better or placement beyond MAC 1105. Corequisite: CHM 1050L. This course is a first general chemistry course for honors students. Topics include kinetic theory, atomic theory of matter, atomic structure and the periodic chart, condensed phases, introductory chemical bonding.

**CHM 1050L. Honors General Chemistry I Laboratory (1).** Prerequisite: MAC 1105 with a grade of "C–" or higher or placement beyond MAC 1105. Corequisite: CHM 1050. This laboratory is an introduction or quantitative laboratory in chemical laboratory. Topics include stoichiometry, atomic spectra, thermodynamics, gases, as well as acids and bases, chemical structures and reactivity.

**CHM 1051. Honors General Chemistry II (3).** Prerequisites: CHM 1050 and CHM 1050L, each with a grade of "C–" or better, or CHM 1045 and CHM 1045L, each with a grade of "C–" or better and instructor permission. Corequisite: CHM 1051L. This course is a continuation of general chemistry for honors students. Topics include solution equilibria; acid-base chemistry; oxidation, reduction, and electrolytical solutions; chemical analysis; hydrides and oxides of the elements; kinetics; advanced bonding and structure.

**CHM 1051L. Honors General Chemistry II Laboratory (2).** Prerequisites: CHM 1050 and CHM 1050L, each with a grade of "C–" or better. Corequisite: CHM 1051. This laboratory is an opportunity for research-based special projects.

**CHM 3930r. Special Topics in Chemistry (1–4).** May be repeated to a maximum of four semester hours.

**CHM 4090L. Science Glassblowing (1).** This course is laboratory instruction of fundamental glassblowing techniques of greatest utility to the experimental scientist who may require custom glassware.

**CHM 4095r. Directed Individual Study (3).** Prerequisites: Upper class standing, "B" average in chemistry courses, and approval of the faculty supervisor. May be repeated to a maximum of eighteen semester hours.

**CHM 4096r. Honors Work (1–6).** This course is for Honors in the major work only. May be repeated to a maximum of nine hours.

**ISCC 3076. Science, Technology, and Society (3).** Prerequisite: Junior standing or instructor permission. This course examines interrelations among science, technology, and society. Science is considered as an enterprise in modern society that produces technological advances and new perspectives on reality. This course cannot be used as credit toward a major or a minor in a science department.

**PSC 2801C. Physical Science for EC/EE Teachers (4).** This course is designed for prospective elementary and early childhood education majors. The course integrates physics and chemistry. The course includes laboratory exercises. Students will work in groups in a hands-on, minds-on approach to learning physical science.

**SCE 4939r. Seminar in Contemporary Science, Mathematics, and Science Education (1).** This course includes presentations of contemporary and interesting issues in science, mathematics, or teaching methods. Content varies from semester to semester. May be repeated to a maximum of four semester hours.

**Analytical Chemistry**

**CHM 3120. Analytical Chemistry I (3).** Prerequisite: CHM 1046 and CHM 1046L, each with a grade of "C–" or better. This first course in analytical chemistry covers statistical analysis, analytical data, acid-base equilibria, acid-base and titrations, electrochemistry, analytical separations, as well as atomic and molecular optical spectroscopy.

**CHM 3120L. Analytical Chemistry I Laboratory (1).** Corequisite: CHM 3120. This course is the laboratory portion of Analytical Chemistry I. Experiments include: potentiometric titration of acid mixtures, spectrophotometric determination of pH, spectrophotometric determination of iron in drinking water, determination of uranium by flame emission, fluoride ion-selective electrodes, copper in metal alloys by liquid-liquid extraction, and quantitative analysis of hydrocarbons by gas chromatography.

**CHM 4080. Environmental Chemistry I (3).** Prerequisites: CHM 1046, CHM 1046L, and CHM 3120, each with a grade of "C–" or better. This course focuses on the application of applications to environmental problems. Topics include: an evaluation of contaminants in surface and ground water; hydrocarbon geochemistry and petroleum contamination; waste management, including solid, toxic and nuclear waste; air quality issues, including radon and asbestos; geologic hazards in upland and coastal areas; environmental methods and instrumentation, quality assurance and quality control in environmental analysis; principles of toxicology; risk assessment and risk management.

**CHM 4081. Environmental Chemistry II (3).** Prerequisite: CHM 2211 with a grade of "C–" or better. This course studies the organic geochemistry of natural waters and sediments. It offers an overview of the sources of organic matter in aquatic systems, the important reactions and transport mechanisms that control the biochemical cycling of organic carbon in these systems, and the impact of naturally-occurring organic carbon on environmental and ecological processes. Attention is also devoted to anthropogenic (human-made) organic molecules. It also discusses how analytical techniques such as carbon-14 NMR, mass spectrometry, and capillary electrophoresis provide useful organic geochemical information.

**CHM 4130. Advanced Analytical Chemistry (3).** Prerequisites: CHM 3120 and CHM 3120L, each with a grade of "C–" or better, as well as PHY 2045C or PHY 2053C with a grade of "C–" or better. Corequisite: CHM 4410. This course covers data analysis, laboratory computers, atomic and molecular optical spectroscopy, nuclear-magnetic resonance spectroscopy, chromatography and electrophoresis, electrochemistry, and mass spectrometry.

**CHM 4130L. Advanced Analytical Chemistry Laboratory (1).** Corequisite: CHM 4130 and CHM 4130L. This course is the laboratory portion of CHM 4130, Advanced Analytical Chemistry. Experiments include: signal enhancement by filtering and ensemble averaging, flame spectroscopy determination of Li and Mg, spectrofluorometric determination of quinine, UV-visible spectroscopy, high-performance liquid chromatography (HPLC) simulations, Raman spectroscopy, solvent extraction and gas chromatography, as well as HPLC determination of analogues. It is recommended that students complete CHM 4130 with a grade of "C–" or better before taking CHM 4130L, although the courses can be taken simultaneously.
Biochemistry

BCH 3023. Survey of Biochemistry (3). Prerequisite: CHM 2200 or CHM 2211. Corequisite: BCH 3023L. This course is designed to provide a survey of biochemistry topics relevant to those in the allied health and pre-medicine fields of study.

BCH 3025. Introduction to Biochemistry (3). Prerequisites: CHM 2200 and CHM 2200L, both with a grade of “C–” or better, or CHM 2211 and CHM 2211L both with a grade of “C–” or better. This course is a survey of modern biochemistry with special emphasis on those concepts that might be of use to nutrition and food scientists.

Inorganic Chemistry

CHM 4610. Inorganic Chemistry (3). Prerequisites: CHM 2211 and CHM 2211L, each with a grade of “C–” or better. Corequisite: CHM 4410 or instructor permission. This course explores physical principles, systematics in the chemistry of periodic groups, descriptive chemistry of the inorganic elements. Topics include atomic structure and the periodic classification of the elements, chemical bonding and reactivity, acid-base chemistry, chemistry of main group elements, and coordination chemistry of the transitional metal elements.

Materials Chemistry

CHM 4714. Chemistry of Materials (3). Prerequisites: CHM 1045 and CHM 1045L and CHM 2210 or CHM 2211; or instructor permission. This course is an introduction to materials chemistry, focusing on the structure, properties, and functional applications of molecular materials, polymers, glasses and ceramics, metals and alloys, and bio- and nanomaterials.

Organic Chemistry

CHM 2200. Survey of Organic Chemistry (3). Prerequisites: CHM 1045 and CHM 1045L and CHM 1046 and CHM 1046L, each with a grade of “C–” or better. This course is a one-semester survey of organic chemistry intended for students in nutrition and fitness (fitness option), or for students needing an overview of organic compounds, functional groups, and reactions.

CHM 2211. Organic Chemistry I (3). Prerequisite: CHM 1046 and CHM 1046L, each with a grade of “C–” or better. Students who complete CHM 1045 or CHM 1050 with a grade of “B” or better and have instructor permission may take this course simultaneously with either CHM 1046 or CHM 1051. This course is the first in a sequence of courses for chemistry majors, premedicine students, biologists, or any other majors requiring a good background in organic chemistry, this course covers the fundamentals of structure and chemical behavior skills is recommended.

Physical Chemistry

CHM 3400. General Physical Chemistry (4). Prerequisites: CHM 1046, CHM 1046L, and MAC 2311, each with a grade of “C–” or better. This course focuses on an elementary treatment of general physical chemistry, including thermodynamics, equilibrium, electro motive force, kinetics, atomic structure, and an introduction to quantum theory. For the chemical science major and interested nonmajors.

CHM 4410. Physical Chemistry I (3). Prerequisites: CHM 1045 and CHM 1045L with a grade of “C–” or better or instructor permission; MAC 2312 with a grade of “C–” or better; MAC 2313 with a grade of “C–” or better recommended. Corequisite: PHY 2049C. This course covers thermodynamics, kinetic theory of gases, reaction kinetics, as well as introductions to quantum mechanics and to statistical mechanics.

CHM 4410L. Physicochemical Measurements and Techniques I (1). Corequisite: CHM 4410. Before attempting this course satisfaction of the University’s requirement for computer skills is recommended.

Graduate Courses

Analytical Chemistry

CHM 5086. Environmental Chemistry I (3).

CHM 5087. Environmental Chemistry II (3).

CHM 5138. Mass Spectrometry (3).

CHM 5140. Introduction to Chemical Instrumentation (3).

CHM 5151. Optical Methods of Chemical Analysis (3).

CHM 5153. Electrochemistry (3).

CHM 5154. Chemical Separations (3).

CHM 5180r. Special Topics in Analytical Chemistry (1–3).

CHM 5454. Polymer Characterization (3).

CHM 6190r. Analytical Chemistry Seminar I (1).

CHM 6191r. Analytical Chemistry Seminar I (1). (S/U grade only.)

Biochemistry

BCH 5405. Molecular Biology (3).

BCH 5505. Structure and Function of Enzymes (3).

BCH 5745. Chemical and Physical Characterization of Biopolymers (3).

BCH 5884. Programming for Chemists and Biochemists (3).

BCH 5886r. Special Topics in Biochemistry and Cell Biology (1–3).

BCH 5887r. Special Topics in Biochemistry and Cell Biology (1–3).

BCH 6896r. Biochemistry Seminar I (1).

BCH 6897r. Biochemistry Seminar I (1). (S/U grade only.)

CHM 5506. Physical Chemistry of Macromolecules I (3).

CHM 5507. Physical Chemistry of Macromolecules II (3).

Inorganic Chemistry

CHM 5442. Kinetics and Mechanisms (3).

CHM 5620. Principles of Inorganic Chemistry (3).

CHM 5680r. Current Topics in Inorganic Chemistry (1–3).

CHM 5681r. Current Topics in Inorganic Chemistry (1–3).

CHM 6690r. Inorganic Chemistry Seminar I (1).

CHM 6691r. Inorganic Chemistry Seminar I (1). (S/U grade only.)

Materials Chemistry

CHM 5715r. Topics in Materials Chemistry I (1).

CHM 5716r. Characterization of Materials I (1).

CHM 5717r. Characterization of Materials II (1).

CHM 5718r. Topics in Materials Chemistry II (1).

CHM 6936r. Materials Chemistry Seminar I (1). (S/U grade only.)

CHM 6937r. Materials Chemistry Seminar II (1).

Organic Chemistry

CHM 5245. Physical Organic Chemistry (3).

CHM 5250. Advanced Organic Synthesis (3).

CHM 5530. Graduate Survey of Organic Chemistry (3).

CHM 5508r. Special Topics in Organic Chemistry (1–3).

CHM 6390r. Organic Chemistry Seminar I (1). (S/U grade only.)

Physical Chemistry

CHM 5440. Physical and Chemical Kinetics (3).
Department of CIVIL AND ENVIRONMENTAL ENGINEERING

FAMU–FSU COLLEGE OF ENGINEERING
Web Page: http://www.eng.fsu.edu/cee/
Chair: Kamal S. Tawfiq; Professors: Abichou, Huang, Moses, Mtenga, Ping, Spainhour, Sobanjo, Tawfiq; Associate Professors: AbdelRazig, Chan Hilton, Chen, Clark, Jung, Rambo-Roddenberry; Assistant Professors: Grayson, Ozguven, Tang; Associates in Civil Engineering: Adalier, Ahmad; Assistant in Civil Engineering: Pamuk

The Department of Civil and Environmental Engineering has the mission of teaching the fundamentals of civil engineering science, analysis, design, and management to empower students to assume careers as professional engineers, to conduct basic and applied research, to impel the state of knowledge of civil engineering, to serve as a source of information and advice to the community on engineering matters, and to assist in the continuing education of professional engineers and other interested individuals. The department has a special mission to provide an opportunity for a civil engineering education for minorities and women.

Opportunities and Facilities

Many opportunities exist in the field of civil engineering that encompass planning, designing, and managing a variety of projects. Your work could be on site at a project or at a computer workstation. Civil and environmental engineers often find themselves involved in many of the public work projects funded by federal, state, and municipal governments, as well as those projects undertaken by the private sector. As a structural engineer, you might analyze and design structures out of steel, concrete, aluminum, timber, plastic, and other new materials that are able to support required loads and withstand natural disasters. An environmental engineer, with a background in either physical, chemical, or biological science, helps to prevent and solve environmental problems. Engineers in the geotechnical realm apply technology, field test information, and laboratory analyses related to mechanics and mathematics to create the infrastructure facilities within and on top of the earth. The structure and stability of soils determine how and where to construct tunnels, pipelines, and deep foundations as well as highways and other buildings. In hydraulic and water resources engineering, you might design, construct, or maintain facilities related to the quality and quantity of water, flood prevention, wastewater treatment, and water front erosion protection. As a professional in transportation engineering, your purpose is to move people and things in a safe and efficient manner locally and through mass transportation systems. Transportation facilities include highways, airfields, railroads, and sea ports. Several courses are also offered in construction engineering.

Instructional equipment includes the MTS structures and material testing systems with computer control for data acquisition and analysis, triaxial, CBR, LBR, and shear testing equipment and seismographs for in situ and laboratory measurements of engineering properties of soils and rocks; and a self-contained glass-sided tilting flume for investigations of flow phenomena and sediment transport. A complete stand-alone automated data acquisition and analysis system is available for undergraduate student laboratory work and research. A fully equipped water quality testing lab as well as portable field testing kits are used both for classroom teaching as well as for student research and design projects.

Students have access to a large number and variety of computer systems. A network of nearly 700 computing devices is available for the academic and research efforts of the college. The department houses the Crashworthiness and Impact Analysis Laboratory, which is a well-equipped state-of-the-art, high-performance computing environment for the pursuit of transportation-related research. This advanced computing environment is available primarily to graduate students working as research assistants with departmental faculty. The college computers are connected to a high-speed, switched, fiber-optic LAN and to the Internet via the Florida State University connection to the NSF v BNS network. Other nearby resources include the Department of Scientific Computing. Additional information about the department can be obtained from the college home page: http://www.eng.fsu.edu.

Programs Offered

The department offers a program of study for the Bachelor of Science (BS) in civil engineering which is accredited by ABET, Inc, 111 Market Place, Suite 1050, Baltimore, MD 21202-4012, phone (414) 771-7700. The civil engineering major is broad-based, emphasizing all aspects of civil engineering practice, including structural geotechnical, construction, transportation, hydraulics, water resources, and environmental engineering. Within the civil en-

CHILD DEVELOPMENT: see Family and Child Sciences

CHILDHOOD EDUCATION: see Childhood Education, Reading, and Disability Services

CHINESE: see Asian Studies; Modern Languages and Linguistics
gineering program, the environmental engineering major is a course of study that focuses primarily on environmental engineering, hydraulics, hydrology, water resources, and water quality.

The department also offers a minor in environmental engineering science. Regardless of focus, all students learn to apply state-of-the-art technologies to solve problems in these areas.

The department offers graduate programs leading to the Master of Science (MS) and Doctor of Philosophy (PhD) degrees in civil engineering. Within the MS program, the Master of Engineering (MEng) option is available. These programs provide areas of concentration in structural, geotechnical, environmental/water resources, and construction/transportation engineering.

In order to be admitted to the Master of Science (MS) program, a student must have a bachelor’s degree in civil engineering, a 3.0 grade point average (GPA) in the last two years of undergraduate school, and minimum graduate record examination (GRE) percentile ranks of 25% (score of 144) on the verbal reasoning section and a 65% (score of 153) on the quantitative section. For valid GRE tests taken prior to August 2011, minimum of 370 on the verbal reasoning and 680 on the quantitative reasoning section is required. For the MEng option, evidence of passing the NCEES Fundamentals of Engineering (FE) or Principles and Practice of Engineering (PE) exam or holding PE licensure may be used in lieu of the GRE. Exceptions may be granted where other evidence indicates an ability to perform satisfactory graduate work. A student without a bachelor’s degree in civil engineering may be required to complete undergraduate engineering articulation courses prior to attempting more advanced work. Admission to the doctoral program requires possession of a master’s degree in civil or environmental engineering or a closely allied academic discipline from an accredited college or university, good standing in the academic institution last attended, evidence of a 3.0 GPA on a 4.0 scale as an upper level undergraduate or graduate student, and minimum graduate record examination (GRE) percentile ranks of 55% (score of 147) on the verbal reasoning section and 70% (score of 155) on the quantitative section. For valid GRE tests taken prior to August 2011, minimum of 410 on the verbal reasoning section and 710 on the quantitative reasoning section is required. Exceptional applicants with a BS degree may be admitted to the Doctor of Philosophy (PhD) program, provided they complete an MS degree in the department before obtaining the PhD degree. For more details, refer to the Graduate Bulletin.

Note: Effective August 2011, the GRE Revised General Test replaced the GRE General Test. To learn more about this new test, go to http://www.ets.org/gre.

Mission

The mission of the Department of Civil and Environmental Engineering is to teach the fundamentals of civil engineering science, analysis, design, and management in order to empower students to assume careers and professional engineering; to conduct basic and applied research, in order to improve the state of knowledge of civil engineering, to serve as a source of information and advice to the community on engineering matters; and to assist in the continuing education of professional engineers and other interested individuals. The department has a special mission to provide an opportunity for a civil engineering education for under-represented groups in the profession.

Program Educational Objectives

Consistent with the mission and goals of the FAMU-FSU College of Engineering and based upon the input and needs of its constituents, the Civil Engineering Program will produce graduates who will achieve the following program educational objectives several years after graduation. Graduates will:

1. Progress in successful professional careers in civil and environmental or related engineering fields and/or enroll in studies at the graduate level;
2. Engage in problem solving and the application of engineering principles to address the needs of society, including sustainability and to practice effective management, communication, and leadership skills;
3. Respond to the rapid pace of change in civil and environmental engineering by becoming professionally licensed, engaging in ongoing education, and participating in professional society activities; and
4. Contribute to work force diversity as members and leaders of multidisciplinary teams.

Student Learning Outcomes

By the time students graduate from the Civil Engineering program, they should attain the following outcomes:

1. An ability to apply knowledge of mathematics through differential equations, science (including calculus-based physics, general chemistry, and one additional area of science), and engineering;
2. An ability to design and conduct civil engineering experiments, as well as to analyze and interpret the resulting data;
3. An ability to design systems, components, or processes in more than one civil engineering context to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. An ability to function on multidisciplinary teams;
5. An ability to identify, formulate, and solve civil engineering problems;
6. An understanding of professional and ethical responsibility, and an ability to explain basic concepts in management, business, public policy, and leadership as well as the importance of professional licensure;
7. An ability to communicate effectively;
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. A recognition of the need for and ability to engage in lifelong learning;
10. A knowledge of contemporary issues; and
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Engineering Design

Following engineering design criteria established by ABET, the civil engineering curricula provide excellent design experiences for students. The faculty of the Department of Civil and Environmental Engineering has carefully integrated design components into the curriculum with increased complexity as students progress toward graduation. These design components offer opportunities for students to work individually and in teams on meaningful engineering design experiences building upon the fundamental concepts of mathematics, basic sciences, humanities, social sciences, engineering topics, and oral and written communication skills. Design components in engineering coursework help students develop an appreciation for and apply the knowledge of the wide variety of courses they have studied. Consequently, they participate in meaningful solutions and effective design development for practical engineering problems.

A majority of the design experiences are integrated into junior and senior level courses. For example, design experience is expanded in the structures area of the civil engineering curriculum when students have completed EGM 3512, Engineering Mechanics, and progress to EGN 3331, Strength of Materials, then to CES 3100, Structural Analysis. Students are exposed to extensive design experiences in CES 4702, Concrete Design, or CES 4605, Steel Design.

A major in environmental engineering includes ENV 4001, Environmental Engineering, which builds on material covered in EES 3040, Introduction to Environmental Engineering Science, and CWR 3201, Hydrologists, and is followed by a series of technical and design courses in specific areas of water and wastewater treatment, remediation, hydrology, and hydraulics.

In both majors, CGN 4800, Pre-Senior Design and Professional Issues, and CGN 4802, Senior Design Project, provide significant, culminating design experiences in which students working in interdisciplinary teams apply realistic constraints to an actual engineering situation.

Additional information about design credits may be obtained from departmental brochures and by contacting faculty advisors at the Department of Civil and Environmental Engineering.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in civil and environmental engineering satisfy this requirement by earning a grade of “C” or higher in CEG 2202L, Introduction to Geomatics Engineering Lab.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted to the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flspo.org/college-common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. MAC X311 or MAC X281
2. MAC X312 or MAC X282
3. MAC X313 or MAC X283
4. MAP X302 or MAP X305
5. CHM X045/X045L or CHM X045C, or CHS X440/X440L
6. PHY X048/X048L or PHY X048C, or PHY X043 and PHY X048L
7. PHY X049/X049L or PHY X049C, or PHY X044 and PHY X049L

Requirements for the Bachelor of Science in Civil Engineering: Civil Engineering Major

In addition to college requirements, a candidate for the BS degree in civil engineering will be expected to successfully complete the following requirements:

Mathematics and Basic Engineering Sciences

- CEG 2202 Introduction to Geomatics Engineering (3)
- CEG 2202L Introduction to Geomatics Engineering Lab (1)
- EGM 3512 Engineering Mechanics (4)
- EGN 1004L First Year Engineering Lab (1)
- EGN 2123 Computer Graphics for Engineers (2)
- EGN 3331 Strength of Materials (3)
- EGN 3613 Principles of Engineering Economy (2)
- EML 3003 Introduction to Electrical Engineering (3)
- STA 2122 Introduction to Applied Statistics (3) OR STA 3032 Applied Statistics for Engineers and Scientists (3)

**Group A Science Elective:** An additional three-credit hour science elective course is required to allow students to develop increased breadth in the basic sciences, while completing existing curricular requirements. Students should select one course from the following group.

- BSC 2010 Biological Science (3)
- GLY 1030 Environmental Issues in Geology (3)
- GLY 2010C Physical Geology (4)
- MET 2700 General Meteorology (3)
- PCB 3043 General Ecology (3)
- OCE 4008 Principles of Oceanography (3)

Civil Engineering Core Courses

- CCE 3101 Construction Materials (3)
- CEG 3011 Soil Mechanics (3)
- CES 3100 Structural Analysis (4)
- CGN 3508L Civil Engineering Materials Laboratory (1)
- CWR 3200L Environmental and Hydraulic Engineering Laboratory (1)
- CWR 3201 Hydraulics (3)
- EES 3040 Introduction to Environmental Engineering (3)
- TTE 3004 Transportation Engineering (3)

Civil Engineering Design and Professional Courses

Students must take the courses in the following areas plus three additional electives* for a total of twenty-one hours credit. To meet the requirement, students may select elective courses (as indicated below) to specialize their degree program to suit their individual objectives.

**Structures:**

- CES 4605 Steel Design (3) OR CES 4702 Concrete Design (3)

**Geotechnical:**

- CEG 4801 Geotechnical Design (3) OR CEG 4111 Foundations Engineering (3)

**Construction/Transportation:**

- CCE 4XXX Construction elective (3) OR TTE 4XXX Transportation elective (3)

**Environmental/Water Resources:**

- ENV 4001 Environmental Engineering (3) OR CWR 4XXX Hydraulics, Hydrology, or Water Resources elective (3)

Additional Electives

- Group B Elective 1* (3)
- Group B Elective 2* (3)
- Group C Elective 1** (3)

*Group B Engineering/Math/Science Elective: Any 4000-level course offered by the Department of Civil and Environmental Engineering that isn’t being used to meet another requirement can be used to meet this requirement OR specified 3000- or 4000-level courses selected from engineering, math, or science departments at the university. See department for details.

**Group C Professional/Technical Elective: A course outside of the CEE department emphasizing professional development, computing, and other professional/technical skills.

Major Design Experience

- CGN 4800 Pre-senior Design and Professional Issues (2)
- CGN 4802 Senior Design Project (3)

Requirements for the Bachelor of Science in Civil Engineering: Environmental Engineering Major

In addition to college requirements, a candidate for the Bachelor of Science (BS) degree in civil engineering with a major in environmental engineering will be expected to successfully complete the following course requirements.

Mathematics and Basic Engineering Sciences

- CEG 2202 Introduction to Geomatics Engineering (3)
- CEG 2202L Introduction to Geomatics Engineering Lab (1)
- CHM 1046/L General Chemistry II/Laboratory (4) OR MCB 2004/L Microbiology for Health Services/Laboratory (4)
- EGM 3512 Engineering Mechanics (4)
- EGN 1004L First Year Engineering Lab (1)
- EGN 2123 Computer Graphics for Engineers (2)
- EGN 3331 Strength of Materials (3)
- EGN 3613 Principles of Engineering Economy (2)
- EEL 3003 Introduction to Electrical Engineering (3)
- EML 3100 Thermodynamics (2)
- STA 2122 Introduction to Applied Statistics (3) OR STA 3032 Applied Statistics for Engineers and Scientists (3)

**Group A Science Elective:** An additional three-credit hour science elective course is required to allow students to develop increased breadth in the basic sciences, while completing existing curricular requirements. Students should select one course from the following group.

- BSC 2010 Biological Science (3)
- GLY 1030 Environmental Issues in Geology (3)
- GLY 2010C Physical Geology (4)
- MET 2700 General Meteorology (3)
- PCB 3043 General Ecology (3)
- OCE 4008 Principles of Oceanography (3)

Environmental Engineering Core Courses

- CCE 3101 Construction Materials (3)
- CEG 3011 Soil Mechanics (3)
- CES 3100 Structural Analysis (4)
- CGN 3508L Civil Engineering Materials Laboratory (1)
- CWR 3200L Environmental and Hydraulic Engineering Laboratory (1)
- CWR 3201 Hydraulics (3)
- EES 3040 Introduction to Environmental Engineering (3)
- TTE 3004 Transportation Engineering (3)

Environmental Engineering Design and Professional Courses

Students are required to take courses in the following areas plus three additional electives* for a total of twenty-one credit hours. To meet the requirement, students may select elective courses (as indicated below) to specialize their degree program to suit their individual objectives.

**Environmental:**

- ENV 4001 Environmental Engineering (3)

**Water Resources:**

- CWR 4XXX Water Resources, Hydraulics or Hydrology elective (3)

**Geotechnical:**

- CEG 4801 Geotechnical Design (3) OR CEG 4111 Foundations Engineering (3)

**Construction/Transportation:**

- TTE 4XXX Transportation elective (3) OR CCE 4XXX Construction elective (3)

Additional Electives

- Group B Elective 1* (3)
- Group B Elective 2* (3)
Group C Elective **(3)**

*Group B Engineering/Math/Science Elective: Any 4000-level course offered by the Department of Civil and Environmental Engineering that is not being used to meet another requirement can be used to meet this requirement OR 3000- or 4000-level courses selected from engineering, math, or science departments at the university. See department for details.

**Group C Professional/Technical Elective: A course outside of the CEE department emphasizing professional development, computing, and other professional/technical skills.

**Major Design Experience**

- CGN 4800 Pre-senior Design and Professional Issues (2)
- CGN 4802 Senior Design Project (3)

**Department Policies**

Pre-Engineering students must adhere to the policies set by the College of Engineering, including standards on declaring Civil Engineering as a major. Students must achieve a grade of “C–” or better in all transfer courses and in all courses that are prerequisites to any required or elective engineering course. In addition, students are required to earn a “C–” or better in all engineering, mathematics, and science courses without any waiver.

**Pre/Co-requisite Course Policy**

It is the policy of Department of Civil and Environmental Engineering that a student must receive grades of “C–” or better in all prerequisite courses prior to enrolling in a CEE course. Concurrent registration in a course and its prerequisites is not allowed. All prerequisites of the prerequisite course must be completed. Failure to abide by this policy can result in the cancellation of your enrollment in any course at any time during the semester and with no refund of fees. Corequisite courses must be taken concurrently or prior to enrolling in the course. Registering for and remaining in a course without having completed all of the pre- and corequisite courses as well as all their prerequisites can result in the Department or the College of Engineering administratively canceling your course enrollment at any time during the semester and with no refund of fees.

**Course Repeat Policy**

**Criteria**

A student in the Department of Civil and Environmental Engineering will be placed on probationary status if the student falls into any of the following situations:

- Accrues two grades below “C–” in a single engineering course that is required under his/her curriculum, or in MAC 2313/3313, MAP 3305/2302, or PHY 2049/3049
- Accrues a total of three grades below “C–” in engineering courses that are required under his/her curriculum, MAC 2313/3313, MAP 3305/2302, and PHY 2049/3049.
- Has an overall GPA below 2.0

**Consequences**

A student who meets the above criteria will be placed on academic probation during the subsequent semester and will be required to sign an academic probation/readmit contract with the department. A student may not graduate while on probation.

**Reinstatement**

To be reinstated, the following conditions must be met:

- The student will have one semester (the probationary semester) to raise his/her GPA above 2.0
- The student must retake all courses that were the cause for probation according to an agreed upon schedule (during the probationary semester, if available) and achieve a grade of “C–” or better.

**Dismissal**

A student on probation will be permanently dismissed from the CEE program and will not be eligible for further reinstatement upon the following conditions:

- If a student who is on probation does not raise his/her GPA above 2.0 and/or achieve a grade of “C–” or better in all courses taken during the probationary semester.
- If a student who has been reinstated to the program subsequently falls below an overall GPA of 2.0 and/or fails to achieve a grade of “C–” or better in any math, science, or engineering course.

A student who has already reached or exceeded the course repeat limits stated above prior to declaring the civil or environmental major is considered to be on reinstatement, and must achieve a grade of “C–” or better in all subsequent courses to avoid permanent dismissal.

**Fundamentals of Engineering Exam**

All undergraduate students are encouraged to take the Fundamentals of Engineering (FE) exam in the civil engineering discipline during their senior year.

**Oral Communication Competency**

If a grade of “C–” or better is earned in the following two courses, the Oral Communication Competency requirement as defined in the “Undergraduate Degree Requirements” section of this General Bulletin will be satisfied. If the oral communication competency requirement of either course is not met, the student will not earn an overall grade of “C–” or better in the course, regardless of how well the student performs in the remaining portions of the course.

- CGN 4800 Pre-Senior Design and Professional Issues
- CGN 4802 Senior Design Project

**Honors in the Major**

The Department of Civil and Environmental Engineering offers Honors in the Major to encourage students to undertake independent and original research to enhance their undergraduate experience. For more information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

**Requirements for a Minor in Environmental Engineering Science**

A minor in environmental engineering science requires a minimum of twelve semester hours of coursework in environmental engineering, including EES 3040 and ENV 4001 plus six additional hours in courses with prefixes EES or ENV at the 3000 level or above, with no more than one of the following courses counting towards the minor: ENV 4341, ENV 4611. Students must consult with the department and obtain written approval before taking courses towards the minor. Students also must satisfy prerequisites before enrolling in any environmental engineering course. Grades of “C–” or better must be earned in each course accepted for minor credit. If an environmental engineering science minor is combined with a civil engineering major, EES 3040, and one other course, up to six credits total may count toward both the major and the minor.

**Definition of Prefixes**

- CCE—Civil Construction Engineering
- CEG—Civil Geotechnical Engineering
- CES—Civil Engineering Structures
- CGN—Civil Engineering
- CWR—Civil Water Resources
- EES—Environmental Engineering Science
- EGN—Engineering Science
- ENV—Engineering: General
- EVR—Environmental Studies
- TTE—Transportation Engineering

**Undergraduate Courses**

- CCE 3101. Construction Materials (3). Prerequisite: EGN 3331. This course covers properties and characteristics of construction materials for civil and highway engineering; metals, aggregates, cements, timber, concrete, and asphalt.
- CCE 3101L. Construction Materials Laboratory (1). Corequisite: CCE 3101. This course allows students to prepare concrete and asphalt specimens; test construction materials and/or achieve a grade of “C–” or better.
- CCE 4004. Construction Engineering (3). Prerequisites: CCE 3101 and EGN 3613. This course covers theories, principles, and applications of construction engineering and management. Emphasis is placed on construction preplanning, delivery systems, contracts and bidding, estimation, scheduling, project control, and professional issues.
- CCE 4014. Construction Cost Estimating (3). Prerequisite: CCE 4004. This course covers construction contracts, organization and cost accounting systems; preliminary cost estimation, and cost indices; estimating material, labor, and equipment costs; construction bidding practices, and bid proposals; and project budgeting and cost systems.
CGN 4800. Pre-Senior Design and Professional Issues (2). Prerequisite: Senior standing. Corequisite: CEG 2202L. This course covers the following topics: engineering and professional development; personal development; graduate program preparation; industry considerations; and professional development. The course involves the completion of a team-based interdisciplinary design project covering several sub-disciplines in civil or environmental engineering, industry and professional participation.

CGN 4900. Honors Work in Civil and Environmental Engineering (1–6). Prerequisite: Admission to the honors program. This course is for faculty-directed independent research, which may or may not be included as part of the student’s senior design project. The honors thesis must be topic agreed upon by the student and a faculty mentor and relevant to civil or environmental engineering. Valuable credit is given consistent with the nature and scope of the research project to be conducted. May be repeated to a maximum of nine semester hours.

CGN 4930r. Special Topics (1–3). Prerequisites vary. This course covers topics in civil and environmental engineering, with an emphasis on recent developments. Topics and credit may vary. May be repeated to a maximum of twelve semester hours. May be repeated within the same term.

CWR 2300L. Environmental and Hydraulic Engineering Laboratory (1). Prerequisite: EGN 3331. Pre- or corequisite: CWR 3201. CWR 3201. This course is an hands-on introduction to environmental and hydraulic engineering topics. Physical experiments that demonstrate fundamental concepts such as hydrostatics, pipe flow, open channel flow, water quality, and water treatment processes are performed.

CWR 2300L. Hydraulics Laboratory (1). Prerequisite: EGM 3512. Prerequisite: CWR 3201 and MAC 3505. Corequisite: CWR 2301. This lab engages students in hydraulics experiments using the current ACI specifications and building codes. Topics include live load design, load factors, and various loadings on structures.

CWR 3040. Water Resources Engineering (3). Prerequisite: CWR 3201 and EES 3040. This course examines the fundamentals of groundwater flow and contaminant transport. Topics include Darcy’s law, flow nets, mass conservation, heterogeneity and anisotropy, storage properties, 3-D equation of groundwater flow, regional circulation, unsteady flow, recharge, stream–aquifer interaction, well hydraulics, slug test analyses, and contaminant transport processes.

CWR 4200. Hydraulic Engineering I (3). Prerequisites: CWR 3201 and CWR 3200L. This course covers principles of hydrology and hydraulics as they apply to the design of water supply, urban drainage, flood control, and hydraulic energy conversion systems. Students will use computer-aided design tools for analyzing and designing unsteady flow systems.

CWR 4203. Hydraulic Engineering II (3). Prerequisite: CWR 3201. This course covers methods for analyzing a broad range of unsteady flow conditions and for designing facilities to cope with resulting problems. Based on these methods, students learn to apply computer programs to practical water distribution and open-channel systems.

CWR 4540. Water Resources Engineering (3). Prerequisite: CWR 3201. This course offers a systems approach to complex water resources problems as well as a systems analysis of water resources operations, design, and planning.

CWR 4822. Coastal and Estuarine Hydraulics (3). Prerequisites: CWR 3201 and MAC 3213. This course covers coastal hydraulic principles and waves in estuaries and coastal zones, ocean waves, water waves and wave forces on coastal structures, tidal motions, mixing and transport in estuaries, and coastal –engineering analysis.

EES 3040. Introduction to Environmental Engineering (3). Prerequisites: CHM 1045, CHM 1045L, MAC 3211, and PHY 2048C. This course is a broad introduction to environmental engineering topics. Includes fundamental concepts in mass balance, water quality, and wastewater treatment, air quality, and solid/hazardous waste management with considerations to environmental and societal impacts, as well as technical limitations. This course serves as the foundation for all other environmental engineering courses.

EES 3040L. Introduction to Environmental Engineering Science Laboratory (1). Prerequisites: CHM 1045 and CHM 1045L. Corequisite: EES 3040. This course covers the use of field and laboratory instruments for measuring air and water quality indicators. Includes site visits.

EGM 3512. Engineering Mechanics (4). Prerequisites: MAC 2312 and PHY 2048. Pre- or corequisite: MAC 3213. This course covers statics and dynamics of particles and rigid bodies. Topics include free-body diagrams, couples, resultants, equilibrium of particles and rigid bodies in two and three dimensions, and forces in trusses, frames, and general structures. Topics include heron’s centroids, mass of mass, internal shear forces and bending moments in beams, shear and moment diagrams, friction, area moments of inertia, parallel axis theorem, work/energy, as well as impulse and momentum methods.

EGN 2400. Engineering Statistics and Computation (3). Prerequisite: MAC 2311. This course covers engineering problem formulation, algorithm development and programming, measurement and computational error assessment, as well as application of statistical and numerical modeling tools for data analysis. Mathcad software is used.

EGN 331L. Strength of Materials Laboratory (1). Prerequisite: EGM 3512. Corequisite: EGN 331L. This lab covers column buckling experiments as well as the use of non-destructive techniques to determine strains and stresses in tensile members, torsional members, flexural members, and thin-walled vessels.

EGN 3911. Undergraduate Research Experiment (0). (S/U grade only.)

EGN 4096r. Directed Individual Study (1–3). Prerequisites: EES 3040 and EES 3040L. Corequisite: CWR 4202. This course is directed special project/research in an area of civil engineering or design not covered in the curriculum.

ENV 401. Environmental Engineering (3). Prerequisites: CWR 3200L, CWR 3201, and EES 3040. This course covers the design of water and wastewater treatment plants, wastewater collection systems, air and water pollution control, as well as solid waste management and contemporary environmental issues.

ENV 402. Remediation Engineering (3). Prerequisite: ENV 4001. This course reviews various innovative remediation technologies used for cleanup of contaminated soil and groundwater at a site such as air sparging, soil vapor extraction, reactive wells, reactive zones, stabilization technologies, as well as hydraulic and pneumatic fracturing pump-and-treat systems.

ENV 403L. Applied Environmental Engineering Microbiology (3). Prerequisite: ENV 4001. This course surveys environmentally important microbes and their roles in the environmental restoration processes. Major topics include basics of microbiology, stoichiometry and bacterial energetics, biofilm and phototrophic microbiology applications; as well as detoxification of hazardous chemicals.

ENV 404. Environmental Systems Analysis (3). Prerequisites: CWR 3200L, EES 3040, and either MAP 3305 or MAP 2302. This course covers systems analysis techniques applied to the solution of environmental problems, with particular emphasis on linear and dynamic modeling.

ENV 4053. Chemical Fate and Transport in the Environment (3). Prerequisites: CWR 3201, EES 3040, and either MAP 3305 or MAP 2302. This course covers the processes of pollutant transport and transformation in and between air, water, and soil or sediments. Topics include advection, dispersion, diffusion, sorption, degradation, and phase-change processes.

ENV 4341. Solid and Hazardous Waste Engineering (3). Prerequisites: CWR 3200L and EES 3040. This course covers definitions and characteristics of solid and hazardous wastes. Topics include history, growth, and magnitude of the problem; legislative, regulatory, and technical aspects of waste generation, storage, collection, transportation, processing, transformation, and disposal; design of waste minimization and recycling programs; and case studies of waste management.

ENV 4405. Water Reuse Engineering (3). Prerequisites: CWR 3200L and EES 3040. This course covers sources of water for reuse, treatment processes and systems, monitoring and control instrumentation, health and social aspects, and design of facilities/ systems.

ENV 4417. Applied Environmental Engineering Chemistry (3). Pre- or corequisite: ENV 4001. This course covers applications of fundamental principles from general, organic and biological chemistry, to major environmental engineering processes. Emphasis is placed on the chemistry of water treatment.

ENV 4500. Environmental Unit Processes and Operations (3). Pre- or corequisite: ENV 4001. This course covers the operational and design features of the physical, chemical, thermal, and biological treatments used in engineering for water and wastewater treatment and the management of solid and hazardous waste.

ENV 4561. Design of Water Quality Management Facilities (3). Prerequisite: ENV 4001. This course covers analysis of operations, processes, and systems used in the design of facilities for maintaining water supply quality, wastewater control, and aquatic pollution control. Design of small and decentralized wastewater management systems.

ENV 4611. Environmental Impact Analysis (3). Prerequisites: CWR 3200L and EES 3040. This course covers topics such as analysis of various measures of environmental quality, impact of human activity on water, land, and air resources, and benefit-cost analysis in environmental-impact assessment.

EVR 1001. Introduction to Environmental Science (3). This course is an introduction to environmental science and covers the basic functioning of the earth’s environmental system and human effects on that system.

TTE 3004. Transportation Engineering (3). Prerequisites: CEG 2202, CEG 2202L, and STA 2122 or equivalent. This course is an introductory study of transportation engineering in the United States with special emphasis on highway and traffic engineering, planning and design, construction, operation, management, and safety.

TTE 4201. Traffic Engineering (3). Prerequisite: TTE 3004. This course covers nature, characteristics, and theories of traffic problems. Topics include traffic survey procedures, origin-destination studies, as well as an introduction to theory and design of automatic control of traffic systems.

TTE 4250. Traffic Operations (3). Prerequisite: TTE 3004. This course covers operation of transportation systems, monitoring, regulation, and control of traffic.
Department of CLASSICS

COLLEGE OF ARTS AND SCIENCES

Web Page: http://classics.fsu.edu/
Chair: Pullen; Leon Golden Professor: Marincola; M. Lynette Thompson Professor: de Grummond; Professors: Cairns, Fullerson, Pullen; Associate Professors: Luke, Pfaff, Sickinger, Slaveva-Griffin, Stover; Assistant Professors: Clark, De Giorgi, Lewis, Romano; Associate Teaching Professor: Branscombe; Professors Emeriti: Golden, Plescia

The influence of the art, languages, literatures, and cultures of the Greco-Roman world pervades every western and many non-western societies. Modern America is no exception. A meaningful appreciation of our classical past is vital both for understanding the impressive continuity of western institutions and values as well as for recognizing how recent innovations and transformations of received assumptions have rendered aspects of the classical world alien and sometimes exceptional. The classics are crucial both to the perpetuation and to the critique of the western liberal arts education.

The Department of Classics is committed to advancing our knowledge and critical appreciation of the ancient Mediterranean world through excellence in research and in teaching. The department seeks to create an atmosphere that fosters traditional scholarly approaches to the classical past at the same time as it welcomes and encourages innovative methods and perspectives. The department values the interdisciplinary nature of the classics and strives to achieve an integrated understanding of the ancient world that includes a full appreciation of its history, literature, art, and archaeology. Students are encouraged to view the classics within the context of the traditional humanities as well as in terms of the contemporary criticism of received cultural canons.

All courses in classics emphasize critical thinking, careful analysis, and effective speaking and writing skills. Most classics majors find that their broad liberal arts background is excellent preparation for pursuing careers in the learned professions, such as government, journalism, or law. Some who major in classics will go on to academic careers as philologists or archaeologists. Others will become teachers in the schools or specialist in museum work.

In addition to offering instruction to majors, the department participates in the University’s Liberal Studies for the 21st Century Program and offers innovative courses that satisfy the University’s multicultural requirement. Courses in beginning Greek or Latin can be used to fulfill the language requirement of the College of Arts and Sciences.

The faculty in classics is distinguished in teaching and research. Several members of the faculty have received University and national teaching awards. Individual faculty members have also won numerous competitive grants. The department boasts special strengths in ancient literary criticism, the archaeology of Greece and Italy, the political and social history of Athens and of Rome, Greek and Roman religion, and ancient sexuality and gender studies. Several faculty members direct archaeological projects in Greece and Italy, and students are active participants in these.

Majors and elective students alike will find many intellectual opportunities in the department. There is an active chapter of Eta Sigma Phi (the classics honor society) and a vigorous Student Archaeology Club. Each year the department hosts several distinguished guest speakers. The department also regularly hosts a visiting professor of international stature, the Langford Family Eminent Scholar, who teaches a course specifically for undergraduates. Every semester the department hosts a major conference. In the fall, it is the Langford Latin Seminar; in the spring, it is the Langford Conference. Recent topics have included the following: Health and Sickness in Ancient Rome; Political Economics of the Aegean Bronze Age; and Disasters in the Ancient World.

Students interested in the classics are encouraged to discuss their future plans with the undergraduate advisor. Many students will find that their needs are best accommodated by the department’s very flexible program in classical civilization (see below). Students who intend to pursue a career in teaching Latin or museum work, and students who intend to pursue postgraduate research in ancient history, classical archaeology, or philology will need to enter more specific programs of study. There is also a joint major in classics and religion.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in classics satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100, or ISC 3313.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Classics and Classical Language
XXX XXXX: coursework in classics for a total of six to twelve credit hours and a demonstration of proficiency of a classics foreign language by testing or completion through the intermediate level. For example, the intermediate level for Latin is LAT X220 or equivalent.

Greek, Classical
XXX XXXX: coursework in Greek for a total of six to twelve credit hours or demonstrated proficiency of the language by testing or completion through the intermediate level. The intermediate level is GRE X200 or equivalent.

Latin
XXX XXXX: coursework in Latin for a total of six to twelve credit hours or demonstrated proficiency of the language by testing or completion through the intermediate level.

Requirements for Majors in Classics

Students should review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin. No course for which a student receives a grade below “C” may be counted toward satisfaction of major requirements. In addition, courses used to satisfy the college foreign language requirement may not be counted toward satisfaction of any major requirements. Interested students should consult with the undergraduate advisor as early as possible to choose a course of study best suited to their needs and goals.

All students are required to complete an exit survey for both the department and the College of Arts and Sciences during the term in which they graduate.

Latin

Twenty-four semester hours above the 1000 level. Two courses at the 3000 level are required from among LNW 3211r, 3323r, and 4340r, along with six additional semester hours at the 4000 level. At the discretion of the undergraduate advisor, up to four semester hours of Greek or classical civilization may be counted toward this major. Students working toward secondary school certification may have other requirements as well.

Greek

Thirty semester hours chosen in consultation with the undergraduate advisor. This program will normally include GRE 1120 and 1121.

Latin and Greek

Thirty semester hours in Greek and Latin chosen in consultation with the undergraduate advisor. At least twelve semester hours are required in each language. The student must take 4000 level courses in at least one of the languages. If secondary school certification is sought in connection with this program, the major must include twenty-four semester hours of Latin.

Classical Civilization

Thirty semester hours chosen in consultation with the undergraduate advisor. Students must take at least twelve semester hours at the 4000 level, normally to include CLA 4935r. These hours may be selected from any of the courses listed below. No more than twelve semester hours of Latin and Greek may be counted. Students are strongly encouraged to take some courses in the Greek or Latin language. Courses used to satisfy the college foreign language requirement, however, may not be counted toward the major.
Classical Archaeology
Thirty semester hours of coursework. ARH 3130 and 3150 are required in addition to three of the following advanced coursework courses: ARH 4110, 4118, 4120, 4131, 4151, 4154, and 4173 and CLA 4151. Competency in an ancient language at the third-semester level is required; this requirement may be fulfilled by taking the Greek language sequence of GRE 1120, 1121, and 2220, or the Latin language sequence of LAT 1120, 1121, and 2220. In addition to the twelve semester hours of Latin or Greek required for the classical archaeology major, the BA degree requires an additional twelve semester hours of ancient or modern language study (three sequential four semester hour courses). The ancient language taken to satisfy the archaeology requirement will not fulfill the foreign-language requirement for the College of Arts and Sciences. It is strongly recommended that the student fulfill the College of Arts and Sciences language requirement (twelve credit hours) through the study of another ancient language, French, German, or Italian. Three semester hours of electives in classics are also required, to be chosen in consultation with the undergraduate advisor; only three semester hours of those elective courses taken to fulfill the humanities requirements may also be counted toward the requirements of the major. Students are encouraged to participate in archaeological fieldwork, and to study at the University’s study center in Florence.

Joint Major in Classics and Religion
The departments of classics and religion cooperate in a joint major designed for students with a special interest in religion and culture in the ancient world. To complete a Bachelor of Arts (BA) with a joint major in classics and religion, a student must take (in addition to other college requirements) twenty-seven to twenty-eight semester hours in classics and eighteen semester hours in religion. At least nine semester hours at the 3000 and 4000 level in classics courses with prefixes ARH, CLA, or CLT, or ASH 3200, EUH 4401, EUH 4408, EUH 4412, or EUH 4413 are required. No more than eighteen semester hours of Greek or Latin may count toward the major; however, students must attain at least third-semester competency in Greek or Latin (see “Language Requirements” below). Of the eighteen semester hours in religion, at least six and no more than twelve semester hours must be in the area of religions of western antiquity. Classics courses in which the student receives a grade below “C” will not be counted toward the major. For the joint major in religion and classics, please contact the undergraduate director in the department of religion.

Language Requirements for Joint Major
Courses used to fulfill the College of Arts and Sciences language requirement may not be counted toward the major. Whether to meet the language requirement or the major requirements, students must complete twelve semester hours in one ancient classical language (Latin or Greek). Courses beyond the third-semester level in Greek or Latin (if that language is used to fulfill the College of Arts and Sciences language requirement) or in another ancient language at any level (e.g., Hebrew, Egyptian, Aramaic, or Sanskrit) may count toward the major, up to the maximum of eighteen semester hours.

Minor
Students with a classics and religion joint major do not need a minor.

Honors in the Major
The Department of Classics offers a program in honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin and consult with the undergraduate advisor.

Requirements for a Minor in Classics
A minimum of twelve semester hours in classical civilization, Greek, or Latin. The minor in classical civilization requires no knowledge of Greek or Latin and may consist of any four courses listed under department offerings in classical civilization and literature; however, with the approval of the department, appropriate courses in Greek and Latin may be included in this program. In Greek or Latin the sequence may begin at the 1000 level (provided this does not duplicate the foreign language requirements for the baccalaureate degree) or at any appropriate higher level.

Definition of Prefixes
ARH—Art History
ASH—Asian History
CLA—Classical and Ancient Studies
CLT—Classical Culture in Translation or Translation Skills

Undergraduate Courses
ARH 2090. Great Discoveries in World Archaeology (3). This course investigates the meaning and the role of archaeology in shaping our past and present lives. In particular, we ask questions about the purpose, the means, and the agencies behind the excavation process, and thus touch upon the theoretical underpinnings of archaeology as a science. The course is a comprehensive survey that begins with the basics of human evolution and covers the history and material culture of key ancient civilizations, including those that populated the Mesopotamian and Mediterranean basins.

ARH 3130. Survey of Greek Art and Archaeology (3). This course reviews the major accomplishments in Greek art from early times through the Hellenistic period using a survey of principal monuments, works, and archaeological evidence.

ARH 3150. Art and Archaeology of Ancient Italy (3). This course is a survey of Italian art and archaeology including early Italy, the Etruscans, and Rome with reference to the major monuments, works, and archaeological evidence.

ARH 4110. Art and Archaeology of the Bronze Age in the Aegean (3). This course studies the major archaeological evidence related to the Bronze Age in Crete and Greece; the major sites, monuments, and artifacts. May be repeated to a maximum of six semester hours.

ARH 4118. Archaeology of Ancient Egypt (3). This course surveys the archaeology and art of ancient Egypt from the Predynastic to the Ptolemaic and Roman periods. Emphasis on the art, architecture, and culture of the Old and New Kingdoms.

ARH 4120. Etruscan Art and Archaeology (3). This course is a study of Etruscan culture, art, and archaeology.

ARH 4131. Greek Art and Archaeology of the Fifth and Fourth Centuries B.C. (3). This course surveys the accomplishments of classical Greek art through an examination of the monuments, works, and archaeological evidence.

ARH 4151. Art and Archaeology of the Early Roman Empire (3). This course examines Roman art and archaeology from Augustus through the Antonines with a survey of the major artistic accomplishments and the archaeological remains.

ARH 4154. Archaeology of the Late Roman Empire (3). This course comprises a study of Roman art and archaeology from the second to the sixth century CE with emphasis on important sites and monuments.

ARH 4173r. Studies in Classical Archaeology and Art (3–9). This course explores studies in specific aspects of the archaeology and art of Greece and Italy. May be repeated to a maximum of nine semester hours.

ARH 4932r. Tutorial in Classical Archaeology (1–3). Prerequisites: ARH 3130, ARH 3150, and instructor permission. This course uses readings and discussions within a small group of advanced undergraduates and discusses specific topics or research problems in classical archaeology. May be repeated to a maximum of six semester hours.

ASH 3200. History of the Ancient Near East (3). This course is a survey of the Near East—Anatolia, Mesopotamia, Egypt, the Holy Land—in the ancient period.

CLA 2100. Peoples of the Roman World (3). This introductory level course engages with the Roman world from the point of view of the people who lived there. Students study the different kinds of people who inhabited the Roman Empire, focusing on its multiethnic and diverse populations, and on the ways in which, as in a modern city, rather different groups may have come into contact with one another.

CLA 2110. Debates About the Past: Greek Civilization, History and Culture (3). This course is an introduction to different aspects of Greek, especially Athenian, culture, society, history, and literature from the archaic age (8th-6th centuries BCE) through the classical era (5th–4th centuries BCE) and beyond. The goal is to understand the Greeks through their words and the views of modern scholars, which students encounter in their assigned texts, translations of primary sources, and through lectures. Students also sharpen their oral competency skills through participation in debates in a variety of roles.

CLA 2810. Ancient Science for Non-Science Majors (3). This course introduces students to the history of modern science in the ancient Near East, the Greek-Roman world, the world of Late Antiquity and the Early Middle Ages.

CLA 3012. Homosexuality in Antiquity (3). This course combines methods of social history and literary criticism to examine attitudes toward homosexuality in Greek and Roman culture and the influence of the Greek ideal in later literary and artistic culture.

CLA 3430. History of Ancient Greece (3). This course surveys the history of ancient Greece from the Bronze Age through the Hellenistic period, with a focus on political, social, and economic developments.

CLA 3440. History of Ancient Rome (3). This course surveys the history of ancient Rome from the Iron Age through Late Antiquity. Emphasis is on political, social, and economic developments.
CLA 3500. Sports in Antiquity: Olympians, Gladiators, and Superstars (3). This course introduces students to the various athletic events of Greco-Roman antiquity and the festival games in which ancient athletes competed. To explore the subject, students are exposed to a wide variety of evidence, including inscriptions, literary sources, architectural remains, vase-paintings, sculptures, and other types of archaeological finds.

CLA 3501. Gender and Society in Ancient Greece (3). This course examines the role and status of women in ancient Greek society, as depicted in its literature, art, law, and religion.

CLA 3502. Women, Children, and Slaves in Ancient Rome: The Roman Family (3). This course examines the Roman family in its various facets. Its focus will not be only on the nuclear family but also on the broader concept of family, which includes slaves and dependents.

CLA 4151. Pompeii (3). This course provides a study of the archaeology of Pompeii and of neighboring towns from the seventh century BCE to the first century CE.

CLA 4437r. Studies in Greek History (3). This course focuses on specified periods of Greek history, whether Archaic, Classical, or Hellenistic. May be repeated to a maximum of six semester hours.

CLA 4447r. Studies in Roman History (3). This course focuses on study of specified periods of Roman history in the Republic or Empire. May be repeated to a maximum of six semester hours.

CLA 4780r. Classical Archaeology: Fieldwork (1–6). This fieldwork course affords students the opportunity to use participating in an array of archaeological field school or project. May be repeated to a maximum of twelve semester hours.

CLA 4909r. Honors Work (1–6). Up to twelve semester hours may be taken in honors work. May be repeated to a maximum of nine semester hours.

CLA 4930r. Special Topics in Classics (3–9). This course offers studies in specific aspects of Greco-Roman myth and culture.

CLA 4935r. Seminar in Classical Civilization (3–6). Prerequisite: Nine semester hours of study in classical civilization or instructor permission. This course covers special topics in classical culture presented around a seminar format. May be repeated to a maximum of six semester hours.

CLT 2049. Introduction to Classical Civilizations (3). This course introduces students to the study of classical civilization in ancient Greece and Rome. Students select from readings of debates from great works of Classical literature, explore the strengths and weaknesses of opposing arguments, and consider how parallels from ancient period and period in their own day. Throughout, students are concerned with the question of whether political conflict is integral, or an obstacle, to the embodiment of democratic principles.

IFS 3017. Technologies of Memory from Ancient Greece to Today (3). This course seeks to answer questions such as “How do we know the past?”, “How might technology help or hinder us in knowing the past better?”, etc. by studying the changing and diverse roles of the various technologies used to record the past, “technologies of memory.” Beginning with the earliest forms of writing, poetry, and ancient memory arts (mnemotechnics) and then extending to the modern day shift to computers and digital memorialization, we ask both what has been gained and what has been lost in these technological turns.

IFS 3018. Ancient Sexualities and Modern Sexual Politics (3). This course examines attitudes towards sexuality in ancient Greek and Roman culture, and the influence of Greek and Roman norms on later cultures and periods, including especially our own; sexual identities play a large, and increasing, role in modern political life. Students explore a wide variety of literary, non-literary, and visual material in order to understand the dynamics of sexuality and power as they operate in the ancient and modern world.

IFS 3018. Ancient Sexualities and Modern Sexual Politics (3). This course explores the evolution from the death of Socrates (399 BC) to the Roman conquest (146 BC, the sack of Corinth by Mummius).

EUH 4401. Classical Athens and Sparta (3). This course examines the history of Greece from the beginning to Alexander the Great. Emphasis on the social and political structures of Sparta and Athens.

EUH 4408. The Age of Alexander the Great (3). This course is a survey of the Greek world from the death of Socrates (399 BC) to the Roman conquest (146 BC, the sack of Corinth by Mummius).

EUH 4412. The Roman Republic (3). This course is a study of the history of Rome from its foundation (traditionally 753 BC) to the fall of the Roman Republic (31 BC, The Battle of Actium).

EUH 4413. The Roman Empire (3). This course focuses on the Roman Empire from Augustus to Constantine. Emphasis on the evolution from the principate of the early empire to the monarchy of the late empire.

GRE 1120, 1121. Beginning Latin I, II (4, 4). This course is a study of the basic grammar and syntax of classical Latin. Meets the foreign language requirement for the BA degree. No language laboratory required.

LAT 2200. Introduction to Latin Literature (4). This course focuses on the translation and commentary on selected Latin readings. Meets the foreign language requirement for the BA degree. No language laboratory required.

LAT 2211. Latin Prose readings (3–6). Prerequisite: LAT 2200. This course introduces students to the translation and interpretation of selected Latin prose authors. May be repeated to a maximum of six semester hours.

LAT 2231. Latin Poetry readings (3–6). Prerequisite: LAT 2200. This course introduces students to the translation and interpretation of standard Latin poetry authors. May be repeated to a maximum of six semester hours.

LAT 4313. Plautus and Terence (3). This course focuses on the translation, commentary, and interpretation of selected plays from Plautus and Terence.

LAT 4320r. Roman Lyric, Elegiac, and Pastoral Poetry (3). This course focuses on the translation, commentary, and interpretation of poetry selected from the Roman elegists, the lyric tradition, and Roman pastoral. May be repeated to a maximum of six semester hours.

LAT 4340r. Roman Epic (3). This course focuses on the translation, commentary, and interpretation of the works of Vergil or the other hexameter poets. May be repeated to a maximum of six semester hours.

LAT 4360r. Roman Satire (3). This course focuses on the translation, commentary, and interpretation of selected readings from Horace and Persius, Juvenal, Martial, Petronius, or Apuleius. May be repeated to a maximum of six semester hours.

LAT 4380r. The Roman Historians and Cicero (3). This course focuses on the translation, commentary, and interpretation of selected works from the Roman historians or Cicero’s historical speeches and letters. May be repeated to a maximum of six semester hours.

LAT 4905r. Directed Individual Study (1–4). May be repeated to a maximum of nine semester hours.

LAT 4995r. Tutorial in Latin (1–3). Prerequisites: LNW 3211, LNW 3332, and instructor permission. This course includes intensive work by a small number of undergraduates on a specific topic or research problem in Latin studies. May be repeated as topics vary to a maximum of six semester hours.

Graduate Courses

ARH 5111. Art and Archaeology of the Bronze Age in the Aegean (3).

ARH 5119. Archaeology of Ancient Egypt (3).

ARH 5125. Etruscan Art and Archaeology (3).

ARH 5140. Greek Art and Archaeology of the Fifth and Fourth Centuries B.C. (3).
Seminar in Latin (3).
Survey of Latin Literature (3).
Tutorial in Latin (1–3).
Directed Individual Study (1–4). (S/U grade only.)
The Roman Historians and Cicero (3).
Studies in Roman Satire (3).
Studies in Roman Epic (3).
Studies in Roman Drama (3).
Graduate Reading Knowledge Examination (0). (S/U grade only.)
Seminar in Greek (3).
Greek Philosophical Writings (3).
Studies in Greek Drama (3).
Studies in the Greek Prose Writers (3).
The Roman Empire (3).
Hellenistic Greece (3).
Seminar in Classics (3–12).
Readings for Exams (1–12). (S/U grade only.)
Seminar in Classics (3–12).
Studies in Greek Tragedy: Aeschylus, Sophocles, and Euripides (3).
Studies in Greek and Roman Epic (3).
Seminar in Ancient Mythology (3).
Hellenistic Greece (3).
The Roman Empire (3).
Teaching Classics (3).
Studies in the Greek Prose Writers (3).
Studies in Greek Drama (3).
Greek Poetry (3).
Greek Philosophical Writings (3).
Directed Individual Study (1–4). (S/U grade only.)
Tutorial in Greek (1–3).
Survey of Greek Literature (3).
Seminar in Greek (3).
Graduate Reading Knowledge Examination (0). (S/U grade only.)
Studies in Roman Drama (3).
Roman Lyric, Elegiac, and Pastoral Poetry (3).
Studies in Roman Epic (3).
Studies in Roman Satire (3).
The Roman Historians and Cicero (3).
Directed Individual Study (1–4). (S/U grade only.)
Tutorial in Latin (1–3).
Survey of Latin Literature (3).
Seminar in Latin (3).

COLLEGE OF COMMUNICATION AND INFORMATION
Web Page: http://comm.cci.fsu.edu
Director: Gary Heald; Professors: Adams, Arpan, Houck, Korzenny, McDowell, Nudd, Opel, Raney; Associate Professors: Cortese, Jordan, MacNamara, Proflitt, Rayburn, Sypher; Assistant Professors: Bruker, Chapa, Graves, Harlow, Hou, Lee, Merle; Specialized Teaching Faculty: DuBard, Heald, Laurents, Rodin, Solomon, Zeigler; Professors Emeriti: Heald, Mayo, Worthing, Young

The School of Communication offers a degree in communication with two majors (digital media production and media/communications studies), and a degree in professional communication with two majors (advertising and public relations). These majors are organized according to various applications of communication skills and expertise in our society. This unique array of studies allows students to select a sequence of courses that directly reflect their own professional, artistic, and/or academic interests.

Each major requires a series of courses designed to meet predetermined educational and career goals. The specific goals and requirements of some areas of study are detailed in the following section entitled “Descriptions of Emphasis Areas,” and on the School Web site at http://comm.cci.fsu.edu. While some areas of emphasis are professionally oriented and others stress theory and a liberal arts education, each introduces the student to the broad range of communication theory and practice and provides the student with an understanding of the fundamental human and mediated communication processes. With few exceptions, the major requires two years to complete.

In terms of both academic criteria and extracurricular accomplishments, the students in the School of Communication are of the very highest caliber. The high quality of undergraduate students is reflected in the numerous University, state, and national scholarship and fellowship recipients. The exceptional caliber and character of communication students are also proven by their extracurricular activities. The Speech and Debate Program is considered one of the most experienced, talented squads in the nation. The program philosophy assures each student the best competitive experience possible. It emphasizes quality competition and provides the resources to help each student excel to the best of his or her abilities. Communication students are also involved in broadcasting activities, including radio station WFSU, a variety of sports-related programs as part of Seminole Productions, and broadcasts on WFSU-TV, Florida State University’s PBS station. Other student activities include the Advertising Club, the student chapter of the Florida Public Relations Association, the student chapter of Women in Communication, and Lambda Pi Eta, the national honor society for undergraduate communication students.

Both in and out of the classroom, the students of the School of Communication have an established track record of national recognition and achievement. The University’s communication graduates can be found working in virtually every country in the world and every state in the nation. Our graduates occupy productive and prominent positions in government, law, commercial communication, media-related activities, private business interests, and education.

The School of Communication offers programs of study leading to the Bachelor of Arts (BA), Bachelor of Science (BS), Master of Arts (MA), Master of Science (MS), and Doctor of Philosophy (PhD) degrees. Consult the Graduate Bulletin or School Web site for information regarding graduate programs.

Note: Students not formally admitted to the School of Communication are prohibited from enrolling in more than eighteen semester hours of coursework in the School of Communication (SPC 1017 and SPC 2608 do not count toward this eighteen semester hour limit). Courses available to non-majors include, but are not limited, to those listed in the following section entitled ‘Requirements for a Minor in Communication.’

Computer Skills Competency
All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in communication satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100, or COM 4470.

State of Florida Common Program Prerequisites
The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at ei-
ther a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. XXX XXXX
2. XXX XXXX
3. XXX XXXX
4. XXX XXXX
5. XXX XXXX
6. XXX XXXX

Note: The above courses are to be outside of the major (ENC and LIT prefix courses) and beyond the thirty-six hours of general education requirements.

Requirements

Admission Information

Communication is a limited-access major. Acceptance into the School of Communication and into the various areas of emphasis is highly competitive. All students must apply separately to the University and the School of Communication. Admission to the University is not a guarantee of admission into the major and admission to the major is not a guarantee of admission to the University. Students transferring from another institution are strongly encouraged to earn an AA before matriculating at Florida State University, and should apply for admission to the School of Communication before transferring to Florida State University.

Application Process

Minimum Requirements for Application:

1. Have an overall GPA of 3.0 or higher on all college coursework to be considered for admission to advertising, public relations, media production and media/communication studies
2. Have completed CLEP and accelerated credit scores posted by time of application
3. Have all liberal studies course substitutions approved by the appropriate dean and posted by time of application
4. In addition, students must complete the following requirements by the end of the Spring semester in which they are applying
   a. A minimum of fifty-two hours of college coursework accepted by Florida State University
   b. Successfully complete ENC 1101 (three hours), as well as three hours of State Common Core courses in Math and three hours of additional FSU courses in Math.

Note: All coursework for eligibility must be reflected on submitted transcripts or on Spring course schedules by the application deadline.

The Application

Application information is available on the School of Communication Web site at http://comm.cci.fsu.edu. To be considered for Summer/Fall admission, completed applications must be received by the School of Communication by the first business day in February at 5:00 p.m. Included in the application process must be copies of transcripts from all colleges and universities attended. Late applications will not be accepted.

The Review Process

A Advertising, Public Relations, Digital Media Production

A faculty committee will review applications and supporting documents of candidates who meet the minimum requirements for application. There are three major criteria by which all undergraduate applications in the School of Communication will be assessed: GPA in context, strength of experience relevant to the field, and evidence of potential success in a relevant field. More specifically, the faculty members reviewing the applications in all areas will consider the following:

1. GPA in all college coursework
2. Record of academic success in communication and communication-related courses
3. Quality of writing in application materials
4. Well-defined goals and expectations related to the chosen field
5. Previous high school, college, or professional experiences related to the chosen field

(See School of Communication application for additional information regarding the review process.)

B. Media/Communication Studies

After meeting the minimum requirements for application (above), the GPA in all college coursework will be the sole admission criterion.

Retention Standards

The School of Communication reserves the right to discontinue enrollment of any student in the major at any time if, in the judgment of the faculty, the student does not meet the standards of the school or the major. Specifically, majors in the School of Communication must maintain an overall GPA of 3.0 on all college coursework or they may be placed on probation and may be dropped subsequently from the major.

Requirements for a Major in Communication

Different programs of study specify different graduation requirements that lead to the baccalaureate degree in Communication. Descriptions of each program’s required and elective course sequences are available on the school’s Web site at http://comm.cci.fsu.edu. The School of Communication has the following requirements for graduation. These requirements are beyond the minimum University requirements and those specified by each emphasis area: (1) meet the school’s language proficiency requirement; (2) only coursework with grades of “C–” or above will count toward a student’s degree in communication; and (3) completion of a minor in an academic area outside the School of Communication. Students must undergo University and school graduation checks. Students who wish to intern must make arrangements with the faculty advisor and submit school contracts the semester prior to enrollment. Internship requirements vary by program of study. Only formally admitted communication majors can register for a communication internship.

Language Proficiency Requirement

Students formally admitted into any major in the School of Communication during or after the 2003 admission cycle must achieve proficiency in one language other than English prior to graduation. As a school, we define “language” in broad terms, understanding that a variety of skills are equally important to the field of communication. To that end, students may fulfill this requirement by taking courses in modern or business language. In order to fulfill the school’s Business Language-Proiciency requirement, students must earn at least a “C–” in each language course. Courses may not be taken on an S/U basis.

Students formally admitted during or after the 2012 admission cycle may take courses in the Modern Language Proficiency on an S/U basis. The school’s language proficiency requirement is more extensive than the University’s foreign language admissions requirement. It is important to understand that although completion of two years of high school language courses or two semesters of post-secondary language will satisfy the University’s Admissions requirement, these courses do not satisfy the School of Communication’s language proficiency graduation requirements. Please consult the “Admissions” chapter of this General Bulletin for more information.

Modern Language Proficiency. Students may satisfy the language proficiency requirement by completing coursework through the 2000 level (2200 or equivalent course) of a classical or modern language. Students admitted prior to 2012 must earn at least a “C–” in each course; courses may not be taken on an S/U basis. For students admitted during or after 2012, language proficiency courses may be taken on an S/U basis. Native speakers of another language and other students who wish to demonstrate proficiency by means other than coursework should consult the Department of Modern Languages and Linguistics. Upon graduation, those students who pursue this option through a spoken language (e.g., French, German, Spanish, Latin, etc.) will receive a Bachelor of Arts (BA) degree.

Business Language Proficiency. Students may satisfy the business language proficiency requirement by completing the following coursework for a total of nine semester hours: ECO 2033, Principles of Macroeconomics, ECO 2023, Principles of Microeconomics, and one of the following: STA 2023, Fundamental Business Statistics, or STA 2122, Introduction to Applied Statistics. A student taking coursework to fulfill the department’s business lan-
guage requirement must earn at least a “C–” in each course; courses may not be taken on an S/U basis. Upon graduation, students who pursue the business language proficiency option will receive a Bachelor of Science (BS) degree.

Required Minor
A minor of at least twelve semester hours is required. All work counted toward the minor must carry a grade of “C–” or better. The minor must be in a department other than the School of Communication, with the exception of the Minor in Hispanic Marketing Communication. Requirements for the minor are established by the minor department, which can be found under the appropriate entry of this General Bulletin. Minors are checked by the major department upon graduation. See individual descriptions of majors below for suggestions. Communication majors who complete a second major outside of the School of Communication do not need a minor. The required minor is applicable, however, to those pursuing a dual degree.

Interdepartmental Minor
A fifteen semester hour interdepartmental minor is possible, provided that the coursework is outside the School of Communication and is approved in advance by the faculty advisor and the school director.

Honors in the Major
The School of Communication offers a program in honors in communication to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Requirements for a Minor in Communication
The School of Communication offers a minor in communication on a space available basis only. The minor consists of twelve semester hours in communication selected from the following courses:

- ADV 3008 Principles of Advertising (3)
- ADV 3352 Mass Media Law (3)*
- ADV 3410 Hispanic Marketing Communication (3)*
- COM 3332 New Communication Technology (3)*
- COM 3483 Reel Legal (3)*
- COM 3930 Special Topics in Communication (3)
- IFS 3033 Media, Culture, and the Environment (3)
- MMC 2000 Introduction to the Mass Media (3)*
- PUR 3000 Introduction to Public Relations (3)*
- RTV 3001 Media Techniques (3)*
- SPC 3210 Contemporary Human Communication (3)*

*Available online

Only coursework with a grade of “C–” or above in four of these courses will count toward the minor. Credit earned in meeting the Oral Communication Competency Requirement (OCCR) may not be used to satisfy the minor. At least six semester hours of the communication minor must be taken in the appropriate entry of this General Bulletin. Minors are checked by the major department upon graduation. See individual descriptions of majors below for suggestions. Communication majors who complete a second major outside of the School of Communication do not need a minor. The required minor is applicable, however, to those pursuing a dual degree.

A listing of specific courses and requirements is available at http://www.academic-guide.fsu.edu.

Media/Communication Studies
- Career and Educational Goals. Students graduating in this emphasis area should have a solid liberal arts education. Degrees in media/communication studies are applicable to a number of fields including law, media industries, media research, communications, management, lobbying, management careers in media, cable, advertising, arts and entertainment, emerging information technologies, and related fields. (Prospective students should note that the School of Communication does not offer a program in print or broadcast journalism.)
- Major Hours Required. Thirty-three semester hours. All work counted toward the major must carry a grade of “C–” or better.
- Required Minor. A minor (or second major), with advisor approval, is required. All work counted toward the major must carry a grade of “C–” or better. Requirements for the minor are established by the minor department and can be found in this General Bulletin. Recommended minors include: English, political science, psychology, journalism (at FAMU), sociology, women’s studies, African-American studies, or British studies (the Florida State University London Program). A fifteen semester hour interdepartmental minor is also possible, provided the coursework is outside of the School of Communication and is approved in advance by the faculty advisor and the school director.
- Internship. An internship (COM 4945r) is strongly recommended. A student may enroll for up to twelve semester hours of internship, but a maximum of three semester hours may be credited toward the major.

Course Requirements for the Media/Communication Studies Emphasis
A listing of specific courses and requirements is available at http://www.academic-guide.fsu.edu.

Digital Media Production
- Career and Educational Goals. Students with an emphasis in media production typically pursue management or production careers in broadcasting, cable, advertising, video production, arts and entertainment, emerging information technologies, and related fields. Prospective students should note that the School of Communication does not offer a program in print or broadcast journalism.
- Areas of Special Knowledge and Skills to be Developed. The media production emphasis will expose students to techniques employed in the production of digital media. Students may acquire such skills as writing for the media, on-camera performance, video production, and video editing.
- Major Hours Required. Thirty-nine semester hours are required in the media production area. All work counted toward the major must carry a grade of “C–” or better.
- Required Minor. A minor (or second major), approved by your advisor, is required. All work must be in a department other than the School of Communication. All work counted toward the minor must carry a grade of a “C–” or better. Requirements for the minor are established by the minor department and can be found in this General Bulletin. Recommended minors include: business, English, political science, psychology, journalism (at FAMU), sociology, criminology, social sciences, American studies, or British studies (the Florida State University London Program). A fifteen semester hour interdepartmental minor is also possible, provided the coursework is outside the School of Communication and is approved in advance by the faculty advisor and the school director.
Undergraduate Courses

ADV 3001. Creative Strategy I (3). This foundation course in advertising explores creativity in a workshop environment.

ADV 3008. Principles of Advertising (3). This course explores advertising and promotional communication regarding levels of economic growth, cultural influences, and socioeconomic environments.

ADV 3352. Mass Media Law (3). This course offers a comprehensive review of laws, rules, and regulations affecting both the advertising and broadcast industries as well as other forms of mass media. Topics include libel, slander, invasion of privacy, gathering of information, and copyright issues.

ADV 3410. Hispanic Marketing Communication (3). This course prepares undergraduate students to become educated decision makers and consumers of information regarding U.S. Hispanic marketing communication issues.

ADV 3801r. Advertising Team I (3). (S/U grade only.) Prerequisite: Instructor permission. This course is application-based and provides students with the opportunity to develop a complete Integrated Marketing Communication campaign plan as part of the National Student Advertising Competition sponsored by the American Advertising Federation. The course is set up as a hierarchy-based advertising agency with some students in leadership positions and others working in departments that are managed by student directors. May be repeated to a maximum of six semester hours.

ADV 4300. Media Planning (3). Prerequisite: ADV 3008. This course explores the coordination of advertising and marketing research, planning, creative strategy, and selection of media and production activities leading to the development of advertising campaigns.

ADV 4411. Multicultural Marketing Communication (3). This course is geared to train students to become effective communicators and marketers when reaching out to multicultural society. Marketers, communicators, and service providers interested in being effective in reaching out to culturally diverse groups need to become adept at designing messages and strategies geared to a culturally diverse society.

ADV 4500. Advertising Research (3). Prerequisite: ADV 3008. This course covers survey, observational, and experimental methods and processes. Topics include research design, planning, questionnaire construction, sampling, validity measurements, field work, tabulations, presentation, and interpretation.

ADV 4603. Account Planning (3). This course explores account planning as a growing practice in advertising and public relations that emphasizes placing the consumer at the center of strategic planning. The account planner obtains consumer insights and ensures that the planning process is informed by consumer needs, values, and dispositions.

ADV 4800. Creative Strategy II (3). Prerequisites: ADV 3001, ADV 3008, and ADV 4500. This course focuses on the creation of new and innovative strategies necessary in communicating via print and electronic media and enables students to utilize these skills in creating integrated advertising campaigns.

COM 2080. Online Communication and Presence (3). This course provides students with theoretical background and practical experience in constructing messages for online communication, as well as managing self-presentation and professional relationships in the online environment. The course includes critical analysis of information sources and audiences and the development and delivery of online oral presentations.

COM 2412. Culture, Identity and Communication in Context (3). This course brings international and U.S. American students together to explore intercultural communication in a specific set of contexts, including the academic environment; day to day social interactions; family structures; national political scenes; the business world, and more.

COM 3070. Careers in Communication (3). (S/U grade only.) Prerequisite: Admission to Media/Communication Studies. This course is designed to help Media/Communication Studies students be able to identify career goals, analyze career fields in communication, create a resume and portfolio, and demonstrate interviewing skills.

COM 3110. Communication for Business and the Professions (3). This workplace-oriented course provides practical education and experience in the performance of informative, persuasive, and special occasion speeches through individual and group presentations. Fulfills OCCR requirement.

COM 3120. Communication for Organizing (3). This course focuses on communication and group problem-solving in bureaucracies.

COM 3130. Communication Research Methods (3). This course is an introduction to communication research methods. It examines survey, experimental, observational, and content analysis methods. Philosophy of science, research design, measurement, sampling, data collection, analysis, interpretation, and reporting.

COM 3130L. Communication Research Methods Laboratory (1). Corequisite: COM 3130. This lab examines applications and simulations of communication research methods. Lecture, laboratory, and computer work covering design, data collection, analysis, interpretation, and reporting practiced using computer technology.

COM 3332. New Communication Technology and Contemporary Society (3). This course relates the design, development, and the use of new communication technologies to social, economic, and policy implications. Lecture, labs, and discussion groups.

COM 3420. Media, Culture, and the Environment (3). This course examines the role of language and representation in our understanding of the natural world. The course examines news media coverage of environmental issues, environmental images in popular culture, as well as the communication strategies of environmental organizations.

COM 3483. Reel Legal (3). This course provides students with a basic understanding of the law through the use of films about the law. Concepts include: natural law, coaching witnesses, rights of the accused, jury deliberations, perjury, legal ethics, congressional investigations, obligation of witnesses, right to counsel, etc. Topics such as race, class, gender, and ethnicity as pertaining to law are also explored.

COM 3510. Political Communication and Campaigning (3). This course explores campaigns, elections, and American politics in a communication framework; planning campaign strategies.

COM 3930r. Special Topics in Communication (3). This course is an analysis of specialized topics of current concern in communication. May be repeated to a maximum of six semester hours; duplicate registration allowed.

COM 3933r. Application of Communication Skills (1–6). (S/U grade only.) This course combines some classroom lecture with other types of instruction that allows students to develop a complex foundation of communication skills in diverse settings. The course is planned for groups of students rather than individuals. The other types of instruction can be a combination of any or all of the following: internship, directed individual study, project implementation, laboratory, and other instructional modes tailored to the specific topic of the course and the educational goal of the students. May be repeated to a maximum of six semester hours; duplicate registration allowed.

COM 3949r. Experiential Learning (0). (S/U grade only.) This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

COM 3950r. Communication Activities (1). (S/U grade only.) May be repeated to a maximum of four semester hours; duplicate registration allowed.

COM 4132. Communication and Stress Management (3). This course examines the causes of and remedies for stress in the workplace. The course provides practical education in controlling stress that emphasizes primarily organizational, interpersonal, and intercultural communication skills and utilizes primarily written channels. The course is reading and writing intensive.

COM 4330. Communication and the Internet (3). This course develops technical and communication skills in Internet-based communication technologies. Hands-on survey of Internet technologies with focus on communication issues, problems, and applications.

COM 4431. Rhetoric of a Global Corporation (3). This course provides opportunities to observe ways in which religious and music rhetoric are employed by a major U.S. corporation with a global target market. The course emphasizes observation research that focuses primarily on communication theory and methods. The course requires that students spend 45 documented hours performing lab/field work research and/or library research in the symbols and messages of an appropriate corporation.

COM 4470. Desktop Multimedia (3). This course provides an overview of operations and applications of software packages; principles of design and presentation for print-based as well as audio-visual productions.

COM 4480. Legal Communication (3). This course is an analysis of how communication affects and is affected by our legal institutions and processes.

COM 4560. Social Marketing (3). Prerequisite: MMC 2000 or PUR 3000. This course is an examination of the principles and tools of marketing. This course is designed to familiarize students with current theory and knowledge in the field of social marketing and to provide students experience with planning a social marketing campaign.

COM 4565r. Directed Individual Study (1–3). (S/U grade only.) Prerequisite: Admission to Media/Communication Studies. In this course, students select a topic of interest to pursue under supervision of a faculty member. Could be research/creative, pedagogy, service, or applied. Results in final project, scope and type to be defined by student and faculty supervisor. May be repeated to a maximum of nine semester hours.

COM 4590r. Honors Work (1–6). This course is for students in the honors program who are working on an independent project. May be repeated to a maximum of nine semester hours; duplicate registration not allowed.

COM 4910r. Application of Research Methods (1–3). (S/U grade only.) Prerequisite: Instructor permission. This course offers experience in methods and strategies of research in communication concepts. Individually designed to accommodate student’s background and interests. May be repeated to a maximum of four semester hours; duplicate registration allowed.

COM 4930r. Undergraduate Seminar in Communication (3). This course explores advanced communication issues with an emphasis on research. May be repeated to a maximum of six semester hours; duplicate registration allowed.
COMM 4935r. Senior Seminar in Communication Studies (3). This course is an advanced seminar in communication studies with an emphasis in legal communication studies, communication and technology, and health communication. 

COMM 4941r. Application of Instructional Methods (0–3). (S/U grade only.) Prerequisite: Admission to a Communication major. This course provides experience in methods and strategies of teaching communication concepts within the University context. Individually designed to accommodate student’s background and objectives. May be repeated to a maximum of three semester hours; duplicate registration not allowed.

COMM 4945r. Communication Internship (1–12). (S/U grade only.) Prerequisite: Admission to a major in Communication. This course is a supervised internship. The credit is proportional to scope and significance of work and may not be applied to graduate degrees. The course is individually designed to accommodate student’s background and objective and may be taken to a maximum of twelve semester hours.

FIL 2000. Elements of Film (3). This course provides the student with an opportunity to study classic examples of superior filmmaking and develop critical skills that will help the individual understand and evaluate film communication, literature, and art.

IFS 2021. Social Responsibility (Rhetorically Speaking) (3). This course is for students living in the social justice living learning community. It acquaints students with the principles of communication and the role it plays in social justice movements.

IFS 2052. Global Perspectives: Communication (3). This course introduces students to the basic processes of intercultural communication from a global perspective in hopes of increasing their curiosity and acceptance of other cultures.

IFS 2074. Communication and Dance (3). This course focuses on three separate emphasis areas: (1) the individual; (2) partnerships and, (3) groups and social settings. The communication concepts learned through dance in this course are also applied to other social situations and settings.

IFS 3033. Media, Culture and the Environment (3). This course examines the role of language and representation in our understanding of the natural world. The course examines news media coverage of environmental issues, environmental images in popular culture, and advertising patterns.

MMC 2000. Introduction to the Mass Media (3). This course covers a historical and social overview of the mass media and their relationship to the mass communication process in a modern society.

MMC 3703. Media, Sports, and Society (3). Prerequisite: MMC 2000. This course introduces students to various aspects of the sports-media relationship, including the history of, and industries that constitute, the audiences drawn to, and the social issues that arise from the relationship.

MMC 4200. Media Legalities (3). Prerequisite: MMC 2000. This course is a review and application of media business practices and legal requirements involved in the conception and production of media content for radio and television.

MMC 4203. Media Ethics (3). Prerequisite: MMC 2000 or RTV 3001. This course surveys the ethical principles, standards, and problems in the practice of journalism, advertising, and/or public relations.

MMC 4300. Communication and Change: The Diffusion of Innovations (3). This course is an analysis of the process of change in developing countries, particularly from the standpoint of how communication is used in the introduction, spread, and adoption of new ideas.

MMC 4402. Mass Media and Society (3). Prerequisite: MMC 2000. This course is an analysis of the effects of mass media on public opinion and behavior. A review of social science research exploring the impact of TV on children and others.

MMC 4641. Political Economy of Media (3). Prerequisite: MMC 2000 or RTV 3001. This course covers the structure and functions of U.S. and other mass-communication systems as well as their relationship to the political and economic systems.

ORI 3004. Performance Studies (3). This course allows students to collect, analyze, and discuss performance narratives and everyday conversations.

ORI 3110. Performance of Contemporary Literature (3). This course includes analysis of and practical experience in the performance of poetry and prose.

PUR 3000. Introduction to Public Relations (3). This course introduces the student to the principles and practices of the public relations profession throughout all organizations using public relations.

PUR 3002. Public Relations Techniques (3). Prerequisites: PUR 3000 and PUR 3100. This course covers the tools and techniques of public relations. Application of public relations principles.

PUR 3100. Writing for Public Relations (3). Pre- or corequisite: PUR 3000. This course is designed to develop professional-level writing skills for public relations.

PUR 3300. Public Relations Proseminar (1). (S/U grade only.) Corequisite: PUR 3000. For this course, public relations majors must register for the proseminar on admission to the program. They are to become active in FPRA, PRSSA, or WIC and remain active during undergraduate work.

PUR 4000. Public Relations Management: Cases and Campaign Strategies (3). Prerequisites: PUR 3000, PUR 3002, and PUR 3100. This course is designed to focus on the management function of public relations. Focus is on significant cases and campaign strategies.

PUR 4940r. Public Relations Internship (1–12). (S/U grade only.) Prerequisites: PUR 3000, PUR 3002, and PUR 3100. This course consists of practical application of classroom principles in public relations settings. May be repeated to a maximum of twelve semester hours.

RTV 3001. Media Techniques (3). This course introduces students to basic principles and terminology associated with the aesthetics of film making and television production.

RTV 3003. Elements of Broadcasting (3). This course surveys American broadcasting from the standpoint of communicators, organizations, content, and audience with special emphasis on research.

RTV 3101. Writing for the Electronic Media (3). This course consists of non-fiction writing for television and radio including public affairs, commercials, and documentaries.

RTV 3103. Narrative Writing for Television and Film (3). This course consists of the development and writing of fictional scripts for television and film.

RTV 3531. Single-Camera Video Production (3). This course addresses direction and production of single-camera video projects including camera, audio, lighting, and linear editing.

RTV 3533. Television Production (4). Prerequisite: Admission to the Media Production major. This course consists of the fundamentals of studio and field production including camera, audio, lighting, and production planning and directing the crew system.

RTV 3543. Multiple Camera Studio Production (3). Prerequisite: RTV 3531. This course studies the direction and production of multiple-camera studio video projects including camera, lighting, audio, and live-to-tape switching.

RTV 3571. Video Post Production (3). This course consists of advanced editing and post production techniques applied to field and studio projects. Emphasis on digital nonlinear editing systems.

RTV 3602. Television Interviewing and Hosting (3). This course introduces students to on-camera interviewing and hosting of news and public affairs programs including research and writing components.

RTV 3610. Computer Graphics and Animation (3). Prerequisites: RTV 3531 and RTV 3571. This course studies the design and production of computer-generated graphics and animation for video projects.

RTV 3611. 3D Video Animation (3). This course covers the techniques used to prepare, create, and post-produce 3D graphics and animation with video.

RTV 3671. Directing Performance for the Camera (3). Prerequisite: RTV 3531. This course allows students to direct student actors in a workshop setting. Actors and directors gain experience with an appreciation for those on the other side of the camera.

RTV 3680r. Video Workshop (1–3). (S/U grade only.) Prerequisite: Communication principles of major status. This course is designed for students to gain experience in the production of television programs and video projects. May be repeated to a maximum of three semester hours. May be repeated within the same semester.

RTV 3926r. Radio Workshop (1–3). (S/U grade only.) This course consists of general staff work in any department of the campus student-run radio station. Designed to afford both entry-level training and advanced application of skills. Students must work three hours per week for one hour of credit. May be repeated to a maximum of three semester hours.

RTV 3941r. Radio Practicum (3–6). Prerequisite: Instructor permission. This course consists of advanced radio work in either of two areas: management or other supervisory roles at the student radio station; or special individual projects in the application, study, or research of audio pertaining to radio broadcasting. May be repeated to a maximum of six semester hours.

RTV 4332. Documentary Video Production (3). Corequisites: RTV 3531 and RTV 3571. This course offers instruction in the theory and practice of production of non-fiction documentary video. Students produce a final video product after studying the documentary video course.

RTV 4467r. Television Practicum (3–6). Prerequisites: RTV 3531 and RTV 3571. This course consists of producing and directing television programs and video projects. May be repeated to a maximum of six semester hours.

RTV 4504. Electronic Media Audience Measurement (3). Corequisite: ADV 3008. This course provides an understanding of past and current methods of measuring radio, TV and other audiences; terms and formulas used by the ratings services; the local market radio ( Arbitron) and TV (Nielsen) reports; how ratings and other audience estimates are utilized in radio/TV/cable programming and sales; the newest developments in audience measurement; customized and qualitative approaches to audience measurement; and the impact of other factors on audience measurement.

RTV 4651. Advanced Narrative Production (3). Prerequisites: RTV 3531 and RTV 3571. This course includes original student narratives produced through writing, pre-production, and post-production stages.

RTV 4682. Advanced Feature Production (3). Prerequisites: RTV 3531 and RTV 3571; or RTV 3533. This course is a “professional experience” course designed to give students professional production experience in an educational environment. Students act as the production crew on program features. This includes videography, editing, audio, and graphic design.

RTV 4686. Advanced Feature Reporting (3). Corequisite: RTV 3602. This is a professional course designed to give you on-air experience in an educational environment, while producing FSU athletics and weekly segments for Seminole Sports Magazine, a thirty-minute show that airs weekly on Sun Sports.

RTV 4800. Radio-Television Station Operation and Programming (3). Corequisite: MMC 2000. This course deals with the purpose, function, organization, and programming of the radio and television station with an emphasis on research.

RTV 4930. Los Angeles Television Experience (3). Prerequisite: Admission to the Media Production major. Takes students to the TV production industry in Los Angeles including the industry structure, production cycles, the studios, the networks, and the writers. The course takes place in Los Angeles and also addresses professional career paths in the Los Angeles entertainment industry.

RTV 4970. Senior Thesis in Production (3). Prerequisites: Senior standing, twelve semester hours of 3000 level production courses, and instructor permission. This course is a thesis course designed for students in production. It is a capstone course intended to enable individual students, focusing on areas they have mastered in intermediate courses, to produce senior thesis video projects.

SFC 1017. Fundamentals of Speech (3). This course provides a survey and application of communication theory, including interpersonal communication, small group communication, and public speaking.
SPC 2608. Public Speaking (3). This course covers both the principles of and the practical experience of public speaking. The course is required of all majors. The course is also available in hybrid format (mostly online, partly classroom).

SPC 2730. Global Perspectives: Communication (3). This course gives students an introduction to the basic processes of intercultural communication from a global perspective with a goal of increasing their curiosity and acceptance of other cultures.

SPC 3210. Contemporary Human Communication (3). This introductory course surveys current scholarship in five areas of communication theory: group, rhetorical, interpersonal, legal, and performance communication.

SPC 3231. Contemporary Rhetorical Theory (3). Recommended prerequisite: SPC 3210. This course examines rhetorical theorists of the 20th century, including Burke, Richards, Foucault, Habermas, Fisher, and Weaver.

SPC 3233. Classical Rhetoric (3). Recommended prerequisite: SPC 3210. This course allows students to examine the origins of rhetorical theory during the classical period. The course emphasizes ideas on rhetoric of Plato, Aristotle, Cicero, and Quintilian.

SPC 3301. Interpersonal Communication (3). This course is a survey of recent literature on interpersonal communication including such topics as self-concept, emotional behavior, interpersonal conflict, and interpersonal attraction.

SPC 3331. Nonverbal Communication (3). This course is a review of recent literature on nonverbal communication including such topics as kinesics, proxemics, kinesthetic behavior, environment, physical characteristics, and personal appearance.

SPC 3425. Communication in Small Groups (3). This course in small groups includes both cognitive and experiential elements. Students study how small groups function as they create their own project groups and learn by doing.

SPC 3513. Argumentation (3). This course focuses on the principles of argumentation theory and the practical applications of these principles in different argumentative situations. Traditional as well as contemporary approaches to the study of argument are combined with the settings of argument to provide a practical experience for each student.

SPC 3593r. Competitive Intercollegiate Forensics (1). This course consists of competitive debate and individual events. Experienced students develop and perfect their speaking skills in a highly competitive, structured format of instruction and competition. May be repeated to a maximum of eight semester hours.

SPC 3544. Rhetoric of Didactic Literature (3). This course is an analysis of drama as an instrument for advancing a political or social thesis.

SPC 4360. Interviewing (3). This course is an analysis of the interview process in a variety of specific contexts and the development of communication skills used in interviewing.

SPC 4445. Group Dynamics and Leadership (3). Prerequisite: SPC 3425. This course is a review of concepts and research in group process and group leadership.

SPC 4540. Persuasion (3). This course is a study of the psychology of attitude formation and change, including theories of persuasion and principles of persuasive communication.

SPC 4605. The Principles of Speechwriting (3). Corequisite: COM 3110. This course explores the history and principles of speechwriting, the ethical issues involved, and speechwriting skills based on sound principles of communication.

SPC 4620. Strategic Speech Making (3). This course is designed to enhance the speech making abilities of students interested in a career where these skills are essential. Students are trained in selecting and organizing ideas; conducting Internet and library research; adapting a message to a particular audience; speaking to main points; supporting ideas; and delivering an effective message in a presentation are addressed in this course.

SPC 4630. Rhetoric of Women's Issues (3). This course is an examination of selected social and political issues that affect women today. The course includes analysis of content, lines of argument, supporting evidence, and rhetorical strategies.

SPC 4680. Methods of Rhetorical Criticism (3). Recommended prerequisite: SPC 3231 or SPC 3233. This course examines methods for the practice of doing criticism of rhetorical discourse. Topics include Aristotelian, Metaphor, narrative, post-modern, and cultural approaches to the analysis of texts.

SPC 4710. Intercultural/Intercultural Communication (3). This course is an exploration of intercultural and intercultural communication and the philosophies that underlie the concept.

SPC 4711. Gender and Communication (3). This course is designed to help students gain knowledge of the theories and processes of gender communication (about and between genders) from an interpersonal context perspective.

Graduate Courses

ADV 5007. Foundations of Integrated Marketing Communications (3).
ADV 5415. Hispanic Marketing Communication (3).

Florida State University 2015-16 General Bulletin Undergraduate Edition

Communication Science and Disorders

STATE OF FLORIDA COMMON PROGRAM PREREQUISITES

In addition, the School administers the Interdepartmental Certificate Program in Developmental Disabilities. The purpose of this program is to provide upper-division undergraduate students with a variety of disciplines with knowledge regarding etiology, assessment, treatment, and policy issues related to individuals with developmental disabilities and their families. Students seeking certification must complete nine semester hours of coursework from three different departments and three semester hours of practicum from an approved list of courses and practica. No more than three semester hours may be taken in the student’s major area of study. More than forty courses are available in the following disciplines: art education; communication science and disorders; family and child sciences; middle and secondary education; music education/therapy; nursing; psychology; social work; and special education.

STATE OF FLORIDA COMMON PROGRAM PREREQUISITES

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit http://www.flic.org/partner-portal/common-prerequisite-manual for the most current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. STA XXXX
2. BSC XXXX or APK XXXX or ANT X511
3. PSY XXXX or EXP XXXX or CLP XXXX or DEF XXXX or SYG XXXX or SYD XXXX or SYO XXXX or SYP XXXX or FYC XXXX or FAD XXXX
4. PHY XXXX or CHM XXXX or PSC XXXX

Minimum Requirements for Application

Students normally enter the program at the junior level, must have a minimum grade point average (GPA) of 3.0 for all coursework, and have successfully completed Florida State University’s liberal studies requirements. Admission to Florida State University does not ensure admission to the School of Communication Science and Disorders, nor does attainment of the minimum grade point average. Formal application to the school is required of all entering majors. Non-FSU or transfer students also must apply to the University. Normally, admission is for the Fall semester. All materials necessary for admission applications must be submitted directly to the school by the first business day in February by 5:00 p.m. EST for priority admission. Additional deadlines and admission procedures can be found on the school Web site, at http://www.commdisorders.cci.fsu.edu/. It is recommended that students include MAC 1105 and STA 2122 in their pre-major coursework.

Students applying for admission must:

1. Have an overall GPA of 3.0 or higher on all college coursework to be considered for admission
2. Have completed CLEP and accelerated credit scores posted by time of application
3. Have all liberal studies course substitutions approved by the appropriate dean and posted by time of application
4. In addition, students must complete the following requirements by the end of the Spring semester in which they are applying:
   a. A minimum of fifty-two semester hours of college coursework accepted by Florida State University
   b. Successfully complete all Liberal Studies and writing requirement coursework as accepted by Florida State University

Note: All coursework for eligibility must be reflected on submitted transcripts or on Spring course schedules by the application deadline.

Requirements for an Undergraduate Major in Communication Science and Disorders

The curriculum leading to the baccalaureate degree consists of forty-two credit hours of upper division coursework and combines liberal arts education with professional coursework for the graduate program in the School or elsewhere. At the undergraduate level, students are provided experiences relating to the basic processes of hearing, language, and speech. The junior-year course offerings focus on the basic science and developmental foundations considered prerequisite for the specialty curricula initiated during the senior year. To qualify for graduation from the major, all undergraduates in Communication Science and Disorders must earn a grade of “C-” or better for each required major course and must have an overall GPA of at least 2.0 in major coursework, and complete forty-two credit hours of School of Communication Science and Disorders core courses.

Speech-language pathology courses cover the nature, evaluation, and treatment of problems of articulation, language, fluency, voice, neurophysiological, and structural disorders affecting speech and language. Audiology courses are concerned with the identification, measurement, evaluation, and rehabilitation of persons with hearing impairments. Studies in communication science concern analysis and measurement of components of the production, transmission, and reception of the speech signal.

Undergraduate students learn anatomy and physiology of the speech and hearing mechanisms; sound and its perception; the development of language and communication systems; the components of the English sound system; the neurological bases of speech, language, and hearing; sign language; strategies for clinical intervention; diagnostic/evaluation strategies in speech, language, and hearing; basic concepts related to disorders in language, phonology, and fluency; as well as professional issues in communication disorders.

The major professional, educational, and clinical experiences occur during graduate studies leading to the master’s degree. Eligibility for the cer-
This course introduces the principal decoding skills of Signed English and finger spelling. Native speakers of another language and other students who wish to demonstrate proficiency by means other than coursework should consult the Department of Modern Languages and Linguistics, or for American Sign Language, the School of Communication Science and Disorders.

Fulfilling the language requirement for the School will partially fulfill the University requirements for a Bachelor of Arts (BA) degree. To earn a BA degree, the student must complete the language requirement and an additional nine semester hours in the fields of humanities or history beyond the liberal studies requirements. Please consult the “Undergraduate Degree Requirements” chapter of this General Bulletin for more information. If the additional nine semester hours in humanities or history are not present on the student record at the point of graduation, the student could expect to earn a Bachelor of Science (BS) degree.

Please note that the School’s classical or modern foreign language requirement is more extensive than the University’s foreign language admission requirement. It is important to understand that, although completion of two years of high school foreign language courses or two semesters of post-secondary foreign language will satisfy the University’s admission requirement, these courses do not satisfy the School of Communication Science and Disorders foreign language graduation requirement for BA/BS students.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in communication science and disorders satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

Retention Standards

The School of Communication Science and Disorders reserves the right to discontinue enrollment of any student in the major at any time if, in the judgment of the faculty, the student does not meet the standards of the School or the major. Specifically, majors in the School of Communication Science and Disorders must maintain an overall GPA of 3.0 on all college coursework or they may be placed on probation and may be dropped subsequently from the major.

Definition of Prefixes

ASL—American Sign Language
LIN—Linguistics
SPA—Speech Pathology and Audiology

Undergraduate Courses

ASL 1140C. Beginning American Sign Language (4). This course is designed to introduce students to the vocabulary, grammar, and non-verbal aspects of American Sign Language with an emphasis on basic dialogue skills.

ASL 2150C. Intermediate American Sign Language (4). Prerequisite: ASL 1140C. This course is designed to expand the students’ comprehension and production of American Sign Language with a primary emphasis on dialogue. Focus is on increased vocabulary, conceptual accuracy, verb inflections, and ASL idioms.

ASL 2160C. Advanced American Sign Language (4). Prerequisite: ASL 2150C. This course is designed to produce a fluent sign language user with high-level encoding (production), decoding (reception), and pragmatics skills (cultural rules of conversation) when signing dialogues and narratives.

ASL 2400. Introduction to Sign Language Systems (2). This course provides an introduction to the deaf culture and to sign language as a communication system, and encoding and decoding skills of Signed English and finger spelling.

ASL 2510. Deaf Culture (3). This course acquaints students with the political, cultural, educational, and social parameters of Deaf Culture. International and United States perspectives are included.

LIN 3200. Fundamentals of Phonetics (3). This course is a study of the acoustical and physiological aspects of speech-sound production. An orientation to the international phonetic alphabet and its use for the broad transcription of General American English.

SPA 2001. Introduction to Communication Sciences and Disorders (3). This introductory course provides an overview of human communication disorders with a focus on the neuroanatomic, acoustic, biological, psychological, developmental, and linguistic principles underlying human communication disorders. It also provides an overview of the field of speech-language pathology and audiometry with an emphasis on the scientific aspects of clinical assessment and rehabilitation of clients. Intended for non-majors.

SPA 2020. Effective Oral Communication (3). This course surveys and applies selected principles of oral communication for building standard American English. Course topics include listening and speaking skills, vocal health, interpersonal communication, public speaking, speaking apprehension, and dialect/accent differences. Speaking activities are designed to meet the student’s professional goals.

SPA 3801r. Applications of Research in Communication Sciences and Disorders (1–3). Students apply research techniques while assisting with activities in various research settings, through simulations in the classroom, and through individual projects.

SPA 3949r. Cooperative Education Work Experience (0). (S/U grade only.) Prerequisites: SPA 3201, SPA 3402, and SPA 4400. This course provides supervised practice in therapeutic procedures with persons with various speech-language problems.

SPA 4004. Normal Communication Development (4). This course provides an overview of the fundamental bases of language development, offering skills and knowledge that are pivotal to professional growth for a variety of careers and scientific inquiry. This overview serves as a foundation for advanced coursework and for a variety of professions such as working in an educational setting, in a child-care facility, with individuals with communication disorders, or conducting related research.

SPA 401C. Acoustics for Speech and Hearing (4). This course covers basic acoustics and phonetics, including acoustic properties, frequency, intensity, duration, and wave composition and their psychological correlates, pitch, loudness, time, and sound quality. Lectures, demonstrations, and required laboratory project.

SPA 4050. Clinical Observation and Practice (3). (S/U grade only.) Prerequisites: SPA 3201, SPA 3402, and SPA 4400. This course provides supervised practice in therapeutic procedures with persons with various speech-language problems.

SPA 4056. Clinical Methods (3). This course introduces students to clinical practice of speech-language pathology. Students become acquainted with the principles of assessment, application of diagnostic information, intervention planning, intervention strategies and techniques, service delivery options, and data collections. Students also gain an understanding of team membership and are introduced to the skills necessary for team building.

SPA 4101C. Anatomy and Physiology of the Speech Mechanism (4). This course is an introduction to the anatomy and physiology of the systems underlying speech production: respiration, phonation, articulation, and resonance. The anatomy and physiology of the ear are also introduced. Lecture and laboratory experiences.

SPA 4104. Neurological Bases of Communication (3). Prerequisite: SPA 4101C. This course covers normal neuroanatomy, neuropsychology, and neuropsychopathies affecting communication. Prior anatomy and physiology of speech mechanisms needed.

SPA 4112. Clinical Phonetics (4). This course focuses on the phonetic transcription of the spoken language. Students learn and frequently practice transcription of vowels and consonants at the levels of isolation, syllables, words, phrases, and connected speech. The course also covers relevant material about phonetics as a science, the similarities and differences between spelling and sound, the anatomy and physiology of the speech mechanism, clinical phonetics, and dialectal variation in the spoken language.

SPA 4255. Developmental Communication Disorders (3). This course places disorders in perspective, defines basic theories of causation, introduces identifying characteristics, and presents an overview of procedures for evaluation and treatment. Topics include cultural and linguistic diversity, evidence-based practice, and current trends in the discipline.

SPA 4257. Acquired Communication Disorders (3). This course introduces the principles and procedures involved with diagnosis and treatment of adults with communication disorders. Students in this course develop a fundamental knowledge of voice disorders, dysphagia, head and neck cancer, neurogenic communication disorders, motor speech disorders, language disorders, and cognitive-linguistic disorders.

SPA 4302. Introduction to Clinical Audiology (3). This course is an introduction to disorders of hearing and the measurement of hearing loss by pure-tone, speech, and impedance audiology.

SPA 4302L. Introduction to Clinical Audiology Laboratory (1). (S/U grade only.) Pre- or corequisite: SPA 4302. This course is the practical application of the techniques learned in SPA 4302.

SPA 4321. Aural (Re)habilitation I (3). Prerequisite: SPA 4302. This course examines diagnostic-evaluation and (re)habilitation techniques.

SPA 4411. Nature of Autism and Severe Communication Disorders (3). This course provides an overview of the characteristics and etiology of autism spectrum disorders and the knowledge needed to develop effective communication and language assessment and intervention strategies for individuals with autism and severe communication disabilities.

SPA 4550r. Practicum in Developmental Disabilities (3). This course is designed to provide students with a field experience to gain practical and hands-on experience to better understand the services available to help people with developmental disabilities. May be repeated to a maximum of six semester hours.

**Graduate Courses**

- SPA 5012. Introduction to Communication Science (4).
- SPA 5033. Introduction to Clinical Audiology (4).
- SPA 5055r. Professional Tools in Speech-Language Pathology (1–3).
- SPA 5102. Neurological Basis of Communication (4).
- SPA 5204. Phonological Disorders (3).
- SPA 5211. Voice Disorders (3).
- SPA 5225. Fluency Disorders (3).
- SPA 5230. Motor Speech Disorders (3).
- SPA 5252. Speech Production and Swallowing Disorders (3).
- SPA 5254. Acquired Neurolinguistic and Cognitive Disorders (3).
- SPA 5256. Developmental Speech Disorders (3).
- SPA 5305Lr. Measurement and Management of Impaired Hearing (1–3).
- SPA 5322. Advanced Aural (Re)habilitation (3).
- SPA 5403. Language-Learning Disabilities in School-Age Children (3).
- SPA 5432. Autism and Severe Communicative Disabilities (3).
- SPA 5460. Foundations of Developmental Communication Disorders (3).
- SPA 5462. Developmental Communication Disorders: School-Age Issues (3).
- SPA 5500. Clinical Practicum in the Schools (3).
- SPA 5505r. Advanced Clinical Practicum (1–4).
- SPA 5522. Medical Speech Pathology (3).
- SPA 5526L. Laboratory in Child Speech-Language Diagnostics (1–3).
- SPA 5528L. Laboratory in Adult Speech-Language Diagnostics (1–3).
- SPA 5554. Counseling in Speech-Language Pathology (3).
- SPA 5554Lr. Supervision and Counseling in Communication Disorders (1).
- SPA 5565. Seminar in Dysphagia (3).
- SPA 5546. Communication for Persons Deaf and Hard of Hearing (3).
- SPA 5906r. Directed Individual Study (1–3). (S/U grade only.)
- SPA 5910r. Supervised Research (1–5). (S/U grade only.)
- SPA 5940r. Supervised Teaching (1–5). (S/U grade only.)
- SPA 5941r. Beginning Speech-Language Pathology Practicum (1–4). (S/U grade only.)
- SPA 5942r. Community Clinical Practicum (1–4).
- SPA 5944. Speech-Language Pathology Internship (1–12). (S/U grade only.)
- SPA 6140. Seminar in Experimental Phonetics (1–3).
- SPA 6231r. Seminar in Neuropathologies (1–3).
- SPA 6434r. Seminar on Developmental Disabilities (1–3).
- SPA 6804. University Academic and Clinical Teaching Colloquium (0–2). (S/U grade only.)
- SPA 6805r. Seminar in Clinical Research Methods (3).
- SPA 6825r. Seminar in Speech Pathology (1–3).
- SPA 6841r. Seminar in Language (1–3).
- SPA 6900r. Readings for the Preliminary Examination (1–6). (S/U grade only.)
- SPA 6930r. Seminar in Special Topics (1–3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
among faculty and students in the Departments of Computer Science, Statistics, Mathematics, Scientific Computing, Biological Science, and Chemistry, and College of Medicine at FSU with goals to further understand and better model complex living systems at all physical and temporal scales.

Degrees Offered

The Department of Computer Science offers programs leading to the Bachelor of Science (BS) and Bachelor of Arts (BA) degrees, the Master of Science (MS) degree, and the Doctor of Philosophy (PhD) degree in Computer Science (CS). At the bachelor and master levels, programs of study are available for those who plan to work toward higher degrees, as well as for students planning on careers as computing professionals.

The department also offers a combined BS/MS degree program designed for academically strong students who wish to pursue an accelerated program culminating in a BS degree and a MS degree in Computer Science. Students who have reached junior status and have at least a minimum 3.0 GPA at FSU and a minimum 3.2 GPA in Computer Science BS and CS/mathematics courses should contact the CS undergraduate advisor for more information.

In conjunction with the Department of Biological Science, the department offers an interdisciplinary BS degree in Computational Biology. The purpose of this interdisciplinary major is to provide a top-notch educational program for students interested in the areas of computational biology and bioinformatics. The program seeks to achieve two goals: (1) to develop an understanding of the issues associated with developing biologically meaningful computational models, and (2) to give students the broad-based education that is needed to create a set of models directed toward solving a practical biomedical problem.

In conjunction with the College of Criminology and Criminal Justice, the department offers an interdisciplinary BS degree in Computer Criminology. This program teaches students to understand the emerging problem of computer-related crime as well as how computers can assist in the prevention, detection, and apprehension of computer-crime perpetrators.

In each of the undergraduate degree programs within the Department of Computer Science, students must meet all applicable University and College requirements and, unless otherwise specified, coursework required for the major must be completed with a “C+” or better. No CGS courses, individual instruction courses such as CIS 3949r, Cooperative Education Work Experience, and CIS 4900r, Directed Individual Study will count toward the requirements for any of these majors. Computational Biology and Computer Criminology students who have major codes within the Department of Biological Science or the College of Criminology are subject to the rules and requirements of those institutions. All students graduating from the Department of Computer Science are required to complete an exit survey in the semester prior to graduation. If the exit survey has not been submitted, the department will not approve graduation.

Currently, Computer Science has no restrictions on the number of hours that can overlap with another major. Note: All degree requirements stated are subject to change. Please refer to http://www.cs.fsu.edu/current/undergrad/ for the most current information.

Accreditation

The BS degree program in computer science is accredited as a computer science degree program by the Computer Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD, 21202-4012; (410) 347-7700. Note that ABET views the BS and BA as distinct degree programs, and that this accreditation is specifically for the BS degree program in CS and is not applicable to the BA degree in CS or the degrees in computational biology or computer criminology.

Distance Learning

The undergraduate degree program in Computer Science is available through Internet-supported distance learning. Certain limitations regarding students seeking admission to upper-division studies in the Computer Science Department apply. For more information contact Florida State University’s Office of Distance Learning (ODL) at http://distance.fsu.edu/.

Honors in the Major

The Department of Computer Science offers a program in honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, and each major determines the courses needed to satisfy this requirement. Undergraduate computer science, computational biology, and computer criminology majors must satisfy this requirement by earning a grade of “C-” or higher in COP 3014. Note: The Department of Computer Science offers several courses, including CGS 2060, CGS 2100, CGS 3406, and COP 3014, which are intended to meet the Computer Skills Competency requirement for students in other majors. However, students should check with their major department whether any of these courses are designated as satisfying the computer skills competency in their major.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fwv.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Computer Science, BS

1. COP XXXX: one introductory programming course for three credit hours in C, C++, Java, or an equivalent programming language
2. MAC X311
3. MAC X312
4. PHY X048/X048L and PHY X049/X049L, or PHY X048C and PHY X049C, or BSC X010 and BSC X011 and CHM X045C
5. XXX XXXX: one science course for two to four credit hours for science majors

Note: The Department requires that item 5 be identified as “For Science Majors” within the Liberal Studies for the 21st Century Program or have such a course as a prerequisite. Students who choose to complete both BSC X010L and BSC X011L will satisfy the “Science for Science Majors” requirement.

Computer Science, BA

The above requirements are only required for the computer science BS major. The below requirements are only for the computer science BA major.
1. MAC X140
2. STA X122 or STA X023

Note: STA X122 is preferred.

Computational Biology (Bioinformatics)

1. BSC X010 or BSC X040 or PCB X011
2. BSC X011 or BSC X041
3. CHM X045/X045L or CHM X045C, or CHM X040 and CHM X041
4. CHM X046/X046L or CHM X046C
5. PHY X048/X048L or PHY X053/X053L
6. PHY X049/X049L or PHY X054/X054L
7. MAC X311
8. MAC X312

Computer Criminology

1. COP XXXX: one course for three credit hours in computer programming
2. MAC X105
3. MAC X140

College Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin, as well as all University-wide requirements.
Requirements for the BS and BA Degree Programs in Computer Science

There are two majors for the CS bachelor’s degree: the BS in computer science (CS BS) and the BA in computer science (CS BA). A distance-learning version of these majors is offered through the Panama City campus.

The undergraduate programs in computer science are limited access. For the 2015-2016 academic year, the minimum GPA is 2.65. This requirement is applied equally to AA degree transfers from Florida public institutions and rising juniors at Florida State University and for students transferring into the Computer Science program, whether from another department or another institution. Upon entrance into the program, the student must maintain a 2.5 GPA to remain in good standing in the major.

A student who has accumulated more than five grades below “C–” (including grades of “U” in mathematics, statistics, natural science, or computer science courses taken for college credit at Florida State University or elsewhere, whether repeated or not, will not be permitted to continue as a major in the department.

Note: The term “major” as used here is often called a “track” or “option” in other states or at other universities.

Core Requirements - BS and BA in Computer Science

In addition to all University and College of Arts and Sciences requirements, the common program prerequisites stated above, and the courses specific to each major that are listed separately under the respective headings below, all CS BS and CS BA students must complete the following core courses:

- MAD 2104 Discrete Mathematics I (3)
- CDA 3100-3101 Computer Organization I-II (6)
- CEN 4020-4042 Software Engineering I-II (6)
- COP 3014 Programming I (3)
- COP 3330 Object Oriented Programming (3)
- COP 3353 Introduction to Unix (1)
- COP 4530 Data Structures, Algorithms, and Generic Programming (3)
- COP 4610 Operating Systems and Concurrent Programming (3)
- COP 4710 Theory and Structure of Databases (3)
- COP 4020 Programming Languages (3)

Both of the majors in Computer Science require that one of the computer science electives cover an additional programming language not covered in COP 3014-3330.

Non-major students completing CGS 3406 with an “A” or “A–” can count this as full credit for COP 3014 when transferring into a major offered by the Computer Science Department.

Additional Requirements for Computer Science BS Major

In addition to the core requirements described above and the common prerequisites for this major, each student must complete:

- MAD 3105 Discrete Mathematics II (3)
- COT 4420 Theory of Computation (3)
- COP 4531 Complexity and Analysis of Data Structures and Algorithms (3)
- CIS 4250 Ethics and Computer Science (3)
- STA 3032, 4321, or 4442.
- At least eleven semester hours of computer science electives, at least nine of which must be at the 4000 level.

One of the 4000-level computer science electives may be replaced with an advanced math elective, which must be a mathematics or statistics course with a prerequisite of Calculus II (MAC 2312) or Discrete Mathematics II (MAD 3105). CIS 4250, Ethics in Computer Science, satisfies the University Oral Communication Competency Requirement. The required collateral courses in mathematics, physics, and statistics constitute an acceptable interdisciplinary minor for students in this major.

Additional Requirements for Computer Science BA Major

In addition to the core requirements described above and the common prerequisites for this major, each student must complete:

- STA 2122, STA 2023, or any of the statistics courses approved for the CS BS major;
- At least nine semester hours of computer science electives, at least six of which must be at the 4000 level;
- At least nine semester hours in the fields of humanities and history, in addition to those taken to satisfy the liberal studies and foreign language requirement;
- A minor approved by the department.

A student in this major may not apply CIS 4250 toward the 4000-level CS electives, but may apply it as a general elective and toward satisfaction of the University Oral Communication Competency Requirement. The general electives and additional courses in the humanities and history may be applied toward satisfaction of the minor requirement. Students should contact the CS undergraduate advisor for information concerning acceptable minors. Additional general electives are required to bring the total credits to 120 hours.

Note: Because of reduced requirements in mathematics and theoretical computer science, students graduating with the BA in CS who wish to be admitted to the graduate program in CS at FSU may be required to take remedial undergraduate courses (http://www.cs.fsu.edu/current/grad/ug_pre-reqs.html), like students from other closely related majors such as Mathematics and Computer Engineering.

Requirements for the BS Degree Program in Computational Biology

In addition to the common prerequisites for this major, students must complete the following courses from biological sciences: BSC 2010, BSC 2011, PCB 3063, and PCB 4674, for a total of twelve hours. In addition, three hours of biological science elective credits must be chosen from: BOT 4394, BSC 2010L, BSC 2011L, BSC 4613, BSC 4900r, MCB 4403, MCB 4403L, PCB 3134, PCB 3743, PCB 4024, PCB 4233, PCB 4523, and PCB 4843.

From computer science, students must complete CDA 3100, COP 3014, COP 3330, COP 3353, and COP 4530, for a total of thirteen hours. In addition, three hours of computer science elective credit must be chosen from: COD 4531, COP 4710, COP 4710L, and CIS 4250.

Students must complete an additional six hours of electives chosen from Biology, Computer Science, Mathematics, and/or Statistics. The Biology and Computer Science electives may be chosen from those listed above. The mathematics electives are chosen from MAC 2313, MAC 2380, or MAC 4481. The Statistics electives are chosen from STA 4102, STA 4103, STA 4202, STA 4203, STA 4442, STA 4502, or STA 4702.

For the capstone courses, students must complete BSC 4933r, Intro Bioinformatics, and ISC 4221, Algorithms for CompBio, for a total of six hours. In addition, the following must be completed: Mathematics/Statistics: MAC 2311, MAC 2312, MAD 2104 and STA 2171 totaling fifteen hours; Physics: PHY 2048C or PHY 2053C totaling four or five hours; Chemistry: CHM 1045, CHM 1045L, CHM 1046 and CHM 1046L totaling nine hours.

Requirements for the BS Degree Program in Computer Criminology

With the exception of CCJ 3011 and CCJ 4700, which must be passed with a “C” or better, all courses required for the major must be completed with a grade of “C–” or better.

In addition to the common prerequisites for this major, students must complete the following core from computer science: COP 3014, COP 3353, COP 3330 and CDA 3100, totaling ten hours. A total of twelve elective hours must be completed, chosen from CIS 4360, CIS 4361, CNT 4406, CNT 4504, CNT 4603, COP 4342, COP 4530, COP 4610, CDA 3101, and COP 4710. The capstone course CIS 4385 must be completed for three credits.

From criminology, students must complete the following core: CCJ 2020, CCJ 3011, CCJ 4700, CCJ 4938, and CJIE 3110 totaling twelve hours. A total of nine elective hours must be completed, chosen from CCJ 3644, CCJ 3666, CCJ 4497, CCJ 4614, CJC 3010, CJE 4610, CJJ 4010, CJL 3510, CJL 4064. The capstone course CCJ 4938, CJ System Responses to Cybercrime, must be completed for three credits.

In mathematics, students must complete MAD 2104 for three hours.

Requirements for a Minor in Computer Science

Students pursuing a minor in Computer Science may choose one of two sets of computer science courses preapproved by the department: the General Track (twelve hours) or the Science Track (thirteen hours). Courses outside of the preapproved tracks must be approved in advance (in writing) by the department. Students must also satisfy stated prerequisites before enrolling in any computer science course. A grade of “C–” or higher must be earned in each course counted toward the minor. For more information on the minor, including preapproved courses, see http://www.cs.fsu.edu/current/undergrad/minor.php.
Requirements for NSA Training Certificate

In April 2000, the NSA’s Information Assurance Directorate designated Florida State University as having met the training standards of the Information Assurance Courseware Evaluation. This process involved assessing the quality of FSU’s curriculum by a formal, rigorous training standard. FSU has, for the third time, renewed its certification to train specialists under the Committee of National Security Systems (CNSS) standards NSTISSI standard 4011 “Information Security Professionals.” As of August 2008, the University is also certified to offer the additional professional standard of CNSS 4014 for “Information Security Officers.”

By achieving these designations, FSU students that complete the courses specified in the program are recognized as having been trained to serve as Information Systems Security Professionals or Information Systems Security Officers and receive a certificate that says the student “has satisfactorily completed an educational program certified by CNSS as compliant with NSTISSI No. 4011 or CNSS 4014.”

This certificate is only available to degree-seeking undergraduate and graduate students at FSU that complete the core courses and their prerequisites. The certificate must be requested by the student in the same term of graduation as the student’s degree program.

The requirements to meet the standards for the CNSS-4011 (Security Officer) certificate at the undergraduate level are as follows: CIS 4360, CNT 4406, CNT 4504, CNT 4603, COP 4610, COP 4710.

In order to obtain the additional certificate for completion of the NSTISSI-4011 (Security Professional) requirements, students must also take the following core courses: CDA 3101, COP 3330.

Definition of Prefixes

CAP—Computer Applications
CDA—Computer Design/Architecture
CEN—Computer Software Engineering
CGS—Computer General Studies
CIS—Computer Science and Information Systems
CNT—Computer Networks
COP—Computer Programming
COT—Computing Theory
ISC—Interdisciplinary Sciences

Undergraduate Courses

Note: Certain courses are sometimes offered in a distributed format and as such are available to distance learning students in addition to residential students. Contact the Computer Science Department for details or go to http://www.cs.fsu.edu.

CEN 4020. Software Engineering I (3). Pre- or corequisite: COP 4530. This course is the first of a two-semester software engineering-sequence, integrating theory and practice. Topics include software requirements specification, requirement review, software development, ethics, software-development life cycle, teams, and project management. Oral presentation required.

CEN 4021. Software Engineering II (3). Prerequisite: CEN 4020. This course is the second of a two-semester sequence on project-system development and focuses on design and implementation. Topics include software design, architectures, testing, deployment, metrics, configuration management, reusability, portability, and interoperability.

CEN 4681. Expert Systems (3). Corequisite: COP 4530. This course covers definitions and historical development, methodology tools for design and analysis, survey of existing systems, inference engines, and theory and applications of fuzzy relational products to new developments in inference engines.

CGS 2600. Computer Fluency (3). This course covers computer and digital technology skills and concepts for all majors. Topics cover file management, personal information management, Internet communications, word processing, spreadsheet, and other soft-

CGS 3406. Object-Oriented Programming in C++ (3). Prerequisite: MAC 1105. This course covers a brief introduction to computers, C++ basics, procedural abstraction and functions, an introduction to the object-oriented paradigm, namespaces, arrays, strings vectors, pointers, and recursion. Emphasis is on program problem-solving. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3949r. Experiential Learning (0). This course involves field placement in approved industry or government settings. Students are responsible for making the arrangements. Prerequisite: permission. This course involves field placement in approved industry or government settings. Students are responsible for making the arrangements. Prerequisite: permission.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.

CIS 3943r. Internship in Computer Science (3–6). (S/U grade only.) Prerequisites: COP 3330, CGS 3416, CGS 4092, and COT 3931r. May not be applied toward computer science major or minor. Not open to students with credit in CGS 2600.
**CIS 4360. Introduction to Computer Security (3).** Prerequisite: CGS 3406 or COP 3014 or equivalent programming course. This course covers computer security threats and attacks, covering operating systems, network security, cryptographic systems and protocols, security policies, models of security, database security, administering security, physical security and TEMPEST, and brief introductions to network security and legal and ethical aspects of computer security.

**CIS 4361. Applied Computer Security (3).** Prerequisite: CDA 3100. This course addresses threats to and vulnerabilities of information systems and provides hands-on opportunities for students to work with current counter-threat technology. This course also covers analytic principles to support vulnerability assessment and countermeasure design.

**CIS 4385. Cybercrime Detection and Forensics (3).** Prerequisites: CDA 3100 and CJE 4610. This course discusses tools, techniques, and procedures for detecting cybercrime and analyzing collected data related to past and on-going cyber offenses, along with preserving the legal value of the collected evidence.

**CIS 4900r. Directed Individual Study (1–4).** May be repeated to a maximum of twelve semester hours.

**CIS 4930r. Special Topics in Computer Science (3).** Prerequisite: COP 4530. May be repeated to a maximum of six semester hours. May be repeated within the same semester.

**CNT 4406. Network Security and Cryptography (3).** Corequisite: COP 4530. This course examines threats to computer networks, network vulnerabilities, techniques for strengthening passive defenses, tools for establishing an active network defense, and policies for enhancing forensic analysis of crimes and attacks on computer networks. Topics include cryptographic techniques, key management, network firewalls, consumer-level security, encryption and decryption, network security protocols, formal methods for analyzing network security, electronic mail security, firewalls, intrusion detection, Internet privacy, and public key infrastructures.

**CNT 4504. Introduction to Computer Networks (3).** Corequisite: COP 4530. This course covers circuit-switched and packet switched networks; protocols; protocol layering; application layer programming; server-side programming, including using standard libraries, network programming and socket programming, delay, TCP, UDP, TCP reliability, flow control, and congestion control; network layer; routing protocols, switching technologies, multicast, and mobility; link layer, local area networks, error detection and correction; wireless networks, multimedia networking; network security and management.

**CNT 4603. Computer and Network System Administration (3).** Prerequisite: CGS 3406 or COP 3014. This course offers a hands-on introduction to Unix and Microsoft Windows systems and network administration. Topics include installation, maintenance, and extension of a multi-user computer system; development of administrative policies and procedures; network administration; handling system failures; troubleshooting, security protocols, and practical troubleshooting and problem solving.

**COP 3014. Programming I (3).** Prerequisite: MAC 1140. This course covers fundamental concepts and skills of programming in a high-level language. Flow of control: sequence, selection, iteration, subprograms. Data structures: arrays, strings, structs, ADT lists, trees, stacks, queues, files. Introduction to compilers and interpreters, error checking and debugging, programming languages, including maxima and minima, basic searching and sorting, simulation, etc.). Good program design using a procedural paradigm, structure, and style are emphasized. Interactive and file I/O. Testing and debugging techniques. Intended primarily for computer science or computer engineering majors, or anyone who is required to take COP 3330.

**COP 3035. Introduction to Programming Using Python (3).** Prerequisite: MAC 1105. This course includes Python basics, use of Python control and data structures, use of Python functions, Python I/O, and implementation of basic Python programming tasks.

**COP 3223. Introduction to Programming with the C Language (3).** Prerequisite: MAC 1140. This course is an introduction to C programming. Topics include types, operators, and expressions; control structures; file I/O; functions and program structure; and software design techniques. Eight to ten programming projects are required.

**COP 3252. Internet Applications Programming with Java (3).** Prerequisite: COP 3330. This course covers the applications of the Java language to education, electronic commerce, scientific research, and distributed systems in general. Topics include the following: the architecture of the Web including Java protocols for passing information in typical Web applications; introduction to the Java programming language; developing Graphical User Interfaces using Swing; an introduction to distributed objects using Java Remote Method Invocation (RMI); and server-side programming using Servlets and JDBC. Emphasis is placed on practical programming using these technologies.

**COP 3330. Object Oriented Programming (3).** Prerequisite: COP 3014 or a comparable course in C or C++ programming. Corequisite: COP 3335. This course focuses on object-oriented programming in a modern programming language, including classes, objects, inheritance, and polymorphism; introduction to data structures and container classes.

**COP 3353. Introduction to UNIX (1).** This course is required for majors and non-majors who do not have prior experience with the UNIX operating system. Topics include: UNIX history, requesting maxima and minima, basic searching and sorting, simulation, etc.); good program design using a procedural paradigm, structure, and style are emphasized. Interactive and file I/O. Testing and debugging techniques. Intended primarily for computer science or computer engineering majors, or anyone who is required to take COP 3330.

**COP 3502. Programming Languages (3).** Corequisite: COP 4530. This course covers the principles of programming languages, including language constructs, syntactic and semantic specification methods, runtime structures, implementation techniques, and alternative programming paradigms. The course involves programming assignments in a variety of languages and individual investigations accompanied by a required written report and oral presentation.

**COP 4342. Unix Tools (3).** Prerequisite: COP 3330. This course is an introduction to selected Unix tools and utilities that are useful for advanced users, programmers, and system administrators, such as cut, paste, cp, mv, man, grep, scripts, the perl language, revision control systems, debuggers, editors, and the make, awk, sed, and expect utilities.

**COP 4380. Reactive Systems Programming (3).** Prerequisite: COP 4530. Corequisite: COP 4610 or instructor permission. This course covers the theory of Hierarchical State Machines (HSM) and the use of HSM to model and implement Reactive Systems [RS]. This course explores implementations of HSM in C, C++, Java, HSM are applied for modeling and implementing RS including real-time, multi-threaded, and embedded systems.

**COP 4530. Data Structures, Algorithms and Generic Programming (3).** Prerequisites: COP 3330 and MAD 2104. Pre- or corequisite: CDA 3100. This course focuses on data structures and implementation of generic data structures using a modern programming language; reuseable program components.

**COP 4531. Complexity and Analysis of Data Structures and Algorithms (3).** Prerequisites: COP 4530 and MAD 3105. Corequisites: STA 3032 or STA 4321; and STA 4442. This course is an analysis of the complexity of algorithms, including sorting, searching, and graph algorithms; use and implementation of data structures.

**COP 4610. Operating Systems and Concurrent Programming (3).** Prerequisites: COP 3330, CDA 3100, or instructor permission. This course explores design principles of batch, multiprogramming, and time-sharing operating systems: linking, loading, input-output systems, interacting processes, storage management, process and resource control, file systems.

**COP 4613. Real-Time Systems (3).** Prerequisite: COP 4610 or instructor permission. This course is a survey of issues in the design and implementation of real-time computer systems. Topics include: the use of computers for controlling real-time processes, the use of Ada in embedded computer systems, and implementation of a real-time computer system.

**COP 4656r. Mobile Programming (3).** Prerequisite: COP 4530. This course teaches students how to program mobile devices. Students use event-based models to write and deploy a content based application using a mobile computing software framework. May be repeated to a maximum of nine semester hours.

**COP 4710. Theory and Structure of Databases (3).** Prerequisites: COP 3330 and MAD 2104. This course examines the theory of relational and object-oriented databases, relational database management systems and SQL; design, development, and implementation issues in database systems.

**COP 4813. Web Applications Programming (3).** Prerequisite: COP 3252. This course teaches programming of distributed Web applications using Java Database Connectivity, Servlets, Java Server Pages, Remote Method Invocation, and Enterprise Java Beans (both session and entity beans). Use of the Sun Microsystems Java 2 Enterprise Edition development platform either directly or through an Integrated Development Environment similar as IBM's WebSphere is also covered.

**COT 4401. Top 10 Algorithms (3).** Prerequisite: COP 4530. This course focuses on a wide-ranging selection of ten of the most influential algorithms in use today: what they are, how they work, and their impact on modern life.

**COT 4420. Theory of Computation (3).** Prerequisite: MAD 3105. This course is an introduction to the theory of computation, including models of computation such as Turing machines; theory of programming languages, including grammars, parsing, syntax, and semantics.

**COT 4425. Formal Methods in Software Engineering (3).** Prerequisite: MAD 3105. This course examines formal methods in software analysis and design, including formal specification and verification.

### Graduate Courses

**CAP 5415. Principles and Algorithms of Computer Vision (3).**

**CAP 5605. Artificial Intelligence (3).**

**CAP 5638. Pattern Recognition (3).**

**CAP 5726. Introduction to Computer Graphics (3).**

**CAP 6417. Theoretical Foundations of Computer Vision (3).**

**CDA 5125. Parallel and Distributed Systems (3).**

**CDA 5140. Fault Tolerance and Reliability (3).**

**CDA 5155. Computer Architecture (3).**

**CEN 5000. Knowledge Management and Data Engineering (3).**

**CEN 5035. Software Engineering (3).**

**CEN 5055. Project Development (3).**

**CEN 5064. Advanced Software Design (3).**

**CGS 5267. Principles of Computer Organization (3).** (S/U grade only)

**CGS 5268. Principles of Computer Organization II (3).** (S/U grade only)

**CGS 5409. Object-Oriented Programming in C++ for Non-majors (2).**

**CGS 5425. Object-Oriented Programming with Data Structures (3).** (S/U grade only)

**CGS 5426. Programming Language Concepts (3).** (S/U grade only)

**CGS 5437. Algorithm Design and Analysis (3).** (S/U grade only)

**CGS 5439. Discrete Structures (3).** (S/U grade only)

**CGS 5466. Introduction to Computer Theory (3).** (S/U grade only)

**CGS 5666. Programming for Non-Majors (3).** (S/U grade only)

**CGS 5765. Principles of Operating Systems (3).** (S/U grade only)

**CGS 5935r. Special Topics in Computer Science for Non-Majors (1–3).** (S/U grade only)

CRIMINOLOGY AND CRIMINAL JUSTICE

COLLEGE OF CRIMINOLOGY AND CRIMINAL JUSTICE
Web Page: http://criminology.fsu.edu/index.php
Professors: Bales, Baumer, Beaver, Blomberg, Chiricos, Doerner, Gertz, Hay, Kleck, Maier-Katkin, Mears, Stewart, Waldo; Associate Professors: Coonan, Stults, Warren Hightower; Assistant Professors: Close, Johnson, Rubin, Siemnick

The College of Criminology and Criminal Justice offers undergraduate and graduate programs leading to the Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), Master of Arts (MA), and Doctor of Philosophy (PhD) degrees. Undergraduate degree programs include criminology and computer criminology, a joint program with the Department of Computer Science. An accelerated bachelor’s to master’s degree program is offered in criminology and criminal justice for eligible students. A distance learning certificate is available in criminology. A distance-learning Master of Science (MS) degree program in criminal justice studies is available. Also available is a dual master’s degree program with the School of Public Administration and the College of Social Work. Evening courses are offered for undergraduate and graduate students. A distance-learning Bachelor of Science degree program in criminology is also available.

Refer to the “College of Criminology and Criminal Justice” chapter in this General Bulletin for additional details on degree requirements, the college, student opportunities, and financial aid.

Academic Performance and Retention

The College of Criminology and Criminal Justice reserves the right to discontinue enrollment of any student in the College at any time if satisfactory academic progress is not being made. Specifically, students majoring in criminology must make a “C” or better in the three core courses and maintain a major GPA of 2.0. A student who has accumulated more than four grades below “C–” (D+, D, D–, F, U, IE) in criminology and criminal justice courses taken for college credit at Florida State University or elsewhere, whether repeated or not, will not be permitted to continue, be readmitted, or be allowed to graduate with a major from the College of Criminology and Criminal Justice.

Students majoring in computer criminology must earn a “C” or better in the three core courses CCJ 2020, CCJ 3011, and CCJ 4700, and a “C–” or better in all other courses for the major, and maintain an overall GPA of 2.0. Students with more than four grades below “C–” (D+, D, D–, F, U, IE) in criminology, criminal justice, computer science, or prerequisite coursework, whether taken at Florida State University or elsewhere, whether repeated or not, will not be permitted to continue in the major.

A student who applies for readmission to the College must meet the major and degree requirements of the General Bulletin in force on the date of readmission.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer competency skills prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in criminology satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100. Undergraduate majors in computer criminology satisfy this requirement by earning a grade of “C–” or higher in COP 3014.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fwcc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Computer Criminology
1. COP XXXX: one course for three credit hours in computer programming
2. MAC X105
3. MAC X140

For listings relating to graduate coursework for thesis, dissertation, and defense, consult the Graduate Bulletin.
Major Requirements for Criminology and Criminal Justice

To major in criminology, a student must complete thirty-six semester hours in criminology and criminal justice coursework, including three core courses. The three core courses are Introduction to Criminal Justice (CCJ 2020), Criminology (CCJ 3011), and Introduction to Research Methods in Criminology (CCJ 4700). Two core courses (CCJ 3011 and CCJ 4700) are expected to be taken at Florida State University; CCJ 2020 may be taken at the community college. A minimum grade of “C” must be obtained in each core course. For acceptable core course substitutions, see the department for an approved list. An optional one-semester, full-time (fifteen semester hour) internship is available. If a student chooses to take the internship, only three of the fifteen semester hours will count toward the required thirty-six semester hours in the major. Students in the major are required to complete either a full-time internship, a minor, or second major in another department or program outside the College of Criminology and Criminal Justice, and they must meet all requirements stipulated by that department or program.

For students transferring from another four-year university, at least twenty-seven semester hours must be earned at Florida State University in the College of Criminology and Criminal Justice; the University requires the last thirty semester hours prior to graduation be taken at Florida State University. In addition, all University requirements must be met for either the Bachelor of Arts (BA) or the Bachelor of Science (BS) degrees.

Major Requirements for Computer Criminology

To major in computer criminology, a student must complete fifty-two semester hours in criminology and criminal justice, computer science, and mathematics courses. Students will complete twenty-four hours in criminology and criminal justice and twenty-five hours in computer science coursework that includes eight core courses. The required core courses from criminology and criminal justice are: CCJ 2020, CCJ 3011, CCJ 4700, and CJE 3110. The required core courses from computer science are: CDA 3100, COP 3014, COP 3330, and COP 3353. A total of six hours of capstone coursework representing criminology and criminal justice and computer science is required. The capstone course for criminology is CCJ 4938 and the capstone course for computer science is CIS 4385. Students must also complete three hours of Discrete Math, MAD 2104. From an approved list, students will choose nine additional hours in criminology and criminal justice as well as twelve additional hours in computer science coursework. Computer science electives may be chosen from: CIS 4360, CIS 4361, CNT 4406, CNT 4504, CNT 4603, COP 4342, COP 4530, COP 4610, CDA 3101, and COP 4710. Students must earn a “C” or better in CCJ 2020, CCJ 3011 and CCJ 4700 and a “C-” or better in all other courses for the major, and maintain an overall GPA of 2.0. Students with more than four grades below “C-” in criminology, criminal justice, computer science, or prerequisite coursework, whether taken at Florida State University or elsewhere, whether repeated or not, will not be permitted to continue in the major. A minor is not required.

For students transferring from another four-year university, transfer courses within the major are evaluated on an individual basis; the University requires that the last thirty semester hours prior to graduation be taken at Florida State University. In addition, all University requirements must be met for either the Bachelor of Arts (BA) or the Bachelor of Science (BS) degrees.

Approved criminology and criminal justice elective courses include: CCJ 3644, CCJ 3666, CCJ 4497, CCJ 4614, CJC 3010, CJE 4610, CJJ 4010, CJL 3510, CJO 4004.

Minor Requirements

For information concerning requirements for a minor in criminology, please refer to the “Minor Requirements” section in the “College of Criminology and Criminal Justice” chapter in this General Bulletin.

Internships

A variety of internships are available at the local, state, and federal levels. Students can choose from the fields of law enforcement, courts, corrections, criminal justice planning, criminological research, and private sector opportunities. The internship is available for juniors and seniors who have completed the core courses (CCJ 2020, 3011, and 4700). The intern receives a satisfactory/unsatisfactory (S/U) grade, and full credit is given upon successful completion of both the academic component and work hours.

Students are advised that information pertaining to all matters of public record, such as arrests and convictions, may be required by the agencies accepting interns. Although a reasonable effort is made to place a student in an internship, Florida State University will not be liable if a student cannot be placed. Students are responsible for all living and transportation expenses during field experiences.

Certificates

The College of Criminology and Criminal Justice offers a distance learning certificate program in criminology.

Honors in the Major

The College of Criminology and Criminal Justice encourages eligible students to participate in the honors in the major program. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Undergraduate Criminology and Criminal Justice Courses

CCJ 1005. Criminology Freshmen Seminar (3). This course introduces criminology students to pivotal readings and philosophies of the criminal justice system and exposes students to a variety of speakers and opinions related to criminal justice.
CCJ 2020. Introduction to Criminal Justice (3). This course is designed to provide freshmen and sophomore students with knowledge of terminology, classification systems, trends, and theories of criminal justice.
CCJ 3011. Introduction to Research Methods in Criminology and Criminal Justice (3). This course offers an examination of the field of criminology, including its theories, basic assumptions, and definitions.
CCJ 3644. White Collar Crime (3). This course provides an overview of major issues in the study of white-collar crime. Topics covered include conceptual and definitional debates; forms of white-collar crime; theories and causes; offenders, victims, and costs; and investigation, prosecution, and sentencing.
CCJ 3666. Victimization (3). This course examines the role of victims in crimes, their treatment by the criminal justice system, their decisions to report crimes and help prosecute offenders, victim assistance, and victim compensation. Special focus on sexual battery and domestic violence.
CCJ 3677. Crimes against Humanity (3). This course is a multi-disciplinary examination of the emergence and impact of modern conceptions of human rights, including inquiry into the nature and sources of rights and of institutions for their enforcement, such as international war tribunals and peace and reconciliation commissions. Particular attention focuses on case studies of the violation or abrogation of human rights doctrines, drawing on literature, law, philosophy, history, religion, and the social sciences to explain and respond to the phenomena of crimes against humanity.
CCJ 3688. Religion and Crime (3). This course examines the influence of religion on crime from historical, sociological, and criminological perspectives. Students learn how religion operates both as a protection against crime and as a motivation for crime.
CCJ 3940R. Experiential Learning (0). (S/U grade only.) This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.
CCJ 4004. Comparative Criminology and Criminal Justice (3). This course introduces students to a global, comparative approach to the study of crime and criminal justice systems, beginning with the discussion of transnational crime and issues related to its measurement and continuing with the study of the four major legal traditions (common law, civil law, socialist law, and Islamic law) and the analysis of specific components of the criminal justice system across the world, including the police, courts, and corrections.
CCJ 4031. The Individual and Society (3). This course introduces an understanding of normal human behavior and development in social context.
CCJ 4450. Criminal Justice Administration (3). This course is an application of organization and administration theories to the criminal justice system.
CCJ 4407. Criminal Justice and Public Policy (3). This course examines historically significant and recent crime and criminal justice policies in terms of their antecedent factors, their impact on measurable outcomes, and their unintended consequences.

CCJ 4601. Human Behavior (3). This course studies the origins of human and deviant behavior from a multidisciplinary approach (biological, psychological, sociological, criminological); addresses major theories and research, including case studies illustrative of deviant behavior such as drug abuse, suicide, mental illness, and sexual deviance.

CCJ 4614. Criminal and Delinquent Behavior (3). This course is an examination of patterns of criminal and delinquent behaviors in light of theories and classification concepts.

CCJ 4662. Minorities, Crime, and Social Policy (3). This course examines the involvement of minorities, especially African-Americans, in crime and in the criminal justice system. Special attention is paid to the role of racism in theories of crime and in American legal institutions. Emphasis is on the various components of the criminal justice system. May require community service hours.

CCJ 4663. Women, Crime and Justice (3). This course provides a flexible forum for the study and discussion of female crime and delinquency and gender issues in the criminal justice system.

CCJ 4700. Introduction to Research Methods in Criminology (3). This course covers basic methodological and statistical issues in criminology.

CCJ 4905r. Directed Individual Study (1–4). Prerequisites: Instructor and dean permission. In this course, a student registered for an individual-study course must submit a prospectus, outline, and bibliography and schedule at least one conference a week on campus. May be repeated to a maximum of twelve semester hours.

CCJ 4909r. Honors in Criminology (3). This course is designed for upper-division students with a grade point average of 3.2 in all courses. May be repeated to a maximum of twelve semester hours.

CCJ 4933r. Seminar in Criminology (3). This course introduces varying topics of selected interest and contemporary significance, discussed in a seminar format. May be repeated to a maximum of six semester hours.

CCJ 4938r. Special Topics in Criminology (3). This course content varies as instructors present different topics, problems, and approaches. May be repeated to a maximum of twelve semester hours. May be repeated within the same semester.

CCJ 4940. Internship in Criminology (15). (SU grade only.) This internship facilitates field placement in an approved criminal justice agency for integration of theory and practice through participant observation study.

CCJ 4942. Part Time Internship in Criminology (8). (SU grade only). Prerequisites: CCJ 3101, 3102, and CCJ 4700. This course facilitates part time field placement in an approved criminal justice agency for integration of theory and practice through participant observation study.

CJC 3010. Corrections (3). This course provides an overview of correctional philosophies, practices, and procedures.

CJC 4410. Theories and Methods of Offender Treatment (3). This course introduces theories and techniques that may be employed within the boundaries of probation, parole, or prison to influence and alter the attitudes, values, and behaviors of persons adjudicated guilty by the criminal justice system.

CJC 4411r. Methods of Offender Treatment Practicum-Men Helping Men (3). Prerequisite: CJC 4410. This course allows students to implement the theories and methods of treatment in a correctional setting. Students work with the professor to implement and evaluate programming designed to meet the needs of specific clienteles.

CJE 3110. Law Enforcement (3). This course provides an advanced survey of law enforcement concentrating on the police, and places emphasis on functions (law enforcement, order maintenance, public service) and responsibilities (e.g., preservation of constitutional rights, community relations), including organizational and management aspects.

CJE 4114. Police Problems and Practices (3). This course provides an analysis of both the traditional and contemporary issues and problems existing in the law enforcement community. Topics represent a wide variety of concerns, including such areas as corruption, police use of deadly force, and the utilization of law enforcement to combat corporate crime, computer crime, and terrorism.

CJE 4610. Crime Detection and Investigation (3). This course offers an introduction to the lawful gathering and evaluation of information concerning criminal acts, with attention to the fundamentals of investigation, the organization and management of the investigative process, and the knowledge and skills necessary for investigation.

CJ 4510. Juvenile Justice (3). This course provides an examination of the legal and judicial policies, proceedings, and procedures related to his area of law and to the treatment of minorities by the various components of the criminal justice system. May require community service hours.

CJL 4064. Individual Rights and the Criminal Justice System (3). This course offers an examination of the full range of rights in criminal justice, dealing with them not only in terms of specific instances, including the rights of the accused and extending to the rights of convicts, witnesses, victims, probationers, ex-convicts, officials, journalists, and the more generalized rights of persons the activities of interest group advocates, taxpayers, and citizens in criminal justice policy and administration.

CJL 4110. Substantive Criminal Law (3). This course offers an examination of the central principles of criminal law, which includes the substantive elements defining criminal conduct for specific crimes and the various exculpatory conditions for criminal liability.

CJL 4565. Courts and Social Policy (3). This course examines the role of courts in determining social policy as it relates to criminology. Emphasis is directed toward the political and social inputs that influence judicial decision making and the role of democracy and punishment in the courts. These topics are examined using current social policy. The course satisfies oral competency requirements.

IFS 2075. Foundations of Research and Inquiry (3). The purpose of this seminar is to advance library research, writing skills, and critical thinking skills among lower division students. Through participation in the seminar and research activities, students learn to develop and improve their capacity to communicate complex ideas about a topic of their choosing in speech and in writing.

SCC 4004. Public and Private Security (3). This course offers an overview of the major topics of public and private security. The topics represent a wide variety of concerns, including such areas as historical development, the role of security in society, and current practices and standards.

Undergraduate Computer Science Courses

CDA 3100. Computer Organization (3). Corequisites: COP 3330 and MAD 2104. This core course is intended for computer science majors with previous C/C++ background. The course introduces fundamental concepts and principles of computer organization to digital design, including numbering systems and number representation, logic gates and design, the Von-Neumann architecture principle, and the machine instruction cycle. Assembly language programming with C language interfacing is also presented, reinforcing basic computer structure and machine cycle operation principles.

CIS 4361. Applied Computer Security (3). Prerequisite: CDA 3100. This course addresses threats to and vulnerabilities of information systems and provides hands-on opportunities for students to work with current counter-threat technology. This course also covers analytic principles to support vulnerability assessment and countermeasure development.

CIS 430r. Special Topics in Computer Science (3). Prerequisite: at least six semester hours in computer science or software engineering at or above the 4000 level. May be repeated to a maximum of twelve semester hours.

CNT 4406. Network Security and Cryptography (3). Corequisite: COP 4530. This course examines threats to computer networks, network vulnerabilities, techniques for strengthening passive defenses, tools for establishing an active network defense, and policies for enhancing forensic analysis of crimes and attacks on computer networks. Topics include private and public key cryptography, digital signatures, secret sharing, security protocols formal methods of analyzing network security, electronic mail security, firewalls, intrusion detection, Internet privacy, and public key infrastructures.

CNT 4504. Introduction to Computer Networks (3). Corequisite: COP 4530. This course covers circuit-switched and packet-switched networks; protocols; protocol layering; application layer and socket programming; transport layer, multiplexing and demultiplexing, UDP, TCP, reliability, flow control, and congestion control; network layer, routing protocols, switching technologies, multicast, and mobility; link layer, local area network issues, error detection and correction, and wireless networks; multimedia networking; network security; and network management.

CNT 4603. Computer and Network System Administration (3). Prerequisite: CGS 3406 or COP 3014. This course offers a hands-on introduction to Unix and Microsoft Windows systems and network administration. Topics include installation, maintenance, and extension of a multi-user computer system; development of administrative policies and procedures; user assistance and education; specifics of the Unix and Windows operating systems; and practical troubleshooting and problem solving.

COP 3014. Programming I (3). Prerequisite: MAC 1140. This course covers fundamental concepts and skills of programming in a high-level language. Flow of control: sequence, selection, iteration; input/output; error-handling; structures, strings, and files. ADT lists and tables. Algorithms using selection and iteration (decision making, finding maxima and minima, basic searching and sorting, simulation, etc.). Good program design using a procedural paradigm, structure, and style are emphasized. Interactive and file I/O. Testing and debugging techniques. Intended primarily for computer science or computer engineering majors, or anyone who is required to take COP 3330.

COP 3330. Object Oriented Programming (3). Prerequisite: COP 3014 or a comparable course in C or C++. Corequisite: COP 3353. This course focuses on object-oriented programming in a modern programming language; classes, objects, inheritance, polymorphism, introduction to data structures and container classes.

COP 3353. Introduction to UNIX (1). This course for majors and non-majors offers an introduction to the UNIX operating system. Topics include: UNIX history, requesting UNIX accounts, logging into a UNIX system, basic operating system concepts and file structure, basic commands, text editor (to include emacs, v, and pico), printing, mail, and the shell. Helps the goals of this course are to enable students to log into their UNIX accounts from any type of computer and have a basic understanding of the commands and utilities.
COP 4342. Unix Tools (3). Prerequisite: COP 3330. This course is an introduction to selected Unix tools and utilities that are useful for advanced users, programmers, and system administrators, such as shell scripts, the perl language, revision control systems, debuggers, editors, and the make, awk, sed, and expect utilities.

COP 4530. Data Structures, Algorithms and Generic Programming (3). Prerequisites: COP 3330 and MAD 2104. Pre-or corequisite: CDA 3100. This course focuses on definition, use, and implementation of generic data structures using a modern programming language; reusable program components.

COP 4610. Operating Systems and Concurrent Programming (3). Prerequisite: COP 4530, CDA 3100, or instructor permission. This course explores design principles of batch, multiprogramming, and time-sharing operating systems; linking, loading, input-output systems, interacting processes, storage management, process and resource control, file systems.

COP 4710. Theory and Structure of Databases (3). Prerequisites: COP 3330 and MAD 2104. This course examines the theory of relational and object-oriented databases; relational database management systems and SQL; design, development, and implementation issues in database systems.

Graduate Courses

CCJ 5016. Crimes of the Powerful (3).
CCJ 5028r. Seminar in Criminal Justice (3).
CCJ 5029. The Political Economy of Crime and Justice (3).
CCJ 5030. Proseminar in Criminology (3).
CCJ 5070. Computer Applications in Criminal Justice (3).
CCJ 5109. Theory in Criminology and Criminal Justice (3).
CCJ 5285. Survey of Criminal Justice Theory and Research (3).
CCJ 5320. Penology (3).
CCJ 5456. Criminal Justice Administration (3).
CCJ 5546. Prevention and Treatment of Crime and Delinquency (3).
CCJ 5606. Survey of Criminological Theories (3).
CCJ 5607. History of Criminological Thought (3).
CCJ 5609. The Conduct of Inquiry in Criminology and Criminal Justice (3).
CCJ 5636. Comparative Criminology and Criminal Justice (3).
CCJ 5669. Race, Ethnicity, Crime and Social Justice (3).
CCJ 5672. Gender, Crime and Justice (3).
CCJ 5704r. Introduction to Research Methods and Statistics (3).
CCJ 5705. Research Methods in Criminology I (3).
CCJ 5706. Applied Statistics in Criminology I (3).
CCJ 5707. Qualitative Methods in Criminology (3).
CCJ 5709. Survey Research Methods in Criminology and Criminal Justice (3).
CCJ 5740. Data Analysis in Criminology and Criminal Justice (3).
CCJ 5944. Supervised Teaching (3). (S/U grade only.)
CCJ 5945. Field Practice in Criminology (9). (S/U grade only.)
CCJ 5946r. Criminal Justice Practicum (3–6). (S/U grade only.)
CCJ 5974r. Area Paper in Criminology (1–6). (S/U grade only.)
CCJ 5981r. Directed Individual Study (3). (S/U grade only.)
CCJ 6005. Professional Development in Criminology (3).
CCJ 6109r. Advanced Seminar in Criminological Theory (3).
CCJ 6685. Victimization (3).
CCJ 6708. Seminar in Crime Research (3).
CCJ 6741. Advanced Data Analysis in Criminology and Criminal Justice (3).
CCJ 6920r. Seminar in Theoretical Criminology (3).
CJE 5024. Police and Society (3).
CJ 5020. Juvenile Justice (3).
CJL 5420. Criminal Laws, Criminal Procedure and Individual Rights (3).
CJL 5520. Structure and Process of the American Court System (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

School of DANCE

College of Fine Arts

Web Page: http://dance.fsu.edu/

Co-Chairs: Patricia Phillips, Russell Sandifer; Professors: Farrell, Fichter, Glenn, Houlihan, Morgan, Phillips, Sandifer, Sommer, Wagoner, Welsh, Young, Zollar; Associate Professors: Austin, Corbin, McCullough; Assistant Professors: Atkins, Belman, Goldman, Schwadron; Faculty Administrator: Burdick; Research Faculty I: Peterson; Instructional Specialist I: Smith; Instructional Specialist III: Fausone

The School of Dance offers work leading to the Bachelor of Fine Arts (BFA) degree in dance. The mission of the Florida State University School of Dance is to provide an environment conducive to the highest caliber of dance training, art making, and scholarship. Our approach encourages fluidity between the processes of making art, honing craft, and deepening intellectual explorations. We cultivate the individual creative voice with exposure to diverse technical and philosophical approaches. Such an environment nurtures exceptional dance practitioners, allows us to make creative and intellectual contributions to the larger dance community, and fosters collaborative endeavors within and beyond our field.

The curriculum is designed to prepare the student who wishes to enter dance as a profession. Of the many professional avenues in which dance can be pursued and practiced, performance and choreography constitute the emphasis of the undergraduate major curriculum at this University. The theoretical aspects of dance (pedagogical, historic, and aesthetic) are also stressed.

To fulfill the purpose of the program, the faculty consists of outstanding artist-teachers and scholars who are committed to the model of intensive professional training within the context of a broad University education. A full production schedule offers extensive opportunities for repertory study; performance, and choreography, complemented by work with guest choreographers and visiting lecturers. Part of the school’s mission is to serve as a regional repertory center for the reconstruction and production of dance masterworks and the creation of original repertory. The program’s facilities include spacious studios and the Nancy Smith Fichter Dance Theatre. The recently established Maggie Allesee National Center for Choreography, a dance and choreographic research center affiliated with the School of Dance, hosts numerous internationally recognized dance artists.

In addition to the dance major degree program, the school offers some liberal studies coursework and elective coursework for the general University student. The school also offers work leading to the Master of Fine Arts (MFA) degree in dance and a Master of Arts (MA) degree in dance with a major in studio and related studies.

Florida State University is an accredited institutional member of the National Association of Schools of Dance.

Audition and Screening

All undergraduate students who wish to major in dance must audition for admission into the dance major program. Auditions are held at designated periods throughout the year.

Assessment of every dance major occurs at various times throughout each year to evaluate the student’s progress in the major program. Such assessment is part of a continuous advisement and monitoring procedure. A probationary period may be established if a student is having difficulty and needs special attention. A student who cannot meet the school’s proficiency standards will be discontinued from the dance major program.

Placement and Proficiency

Intrinsic to the development of a dancer is the technical command of the instrument and the expansion of the vocabulary of movement; therefore, dance majors are continually assessed during their curricular experiences in order to be placed at the correct level of studio work in dance technique. All students are assigned an appropriate placement level in ballet and contemporary dance upon entrance into the program and must maintain continuous participation in ballet and contemporary dance technique classes throughout enrollment in the curriculum. Students who demonstrate the skill necessary for the next level of work upon completion of a studio technique course will be permitted to enroll at the next level. If not, they will be expected to continue in designated courses at their level of technique until they are ready to advance. To meet graduation requirements, the student must achieve and maintain the ballet III level and the contemporary dance II level or the contemporary dance III level and the ballet II level; the advanced proficiency level (III) must be achieved by one semester prior to graduation.
Performance
The dance major is required to participate in a minimum of four performing experiences sponsored by the school.

Liberal Studies for the 21st Century
All students working toward a degree in dance are required to meet the liberal studies requirements.

Computer Skills Competency
All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in dance satisfy this requirement by earning a grade of “C–” or higher in DAN 4418.

State of Florida Common Program Prerequisites
The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Dance—BFA Track
Any twenty-four credit hours from the following thirty credit hours will be accepted toward the major:
1. DAN X610 or DAN X600 (three credit hours)
2. DAN X611 or DAN X601 (three credit hours)
3. DAA X610 (two credit hours)
4. DAA X611 (two credit hours)
5. DAA X680 (two credit hours) or any lower level repertory courses in the 400-499 series for up to four credit hours
6. DAA X681 (two credit hours) or any lower level repertory courses in the 400-499 series for up to four credit hours
7. DAA X200-X250: any lower level ballet technique courses for up to eight credit hours
8. DAA X100-X110: any lower level modern technique courses for up to eight credit hours

Note: Although credit toward the major will be given for these, placement in upper level technique courses will continue to be based on individual student proficiency.

Minimum Requirements for the BFA in Dance
1. Dance Technique. Thirty semester hours and fulfillment of proficiency requirement. Dance technique courses include DAA 3108r, 3109r, 3208r, 3209r, 4110r, 4210r. The student enrolls in both ballet and contemporary dance throughout enrollment as a dance major except in the following two instances: (a) during Summer session, students may elect to take only one of the technique courses (either ballet or contemporary dance); (b) if students have achieved and maintained the required proficiency levels in technique for at least one semester, they may elect to take only one of the technique courses (either ballet or contemporary dance) during one of the last two semesters before graduation.
2. Dance Composition and Repertory. Ten semester hours including DAA 2610, 3614, 3654r, DAN 2611.
3. Other Dance Courses. Forty semester hours, including Dance Ensemble (four semester hours of DAN 1680r, 2618r, 3684r, or 4685r); DAE 3384; DAN 2500, 2610, 3144, 3145, 3146, 3400, 3504, 3584r, 3714, 3744, 4418 and six semester hours of DAA 4935.
4. Liberal Studies. Thirty-six semester hours. Three hours of the history of dance courses—DAN 3144, 3145 or 3146—may be applied to the Humanities/Cultural Practice area of liberal studies requirements.
5. Electives. Twelve to fifteen semester hours. Students exercising the option under requirement four above will complete fifteen elective semester hours.

Total: One hundred twenty-eight semester hours.

The applicability of previous coursework to dance curricular requirements is assessed and determined by the School of Dance. A transfer student need not earn the maximum semester hours in dance technique but must fulfill the curricular requirement of maintaining continuous participation in ballet and contemporary dance throughout enrollment in the curriculum and must achieve and maintain the required technical proficiency levels.

Undergraduate dance majors need not earn the maximum semester hours in dance technique if they are able to complete successfully all other University and school course requirements for graduation and if they have achieved the required technical proficiency levels prior to accumulation of the maximum hours in technique.

Honors in the Major
The School of Dance offers a program in honors in the major to encourage talented juniors and seniors to undertake independent and original research or creative work. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Definition of Prefixes
DAA—Dance, Emphasis on Activity
DAE—Dance Education
DAN—Dance
IFS—Interdisciplinary Florida State University Courses

Undergraduate Courses
DAN 4900r. Honors Study in Dance (1–6). Prerequisite: Admission to honors in dance program. Written thesis for creative or academic research done as part of the honors in dance program. May be repeated to a maximum of nine semester hours.
DAN 4935r. Special Topics in Dance (1–3). Prerequisites: Vary depending on topic. In this course, topics may vary from term to term. May be repeated to a maximum of twelve semester hours.

Dance Technique
The following courses offer a progression of study to develop technical and performance skills, as well as concepts in dance.

Ballet
DAA 1200r. Beginning Ballet I—Nonmajors (3). This course is suitable for students with little or no previous ballet training. Includes some theoretical study of the history of the art form and comprehension of the vocabulary of ballet technical terms. May be repeated to a maximum of nine semester hours.
DAA 1201r. Beginning Ballet II—Nonmajors (3). Prerequisite: Faculty placement or instructor permission. This course is suitable for students who are familiar with basic ballet movement. Includes some theoretical study of the history of the art form and comprehension of the vocabulary of ballet technical terms. May be repeated to a maximum of nine semester hours.
DAA 1202r. Beginning Ballet III—Nonmajors (3). Prerequisite: Faculty placement or instructor permission. This course is suitable for students who are ready to learn more complex phrasing and transitioning of basic ballet movement. Includes some theoretical study of the history of the art form and comprehension of the vocabulary of ballet technical terms. May be repeated to a maximum of nine semester hours.
DAA 2203r. Intermediate Ballet—Nonmajors (3). Prerequisite: Placement or instructor permission. This course is designed for ballet students who are ready to develop proficiency at the intermediate level, and includes some theoretical study of the history of the art form as well as the vocabulary of ballet technical terms. May be repeated to a maximum of eighteen semester hours.
DAA 3208r. Ballet I (1–3). Prerequisites: Major status and faculty placement or instructor permission. May be repeated to a maximum of twelve semester hours.
DAA 3209r. Ballet II (1–3). Prerequisites: Major status and faculty placement or instructor permission. May be repeated to a maximum of twenty-four semester hours.
DAA 4210r. Ballet III (1–3). Prerequisites: Major status and faculty placement or instructor permission. May be repeated to a maximum of twenty-four semester hours.

Contemporary Dance
DAA 1100r. Beginning Contemporary Dance I—Nonmajors (3). This course develops basic techniques and understanding of the art of contemporary dance. Includes some theoretical study of the history of the art form. May be repeated to a maximum of nine semester hours.
DAA 1102r. Beginning Contemporary Dance II—Nonmajors (2). Prerequisite: Faculty placement or instructor permission. The course may be repeated to a maximum of six semester hours.
DAA 2103r. Intermediate Contemporary Dance–Nonmajors (3). Prerequisite: Faculty placement or instructor permission. This course is designed for the intermediate contemporary dancer that has had previous movement experience in contemporary dance technique, and includes some theoretical study of contemporary dance history. May be repeated to a maximum of eighteen semester hours.

DAA 3108r. Contemporary Dance I (1–3). Prerequisites: Major status and faculty placement or instructor permission. May be repeated to a maximum of twelve semester hours.

DAA 3109r. Contemporary Dance II (1–3). Prerequisites: Major status and faculty placement or instructor permission. May be repeated to a maximum of twenty-four semester hours.

DAA 4110r. Contemporary Dance III (1–3). Prerequisites: Major status and faculty placement or instructor permission. May be repeated to a maximum of twenty-four semester hours.

Jazz

DAA 1500r. Jazz Dance I—Nonmajors (3). This studio course introduces jazz dance as an art form while developing the basic skills and vocabulary of jazz dance. Includes some theoretical study of the history of jazz dance and development of critical-response skills to dance performance. May be repeated to a maximum of eighteen semester hours.

DAA 1501r. Jazz Dance II—Nonmajors (3). Prerequisite: Faculty placement or instructor permission. This studio course explores jazz dance as an art form while developing more advanced skills and vocabulary of jazz dance. Includes some theoretical study of the history of jazz dance and the experience of responding critically to dance as an audience member. May be repeated to a maximum of eighteen semester hours.

Aspects of Dance Performance

DAA 1800r. Dance Ensemble (1). (S/U grade only.) This course provides experience in dance ensemble and performance work. Official casting and faculty approval required. May be repeated to a maximum of three semester hours.

DAA 2681r. Special Dance Performance (1). (S/U grade only.) This course provides experience in dance ensemble and performance work. Official casting and faculty approval required. May be repeated to a maximum of three semester hours.

DAA 3584r. Dance Ensemble (1). (S/U grade only.) This course provides experience in dance ensemble and performance work. Official casting and faculty approval required. May be repeated to a maximum of three semester hours.

DAA 3695r. Dance Performance (1–2). This course includes preparation and public performance of selected roles in dance repertory. Official casting and faculty approval required. Majors only. May be repeated to a maximum of sixteen semester hours.

DAA 4685r. Dance Ensemble (1). (S/U grade only.) This course provides experience in dance ensemble and performance work. Official casting and faculty approval required. May be repeated to a maximum of three semester hours.

Dance Composition and Repertory

DAA 2610. Dance Composition (2). Prerequisites: DAN 2610 and major status. This course explores basic rhythmic, spatial, and dynamic materials in the designing of dance movements; improvisation and exploration of various ideological and aesthetic sources.

DAA 2611. Dance Composition (2). Prerequisites: DAN 2610 and major status. This course explores basic rhythmic, spatial, and dynamic materials in the designing of dance movements; exploration of various ideological and aesthetic sources.

DAA 3614. Dance Composition (3). Prerequisite: DAN 2611. This course is a study of choreographic forms and structures, musical forms, extended temporal and dynamic studies, components of dramatic and stylistic forms, use of dance technology compositionally.

DAA 3654r. Choreography–Reperatory (2). Prerequisite: Instructor permission. This course covers the study and practice of selected works of dance repertory. May be repeated to a maximum of sixteen semester hours.

DAA 4615. Dance Composition (3). Prerequisites: DAA 3614; instructor permission. This course examines the extended choreographic process: production of extended choreographic works.

Rhythmic and Musical Theory

DAN 2610. Rhythmic Analysis (3). This course is an analysis of rhythmic structures and their relationships to dance composition.

DAN 2611. Music and Choreography (3). Prerequisite: DAN 2610. This course is an analysis of various elements of music with relationship to dance performance and/or choreography.

Notation and Movement Analysis

DAN 3400. Movement Analysis (3). Prerequisite: DAN 2610. This course introduces and develops a basic understanding of movement-analysis concepts and systems of documentation and reconstruction. An historical survey of dance notation systems and movement analysis theories is conducted. Theoretical materials are examined through emphasis on movement observation, writing and reading skills, and creative use of concepts.

DAN 3445. Labanotation (5). Prerequisite: DAN 2610. This course introduces and develops beginning through intermediate skills. Theoretical materials in labanotation are examined with emphasis on writing and developing reading skills.

DAN 3714. Dance Kinesiology (3). This course covers the study of movement theories and body alignment for the technical aspects of dance performance.

DAN 3744r. Dance Conditioning (2). This course is a studio laboratory for concepts in movement theory and body alignment. May be repeated to a maximum of four semester hours.

Dance Production and Technology

DAN 2500r. Introduction to Design (1). This course examines the basic vocabulary, understanding, and appreciation of the design process in dance production. May be repeated to a maximum of two semester hours.

DAN 3504. Dance Production (2). Prerequisite: Instructor permission. This course studies the technical aspects of production.

DAN 3584r. Dance Theatre Laboratory (1). This course covers assigned problems in connection with current dance theatre production. May be repeated to a maximum of four semester hours.

DAN 4418r. Survey of Dance Technologies (3). This course provides training and aesthetic guidance for dance artists through the generation of computer-assisted imagery. It sets a foundation for future work in the areas of dance documentation, preservation, creation, promotion, and multimedia performance. May be repeated a maximum of six semester hours.

DAN 4420r. Dance and Video (2). Prerequisite: DAN 4418. This course includes the study of camera techniques for the screen and projection design for stage. The course is conducted in two units. The first unit explores concert dance documentation and video production. The second unit explores visual media design for the theater. These units may be taken concurrently in the same semester or sequentially for two credits each to a maximum of eight semester hours.

DAN 4421. Photography for Dance (2). This course addresses the representation of dance and dancers in two dimensional non-time based photographic media. It involves hands-on camera work and personal development.

DAN 4484. Documentation Techniques (3). Prerequisite: DAN 4418. This course instructs students in capturing the art of motion, combining hands-on experience with reading, discussion, and critique to develop technical skills and aesthetic awareness related to the documentation of concert dance.

History and Theory of Dance

DAN 2100. Dance Appreciation (3). This course is a survey of the development of dance in human culture with emphasis on dance as an art form. The major periods of dance history, choreographic masterworks, and artists in choreography and performance are explored through readings, discussion, media presentation, live performances, and movement laboratories. No prior dance experience is required.

DAN 3144. Global Perspectives on Dance (3). This course surveys approaches to the study of global dance as a component of large cultural and historical movements, focusing on the codification of dance technique, gender theories of performance, and the role of dance in expression of cultural, historical, social and political forces. Issues of tradition and innovation in select dance phenomena are especially explored through readings, discussion, media presentation, embodied experiences, and movement laboratories. While movement is a key component of this course, no prior dance experience is required.

DAN 3145. Classical Perspectives on Dance (3). This course introduces students to the history of ballet through a comparative study of classical dance forms around the world. Exploring what constitutes classical and reinventing classical, the course also focuses on larger cultural and historical movements as they influenced (or reflected) the creation of global dance technique, gender theories of performance, and the role of dance in society. Students investigate these concepts through open, in-class conversations, the screening of classical dance works, and the reading and writing of critical essays and dance reviews.

DAN 3146. Contemporary Perspectives on Dance (3). This course introduces students to a comparative study of contemporary dance forms, predominantly in Western culture. The course traces the development of modern and contemporary dance as reflective of larger cultural and historical movements, focusing on the codification of dance technique, gender theories of performance, and the role of dance in society.

DAN 3185. African-American Perspectives on Dance (3). This course examines how cultural and artistic expression can both integrate and divide different groups of people along lines of race, gender, and class using African American dance as the central focus.

DAN 4182. Dancing in the Movies (3). This course traces the evolution of dance in the American popular film industry. Emphasis will be placed on how movies encapsulate popular stereotypes and icons, revealing the roles of gender, race, fashion, economic and political forces.

DAN 4951r. New York City: Arts and Resources (3). This course investigates, experientially and academically, New York City’s resources. Using performances and exhibitions as the center point, the relationships among the various elements that compose an urban art event are explored. May be repeated within the same semester. May be repeated to a maximum of six semester hours.

Pedagogy

DAE 3384. Methods and Materials in Dance Education (3). This course studies the principles of learning and how they inform the processes of designing lessons and teaching dance. Includes a five-week teaching practicum in local schools in addition to coursework on campus.

Other Courses

DAN 4965r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.
Graduate Courses

DAA 518r. Contemporary Dance (1–3).
DAA 5218r. Ballet (1–3).
DAA 5618. Choreography (3).
DAA 5648r. Choreographic Project (2–6). (S/U grade only.)
DAA 5688r. Dance Ensemble (1). (S/U grade only.)
DAA 5698r. Dance Performance (1–2).
DAE 5387. Dance History Pedagogy (3).
DAE 5940. Supervised Teaching (2). (S/U grade only.)
DAN 5128r. Current Issues in Dance History, Theory, and Research (1–3).
DAN 5129. Theory of Dance (3).
DAN 5147. History of American Dance 1492–1892 (3).
DAN 5158. Theory of Dance Performance and Directing (3).
DAN 5190. Theory and Practice in Dance Technique (3).
DAN 5191r. Seminar in Dance Research (3).
DAN 5193. History of African-American Social Dance of the Twentieth Century (3).
DAN 5194. Dancing in the Movies (3).
DAN 5486. Documentation Techniques (3).
DAN 5508. Visual Design for Choreography (3).
DAN 5590. Studies in Dance Technology (3).
DAN 5591r. Dance and Video (2).
DAN 5596. Photography for Dance (2).
DAN 5905r. Directed Individual Study (2–3).
DAN 5910. Supervised Research (2). (S/U grade only.)
DAN 5930r. Special Topics in Dance (1–3).
DAN 5940r. Dance Internship (1–12).
DAN 5950r. New York City: Arts and Resources (3).

Department of EARTH, OCEAN, AND ATMOSPHERIC SCIENCE

COLLEGE OF ARTS AND SCIENCES

Web Page: http://www.eoas.fsu.edu/

In 2010, the departments of Geological Sciences, Oceanography, and Meteorology merged to form the department of Earth, Ocean, and Atmospheric Science (EOAS). While retaining their perspective programmatic focus, the geology, oceanography, and meteorology faculty offer a new level of interdisciplinary integration. This creates fresh opportunities for undergraduate and graduate education in the geosciences. The department provides students with an opportunity for holistic study of Earth’s physical environment in preparation for professional careers in government, private, and academic sectors. Due to concerns about climate change, environmental sustainability, availability of natural resources and environmental pollution and degradation, the U.S. Bureau of Labor Statistics projects an overall sixteen percent increase in geoscience-related occupations between 2012 and 2022, which is five percent faster than the growth rate for all U.S. occupations. The opportunities for study and the degree requirements are described below:

- a Bachelor of Science in Environmental Science
- a Bachelor of Arts in Environmental Science and Policy
- a Bachelor of Science in Geology
- a Bachelor of Science in Meteorology
- a Bachelor of Arts in Meteorology
- FSU Teach Geoscience Program (BS)
- FSU Teach Environmental Science Program (BS)

The Department of Earth, Ocean, and Atmospheric Science maintains the resources of the three original departments. Our oceanography and meteorology programs are among the leading programs in the country. Our meteorology program is the flagship program in the southeastern United States and is considered to be one of the top five comprehensive meteorology programs in the nation.

Research programs may be conducted within the department, or they may involve collaborative work with members of the departments of Physics and Chemistry, the College of Engineering, the Geophysical Fluid Dynamics Institute, the Department of Scientific Computing, and the National High Magnetic Field Laboratory. Within EOAS, the Geology department conducts cooperative programs with the Florida Geological Survey, Northwest Florida Water Management District, Florida Department of Environmental Protection, Florida Fish and Wildlife Commission, and the United States Geological Survey. The department provides a service to the international geological community, funded by the National Science Foundation (NSF), by maintaining a repository for marine cores in the Antarctic Research Facility.

The Florida Climate Center and Office of the State Climatologist are housed in the department and are equipped with archives of Florida weather and climate records. An instrumentation facility is also housed in the department, including data loggers and a variety of modern and historical instruments, and a rooftop meteorological tower for real-time local observations. The National Weather Service Forecast Office, located within the department, facilitates interactions between students and professional operational forecasters.

The department has a complete television studio equipped with state-of-the-art broadcasting technology, where students prepare weathercasts for class (MET 3940) and for regular broadcasts on Florida State University’s cable television channel, which is seen in surrounding counties and streamed over the Internet. Students often use this experience to develop internships with television stations and to get jobs. Other internship opportunities through private companies or state, local, or federal agencies also are possible. In particular, partnerships and internships with the headquarters of state government agencies located in Tallahassee continue to offer opportunities for our students.

Available for use on student projects are a full array of equipment for investigating radon and radium in the environment, three mass spectrometers capable of measuring stable isotope ratios. The department has equipment for investigating carbon dynamics including greenhouse gasses in the laboratory and the field. The geochemistry program at the National High Magnetic Field Laboratory has facilities to measure trace level concentrations of most elements of the periodic table as well as measure the isotopic composition of...
many stable and radioactive elements. These capabilities allow researchers to fingerprint the sources of different elements in the environment as well as to trace chemical processes. Students and faculty have access to five different types of mass spectrometers to perform measurements based on their area of specialization. The laboratories also include a "clean lab" which allows processing of small samples as well as determining concentrations at very low levels. The department also houses a large array of equipment for investigating microbial ecology including equipment for the cultivation of anaerobic microorganisms.

ENVIRONMENTAL SCIENCE

Earth, Ocean, and Atmospheric Science offers two degrees in Environmental Science. Environmental Science is the interdisciplinary study of environmental systems from a scientific perspective. Drawing principally from the areas of oceanography, geology, and meteorology, the Bachelor of Science in Environmental Science prepares students in the broader and technical area of geoscience where the greatest expansion in employment opportunities is predicted and is an attractive option for students seeking a broader interdisciplinary major with the rigor of mathematics and the physical sciences at its core. The BS degree will provide a strong foundation for graduate study in environmental and earth sciences.

The department also offers a Bachelor of Arts degree in Environmental Science and Policy. The BA degree differs from the BS degree in lower-level mathematics requirements and a greater emphasis on policy. These programs aim to prepare exceptionally well-qualified graduates equipped to work in the interdisciplinary earth sciences, whether in government agencies, NGOs, or the private sector. For additional information, see the department's Web site at http://www.eoas.fsu.edu/.

GEOLOGY

Earth, Ocean, and Atmospheric Science offers the Bachelor of Science (BS), Master of Science (MS), and Doctor of Philosophy (PhD) in geology. Emphasis is on fundamental applications of chemistry, physics, biology, and the scientific method in the study of the earth; field experience is also stressed. Faculty members offer coursework in many areas of surficial, tectonic, environmental, and stratigraphic geology; geophysics; hydrology; and geochemistry.

The major program is intended to provide a well-rounded introduction to the study of the Earth as well as to prepare the student for more advanced study in the fields of natural resources, environmental planning, oceanography, geophysics, and other earth science specialties.

Various scholarships are offered (and part-time work is available) within Earth Ocean and Atmospheric Sciences, with the Florida Geological Survey of the Florida Department of Environmental Protection and with other agencies of the state and federal governments. Honors in the major can be earned by talented juniors and seniors by engaging in an independent project ending in an honors thesis. For requirements and other information, see the "University Honors Office and Honor Societies" chapter of this General Bulletin.

METEOROLOGY

Earth, Ocean, and Atmospheric Science offers the Bachelor of Science (BS), Bachelor of Arts (BA), Master of Science (MS), and Doctor of Philosophy (PhD) in meteorology. By tradition, meteorology is divided into four branches: physical, dynamical, synoptic, and applied meteorology. Physical meteorologists deal with such areas as the physics of rain formation, atmospheric electricity, and radiative transfer and remote sensing. Dynamical meteorologists work in such areas as the mathematical representation of atmospheric flow patterns and the numerical prediction of these patterns. Synoptic meteorologists are involved with the description of atmospheric disturbances and with weather forecasting. Applied meteorologists deal with the application of meteorological and climatological knowledge to such areas as agriculture, architecture, ecology, and air pollution. The undergraduate program provides a broad overview of these branches of meteorology while graduate students are encouraged to specialize in one of them. Meteorologists are needed in research, forecasting, and operational positions to study, interpret and predict weather and climate processes and patterns and to relate these to human activities. Severe storms, floods, droughts and air pollution are examples of atmospheric phenomena, which influence health, transportation, agriculture, and business activities.

Graduate Study in Oceanography and Geology

Earth, Ocean and Atmospheric Science offers the Master of Science (MS), and Doctor of Philosophy (PhD) in Oceanography and in Geology and a non-thesis Master of Science in Aquatic Environmental Science and a Professional Science Master’s in Aquatic Environmental Science.

Undergraduates interested in Oceanography or Geology graduate degrees will find the Environmental Science BS degree excellent preparation for graduate study. Students may choose a specific area of emphasis including geology (coursework will permit graduates to take the examination leading to Professional Geologist Certification), environmental engineering, biogeochemistry, atmospheric science, or marine biology.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in applied geosciences/FSU-Teach satisfy this requirement by earning a grade of “C–” or higher in ISC 3523C. Undergraduate majors in environmental science and environmental science and policy satisfy this requirement by earning a grade of “C–” or higher in BSC 2010L. Undergraduate majors in geology satisfy this requirement by earning a grade of “C–” or higher in CGS 2060. Undergraduate majors in meteorology satisfy this requirement by earning a grade of “C–” or higher in MET 3220C.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Applied Geosciences, FSU-Teach

1. MAC X311
2. MAC X312
3. PHY X048/X048L and PHY X049/X049L, or PHY X048C and PHY X049C
4. CHM X045/X045L and CHM X046/X046L, or CHM X045C and CHM X046C
5. SMT X043
6. SMT X053

Note: Transfer students will be able to take SMT X043 and SMT X053 when admitted to upper division.

Environmental Science

Environmental Science BS

1. BSC X010/X010L
2. BSC X011/X011L or CHM X046/X046L
3. CHM X045/X045L
4. PHY X053/X053L or PHY X048/X048L
5. GLY X010C or GLY X010/X010L
6. STA X122 or ISC X532C

Environmental Science and Policy BA

1. BSC X010/X010L
2. CHM X045/X045L
3. MAC X105
4. MAC X140
5. GLY X010C or GLY X010/X010L

Geology

1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MTH X281
4. GLY X010C or GLY X010/X010L
5. PHY X048C and PHY X049C, or PHY X048/X048L and PHY X049/X049L, or PHY X053C and PHY X054C
6. XXX XXXX: Historical Geology is strongly recommended.
FSU-Teach Program in Applied Geosciences

FSU-Teach is an innovative approach to teacher education that involves a collaboration between scientists, mathematicians, and education faculty at Florida State University. In Applied Geosciences/FSU-Teach, students will develop deep science or mathematic knowledge and the knowledge, skills, and experience needed to be an effective science or math teacher. The program includes coursework in meteorology, geology, oceanography, hydrology, and astronomy. The program will pay for tuition for the first two science/teaching courses. Internship positions with scientists, mathematicians and local schools are available. This is a double-major only program. FSU-Teach majors are first admitted into their primary, discipline-specific major and must meet the state-wide common program prerequisites for that major, in this case Applied Geosciences. Later, students apply for admission into a secondary major within the College of Education called Secondary Science or Mathematics Teaching. Upon graduation, students are awarded the BS degree with majors in Environmental Science and Secondary Science or Mathematics Teaching. Environmental Science is the interdisciplinary study of environmental systems from a scientific perspective. Drawing principally from the areas of oceanography, geology, meteorology, biology, and chemistry, the Environmental Science program will prepare students in the broader area of geosciences and is an attractive option for students seeking a broader interdisciplinary major with the rigor of mathematics and the physical sciences at its core.

Bachelor of Science in Environmental Science

A minimum of forty semester hours, as specified below is required. Students should complete the prerequisite coursework for entrance to the major program of study. Students must also have completed a minimum of fifty-two hours of credit and at least half the required hours in Liberal Studies major program of study. Students must also have completed a minimum of fifty-two hours of credit and at least half the required hours in Liberal Studies major program of study. Students must also have completed a minimum of fifty-two hours of credit and at least half the required hours in Liberal Studies major program of study.

Required Courses for the Education Major (about thirty hours)

**HIS 3555** Perspectives on Science and Mathematics (3)
**ISC 3523C** Research Methods (3)
**RED 4335** Literacy Across the Content Areas (3)
**SMT 1043** Step 1: Inquiry Approaches to Teaching (1)
**SMT 1053** Step 2: Inquiry-Based Lesson Design in Science/Mathematics (1)
**SMT 3100** Knowing and Learning in Science and Mathematics (FSU Teach) (3)
**SMT 4301** Classroom Interactions (FSU-Teach) (3)
**SMT 4664** Project Based Instruction (FSU-Teach) (3)
**SMT 4930** Apprentice Teaching Seminar (FSU-Teach) (1–4)
**SMT 4945** Apprentice Teaching (FSU-Teach) (5)
**TSL 4324** ESOL Instruction in the Content Areas (3)

Required courses for the Education major (about thirty hours)

**HIS 3555** Perspectives on Science and Mathematics (3)

Bachelor of Science in Environmental Science

A minimum of forty semester hours, as specified below is required. Students should complete the prerequisite coursework for entrance to the major program of study. Students must also have completed a minimum of fifty-two hours of credit and at least half the required hours in Liberal Studies including required English and math, or an AA degree. No required course in which a student has earned a grade below “C-” may be applied toward the degree in Environmental Science. A student who has received more than five unsatisfactory grades (U, F, D–, D, D+) in science or mathematics courses (and their prerequisites) taken at Florida State University or elsewhere, including repeated unsatisfactory grades in the same course, will not be permitted to graduate with a degree in this major.

Coursework and Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin. Environmental Science Core courses (nineteen to twenty hours)

**GGL 475/C** Introduction to Remote Sensing, Air Photo Interpretation and GIS for the Earth Sciences (3) or GIS 4043 Geographic Information Systems (3) and GIS 4043L GIS Lab (1)
**MET 1010** Introduction to the Atmosphere (3) or MET 2700 General Meteorology (3)
**OCE 4008** Principles of Oceanography (3)
**OCE 4017** Current Issues in Environmental Science (3) or GLY 3039 Energy, Resources, and the Environment (3)
**OCE 4906** Directed Individual Study (4)

Environmental Science Elective courses: Choose a total of twenty-one hours, twelve of which must be selected from List 1 and the remaining nine hours from any of the elective lists below. Students must make sure to satisfy all course prerequisites.

FSU-Teach Program in Environmental Science

FSU-Teach is an innovative approach to teacher education that involves collaboration between scientists, mathematicians and education faculty at Florida State University. In Environmental Science/FSU-Teach, students will develop environmental science knowledge and the knowledge, skill, and experience needed to be an effective science teacher. Science coursework will include courses in meteorology, geology, oceanography, hydrology, and astronomy. The program will pay for tuition for the first two Education/Teaching courses. For more information, see our Web site, http://fsu-teach.fsu.edu/.

This is a double-major only program. FSU-Teach majors are first admitted into their primary, discipline-specific major and must meet the state-wide common program prerequisites for that major, in this case Environmental Science. Later, students apply for admission into a secondary major within the College of Education called Secondary Science or Mathematics Teaching. Upon graduation, students are awarded the BS degree with majors in Environmental Science and Secondary Science or Mathematics Teaching. Environmental Science is the interdisciplinary study of environmental systems from a scientific perspective. Drawing principally from the areas of oceanography, geology, meteorology, biology, and chemistry, the Environmental Science program will prepare students in the broader area of geosciences and is an attractive option for students seeking a broader interdisciplinary major with the rigor of mathematics and the physical sciences at its core.

Required Courses for the Education Major (about thirty hours)

**AST 1002** Planets, Stars, and Galaxies (3)
**GLY 2100** Historical Geology (3)
**GLY 475/C** Introduction to Remote Sensing, Air Photo Interpretation and GIS for the Earth Sciences (3) or GIS 4043 Geographic Information Systems (3) and GIS 4043L GIS Lab (1)
**MET 1010** Introduction to the Atmosphere (3) or MET 2700 General Meteorology (3)
**OCE 4008** Principles of Oceanography (3)
**OCE 4017** Current Issues in Environmental Science (3) or GLY 3039 Energy, Resources, and the Environment (3)
**OCE 4906** Directed Individual Study (4)
1. Geoscience Elective Courses:
   EOC 4631 Marine Pollution (3)
   GLY 2100 Historical Geology (3)
   GLY 3200C Mineralogy and Crystallography (3)
   GLY 3310C Igneous and Metamorphic Petrology (3)
   GLY 3400C Structural Geology (4)
   GLY 3610C Paleontology (4)
   GLY 4884 Environmental Geology I (3)
   GLY 4905 Directed Individual Study (Geohazards) (3)
   MET 2101 Physical Climatology (3) or MET 3103 Climate Change Science (3) or ISC 2003 Global Change: Its Scientific and Human Dimensions (3)
   MET 3220C Meteorological Computations (3)
   MET 3300 Introduction to Atmospheric Dynamics (3)
   MET 3940 Weathercasting (1)
   MET 4159r Selected Topics in Meteorology (1–3)
   MET 4400C Meteorological Instrumentation and Observation (3)
   OCB 4631 Estuarine and Coastal Ecology (3)
   OCB 4637 Marine Benthic Ecology (3)
   OCC 4002 Basic Chemical Oceanography (3)
   OCC 4060 Environmental Science Modeling (3)
   OCE 3555 Environmental Science II: Habitable Planet (3)
   OCE 4064 Marine Conservation Biology (3)
   OCE 4265 Coral Reef Ecology (3)
   OCE 4930r Studies in Oceanography (1–4) (Topics vary: Biodiversity, Earth System, Marine Microbial Ecology, Geomicrobiology, Physics and Flow of Water Bodies, Environmental Toxicology, or other select topics)
   OCP 4005 Introduction to Physical Oceanography (3)
   Other classes are allowed as electives with department permission.

2. Other related areas of focus:
   Environmental Engineering Tools (nine to ten hour maximum):
   CGN 2327L Civil Engineering Graphics Lab (1)
   CEG 2202C Introduction to Geomatics Engineering (4)
   EES 3040 Introduction to Environmental Engineering Science (3)
   EES 3040L Environmental Engineering Science Lab (1)
   EGM 3512 Engineering Mechanics (4)
   EGN 2123 Computer Graphics for Engineers (2)
   ENV 4001 Environmental Engineering (3)
   ENV 4041 Environmental Systems Analysis (3)
   ENV 4341 Solid and Hazardous Waste Engineering (3)
   ENV 4405 Water Reuse Engineering (3)
   Environmental Geology/Geosciences Focus (nine to ten hour maximum):
   GLY 4240 Principles of Geology (3)
   GLY 4451 Introduction to Geophysics (3)
   GLY 4544C Sedimentation and Stratigraphy (3)
   GLY 4820 Principles of Hydrology (3)
   GLY 4884 Environmental Geology I (3)
   GLY 4905 Directed Individual Study (3)
   Environmental Science students with a focus area in GLY, wanting to use
Field Camp as their Capstone should take the following coursework:
   GLY 3400C Structural Geology (4)
   GLY 4544C Sedimentation and Stratigraphy (4)
   GLY 4790 Field Course (6)
   Biology Focus (nine to ten hour maximum):
   BOT 4394 Plant Molecular Biology (3)
   BSC 3052 Conservation Biology (3)
   BSC 3312 Marine Biology (3)
   BSC 3402L Experimental Biology Laboratory (3)
   BSC 3930 Seminar in Biological Frontiers (1)
   BSC 3938 Careers in the Biological Sciences (1)
   BSC 4473C Introduction to Scientific Diving (3) (Faculty Permission Required)
   BSC 4933r Selected Topics in Biological Science (1–4)
   PCB 3045 General Ecology (3)
   PCB 4674 Evolution (3)
   ZOO 4454C Biology of Fishes (4)
   Chemistry Focus (nine to ten hour maximum):
   CHM 2210 Organic Chemistry I (3)
   CHM 2211 Organic Chemistry II (3)
   CHM 2211L Organic Chemistry II Laboratory (3)
   CHM 3120 Analytical Chemistry I (3)
   CHM 3120L Analytical Chemistry I Laboratory (1)
   CHM 4080 Environmental Chemistry I (3)
   CHM 4081 Environmental Chemistry II (3)
   Geography/GIS Focus (nine to ten hour maximum):
   GEO 2200C Physical Geography (3)
   GEO 4114 Environmental Field Methods (3)
   GEO 4162C Spatial Data Analysis (3)
   GEO 4340 Living in a Hazardous Environment (3)
   GEO 4357 Environmental Conflict and Economic Development (3)
   GEO 4376 Landscape Ecology (3)
   GEO 4930r Special Topics in Geography (1–3)
   GIS 3015 Map Analysis (3)
   GIS 4006 Computer Cartography (3)
   GIS 4043 Geographic Information Systems (3)
   GIS 4043L GIS Lab (1)

3. Graduate School Preparation:
   CHM 2210 Organic Chemistry I (3)
   CHM 2211 Organic Chemistry II (3)
   CHM 2211L Organic Chemistry II Lab (3)
   MAC 2311 Calculus with Analytic Geometry I (4)
   MAC 2312 Calculus with Analytic Geometry II (4)
   MAC 2313 Calculus with Analytic Geometry III (5)
   PHY 2049C General Physics B (five hours at FSU) (5)

Collateral Minor: zero hours beyond required courses.
By completing the requirements of the BS Environmental Science Program, students automatically receive a collateral minor in Earth, Ocean, and Atmospheric Science. Twelve additional hours of coursework in specific elective classes may constitute a specific minor within that field. Talk to your advisor for more information.

Requirements for a Minor in Environmental Science
(for non-environmental science majors)
A minimum of fifteen semester hours of Environmental Science courses approved for major credit as follows: two of the following; MET 1010 (or MET 2700), GLY 2010C or OCE 4008, AND any three courses from the Geoscience Elective courses (List 1). Note; only twelve hours are required for current EOAS major students.

Bachelor of Arts in Environmental Science and Policy
A minimum of thirty-seven semester hours, as specified below is required. Students should complete the prerequisite coursework for entrance to the major program of study. Students must also have completed a minimum of fifty-two hours of credit and at least half the required hours in Liberal Studies including required English and Math, or an AA degree. No required course in which a student has earned a grade below "C-" may be applied toward the degree in Environmental Science and Policy. A student who has received more than five unsatisfactory grades (U, F, D–, D, D+) in science or mathematics courses (and their prerequisites) taken at Florida State University or elsewhere, including repeated unsatisfactory grades in the same course, will not be permitted to graduate with a degree in this major.

Coursework and Requirements
Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Environmental Science and Policy Core Courses (thirteen hours)
   MET 1010 Introduction to the Atmosphere (3) or MET 2700 General Meteorology (3)
   OCE 4008 Principles of Oceanography (3)
   OCE 4017 Current Issues in Environmental Science (3) or GLY 3039 Energy, Resources, and the Environment (3)
   OCE 4906 Directed Individual Study (4)

Required Policy Courses Choose six hours from the following list:
   GEO 4357 Environmental Conflict and Economic Development (3)
   GEO 4372 Natural Resource Assessment and Analysis (3)
   PHI 2100 Reasoning and Critical Thinking (3)
   PHI 2620 Environmental Ethics (3)
   PUP 3002 Introduction to Public Policy (3)
   PUP 4203 Environmental Politics and Policy (3)
   URP 3000 Introduction to Planning and Urban Development (3)
Environmental Science and Policy Elective Courses Choose fifteen hours from the following two lists. At least three courses must be taken from List 1. Students must make sure to satisfy all core prerequisites.

List 1

- EOC 4631 Marine Pollution (3)
- ISC 2003 Global Change: Its Scientific and Human Dimensions (3)
- GLY 2100 Historical Geology (3)
- GLY 3200C Mineralogy and Crystallography (3)
- GLY 3310C Igneous and Metamorphic Petrology (3)
- GLY 3400C Structural Geology (4)
- GLY 3610C Paleontology (4)
- GLY 4240 Principles of Geochemistry (3)
- GLY 4544C Sedimentation and Stratigraphy (4)
- GLY 4751C Introduction to Remote Sensing, Air Photo Interpretation and GIS for the Earth Sciences (3)
- GLY 4820 Principles of Hydrology (3)
- GLY 4884 Environmental Geology I (3)
- GLY 4905 Directed Individual Study (Geohazards) (3)
- MET 2101 Physical Climatology (3) or MET 3103C Climate Change Science (3) or ISC 2003 Global Change: Its Scientific and Human Dimensions (3)
- MET 3220C Meteorological Computations (3)
- MET 3300 Introduction to Atmospheric Dynamics (3)
- MET 3520 Current Weather Discussion (1)
- MET 3940 Weathercasting (1)
- MET 4159r Special Topics in Meteorology (1–3)
- MET 4400C Meteorological Instrumentation and Observation (3)
- OCB 4631 Estuarine and Coastal Ecology (3)
- OCB 4637 Marine Benthic Ecology (3)
- OCC 4002 Basic Chemical Oceanography (3)
- OCC 4060 Environmental Science Modeling (3)
- OCE 3555 Environmental Science II: Habitable Planet (3)
- OCE 4064 Marine Conservation Biology (3)
- OCE 4265 Coral Reef Ecology (3)
- OCE 4930r Studies in Oceanography I–IV (Topics vary: Biodiversity, Earth Systems, Marine Microbial Ecol, Geomicrobiology, Physics and Flow of Water Bodies, Environmental Toxicology, or other select topics) (consent of advisor)
- OCP 4005 Introduction to Physical Oceanography (3)

Other classes are allowed as electives with department permission (six to seven hours maximum).

List 2

- CHM 1046 General Chemistry II (3) or BSC 2011 Biological Science II (3) If not used as a prerequisite
- CHM 4080 Environmental Chemistry I (3)
- HFT 3700 Tourism Management and the Environment (3)
- URP 3000 Introduction to Planning and Urban Development (3) If not used as a required policy class
- URP 4022 Collective Decision Making (3)
- URP 4314 Introduction to Growth Management and Comprehensive Planning (3)
- URP 4318 Growth Management and Environmental Planning (3)
- URP 4402 Sustainable Development Planning in the Americas (3)
- URP 4404 River Basin Management and Planning (3)
- URP 4423 Introduction to Environmental Planning and Resource Management (3)
- URP 4618 Planning for Developing Regions (3)
- URP 4710 Introduction to Transportation Issues and Transportation Planning (3)
- URP 4741 Introduction to Issues in Housing and Community Development (3)

Additional Requirements for the Bachelor of Arts Degree (nine hours)

The Bachelor of Arts degree requires nine semester hours in the fields of humanities and/or history in addition to the Liberal Studies and the foreign language requirement.

Minor: A minor is required.

Environmental Science and Policy majors must complete a minimum of twelve hours in an approved minor area. Declare your minor in the Arts and Sciences Dean’s office and with an advisor.

Requirements for a Minor in Environmental Science and Policy

A minimum of fifteen semester hours which must include two of the following: MET 1010 (or MET 2700), GLY 2100C or OCE 4008 AND any two courses from the Environmental Science and Policy electives, AND one class from the Required Policy Courses list.

Bachelor of Science in Geology

A minimum of thirty-eight semester hours, as specified below, is required. Students should complete the prerequisite coursework for entrance to the major program of study. Students must also have completed a minimum of fifty-two hours of credit and at least half the required hours in Liberal Studies including required English and Math, or an AA degree. A student who has accumulated more than five grades below “C–” (including grades of U) in mathematics, natural science, and statistics courses taken for college credit at FSU or elsewhere, whether repeated or not, will not be allowed admission into or continuation as a geology major.

Coursework and Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Basic Geology courses (twenty eight hours)

- GLY 2010C Physical Geology (with Lab) (4)
- GLY 2100 Historical Geology (3) and GLY 2100L (1)
- GLY 3200C Mineralogy and Crystallography (3)
- GLY 3310C Igneous and Metamorphic Petrology (3)
- GLY 3400C Structural Geology (4)
- GLY 4544C Sedimentation and Stratigraphy (4)
- GLY 4790 Field Course (6)

Geology Elective courses (ten hours) chosen from:

- GLY 3039 Energy, Resources, and the Environment (3)
- GLY 3610C Paleontology (4)
- GLY 4240 Principles of Geochemistry (3)
- GLY 4780 Environmental Field Problems (4)
- GLY 4820 Principles of Hydrology (3)
- GLY 4884 Environmental Geology I (3)
- GLY 4905 Directed Individual Study (Geohazards) (3), Directed Individual Study (Field Methods) (1)
- OCB 4631 Estuarine and Coastal Ecology (3)
- OCG 4050 Geological Oceanography (3)

Additional electives can be taken from list of GLY graduate courses with instructor’s permission.

Collateral Courses Twenty-three to twenty-six hours. Collateral courses may also be used to satisfy Liberal Studies, prerequisite, and/or minor requirements.

- CHM 1045 General Chemistry I (3) and CHM 1045L General Chemistry I Laboratory (1)
- CHM 1046 General Chemistry II (3) and CHM 1046L General Chemistry II Laboratory (1)
- MAC 2311 Calculus with Analytical Geometry I (4)
- MAC 2312 Calculus with Analytical Geometry II (4) or STA 2122 Introduction to Applied Statistics (3)
- PHY 2048C General Physics A (5) or PHY 2053C College Physics A (4)
- PHY 2049C General Physics B (5) or PHY 2054C College Physics B (4)

Minor The required coursework in math, chemistry, and physics will satisfy the requirement for the minor. However, a student may select other minors in consultation with an advisor.

Requirements for a Minor in Geology

A minimum of twelve semester hours of Geology (GLY) courses approved for major credit including GLY 2100C, GLY 2100, GLY 2100L AND four hours of GLY courses at the 3000 level or above.

Bachelor of Science in Meteorology

The department offers a degree program that prepares students for a diverse number of careers, as well as graduate school. It is highly recommended that students meet regularly with their assigned academic advisor to tailor electives to the students’ goals. Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin. A detailed handout for meteorology majors entitled Undergraduate Program in Meteorology is available at http://www.met.fsu.edu.
Meteorology is a quantitative science requiring extensive preparation in mathematics and physics. Freshmen entering the program are urged to take as many advanced placement (AP), College-Level Exemption Program (CLEP), or other exemption examinations as they can in order to realize maximum flexibility.

Meteorology majors are required to complete a graduation check with the academic coordinator at least one semester prior to graduation. Graduating students also must complete a written exit survey in their final semester, and if possible, an exit interview with the departmental representative. This interview will discuss information provided from the written exit survey. The College of Arts and Sciences will not approve graduation without receiving the written exit survey.

Coursework and Requirements

Required meteorology coursework: MET 2101, 2507C, 2700, 3220C, 3300, 4301, 4302, 4420, 4500C, and 4501C.

Required courses in mathematics begin with MAC 2311, which may not be taken without its prerequisite courses, MAC 1114 and MAC 1140 or 1147. The following courses, required of all meteorology majors, constitute a minor in mathematics: MAC 2311, 2312, 2313; MAP 2302 or 3305. MAP 3306 or 4341 is strongly recommended for those students wishing to attend graduate school.

All students must complete CHM 1045 and 1045L, STA 3032 or STA 4321, PHY 2048C, and PHY 2049C and are encouraged to take PHY 3101. While PHY 4450A serves as a corequisite of PHY 2048C, PHY 2049C and PHY 2049C qualifies one for a physics minor. Computer science has arranged for a special optional minor for meteorology majors. Their general minor is recommended for anyone considering additional work in computer science. See the "Computer Science" section of this General Bulletin for details. Students wishing to pursue a career as a meteorologist with the federal government should study http://tinyurl.com/5nbjpg for the Government’s definition of a meteorologist to help them pick electives to maximize their opportunities.

The Bachelor of Arts (BA) degree may be obtained by completing the Bachelor of Science (BS) degree requirements plus nine additional credits in humanities and history.

Academic Performance

All 2000- and 3000-level meteorology courses must be completed with a grade of “C” (2.0) or better to continue to the 4000-level courses. All other required meteorology, mathematics, chemistry, and physics courses must be completed with a “C–” or better before taking a course for which the technical course serves as a prerequisite. Students earning less than the necessary grade in one of these courses will be required to retake the course until the required standard is met. Retaking a course often delays graduation by one year. A student who has received more than five unsatisfactory grades (U, F, D-, D, D+) in courses required for a major in meteorology (chemistry, mathematics, meteorology, physics, and/or statistics) whether taken at Florida State University or elsewhere, whether repeated or not, will not be permitted to graduate with a degree in meteorology.

A grade point average of at least 2.0 is required for all meteorology courses numbered 2000 or higher. No more than a total of three S/U-grade only MET prefixes courses may be used for the total semester hour requirement for a degree in meteorology.

Undergraduate Research

All students, particularly those interested in graduate school, are encouraged to volunteer to assist with research in a faculty member’s lab. This work requires a substantial time commitment and typically involves computer skills that are learned and polished through this experience. Qualified students can use this as the basis for an Honors in the Major senior thesis; for more information, see the entry in this General Bulletin titled “University Honors Office and Honor Societies.” Dr. Ahlquist is the "honors liaison" for meteorology. Several of our undergraduates have won the American Meteorological Society Macelwane Award for their undergraduate research, and most were not in the Honors in the Major program. In that case, they can register for MET4905 Directed Individual Study (DIS) credit for this work, but that is not required.

Requirements for a Minor in Meteorology

A minor in meteorology requires at least twelve credit hours and must be discussed on an individual basis with a meteorology faculty advisor or academic coordinator. The minor typically begins with MET 1010, MET 1010L, MET 2700, and MET 2101, and options exist for the completion of the minor. MET 2700 has prerequisites of CHM 1045, CHM 1045L, and MAC 2311; and a corequisite of PHY 2048C. Additional information is available from the academic coordinator in the Department of Meteorology, 404 Love Building. In no case may more than three semester hours in S/U courses apply toward a minor in meteorology.

Definition of Prefixes

EOC—Ocean Engineering
ESC—Earth Science
GLY—Geology
IFS—Interdisciplinary Florida State University Courses
ISC—Interdisciplinary Sciences

Undergraduate Courses

Earth Science

ESC 1000. Introductory Earth Science (3). This course is an introduction to the study of the planet Earth, its internal dynamics, and its surficial weathering, erosion, and sedimentary processes. Course credit may not be received for this course and also GLY 1030 or GLY 2010C.

ESC 2200C. Earth Science for EC/EE Teachers (4).

GLY 1000. Dynamic Earth (3). This course is an introduction to geology as the study of the planet Earth, its internal dynamics, and its surficial weathering, erosion, and sedimentary processes. Course credit may not be received for this course and also GLY 1030 or GLY 2010C.

GLY 1000L. Dynamic Earth Laboratory (1). Pre- or corequisite: GLY 1000 or GLY 1030. This course is a laboratory introduction to geology as the study of plant Earth, specifically a study of minerals, rocks, and maps.

GLY 1001. Earth As A System (3). This course presents a holistic approach to Earth's history with a view toward understanding that history to explore the planets future. The course explains how interactions of the biosphere, geosphere, hydrosphere, and exosphere are expressed in Earth's ever-changing environment.

GLY 1030. Environmental Issues in Geology (3). This course examines environmental issues as they relate to geological phenomena, which include volcanic and earthquake hazards, resource and land-use planning, and air and water pollution, waste disposal, glaciation and sea-level change, landslides, flooding, shoreline erosion, and global change issues. Course credit may not be received for this course and also GLY 1000 or 2010C. Credit can be received for taking GLY 1030L.

GLY 1042. Planetary Geology (3). This course is an introduction to the basic geological processes that apply to the planets and moons of the solar system. Observational evidence from spacecraft and earth-based sensors of the surfaces, dynamics, structures, and geologic evolution. The earth-moon system is presented as a basis for comparison.

GLY 1070. Living on the Water Planet (3). This course provides students with an overview of the basic physics and chemistry of water and the processes that control water supply to natural ecosystems and to human civilization. It covers the hydrologic cycle, floods, drought, groundwater, patterns of water use, threats to water quality, the effects of global climate change on future water supplies, and water issues facing the state of Florida.

GLY 1102. Dinosaurs and Disasters on an Evolving Earth (3). This course examines the history of the earth and its organisms as recorded in the fossil and rock record; principles of geological and paleontological research; evolution of the dinosaurs, mass extinctions, and effects of past continental movements on the diversity of life. Course credit may not be received for this course and also GLY 2100. GLY 2100L recommended.

GLY 2010C. Physical Geology (4). Pre- or corequisite: CHM 1045. This course is an introduction to surficial and internal processes affecting a dynamic planet Earth. For majors in geology and natural sciences. Two hour laboratory required. Course credit may not be received for this course and also GLY 1000 or GLY 1030.

GLY 2100. Historical Geology (3). This course examines the history of the earth and is an introduction to the fossil record. Course credit may not be received for this course and also GLY 1102.

GLY 2100L. Historical Geology Laboratory (1). Pre- or corequisite: GLY 1102 or GLY 2100. This laboratory is a study of the physical and biological evidence for the known history of the earth.
GLY 3039. Energy, Resources, and the Environment (3). Prerequisites: GLY 1000 and GLY 2010C, or instructor permission. This course examines the origin of our energy and material needs, renewable and non-renewable resources, and the environmental impacts of extracting and utilizing these resources. Emphasis is placed on the chemical nature of the resources and the impact on the chemical composition of the ocean/airland/atmosphere/groundwater/human health budget. Field trips, in-class demonstrations, and homework exercises provide firsthand experience.

GLY 3200C. Mineralogy and Crystallography (3). Prerequisite: GLY 1000 and GLY 2010C. This course is an introduction to mineralogy, crystal chemistry, and crystallography. Three hour laboratory required.

GLY 3220C. Optical Mineralogy (2). Corequisite: GLY 3020C. This course explores the optical properties of crystals and mineral identification by use of the polarizing microscope. Three hour laboratory required.

GLY 3310C. Igneous and Metamorphic Petrology (3). Prerequisite: GLY 3200C. This course focuses on the classification, description, and origin of igneous and metamorphic rocks; relation of these rocks to tectonic processes. Three hour laboratory required.

GLY 3340C. Sedimentary Petrography (2). Prerequisite: GLY 3220C. This course is a survey of sedimentary rock types, principles of description and classification, sediment genesis and transport, distribution, and landscapes. Three hour laboratory required.

GLY 3400C. Structural Geology (4). Prerequisites: GLY 2100, GLY 2100L, and GLY 3200C. This course focuses on the theory, processes, mechanics of rock deformation and the deformation of the earth's crust. Field trip is required.

GLY 3610C. Paleontology (4). Prerequisites: GLY 2100, GLY 2100L. This course is a review of invertebrate biology, with emphasis on hard-part nomenclature; the occurrence, distribution, evolution, and ecology of fossil invertebrates. Three hour laboratory required.

GLY 4240. Principles of Geochemistry (3). Prerequisites: GLY 2010C and basic chemistry. This course focuses on the crystal chemistry of silicates and other minerals; chemical principles applied to igneous, metamorphic, and sedimentary environments and processes; chemistry of natural aqueous systems; chemical equilibria of geologic systems.

GLY 4451. Introduction to Geophysics (3). Prerequisites: MAP 2302 and PHY 2049 or instructor permission. This course explores plate tectonics and earth structure. Current methods of probing the interior: seismology and seismic tomography, ge electromagnetics, and gravity and geophysics, environment, and class discussions.

GLY 4511. Principles of Stratigraphy (3). Prerequisite: GLY 3340C. This course is an analysis and synthesis of stratigraphic sequences. Depositional systems; physical and biostatigraphy; geochronology and chronostatigraphy; magnetic, seismic, and sequence stratigraphy; tectonic vs. climatic controls. Term paper required.

GLY 4544C. Sedimentation and Stratigraphy (4). Prerequisite: GLY 2010C. This course surveys modern and ancient sedimentary deposits, sedimentation, sediment genesis and origin of sedimentary deposits, analysis and synthesis of stratigraphic sequences. Topics include: depositional systems; physical and biostatigraphy; geochronology and chronostatigraphy; magnetic, seismic, and sequence stratigraphy; tectonic vs. climatic controls. Term paper required.

GLY 4551. Sedimentology (2). Prerequisite: GLY 3200C. This course is a study of modern and ancient sedimentary deposits, measurement of sediment parameters, analysis of sediment transport modes, classification of sediments and sedimentary rocks, statistical reduction of sedimentologic data. Field trip required. Students concentrating in sedimentary or geological engineering should take GLY 4551L concurrently with 4551.

GLY 4700C. Geomorphology (3). Prerequisite: Senior standing. This course is an introduction to the major forms of geologic activity on the earth's surface. Emphasis is placed on the basic mechanisms that govern landform evolution, and on the history of geomorphic study. Several field trips are required.

GLY 4730. Marine Geology (3). This course examines shelf, shelf and deep ocean processes; marine sediment types and sedimentary environments; plate tectonics; origin of the ocean; paleoclimatology; marine mineral resources. Includes research methods cruise for familiarization with marine geologic sampling and sensing devices. Credit received for GLY 4730 precludes credit being received for GLY 5736 or OCG 5050.

GLY 4750. Geological Field Methods (1). S/U grade only. Corequisite: GLY 400C. This course provides a working knowledge and some experience of techniques, procedures, and tools to geological field research, the professional geologist, and the required summer field course.

GLY 4751C. Introduction to Remote Sensing, Air Photo Interpretation and GIS for the Earth Sciences (3). Prerequisites: GLY 3400C and PHY 2049. This course is an introduction to the study of the earth using photographic and electronic imaging acquired from aircraft and satellite imagery, and the interpretation of these data. Includes the use of field and geophysical data, remote sensing of the Earth's surface and atmosphere, and the use of digital image analysis and GIS in the study of earth resources and global change.

GLY 4780. Environmental Field Problems (4). Prerequisite: GLY 2010C. This course emphasizes the use of field-related observations in the study of environmental problems. Fieldwork includes the study of soils, surface waters and groundwater, erosion and mass wasting, and the chemical contamination of soils and surface waters. Evaluation of student performance in the course is based upon a series of written reports.

GLY 4790. Field Course (6). Prerequisites: GLY 3400C and GLY 4750. This course is a series of field problems based largely on exposures of strata and structures. Preparation of geologic maps, sections, and reports.

GLY 4812C. Ore Deposits (3). Prerequisites: GLY 3310C and GLY 3400C. This course is an introduction to the study of metallic ore deposits. Laboratory studies of ores using optical and X-ray methods, microscopic and chemical procedures, and the role of ores in the environment.

GLY 4820. Principles of Hydrology (3). Prerequisites: CHM 1046 and PHY 2049C. This course focuses on the fundamentals of hydrogeology with an emphasis on ground water and hydrochemistry. Both theory and applications are addressed.

GLY 4844. Environmental Geology (3). This course examines the application of geologic and geochemical principles to environmental issues. Topics include: an evaluation of the role of aqueous surface water, groundwater, and wetlands; hydrogeology and the role of storage tank problems; waste management, including solid, toxic, and nuclear waste; air quality issues including radon and asbestos; geologic hazards in upland and coastal areas; environmental geochemical methods and instrumentation; quality assurance and quality control in environmental analysis; principles of toxicology; risk assessment and risk management; and environmental assessments.

GLY 4905r. Directed Individual Study (1–9). May be repeated to a maximum of nine semester hours.

GLY 4915r. Undergraduate Research (1–9). (S/U grade only.) This course includes projects in the Earth, Ocean, and Atmospheric Science department arranged in advance between the student and a member of the teaching faculty of the department. May be repeated to a maximum of nine semester hours.

GLY 4917. Senior Thesis (1). (S/U grade only.) Prerequisite: GLY 4915r. This course consists of a written report and an oral presentation discussing research work done under GLY 4915r. The grade is assigned by a committee of three faculty members.

GLY 4989r. Honors Work (1–6). May be repeated to a maximum of nine semester hours.

IFS 2087. Tribolites to T. Rex: History of Life on Earth (3). This course is an overview of the history of life on earth from its first appearance to the dinosaurs. Emphasis is placed on the nature of fossil data, relationship to modern biology and how inferences about life habits are made.

ISC 237r. Natural Science Honors Seminar (3).

ISC 493r. Seminar in Contemporary Science, Mathematics, and Science Education (1). This course includes presentations of contemporary and interesting issues in science, mathematics, and science education. Content varies from semester to semester. May be repeated to a maximum of four semester hours.

Environmental Science

EOC 4631. Marine Pollution (3). Prerequisite: Understanding of chemical processes. This course introduces students to chemical, physical, and biological aspects of dominant marine pollutants, including dissolved toxic metals, complex organic and inorganic contaminants, and particulate pollutants. Topics cover the sources and types of dominant pollutants, their key characteristics, their pathways (as traced through the marine ecosystem from the source to the sinks), their impact on the environment, as well as approaches that could lead to the reduction or elimination of pollutants in the marine environment.

IFS 2088. Sustainable Food and Water: Soil, Animals, Vegetables, and Grain (3). This course provides an overview of the issues involved in food and water security on a planet where a billion people are malnourished, while at the same time another billion are overweight. The course examines the science and sustainability of food production, processes, and quality, and soil development.

ISC 2003. Global Change, Its Scientific and Human Dimensions (3). Prerequisite: Two years high school science and two years high school math. This course covers global environmental change, scientific and human dimensions, and international public policy implications.

Ocean Science

ESC 2200C. Earth Science for EC/EE Teachers (4).

OCB 2302. Biology of Marine Animals (3). Prerequisite: BSC 1005. This course explores marine animals such as cetaceans, pinnipeds, sirenians, and sea otters from the point of view of their biology and ecology. More specifically, the course offers an overview of the evolution, taxonomy, anatomy, and physiology of marine mammals, as well as an in-depth examination of their acoustics, ecology, and behavior. Course lecture is accompanied by discussions of the current scientific literature.

OCB 4631. Estuarine and Coastal Ecology (3). Prerequisite: Understanding of chemical processes. This interdisciplinary course addresses the ecology of estuaries and the part of the inshore waters with which estuaries interact directly. The lectures address the general ecological principles that govern the productivity and diversity of estuaries, including their interactions with adjacent freshwater ecosystems, and the physical processes that control those interactions. Topics cover the types of dominant contaminants, their key characteristics, their pathways (as traced through the marine ecosystem from the source to the sinks), their impact on the environment, as well as approaches that could lead to the reduction or elimination of pollutants in the marine environment.

OCB 4880. Sustainable Food and Water: Soil, Animals, Vegetables, and Grain (3). This course provides an overview of the issues involved in food and water security on a planet where a billion people are malnourished, while at the same time another billion are overweight. The course examines the science and sustainability of food production, processes, and quality, and soil development.

OCB 493r. Seminar in Contemporary Science, Mathematics, and Science Education (1). This course includes presentations of contemporary and interesting issues in science, mathematics, and science education. Content varies from semester to semester. May be repeated to a maximum of four semester hours.

Basic Chemical Oceanography (3). Prerequisite: CHM 1046. This course focuses on the chemical composition of seawater, carbon dioxide system, nutrients, trace elements, and biogeochemistry.

OCO 4000. Environmental Science Modeling (3). Prerequisites: MAC 2311, MAC 2312, and either STA 2122 or STA 4412. This course gives students an understanding of explanatory and predictive models of the earth’s systems and environmental processes therein. Analytical and numerical methods for solving equations are examined and applied. Discussions cover relevant scientific issues, mathematical and computational procedures, visualization techniques, as well as the use of models in research and decision making.
OCE 1001. Elementary Oceanography (3). Prerequisite: MGF 1106 or MGF 1107. This course studies the structure and motion of the oceans and their environment, properties, populations, and energy budget. Not intended for upper-division science or mathematics majors. Upper-division science or mathematics majors are encouraged instead to take OCE 4008.

OCE 3555. Environmental Science II: Habitable Planet (3). This course explores the earth system at and above the surface of the earth. It combines earth and biological sciences to explore the co-evolution of the earth and life over geological time. Evolution of the hydrosphere, atmosphere, and lithosphere are discussed.

OCE 4008. Principles of Oceanography (3). Prerequisite: A science major or minor status and junior or senior standing. This course focuses on dynamic motions and life processes in the marine environment. Long-term geologic history of the oceans and recent changes caused by man. An overview of oceanography for upper-division students majoring in science, mathematics, or science teaching.

OCE 4017. Current Issues in Environmental Science (3). This course is taught at an introductory level and includes discussions of current ground-breaking research, environmental problems, and approaches to solving them. It consists of presentations by expert speakers on various topics in environmental issues. May be repeated to a maximum of three semester hours.

OCE 4064. Marine Conservation Biology (3). Prerequisite: BSC 2111. This course discusses anthropogenic impacts on the world’s marine biological resources and ways to mitigate those impacts. The course begins with a brief overview of some relevant key concepts in marine biology and ecology.

OCE 4265. Coral Reef Ecology (3). Prerequisite: A good basic understanding of biological, chemical, and physical processes. In this course, the student learns the components of warm water coral reef ecosystems, their functions and interactions, and their response to environmental change. The biological, chemical and physical processes that govern the ecology of warm water coral reef ecosystems are addressed as well as the anthropogenic impact on reef ecosystems and the management of coral reef ecosystems.

OCE 4905r. Directed Individual Study (1–3). (S/U grade only.) May be repeated to a maximum of ten semester hours.

OCE 4906r. Directed Individual Study (1–4). Prerequisite: Instructor permission. May be repeated, subject to limitations that may apply from the individual student’s major departments, to a maximum of eighteen semester hours.

OCE 4930r. Studies in Oceanography (1–4). Prerequisite: Instructor permission. Topics vary. May be repeated to a maximum of nine semester hours when content changes.

OCG 3103. The Earth System (3). This course is an examination of the modern approach to understanding Earth’s climate history and climate change on a global scale.

OCG 4050. Geological Oceanography (3). This course studies the structural and oceanographic setting of continents and ocean basins, plate tectonics, ocean margins, marine sediments, and ocean history.

OCP 4005. Introduction to Physical Oceanography (3). Prerequisite: MAC 2313. This course examines tides, front formation, and the ocean response to wind.

PEN 1136. Theory and Practice of Compressed-Gas Diving (1). This course is an introduction to the field of compressed-gas diving that exposes students to the use of underwater technology and techniques in support of science.

Meteorology Science

ESC 2200C. Earth Science for EC/EE Teachers (4).

MET 1010. Introduction to the Atmosphere (3). This course covers the structure of the atmosphere; weather processes and weather systems, including climatic processes. Credit may not be received in this course if student has already received credit in 2000-level or upper-division MET courses.

MET 1010L. Introductory Meteorology Laboratory (1). Prerequisites: MAC 1105 or equivalent and college-level algebra. Corequisite: MET 1010. This course covers data analysis, instruments, and weather system models.

SCG 4835C. Teaching Earth and Space Science (3). This course examines the pedagogical content knowledge needed to teach earth/space science.

SCG 4839r. Seminar in Contemporary Science, Mathematics, and Science Education (1). This course includes presentations of contemporary and interesting issues in science, mathematics, or academic methods. Content varies from semester to semester. May be repeated to a maximum of four semester hours.

Required Courses for Meteorology Majors

MET 2101. Physical Climatology (3). Corequisite: MET 2700. This course covers global distribution of principal climatic elements with emphasis on physical causes. Statistical analysis of distribution of climatic variables.

MET 2507C. Weather Analysis and Forecasting (2). Prerequisite: MET 2700 with a grade of “C” or better. This course is an introduction to meteorological observations, data, codes, and scalar analysis practices. Weather applications software systems and computing environments for meteorological analysis and weather forecasting techniques are examined.

MET 2700. General Meteorology (3). Prerequisite: CHM 1045 and MAC 2311, both with a grade of “C” or better. Corequisite: PHY 2048C. This course covers atmospheric structure and composition; weather and circulation systems; physics of atmospheric processes, including thermodynamics of dry and moist air.

MET 3220C. Meteorological Computations (3). Prerequisite: MAC 2312 ("C" or better), MET 2101 ("C" or better), and MET 2700 ("C" or better). This course covers the solution of meteorological problems using computer and statistical programs; distributions of meteorological variables; meteorological programming.

MET 3300. Introduction to Atmospheric Dynamics (3). Prerequisites: MAC 2312 ("C" or better), PHY 2048C ("C" or better), and MET 2700 ("C" or better). This course covers fundamental concepts in understanding atmospheric processes and phenomena, wave motion, dynamics of the atmosphere, and thermodynamic and dynamic stability principles. Theory and fundamental principles are applied to meteorological problems also presented.

MET 3400. Atmospheric Dynamics (4). Prerequisite: MET 3300 with a grade of "C" or better. Corequisites: MAP 2302 or MAP 3305 and MET 4420. This course covers acceleration in rotating curvilinear coordinates; momentum, continuity, and energy equations for geostrophic, gradient, and thermal winds; generalized coordinates; circulation and vorticity theorems; scale analysis; Reynolds stresses; Prandtl and Ekman layers; developing baroclinic systems.

MET 3420. Atmospheric Dynamics II (4). Prerequisite: MET 4301 ("C" or better), MAC 2313 ("C" or better), and MET 2700 ("C" or better). This course covers linear perturbation theory; sound, gravity and Rossby waves; stability of the baroclinic and barotropic instability; energetics. An introduction to theory of partial differential equations applied to meteorological problems also presented.

MET 4240. Atmospheric Physics I (3). Prerequisites: PHY 2048C ("C" or better), PHY 2094C ("C" or better), MET 2700 ("C" or better), and MAC 2313 ("C" or better). This course covers analytical solutions of the current continuity equation, stationary waves, and the propagation of waves in the atmosphere.

MET 4450. Atmospheric Physics II (3). Prerequisite: MET 4240 with a grade of "C" or better. This course covers radiative processes in the atmosphere; radiative transfer equation; absorption by gases, Rayleigh scattering, remote sensing of radars and satellites.

MET 4500C. Synoptic Lecture-Laboratory I: Basic Analysis Techniques (3). Prerequisites: PHY 2094C ("C" or better), MET 3300 ("C" or better), or instructor permission. Corequisites: MET 4501 or MET 5311, MET 4420, and CSE 3460 or another programming language. This course covers the analysis of scalar and vector fields, introduction to the three-dimensional structure of atmospheric systems, and thermodynamic diagrams.

MET 4510C. Synoptic Lecture-Laboratory II: Four-Dimensional Structure (4). Prerequisites: MET 4501 or MET 5311, MET 4420, MET 4500C, and STA 3032 or STA 4321 with a grade of "C" or better in each. This course covers synoptic calculation and four-dimensional analysis of weather systems.

Required Courses for FSU-Teach Applied Geosciences

ISC 3523C. Research Methods (3). Prerequisites: SMT 1043 and SMT 1053. In this course, students learn appropriate scientific research methods for several types of research questions. Using the inquiry method of learning, they develop a research question and an experiment to answer it, and then use statistical techniques to analyze their resulting data.

MET 3103C. Climate Change Science (3). Prerequisite: MET 2700 with a grade of "C" or better. This course enables students to explore the science behind our understanding of climate change. The course provides an in-depth exploration of the use of proxy, in situ, remote-sensing data, climate models, and their public policy implications. Students gain experience in evaluating internal and external forcings on the climate system and make quantitative assessments of change. The course also gives students an understanding of energy transfer methods between the atmosphere, cryosphere, oceans, and fresh water systems.

Elective Courses for Meteorology Majors

MET 3520r. Current Weather Discussion (1). (S/U grade only.) Prerequisite: MET 2700. This course includes discussion of facsimile analysis and prediction materials. Three meetings per week. May be repeated to a maximum of four semester hours.

MET 3940r. Weathercasting (1). (S/U grade only.) Prerequisite: MET 1010. Corequisite: MET 2700. This course includes practice in preparing and presenting weathercasts for radio and television. May be repeated to a maximum of four semester hours.

MET 3949r. Experiential Learning (0). (S/U grade only.) Prerequisite: Instructor permission. This non-credit, experiential learning course offers students an opportunity to gain "real world" on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

MET 4159r. Selected Topics in Meteorology (1–3). Prerequisite: MET 2700 with a grade of "C" or better. This course covers research topics in a variety of areas, such as radar meteorology, remote sensing, remote sensing application, and mesoscale problems. This course covers selected topics in meteorology and climatology not covered in other courses. May be repeated as content changes to a maximum of twelve semester hours.

MET 4400C. Meteorological Instrumentation and Observations (3). Prerequisites: PHY 2048C and MET 2700, both with a grade of "C" or better. This course covers theory and practical applications of basic sensors, measurement of temperature, heat flow, fluid flow, pressure, and moisture. Two hours lecture, three hours laboratory.

MET 4705. Operational Meteorology (2). Prerequisite: MET 4500C. This course introduces observational analysis products used in operational weather forecast offices. Topics include applications of radar and satellite data, the various applications of numerical weather prediction, and types of weather forecasts.

MET 4909r. Honors Work (1–6). May be repeated to a maximum of nine semester hours.

MET 4905r. Directed Individual Study (1–3). May be repeated to a maximum of nine semester hours.

MET 4949r. Meteorology Internship (1–6). (S/U grade only.) Prerequisite: Instructor permission. This course is a supervised internship individually assigned to accommodate student’s background and objectives. Credit is based on scope and significance of work. May be repeated to a maximum of nine semester hours.

DeVoe L. Moore Center for the Study of Critical Issues In
ECONOMIC POLICY AND GOVERNMENT

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY
Web Page: http://www.coss.fsu.edu/dmc/
Director: Samuel R. Staley; Eminent Scholar: Keith Ihlanfeldt; Professors: Benson, Chapin, Clapp, Feiock, Gwartney, Holcombe, Rasmussen

The DeVoe L. Moore Center supports research about the role of government in a market economy, with a special emphasis on state and local regulation, housing, economic development, and social entrepreneurship. As an interdisciplinary unit in the College of Social Sciences and Public Policy, the faculty associated with the center have well-established scholarly reputations in the study of public policy. The faculty and center affiliates regularly teach graduate and undergraduate policy-related courses in the departments of economics, political science, urban planning, and in the Askew School of Public Administration and Policy. In addition to teaching responsibilities, the faculty conduct advanced scholarly research in government, economics, and public affairs as well as applied policy research for use by state and local elected officials.

The center produces publications designed to inform citizens and policy makers how government rules, regulations, and programs affect the economy and individuals. The center also sponsors annual conferences that bring national leaders and scholars to the University to discuss policy questions.
The Department of Economics offers an excellent curriculum that is as diversified as the discipline itself. The program strives to make undergraduates aware of the critical issues in economic science and policy, to provide them with a basic understanding of the tools needed to analyze these issues, and to prepare them for academic or professional opportunities beyond the baccalaureate degree.

The Department of Economics cooperates in the following interdivisional programs: international affairs, interdisciplinary program in social science, Asian studies, Russian and East European studies, African-American studies, demography, financial mathematics, public health, and social science education.

The department’s home page is http://www.coss.fsu.edu/economics.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in economics satisfy this requirement by earning a grade of “C” or higher in ECO 3431.

State of Florida Common Program Prerequisites

The State of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvce.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into the upper-division degree program:

Economics—Social Sciences

1. ECO X013 and ECO X023, or ECO XXXX and ECO XXXX: two economics courses for three credit hours each

Requirements

Admission

Admission to the undergraduate program is based upon the availability of faculty and space and upon academic performance. Students with fifty-two or more acceptable semester hours, both ECO 2013 and 2023 completed with a grade of “C” (2.0) or better, an overall GPA of 2.5 or better on all attempted coursework at the college level, and in good standing with the University will receive priority consideration but are not guaranteed admission to the program. Upper-division transfer students are evaluated for formal admission to the major after completing their first semester at FSU as a full-time student. All students must meet “mapping” requirements to be admitted to and remain in the upper-division major. Consult http://www.academic-guide.fsu.edu for more information.

Major in Economics

Beyond ECO 2013 and ECO 2023, the economics major requires ECO 3101, 3203, 3431, 4421 and an additional fifteen semester hours of upper-division economics electives, including six semester hours in one economics specialty area. See the department’s Web site for a list of specialty areas and classes within those specialty areas. Majors must complete the supporting courses: STA 2023, 2122 or 4321 (choose one); and MAC 1105, 1140, 2233 or 2311 (choose one). Pre-calculus algebra (MAC 1140) is recommended, and calculus is recommended for students contemplating graduate study in economics. A total of three economics internship (ECO 4941) hours and six honors thesis (ECO 4934) hours may count toward elective requirements for the economics major.

Students must maintain an overall average grade of “C” in economics and supporting courses. Majors will not receive credit toward the major requirements for economics courses in which a grade of less than “C-” has been earned. A minimum of eighteen semester hours in economics must be taken at Florida State University. No more than twelve hours of upper-division economics transfer credit will be accepted toward the major requirements by the department. Transfer credit intended to satisfy major requirements is subject to the approval of the Undergraduate Director for Economics. If more than six years has elapsed between the last active term of enrollment at FSU and the term of readmission, students seeking readmission to FSU will be subject to the economics major requirements in effect at the time of readmission.

A student majoring in economics must complete the minor requirements specified by a supporting academic department. The selection of a supporting department is subject to approval of the Undergraduate Director of Economics. Minors currently pre-approved include business, entrepreneurship, mathematics, statistics, computer science, history, psychology, and any of the minors available in the College of Social Sciences.

In accordance with University mapping milestones, undergraduate students who intend to major in economics should take ECO 2013, 2023, and the supporting courses in mathematics and statistics before completing liberal studies. The principles courses (ECO 2013, 2023) may be taken in either order. The department allows students to take the courses in the same semester, but neither recommends nor encourages it.

Degrees

Majors in economics may be awarded either the Bachelor of Science (BS) or the Bachelor of Arts (BA) degree upon completion of all University requirements for those degrees.

Honors in the Major

Honors-only sections of ECO 2013 and ECO 2023 are offered each Fall and Spring for lower-division Honors students. The Department of Economics offers honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Minor in Economics

A minor requires fifteen semester hours in departmental courses, including ECO 2013 and 2023, each with a grade of “C” or better and at least one course selected from ECO 3101, 3203, 3431, or 4421. Students will not receive credit toward the minor for courses in which a grade less than “C-” has been earned.

Economics minors must have at least a “C” (2.0) grade point average in their economics coursework. ECO 2000 will not count toward the minor. No more than six semester hours of transfer credit will be accepted toward the minor.

Definition of Prefixes

ECO—Economics
ECP—Economic Problems and Policy
ECS—Economic Systems and Development

Undergraduate Courses

ECO 2000. Introduction to Economics (3). This course is a survey of the discipline for people taking only one economics course. Historical perspective and major principles of theory are presented. Not to be taken by students who have had or who must take ECO 2013 and 2023. Not applicable to the economics major nor the economics minor.
ECO 2013. Principles of Macroeconomics (3). This course explores aggregate economics and national income determination, money and monetary theory, present macroeconomic conditions, and aggregative policy alternatives; theory of international trade and the balance of payments; economic growth and development.
ECO 2023. Principles of Microeconomics (3). This course covers consumption, production, and resource allocations considered from a private and social point of view; microeconomic problems and policy alternatives; economics of inequality and poverty; and comparative economic systems.
ECO 3004. Debating Economic Issues (3). Prerequisites: ECO 2013 and ECO 2023. This course applies economic analysis to current economic policy issues. Topics may include financial markets, Social Security, debt finance, health care, immigration, global climate change and environmental policy, regulation, welfare reform, labor market discrimination, drug policy, and topics selected by students.
ECO 3054. Decision Making Under Risk and Uncertainty (3). Prerequisites: ECO 2013 and ECO 2023. This course is an introduction to the theory of economic decision-making under uncertainty. Emphasis is placed on developing and applying alternative theories of decision making to insurance, financial markets, and the negotiation of contracts.

ECO 3101. Intermediate Microeconomic Theory (3). Prerequisites: ECO 2013 and ECO 2023. This course covers various topics such as supply, demand, cost of production, theory of the firm, factor price determination, and other microeconomic resource allocation questions.

ECO 3102. Organizational Theory of the Firm (3). Prerequisites: ECO 2013 and ECO 2023; ECO 3101 and calculus (strongly recommended). This course introduces to the theory of the firm. Particular emphasis placed on understanding how firms are organized and how they manage their employees using incentives and other economic mechanisms.

ECO 3104. Applied Microeconomic Analysis (3). Prerequisites: ECO 2013; ECO 2023; and STA 2122, or STA 4321. This course examines the applications of microeconomic theory for business and policy analysis. Topics include the theory of the firm, valuation techniques in the absence of market prices, empirical research with accounting, financial and administrative data, theory of supply and business strategy, cost-benefit methods.

ECO 3130. Free to Choose (3). Prerequisites: ECO 2013 and ECO 2023. This course, dealing with liberty and economic freedom, addresses many present and past social issues and public policy decisions.

ECO 3131. Market Ethics (3). Prerequisites: ECO 2013 and ECO 2023. This course examines the virtues, values, and capitalistic evaluation of its ethical properties. It is designed to raise questions and clearly-structured issues so that the student can make informed and thoughtful decisions.

ECO 3203. Intermediate Macroeconomic Theory (3). Prerequisites: ECO 2013 and ECO 2023. The course covers the basic model of income determination, emphasizing the roles of real and monetary sectors of the economy. Results of empirical work are surveyed.

ECO 3223. Financial Markets, the Banking System, and Monetary Policy (3). Prerequisites: ECO 2013 and ECO 2023. This course explores the functions of money, bank creation of deposits, and credit; Federal Reserve control of money supply; and monetary theory and policy questions.

ECO 3303. History of Economic Ideas (3). Prerequisite: Any 2000-level ECO course. This course discusses the evolution of economic ideas from ancient Greece to the modern period emphasizing the relationship between developments in economic analysis and cultural/technological changes. Critique of modern economic theory in terms of its sources and logical content.

ECO 3431. Analysis of Economic Data (3). Prerequisites: ECO 2013, ECO 2023, and STA 2123, STA 2122, or STA 4321. This course provides basic skills in finding, downloading, displaying, graphing, and analyzing economic data. Topics include locating data sources, data manipulation techniques such as data smoothing and interpolation, basic statistics, and bivariate and multivariate regression.

ECO 3622. Growth of the American Economy (3). Prerequisites: ECO 2013 and ECO 2023. This course examines the factors in the development of economic forces, resources, institutions, and ideas relating to American economic growth analyzed through American economic history.

ECO 3933r. Special Topics in Economics (3). Prerequisites: ECO 2013 and ECO 2023. This course explores special topics of current interest or of benefit from the specialties of visiting faculty. May be repeated to a maximum of nine semester hours. May be repeated within the same semester.

ECO 4106. Behavioral Economics (3). Prerequisite: ECO 3101. This course examines the consequences of economic analysis when individuals (or groups) deviate from rational behavior in identifiable and predictable ways, and incorporates these systematic biases into more accurate models of economic decision making.

ECO 4132. Economics of Compassion (3). Prerequisites: ECO 2013 and ECO 2023. This course addresses international and domestic issues of compassion, charitable, and philanthropic activities, and the economic framework from which students can critically evaluate public and private actions whose purpose is to eliminate hunger, disease, poverty or other human burdens.

ECO 4224. Issues in Money and Banking (3). Prerequisites: ECO 3101. This course focuses on the role of money in the economy, including monetary theory, inflation, and unemployment rates.

ECO 4270. Economic Growth (3). Prerequisites: ECO 2013 and ECO 2023; ECO 3203 strongly recommended. This course covers the differences in income per capita in-between countries. Topics cover what drives the sustained growth in the standard of living in the United States and other developed countries, how less developed countries might catch up with the developed countries, and what has impeded this process.

ECO 4307. Monetary Thought and History (3). Prerequisites: ECO 2013 and ECO 2023. This course deals with issues in money, banking, and monetary policy in the United States and other countries. A major theme is how the monetary and financial organizations can be improved.

ECO 4400. Games and Decisions (3). Prerequisite: ECO 2023; ECO 3101 recommended. This course is a non-technical introduction to strategic decision-making. Focus on situations involving conflict and cooperation and on decision-making under conditions of uncertainty and ignorance. Applies game theory and decision theory to such topics as bargaining and negotiations, contracting, auctions, and voting.

ECO 4401. Advanced Microeconomics (3). Prerequisites: ECO 2013, ECO 2023, and MATH 2131. This course covers central techniques such as probability, matrix algebra, and calculus to better understand fundamental principles of economics and applies these techniques to policy analysis.

ECO 4421. Introduction to Econometrics (3). Prerequisite: ECO 3431. This course introduces statistical inference, estimation theory, model building, and forecasting methods using the econometric model and policy analysis. Extensive use is made of PC econometric software.

ECO 4455. Experimental Economics (3). Prerequisites: ECO 2013 and ECO 2023. This course is an introduction to the use of laboratory experimental economics, a relatively new method of economics research in which the classic model of laboratory experiments is combined with traditional techniques. A theory of constitutions is developed and applied to the U.S. Constitution. Models of majority rule decision making and bureaucratic supply are used to develop an understanding of supply and demand in the public sector.

ECO 4545. Economics of State and Local Government (3). Prerequisite: ECO 2023. This course covers state and local revenues, expenditures, and borrowing; intergovernmental relationships.

ECO 4704. International Trade (3). Prerequisites: ECO 2013 and ECO 2023; ECO 3101 recommended. This course discusses the theory of international trade, the gains from trade, tariffs and other trade restrictions, cartels.

ECO 4713. International Finance (3). Prerequisites: ECO 2013 and ECO 2023; ECO 3203 recommended. This course focuses on the balance of payments; disequilibrium and adjustments; birth, evolution, and demise of the Bretton Woods System; the managed float; international monetary reform; multinational corporations.

ECO 4905r. Directed Individual Study (1–3). May be repeated to a maximum of six semester hours.

ECO 4933r. Senior Tutorial in Economics (1–3). (S/U grade only.) Prerequisite: Senior status, major or minor, or instructor permission. This course is offered for congested topics in economics. Maximum enrollment of five students in each tutorial. Repeatable one time to a maximum of six semester hours.

ECO 4934r. Honors Work (1–3). May be repeated to a maximum of nine semester hours.

ECO 4941. Economics Internship (1–6). Prerequisite: Instructor permission. This course is an academic course related to the internship experience. Students are required to submit a weekly description of their internship activities, duties, and responsibilities; to complete a set of assignments; and at the end of the semester, to submit a paper that describes in detail the tasks they performed during the internship and discusses the skills and information required to accomplish each task. Students enrolled for six credit hours must also complete a research paper that integrates their classroom knowledge and work experience.

ECO 5004. Current Economic Issues of the U.S. (3). Prerequisites: ECO 2013 and ECO 2023. This course aims to familiarize students with tools and institutions economists use to form educated and insightful opinions on important current and future issues.

ECO 5010. Economics of Art and Culture (3). Prerequisites: ECO 2013 and ECO 2023. This course allows students to use traditional economic analysis of supply and demand to examine the markets for "fine art," and enables students to discover in the class that many of the standard approaches to economic analysis apply to these markets, but there are also features of the art markets that are unique.

ECO 5113. Economics of Population (3). Prerequisites: ECO 2013 and ECO 2023. This course examines determinants and consequences of world population growth and changes. Employs the tools of economic analysis to explore the topics of birth rates, mortality, fertility ratios, and nonrenewable resource interrelationships.

ECO 5143. African-Americans in the American Political Economy (3). Prerequisites: ECO 2013 and ECO 2023. This course aims to familiarize students with tools and institutions economists use to form educated and insightful opinions on important current and future issues.

ECO 5302. Labor Economics (3). Prerequisite: ECO 2023 or instructor permission. This course explores theoretical and empirical examination of wage determination, income distribution, labor market discrimination, and marriage and transitions in family structure, as well as interaction between race and class as determinants of the life chances of African-Americans.

ECO 5320. Economics of Natural Resources, Energy, and the Environment (3). Prerequisite: Any 2000-level ECO course. This course focuses on the relationship between natural resource availability and growth, capital theory, economics of the environment, the U.S. energy problem and alternatives for the future, an economic appraisal of U.S. energy policy.

ECO 5343. Business Organization and Market Structure (3). Prerequisite: ECO 2023. This course is an introduction to the economic analysis of industry, a survey of market structures, oligopoly and collusion, a variety of commercial practices under imperfect competition, the welfare consequences and policy approaches to the problems of monopoly.

ECO 5345. Economics and the Law (3). Prerequisite: ECO 2023. This course is focused on the impact of the legal system on economic activity and the role of economic analysis in assessing the relative efficiency of alternative legal rules and institutions.

ECO 5367. Land Use, Housing, and Government Regulation (3). Prerequisite: ECO 2023. This course provides the theoretical and institutional machinery for analyzing land, housing and mortgage markets, with special attention given to the intended and unintended effects of government regulation of these markets. Important empirical evidence is also reviewed.
ECP 4006. Economics of Sports (3). Prerequisites: ECO 2013 and ECO 2023. This course presents an economic analysis of sports and entertainment. Focus is on industrial organization, public choice, public goods, and college and non-profit sports. Similar issues related to entertainment and artistic industries may also be covered.

ECP 4312. Economics of Energy, Environment, and Sustainability (3). Prerequisites: ECO 2023 and ECO 2013. This course explores the impact of addressing public policy issues involving the sustainability of economies and environmental systems. It is important for obvious reasons, but without consideration of the human factor, engineering solutions will be incomplete. In the course, students are educated on economic models and analysis of sustainability in energy and environmental systems.

ECP 4413. Government Regulation of Business (3). Prerequisite: ECO 2023. This course is an in-depth analysis of the economic analysis of antitrust law and regulation. Topics include price fixing, monopolization, predatory pricing, exclusive dealing, tie-ins, price discrimination, mergers, antitrust enforcement policies, and case studies in economic regulation.

ECP 4452. Economics of Corruption (3). Prerequisites: ECO 2013 and ECO 2023. This course carefully defines corruption and examines its causes and effects, both at the level of the individual and at the level of the society. Different theoretical models of corruption are discussed, along with empirical studies of various successful and unsuccessful anti-corruption policies in a number of countries.

ECP 4505. Economics of Crime (3). Prerequisite: ECO 2013 and ECO 2023. This course examines crime and criminological policy using the tools of economics. The focus is on crimes against persons and property, and drug policy. Rational behavior, opportunity cost, markets, bureaucratic behavior, and policy analysis are studied in this context.

ECP 4530. Economics of Health (3). Prerequisites: ECO 2013 and ECO 2023. This course provides an overall view of the U.S. health care system, focusing on the following topics: demand for medical care, health insurance, hospitals, physician services, regulation versus competition for cost containment, alternative delivery care systems, financing uncompensated care, Medicare prospective payment system, long-term care, and economic issues concerning health-related behavior (i.e., alcohol, tobacco, and drug use).

ECP 4613. Urban Economics (3). Prerequisite: ECO 2023. This course is an analysis of trends in urban economies in the U.S. and elsewhere. Introduction to economic and demographic data sources for analysis of urban areas; issues confronting contemporary urban places.

ECP 4618. Research Methods for Studying Housing, Land, and Mortgage (3). Prerequisite: ECO 2023. This course explores the use of quantitative research methods to evaluate and understand the performance of economies, with a focus on land use, housing, urban economic growth, housing finance and public finance. Each student will be responsible for identifying a research topic, defining the research question, and conducting original research as part of the course through a workshop format supervised by the instructor.

ECS 3003. Comparative Economic Systems (3). Prerequisites: ECO 2013 and ECO 2023. This course focuses on the theoretical and practical aspects of the principal forms of economic organization. Emphasis is on the varieties of market-based systems, and economies in transition from centrally-planned to market economies.

ECS 3022. Social Entrepreneurship and Economic Development (3). This seminar incorporates the practical realities of economic development program implementation into the classroom, using a discussion format and case studies of real world applications. The readings are used to provide a broader context for the discussions of specific cases and more general theories. An emphasis is placed on the constraints and potential for implementing effective economic development programs in low-income areas of the United States and world, with a special focus on cities.

ECS 3200. Economics of Asia (3). Prerequisites: ECO 2013 and ECO 2023. This course is a survey of economic development in the economies of East Asia. The course includes an empirical analysis of the factors that contributed to the substantial growth in East Asia from 1960-1989 and the subsequent financial crises that ensued in the 1990s.

ECS 3600. Economics of Native Americans (3). Prerequisites: ECO 2013 and ECO 2023. This course examines and challenges the traditional view that the economic systems of Native Americans before Europeans arrived were communal. The historical evolution of Native economies is considered in light of the evolving relationships (both conflict and cooperation) between Europeans and Natives. Finally, the economic conditions of modern Native American communities are examined.

ECS 4013. Economics of Development (3). Prerequisites: ECO 2013 and ECO 2023. This course presents economic development as a process, description and analysis; alternative overall theories of development; particular problems and policy responses to them; strategic choices in development policy. Main focus on third world economies.

ECS 4333. Transition of Soviet and Eastern European Economies (3). Prerequisites: ECO 2013 and ECO 2023. This course describes and analyzes the formerly centrally planned Soviet economy and its transformation. Case studies include Russia, members of the Commonwealth of Independent States, and Eastern European countries. Analyzes the successes and failures of the transition process, particularly privatization and marketization.

ECS 4431. Economics of the Caribbean (3). Prerequisites: ECO 2013 and ECO 2023. This course provides a detailed introduction to the analysis of economic development of Caribbean countries, including a discussion of the basic characteristics of Caribbean economies, a discussion of alternative theories and models of development, as well as a range of particular economic and social issues of concern to policy makers within Caribbean countries. Focus is on the actions available to Caribbean nations for addressing their development concerns within their region and/or country.

ECS 4504. Economics of the Middle East (3). This course provides an overview of the economic issues facing the region known as the Middle East and North Africa (MENA). The course discusses the economic history of the region and reviews events and policies bringing MENA nations to their current position, and examines their prospects for future economic growth.

Graduate Courses

ECO 5005. Economic Principles for International Affairs (3).
ECO 5056. Decision Making Under Risk and Uncertainty (3).
ECO 5111. Intermediate Microeconomic Theory (3).
ECO 5114. Applied Microeconomics I (3).
ECO 5116. Imperfect Competition, Factor Markets, and Income Distribution (3).
ECO 5117. Applied Microeconomics II (3).
ECO 5133. Markets and Auctions (3).
ECO 5204. Macroeconomic Theory I (3).
ECO 5205. Money and National Income Determination (3).
ECO 5206. Macroeconomic Theory, Practice, and Policy (3).
ECO 5207. Macroeconomic Theory II (3).
ECO 5208. Global Macroeconomics (3).
ECO 5226. Issues in Money and Banking (3).
ECO 5281. Financial Economics I (3).
ECO 5282. Financial Economics II (3).
ECO 5305. History of Economic Thought (3).
ECO 5403. Static Optimization in Economics (3).
ECO 5405. Introduction to Mathematical Economics (3).
ECO 5408. Computational Economics I (3).
ECO 5413. Introduction to Econometrics (3).
ECO 5416. Econometrics I (3).
ECO 5417. SAS Programming (3).
ECO 5420. Applied Econometrics (3).
ECO 5423. Econometrics II (3).
ECO 5424. Econometric Methods for Panel Data (3).
ECO 5427. Limited Dependent Variable Models (3).
ECO 5428. Time Series Analysis (3).
ECO 5434. Analysis of Economic Data (3).
ECO 5453. Advanced Experimental Economics (3).
ECO 5505. Public Economics (3).
ECO 5506. Public Goods (3).
ECO 5533. Public Choice (3).
ECO 5706. Seminar in International Trade Theory and Policy (3).
ECO 5707. International Trade (3).
ECO 5715. International Finance (3).
ECO 5906r. Directed Individual Study (3). (S/U grade only.)
ECO 5907r. Directed Individual Study (3).
ECO 5914. Supervised Research (1–5). (S/U grade only.)
ECO 5922r. Professional Development for Economists (0–2).
ECO 5932r. Graduate Tutorial in Economics (1–3).
ECO 5936r. Special Topics (1–3).
ECO 5940r. Supervised Teaching (1–5). (S/U grade only.)
ECO 5942. Applied Economics Internship (3). (S/U grade only.)
ECO 5957r. Extended Master’s Paper (3). (S/U grade only.)
ECO 6176. Topics in Behavioral Economics (3).
ECO 6209. Topics in Macroeconomics (3).
ECO 6216. Monetary Theory and Policy (3).
ECO 6269. Open Economy Macroeconomics (3).
ECO 636e. Topics in Microeconomics (3).
ECO 6338r. Doctoral Workshop (0–3). (S/U grade only.)
ECO 6339r. Teaching Workshop (0–3). (S/U grade only.)
ECO 6515. Seminar in the Economics of Population (3).
ECO 6517. Mathematical Demography (3).
ECO 6518. Population Data (3).
ECO 6520. Labor Markets (3).
ECO 5405. Industrial Organization (3).
ECO 5415. Social Control of Business (3).
ECO 5456. Law and Economics (3).
ECO 5457. Economics of Corruption (3).
ECO 5536. Economics of Health (3).
Educational Leadership and Policy Studies

COLLEGE OF EDUCATION

Web Page: http://www.coe.fsu.edu/ELPS/
Chair: Robert Schwartz; FSUS Director/Faculty Admin: Wicker; Professors: Herrington, Hu, Milligan, Schwartz, Wetherell; Associate Professors: Akiba, Boyle, Easton, Guthrie, Iatarola, Rutledge; Assistant Professors: Bertrand Jones, Cox, Gawlik, Kurshid, Park, Perez-Felkner, Tandberg, Zuilikowski; Teaching Faculty II: Schrader; Teaching Faculty II: Blackwell-Flanagan; Research Associate: Ramos; Faculty Emeriti: Beckham, Bender, Dalton, Funk, Irvin, Jahns, Kannwischer, Kunkel, Lack, Mann, Milton, Schroeder, Snyder, Stakenas, Thomas, Wagaman

The Department of Educational Leadership and Policy Studies offers graduate degree programs in Educational Leadership and Policy and Higher Education. At the graduate level, the department offers certificates in Educational Policy, Institutional Research and Program Evaluation. Although the department does not offer undergraduate degree programs, it does offer an undergraduate certificate in Leadership Studies and several courses are offered at the undergraduate level for persons engaged in programs of professional education and teacher education. For information on graduate programs, consult the Graduate Bulletin.

Undergraduate Certificate in Leadership Studies

The undergraduate certificate in Leadership Studies (LEAD) is an eighteen credit hour undergraduate program that is interdisciplinary, multidimensional, experiential, and multicultural. Courses offered in this certificate program explore leadership theory, working in the context of groups and communities, changing leadership strategies, theory-to-practice through experiential learning and the complexity of leadership. Award of this certificate is acknowledged on the recipient’s academic transcript. For more information, visit http://the-center.fsu.edu/Leadership-Studies-Certificate.

State Certification Courses

The following social foundations of education courses are offered by the Educational Leadership and Policy Studies department: EDA 4060; EDF 4604, 5517, 5543, 5548, 5551, 5612, 5630, 5710r.

Definition of Prefixes

ADE—Adult Education
CGS—Computer General Studies
ECT—Education: Career/Technical
EDA—Educational Administration
EDF—Education: Foundations and Policy Studies
EDG—Education: General
EDH—Education: Higher
EME—Education: Technology and Media
LDR—Leadership Studies
MHS—Mental Health Services
SDS—Student Development Services

Undergraduate Courses

ADE 3949r. Cooperative Education Work Experience (0). (S/U grade only.)
ADE 4930r. Special Topics in Adult and Community Education (3). This course introduces varying topics related to the nature and methods of adult and community education. May be repeated for a maximum of twelve semester hours.
ECT 3949r. Cooperative Education Work Experience (0). (S/U grade only.)
EDA 3949r. Cooperative Education Work Experience (0). (S/U grade only.)
EDA 4060. Organization and Control of Education (3). This course examines relationships among local school districts, intermediate units, state departments of education, and the federal government.
EDF 1005. Introduction to Education (3). This course offers students a broad view of education from historical, cultural, psychological, political, social, and philosophical perspectives. Includes lectures, discussions, and field experience.
EDF 2073. Diversity in and out of School: Multicultural Policies and Practices (3). This course focuses on how the concept of multiculturalism is central to understanding the development of educational policies and practices in the twentieth century. This course provides a broad survey of the ways in which this concept helps to describe and explain current programs both in and out of school and in the university settings.
This course offers practical information and activities designed to familiarize students with theories, organizational structures, and issues/trends/challenges of the student affairs profession. It is designed to provide students an opportunity to gain knowledge in the theory and practical application of student affairs, with an emphasis placed on leadership development, problem solving, and career exploration.

**Graduate Courses**

**CGS 5310.** Technology in Schools for Education Leaders (3).

**ECT 5905r.** Directed Individual Study (1–3). (S/U grade only.)

**ECT 5915r.** Supervised Research (1–4). (S/U grade only.)

**EDF 5947r.** Internship (1–8). (S/U grade only.)

**EDA 5069.** Ethics in Educational Leadership (3).

**EDA 5107.** Educational Leadership and Change (3).

Department of EDUCATIONAL PSYCHOLOGY AND LEARNING SYSTEMS

COLLEGE OF EDUCATION
Web Page: http://coe.fsu.edu/EPLS

Chair: Betsy Becker; Professors: Becker, Driscoll, Klein, Pfeiffer, Prevatt, Sampson, Shute, Tenenbaum; Associate Professors: Almond, Darabi, Demmen, Ebener, Jeong, Ke, Lash, Osborn, Phillips, Roehrig-Bice, Turner, Yang; Assistant Professors: Canto, Chow, Dong, Krach, Paek, Swanbrow Becker, Zhang (Visiting); Associate-in Professor: Lenz; Professors Emeriti: Branson, Kaufman, Keller, Kelly, Oosterhof, Pargman, Peterson, Reardon, Reiser, Wagner

The Department of Educational Psychology and Learning Systems offers degrees only at the master’s, specialist, and doctoral levels. However, the department does offer several undergraduate courses that are components of the teacher education curriculum. For more information about the department, refer to the Graduate Bulletin.

The following graduate-level programs and certificates are offered by the Department of Educational Psychology and Learning Systems:

Educational Psychology
  - Learning and Cognition M,S,D
  - Sports Psychology M,D
  - Measurement and Statistics M,S,D

Instructional Systems
  - Instructional Systems M,D
  - Open and Distance Learning M
  - Performance Improvement and Human Resource Development M

Psychology and Counseling Services
  - Career Counseling Combined M/S
  - Mental Health Counseling Combined M/S
  - School Psychology S
  - Combined Program in Counseling Psychology and School Psychology D

Graduate Certificate in Human Performance Technology
Graduate Certificate in Online Instructional Development
Graduate Certificate in Measurement and Statistics

Undergraduate Courses

APK 4401. Sport Psychology (3). This course explores selected psychological theories and applications relevant to sport and exercise behavior.

APK 4403. Introduction to Exercise Psychology (3). This course is designed for students interested in the psychosocial issues related to exercise behaviors. The course introduces both the theories and practices inherent in the field of exercise psychology. In addition, this course covers intervention strategies to promote exercise behaviors and long-term adherence to a physically active lifestyle.
EME 6256. Performance Systems Analysis (3).
EME 6257. Seminar in Instructional Design (3). (S/U grade only.)
EME 6258. Trends in Educational Technology (3). (S/U grade only.)
EME 6259. Seminar in Teaching and Learning (3). (S/U grade only.)
EME 6260. Advanced Theories of Learning (3).
EME 6263. Seminar in Advanced Instructional Systems Problems (1–3).
EME 6264. A System Approach to the Management of Change (3).
EME 6265. Synthesis, Analysis, and Argumentation in Instructional Systems Research (3).
EME 6266. Performance Systems Analysis (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
3. Electromagnetics in the broadest sense is the study of the relationship between electric current, electric and magnetic fields, and their interactions. It is the foundation of electrical and electronic technology. The practical applications of this theory include the design of antennas, transmission lines, RF, microwave and optical transmission facilities, and radar.

4. Power systems engineering is concerned with the design and operation of electric power generation, transmission, and distribution for an increasing customer demand. It involves the modeling, analysis, and design of power system components including power transformers, electric motors, synchronous generators, and high voltage power transmission and distribution networks. Power system engineering also includes the investigation of alternative methods for generating electrical energy, the control and reliability of complex power networks, power quality, economic factors, and environmental effects.

Honors in the Major

The Department of Electrical and Computer Engineering offers a program of honors in electrical engineering to encourage talented students to extend their undergraduate experience by participating in directed or independent research on a topic relative to electrical engineering that is not included in the regular curriculum. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in electrical and computer engineering satisfy this requirement by earning a grade of “C−” or higher in EEL 3705L.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Computer Engineering

1. MAP X302
2. MAC X311 or MAC X281
3. MAC X312 or MAC X282
4. MAC X313 or MAC X283
5. CHM X045/X045L or CHM X045C or CHS X440
6. PHY X048/X048L or PHY X048C
7. PHY X049/X049L or PHY X049C
8. COP XXXX [an introductory programming course in C, C++, Java, or an equivalent high-level programming language; COP 3014 at FSU]

Electrical Engineering

1. MAC X311 or MAC X281
2. MAC X312 or MAC X282
3. MAC X313 or MAC X283
4. MAP X302 or MAP X305
5. CHM X045/X045L or CHM X045C, or CHS X440/X440L, or CHS X440 only, if for four credit hours and includes a lab
6. PHY X048/X048L or PHY X048C, or PHY X043 and PHY X048L
7. PHY X049/X049L or PHY X049C, or PHY X044 and PHY X049L
Common Required Courses for Bachelor of Science Degrees and Dual Majors

All candidates for Bachelor of Science in Electrical Engineering (BSEE), Bachelor of Science in Computer Engineering (BSCpE), and Bachelor of Science in dual majors (BSEE and BSCpE) are required to complete a total of one hundred semester hours of common required courses, of which twenty-four hours are English, social science, and humanities courses; forty-three hours are engineering core courses (listed below); and thirty-three hours are required electrical and computer engineering courses (listed below).

Engineering Core Courses

- COP 3014 Programming I (3) For FSU students
- CHM 1045C General Chemistry I (4)
- EGM 3512 Engineering Mechanics (4)
- EML 3100 Thermodynamics (2)
- MAC 2311 Calculus with Analytical Geometry I (4)
- MAC 2312 Calculus with Analytical Geometry II (4)
- MAC 2313 Calculus with Analytical Geometry III (5)
- MAP 2302 Ordinary Differential Equations (3)
- MAS 3105 Applied Linear Algebra I (4)
- PHY 2048C General Physics A (5)
- PHY 2049C General Physics B (5)

Common Required Electrical and Computer Engineering Courses

- EEE 3300 Electronics (3)
- EEE 3300L Electronics Laboratory (1)
- EEL 3002L ECE Engineering Tools Lab (2)
- EEL 3111 Introductory Circuit Analysis (3)
- EEL 3112 Advanced Circuits with Computers (3)
- EEL 3112L Advanced Circuits with Computers Laboratory (1)
- EEL 3135 Signal and Linear Systems Analysis (3)
- EEL 3705 Digital Logic Design (3)
- EEL 3705L Digital Logic Laboratory (1)
- EEL 4021 Statistical Topics in Electrical Engineering (3)
- EEL 4515 Digital Communication Systems (3)
- EEL 4746 Microprocessor-Based System Design (3)
- EEL 4746L Microprocessor-Based System Design Laboratory (1)
- EEL 4911C Senior Design Project I (3)

Requirements for a Major in Electrical Engineering

Students majoring in electrical engineering require one hundred twenty-eight semester hours to graduate including:

- One hundred hours are common required courses (listed above),
- Six semester hours of required electrical engineering courses: EEL 3472, Electromagnetic Fields I (3) and EEL 4915C, Electrical Engineering Senior Design Project II (3),
- Twelve semester hours are required Tier-2 electrical engineering courses, and
- Ten semester hours are technical elective courses.

All electrical engineering majors are required to complete four of the following six Tier-2 courses:

- EEE 4351 Solid-State Electronic Devices (3)
- EEE 4510 Digital Signal Processing (3)
- EEL 3216 Fundamentals of Power Systems (3)
- EEL 3473 Electromagnetic Fields II (3)
- EEL 4652 Analysis and Design of Control Systems (3)
- EEL 4710 Introduction to Field Programmable Logic Devices (3)

Technical Electives for Electrical Engineering Major

- One semester hour must be an electrical engineering (EE) laboratory elective,
- Six semester hours must be EE technical electives, and
- Three semester hours may be an EE technical elective or a non-EE technical elective.

The non-EE technical elective must be selected from a list of departmentally approved courses offered by other departments at Florida State University. Courses not on the list may be taken with prior approval of the department.

Requirements for a Major in Computer Engineering

Students majoring in computer engineering require one hundred twenty-eight semester hours to graduate including:

- One hundred hours are common required courses (listed above),
- Thirteen semester hours of computer science courses (listed below),
- Nine semester hours of required computer engineering courses: EEL 4710, Introduction to Field Programmable Logic Devices (3), EEL 4713, Computer Architecture (3), and EEL 4914C, Computer Engineering Senior Design Project II (3), and
- Six semester hours of technical electives.

Required Computer Science Courses (thirteen semester hours)

- COP 3330 Object Oriented Programming (3)
- COP 3353 Introduction to UNIX (1)
- COP 4530 Data Structures, Algorithms and Generic Programming (3)
- COP 4610 Operating Systems and Concurrent Programming (3)
- MAD 2104 Discrete Mathematics I (3)

For a current list of technical electives for the computer engineering major, contact the department.

Requirements for a Dual Major in Electrical Engineering and Computer Engineering

Students dual-majoring in electrical engineering and computer engineering require one hundred forty-one semester hours to graduate including:

- One hundred hours are common required courses (listed above),
- Six semester hours of required electrical engineering courses: EEL 3472, Electromagnetic Fields I (3) and EEL 4915C, Electrical Engineering Senior Design Project II (3),
- Thirteen semester hours of computer science courses (listed above),
- Nine semester hours of required computer engineering courses: EEL 4710, Introduction to Field Programmable Logic Devices (3), EEL 4713, Computer Architecture (3), and EEL 4914C, Computer Engineering Senior Design Project II (3), and
- Thirteen semester hours of Tier-2 courses and technical electives as described below.

Tier-2 Courses, Technical Electives, and Special Requirements for a Dual Major

- One semester hour must be an electrical engineering (EE) laboratory elective.
- Nine semester hours must be three required Tier-2 electrical engineering courses.
- Three semester hours must be an electrical engineering technical elective course.

With the adoption of ABET EC-2000 policies, program requirements, educational objectives, course content and offerings, and departmental policies are subject to periodic revision and change. Students are strongly urged to obtain current information from their academic advisor, the academic coordinator, or by visiting the departmental Web site at http://www.eng.fsu.edu/ece.

Academic Requirements and Policies

In accordance with ABET criteria, all engineering students are subject to a uniform set of academic requirements agreed to by Florida A&M University and Florida State University. These requirements have been established to ensure that program graduates receive a quality education and make reasonable progress toward satisfying engineering major degree requirements. Students are directed to the “FAMU–FSU College of Engineering” chapter of this General Bulletin and the departmental Web site (http://www.eng.fsu.edu/ece) for a list of all academic requirements and policies.

ECE Course Prerequisite Requirement

In addition to the college course prerequisite requirements, the Department of Electrical and Computer Engineering requires students to have obtained a grade in the range of “C” in all courses listed as prerequisites for the department’s engineering core courses.

Definition of Prefixes

- EEE—Engineering: Electrical and Electronic
- EEL—Engineering: Electrical
Undergraduate Courses

EEE 3300. Electronics (3). Prerequisites: EEL 3112, MAP 2302. This course covers diode models and circuits, DC biasing of bipolar-junction and field-effect transistors, small- and large-signal transistor models, and frequency analysis of single-stage AC amplifiers.

EEE 3300L. Electronics Laboratory (1). Prerequisites: EEL 3112 and EEL 3112L. Corequisite: EEL 3300. This laboratory supports EEE 3300. Electronics.

EEE 4301. Electronic Circuits and Systems Design (3). Prerequisites: EEE 3300 and EEE 3300L. This course uses computer-aided design programs and covers multistage amplifier analysis and design. The course focuses on feedback and operational amplifiers, A-to-D and D-to-A converters, and waveshaping and waveformgenerating, including oscillators, voltage regulators, and power circuits.

EEE 4301L. Electronic Circuits and Systems Laboratory (1). Prerequisites: EEE 3300 and EEE 3300L. This course is an advanced electronic laboratory.

EEE 4313. Introduction to Digital Integrated Circuit Design (3). Prerequisite: EEE 3300. This course covers semiconductor device physics, digital-logic fundamentals, static-inverter analysis, static logic-gate analysis, dynamic-switching analysis, and combination logic design.

EEE 4330. Microelectronics Engineering (3). Prerequisites: EEE 3300 and EEE 3300L. This course covers design and fabrication of solid-state devices. Topics include oxidation, diffusion, metallization, photolithography, and device characterization.

EEE 4351. Solid-State Electronic Devices (3). Prerequisites: EEE 3300 and EEE 3300L. This course covers solid-state physics as applied to electronic devices. The course focuses on semiconductor materials, production process in solids, device fabrication, diffusion processes, and negative conduction devices.

EEE 4363. Feedback Amplifier Principles (3). Prerequisite: EEE 3300. This course introduces basic concepts of multi-stage audio-frequency amplifiers, including feedback and stability principles and power-supply criteria.

EEE 4376C. Introduction to Analog IC Design (3). Prerequisite: EEE 4301. This course covers the design and analysis of bipolar and MOS analog integrated circuits. The course focuses on op-amp amplifier design, analog multipliers, active loads, current sources, and active filters.

EEE 4377. Mixed Signal ICs (3). Prerequisite: EEL 4313 or EEL 4376C. This course introduces mixed-signal processing using analog and digital integrated circuits. The course focuses on fundamentals of sampled data systems, nonlinear and dynamic analog circuits, Nyquist-rate data converters, oversampling data converters and digital filters, as well as the use of computer-aided design programs.

EEE 4450. Modeling and Simulation of Semiconductor Devices (3). Prerequisite: EEE 3300. This course covers various numerical techniques for the modeling and simulation of semiconductor devices, such as pn-junctions, metal-oxide-semiconductor contacts, metal-oxide-semiconductor field-effect transistors, and bipolar devices. Special emphasis is on the description and simulation of electron and hole transport in semiconductor devices.

EEE 4514. Principles of Communications Systems (3). Prerequisite: EEL 3135. The course offers an introduction to carrier and modulation analysis of noise and signals, information transmission, modulation techniques; AM, FM, and pulse, and as well as analog multiplexing.

EEE 4550. Radar (3). Prerequisites: EEL 3473 and EEL 3135. Corequisite: EEL 4021. This course examines basic concepts of radar systems including radar range equation, radar cross-section calculation, random processes and noise, array antennas, beamsteering, doppler and range processing, FM and CW systems, pulse compression, synthetic aperture radar, and clutter.

EEL 3002L. ECE Engineering Tools Lab (2). Corequisite: EEL 3111. This is an introductory laboratory for students entering the electrical and computer engineering programs. The basic topics include: lab safety issues; solving engineering problems using software tools such as MathCad, Matlab, Excel; and using programming techniques such as Multisim and OrcadCAD; electric circuit design and instrumentation; the proper use of test and measurement equipment.

EEL 3003. Introduction to Electrical Engineering (3). Prerequisites: MAC 2312 and PHY 2049C. This course is an introduction to electrical engineering concepts for non-electrical engineering majors. It covers a broad range of topics including basic circuit theory, semiconductor devices, instrumentation, amplifiers, and machines. Not accepted for credit toward BSEE and BSCPE.

EEL 3003L. Introduction to Electrical Engineering Laboratory (1). Prerequisites: MAC 2312 and PHY 2049C. Corequisite: EEL 3003. This laboratory supports EEL 3003. Must be taken concurrently with first enrollment in EEL 3003. Must be dropped if EEL 3003 is dropped.

EEE 3111. Introductory Circuit Analysis (3). Prerequisite: MAC 2312. Corequisites: MAC 2313 and PHY 2049C. This course covers topics such as current, voltage, and power; resistors, inductors, and capacitors; network theorems and laws; operational amplifiers; phasors; impedance, power and frequency analysis.

EEE 3112. Advanced Circuits with Computers (3). Prerequisite: EEL 3111. Corequisite: MAP 3305 or MAP 2302. This course examines sinusoidal steady-state power analysis; three-phase circuits; transient and forced response; frequency response; two-port networks; circuit analysis with computers.

EEE 3112L. Advanced Circuits with Computers Laboratory (1). Prerequisites: EEL 3111, MAP 3305. Corequisite: EEL 3112. This lab includes instrumentation and computer-based equipment; waveform generation and power measurements; response of passive circuits; AC and DC design, computer application.

EEE 3135. Signal and Linear System Analysis (3). Prerequisite: MAP 3305 or MAP 2302. Corequisites: EEL 3112 and MAS 3105. This course focuses on the classification and representation of signals and systems; Laplace transform; Z-transform; convolution; state variable analysis; and digital filters.

EEE 3216. Fundamentals of Power Systems (3). Prerequisite: EEL 3112. This course is an introduction to the fundamentals of energy conversion; structure of power systems; and power system components: transformers, rotating machines, and transmission lines. The operation and analysis of power systems are presented.

EEE 3472. Electromagnetic Fields I (3). Prerequisites: EEL 3112, MAP 2302 or MAP 3305 and MAS 3105 or MAS 3105. This course explores electrostatic field—Gauss’s law; boundary conditions; capacitance; Laplace’s and Poisson’s equations; energy, forces, and torques. The steady electric current. The magnetostatic field-vector potential; Ampere’s and Biot-Stavart laws; inductance; energy, forces, and torques. Quasistatic fields; clashing forces, induction.

EEE 3473. Electromagnetic Fields II (3). Prerequisite: EEL 3472. This course explores topics such as Maxwell’s equations, plane electromagnetic waves, group velocity, polarization, Poynting vector, boundary conditions, reflection and refraction of plane waves, skin effect, transmission line analysis, impedance matching, wave guides and cavity resonators, fundamentals of radiation and antennas.

EEE 3512. Introduction to Communications (3). Prerequisites: EEL 3112, EEL 3135, and MAP 3306 or MAS 3105. This course discusses topics such as signal analysis, Fourier series/Fourier transform, sampling theorem, distortions and attenuation in signal transmission, and analog modulation AM, FM, pulse modulation, pulse-code modulation (PCM), pulse width modulation (PWM). MatLab and Simulink exercises.

EEE 3705. Digital Logic Design (3). Prerequisite: COP 3014. This course covers fundamental topics in digital logic design, algorithms, computer organization, assembly-language programming, and computer engineering technology.

EEE 3705L. Digital Logic Laboratory (1). Corequisite: EEL 3705. This laboratory supports EEL 3705.

EEE 3949r. Experiential Learning (0). (SU grade only.) Prerequisite: Instructor permission. Experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

EEE 4201. Statistical Topics in Electrical Engineering (3). Prerequisites: EEL 3112 and MAP 3306 or MAS 3105. This course examines the use of probability and statistical methods in electrical engineering, including random variables, sets, functions, random variables, spaces, axioms, joint and conditional probability. Random variables—distribution and density functions. Operations in random variables—expectation, moments, transformation of random variables. Introduction to random processes. Multiple random variables. Elements of statistics; parameter estimation by least squares.

EEE 4113. Advanced Linear Networks (3). Prerequisite: EEL 3135. This course explores topics such as synthesis of LC one-port networks, synthesis of LC two-port networks; operational amplifier applications; active filters; approximation methods; switched-capacitor filters.

EEE 4213. Power Systems I (3). Prerequisite: EEL 3216. This course focuses on the analysis of circuits, electrical power systems, and power system modeling for largescale power networks; admittance and impedance matrix formation; power flow; optimal dispatch; symmetrical components; balanced and unbalanced fault analysis; and transient stability studies.

EEE 4217L. Power and Energy Lab (1). Prerequisite: EEL 3216. This course is intended to reinforce the electrical engineering concepts learned in electronics and power systems instrumentation equipment. Students learn the principles of electromagnetic energy conversion by connecting, operating, and controlling induction, synchronous, and dc machines. Transport of electrical energy through transmission lines is also explored.

EEE 4220. Electromechanical Dynamics (3). Prerequisites: EEL 3216 and EEL 3472. This course focuses on the study of magnetic circuits, electromagnetic torques, and induced voltages. Topics covered include induction motors, variable speed drives, Park’s transforms, synchronous machines and generator controls, DC machines, controls, and direct Torque Control.

EEE 4231r. Converter Modeling and Control (3). Prerequisite: EEL 4243. This course provides a study of DC-AC and DC-DC converter modeling techniques and control schemes. Topics include averaged switch models, voltage-source and current-source converter models, current programmed control, and active filter control.

EEE 4243. Power Electronics (3). Prerequisites: EEE 3300 and EEL 3135. This course is designed to develop a basic understanding of using switched electronic circuits for the conversion and regulation of power. The course focuses on the basic converters and their steady state analysis. Dynamic modeling analysis, controller design, power semiconductor device, and simulation also are covered.

EEE 4244. Power Conversion and Control (3). Prerequisites: EEE 3300 and EEL 3112. This course introduces solid-state power conversion and control circuits, including analysis and design of linear and nonlinear variable frequency inverters; variable-frequency inverters; sensing and processing circuits supporting control systems; and embedded microprocessor control systems.

EEE 4280. Renewable Energy Generation I (2). This course is an introduction to renewable energy generation. Topics covered include smart grid system, hybrid electric vehicle, and grid-connected PV inverters. Emphasis is placed on the energy conversion techniques applied in the renewable energy source and energy storage elements.
EEL 4282. Renewable Energy Generation II (3). This course is an introduction to renewable energy generation. Topics covered include smart grid system, hybrid electric vehicle, and grid connected PV inverters. Emphasis is placed on the energy conversion techniques applied in the renewable energy storage elements.

EEL 4415. Sonar (3). Prerequisites: EEL 3473 and EEL 3135. Corequisite: EEL 4021. This course introduces basic concepts of sonar systems including acoustic propagation, transducers and projectors, target strength, reverberation, beamforming, beamsteering, pattern synthesis, and modern array processors.

EEL 4435L. Electromagnetics Laboratory (1). Prerequisite: EEL 3473. This course focuses on the applications of electromagnetic field theory. Experiments include field mapping, transmission lines, spectrum analysis, impedance matching, waveguides, antennas, radar, and fiber optics.

EEL 4452. Optical Sensors (3). Prerequisite: EEL 3473. This course examines the basic concepts of optical sensors and essential optics. Topics include intensity, phase, and frequency modulated optical fiber sensors and their applications, distributed sensing systems, and optical fibers in signal processing.

EEL 4461. Antenna Systems (3). Prerequisite: EEL 3473. This course covers topics such as antenna theory, including Hertzian dipoles, thin linear antennas, aperture antennas, arrays, loop antenna, slots, horns, and waveguides.

EEL 4515. Digital Communication Systems (3). Prerequisite: EEL 3135. Corequisite: EEL 4021. This course covers topics such as sampling principle, spectral analysis of digital waveforms and noise, pulse and digital transmission systems, digital multiplexing, error probabilities, and system performance.

EEL 4566. Optical Fiber Communications (3). Prerequisites: EEL 3473 and EEL 3135. Corequisite: EEL 4021. This course offers a review of the characteristics of basic optical components for optical communications systems. Topics include optical fibers, light sources, optical detectors and fiber connectors; signal degradation in optical fibers, optical analog and digital communication systems; and coherent optical fiber communications.

EEL 4595. Wireless Communications and Networking (3). Prerequisites: COP 3014 or equivalent, EEL 3135, and EEL 4021. This course covers the fundamentals of wireless communications and systems. The core topics include radio-wave propagation characteristics of wireless channels; modulation and demodulation techniques for mobile radio; reception techniques for wireless systems; fundamentals of cellular communications; multiple access techniques; wireless networking; and hybrid networking of a wireless system and the Internet.

EEL 4596. Advanced Topics in Communications (3). Prerequisites: EEL 3135, EEL 4515 and EEL 4021. This course is designed to provide an in-depth knowledge of some of the advanced topics in communications. Topics covered include ideal communication systems, signal to noise ratio (S/N) for amplitude and angle modulation, design of systems to improve S/N ratio, satellite communication, and mobile communication.

EEL 4652. Analysis and Design of Control Systems (3). Prerequisite: EEL 3135. This course focuses on continuous system modeling; stability of linear systems; frequency response; root locus; state-space methods; the root locus method; state–transition methods.

EEL 4710. Introduction to Field Programmable Logic Devices (3). Prerequisites: EEL 3705 and EEL 3705L. This course offers an overview of programmable logic devices, complex programmable logic devices, and field-programmable gate-array devices. The course offers an introduction to hardware description languages (HDLs); combinational, sequential, and finite-state machine design using HDLs; as well as top-down methodologies.

EEL 4713. Computer Architecture (3). Prerequisites: COP 3014 and EEL 4746. This course examines how modern computer architectures are presented by studying how the relationships between hardware and software impact performance, machine language definition, processor data path and control design, interfacing, and advanced topics, such as caching and pipelining.

EEL 4727. Digital Signal Processing with Field Programmable Gate Arrays (3). Prerequisite: EEL 4710. This course is a review of Field Programmable Gate Arrays (FPGAs), HDL, mathematics, signals and systems. Computer arithmetic concepts, DSP system design of FIR filters, IIR filters, DFT, FFT, and wavelets filters bank functions are also covered.

EEL 4746. Microprocessor-Based System Design (3). Prerequisites: EEL 3705 and EEL 3705L. This course explores fundamental topics in basic computer design, structured assembly-language software design, RTL, CPU design, pipelining and superscaling, computer arithmetic, memory and I/O organization and interface, cache, and design tools.

EEL 4746L. Microprocessor-Based System Design Laboratory (1). Prerequisites: EEL 3705 and EEL 3705L. Corequisite: EEL 4746. This laboratory focuses on software development, hardware projects, and experiments in support of EEL 4746.

EEL 4748. Embedded Microcomputer Design Project (3). Prerequisites: EEL 4746 and EEL 4746L. This course allows students to work on individual projects selected with consent of instructor. Topics include open-source and open-source mot Dolomita 6000 laboratory.

EEL 4810. Introduction to Neural Networks (3). Prerequisites: EEE 3300 and EEL 3135. This course covers fundamentals of neural networks: dynamical systems, associative memories, perceptrons, supervised/unsupervised learning algorithms. Applications in signal processing, pattern recognition, control, optimization, and communications.

EEL 4905. Directed Individual Study (1–3). Prerequisites: Junior standing and "B" average in electrical engineering courses. Normally may be repeated to a maximum of six semester hours. Requires department approval.

EEL 4906r. Honors Work in Electrical Engineering (1–6). Prerequisite: Admission to the honors program. This course consists of independent or directed research in a specialized area beyond the current curriculum in electrical engineering. May be repeated to a maximum of nine semester hours.

EEL 4911C. Senior Design Project I (3). Prerequisite: Department permission. This course exposes senior students to concepts in design, project management, engineering team organization, and professionalism. Students are grouped into design teams where these principles are put into practice in organizing, proposing, and developing an engineering project. Periodic written reports and oral presentations and a final written proposal are required. The lecture material and texts provide instructions on project management, ethics, and design skills.

EEL 4914C. Computer Engineering Senior Design Project II (3). Prerequisite: EEL 4911C. This course allows senior students to work in teams to propose, design, build, and test computer engineering devices or systems under the direction of a faculty member. Open-ended design experience with a practical problem applies a broad spectrum of engineering knowledge. Periodic written reports and oral presentations and a final written report are required. The lecture material and texts provide instructions on general project execution, technical writing, and engineering economics.

EEL 4915C. Electrical Engineering Senior Design Project II (3). Prerequisite: EEL 4911C. This course allows senior students to work in teams to propose, design, build, and test electrical engineering devices or systems under the direction of a faculty member. Open-ended design experience with a practical problem applies a broad spectrum of engineering knowledge. Periodic written reports and oral presentations and a final written report are required. The lecture material and texts provide instructions on general project execution, technical writing, and engineering economics.

EEL 4935r. Special Topics in Electrical Engineering (1–3). Prerequisite: Instructor permission. This course covers advanced topics in electrical engineering with emphasis on recent developments. Topics and credit vary; consult the instructor. May be repeated to a maximum of twelve semester hours.

Graduate Courses

EEE 5280. Biomimetic Systems Theory (3).
EEE 5317. Power Electronics (3).
EEE 5333. Solid State Sensors (3).
EEE 5378. Mixed Signal ICs (3).
EEE 5625. Analysis of Quantum Scale Semiconductor Devices (3).
EEE 5542. Random Processes (3).
EEE 5557. Radar (3).
EEE 6353. Semiconductor Device Theory (3).
EEE 6502. Digital Signal Processing I (3).
EEE 6505. Digital Signal Processing II (3).
EEE 5173. Signal and System Analysis (3).
EEE 5247. Power Conversion and Control (3).
EEE 5250. Power Systems Analysis (3).
EEE 5270. Power System Transients (3).
EEE 5285. Renewable Energy Generation I (3).
EEE 5286. Renewable Energy Generation II (3).
EEE 5416. Sonar (3).
EEE 5426. RF/Microwave Circuits I (3).
EEE 5427. RF/Microwave Circuits II (3).
EEE 5454. Optical Sensors (3).
EEE 5465. Antenna Theory (3).
EEE 5486. Advanced Electromagnetic Theory (3).
EEE 5550. Digital Communication Theory (3).
EEE 5563. Optical Fiber Communications (3).
EEE 5590. Advanced Topics in Communication (3).
EEE 5591. Wireless Communications and Networking (3).
EEE 5667. Robot Kinematics and Dynamics (3).
EEE 5707. ASIC Systems Design I (3).
EEE 5722. Digital Signal Processing with Field Programmable Gate Arrays (3).
EEE 5764. Computer System Architecture (3).
EEE 5784. Computer Network Design and Analysis (3).
EEE 5812. Advanced Neural Networks (3).
EEE 5905r. Directed Individual Study (1–3).
EEE 5910r. Supervised Research (1–5). (S/U grade only.)
EEE 5930r. Special Topics in Electrical Engineering (3).
EEE 5940. Supervised Teaching (1–5). (S/U grade only.)
EEE 6237r. Modern AC Drives (3).
EEE 6266. Power Systems Operation and Control (3).
EEE 6905r. Directed Individual Study (1–9).
EEE 6930r. Special Graduate Topics in Electrical Engineering (3).
EEE 6932r. Electrical and Computer Engineering Seminar (0).

Department of English

College of Arts and Sciences

Web Page: http://www.english.fsu.edu/

Chair: Eric Walker; Francis Eppes Professor: Robert Olen Butler; William Hudson Rogers Professor: TBA; Bertram H. Davis Professor: Bruce Boeher; Janet Burroway Professor: Mark Winegardner; Robert O. Lawton Professors: S. E. Gontarski, David Kirby; George Matthew Edgar Professor: Gary Taylor; Kellogg Hunt Professor: Kathleen Yancey; Professors: Berry, Belieu, Burke, Coldiron, Daileader, Faulk, Fleckenstein, Goodman, Johnson, Gregory, Montgomery, O’Rourke, Roberts, E. Stuckey-French, Suarez, Walker; Associate Professors: Epstein, Gants, Gardner, Kennedy, Kimbrell, Laughlin, Moore, Neri, Saladin, N. Stuckey-French, Ward; Assistant Professors: Crucet, Gaines, Graban, Horack, Kilgore, Lathan, Mariano, Parker-Flynn; Professors Emeriti: Bickley, Burroway, Fenstermaker, Lhamon, Standley

The Department of English offers students a curriculum that is central to the modern liberal arts education. One of the largest degree programs in the College of Arts and Sciences, the undergraduate major in English allows students to emphasize literature; creative writing; or editing, writing, and media. Students may also pursue other specialized programs such as honors in the major, an English major with an emphasis in business, or Directed Independent Studies. In addition to its primary benefits to intellectual growth, the English major also offers practical preparation for professional careers in teaching, professional writing, law, business, religious affairs, and all levels of government service: local, state, and federal.

The study of literature includes not only contemporary texts but also all the historical periods of British, American, and other literature. In addition to familiar period or major authors courses such as the Victorian novel or Chaucer, students will also find courses in related subjects such as linguistics, popular culture, gender studies, multietnic literature, folklore, postcolonial literature, modern European fiction, and literary theory. All of these courses contribute to the student’s knowledge of human culture and how literary texts as cultural artifacts relate to other bodies of human knowledge such as philosophy, history, religion, psychology, classics, and modern languages.

The study of creative writing allows students to work not only in the familiar genres of poetry, fiction, drama, and the essay, but also to study related subjects such as rhetoric and composition theory. Students may also study the editorial and publishing process and take up internships in editing and publishing in a variety of settings.

The study of editing, writing, and media engages students in the history, theories, and practices of textual formation. It provides writing-intensive courses focusing on the practical aspects of new media and print composition. Students also study the history of textuality as well as hands-on courses in visual rhetoric, editing, and publishing.

The English honors program, traditionally the largest in the University, invites the very best students to supplement regular major work with specialized seminars and independent thesis work.

A variety of activities and facilities are available to all majors. Two literary magazines, Kudzu Review and The Southeast Review, are published in the department. Many students gain journalistic experience by writing for the independent campus newspaper, the FSView & Florida Flambeau. The department sponsors a year-long visiting writers series that brings twelve to fourteen writers and scholars to campus each year. The English department, in conjunction with the campus-wide Opening Nights arts program, also promotes headline writers, such as John Updike and Amy Tan. There are two computer classrooms that house computer-assisted writing instruction, and seminar rooms that are equipped with smartboards. All majors with a GPA above 3.0 are eligible to apply for membership in Lambda Iota Tau, the local chapter of a national literary honor society, which sponsors a variety of social events and career programs.

The department annually recognizes outstanding achievement with the following awards and honors: the Fred L. Standley Award for Undergraduate Excellence in English, the George Harper Award for Outstanding Essay Writing, the Betty Corry Award for Outstanding Undergraduate Creative Writing, the Cody Harris Allen Undergraduate Writing Award, the John MacKay Shaw Academy of American Poets Award, the George Yost Essay Award, and the Mart P. and Louis Hill English Honors Thesis Award.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in English satisfy this requirement by earning a grade of “C-” or higher in CGS 2060, CGS 2100, CGS 2518, or EME 2040.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ENC X101 and ENC X102, or ENC XXXX: English courses for a total of six credit hours in which the student is required to demonstrate college-level English skills through multiple assignments.

Note: A “C-” grade or better is required for all coursework.

College Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Prerequisites for the Major

In order to satisfy prerequisites for the English major, students must accomplish the following:

1. Completion of at least fifty-two semester hours of acceptable college credit with an overall GPA of at least 2.0
2. Satisfactory completion (“C-” or better) of all courses necessary for the writing requirement (State Board of Education Rule 6A-10.030).

Requirements for a Major in English

General Requirements: Thirty-three semester hours of English in courses at the 2000 level and above. At least twenty-one semester hours must be in courses at the 3000 and 4000 levels, including at least nine semester hours at the 4000 level. Honors thesis hours may be applied toward the Bachelor of Arts (BA) degree, but only three semester hours will be accepted for major credit. One English course used to satisfy the humanities requirement for liberal studies may be counted as part of the major. All courses counted toward the major must carry the grade of “C-” or better. A minor in another department is also required; all courses counted toward the minor also must carry the grade of “C-” or better.

Each student will choose one of the following areas:

1. Concentration in Literature
   a. Three semester hours in ENG 3014 Critical Issues in Literary Studies (must be taken before student reaches ninety semester hours)
   b. Literature Courses: At least eighteen semester hours of literature courses at the 3000 or 4000 level. Specifically required are:
      i. Three semester hours in American literature at the 3000 or 4000 level
      ii. Six semester hours in British literature before 1800, including at least three semester hours before 1660, at the 3000 or 4000 level
      iii. Three semester hours in British literature after 1800 at the 3000 or 4000 level
      iv. Three semester hours in ENG 4934 Senior Seminar in Literature (must be taken after student reaches ninety semester hours)
   c. Electives: Twelve semester hours in other English courses

2. Concentration in Writing
AML 2010. American Authors to 1875 (3). This course covers significant works by representative Realists, Literary Naturalists, Modernists, and contemporary writers. Authors typically included cover Twain, James, Crane, Chopin, Eliot, Hemingway, Frost, Fitzgerald, Faulkner, Wright, Baldwin, Morrison, and O’Connor.

AML 311. Major Figures in American Literature (3). This course examines selected works of major American authors.

AML 3630. Latino/a Literature in English (3). This course offers an introduction to land-mark Latino/a works written in English.

AML 3673. Asian American Literature (3). This course introduces students to selected works of Asian American literature, focusing on Asian Indian, Pacific Islander, Filipino, Chinese, Japanese, Cambodian, and Vietnamese American writers. Common topics include issues of diaspora, dislocation, and cross-cultural identity.

AML 3682. American Multi-Ethnic Literature (3). This course introduces cross-cultural literary traditions, looking at historical rationales and interconnections among communities as well as vital differences.

AML 4111. The 19th-Century American Novel (3). This course covers from Brown and Cooper to Hawthorne, Melville, Twain, and Crane.

AML 4121. The 20th-Century American Novel (3). This course typically covers Dreiser, Dos Passos, Fitzgerald, Hemingway, Faulkner, Bellow, and Wright.

AML 4213. Early American Literature and Culture before 1800 (3). Suggested prerequisite: AML 2010. This course focuses on varying topics in pre-1800 American literature and culture, such as exploration and captivity narratives, Native American literature, the Puritan tradition, the enlightenment and revolutionary eras in America, the trans- and circum-Atlantic world, the slave trade, and early-American print culture (including the novel), gender studies, and/or selected authors.

AML 4261. Literature of the South (3). This course offers a survey from Colonial times to the present, including Byrd, Poe, Simms, Cable, Faulkner, Warren, O’Connor, and others.

AML 4604. The African-American Literary Tradition (3). This course examines selected works by major African-American writers.

AML 4680r. Studies in Ethnic Literature (3). This course is an advanced study offering a survey of a particular ethnic literary tradition and adopting a cultural studies model. May be repeated up to a maximum of twenty-four semester hours.

AML 5041. American Authors Since 1875 (3). This course offers a survey of the canonical works of African-Americans, typically including Douglass, Chesnutt, Hurston, Wright, Ellison, Baldwin, Morrison, and Walker.

AML 5042. American Authors Since 1875 (3). This course covers important works by representative American authors from the colonial period through the post-Civil War era. Typically included are Franklin, Irving, Emerson, Thoreau, Poe, Hawthorne, Melville, Whitman, Douglass, and Emily Dickinson.
ENC 1905r. Improving College-Level Writing (1–3). (S/U grade only.) This course is an individualized program of instruction in writing, including CLAS skills. Open to students from all levels and major areas. May be repeated to a maximum of three semester hours.

ENC 2135. Research, Genre, and Context (3). Prerequisite: ENC 1101. This course focuses on teaching students research skills that allow them to effectively incorporate outside sources in their writing and to compose in a variety of genres for specific contexts.

ENG 3201. Media and Information (3). This course introduces students to key concepts in the study of rhetoric; to framing of rhetoric, and the role of communication and other phenomena; and to the principles of rhetoric in the contexts of many media and cultures.

ENG 3310. Article and Essay Technique (3). This course introduces students to the study and writing of nonfiction prose in a variety of modes, with emphasis on studying the methods and principles of composition and practice in the craft of writing.

ENG 3416. Writing and Editing in Print and Online (3). This course focuses on the principles of composing, especially across different composing spaces. Students create works in several different media, including (1) in print, (2) on the screen, and (3) for the network, while also learning how to edit the works deployed in each medium appropriately. In addition, students repurpose at least one of these works for another medium. Students conclude the course by creating a digital portfolio.

ENG 4212. Editing: Manuscripts, Documents, Reports (3). This course involves the actual editing of another’s work, synthesizing another’s ideas and data, structuring and clarifying.

ENG 4218. Visual Rhetoric (3). This course introduces students to the principles of visual rhetoric, especially as it is enacted across diverse media, shaped by multiple genres, and designed to achieve different goals with different audiences. Students will learn to analyze the rhetorical function of imagery, to use images to organize arguments, and to create images that operate rhetorically.

ENG 4311r. Advanced Article and Essay Workshop (3). Prerequisite: Instructor permission. This course provides practical experience in the craft of writing, intimate student interaction, and one-on-one between student and instructor. May be repeated to a maximum of twenty-four semester hours.

ENG 4352. Editing Workshop (3). This course explores the newsletter genre through analysis and production. Students read, respond to, and analyze a range of newsletter samples before engaging in the process of collaboratively designing, writing, and editing a newsletter that is disseminated digitally to its intended audience.

ENG 4404. Advanced Writing and Editing (3). This course provides advanced level work in diverse forms of writing and editing. Students read, write, and theorize about what it means to compose in multiple contexts: handwriting, print, and on the Web. Students compose a variety of texts to be shared with a wide range of audiences, the academic as well as the public.

ENG 4500. Theories of Composition (3). Prerequisites: ENC 3310 and instructor permission. This course is an examination of topics in the teaching of composition, including theories of the composing process, invention, revision, assigning, and evaluating student writing, and the relationship between writing and reading.

ENG 4942r. Internship in Editing (1–6). (S/U grade only) Recommended prerequisite: ENC 4212. This course provides practical experience in editing, public relations, and other forms of written communications. May be repeated to a maximum of six semester hours; only three hours apply to majors.

ENG 3010. Introduction to Literary Analysis (3). This course introduces students to the fundamental concepts and techniques of literary analysis. It is strongly recommended that students complete this course before taking any of the 3000- and 4000-level literature courses. This course provides students with the critical vocabulary and skills of close reading and interpretation needed to engage in the analysis of literary works. Students read a wide range of literary texts in fiction, poetry, drama, and nonfiction in order to learn how to engage in the process of literary interpretation and produce their own analyses of literary and cultural texts.

ENG 3014. Critical Issues in Literary Studies (3). This course is an introduction to the issues and debates that inform contemporary literary studies. Required course for English Literature concentration.

ENG 3310. Film Genre (3). This course discusses films as a means of exploring the problems of genre studies: relationship to literary genres, historical continuity, transformation of genre in the film medium.

ENG 3600. Hollywood Cinema (3). This course surveys central problems in the study of mainstream U.S. cinema. Topics include major historical developments, arguments over social and aesthetic value, and close examination of critically important films.

ENG 3803. History of Text Technologies (3). This course is an introduction to the history of the changing technologies that humans have used to record and transmit their experiences across time and space. It surveys the variety of forms this effort has taken, including tattoo, scroll, manuscript, print, illustration, musical notation, phonograph, photography, film, and digital multimedia. Students investigate how such technologies have shaped the way we produce, transmit, and receive texts and other creative representations of human experience, as well as each technology’s social and cultural conditions.

ENG 3804. History of Illustrated Texts (3). This course explores the relationship between image and word in different historical eras by examining various texts and media. Students read, respond to, and analyze a range of materials, which may include Medieval manuscripts and graphic novels. Finally, students produce an original composition involving the interplay of image and language.

ENG 3931r. Topics in English (1–3). May be repeated to a maximum of twenty-four semester hours.

ENG 3943r. Kudzu Review Undergraduate Magazine (0–3). (S/U grade only) Prerequisite: Instructor permission. This course is a practicum intended to provide each student with practical experience in the field of literary editing. Students work under the direction of the Senior Editor throughout the process of soliciting, judging, and editing manuscripts for the Kudzu Review. Students also work together throughout the process of magazine layout as well as magazine printing and distribution.

ENG 3952r. Experiential Learning (6). (S/U grade only) This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

ENG 4013. Literary Criticism (3). This course is a historical overview of critical texts that consider the nature of literature from antiquity to the early 20th century. Typically includes readings on Plato, Aristotle, Euhemerus, Wroth, Dryden, Wollstonecraft, Wordsworth, Coleridge, Arnold, Eliot, and Woolf.

ENG 4020. Rhetorical Theory and Practice (3). Prerequisites: ENC 3310 and instructor permission. This course emphasizes contemporary developments in rhetoric and their applicability to writing. For upper-division students who intend to teach English at the college level.

ENG 4043. Contemporary Critical Theory (3). Prerequisite: Instructor permission. This course is an advanced study of crosscurrents in later 20th-century critical theory.

ENG 4115. Film Theory (3). This course considers centrally important theories of film from the 1920s work of Eisenstein through the 1970s “gaze” theories of Metz and Mulvey, to the present. The course emphasizes what distinguishes film from other arts as well as its socio-historical causes and consequences.

ENG 4815. What is a Text? (3). Prerequisites: 3000-level core courses in major and 4000-level coursework recommended. This course examines the nature of textuality and its relationship to various media and technologies, while exploring theoretical and practical questions related to the production and reception of texts in a variety of different genres and forms. Students will be evaluated as a group and individually, including multimedia texts, and also produce a final project in at least two different media.

ENG 4816. Introduction to Digital Humanities (3). This course gives students an introduction to the ongoing digital transformation of humanities scholarship, as well as practical introductory skills in the practice of digital humanities. Particular topics may vary, but each course taught under this program explores critically and practically one of several configurations of digital scholarship in the humanities today, including digital literary studies, humanities computing, digital cultural history, new media and network culture, virtuality and games, and digital curation. Students are introduced to the critical issues shaping any of the concentrations, and learn technical skills to interact with and produce work within the particular field.

ENG 4834. Issues in Publishing (3). Prerequisite: 3000-level core courses in major. This course explores a wide range of issues in the history and practice of publishing, editing, and the production and distribution of texts from the twentieth and twenty-first centuries as well as from earlier historical periods. These issues include the book as object, the ethics of publishing, the history of reading, and censorship, as well as the rise of print culture. It also includes practical training, introducing students to the work that editors currently perform in magazine and book publishing.

ENG 4905r. Directed Individual Study (1–3). Topic to be approved by the director of undergraduate English studies. May be repeated to a maximum of twenty-four semester hours.

ENG 4910. Research in Renaissance Literature (3). This course is designed to engage students in the authentic work of scholarly research in Renaissance/early modern literary cultures. Students read and work hands-on in research databases and builds toward a final research project with multimedia components.

ENG 4932r. Studies in English (1–3). Topics vary. For senior majors and qualified students. May be repeated to a maximum of twenty-four semester hours.

ENG 4934. Senior Seminar in Literature (3). Prerequisites: Ninety semester hours of college work. Topics vary. Required for senior English majors concentrating in literature.

ENG 4936r. Honors Thesis (1–6). Prerequisites: Instructor permission and admission to the department’s honors-in-the-major program. The honors thesis involves two semesters of thesis work. May be repeated to a maximum of nine semester hours.

ENG 4938r. Advanced Seminar in English (3). Prerequisite: Admission to the department’s honors-in-the-major program. The honors student takes two seminars. Permission required. May be repeated to a maximum of six semester hours.

ENG 4996r. Tutorial in English (1–3).

EFL 2012. British Authors: Beginnings to 1790 (3). This course is a survey of English masterworks intended for students in liberal studies and those exploring a first-year外国文学. Students read and study a variety of texts from the eighteenth and twenty-first centuries as well as from earlier historical periods. These issues include the book as object, the ethics of publishing, the history of reading, and censorship, as well as the rise of print culture. It also includes practical training, introducing students to the work that editors currently perform in magazine and book publishing.

EFL 4831. Medieval Literature in Translation (3). This course explores literature of the Anglo-Saxon and Anglo-Norman periods: Beowulf, Romance of the Rose, Sir Gawain and the Green Knight, and others.

EFL 3304. Introduction to Shakespeare (3). This course is an introduction to the study of Shakespeare at the college level. Consideration of representative works of comedy, history, tragedy, tragicomedy drawn from throughout the playwright’s career.
ENL 3591. Renaissance Source Texts: Essential Reading in the Age of Shakespeare (3). This course focuses on the literary and cultural texts from the Greek, Roman, and later European traditions that were essential reading in the English Renaissance and that shaped literary culture in the age of Shakespeare. This course includes attention to the history of literary genres and to the history of reading. Authors studied may include: Homer, Virgil, Ovid, Dante, Petrarch, Horace, Strabo, Lucretius, Plutarch, Seneca, Plautus, Augustine, Erasmus, della Mirandola, among others.

ENL 4112. The 18th-Century British Novel (3). This course typically includes Defoe, Richardson, Fielding, Sterne, Burney, and Radcliffe.

ENL 4122. The 19th-Century British Novel (3). This course typically includes Scott, Thackeray, Dickens, Trollope, Eliot, and Hardy.

ENL 4132. The Modern British Novel (3). This course typically includes Conrad, Lawrence, Joyce, Woolf, Greene, Spark, and Lessing.

ENL 4161. Renaissance Drama (3). This course focuses on the English drama by Shakespeare’s contemporaries and successors from Marlowe until the closing of the theatres in 1642.

ENL 4171. Restoration and 18th-Century Drama (3). This course includes representative plays of the period 1660—1800. May include plays by Dryden, Etherege, Wycherley, Otway, Congreve, Farquhar, Steele, Rowe, Gay, Fielding, Goldsmith, and Sheridan.

ENL 4218. Middle English Romance (3). This course is an introduction to the Medieval English romance tradition from its beginning with Geoffrey of Monmouth to Malory’s Morte d’Arthur.

ENL 4220. Renaissance Poetry and Prose (3). This course examines lyric poetry and prose from Wyatt and Spenser to Shakespeare and the metaphysicals: Donne, Herbert, Marvell, and Vaughan.

ENL 4230. Restoration and 18th-Century British Literature (3). This course studies British poetry and prose from 1660 to 1800.

ENL 4240. British Romantic Literature (3). This course studies British poetry and prose from 1785 to 1832.

ENL 4251. Victorian British Literature (3). This course studies British poetry and prose from 1830 to 1900.

ENL 4273. Modern British Literature (3). This course explores British poetry, fiction, and essays since 1900. Typically includes Hardy, Conrad, Joyce, Yeats, Lawrence, Woolf, Auden, and Lessing.

ENL 4311. Chaucer (3). This course focuses on the High Middle Ages in England seen through the perspective of the Canterbury Tales read in Middle English.

ENL 4333. Shakespeare (3). This course is a study of representative Shakespearian dramas and their relationship to the Renaissance. Typically may include attention to relevant contemporary intellectual, historical, and political movements.

ENL 4336. Orality and Poetics: Shakespeare’s Sonnets (3). This course focuses on aspects of orality in Shakespeare’s Sonnets, with some complementary work in theory, acoustics, and rhetoric. The course consists of explicit instruction in writing and presenting original critical talks with specific feedback on them, plus chances to incorporate that feedback in another oral presentation.

ENL 4341. Milton (3). This course focuses on Milton’s life and works; emphasis on Lycidas, Paradise Lost, Regained, Samson Agonistes, and Milton’s important literary projects.

IFS 2023. Popular Music in Literature (3). This course surveys the literature and criticism concerning American popular music in the 20th and 21st centuries. The focus is on the relation between popular music and literature.

IFS 2025. Making Babies, Making Families: Adoption and Surrogacy in Literature, Film, and Public Debate (3). This course samples prominent cultural representations of adoption and surrogacy in recent literature and film and explores forms of public debates about these headline-grabbing issues.

IFS 2030. Reading, Writing and Speaking in the Digital Age (3). Prerequisites: ENC 1101 and ENC 1102. This course explores the implications of the digital revolution: what it means for the publishing industry, books, magazines, copyright, libraries, how we read and write, and how we organize ourselves as a society.

IFS 2046. The Role of the Public Intellectual (3). This course examines the role of the public intellectual. Students read, discuss, and write about texts by, typically, George Orwell, Albert Camus, Susan Sontag, Camille Paglia, Greil Marcus, and Cornell West, in order to: (1) Encounter ideas to which they have not yet been exposed, (2) Become aware of their capacity to write in public, (3) Identify a road map for their own progress toward becoming a public intellectual, and (3) Identify a road map for their own progress toward becoming a public intellectual.

IFS 2049. Third World Cinema (3). This course addresses how colonialism and post-colonialism are shaped and mediated through images and the gaze.

IFS 2068. Understanding America: Hemingway in a World of Discredited Values and Traditions (3). In this course, students investigate numerous cultural and political issues and defining moments in 20th-century America through the lenses of Hemingway biography, texts, and audience.

LIN 3010. Introduction to Language Study (3). This course covers the relationship between meaning, form, and sound in language, including language acquisition, dialects, and grammar.

LIT 2010. Introduction to Fiction (3). This course introduces students to such narrative elements as point of view, characterization, setting, theme, and symbolism in the works of major prose fiction. It provides an introduction to the basic interpretive skills necessary to conduct literary analysis.

LIT 2020. Introduction to the Short Story (3). This course covers tone, narration, form, and theme in representative short stories.

LIT 2030. Introduction to Poetry (3). This course engages students in the art of understanding and analyzing poetry as a genre by looking closely and critically at the forms, techniques, and themes of a selected group of poems from a variety of historical periods.

LIT 2081. Contemporary Literature (3). This course covers poetry, fiction, drama from WWI to the present. For beginning students.

LIT 2230. Introduction to Global Literature in English (3). This course is an introduction to English-language literature from countries that were British colonies in Africa, Asia, and the Caribbean.

LIT 3043. Modern Drama (3). This course covers from O’Neill, Pirandello, Miller, and Tendiu to the Abbey to the present.

LIT 3383. Women in Literature (3). This course is an examination of the representation of women in literature.

LIT 4013r. Studies in the Novel (3). This course focuses on various topics in the novel as a genre from the beginnings of print culture through the contemporary period, with attention to texts of diverse national origins from the major traditions of the genre. The course also includes attention to both the history and theory of the genre. Authors studied may include: Cervantes, Diderot, Sterne, Flaubert, Tolstoy, Bely, Kafka, Woolf, Tomasi di Lampedusa, and Garcia Marquez, among others. May be repeated when topics vary to a maximum of six semester hours.

LIT 4033. Modern Poetry (3). This course is an introductory analysis of techniques and meanings. Typically includes Whitman, Dickinson, Yeats, Frost, Stevens, Eliot, Auden, Thomas, and Plath.

LIT 4034. Postmodern and Contemporary Poetry (3). Prerequisites: ENC 1102 and ENC 1112 or equivalents. This course allows students to analyze themes and techniques associated with poetry in English from the end of World War II to the present. Poets studied may typically include Olson, Ginsberg, Baraka, Clifton, Bishop, Lowell, Plath, Heaney, and Rich.

LIT 4044r. Readings in Dramatic Literature (3–6). This course covers specific topics in the study of British, American, or Continental drama. May be repeated to a maximum of six hours credit.

LIT 4093. Currents in Contemporary Literature (3). This course covers diverse, resurgent, and oppositional trends in literature since 1945: Mailer, Brautigan, Bellow, and others.

LIT 4184. Irish Literature (3). This course covers Synge, Yeats, Shaw, O’Casey, Joyce, Beckett, and others.

LIT 4205. Literature of Human Rights (3). This course is a study of literature in English and related materials relevant to the issue of human rights.

LIT 4233. Anglophone Postcolonial Literature (3). This course is an advanced study of literature written in English in former colonies in Africa, Asia, and the Caribbean.

LIT 4304. The Literary Expression of American Popular Culture (3). This course is an introductory course treating the wide variety of literary manifestations of American popular culture as reflections and symptoms of the concerns of modern American society.

LIT 4322. Folklore (3). This course is an introduction to myth, legend, tale, song, ballad, beliefs, and customs.

LIT 4329. African-American Folklore (3). This course provides an overview of the major forms of cultural expression developed by African-Americans. The focus will be on African-American folklore as a living tradition to be understood and interpreted.

LIT 4385. Major Women Writers (3). This course is an examination of selected works by significant women writers.

LIT 4514. Postcolonial Literatures and Feminisms (3). This course focuses upon literature and criticism about the status of women in former colonies.

LIT 4533. Feminisms: The Long 19th Century (3). This course introduces students to some of the key concepts of what is known as the “First Wave” of Feminist Theory in the 19th century.

LIT 4534. Early Feminisms (3). This course introduces students to key concepts, issues, and debates that shaped societal attitudes toward women prior to the emergence of “first wave feminism” in the later eighteenth and early nineteenth centuries. Topics may include women’s education, rights to participate in the public sphere, roles in marriage, the nature of women’s work, and women’s right to citizenship.

LIT 4554. Feminist Theory (3). This course introduces students to the basic concepts and issues in feminist thought through reading some of the major feminist theorists.

LIT 4652. Middle Eastern Literature and Translation (3). This course explores English translations of various genres of literature written in the Middle East and offers a Middle Eastern perspective of the religious, cultural, economic, territorial, and geopolitical conflicts of the region. The course covers the use of theoretical languages and concepts from a broad spectrum of literary fields such as postcolonialism, religious studies, feminism, globalization studies, and area studies.

REA 1905r. Improving College-Level Reading (1–3). (SU grade only.) This course is an individualized program of instruction in critical and comprehensive reading skills. Open to students from all levels and major areas. May be repeated to a maximum of three semester hours.

Graduate Courses

AML 5017r. Studies in U.S. Literature to 1875 (3).

AML 5027r. Studies in U.S. Literature Since 1875 (3).

AML 5067r. Studies in the African-American Literary Tradition (3).

AML 5096r. Studies in Multi-Ethnic Literature (3).

AML 5608r. Studies in the African-American Literary Tradition (3).

AML 5637r. Studies in Latino/a Literature in English (3).
CRW 5130r. Fiction Workshop (3).
CRW 5331r. Poetry Workshop (3).
CRW 5430r. Drama Workshop (3).
ENC 5216. Introduction to Editing and Publishing (3).

COLLEGE OF BUSINESS
Web Pages: http://www.business.fsu.edu/Academic-Programs/Undergraduate-Programs/Undergraduate-Degrees/Entrepreneurship and http://business.fsu.edu/academics/undergraduate-programs/majors/mis
Chair: S. Fiorito; Professors: Bush, S. Fiorito, Lamont, Paradise; Associate Professors: Armstrong, Junglas, Tang; Assistant Professors: Holmes, Ilk, Maslach; Senior Lecturers: Blass, Dever; Associate Lecturer: Kinney; Assistant Lecturers: Breed, Frazier, Garner, Tatsumi; Jim Moran Professor: S. Fiorito; Thomas L. Williams Eminent Scholar in Strategy: Lamont; Sprint Professor of Management Information Systems: Paradise

The Department of Entrepreneurship, Strategy and Information Systems administers the undergraduate degree programs in Entrepreneurship (ENT) and Management Information Systems (MIS).

The undergraduate major in entrepreneurship is designed for those who want to learn more about opportunity recognition and evaluation, and new venture start-up and growth. Students admitted into this major will participate in courses and seminars staffed by faculty members, as well as entrepreneurs and business owners/managers. Students will have opportunities to learn firsthand what is needed to start a new business venture, and to run an existing business.

The purpose of the Entrepreneurship major is to give students the knowledge, skills, and confidence to start, run, and grow their own business.

Students who successfully complete the Entrepreneurship major receive a Bachelor of Science (BS) degree in business administration with a major in entrepreneurship. The program Web site is accessible at http://www.business.fsu.edu/Academic-Programs/Undergraduate-Programs/Undergraduate-Degrees/Entrepreneurship.

The undergraduate major in Management Information Systems is designed for those who want to learn more about the intersection of people, processes, and technology in order to provide competitive advantage to organizations. The purpose of the Management Information Systems program is to provide students with a broad understanding of the role and use of managerial technology in the various functional areas of modern organizations. With this understanding students will design, implement, and manage systems for use in problem solving, decision making and innovation in organizations. The overall intent is to prepare the student for entry-level positions in medium- and large-sized organizations leading to high-level technical or managerial careers in both the public and private sectors. Students who successfully complete the Management Information Systems major receive a Bachelor of Science (BS) degree in Business Administration with a major in Management Information Systems. The program Web site is accessible at http://business.fsu.edu/academics/undergraduate-programs/majors/management-information-systems.

The Strategy curriculum is a non-degree service program at the undergraduate level and a doctoral program serving all students in the various business programs. A basic knowledge of business strategy is essential to the successful operation of any size or type of business.

For more information on graduate programs, refer to the Graduate Bulletin.

Computer Skills Competency
All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Entrepreneurship and Management Information Systems satisfy this requirement by earning a grade of “C–” or higher in CGS 2100 (state mandated business prerequisite requirement) or CGS 2518.

Note: CGS 2518 with a “C–” or better is a graduation requirement for students in the Entrepreneurship major.

Required Risk in Business and Society Course
All undergraduates at Florida State University intending to enter a business major must complete RMI 2302, Risk in Business and Society, with a “C–” or better by the end of their sophomore year. Transfer students will be required to complete this course in their first semester at FSU.

State of Florida Common Program Prerequisites
The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at ei-
Entrepreneurship Program Requirements

All students must complete: (1) the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin; (2) the state of Florida common prerequisites for entrepreneurship majors; (3) at least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments; (4) the general business core requirements for entrepreneurship majors; (5) the general business breadth requirements for entrepreneurship majors; and (6) the major area requirements for entrepreneurship majors.

Note: The entrepreneurship major is a limited access program. The entrepreneurship major is designed to take three years. Students must apply for admission to the entrepreneurship major in the Spring of their freshman year. Students must apply online to the ESIS Department (http://business.fsu.edu) before the announced deadline each Spring semester. Admitted students will take 2000-level entrepreneurship core requirements in their second year. Students must meet the admission requirements for the AACSB accredited business programs in the College of Business by the end of their second year in order to continue in the major. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements

All entrepreneurship majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

- BUL 3310 The Legal and Ethical Environment of Business (3)
- FIN 3403 Financial Management of the Firm (3)
- GEB 3213 Business Communication (3)
- MAN 3240 Organizational Behavior (3)
- MAR 3023 Basic Marketing Concepts (3)

General Business Breadth Requirements

All entrepreneurship majors must complete the two courses as follows. Each course must be completed with a grade of “C–” or better.

- RMI 3011 Risk Management/Insurance (3)
- MAN 4720 Strategic Management and Business Policy (3)

Capstone Course

All entrepreneurship majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements

All entrepreneurship majors must complete nineteen credit hours as listed below. A grade of “C–” or better must be earned in each course used to satisfy the entrepreneurship major area requirements.

- ENT 2010. Creating and Managing New Ventures (2)
- ENT 2010L. Creating and Managing New Ventures Laboratory (1)
- ENT 2011. Managing and Harvesting New Ventures (2)
- ENT 2011L. Managing and Harvesting New Ventures Laboratory (1)
- ENT 3003. Introduction to Entrepreneurship (3)
- ENT 3413. New Venture Finance (3)
- ENT 4014. Creating New Ventures I: Opportunity Recognition and Market Feasibility (3)
- ENT 4115. Creating New Ventures II: Business Planning and Competing for Capital (3)

Requirements for a Minor in Entrepreneurship

Any student who has been accepted to Florida State University is eligible to get a minor in Entrepreneurship. This is not a University degree program leading to a diploma. Students completing the minor will gain knowledge about how to initiate and manage new ventures, sources of funding, and business planning. Students interested in a minor in entrepreneurship must take a total of twelve hours in entrepreneurship as described below.

- ENT 3123. Corporate Venturing and Entrepreneurial Strategies (2)
- ENT 3173. Franchising (3)
- ENT 3183. Commercializing New Technologies (3)
- ENT 3203. Managing New Venture Growth (3)
- ENT 3273. Family Business (3)
- ENT 3283. Women and Minorities in New Ventures (3)
- ENT 3503. Social Entrepreneurship (3)
- ENT 3613. Innovation and Creativity (3)
- ENT 4255. Negotiation in Entrepreneurship (3)

ISM 4882. Mobile Technology (3)

Management Information Systems Program

All students must complete: (1) the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin; (2) the state of Florida common prerequisites for management information systems majors; (3) at least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments; (4) the general business core requirements for Management Information Systems majors; (5) the general business breadth requirements for Management Information Systems majors; and (6) the major area requirements for Management Information Systems majors.

Note: To be eligible to pursue a Management Information Systems major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements

All Management Information Systems majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

- BUL 3310 The Legal Environment of Business (3)
- FIN 3403 Financial Management of the Firm (3)
- GEB 3213 Business Communications (3)
- MAN 3240 Organizational Behavior (3)
- MAR 3023 Basic Marketing Concepts (3)

Capstone Course

All Management Information Systems majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements

All Management Information Systems majors must complete two courses as follows. Each course selected must be completed with a grade of “C–” or better.

- MAN 4720 Strategic Management and Business Policy (3)
- FIN 3244 Financial Markets, Institutions, and International Finance Systems (3)
- HFT 3240 Managing Service Organizations (3)
- ISM 3003 Foundations of Management Information Systems (3)
- MAN 3600 Multinational Business Operations (3)

Plus at least six credit hours from the following list of courses:

- ENT 2802. Entrepreneurship in Contemporary Society (3)
- ENT 3123. Corporate Venturing and Entrepreneurial Strategies (2)
- ENT 3173. Franchising (3)
- ENT 3183. Commercializing New Technologies (3)
- ENT 3203. Managing New Venture Growth (3)
- ENT 3273. Family Business (3)
- ENT 3283. Women and Minorities in New Ventures (3)
- ENT 3503. Social Entrepreneurship (3)
- ENT 3613. Innovation and Creativity (3)
- ENT 4255. Negotiation in Entrepreneurship (3)
- ENT 4944. Small Business and New Venture Analysis and Consultation (4)
- ISM 4882. Mobile Technology (3)
Capstone Course
All management information systems majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements
All Management Information Systems (MIS) majors must complete six courses as listed below. Due to the dynamic nature of the MIS field, all students should verify the current MIS major requirements with the MIS undergraduate advisor upon entry to the major. A grade of “C-” or better must be earned in each course used to satisfy the MIS major area requirements. In all cases, prerequisites to courses must be completed with a grade of “C-” or better before subsequent courses may be entered.

ISM 4113 Management Information Systems Analysis and Design (3)
ISM 4212 Information for Operating Control and Data Management (3)
ISM 4220 Information and Communication Systems Management (3)
ISM 4482 Mobile Technology (3)
ISM 4930r Special Topics in MIS (3)

ISM—Information Systems Management
MAN—Management

Undergraduate Courses

COP 4125 Advanced Application Development (3). Prerequisite: CGS 2518. This course presents advanced application development methodology, technology, and tools. Students prepare individually and in teams in the applied study of complex systems development problems and cases.

ENT 2010. Creating and Managing New Ventures (2). Prerequisite: Admission to the major. Corequisites: ACG 2011 and ENT 2010L. This course is the first in a two-course sequence for students interested in immersing themselves in the dynamics of starting and running a business. Course content focuses on opportunity recognition, researching financial viability of business ventures, and marshalling resources (among them, financial, human, technical, and motivational) to launch business enterprises. Students prepare mini-business plans.

ENT 2010L. Creating and Managing New Ventures Laboratory (1). Prerequisite: Admission to the major. Corequisites: ACG 2011 and ENT 2010. This laboratory allows students to develop mini-business plans to be funded by the Jim Moran Institute for Global Entrepreneurship. Students actually launch and manage the business.

ENT 2011. Managing and Harvesting New Ventures (2). Prerequisite: Admission to major, along with ENT 2010 and ENT 2010L. Corequisites: ACG 2011 and ENT 2011L. This course is a continuation of ENT 2010, focusing on growing and exiting a business. Additional course content exposes students to the basics of entrepreneurial law, negotiation, and understanding financial statements.

ENT 2011L. Managing and Harvesting New Ventures Laboratory (1). Prerequisites: Admission to the major. Corequisites: ACG 2011 and ENT 2011. This laboratory is a continuation of ENT 2010L, focusing on growing and running the micro-business throughout the academic year with planned liquidation and shutdown (Harvesting) at the end of the academic year.

ENT 2802. Entrepreneurship and Contemporary Society (3). This course explores entrepreneurship, advocacy, and the impact of the entrepreneurial process on society. Topics include the process of innovation, the nature of entrepreneurialism, the essence of Problem-Opportunity-Venture-Operations (POVO) model, the lean start-up business model, different kinds of entrepreneurship (commercial, social, scientific, and artistic), and an introduction to competencies that have facilitated success in other entrepreneurs.

ENT 3003. Introduction to Entrepreneurship (3). This course is a broad survey of entrepreneurship. It exposes students to different types of entrepreneurship, and covers an array of topics that span from idea generation through venture formation, financing, and management while helping students build knowledge and skills to be a successful entrepreneur.

ENT 3123. Corporate Venturing and Entrepreneurial Strategies (2). Prerequisites: ENT 3003 or both ENT 2010 and ENT 111. This course focuses on entrepreneurship in existing organizations. Course material centers on how established organizations can become entrepreneurial, how the corporate entrepreneurship process works, and the role of individuals in promoting entrepreneurship in their organizations. The course also explores how entrepreneurs can recognize and investigate business opportunities for existing firms, and how entrepreneurs gain support for their ventures in an organizational context.

ENT 3173. Franchising (3). Prerequisites: ENT 3003 or both ENT 2010 and ENT 111. This course focuses on the special role of franchising as a form of entrepreneurship in the U.S. and international economies. Topics include success rates of franchisors and franchisees, advantages and disadvantages of franchising for both franchisors and franchisees, the process of franchising a business idea, and the process of selecting and working with a franchisor.

ENT 3183. Commercializing New Technologies (3). Prerequisite: ENT 3003. This course focuses on understanding businesses based on patentable technologies, which differ significantly from those of non-technological and mainstream businesses. Understanding these differences is critical to technology commercialization.

ENT 3203. Managing New Venture Growth (3). Prerequisites: ENT 3003 and MAN 3025. This course addresses the management of rapidly growing entrepreneurial firms. Topics include building an infrastructure, planning stage financing, managing under adversity, and managing a business with rapid growth.

ENT 3273. Family Business (3). Prerequisites: ENT 3003 or both ENT 2010 and ENT 111. This course covers special issues facing entrepreneurial and family businesses: choice of organizational form, business planning, tax and compensation planning, business succession, and also some common challenges often found in family business context, such as dealing with family conflicts, how to motivate and evaluate employees when a mix of family and non-members are involved, and planning for succession.

ENT 3283. Women and Minorities in New Ventures (3). Prerequisite: ENT 3003 or both ENT 2010 and ENT 111. This course focuses on the emergence and current impact of women- and minority-owned businesses. The course also considers special challenges and opportunities that women and minority entrepreneurs confront. Course may include discussions with successful women and minority business owners.

ENT 3413. New Venture Finance (3). Prerequisites: ENT 2010 with a grade of “B–” or better and ENT 3003 with a grade of “B–” or better. Corequisite: FIN 3401. This course introduces future entrepreneurs to the concept of financial thinking by utilizing tools and techniques which have been adapted for use in the realm of entrepreneurship. It is designed to inform students of various techniques of obtaining financing for new enterprises and to maximize the financial potential of their existing companies and is structured to train students in the financial management of entrepreneurial firms. As most are small growing firms, understanding finance requires an understanding of marketing, management, and planning functions of these firms.

ENT 3423. Funding Sources for Entrepreneurial Opportunities (3). Prerequisite: ENT 3003 or both ENT 2010 and ENT 111. This course covers the financing sources that entrepreneurs use to start and grow new ventures. Topics include how entrepreneurs obtain financing, including personal funding sources, venture capital, angel investors, and other sources. The course includes discussions with successful women and minority business owners.

ENT 3503. Social Entrepreneurship (3). Prerequisites: ENT 3003 and MAN 3025. This course is about the opportunities and challenges of creating new ventures that also solve social problems and make a positive difference in the lives of others. Focus is on organization with an explicit civic mission or social purpose, including well-known nonprofits and well-regarded for profits.

ENT 3613. Innovation and Creativity (3). Prerequisites: ENT 3003 and MAN 3025. This course is intended to appeal to those interested in the evolution and management of creative processes and innovative organizations. There is an emphasis on technology management, technology-oriented firms, creating technology-driven startups, and consulting to such firms.

ENT 4013. Planning New Ventures (3). Prerequisites: ENT 3003 and MAN 3025. This course exposes non-business students to basic entrepreneurial finance and the principles of corporate entrepreneurship. Students have the opportunity to consider a business plan for the creation of a new venture. In the process of development, students identify new or emerging opportunities for providing goods or services, demonstrate the need for such goods or services through market research, and develop financial statements for the proposed venture.

ENT 4014. Creating New Ventures I: Opportunity Recognition and Market Feasibility (3). Prerequisite: ENT 3413. This course is the first in a two-course series for seniors in which students complete a business plan for the creation of a new venture and construct a tradeshow booth to promote their venture. In this first course, students learn how to identify emerging opportunities for goods or services and demonstrate the need for such goods or services through market research. Students have the opportunity to collaborate with the university technology transfer office and a campus inventor to investigate the feasibility of a new technology. Students also learn about the technology commercialization process and the legal environment of technology commercialization.
Florida State University 2015-16 General Bulletin Undergraduate Edition

ENT 4114. New Venture Creation (3). Prerequisite: ENT 3423. This course gives students the opportunity to complete a business plan for the creation of a new venture. In the process of identifying and evaluating new opportunities for providing goods or services, demonstrate the need for such goods or services through market research, and develop financial statements for the proposed venture.

ENT 4115. Creating New Ventures II: Business Planning and Competing for Capital (3). Prerequisite: ENT 4014. This course is the second in a two-course series for seniors in which students work in teams to create a new venture and construct a tradeshows booth to promote their venture. In this course, students learn the business planning process and take a highly feasible idea from ENT 4014 and develop a complete business plan and tradeshows booth. Students are also exposed to concepts of entrepreneurial marketing and finance.

ENT 4255. Negotiation in Entrepreneurship (3). This course is designed to expose students to the art of negotiation. The course instruction and activities prepare students for future negotiations in the small business environment. The class discusses both competitive and collaborative negotiation and how to prepare for a negotiation. Students are exposed to negotiation strategies and taught how to determine which strategy meets the need of the current negotiation. The course also teaches students the importance of negotiating from a position of strength and how to determine and leverage the advantages they have.

ENT 4800b. Directed Independent Study (1–3).

ENT 4834e. Special Topics in Entrepreneurship (1–3). Prerequisites: ENT 2010, ENT 2011 and ENT 3003. This course allows students to learn about special topics in entrepreneurship that are not taught as part of the regular major or certificate programs in entrepreneurship. Special topics may include: environmental entrepreneurship, managing high growth, venture and angel capital, international entrepreneurship, and creativity in opportunity recognition. This course is repeatable to a maximum of six semester hours, as topics vary.

ENT 4943. Entrepreneurship Internship (3). (S/U grade only.) Prerequisites: ENT 2010, ENT 2011, and ENT 3003. This course is designed for College of Business students who desire to gain real world experience in the Entrepreneurship field through on-the-job-practice. Students work under the direction of an approved industry professional and the Director of Internships and Career Services.

ENT 4944. Small Business and New Venture Analysis and Consultation (4). Prerequisite: ENT 3413. This course includes selected seminars complemented by a ten-week, two-person student consulting team working with a local area entrepreneurial client. Closely supervised consultation with a comprehensive consulting report provided for each client. Effort is placed on developing proficiency in a range of skills required to practice consulting.

GEB 1030. Introduction to Careers in Business (3). (S/U grade only.) This course is designed for freshman and sophomore students who intend to major in business. Career options in various business specialties and the personal characteristics and skills required for a successful business career are discussed.

GEB 3213. Business Communications (3). Prerequisite: Upper-division business major. This course is designed to help business students develop the writing, verbal, and interpersonal skills that are necessary for a successful business career.

GEB 4113. Managing the Small to Mid-Sized Company (3). This course addresses the management of rapidly growing entrepreneurial firms. Topics include building an infrastructure, planning stage financing, managing under adversity and managing a business with rapid growth.

GEB 4311. Entrepreneurial Seminar (3). Prerequisite: GEB 4113. This course focuses on the financial strategies for survival and expansion of existing entrepreneurial businesses, as well as for developing new ventures.

GEB 4941r. Business Internship (0–6). (S/U grade only.) Prerequisite: Instructor permission. This business internship is designed for College of Business students who desire to gain real-world experience in the accounting field through on-the-job practice. Students work under the direction of an approved industry professional, a faculty advisor, and the internship director. May be repeated to a maximum of six semester hours.

IFS 2076. The Lean Machine: The 21st Century Entrepreneur (3). This course explores entrepreneurship from antiquity to contemporary society. In particular, the course examines how contemporary entrepreneurship is undergoing a fundamental shift towards a powerful new kind of consumer called the “prosumer.” Additionally, this course seeks to explore how the new conceptual idea is leading to successful commerce and how that commerce impacts culture and daily lives.

ISM 3003. Foundations of Management Information Systems (3). Prerequisite: CGS 2518. This course is an overview of the MIS profession and the role of MIS in organizations. Topics include the introduction to fundamental techniques and methods used in the analysis of business processes for which computer-based information systems are designed and managed.

ISM 3011. Introduction to Management Information Systems (3). Prerequisite: CGS 2100. This course is an introduction to management information systems concepts, with emphasis on describing information requirements, managing information resources, and applying information processing technology to business and management.

ISM 4113. Management Information Systems Analysis and Design (3). This course is an in-depth treatment of the design and management of management information systems, including information requirements analysis, design methodology, and system implementation considerations.

ISM 4117. Business Intelligence (3). Corequisite: ISM 4212. This course examines the design, development, implementation, and management of decision support and expert systems, including concepts of data management, modeling decision support systems, and decision making. For MIS majors only.

ISM 4312. Information for Operating Control and Data Management (3). Prerequisite: ISM 4113. This course covers the theory, techniques, and applications of information management and its role in identifying or emerging opportunities for providing goods or services, demonstrate the need for such goods or services through market research, and develop financial statements for the proposed venture.

ISM 4220. Information and Communications Systems Management (3). Prerequisite: ISM 4113. This course is an introduction to the design, operation, and management of telecommunications systems including electronic data interchange, office support, transmission and networking. For MIS majors only.

ISM 4300. Technology Management (3). Prerequisite: ISM 4212. This course focuses on the strategy and theory of the creation, development, introduction, management, and marketing of new technologies and services. Management of the appropriate technological environment of an organization is emphasized. Concepts and approaches to e-commerce and e-business.

ISM 4314. Project Management (3). Prerequisite: ISM 4113. This course covers the fundamental knowledge areas related to successful project management. Topics include project selection and initiation, work breakdown structure and scope management, scheduling, budgeting and cost analysis, quality control, project communication plans, team building, and risk analysis. Emphasis is on problems of resource management and procurement issues.

ISM 4482. Mobile Technology Management (3). This course explores factors related to the management of the design, implementation, and installation of applications on mobile devices. Topics cover issues related to platform sizing (such as memory, power, screen brightness, and sound capability), implications of connectivity and security problems for management, as well as business opportunities that become available through the use of mobile technology.

ISM 4545. Data Analytics and Mining for Business (3). Prerequisites: ISM 4212 and STA 2023 or equivalent. This course discusses the most important data analytics and mining techniques to support data-driven decision making and help corporations acquire knowledge from large data sets. Specifically, it introduces methods such as clustering, classification, association rule mining, etc. through a hands-on approach using specialized software.

ISM 4905r. Directed Individual Study (1–3). May be repeated to twelve semester hours.

ISM 4930r. Special Topics in Management Information Systems (1–3). This course provides an opportunity to study current issues in management information systems and topics not covered in other courses. May be repeated to a maximum of nine semester hours as content varies. Prerequisites vary depending on the topic of the course; refer to department for details.

ISM 4941r. Field Study in Management Information Systems (1–3). (S/U grade only.) Prerequisite: Instructor permission. This course provides students with learning opportunities in organizational management and information systems beyond those available in existing MIS courses. No more than three credit hours allowed in a semester. May be repeated to a maximum of six semester hours.

ISM 4970r. Honors Thesis (1–6). Prerequisite: Admission to the honors program. May be repeated to a maximum of nine semester hours. Six semester hours of thesis are required to complete honors in the major.

MAN 4631. International Strategic Management (3). Prerequisites: ECO 2013, ECO 2023, and MAN 3600. This course focuses on the international dimensions of strategic management, including environmental and political issues affecting global competition. Special emphasis is given to the multinational enterprise and strategic options available for effective worldwide competitive advantage.

MAN 4720. Strategic Management and Business Policy (3). Prerequisites: FIN 3403, MAN 3240, and MAR 3023. This course is a case analysis of business and management problems for the formulation of managerial strategies and policies.

MAN 4752. Competitive Dynamics (3). Prerequisite: MAN 4720. This course applies the tools and concepts acquired in other business and management courses in a hands-on business simulation of competitive dynamics with an eye toward contemporary, emerging competitive issues confronting business senior executives and owners.

Chair: Lenore McWey; Eminent Scholar and Professor: Fincham; Professors: Denton, Krantz, McWey, Ralston; Associate Professors: Cui, Rehm; Assistant Professors: Blair, Gonzales-Backen, Holtrop, Lucier-Greer; Instructional Specialist in Family and Child Science: Barlow; Professors Emeriti: Cornille, Darling, Greenwood, Hansen-Gandy, Hicks, Lee, A. Mullis, R. Mullis, Pasley, Pestle, Rapp, Readlick, Zongker

The Department of Family and Child Sciences offers one degree program in family and child sciences which requires maintaining minimum grades in major courses for graduation.

The program provides an understanding of child development and family relationships across the life span. We emphasize the diversity of families and how children and families influence and are influenced by the broader environment (e.g., schools, communities, workplace, society at large) and change over time. Students learn to apply this knowledge about children and families in working with them in various professional settings through participation in extensive practicum experiences. These experiences occur in a variety of human service agencies and organizations, educational settings, child care centers, and child and family advocacy organizations. Students also gain skills in developing and implementing programs whose goal is to strengthen individuals and families. There is a series of courses that provides the necessary background to apply for certification from the National Council on Family Relations to become a “certified family life educator.” It does not lead to teacher certification in Florida.

Students must complete human sciences core courses (FAD 2230 AND one of the following: COA 4131, HUN 1201, or HME 4221), other prerequisite courses of the major, and an approved area of concentration in an allied field. Courses selected for the area of concentration cannot also be used to fulfill liberal studies requirements. A practicum experience is required. Five courses are required prerequisites. Students must achieve at least a “C-” in COA 4131, HUN 1201, or FAD 4453 and at least a “B-” in FAD 2230, FAD 3343, CHD 2220, CHD 3243, and STA 1013 or STA 2XXX. Individuals who apply for the major but who have not met the prerequisite requirements will be classified as Prerequisite Incomplete (PI) and cannot enroll in other classes in the major until these prerequisite classes are successfully completed. Students who do not achieve a grade of “B-” may repeat only ONE of the five required prerequisite courses to achieve the necessary grade. The minimum grade required in other courses beyond the prerequisite courses is “C-.”

Curriculum guides stating specific degree requirements for the undergraduate majors are available through the Department of Family and Child Sciences and through our Web site, http://www.chs.fsu.edu/fcs.

Minor

A minor in child development may be earned by completing twelve semester hours in family and child sciences with a grade of “C-” or better in each of the required courses: FAD 2230, FAD 3343, CHD 2220 and CHD 3243. At least nine credit hours must be completed at Florida State University; no more than one substitution for these courses is permitted.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in family and child sciences satisfy this requirement by earning a grade of “C-” or higher in CGS 2060.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:
Family and Children Sciences

1. FAD X230
2. CHD X220
3. FAD X220
4. STA X013 or STA X014 or STA X021 or STA X022 or STA X023

Note: Courses are offered in Summer Sessions A, B and/or C to accommodate transfer students who enroll in the University and our major in the Summer. Thus, when Fall semester begins, these students can enroll in the other required courses for which these courses are prerequisites. Students who enroll in the Fall can take these courses and those required as part of the “area of concentration” during the semester. Following this, there is ample time to complete the remaining 120 credit hours.

Honors in the Major

The Department of Family and Child Sciences offers a program in honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Definition of Prefixes

CHD—Home Economics: Child Development
FAD—Home Economics: Family Development
HEE—Home Economics Education
HOE—Home Economics: General
IFS—Interdisciplinary Florida State University Courses

Undergraduate Courses

CHD 2220. Child Growth and Development: The Foundation Years (3). This course is the study of children from birth through middle childhood.

CHD 3243. Contexts of Adolescent Development (3). Prerequisite: CHD 2220. This course examines the developmental process related to cognitive, physical, and psychosocial growth from pre- to late adolescence and the reciprocal influences of various contexts in which these youth are embedded, such as families, peer groups, schools, and communities.

CHD 3472. Child Guidance (3). Prerequisite: Major status. This course allows students to learn principles of positive guidance to apply in guiding children during early childhood, middle childhood, and adolescence in a variety of natural contexts, including home and school.

CHD 4225. Contexts for Early Childhood Development (3). Prerequisites: Major status and junior standing. This course helps students learn to create contexts, relationships, activities, and environments for the enhancement of the physical, social, emotional, and cognitive development of young children from birth to five years of age in homes and other institutions.

CHD 4250. Middle Childhood Contexts (3). Prerequisites: Major status and junior standing. This course has been designed to examine developmental processes of school-age children and adolescents. This course is a prerequisite course for practica experiences with these age groups. Consequently, strategies for working with school-age children and adolescents are also addressed.

CHD 4251. Adolescent Contexts (3). Prerequisites: Major status and junior standing. This course provides a basic understanding of adolescent development as it relates to human growth and development and learning through a multi-disciplinary perspective. Biological, cognitive, and psychosocial tasks of adolescence within contexts such as family, peer group, school, community, culture, and other learning environments are examined.

CHD 4537. Parenting (3). Prerequisite: Major status. This course is a comprehensive review of the contemporary theory and research in parenting. This course is organized developmentally, focusing on the emerging needs, responsibilities, and skills required by parents at progressive stages of their children’s development.

CHD 4615. Public Policy: Child and Family Issues (3). Prerequisite: Major status or instructor permission. This course uses readings, lecture, discussion, guest speakers, field work, research, and writing, for students to become familiar with the process of formulating, implementing, and evaluating public policy. Family and child issues that have resulted in policy decisions at every level are identified, and current issues that are in need of attention by policy makers are explored. Research related to family issues and its impact on family policy is analyzed with emphasis on enhancing the role of family and child professionals in policy process.

CHD 4630. Methods of Studying Families and Children (3). Prerequisite: Major status. This course examines research methods, concepts, principles, and issues in studying families and children.

CHD 4905r. Directed Individual Study in Child Development (1–3). May be repeated to a maximum of nine semester hours.

CHD 4944r. Internship in Family and Child Sciences (1–12). (S/U grade only.) Prerequisite: FAD 4805 or instructor permission. This course consists of supervised practical experiences in various professional settings serving children and families, including hospitals, education faculties, human service agencies, and government agencies. May be repeated to a maximum of twelve semester hours. Child development majors only.

FAD 2230. Family Relationships: A Life Span Development Approach (3). This course examines the dynamics of contemporary family life and interpersonal relationships in a changing society and over the life course.

FAD 3220. Individual and Family Life Span Development (3). This course is an analysis of individual and family development as it applies to professional application in human services.

FAD 3271. Ecological Contexts for Individual and Family Development (3). This course is an introduction to the overarching theoretical frameworks, providing a basis for understanding individual and family development. This course serves as a foundation for all major courses.

FAD 3343. Contexts of Adult Development and Aging (3). Prerequisite: CHD 2220. This course examines the developmental processes related to cognitive, physical, and psychosocial changes during adulthood, the associated challenges, and the influences of various contexts in which adults are embedded, such as families and communities.

FAD 3432. Stress and Resilience in Individuals and Families (3). Prerequisite: Major status or instructor permission. This course provides undergraduate majors with an introduction to family-based, stress-focused mini-theories. The course provides a framework for understanding the differences between family patterns when families are centered on growth related themes and when they are pre-occupied with a variety of stressor events.

FAD 4265. Family Diversity (3). Prerequisite: Major status. This course is designed to expose students to the diversity of families by race, ethnicity, social classes, and structures in an eco-systemic context.

FAD 4451. Human Sexuality Education (3). This course examines sexuality through the lifespan regarding relationship issues and health concerns and provides training for professionals and parents in sexuality education.

FAD 4455. Family Life Education (3). This course provides information and techniques needed to facilitate and evaluate home, school, and community relations through the lifespan.

FAD 4601. Foundations of Counseling (3). Prerequisites: Senior standing and instructor permission. This course discusses basic counseling skills for persons who, by nature of their work, are called upon to provide counseling. May be taken for graduate credit.

FAD 4805. Practicum in Family and Child Science (6). Prerequisites: Major status, at least four additional major courses, and FAD 4932 (completed the semester before enrolling in FAD 4805). This course is designed to provide students with experiences in a community setting serving children, youth, and families and the opportunity to apply course material to the work environment.

FAD 4905r. Directed Individual Study (1–3). (S/U grade only.) May be repeated to a maximum of nine semester hours.

FAD 4910r. Honors Work (3–6). Prerequisites: Upper division students with an overall GPA of 3.5; instructor permission. This course provides upper-division students with an opportunity to undertake an independent and original research project in their particular area of interest. May be repeated to a maximum of six semester hours.

FAD 4932. Pre-Professional Development (1). Prerequisites: Major status and senior standing. This course is designed to expose students to career opportunities in FCS and professional/ethical behavior and to prepare them for placement in agencies/organizations serving individuals and families.

FAD 4936r. Special Topics: Family or Housing (3–9). Prerequisite: Instructor permission. In this course, each topic may be taken only once. May be repeated to a maximum of nine semester hours.

HEE 4912r. Honors Work (3). This course is open to upper-division majors with an overall grade point average of 3.2 and consent of instructor. May be repeated to a maximum of six semester hours.

IFS 2071. Relationship Status: It’s Complicated. Understanding and Influencing Intimate Relationships (3). In this course students examine how to build and maintain key relationships through understanding themselves and critical relationship process. These key relationships include intimate relationships (dating/marriage partners, children, parents) and professional relationships (clients, coworkers, supervisors). Course content emphasizes the importance of making purposeful choices in building and maintaining personal and professional relationships.

Graduate Courses

Child Development Courses

CHD 5266. Advanced Child Development (3).
CHD 5617. Professional Development in Family and Child Sciences (1).
CHD 5618. Policy Development and Analysis in Child and Family Studies (3).
CHD 5619. Child Care Issues and Advocacy (3).
CHD 5906r. Directed Individual Study (1–3). (S/U grade only.)
CHD 5915. Methods of Research I (4).
CHD 5919. Grant Writing in Family and Child Sciences (3).
CHD 5940r. Practicum in Child Development: Varied Ages (infancy, preschool, school-age) (3–9).
CHD 6281. Theories of Child Development (3).
CHD 6284. Assessment Techniques for Children and Families (3).
Family Relations Courses

FAD 5256. Parent and Child Relations (3).
FAD 5261. Families in Crisis (3).
FAD 5263. Advanced Family Studies (3).
FAD 5452. Human Sexuality Education (3).
FAD 5456. Family Life Education (3).
FAD 5458. College Teaching in Family Sciences (2–3). (S/U grade only.)
FAD 5461. Professional Issues in Family and Child Sciences (3).
FAD 5900r. Readings in Family and Child Sciences (3).
FAD 5906r. Directed Individual Study (1–3). (S/U grade only.)
FAD 5934r. Seminar in Family and Child Sciences (1–9).
FAD 5944r. Internship-Family/Child (1–12).
FAD 5970. Special Project (3). (S/U grade only.)
FAD 6436. Theories of Family Sciences (3).
FAD 6450. Human Sexuality (3).
FAD 6606. Supervision in Marriage and Family Therapy (3).
FAD 6607. Randomized Clinical Trials (3).
FAD 6608. Effectiveness and Translation Research (3).
FAD 6916. Outcome Research in Marriage and Family Therapy (3).
FAD 6917. Research Methods in Family and Child Sciences (3).
FAD 6930r. Special Topics: Marital and Family Therapy–Topics Vary (3–9).
FAD 6935r. Special Topics: Family and Child Development–Topics Vary (3–9).
FAD 6944r. Internship in Marital and Family Therapy (1–5). (S/U grade only.)
FAD 8944r. Internship in Marriage and Family Therapy (1–12).

Other Courses

CHD 5912r. Supervised Research (1–3). (S/U grade only.)
CHD 5942r. Supervised Teaching (1–3). (S/U grade only.)
FAD 5912r. Supervised Research (1–3). (S/U grade only.)
FAD 5942r. Supervised Teaching (1–3). (S/U grade only.)
FAD 5944r. Internship in Marriage and Family Therapy (1–12). (S/U grade only.)

The Department of Family and Child Sciences offers graduate programs leading to the Master of Science (MS) degree and the Doctor of Philosophy (PhD) degree in human sciences with specialization in family relations, and a Doctor of Philosophy (PhD) degree in marriage and family therapy. For further information relating to graduate coursework and thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

Department of Finance

COLLEGE OF BUSINESS

Web Page: http://business.fsu.edu/academics/departments/finance/
Chair: William A. Christiansen; Professors: Ang, Cheng, Clark, Humphrey, Lee, Da. Peterson; Associate Professors: Autore, Christiansen, Hutton, Jiang, Knill, Perfect; Assistant Professors: Liu, Zhou; Senior Lecturer in Finance: G. Smith; Assistant Lecturers in Finance: Gunter, Mahon, De. Peterson, D. Smith; Fannie Wilson Smith Eminent Scholar in Banking: Humphrey; Patty Hill Smith Eminent Scholar in Finance: Lee; Bank of America Eminent Scholar in Finance: Ang; Wells Fargo Professor of Finance: Da. Peterson; BB&T Professor in Finance: Christiansen; SunTrust Professor in Finance: Jiang; Gene Taylor Bank of America Professor in Finance: Cheng, Hutton, Knill; Dean L. Cash Professor in Finance: Autore; Dean's Emerging Scholar: Jiang

Finance is considered one of the basic functions of our private enterprise system. Finance can be defined as the art and science of managing money. Each of the many firms, businesses, institutions, and governmental agencies in our economic system has the problems of obtaining, administering, and managing its funds efficiently and wisely. Nearly every decision made by an organization has important financial implications. Thus, the finance student is introduced to and studies the theory, concepts, applications, institutional environment, and analytical tools essential for proper decision making. Finance is designed as preparation for a broad variety of careers, since all organizations need individuals knowledgeable about finance. Careers may be in financial management and analysis, banking, financial institutions, financial markets, investments, portfolio analysis and management, financial planning, and multinational finance. Finance is also considered good preparation for graduate study in law or business.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in finance satisfy this requirement by earning a grade of "C-" or higher in CGS 2100 (state mandated business prerequisite requirement) or CGS 2518.

Note: CGS 2518 with a grade of "C-" or better is required for students in the Finance major and is a prerequisite to all 4000-level courses offered in the Finance Department.

Required Risk in Business and Society Course

All undergraduates at Florida State University intending to enter a business major must complete RMI 2302, Risk in Business and Society, with a “C-” or better by the end of their sophomore year. Transfer students will be required to complete this course in their first semester at FSU.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ACG X021 or ACG X022, or ACG X001 and ACG X011
2. ACG X071 or ACG X301
3. CGS X100 or demonstrated competency or CGS X100C or CGS X330 or CGS X570 or CGS X060 or CGS X531 or CGS X000 or ISM X000 or CGS X518
4. ECO X013
5. ECO X023
6. MAC X233 or MAC X230
7. STA X023 or STA X122 or QMB X100
**Requirements**

**Requirements for the Finance Program**

Candidates for the Bachelor of Science (BS) or Bachelor of Arts (BA) degree with a major in finance must complete a minimum of one hundred twenty semester hours. Normally, four semesters of work are devoted to the *Liberal Studies for the 21st Century Program* and additional foundation courses in mathematics, economics, and statistics. The finance major must complete the business common body of knowledge, which includes work in accounting, quantitative methods, management, business law, marketing, computer science, business communications, and basic finance. The finance major requirements consist of an additional eighteen semester hours of work in advanced finance and accounting courses.

**Requirements for a Major in Finance**

All students must complete the following: (1) the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this *General Bulletin*; (2) the state of Florida common program prerequisites for finance majors; (3) at least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments; (4) the general business core requirements for finance majors; (5) the general business breadth requirements for finance majors; and (6) the major area requirements for finance majors.

**Note:** To be eligible to pursue finance major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this *General Bulletin*.

**General Business Core Requirements for Finance Majors**

All finance majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

- BUL 3310 The Legal and Ethical Environment of Business (3)
- *FIN 3403 Financial Management of the Firm (3)
- GEB 3215 Business Communications (3)
- MAN 3240 Organizational Behavior (3)
- MAR 3023 Basic Marketing Concepts (3)

**General Business Breadth Requirements for Finance Majors**

All finance majors must complete the two courses as follows. Each course must be completed with a grade of “C–” or better.

- FIN 3244 Financial Markets, Institutions, and International Finance Systems (3)
- QMB 3200 Quantitative Methods for Business Decisions (3)

**Capstone Course**

All finance majors must complete the capstone class in Competitive Dynamics (MAN 4752).

**Major Area Requirements for Finance Majors**

*All finance majors must complete six courses (eighteen semester hours) as listed below. A grade of “B–” or better must be earned in FIN 3403 and a grade of “C–” or better must be earned in CGS 2518 to be eligible to enroll in any 4000-level course offered by the Finance Department. A grade of “C–” or better must be earned in FIN 4424, FIN 4504, and the two additional finance electives used to satisfy the finance major area requirements. A minimum grade point average (GPA) of 2.0 must be earned in the courses used to satisfy the finance major area requirements.*

- ACG 3171 Analysis of Financial Statement Presentation (3)
  - Note: The two course sequence, ACG 3101 (Financial Accounting and Reporting I) and ACG 3111 (Financial Accounting and Reporting II), may be substituted for ACG 3171.
- ACG 3331 Cost Accounting and Analysis for Business Decisions (3)
  - Note: ACG 3341 (Cost Accounting I) may be substituted for ACG 3331.
- FIN 4424 Problems in Financial Management (3)
- FIN 4504 Investments (3)
  - Plus two electives from the following list of courses:
    - FIN 4324 Commercial Bank Administration (3)
    - FIN 4412 Short-Term Financial Management (3)
    - FIN 4453 Financial Modeling and Forecasting (3)
    - FIN 4514 Security Analysis and Portfolio Management (3)
    - FIN 4604 Multinational Financial Management (3)
    - FIN 4934r Senior Seminar in Finance (3)
    - GEB 4455 Perspectives on Free Enterprise (3)

**Honors in the Major**

The Department of Finance offers honors in the major to encourage talented students to undertake independent and original research as part of the undergraduate experience. For requirements and other information see the “University Honors Office and Honor Societies” chapter of this *General Bulletin*.

**Definition of Prefixes**

**ECP**—Economic Problems and Policy

**FIN**—Finance

**GEB**—General Business

**MAN**—Management

**QMB**—Quantitative Methods in Business

**Undergraduate Courses**

**FIN 3140. Personal Finance (3).** This course is a study of the concepts and processes in planning, analyzing, and controlling personal financial resources. Emphasizes financial planning, cash and credit management, managing expenditures, income and asset protection, investment planning, and retirement and estate planning. For nonbusiness majors only. Credit not allowed for business majors.

**FIN 3244. Financial Markets, Institutions, and International Finance Systems (3).** Prereq: CGS 2518 and ECO 2013. This course focuses on money and capital markets, financial institutions, financial systems, and financial environment including an introduction to investments. Emphasizes the microfinancial decision-making process of the business firm.

**FIN 3403. Financial Management of the Firm (3).** Prereq: CGS 2518 and ECO 2013. This course is an examination of the basic concepts involved in the investment, financing, and dividend decisions of the business firm. Managerial orientation with emphasis on identification, analysis, and solution of financial problems confronting the firm.

**FIN 4324. Commercial Bank Administration (3).** Prereq: CGS 2518, FIN 3244 and FIN 3403 with a grade of “B–” or better. This course focuses on the decisions impacting the short-term cash flows of organizations—public, private, governmental, and non-profit. Topics include: cash management, treasury management, and working capital management.

**FIN 4424. Problems in Financial Management (3).** Prereq: CGS 2518, FIN 3244 and FIN 3403 with a grade of “B–” or better. This course is an introduction to the study of financial management that relates the underlying principles of finance to the decision-making perspective of the financial manager. Selected topics include cash budgeting, working capital management, capital budgeting, risk analysis, valuation, long- and short-term financial decisions, and financial forecasting. Case analyses are included.

**FIN 4453. Financial Modeling and Forecasting (3).** Prereq: CGS 2518 and FIN 3403 with a grade of “B–” or better and QMB 3200. This course is an introduction to financial modeling and forecasting. Emphasis is on computer models and forecasting financial variables.

**FIN 4504. Investments (3).** Prereq: CGS 2518, FIN 3244, and FIN 3403 with a grade of “B–” or better. This course is an examination of investment security analysis. Includes an examination of investment instruments, the investment environment, the concept of risk-return, and the interactive forces between the economy, industries, and individual firms.

**FIN 4514. Security Analysis and Portfolio Management (3).** Prereq: CGS 2518 and FIN 4504. This course is an advanced and comprehensive coverage of investment topics including bond analysis, stock options, interest rate futures, options on futures contracts, portfolio analysis and management, and security market efficiency.

**FIN 4604. Multinational Financial Management (3).** Prereq: CGS 2518, FIN 3244, and FIN 3403 with a grade of “B–” or better. This course introduces the environment of international capital and foreign exchange markets and examines the effects of the international business environment on risk, capital budgeting, working capital management, and capital structure decisions of the firm.

**FIN 4905r. Directed Individual Study (1–3).** This course permits study or exploration into a specialized topic of finance that is not included in one of the other finance courses. It also permits advanced and extensive study of finance topics beyond that included in the other finance courses. The study is conducted with the direct supervision of an individual faculty member. This course may not be used as one of the two required finance electives detailed in the major requirements. May be repeated to a maximum of five times with the requirement that the topic changes each time. Consent of the department chairperson is required.

**FIN 4934r. Senior Seminar in Finance (3).** Prereq: CGS 2518, FIN 3244, and FIN 3403 with a grade of “B–” or better. May be repeated to a maximum of nine semester hours as topics vary. Additional prerequisites may be required depending on the topic.
FIN 4941. Finance Internship (3). (S/U grade only.) Prerequisite: Instructor permission. This internship is designed for College of Business students who desire to gain real-world experience in the finance field through on-the-job practice. Students work under the direction of an approved industry professional, a faculty advisor, and the internship director.

FIN 4970r. Honors Thesis (1–6). Prerequisite: Admission to the honors program. May be repeated to a maximum of nine semester hours. Six semester hours of thesis are required to complete honors in the major.

FIN 4455. Perspectives on Free Enterprise (3). Prerequisites: FIN 3244 and FIN 3403. This course is an examination of the free enterprise system and the associated economic schools of thought. Sponsored by the BB&T Center for Free Enterprise.

GEB 3200. Quantitative Methods for Business Decisions (3). Prerequisites: CGS 2100, MAC 2233, and STA 2023. This course examines classical and modern decision-making techniques based on probabilistic concepts. Emphasizes applications to all areas of business.

Graduate Courses

ECP 5706. Economic Analysis for Management (3).
FIN 5108. Fundamentals of Personal Finance (3).
FIN 5317. Financial Institutions and Risk Management (3).
FIN 5425. Problems in Financial Management (3).
FIN 5515. Investment Management and Analysis (1–4).
FIN 5537. Financial Derivatives and Risk Management (3).
FIN 5605. Multinational Financial Management (3).
FIN 5840. Applied Econometrics in Finance (3).
FIN 5906r. Directed Individual Study (1–3). (S/U grade only.)
FIN 5907r. Special Studies in Management (1–3).
FIN 5917r. Supervised Research (1–3). (S/U grade only.)
FIN 5935r. Seminar on Current Topics in Finance (3).
FIN 5940r. Supervised Teaching (1–3). (S/U grade only.)
FIN 6449. Seminar in Finance (1–3).
FIN 6527. Seminar in Finance – Investments (4).
FIN 6603. Seminar in Finance (1–3).
FIN 6604. Foundations of Financial Theory (3).
FIN 6917r. Supervised Research (1–3). (S/U grade only.)
FIN 6940r. Supervised Teaching (1–3). (S/U grade only.)
GEB 5907r. Special Studies in Business (1–3).
MAN 5716. Business Conditions Analysis (3).

Department of GEOGRAPHY

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY

Web Page: http://www.coss.fsu.edu/geography/
Chair: James Elsner; Professors: Elsner, Horner, Mesev, Yang; Associate Professor: Zhao; Assistant Professors: Folch, Lawhon, Pau, Pierce, Uejio; Affiliate and Adjunct Faculty: Cole, Doel, Miller, Molina, Quinton, Weisman, Winsberg

The Department of Geography offers two separate majors reflecting the discipline’s position straddling the social and natural sciences: the geography major and the environmental studies major. While these programs overlap to some extent, they differ in their substantive focus: the geography major is oriented more towards social and global concerns, using geographic information science (GIS) and spatial statistics, while the environmental studies major revolves more explicitly around human interactions with the natural, physical, and biological worlds, with a stronger interdisciplinary focus. Students may double major in geography and environmental studies; a maximum of eleven semester hours may be double-counted toward both majors.

Several career paths await the graduating geographer and environmental scientist in the public and private sectors. Both bring important knowledge and analytical techniques to resource management and planning agencies. Training in spatial analysis enables geographers and environmentalists to determine where public facilities and infrastructure are best located so that the greatest number of people benefit. These skills are also valued by private firms investing in residential or commercial development; a geographer can pinpoint where investments are likely to yield the best returns, while an environmentalist is concerned with public health and habitat disturbance. Geographers fill such job titles as cartographer, intelligence officer, economic analyst, city and regional planners, housing valuer, transportation officer, local government worker, and welfare officer. On the other hand, environmentalists work as policy analysts and resource conservationists, dealing with issues as wide-ranging as soil pollution, land use changes, river clarity, coastal protection, the weather, waste disposal, and forest and agricultural sustainability. Many institutions use geographic information systems, and consulting firms serving state and local governments are increasingly calling on to provide GIS expertise. The College of Social Sciences and Public Policy has a GIS laboratory with microcomputers running GIS, remote sensing, and statistical software. Finally, an understanding of geographic and environmental differences assists geographers in finding jobs as teachers and instructors.

For a complete education in geography or environmental studies, all students are given the opportunity to take courses that reflect the department’s research strengths including transportation optimization, land use/land cover change, urban growth, population mapping, regionalization and location theory, political ecology, environmental conflict and policy, local economic development, urban sustainability, environmental health, hurricane forecasting, tropical forests and grasslands, coastal and estuarine ecosystems, energy consumption and conservation, and resource management.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in geography and environmental science (GIS) and spatial statistics, while the environmental studies major revolves more explicitly around human interactions with the natural, physical, and biological worlds, with a stronger interdisciplinary focus. Students may double major in geography and environmental studies; a maximum of eleven semester hours may be double-counted toward both majors.

For a complete education in geography or environmental studies, all students are given the opportunity to take courses that reflect the department’s research strengths including transportation optimization, land use/land cover change, urban growth, population mapping, regionalization and location theory, political ecology, environmental conflict and policy, local economic development, urban sustainability, environmental health, hurricane forecasting, tropical forests and grasslands, coastal and estuarine ecosystems, energy consumption and conservation, and resource management.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. GEO XXXX and GEO XXXX: two introductory geography courses (GEO prefix) for a total of six credit hours
Geography Major

Geography is an integrative discipline bridging the social sciences, physical sciences, and humanities in the study of the relations between human beings and the Earth. Within this framework, geographers examine virtually any social/physical issue, such as the linkages between international development and environmental conservation, the opportunities and problems associated with growth in Florida, the impact of hurricanes, transport navigation, consumer profiling, the debt crisis, military targeting, deforestation, conservation, and hunger. In an interdependent world where decisions made in Tokyo or Iowa affect the lives of people in all societies, these issues become more than isolated events and responsible citizens should have a solid foundation in geographic knowledge. Geography is the study of place, or space, in the same sense that history is the study of time. The first question a geographer asks is “Where are things located?” but even more important is “Why are they located where they are?” and “How do we map them?” Geographers are concerned with interpreting and explaining the occurrence, distribution, and interrelationships in the physical and cultural realms. Because of the breadth of its focus, Geography is both a natural science and a social science. Some geographers specialize in environmental issues, including patterns of climate, vegetation, soil, landforms, resources, and hazards and their relations to humans. Economic, social, and political geographers investigate such issues as agricultural land use, settlement patterns, boundary disputes, trade areas of cities, cultural diffusion, perceptions of the environment, labor markets, and international trade. Others focus on mapping these applications using computer software and global positioning systems with ever-improving accuracy and precision.

Major Requirements

A major in geography consists of thirty-four semester hours. All courses must be completed with a grade of “C–” or better.

All of the following core courses are required (nineteen hours)

- **GEA 1000** World Geography
- **GEO 1400** Human Geography
- **GEO 2200C** Physical Geography
- **GEO 4162C** Spatial Data Analysis
- **GIS 3015** Map Analysis
- **GIS 4043** Geographic Information Systems

AND

**GIS 4043L** Geographic Information Systems Lab

Human Geography (three hours) Select one course from the following:

- **GEA 2XXX** Courses numbers 2000 or higher
- **GEO 3502** Economic Geography
- **GEO 4357** Environmental Conflict and Economic Development
- **GEO 4421** Cultural Geography
- **GEO 4450** Medical Geography
- **GEO 4471** Political Geography
- **GEO 4602** Urban Geography
- **GEO 4700** Transport Geography
- **IFS 2029** Dead Cities
- **IFS 2040** Putting Science into Action: Field Methods in Plant Ecology
- **IFS 2077** Great Britain? Geography, Imperialism, Industry, and Culture

Physical Geography (three to four hours) Select one course from the following:

- **GEA 4213** U.S. National Parks
- **GEO 4114** Environmental Field Methods
- **GEO 4210** Landforms and Landscapes
- **GEO 4280** Geography of Water Resources
- **GEO 4300** Biogeography
- **GEO 4376** Landscape Ecology
- **GIS 4035** Introduction to Remote Sensing

AND

**GIS 4035L** Introduction to Remote Sensing Lab

**IFS 2040** Putting Science into Action: Field Methods in Plant Ecology

Environmental Studies Major

Environmental studies is an interdisciplinary program of study that provides an in-depth understanding of the social and institutional context of contemporary environmental concerns, including topics such as ecosystem management, resource conservation, land use planning, natural hazards, and the policy dimensions of environmental issues. The major is highly flexible and allows students to explore a wide variety of classes when choosing how to study how humans interact, control, and live in harmony with nature. It requires forty-one semester hours with a grade of “C–” or better in each course; at least eighteen semester hours must be taken in upper-level (3000- and 4000-level) courses.

Note: Some of the following courses have prerequisites.

I. Basic Core Curriculum: all of the following courses (total fourteen credit hours):

- **BSC 2010** Biological Science I

AND

- **BSC 2010L** Biological Science I Lab
- **CHM 1045** General Chemistry I

AND

- **CHM 1045L** General Chemistry I Lab
- **GEO 1330** Environmental Science (previously GEO 1331)
- **GEO 2200C** Physical Geography (previously GEO 3200C)

II. Natural Science Electives: four courses (total twelve credit hours) from the following list:

- **BOT 3143** Field Botany
- **BSC 2011** Biological Science II
- **BSC 3016** Eukaryotic Diversity
- **BSC 3052** Conservation Biology
- **BSC 3312** Marine Biology
- **BSC 4934** Selected Topics in Applied Biology (subjects vary)
- **CHM 1046** General Chemistry II
- **EES 3040** Introduction to Environmental Engineering Science
- **ENV 4001** Environmental Engineering
- **ENV 4041** Environmental Systems Analysis
- **ENV 4341** Solid and Hazardous Waste Engineering
- **ENV 4405** Water Reuse Engineering
- **ENV 4417C** Applied Environmental Engineering Chemistry
- **GEA 4213** U.S. National Parks

General Geography courses (eight to nine hours)

Students must select additional geography courses (GEA/GEO/GIS) at the 3000/4000 level to bring the total credits in the major to thirty-four; coursework may include a maximum of nine credit hours of GEO 4930, Special Topics classes. A maximum of three credit hours may be used from GEO 4905, DIS 4941, or GEO 4941 Internship.

No credit for geography courses with a grade below “C–” will be applied towards completion of the major.

Minor Coursework: at least twelve hours

Geography majors are required to complete a minor in any departmental or interdisciplinary area of interest approved by the undergraduate advisor. Minors normally range from twelve to eighteen hours.

Minor in Geography

The geography minor consists of fifteen semester hours of coursework in geography from the following choices:

- **GEA 1000** World Geography
- **GEO 1400** Human Geography
- **GEO 1330** Environmental Science

AND

- **GEO 2200C** Physical Geography
- **GEO 4162C** Spatial Data Analysis

AND

- **GIS 3015** Map Analysis
- Any GEA/GEO/GIS 3000 or higher elective

All courses must be completed with a grade of “C–” or better. If the geography minor is combined with the environmental studies major, GEO 1330/ GEO 2200C and one other course (up to six credits total) may count toward both the major and the minor. For more information contact the Department of Geography, or visit the department’s Web site at [http://www.coss.fsu.edu/geo/](http://www.coss.fsu.edu/geo/).

SYA 4300 Methods in Social Research

Minor in Environmental Studies
A minor in environmental studies consists of a minimum of fifteen credit hours, composed of the following:
GEO 1330 Environmental Science
GEO 2200C Physical Geography
One Natural Science Elective (Group II)
One Social Science Elective (Group III)
Three Methods Elective (Group IV)

All courses must be completed with grades of “C-” or better. If an environmental studies minor is combined with a geography major, GEO 2200C and one other course (up to six credits total) may be applied to both the major and the minor.

For more information, contact Department of Geography, or visit the department’s Web site at http://www.coss.fsu.edu/geography/.

Graduate Programs
Graduate programs are available leading to the Master of Arts (MA), the Master of Science (MS), the Applied Master of Science (MS) in GIS, and the Doctor of Philosophy (PhD) in Geography. The graduate programs in geography lead to an applied or a research-oriented degree centered on geographic information science (GIScience), environmental management, or human-environmental interactions.

Undergraduates contemplating a graduate degree in geography should take the Graduate Record Examination prior to submitting an application. Interested students should contact the Graduate Director, Dr. James Elsner, 323 Bellamy, or jelsner@fsu.edu.

Definition of Prefixes
ENC—English Composition
EVR—Environmental Studies
GEA—Geography: Regional Areas
GEO—Geography: Systematic
GIS—Geography: Information Science
IFS—Interdisciplinary Florida State University Courses

Undergraduate Courses
ENC 3466. Writing in Geography (3). This course is intended to develop the writing, analytical, and critical reading skills of students in geography and other social science programs. It focuses on how language conveys information about place and the subject as well as about the speaker; it considers the conscious choices writers make to reach specific audiences.
EVR 4314. Energy and Society (3). Prerequisite: GEO 1330. This course explores the demand and efficient use of energy from fossil fuels and alternate renewable sources, and how energy impacts urban and environmental sustainability.
GEA 1000. World Geography (3). This course is a regional survey of the human occupation of the face of the earth, local cultures, political systems, and development problems.
GEA 2210. United States and Canada (3). This course examines the physical diversity and the cultural and political patterns of North America.
GEA 2270. Florida (3). This course focuses on the physical, social, and economic geography of the state, including growth and environmental issues.
GEA 3173. Third World in Film (3). This course uses weekly feature films to investigate how the Third World is constructed as a distinct region; how its geography has influenced its history, cultural systems, and development prospects; and how residents have attempted to redefine the concept of “development.”
GEO 3563. The Mediterranean (3). This course analyzes the Mediterranean region as a unified totality (southern Europe and North Africa), focusing on historical changes that underpin current geography.
GEO 4213. U.S. National Parks (3). This course reviews the history, social, and environmental significance of America’s national parks.
GEO 4405. Latin America (3). This course focuses on the contemporary Latin American landscape, its historical formation, societies and problems.
GEO 4500. Europe (3). This course focuses on Europe’s terrain, variety of cultures, economies, and recent trends toward unity.
GEO 4520. Britain and Ireland (3). This course examines the physical and human geography of the United Kingdom and Ireland.
GEO 4554. Russia and Southern Eurasia (3). This course explores the peoples, cultures, and places of the former Soviet Union. Discusses the region's natural environment, history, and political and social development.

GEO 4635. Geography of the Middle East (3). This course reviews the history and essential geographic and environmental factors of the Middle East region. The centrifugal and centripetal forces affecting development, culture, religion, ethnicity, and geopolitics.

GEO 1330. Environmental Science (3). This course explores the causes of local and global environmental problems and their impacts, including resource use, pollution, economics, and population growth.

GEO 1400. Human Geography (3). This course is an introductory survey of geographic theories, issues and applications from the human perspective. The course discusses how people interact with each other politically, economically, culturally and socially across distances, scales and within various physical environments. In addition, global contrasts are examined using urban versus rural habitation, local versus transnational trade, and uneven economic development.

GEO 1931r. Colloquium in Social Science and Public Affairs (1). This course provides a venue for discussing key issues and controversies that students are likely to encounter as they pursue a major in one of the social sciences. Students learn critical skills in debating public policy issues while also gaining an appreciation for topics that shape everyday life. Those topics are impacted by social forces, economic dynamics, and governmental decisions around the world. May be repeated to a maximum of three semester hours.

GEO 2200C. Physical Geography (3). This course is an overview of earth-sun relations, weather, climate, landforms, water systems, soils, and vegetation.

GEO 3423. Sports Geography (3). This course focuses on the geographical basis of sports at different spatial scales, including locational strategies of franchises, recruiting patterns, and the urban political economy of professional sports arenas.

GEO 3502. Economic Geography (3). This course examines the geography of economic activity at local, national, and global scales: historical development of capitalism, regional development, spatial structure of agriculture, manufacturing and services, the global economy, economic geography, and population growth.

GEO 4114. Environmental Field Methods (3). This course focuses on the design and implementation of a field-based project employing field sampling, GIS, GPS, and exploratory statistical methods.

GEO 4162C. Spatial Data Analysis (3). This course is an introduction to the quantitative analysis of geographic data that explores clustering, spatial patterns, and intrinsic relationships between geographic variables.

GEO 4210. Landforms and Landscapes (3). This course is on the spatial distribution of geomorphic landforms across landscapes: how they form, how they change over time, how they are designated, and their nomenclature. Emphasis is given to how humans interact with these landforms and how these landforms can impact human habitation.

GEO 4280. Geography of Water Resources (3). This course provides students with a comprehensive understanding of natural water courses and resources. Focus is given to water’s unique properties, how it occurs and moves through Earth’s environment; how it impacts human habitation, and its future as a critical and valuable natural resource. Development of socio-economic concepts of management, supply, use, reclamation, and sustainability are also emphasized.

GEO 4300. Biogeography (3). This course examines the spatial distributions of flora and fauna, ecosystem processes, and human interventions such as logging, invasive species, and wilderness preservation.

GEO 4340. Living in a Hazardous Environment (3). This course explores types of environmental hazards (natural and human-made) and their effects, techniques for the analysis of risks, and strategies for recovering losses.

GEO 4355. Geography: Food and Environment (3). This course explores food production, distribution, and consumption by intensive global agro-food and local organic farming operations, and their impacts on environmental sustainability.

GEO 4357. Environmental Conflict and Economic Development (3). This course examines conflicts over the use, transformation, and destruction of nature, including political ecology.

GEO 4372. Natural Resource Assessment and Analysis (3). This course examines the assessment and analysis of policies concerning natural resources and environmental management in the U.S. and internationally.

GEO 4376. Landscape Ecology (3). Prerequisites: GEO 1330, GEO 2200C, and GIS 4043. This course offers a review of methods on analyzing geographic patterns of natural phenomena, including ecological conservation, natural resource management, landscape and urban planning, as well as human-environmental interactions and implications. Familiarity with software packages such as ArcGIS is assumed.

GEO 4403. Global Change, Local Places (3). This course examines four aspects of global change—economic, environmental, cultural, and political—with a focus on how globalization is impacting individual countries and how places are responding to globalization at the local level.

GEO 4421. Cultural Geography (3). This course studies the processes by which various cultural features have diffused throughout the world. Emphasis is on the contemporary cultural landscape.

GEO 4450. Medical Geography (3). Prerequisite: GEO 1400. This course applies geographical concepts and techniques to health-related problems, including the ecology of health, disease diffusion, medical cartography, and health care access.

GEO 4471. Political Geography (3). This course focuses on the spatial dimensions of political processes from the local to the global level, including elections and geopolitics of the world system.

GEO 4503. Globalization (3). This course explores the concepts and processes that define a world system of commodity production, labor costs, and cultural exchange.
HEALTH–RELATED PROGRAMS

Numerous health-related programs at Florida State University address issues of prevention, treatment, rehabilitation, health sciences, and policy formulation. As part of an effort to develop and promote a coordinated plan for these programs, the following section lists and describes, by program/department, areas of study, services, degrees, and (in some instances) certification opportunities for students. For more detailed information and requirements, see individual program listings in this General Bulletin.

College of Communication and Information

The School of Communication Science and Disorders has a major in speech-language pathology and offers the graduate degrees of Master of Science (MS) and Doctor of Philosophy (PhD). The scope of the School includes the whole of human communication, both normal and disordered. Students learn the total processes of communication, develop analytical and communication skills, and obtain experience in evaluation, treatment, and research. For additional information, please refer to the “School of Communication Science and Disorders” chapter in this General Bulletin, e-mail jennifer.kekelis@cci.fsu.edu, call (850) 644-2253, or visit http://www.commdisorders.cci.fsu.edu/.

The School of Communication Science and Disorders also administers two certificate programs: the Interdepartmental Certificate Program in Developmental Disabilities and the Graduate Prerequisites (Bridge) Program. The purpose of the Certificate Program in Developmental Disabilities is to provide upper-division undergraduate students from a variety of disciplines with knowledge regarding etiology, assessment, treatment, and policy issues related to individuals with developmental disabilities and their families. Students seeking certification must complete nine semester hours of coursework and three semester hours of practicum from an approved list of courses and practica. Courses are available in the following disciplines: art education; communication science and disorders; family and child sciences; middle and secondary education; music education/therapy; nursing; nutrition, food, and exercise sciences; physical education; psychology; and social work.

An additional certificate program, the Communication Science and Disorders Graduate Prerequisite Program was established to increase access to graduate training programs in Speech Language Pathology. Students with undergraduate degrees in other fields must complete coursework represented by this prerequisite program before beginning graduate study in speech-language pathology at Florida State University or many other programs throughout the nation. This program includes the prerequisite content in a series of six courses offered fully online; two courses each semester. Enrollment may occur at the start of any semester. For additional information, please refer to the “School of Communication Science and Disorders” chapter in the Graduate Bulletin or visit http://www.commdisorders.cci.fsu.edu/.

The School of Communication administers an undergraduate certificate in Spanish Medical Interpretation, working with the College of Medicine and the Department of Modern Languages. This certificate program prepares Bilingual Spanish speakers to serve as interpreters in health service settings, including doctor-patient interactions. For more information, visit http://comm.cci.fsu.edu/.

The School of Information administers an undergraduate certificate program in Health Information Technology. The twelve hours of coursework required for this certificate prepare students to be leaders in the Health IT field by strengthening skills in information management, technology integration and implementation, information organization, and information leadership. For more information, visit http://schoool.cci.fsu.edu/.

College of Human Sciences

The Department of Nutrition, Food and Exercise Sciences provides students with a solid foundation in the scientific aspects of nutrition, foods, health-related physical fitness, exercise sciences, and sports sciences through its bachelor, master’s, and doctoral programs. Students are provided with in-depth study of the role that nutrition and physical activity play both in health and, in particular, the prevention of chronic disease. Any of the majors in the department may be used as pre-medical programs with inclusion of specific electives. For more information concerning pre-medical programs, contact the College of Medicine Pre-health Professions Advising Office at medinformation@med.fsu.edu or at (850) 644-5638.

Students pursuing a degree in exercise science combine their study of nutrient metabolism, chemistry, and physiology with courses in exercise physiology and health taught by the department faculty.

The dietetics degree is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) and particularly if followed up by an accredited dietetic internship, it prepares students to apply their expertise in nutrition science and food service management in a variety of employ-

The College of Social Work offers bachelor’s and master’s curricula that prepare professional social workers for practice with individuals, families, groups, and communities. This versatile and nationally accredited degree enables our graduates to work with diverse population groups in a wide variety of settings. The academic design includes both classroom and field instruction. The college also has a doctoral program that develops social work scholars and leaders in research and teaching.

Social workers are employed in mental health centers, schools, hospitals, home health agencies, runaway shelters, protective services, teen pregnancy programs, battered women’s shelters, correctional facilities, family and children’s agencies, private and public organizations, hospices, medical clinics, nursing homes, psychiatric facilities, and veterans’ and military programs.

Opportunities are also available to expand electronic technology skills for use with clients, participate in ongoing research projects, and become involved in community service activities. All of our classrooms are fully connected with the Internet, and both instructors and students use these resources regularly during class sessions. For information, please refer to the “Social Work” chapter in this General Bulletin, e-mail info@csww.fsu.edu, call (800) 378-9550 or (850) 644-4751, or visit http://csww.fsu.edu/

College of Nursing

The College of Nursing offers bachelors, masters, and doctoral degree programs. The mission of the College of Nursing is to develop nursing leaders for professional practice and research in diverse settings. Information regarding undergraduate programs is available from the Office of Student Services at (850) 644-3296. Graduates of the baccalaureate program are prepared for beginning levels of professional practice in a variety of settings. Graduates of the master’s and doctoral programs are prepared for advanced professional positions. For additional information, please refer to the “Nursing” chapter in this General Bulletin, e-mail info@nursing.fsu.edu, call (850) 644-3296, or visit http://nursing.fsu.edu/.

College of Social Sciences and Public Policy

The College of Social Sciences and Public Policy offers the Master of Public Health (MPH) degree. MPH degree graduates will be trained principally as health policy analysts. They will have a rich background in epidemiology, health economics, health behavior, health administration, health policy and policy analysis, and statistical and qualitative analytic skills. Careers are likely to include government agency or legislative staff positions, policy and consulting firms, think tanks, advocacy organizations and lobbying firms, international organizations focused on health and population issues, academic or media positions.

The program offers a combined Bachelor of Science/Master of Public Health (BS/MPH) program that makes it possible for college seniors with a 3.0 or higher GPA to enroll in a limited number of graduate level MPH courses as elective hours toward their bachelor’s degree. These courses may also count toward the MPH degree upon later acceptance and enrollment in the graduate program. For additional information, please refer to the “Public Health” chapter in this General Bulletin, e-mail william.weissert@fsu.edu, call (850) 644-4418, come by 211 Bellamy building, or visit http://www.coss.fsu.edu/publichealth/.

College of Social Work

The College of Social Work offers bachelor’s and master’s curricula that prepare professional social workers for practice with individuals, families, groups, and communities. This versatile and nationally accredited degree enables our graduates to work with diverse population groups in a wide variety
Department of HISTORY

COLLEGE OF ARTS AND SCIENCES

Chair: Gray; Associate Chair (Graduate Studies): Sinke; Associate Chair (Undergraduate Studies): Liebeskind; Professors: Blaufarb, Gellately, Grant, Gray, M. Jones, Junonville, Wynot; Associate Professors: Creswell, Davis, Doel, Frank, Harper, Herrera, Koslow, Liebeskind, Picherl, Sinke, Stoltzfus, Upchurch, Williamson; Assistant Professors: Avina, Culver, Hanley, Mooney, Wood; Professors Emeriti: Anderson, Bartlett, Betten, Bryant, Conner, Garretson, Howard, J. Jones, Keuchel, Moore, Oldson, Richardson, Ripley, Rogers, Rubanowice, Singh, Strait, Turner

History is a liberal discipline that enables students to put their lives in the contemporary world in a broad and meaningful context. It encompasses all aspects of human development chronologically, from ancient times to the present, and topically, in all areas of human interest.

An undergraduate degree in history prepares a student for vocations that require skills in critical thinking and ability in written and oral expression. Combined with certification requirements for social sciences, it can lead to a teaching career in middle or high school. It is an excellent preparation for graduate school or law school and is also desirable for those seeking positions in government or business who require a broad, liberal education rather than technical training.

The department participates in the undergraduate programs in American and Florida studies, Asian studies, humanities, international affairs, Latin American and Caribbean studies, Russian and East European studies, and in the honors in the major program.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in history satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100, or EME 2040.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. AFH XXXX or AMH XXXX or EUH XXXX or WOH XXXX or LAH XXXX or ASH XXXX or HIS XXXX
2. AMH XXXX or EUH XXXX or WOH XXXX or LAH XXXX or AFH XXXX or ASH XXXX or HIS XXXX

Requirements for a Major in History

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Major

Prior to Fall 2012

Thirty-three semester hours, including WOH 1023, 1030; AMH 2010, 2020 (for the application of test credit to the major, see below); and a minimum of twenty-one additional semester hours in history (above 2999) distributed as follows:

1. Six semester hours of American history
2. Six semester hours of European history
3. Six semester hours of Latin American, Asian, African, or Russian history
4. Three semester hours of HIS 4935 Senior Seminar.

Note: Senior seminar is not offered during the Summer terms. Directed individual studies and tutorials may not be counted toward the major.

At least eighteen of the thirty-three required semester hours must be earned at Florida State University.

Fall 2012 and After

Thirty-nine semester hours, including WOH 1023, 1030; AMH 2010, 2020 (for the application of test credit to the major, see below); and a minimum of twenty-seven additional semester hours in history (above 2999) distributed as follows:

1. Six semester hours of American history
2. Six semester hours of European history
3. Six semester hours of Latin American, Asian, African, or Russian history
4. Six additional semester hours of history of any area
5. Three semester hours of HIS 4935 Senior Seminar

Note: Senior seminar is not offered during the Summer terms. Directed individual studies and tutorials may not be counted toward the major.

At least twenty-one of the thirty-nine required semester hours must be earned at Florida State University.

Minor Requirement for History Majors

A minor of twelve semester hours beyond liberal studies requirements in an approved departmental field or fifteen semester hours in an interdepartmental area is required. Individual departments and interdepartmental areas may impose additional requirements. The student should consult the appropriate departmental chapter of this General Bulletin to see if the department has further requirements.

The student may not count toward the major or minor any course in which a grade below “C–” is received. A minimum GPA of 2.0 within both the major and the minor is required.

Double Majors

Students pursuing a double major must meet the program requirements of both majors, with the following exceptions: (1) No more than six semester hours may be overlapped (i.e., counted toward both majors); and (2) no minors are required for the double major.

Test Credit toward the Major (AP, CLEP, IB)

A student who has earned test credit in American history must not take either AMH 2010 or 2020. A student who has earned test credit in European history must not take EUH 2000, WOH 1023, or WOH 1030. Students with three semester hours of test credit in an area will be required to complete the resulting three semester hour shortfall per area toward the major. For information regarding the fulfillment of this policy, please contact the history department advisor.

Honors in the Major

Honors work in the major is offered to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin and the associate chairman for undergraduate studies in history.

Certification in Social Science Education with History Concentration

All undergraduates interested in certification in social science education should take the core courses as part of their liberal studies requirements; therefore, they are urged to consult an advisor in the College of Education as early as possible. Students seeking certification must also apply for admission to teacher education. Application forms are obtained from the College of Education’s office of student services. A student should have and maintain a 2.75 overall GPA in all courses to be eligible.

Requirements for a Minor in History

Twelve semester hours beyond liberal studies requirements in history courses numbered above 2999 are required. A grade of “C–” or better must be earned in each course counted toward the minor. At least six of the twelve semester hours must be earned at Florida State University. Directed individual studies, tutorials, and test credit may not be counted toward the minor.

Definition of Prefixes

AFH—African History
AMH—American History
ASH—Asian History
CLAS—Classical and Ancient Studies
EUAH—European History
HISAH—History and Historiography
IFSA—Interdisciplinary Florida State University Courses
LIAH—Latin American History
SLAL—Slavic Languages
WOH—World History

Note: Courses marked with (*) are not part of the current course rotation.

Undergraduate Courses

Note: History majors must take the sequence of either WOH 1023–1030 or EUH 2000–WOH 1023 (unless they have test credit in European or world history, or transfer credit equivalent to these courses). Similarly, history majors must take the sequence of AMH 1010–AMH 2020 (unless they have examination credit in any U.S. history, or transfer credit equivalent to these courses.) No other history courses below the 3000-level will count toward the history major.

Liberal Studies for the 21st Century: History Courses

Note: In order to fulfill the liberal studies requirement in history, a student must complete a minimum of three semester hours from this list: AMH 2010, AMH 2020, AMH 2091, AMH 2095, AMH 2096, AMH 2097, AMH 2583, ASH 1044, ASH 3100, EUH 2000, EUH 3205, EUH 3350, HIS 2050, HIS 3464, HIS 3491; LAH 1093; WOH 1023, WOH 1030. Each of the courses in the history liberal studies area shall include a substantial writing component, defined as 3,000 words per course.

AMH 2010. A History of the United States to 1877 (3). This course introduces students to the history of British North America and the United States through the era of the Civil War and Reconstruction.

AMH 2020. A History of the United States Since 1877 (3). This course surveys the United States from the end of the Civil War to the present with emphasis on social, economic, and political problems of the 20th century. May not be taken by students with test credit in American history.

AMH 2091. The African-American Experience in the United States (3). This course examines, both chronologically and thematically, the experience of African-Americans in the United States and their role in shaping the nation’s history. The course does not count as credit toward the history major.

AMH 2095. American Indians in the United States (3). This course surveys American-Indian relations with the people and the government of the United States, beginning in the 1760s and continuing to the present. Topics cover the Indians’ diplomatic and military struggles, as well as the Indian perspective on familiar historical events such as the Civil War, the New Deal, and the 1960s.

AMH 2096. Black Women in America (3). This course examines (chronologically and thematically) the unique experience of the African-American woman in the United States and the role they have played in shaping this nation’s history. Particular attention is paid to the double burden that black women have experienced because of their race and gender. This course does not count as credit toward the history major.

AMH 2097. Race, Ethnicity, and Immigration in the United States (3). This course explores the history of immigration to the United States. Topics include the evolution of ethnic cultures and the role of race in adjustment, and related conflicts from colonial times to the present. The course does not count as credit toward the history major.

AMH 2583. The Seminoles and the Southeastern Indians (3). This course explores the history of the Seminoles and other southeastern Native Americans in the territory that is now known as the American South. The course covers the pre-contract era to the present with emphasis on tribal perspectives.

ASH 1044. Middle Eastern History and Civilization (3). This introductory course is on Middle Eastern history and culture with a considerable emphasis on the impact of religion: Christianity, Judaism, and Islam. The primary emphasis of the course is to understand the historical and cultural background of the major problems facing the Middle East today. The course does not count as credit toward the history major.

ASH 3100. History of Asia (3). This course is an introduction to political, cultural, and economic Asian history from antiquity to the present. It places special emphasis not only on the study of important Asian kings and leaders but also on the various religions that originated in Asia.

EUH 2000. Ancient and Medieval Civilizations (3). This course provides a survey of Western traditions from the beginnings through the end of the Middle Ages. Emphasis is on patterns of thinking and on those institutions most distinctive for the Western tradition. Students who have previous college credit in Western civilization courses covering the same general chronological period cannot receive credit for EUH 2000. May not be taken by students with test credit in European history.

EUH 3205. 19th-Century Europe: A Survey (3). This course focuses on the history of Europe from the close of the Napoleonic Wars to the turn of the century, a period in which Europe was at the height of its wealth and power. Particular attention is paid to the major powers.

EUAH 3350. England, the Empire and the Commonwealth (3). This course offers a history of the expansion of the British Empire and its evolution into the Commonwealth from the end of the eighteenth century to the present. It examines the complex set of societies, governing structures, economic systems, and geographic locations encompassed by British overseas expansion.

HIS 2050. The Historian’s Craft (3). In this course, students learn how to conduct primary source historical research, and turn their research findings into a high-quality paper based on professional history standards.

HIS 3491. Medicine and Society (3). This course examines the development of public health and the history of medicine in the United States from the colonial period to the present. Topics cover changes in medical knowledge, the medical profession, government responsibilities, and public responses; how individuals accept, modify, or reject medical authority; how race, class, gender, and ethnicity shape health practices and the delivery of medical care; how the health of a community can be protected; and what constitutes a public health hazard.

LAH 1093. Latin America: A Cross-Cultural History (3). This course is a cross-cultural history of Latin America focusing on women, Native Americans, African-Americans, mestizos, and mulattoes in historical context. The course does not count as credit toward the history major.

WOH 1023. The Modern World to 1815 (3). This liberal studies course deals with the origins and development of political, economic, social, and intellectual antecedents of the modern world from the end of the Middle Ages to 1815. Students who have previous college credit in Western civilization courses covering the same general chronological period cannot receive credit for WOH 1023. May not be taken by students with test credit in European history.

WOH 1030. The Modern World Since 1815 (3). This liberal studies course deals with the origins and development of political, economic, social, and intellectual antecedents of the modern world since 1815. Students who have previous college credit in Western civilization courses covering the same general chronological period cannot receive credit for WOH 1030. May not be taken by students with test credit in European history.

African History

*AFH 1000. African History and Civilization (3). This introductory course for African history and civilization covers the broad sweep of African history and culture. The primary emphasis is to understand the background to some of Africa’s major problems and possibilities today. The course does not count as credit toward the history major.

*AFH 3451. Sub-Saharan Africa Since 1800 (3). This course offers a history of Sub-Saharan Africa since 1800, in an effort to provide an understanding of the background and problems some of the African states today.

*AFH 4302. North African History: A Survey (3). This course concentrates on the modern history of North Africa including: Maghreb, Morocco, Algeria, Tunisia, Libya, Egypt, Sudan, Ethiopia, and Somalia. It is intended to provide an understanding of the background and problems of North African states today.

American History

AMH 2583. History of the Seminole and Southeastern Tribes, Pre-Contact to Present (3). This course presents a history of the Seminole tribe in the changing racial, ethnic, economic, political, and cultural context of the Southeastern United States from the fifteenth century to present.

AMH 3310. Social History of the United States (3). This course offers an analysis of the day-to-day lives of American people. Topics include morals, manners, religion, family, social class, health, and occupational status.

*AMH 3319. The Evolution of Law, Crime, and Justice in American Society, to 1876 (3). This course offers an intermediate level survey of the social and political developments in the fields of law and criminality, from the colonial era through Reconstruction. The course focuses upon social problems, criminal behavior, punishments, changing definitions of citizenship, and the Constitution.

AMH 3351. U.S. Political History to 1877 (3). This course covers the colonial and revolutionary background of U.S. politics. Topics cover U.S. political parties and elections from the 1790s to 1877, emphasizing the presidency and the groups and issues that have influenced political parties.

AMH 3352. U.S. Political History from 1877 to the Present (3). This course studies U.S. political parties and elections from the end of Reconstruction to the present. Special emphasis is placed on the presidency and on the groups and issues that have influenced political parties. AMH 3351 is a prerequisite for 3352.

*AMH 3444. History of the Trans-Mississippi American West (3). This course covers the history of the Trans-Mississippi West during the nineteenth century. Students are expected to develop an understanding of this area as a geographical region and its role in American history beginning with the early nineteenth century explorations and culminating with the symbolic “closing of the frontier” of the 1890s.

AMH 3470. The Evolution of Organized Crime (3). This course discusses the evolution of organized crime in the United States, the social and legal factors that contributed to its development, and the ethnic groups involved.

*AMH 3472. Evolution of Law, Crime, and Justice in American Society: 1865 to the Present (3). This course serves as an intermediate level survey of the social and political developments in the fields of crime and law from the end of the Civil War to the present. Its focus is on the changing definitions of criminal behavior, regional patterns of crime, the changing nature of punishment, and Constitutional issues relating to crime.
AMH 3540. Military History of the United States (3). This course is a survey of both the military experiences and issues in American history. The course analyzes war, its economic and political costs, developments in military strategy, technology, law, and society, and other factors that have influenced the military aspects of American history.

*AMH 3544. The United States and Vietnam, 1941–1975 (3). This course examines the involvement of the United States in Vietnam from World War II through the fall of Saigon in 1975 and considers the legacy of this experience for American foreign relations and society.

AMH 3300r. Studies in U.S. History (3). This course includes examination of a special topic related to U.S. history. Topics vary. The course may be repeated as topics vary to a maximum of nine semester hours.

AMH 4110. Colonial America to 1763 (3). This course studies and compares the founding and development of the English colonies in North America.

AMH 4130. Revolutionary America, 1769-1788 (3). This course examines the political, social, and economic development of America from the end of the Seven Years War to the ratification of the U.S. Constitution. Emphasis is placed on the origins, cause, and aftermath of the colonial rebellion that became the American Revolution and led to the founding of the U.S. The course considers the fundamental causes of the Revolution and the many ways in which the former colonies were transformed by the experience.

AMH 4172. The Civil War Era (3). This course offers an in-depth study of the twenty years from 1845 to 1865. Emphasis is placed on the coming of the Civil War, the secession crisis, and on both the military and nonmilitary events of the war years.

AMH 4173. Post–Civil War America, 1865–1890 (3). This course analyzes post–Civil War America with emphasis on the black role in American society and the attempt to heal the wounds of the Civil War. Topics include the rise of big business, labor unions, and the last frontier.

AMH 4220. U.S. Progressive Era, 1890–1920 (3). This course includes a study of the development of domestic and foreign policy, the revolution of social thought, and the paradoxical path of reform in urbanized, industrial America. Emphasis is placed on the nation’s effort to accommodate old values with the new realities.

AMH 4231. The United States, 1920–1945: Prosperity, Depression, and World War II (3). This course offers an overview of U.S. history from 1920 through 1945. Topics include political, economic, diplomatic, military, social, and cultural and intellectual developments during that period.

AMH 4270. The United States Since 1945 (3). This course focuses on the political and cultural issues faced by the United States during the period of the Cold War (1945 to 1988). Special attention is given to postwar affluence, suburban America, the mass society, the movement from isolationism to internationalism, McCarthyism, the civil rights movement, social conflict in the 1960s, and the rise of postwar conservatism.

AMH 4273. America in the 1980s (3). This course examines selective aspects of the era known as “the decade of decadence.” It starts in 1984 with the decision to integrate America’s schools as a flash point for the civil rights struggle, and it concludes in 1974 with Richard Nixon’s resignation, the final statement in the Watergate affair. During those years of intense and accelerated change, civil rights, black power, the war in Vietnam, radical politics, and the counter culture divided the country so passionately that at times it appeared as though the nation might come apart.

*AMH 4331. U.S. Intellectual History I: Beginning to 1880 (3). This course offers an interdisciplinary study of American thought from the Puritans to the late 19th century, asking, among other questions, what mission America assigned to itself. Topics include Puritanism, the Revolutionary ideology, federalism, the American Enlightenment, romanticism, individualism, and manifest destiny.

*AMH 4332. U.S. Intellectual History II: 1880 to the Present (3). This course offers an interdisciplinary study of the impact on American thought of social Darwinism, industrialism, naturalism, the culture of consumption, radicalism, anti-communism, post-industrialism, and affluence. Examines the growth of cultural criticism as a task required of the 20th-century intellectual.

AMH 4402. The Old South (3). This course offers a study of the social and economic development of the Southern states from settlement by Europeans to the end of the Civil War with emphasis on the rise of the Cotton Kingdom and the causes of secession.

AMH 4403. The South Since 1865 (3). This course views the South both as a distinct region and as an area gradually coming back into “regular” American life after the Civil War. The unique problems of adjusting to defeat, the revolution in the labor system, and troubled race relations are considered.

AMH 4420. The History of Florida (3). This course is an online course that explores the history of Florida from its pre-Columbian origins to the present.

AMH 4423. History of Florida from 1821 to the Present (3). This course covers the history of Florida from the period of its acquisition from Spain in 1821 until the present. The course offers an overview of the history of the state’s past are discussed with special attention given to the period 1920 to the present.

*AMH 4511. Twentieth-Century United States Foreign Relations (3). This course covers the responsibilities of global power and how American foreign policy changed to meet rapidly altering circumstances.

AMH 4530. U.S. Immigration History (3). This course explores the histories of different immigrant and migrant groups and how they have shaped and been shaped by the United States.

*AMH 4553. American Legal History II (3). This course surveys the history of both the U.S. Constitution and American law in the nineteenth century. Topics include the California Gold Rush, the Dred Scott decision, the impact of the Civil War and Reconstruction on the law, and the effects of industrialization on American law. The course is not about constitutional interpretation or theories applied by the current Supreme Court.

AMH 4554. American Legal History II (3). This course surveys the history of both the U.S. Constitution and American law in the nineteenth century. Topics include the California Gold Rush, the Dred Scott decision, the impact of the Civil War and Reconstruction on the law, and the effects of industrialization on American law. The course is not about constitutional interpretation or theories applied by the current Supreme Court.

AMH 4561. Women in 19th-Century America (3). This course examines the experiences of women in nineteenth-century America, focusing upon the ways gender, race, ethnicity, class, religion, and region interacted to shape women’s lives. Examines women’s family, work, social, and political roles. Also examines women’s contributions and quest for equality.

AMH 4562. Women in Modern America (3). This course examines the experiences and contributions of women in twentieth-century America, with particular attention to the forces that served to differentiate the opportunities and roles of women from those of their male peers.

AMH 4571. Black America to 1877 (3). This course begins with the African background of Black Americans and ends with the final curtailment of Reconstruction in 1877. Although some portions of the course are topical, cutting across chronological divisions, there is a general chronological progression from colonial times to the end of Reconstruction.

AMH 4572. Black America Since 1877 (3). This course traces the social, economic, cultural, and political activities of African-Americans from Reconstruction through the Civil Rights Movement.

AMH 4585. History of the Seminole Indians (3). This course offers an ethnohistory of the Seminole Indians in Florida from prior to their formation, in the eighteenth century, to present. The course focuses on the Indians themselves and their experiences, exposing students to the history of the Seminole’s culture, lifestyles, religions, economy, and their American political life.

AMH 4630. North American Environmental History (3). This course introduces the changing relationships between human beings and the natural world in America through time.

AMH 4633. The Nature of Florida (3). This course is an online course that applies the methods and approaches of environmental history to Florida and the southeastern United States.

AMH 4634. Florida Environmental History (3). This course applies the methods and approaches of environmental history to Florida, considering the changing relationships between human beings and the natural world through time. The field explores how nature has helped to shape culture as well as how humans have modified the natural world and transformed the land.

*AMH 4640. Humor and the American Mind (3). This course discusses American intellectual and cultural history from the eighteenth-century to the present, through the lens of humor. It investigates the relationship between American ideas and historical transformations. It uses humor to explore the connections and tensions between the various parts of the American mind.

Asian History

ASH 3230r. Middle East Survey: An Interdisciplinary and Introductory Course (3–6). This seminar examines regional studies methodology by introducing a dozen examples of a domain of Middle Eastern studies (for example, cities, biographies, countries, sect, dialogues, using a variety of lecturers and approaches. Students a) become familiar with the parties to the conflict of the history of the Middle Eastern domain, in this way learning something of the diversity of the region, b) encounter a variety of approaches to the study of the region, and c) develop deep knowledge of one instance, which they study over the course of the semester. May be repeated to a maximum of six semester hours.

ASH 3382. The History of the U.S. and East Asia: 1850 to the Present (3). This course covers the history of the United States and modern East Asia from the mid-nineteenth century to the present, covering political interactions and cultural encounters between Americans and Japanese, Koreans, and Chinese.

ASH 3390r. Studies in Asian History (3). This course includes examination of a specific topic related to Asian history. Topics vary. The course may be repeated as topics vary to a maximum of nine semester hours.

ASH 4223. Modern Middle East (3). This course is an examination of modern Middle Eastern history, focusing on the origins of recent problems in the imperialistic era, the clash of political and cultural traditions, national rivalries, the impact of OPEC, the Palestinians, and the Iranian Revolution.

ASH 4261. Central Asia (3). This course covers Central Asian history through the modern period, with special emphasis on the political and ethnic histories of the Central Asian peoples.

*ASH 4520. Traditional India (3). This course deals with the history of India from antiquity to the 17th century. It puts special emphasis not only on the study of Indian religions such as Hinduism, Buddhism, Jainism, and Sikhism, but also on the roles played by various important ancient and medieval kings.

ASH 4550. Modern India (3). This course is an introduction to the history of India from the 18th century to the present. It deals in depth with the impact of British rule on India and the lives of modern South Asian leaders like Gandhi, Nehru, and Jinnah.

Classical History

Note: The following history courses are offered through the Department of Classics.

ASH 3200. History of the Ancient Near East (3). This course is a survey of the Near East—Anatolia, Mesopotamia, Egypt, the Holy Land—in the ancient period.
CLA 4437r. Studies in Greek History (3). This course focuses on specified periods of Greek history, whether archaic, classical, or Hellenistic. May be repeated to a maximum of six semester hours.

CLA 4447r. Studies in Roman History (3). This course focuses on specified periods of Roman history in the Republic or Empire. May be repeated to a maximum of six semester hours.

EUH 4401. Classical Athens and Sparta (3). This course examines the history of Greece from the beginning to Alexander the Great. Emphasis on the social and political structures of Sparta and Athens.

EUH 4408. The Age of Alexander the Great (3). This course is a study of the Greek world from the death of Socrates (399 B.C.) to the Roman conquest (146 B.C., the sack of Corinth by Mummiaus).

EUH 4412. The Roman Republic (3). This course is a study of the history of Rome from its foundation (traditionally 753 B.C.) to the fall of the Roman Republic (31 B.C., The Battle of Actium).

EUH 4413. The Roman Empire (3). This course focuses on the Roman Empire from Augustus to Constantine. Emphasis on the evolution from the principate of the early empire to the monarchy of the late empire.

European History

EUH 3205. 19th-Century Europe (3). This course is an introduction to key themes and problems in the social, political, and cultural history of Europe from the era of the French Revolution to the outbreak of World War I. Although this is an upper-level course, no prior background in European history is required.

EUH 3206. 20th-Century Europe: A Survey (3). This course covers European history from the turn of the century through the two world wars. Particular attention is paid to the major powers in this period when Europe declined from its preeminent position.

EUH 3293. Twentieth-Century Europe Through Film (3). This course uses film in combination with texts to introduce the major themes and trends in 20th-century European history. The course uses film to explore the relationship between modernity and 20th-century Europe, particularly the changing relationship of individuals to state and society, and attitudes about ethnicity, class, and gender. Topics include the possibilities and limitations of the individual in mass society, paying particular attention to themes of heroism, despotism, war, and lifestyle values.

*EUH 3431. Modern Italy (3). This course traces the development of Italy from the Enlightenment to the present. Discussions concentrate on the major social, political, and intellectual currents, centering on the unification movement, the crisis of the Liberal State, and Fascism.

EUH 3461. German History, 1740–1918 (3). This course examines the political, social, and cultural history of the German lands from the age of Enlightenment to the end of World War I. It emphasizes the impact of war and revolution on the process of nation-building and the persistence of political, social, and religious conflict after the foundation of the German Empire under Bismarck.

*EUH 3501. The Making of Modern England (3). This course is a rapid survey of English history from Anglo-Saxon times to 1783. The lectures emphasize the constitutional and legal aspects of English history, while the readings cover broadly cultural and social aspects as well.

EUH 3530. England, the Empire and the Commonwealth (3). This course offers a history of Great Britain and the Empire/Commonwealth since 1783 and developments within the Commonwealth itself. Some consideration is given to post–World War II changes within Britain and to Britain’s foreign affairs.

*EUH 3533. History of Ireland (3). This course surveys the history of Ireland from prehistory and the Celtic-Gaelic settlement to the near-present. Examines the waves of settlers who have populated this island over the centuries, and the problem of defining the Irish (i.e., the roles of religion and ethnicity). It cannot avoid treating in depth the tangled and tragic relations of the Irish with the kingdoms of England, later Great Britain.

*EUH 3551. Modern Poland (3). This course examines the social, economic, and cultural as well as political development of the Polish nation in the 19th and 20th centuries. Although particular stress is placed on internal history, appropriate attention is focused on Poland’s role in international relations.

EUH 3571. Russia to Nicholas I (3). This course explores Russian history from the emergence of the Muscovite state through the establishment of the Romanov dynasty, to the final years of Tsar Nicholas I to the present day. Although particular stress is placed on Russian history, appropriate attention is focused on Russia’s role in international relations.

EUH 3572. History of Russia, 1825 to the Present (3). This course examines the social, economic, and cultural as well as the political development of Russia from the reign of Tsar Nicholas I to the present day. Although particular stress is on internal history, appropriate attention is paid to Russia’s role in international relations.

EUH 3930r. Studies in European History (3). This course includes examination of a specialized topic related to European history. Topics vary. The course may be repeated as topics vary, for a maximum of four semester hours.

*EUH 4121. Earlier Middle Ages (3). This course provides a survey of European history from c. 300 to c. 1150, from the origins of the medieval world in the Roman, Christian, and Germanic past through the gradual emergence of a distinctively European civilization to its first major period of expansion and accomplishment.

*EUH 4122. Later Middle Ages (3). This course provides a survey of European history from c. 1150 to c. 1500, from the height of medieval civilization in Europe through the crises of the late Middle Ages to the recovery leading to a new age.

*EUH 4124. The Crusades (3). This course provides a historical understanding of the material and spiritual basis for the reentry of Western Christendom into the Mediterranean world. It covers the organization, financing, and participation in Crusades and the impact this had on European institutions and thought; and the interrelations of Christians (East and West) and the Muslim world in the period of the Crusades.

*EUH 4140. Renaissance (3). This course is a study of the character of medieval Italy and a survey of economic, political, and cultural changes in Western Europe.

*EUH 4144. Reformation (3). This course is an examination of the Protestant and Catholic Reformation in Europe from Martin Luther to the Peace of Westphalia in 1648.

*EUH 4233. Rise of Nationalism (3). This course analyzes the European struggle toward democracy and nationalism from the collapse of Napoleon to the establishment of the German Empire, emphasizing the development of liberalism, socialism, communism, etc.

EUH 4241. The Holocaust in Historical Perspective (3). This course details the background and career of the Holocaust as well as the continuing problem of “Holocaust denial.” Special emphasis is given to the ideas of such racists as de Gobineau and Hitler.

EUH 4252. World War I: Europe, 1910–1918 (3). This course covers European history in the period 1910-1918 with a review of the domestic situation and foreign policy of the major Continental powers. It includes an analysis of the origins of the war, how and why the war was fought as it was, and the experience of the major powers on the home front.

*EUH 4282. Europe Since 1945 (3). This course focuses on the post–World War II era in Europe, tracing occupation policies, the division of Europe East and West, the development of the major European states, and the efforts to arrive at detente in respect to East-West tensions.

EUH 4331. East Central Europe, 1815 to Present (3). This course examines the socio-culture, economic, and political development of the countries of the region known as East Central Europe, including Poland, Hungary, Czechoslovakia, and the Baltic States from the Congress of Vienna to the present. Wherever possible, attempts are made to present issues within a comparative framework.

EUH 4332. Balkans Since 1700 (3). This course on Balkan history emphasizes the political, economic, and cultural history of the countries of the Balkans and the emergence of the Balkan states after the wars of liberation, with stress on the cultural peculiarities of the various ethnic groups.

EUH 4452. The Age of the French Revolution, 1715–1795 (3). This course is a study of the 18th century and its transformation by the forces unleashed by the French Revolution. The realization of the Revolution is traced to the Terror and the overthrow of Robespierre’s dictatorship.

EUH 4454. Napoleon – Europe, 1795–1815 (3). This course traces the rise of Napoleon and his impact—political, social, economic, military, etc.—on France and Europe, culminating in his defeat at Waterloo.

EUH 4465. Weimar and Nazi Germany (3). This course examines the background and course of WWI in its European context. Also examined is National Socialism’s impact on German institutions and racial consequences.

EUH 4502. England Since 1870 (3). This course explores the history of Great Britain (since 1870) from a great world power to a European Common Market member. Economic, diplomatic, imperial, social, and political affairs are considered.

EUH 4515. Stuart England (3). This course covers the history of England from the reign of James I to the death of Queen Anne in 1714. Scottish history is covered as well, and due attention is given to Irish history and to such areas as the arts, literature, and political theory.

EUH 4520. England, 1714–1870 (3). This course investigates the social, cultural, and political history of Great Britain from 1714 to approximately 1870. Major themes include an exploration of the Industrial Revolution and its consequences, the rise of labor movements, and the changing role of the state. Special attention is given to the period of the Russian Revolution, the rise of trade unionism, and the changing role of the state.

EUH 4544. Sex and Class in England, 1750–1914 (3). This course offers students a perspective on the critical relations between class and gender in industrializing England, 1750–1914. Examines the lives and activities of English women, from the poorest to the wealthiest classes, against the background of the major dislocations occurring during this period.

EUH 4574. 19th-Century Russia (3). This course is an examination of the history of Russia from 1801 to the beginning of the 20th century, with emphasis on foreign relations and the development of the political and social conflicts that resulted in the revolution of 1917.

EUH 4576. 20th-Century Russia (3). This course examines the social, economic, cultural, and international, as well as political, development of Russia from the final years of Tsarist rule through the Bolshevik Revolution to its emergence as one of the world’s superpowers in the 1990s.

*EUH 4602. European Intellectual History, 1500–1800 (3). This course explores the history of ideas documenting transition from “Medieval Mind” to “Modern Mind,” including the impact of four Renaissances, Protestant Reformation, Scientific Revolution, and Age of Enlightenment. Interdisciplinary approach includes philosophy, literature, art, political theory, science, economic thought, religion, and music.

*EUH 4603. European Intellectual History, 1800 to Present (3). This course explores the history of ideas documenting transition from “Medieval Mind” to “Modern Mind,” including the impact of four Renaissances, Protestant Reformation, Scientific Revolution, and Age of Enlightenment. Interdisciplinary approach includes philosophy, literature, art, political theory, science, economic thought, religion, and music.

His 4250. War and the Nation State (3). This course examines the phenomenon of war in its broader social-political-economic context from a historical and comparative perspective.
HIS 4260. War and Society in the Age of Revolution (3). This course offers an overview of the interaction between economic, social, change, and political transformation during the Age of Revolutions (1750-1850) in the Atlantic World.

SLL 3500. Slavic Culture and Civilization (3). This course examines the Slavic peoples, their cultures and traditions, from prehistory to present day. The nations profiled are Ukraine, Czech Republic, Poland, Croatia, Bosnia, and Serbia. Novels and film give students a perspective from the “inside.” Taught in English.

*WOH 4222. The Worlds of Captain Cook (3). This course explores the social and cultural worlds of the 18th-century British navigator James Cook. Specifically, the course explores the places where Cook went, the social world of the British Navy, the ethnohistorical dynamics of British-Native interactions in the Pacific, as well as Cook’s legacy for the British and for the peoples of the Pacific.

Historical Administration

HIS 4065. Public History Theory and Methods (3). This course offers an overview of the different specialties of public history, the historic preservation movement in the US, archives, history museums, oral history, commemoration, and the use of new media for public presentations of history.

HIS 4184. Digital History (3). This course examines the theory and practice of the ways in which history is collected, preserved, and interpreted using digital mediums.

Latin American History

*LAH 3411. History of Mexico, Central America, and the Caribbean (3). This course covers the history of Mexico, Central America, and the Caribbean nations of Cuba, Dominican Republic, Haiti, and Puerto Rico from the Indian civilizations of the remote past to the social conflicts of the present.

*LAH 3456. History of Panama Since 1940 (3). This course covers the history of Panama from 1940 to the present. Emphasizes the impact of WWII, politics, social change, and democracy in Panama.

LAH 3500. History of South America (3). This course is an introductory survey from the Inca Civilization to modern Chile, Peru, Argentina, etc. Emphasis is placed on the contrasts and conflicts between Indian and European culture and on basic social, economic, and political evolution. The persistence of “underdevelopment” and poverty are also explored.

LAH 3734. Latin American History Through Film (3). This course is an introduction to Latin American history through films. Analysis of how Latin Americans are portrayed in international and national cinema. Integration of television and literature to illustrate the impact of mass media on Latin Americans.

LAH 3930r. Studies in Latin American History (3). This course includes examination of a special topic related to Latin American history. Topics vary. The course may be repeated as topics vary to a maximum of nine semester hours.

LAH 4430. History of Mexico (3). This course covers the history of Mexico from the great Indian empires to the present, emphasizing the 19th and 20th centuries. Deals with cultural and social history as well as political movements.

*LAH 4470. History of the Caribbean (3). This course focuses on Cuba, Puerto Rico, and other Caribbean societies. European and United States colonialism and local Caribbean forces are help to understand the area’s social, economic, and political problems and prospects.

LAH 4600. History of Brazil (3). This course focuses on Latin America’s largest and most populous nation. Themes include the evolution of Brazil’s multi-ethnic society, the struggle for economic development, and the search for a viable political regime.

LAH 4723. Race and Class in Colonial Latin America (3). This course is a comprehensive examination of Latin America from 1492 to 1830, with emphasis on native and African reactions to colonial rule and the creation and growth of multi-ethnic groups and their solidification into classes.

LAH 4748. Social Revolutionary Movements in Latin America (3). This course is a thematic coverage of the history of social revolutionary movements in Latin America, using specific case studies drawn from, among others, the Mexican, Bolivian, and Cuban revolutions.

Others

HIS 3464. History of Science (3). This course is a study of the mutually-shaping relationships between social and political ideas and the histories of the various sciences.

HIS 3505. Perspectives on Science and Mathematics (3). This course examines the interrelationship between science, mathematics, and society from the time of the Babylonians to the present day, and how these lessons related to placing the secondary math and science curriculum into historical context.

HIS 3949r. Cooperative Education Work Experience (0). (SU/G grade only.) This course does not count as credit toward the history major.

*HIS 4070. Oral History (3). This course exposes students to the use of oral history as a research technique and provides experience in conducting professionally acceptable oral history interviews. The course does not count as credit toward the history major.

HIS 4080. Archiving History (3). This course examines the nature of archives; various types of records; arranging and processing archives; restoring and protecting records; archival institutions, policies, and procedures. The course does not count as credit toward the history major.

HIS 4081. Museum Management (3). This course examines the history and philosophy of museums, especially historical museums; organization and operation; planning exhibits; educational activities; and public relations. The course does not count as credit toward the history major.

HIS 4086. Preserving Historic Sites and Spaces (3). This course focuses on the identification, preservation, and maintenance of historic sites; the historic preservation movement; and the role of the public in the process.

HIS 4906r. Directed Individual Study (1–4). May be repeated to a maximum of twelve semester hours. This course does not count as credit toward the history major or minor.

HIS 4930r. Special Topics in History (3). This course includes specialized approaches to history. Topics vary. The course may be repeated for different topics to a maximum of twenty-four semester hours.

HIS 4931r. Tutorial in History (1–2). Prerequisites: Senior history majors or minors status and instructor permission. This course covers selected topics in history. A maximum enrollment of five students in each tutorial. May be repeated only once and to a maximum of four semester hours. The course does not count as credit toward the history major or minor.

HIS 4835. Senior Seminar (3). This course is an advanced training in historical methodology and historiography. The historical material varies from seminar to seminar depending upon the instructor’s area of expertise.

IFS 2010. The American GI in War and Peace in World War II (3). This course examines the social history of the American GI in World War II. It considers who served in the American military, why they fought and cope with the experience of total war. Special attention is given to the religious experiences of the GI at war and issues of race, ethnicity, and gender.

IFS 2011. Empire and Revolution in Cold War Latin America (3). This course is designed to familiarize students with the history, current state of research, and continued relevance of what historian Greg Grandin terms as Latin America “long Cold War”; that is, the political, social, and economic history of Latin America after World War II. This special topic course in special topics encourages students to critically explore and engage the intimate connections between the local, national, and transnational manifestations of the Cold War in Latin America.

IFS 2026. Environment and Society (3). This interdisciplinary course in environmental history explores numerous diverse perspectives of the environment: history, ethics, politics, and science. The course asks, “What is the relationship between humans and the natural world?” and explores how nature has helped to shape culture as well as how humans have modified the natural world and transformed the land in the process of extracting resources, building structures, producing pollution, and importing exotic species.

IFS 2042. Fight the Power: Protest with Song in America: 20th Century versus 21st Century (3). This course uses the historical method to discuss major protest movements of the 20th and 21st centuries in United States and delves into the question of how protest through song has changed during the 20th century and how it is used today.

IFS 2045. Making Chief Osceola (3). This course uses the historical method to answer a simple question: Why do Americans and Floridians remember Osceola as the leader of Seminole resistance rather than any of the other more prominent, powerful, and successful leaders from the three Seminole Wars? In addition to introducing new historical approaches to Native American history, this course also asks how historical truths and myths are created, sustained, and ultimately embraced. In the process, the course facilitates critical engagement with the living legacies of Indian Removal.

IFS 3093. Terrorism in Historical Perspective (3). This course examines the history of terrorism as both an idea and a political strategy, with particular focus on the nineteenth and twentieth centuries. It emphasizes the need for understanding terrorism and related forms of political violence within a systematic framework that takes into account the roles of anti-terrorist policies, police activities, and political debate in shaping not only the public perception of terrorism but also the self-perception of those who would adopt it as a tactic.

WOH 3228. Business and Globalization in World History (3). This course familiarizes the student with the role of business and economics in shaping modern world history since 1500. It explores the themes of commerce, culture, and economic competition. Among the themes covered are industrialization and the development of the global economy, economic imperialism, the rise and spread of big business, and the emergence of Multinational Corporations. The course is oriented toward comparative approaches to these topics as they pertain to the various regions and countries around the world.

WOH 3930r. Studies in World History (3). This course includes examination of a special topic related to world history. Topics vary. The course may be repeated as topics vary to a maximum of nine semester hours.

WOH 4235. Disease, Race, and Environment (3). This course examines the close relationship between disease, race, and environment in the development of civilizations of the world.

WOH 4244. World War II (3). This course deals with World War II on a global basis while avoiding the common Eurocentric approach. It also analyzes the character of the Pacific theater as well as that of the European war, presenting the student with insights into and contrasts between the various belligerents.

Graduate Courses

African History

*AFH 5308. Northern African History (3).

American History

AMH 5116. Colonial American History to 1763 (3).
AMH 5139. Revolutionary America, 1760-1788 (3).
AMH 5177. The Civil War Era (3).
AMH 5278. The United States Since 1945 (3).
*AMH 5336. U.S. Intellectual History I: Beginning to 1880 (3).
*AMH 5404. The Old South (3).
AMH 5518. Twentieth-Century United States Foreign Relations (3).
*AMH 5555. American Legal History I (3).
*AMH 5556. American Legal History II (3).
AMH 5567. Women in 19th-Century America (3).
AMH 5576. Black America since 1877 (3).
AMH 5577. Black America Since 1877 (3).
AMH 5589. History of the Seminole Indians (3).
AMH 5635. Florida Environmental History (3).
AMH 5637. The Nature of Florida (3).
*AMH 5645. Humor and the American Mind (3).

Asian History
ASH 5226. Modern Middle East (3).
ASH 5266. Central Asia Since the Mongols (3).
*ASH 5529. Traditional India (3).

Classical History
CLA 5438r. Studies in Greek History (3).
CLA 5448r. Studies in Roman History (3).

European History
EUH 5125. The Crusades (3).
*EUH 5127. Earlier Middle Ages (3).
*EUH 5128. Later Middle Ages (3).
*EUH 5146. The Renaissance (3).
*EUH 5147. The Reformation (3).
*EUH 5238. Rise of Nationalism (3).
EUH 5246. World War I: Europe, 1900–1918 (3).
EUH 5249. The Holocaust in Historical Perspective (3).
*EUH 5285. Europe Since 1945 (3).
EUH 5338. History of East Central Europe, 1815 to the Present (3).
EUH 5365. The Balkans Since 1700 (3).
EUH 5457. The Age of the French Revolution, 1715–1795 (3).
EUH 5458. Napoleonic Europe, 1795–1815 (3).
EUH 5467. Weimar and Nazi Germany (3).
*EUH 5508. England in the Middle Ages (3).
EUH 5509. Modern Britain Since c. 1870 (3).
EUH 5518. Stuart England (3).
EUH 5578. 19th-Century Russia (3).
EUH 5579. 20th-Century Russia (3).
*EUH 5608. European Intellectual History, 1500–1800 (3).
*EUH 5609. European Intellectual History, 1800 to Present (3).

Program in HISTORY AND PHILOSOPHY OF SCIENCE

College of Arts and Sciences

Web Page: http://hps.fsu.edu/
Director: Michael Ruse

Florida State University offers a program in the history and philosophy of science, leading to an undergraduate minor or a master’s degree. The focus of the program is on the biological sciences, although we welcome applications from potential students interested in other areas of science. We take very seriously the importance of working on topics of relevance to the society in which we live, and we are strongly committed to an interdisciplinary approach, with involved faculty drawn broadly from across the University, especially the humanities and the natural sciences.

As a major university, we are able to offer opportunities for study and research in topics of particular pertinence to our region, such as racial issues, conservation and problems of pollution, and clashes between science and religion. We also have major strengths in other areas, including logic and formal methods, social philosophy, intellectual and cultural history, history of the South, African-American history, ancient science and mathematics, as well as evolution and ecology.

FSU has attractive competitive scholarships, and there are opportunities for research and teaching assistantships that include remission of tuition. Strong library facilities exist, and we are building further on these. We are committed to helping our students when they complete their degrees, either to further graduate work or to enter the work force. The master’s degree with its multidisciplinary breadth is appropriate for those interested in pursuing a Doctor of Philosophy (PhD) in philosophy, history, religion, or biology. It is also suitable for those undergraduates who would like to combine it with one of the traditional disciplines in our combined bachelor’s-master’s program. In all cases, we will aim to tailor individual course programs to suit students’ needs.

The program hosts an annual conference or workshop supported by the Werkmeister Fund. Those interested in learning more about the degree, or in enrolling, should consult our Web site and contact the office of the Director.

Requirements for the Minor

The minor is twelve semester hours and must include one philosophy of science course and one history of science course, or equivalent.

If used to fulfill the HPS minor, none of these courses may also be used to fulfill liberal studies or major degree requirements.

Some of these courses have prerequisites; students should check with the department that offers the course. A grade of “C-” or better must be earned in each course. Listed below are some of the classes that may be used to fulfill the minor. This is by no means an exhaustive list of all possible courses one can take to fulfill the minor requirements. Students should contact Rebecca Burnham in the History and Philosophy of Science Program at (850) 644-7248 or by e-mail at rburnham@fsu.edu with questions about any other possible courses that may be used to fulfill minor requirements. Descriptions of the course suggestions listed below may be found in the individual department chapters of this General Bulletin.

AMH 4630 North American Environmental History (3)
AMH 4634 Florida Environmental History (3)
ANT 2511 Introduction to Physical Anthropology and Prehistory (3)
ANT 4553 The Great Ape (3)
ANT 4586 Human Evolution (3)
BSC 1005 General Biology for Non-Majors (3)
BSC 2010 Biological Science I (3)
HIS 3464 History of Science (3)
HIS 3491 Medicine and Society (3)
HIS 4930 Special Topics in History (3)
ISC 3076 Science, Technology, and Society (3)
PCB 3043 General Ecology (3)
PCB 4674 Evolution (3)
PHI 2100 Reasoning & Critical Thinking (3)
PHI 2620 Environmental Ethics (3)
PHI 3130 Introduction to Symbolic Logic (3)
PHI 3400 History and Philosophy of Science (3)
PSB 2000 Intro to Brain and Behavior (3)
PSB 4461 Hormones and Behavior (3)
REL 3145 Gender and Religion (3)
REL 3180 Bioethics (3)
REL 3493 Religion and Science (3)

Note: Additional prerequisites or corequisites for these courses may be required by the respective department in which they are offered. Please see the course listings found in the academic department sections of the current graduate or undergraduate edition of the General Bulletin at http://registrar.fsu.edu/bulletin/.

Definition of Prefixes

HPS—History and Philosophy of Science
IFS—Interdisciplinary Florida State

Undergraduate Courses

HPS 3313. The History of Sexual Science (3). This course examines the history of attempts to build a science around human sexual behavior, more specifically, how the project of building a “sexual science” (scientia sexualis) was predicated on the idea that, by nature, human beings have a “sexuality” that can be expressed or repressed. The course asks “How has science served to define what counts as ‘normal’ sexual behavior?” and “How has the discourse of scientific ‘sexuality’ participated in explicitly political projects?”

HPS 3320. Screening the Scientific Life: Cinema and the Cultural Image of Science (3). This course examines how cinema has provided a unique framework for wrestling with the implications of the modern scientific enterprise, examining how easily scientific rationality can be harnessed to both moral and immoral ends and what kind of world that science has produced. By probing a variety of genres - including biography, documentary, historical drama, science fiction, political satire, and horror - this course observes the cinematic and cultural desire to make sense of science. A critical element of the course is diversity in the Western culture through the lens of race, class, gender, and ethnicity.

HPS 3323. History and Philosophy of Environmental Science (3). This course examines the development of public health and the history of medicine in the United States from the colonial period to the present. The course examines changes in medical knowledge, the medical profession, governmental responsibilities, public responses; how individuals accept, modify, or reject medical authority; how race, class, gender, and ethnicity shape health practices and the delivery of medical care; how we protect the health of a community; and what constitutes a public hazard.

HPS 4260. Empiricism Before Science: Religion, Natural History, and Natural Philosophy (3). This course adopts a historiographical perspective and explores the idiosyncratic projects, socio-cultural contexts, and theological horizons of early modern natural philosophy and natural history. Topics draw on primary and secondary sources and include the role of “spirits” in corpuscular philosophy and the place of “monsters” in the natural world.

IFS 2011. Empire and Revolution in Cold War Latin America (3). This course is designed to familiarize students with the history, current state of research, and continued relevance of what historian Greg Grandin terms as Latin America’s “long Cold War;” that is, the political, social, and economic history of Latin America after World War II. It pays special attention to issues of revolution and empire, encouraging students to critically explore and engage the intimate connections between the local, national, and transnational manifestations of the Cold War in Latin America.

Graduate Courses

HPS 5340. Freud and the Invention of the Modern Mind (3).
HPS 590cr. Directed Individual Study (1–4). (S/U grade only.)

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
Dedman School of Hospitality

**College of Business**

**Web Page:** [http://dsh.fsu.edu/](http://dsh.fsu.edu/)

**Director and Robert H. Dedman Professor:** Jane Boyd Ohlin; **Assistant Director:** Donald G. Farr; **Professors:** Bonn, Brymer, Harris, Kim; **Associate Professor:** Ohlin; **Assistant Professors:** Hanks, Line; ** Assistants in Hospitality:** Farr, Gonzalez, Lanford; **Associates in Hospitality:** Cross, Lewis; **Cecil B. Day Professor of Lodging Management:** Brymer; **Robert H. Dedman Professor in Service Management:** Bonn; **Robert H. Dedman Professor in Hospitality Management:** Kim; **Visiting Professor:** Weston.

The program in hospitality management was established in 1947 in recognition of the demand for hotel and restaurant industry executives, with the objective of providing the kind of education tomorrow’s hospitality leaders will need. The curriculum is designed so that students must meet high standards of achievement in general education and must acquire not only the specialized knowledge needed for their hospitality industry careers, but also understand the basic functions, objectives, and tools of management that are common to executive roles.

The Dedman School of Hospitality is located in the South Building of the University Center, which provides for the specialized academic/training objectives established by the school. In addition to classrooms, this state-of-the-art facility provides hospitality students with a teaching kitchen, a technology center, an academic advising office, and a placement center. The building also contains an affiliated 35,000 square-foot, professionally managed city club that provides hospitality students with real-world food and beverage experience in elegant surroundings.

One of the most rewarding benefits of an education in hospitality management or global club management at Florida State University is that through the years a personal, intimate, congenial climate, in which students may develop to their fullest potential, has remained a chief attraction. All of the school’s energies and resources are devoted exclusively to preparing each student for a professional career.

The Dedman School of Hospitality is nationally and internationally recognized as one of the best. Many firms visit the school each year to interview students for entry-level management positions. Graduates of the program enjoy top managerial and ownership positions in clubs, restaurants, hotels, resorts, institutions, and other facets of the hospitality and golf industries. The requirement of a professional management internship and on-the-job experience, where the student applies classroom knowledge to the workplace, prepares the Dedman School of Hospitality graduate for the operational challenges of industry.

**Computer Skills Competency**

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in hospitality and global club management satisfy this requirement by earning a grade of “C–” or higher in CGS 2100 (state mandated business prerequisite requirement) or CGS 2518.

**Required Risk in Business and Society Course**

All undergraduates at Florida State University intending to enter a business major must complete RMI 2302, Risk in Business and Society, with a “C–” or better by the end of their sophomore year. Transfer students will be required to complete this course in their first semester at FSU.

**State of Florida Common Program Prerequisites**

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit [https://www.flvc.org/partner-portal/common-prerequisite-manual](https://www.flvc.org/partner-portal/common-prerequisite-manual) for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ACG X021 or ACG X022, or ACG X001 and ACG X011
2. ACG X071
3. CGS X100 (or demonstrated competency) or CGS X100C or CGS X530 or CGS X570 or CGS X060 or CGS X531 or CGS X000 or MAN X812 or CGS X518
4. ECO X013
5. ECO X023
6. MAC X233 or MAC X230 or MAC X105
7. STA X023 or STA X122 or QMB X100

**Requirements for a Major in Hospitality Management**

All students must complete:

1. the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin
2. the state of Florida common prerequisites for hospitality management majors
3. at least sixty semester hours of courses in non-business disciplines
4. the general business core requirements for hospitality management majors
5. the general business breadth requirements for hospitality management majors
6. the major area requirements for hospitality management majors

**Note:** To be eligible to pursue a major in hospitality management, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

**General Business Core Requirements**

All hospitality management majors must complete the following five courses. A grade of “C–” or better must be earned in each course

- **HFT 3003** Law for Hospitality Operations (3)
- **FIN 3403** Financial Management of the Firm (3)
- **GEB 3213** Business Communications (3)
- **MAN 3240** Organizational Behavior (3)
- **MAR 3023** Basic Marketing Concepts (3)

**General Business Breadth Requirements**

All hospitality management majors must complete the two courses as follows. Each course must be completed with a grade of “C–” or better.

- **HFT 3424** Hospitality Financial Analysis (3)
- **HFT 4502** Integrated Marketing for Hospitality (3)

**Major Area Requirements**

All hospitality management majors must complete fifty-one semester hours as listed below with a grade of “C–” or better in each course used to satisfy the hospitality management upper-level course requirements.

- **GEB 3213** Business Communications (3)
- **HFT 3424** Hospitality Financial Analysis (3)
- **HFT 3003** Law for Hospitality Operations (3)
- **HFT 3806** Introduction to Food and Beverage Management (3)
- **HFT 3941r** Management Internship (1–12)
- **HFT 4224** Hospitality Leadership and Ethics (3)
- **HFT 4253** Lodging and Luxury Hotel Management (3)
- **HFT 4471** Managing Revenues and Expenses (3)
- **HFT 4502** Integrated Marketing for Hospitality (3)
- **HFT 4802** Catering Management (3)
- **HFT 4941** Field Study in Hospitality Administration (0)
- **Plus four hospitality electives from the list of courses below:**
  - **HFT 1000** Introduction to Hospitality and Tourism Management (3)
  - **HFT 2061** Ales, Lagers, and International Culture (3)
  - **HFT 2062** International Wine and Culture (3)

European Summer Study Program

Combining accelerated classroom instruction with travel and on-site observation of industry operations, the program achieves an ideal educational balance. Classes are taught in English by Florida State University faculty. The following topics of the HFT 4930r, Special Topics in Hospitality Administration, are offered: (a) European Food and Wine, (b) European Travel and Tourism, (c) International Hotel Administration, as well as (d) Special Studies in International Hospitality Administration.

Courses completed in this program count toward the state of Florida requirement that at least nine semester hours be completed in the Summer term at one of the State University System senior institutions. Only two courses completed in this program can count towards completion of the Minor in Hospitality Management.

Minor in Hospitality Management

Students may receive a Minor in Hospitality Management by completing twelve semester hours as follows: HFT 1000, HFT 3240, and any two of the following courses: HFT 2061, HFT 2062, HFT 2716, HFT 2890, HFT 3221, HFT 3272, HFT 3519, HFT 3602, HFT 3700, HFT 4064, HFT 4930r. Students must earn a minimum grade point average of 2.0 in the courses used to satisfy the hospitality management minor requirements.

Definition of Prefixes

HFT — Hospitality Management
HMG — Hospitality Management: Graduate

Undergraduate Courses

HFT 1000. Introduction to Hospitality and Tourism Management (3). This course offers an introductory review of the segments, disciplines, career opportunities, and current issues in the hospitality industry.

HFT 1350. Golf for Business and Life (1). (S/U grade only.) This course is designed for students who have never experienced the game of golf. Students learn the basics of the game in a casual, fun environment. This course counts as credit for a physical education activity course.

HFT 1382. Professional Golf Management Orientation (1). This course covers all the facets of the Professional Golf Management major and is designed to introduce and guide students through the Florida State, Dedman School of Hospitality, and PGM requirements. Students begin with developing a Road Map of their four-and-a-half-year curriculum, including academic advising from the Dedman School.

HFT 2060. Coffee, Tea, and International Culture (3). This course is delivered online through Blackboard and is an introduction to coffees and teas of the world with a focus upon their importance to global cultures found in many regions. Students learn about these beverages and their unique interrelationship with their regional culture, heritage, and environment. Coffee coverage focuses upon specific regions of the world: 1) Coffee: the Americas, Africa, Europe, India, the Middle East, and Indonesia; 2) Tea: China, Korea, England, Kenya, Russia, Iran, France, Morocco, and the U.S. Other non-alcoholic beverages, including energy drinks, bottled water, and carbonated beverages are also explored.

HFT 2061. Ales, Lagers and International Culture (3). This course is an introduction to ales and lagers of the world with a focus upon their importance to global cultures found in many regions. Students learn about these regional beers and the interrelationship with their culture, including food, heritage, and festivals.

HFT 2062. International Wine and Culture (3). This course provides an introduction to wines of the world with a focus upon the importance to global cultures. Students learn about the regional wines and the interrelationship with their cultures and heritage.

HFT 2063. Distilled Spirits and International Culture (3). This course is delivered online through Blackboard and is an introduction to distilled spirits of the world with a focus upon their importance to global cultures found in many regions. Students learn about these regionally distilled beverages and their interrelationship with their culture, heritage, and environment. This class presents distilled spirits from various regions and countries of the world representing the U.S., Mexico, Canada, Scotland, Ireland, England, Italy, France, Germany, Spain, Greece, Russia, Poland, Sweden, and Finland.

HFT 2080. International Protocol on Western Behavior and Service Standards (3). This course is designed to explore the diverse verbal and non-verbal Western cultural habits, dress, and behaviors that service providers must deliver. The actions, and customs compared to the cultural mores, dress, traditions, political structure, behaviors (both verbal and non-verbal), travel, service delivery styles, and expectations of people from various international cultures.

HFT 2352. Introduction to Professional Golf Management (1). Prerequisite: HFT 1382. This course focuses on preparing students for the management of golf operations. For professional golf management majors only.

HFT 2716. International Travel and Culture (3). This course introduces students to contemporary tourism through a geographical and multicultural perspective of worldwide travel. The course emphasizes the most popular travel destinations and provides information about the physical and cultural characteristics of major cities, states, and countries. The course offers basic facts about travel destinations, the environment, and the people of many regions around the world, and it presents the nature of cultural diversity reflecting both Western and non-Western cultures with special emphasis on establishing background, race, values, tradition, language, material goods, and interrelationships among local cultures.

HFT 2890. International Food and Culture (3). This course explores the world’s cuisines with a focus on the history of culinary arts, indigenous ingredients, customs, as well as various cooking methods and terminology from places such as Latin and South America, the Middle East, Europe, Scandinavia, Asia, and Africa.

HFT 3100. Introduction to Global Club Management (3). This course is designed to allow the student proper exposure to the expanding global club and golf resort industry. The course highlights career paths, identifies various types of clubs throughout the world as well as discusses the evolution of private clubs and the direction they are headed in the years to come.

HFT 3101. Global Club Operations and Governance (3). Prerequisite: HFT 3100. This course is designed to provide an in-depth understanding of how global club and golf resort facilities operate to remain sustainable in both the U.S. and international markets. Emphasis is placed on the club governance, management and leadership models, and the operation of various business units within a club and golf resort.

HFT 3221. Human Resource Management in Hospitality Operations (3). This course offers an analysis of human-resource issues in the hospitality industry such as staffing, training, appraisal, wage and hour administration, discrimination, harassment, and other governmental issues.

HFT 3240. Managing Service Organizations (3). This course is an in-depth examination of the concept of service and the linkages of the three most important functional areas of the firm: marketing, operations, and human resources. The course also addresses the concept of quality.

HFT 3263. Restaurant Operations (3). Prerequisite: HFT 3806. This course is an introduction to basic food and beverage management concepts. Topics covered include: food and beverage sanitation, production and service equipment, menu planning and costing, and nutrition and safety.

HFT 3270. Resort Operations (3). This course consists of analysis and discussion of lodging specifics, retail and commercial leasing, community relations, amenities and recreation, as well as real-estate sales in relation to resort operations management.

HFT 3272. Senior Services Management (3). This course explores the planning, development, operation, and management of retirement facilities. Explores the various types of senior living facilities including multi-level, independent, assisted living, and skilled-nursing care centers.

HFT 3275. Resort Development (3). This course offers contemporary knowledge and understanding of concepts, challenges, and trends associated with resort development and management. In-depth examination of the process of resort development from property site identification, land acquisition, zoning and permitting, environmental impact statements (EIS), layout and design issues, construction processes, pre-opening, public relations and marketing, as well as many other issues.

HFT 3277. Club Management (3). This course focuses on the development and management of clubs, including golf course operations, organizational and financial structures, and basic membership and guest relations. Also explores private clubs other than golf operations.

HFT 3323. Intermediate Professional Golf Management (1). Prerequisite: HFT 2352. This course focuses on developing intermediate level skills necessary for management of golf operations. For professional golf management majors only.

HFT 3354. Agronomy for Golf Course Management (3). This course is an overview of horticultural and agronomic practices needed by golf course managers in the hospitality industry.

HFT 3355. Advanced Professional Golf Management (1). Prerequisite: HFT 3354. This course focuses on advanced skills that prepare students for the management of golf operations. For professional golf management majors only.

HFT 3424. Hospitality Financial Analysis (3). Prerequisites: ACG 2021 and ECO 2023. This course is a detailed analysis of food, beverage, labor, and cash controls. In-depth purchasing component including furniture, fixtures, and equipment (FF&E). Computer usage in labor control, cost analysis, and marketing mix analysis. A systems approach to management of quality through the design of appropriate controls.
This course provides a comprehensive approach to managing, marketing, and planning conventions, special events, and conferences.

HFT 3602. Ethics and Service Leadership (3). This course focuses on ethics and service leadership and how it intersects areas of life. Students read and discuss both primary and secondary sources and critically reflect on those sources in an effort to understand questions about the meaning and purpose of work and their implications for business leadership and decision making.

HFT 3603. Law for Hospitality Operations (3). This course covers basic concepts of law that apply to the hospitality industry. The course focuses on legal definitions, innkeeper-guest relationships, liability, and other legal issues.

HFT 3700. Tourism Management and the Environment (3). This course focuses on tourism management, organization, and development. Emphasis is on economic and environmental issues confronting the industry such as balancing use and preservation. Open to non majors.

HFT 3806. Introduction to Food and Beverage Management (3). Prerequisite: HFT 1000. This course is an overview of the food and beverage industry with regard to history, production theories, and types of food and beverage retail outlets. Concentration on layout of a variety of production kitchens, storage (refrigeration, dry, frozen, and chemical), workflow, and basic production techniques is integral to the course. Lab time depends on the topic and activity planned for the week.

HFT 3941r. Management Internship (1–12). (S/U grade only.) Prerequisites: Instructor permission and HFT 1000. This internship is designed for Dedman School of Hospitality students to gain real world experience in the business field though on-the-job practice. Students work under the direction of an approved industry professional and the internship director. May be repeated to a maximum of twelve semester hours.

HFT 3949r. Cooperative Education Work Experience (0). (S/U grade only.) May be repeated.

HFT 4064. Ales, Lagers and Culture (3). This course is an introduction to ales and lagers of the world with a focus upon their importance to global cultures found in many regions. Students learn about these regional beers and the interrelationship with their culture, including food, heritage, and festivals. Restricted to students twenty-one years of age and older.

HFT 4101. Global Impacts and Sustainability in the Club Industry (3). This course is designed to provide the student with an in-depth understanding and appreciation for sustainable business practices within the private club and golf resort industry. Focus is placed on how existing companies operate within the sustainability model.

HFT 4205. Conversational Spanish for Hospitality Managers (3). Prerequisite: Senior standing. This course emphasizes Spanish international culture and conversation and was designed primarily for Hospitality leaders. The course allows students to apply their Spanish-language skills to increase fluency in everyday hospitality-related situations. The course also focuses on the customs and cultural characteristics of the people from Spain as well as from Central and South America. This course is not recommended for fluent Spanish speakers.

HFT 4224. Hospitality Leadership and Ethics (3). Prerequisite: Senior standing. This course covers the analysis and development of interpersonal management skills, including leadership, ethics, employee and guest relations, as well as team building.

HFT 4253. Lodging and Luxury Hotel Management (3). This course provides a study of hotel, motel, resort, and other types of lodging operations, including benchmarking, department organization and management, operations, and systems. Emphasis is on rooms, delivering exceptional service, computer usage in lodging properties, and quality control issues.

HFT 4290. Luxury Hotel and Resorts (1). Prerequisite: HFT 3806. This course benchmarks the processes of 5-star and 4-star hotels and resorts in order to identify how they deliver exceptional service in their operations.

HFT 4334. Advanced Club Management (3). Prerequisites: HFT 3277. This course is designed to provide students with high-level private club management techniques relevant to today’s challenging business environment.

HFT 4471. Managing Revenues and Expenses (3). Prerequisites: HFT 3806 and HFT 3424. This course is designed to provide students with an understanding of financial analysis so that decisions within the operation can be evaluated. Techniques used in maximizing revenues, controlling costs, and analyzing financial statements, productivity, and ratios are explored within the food and beverage, hotel, and club industries. Emphasis is placed on effective revenue-management techniques.

HFT 4502. Integrated Marketing for Hospitality (3). This course focuses on the applications of strategic market research and product/service positioning in the hospitality industry. Emphasis on competitive marketing strategies including sales, advertising, and promotions. Discussion of unique features of hospitality marketing, market research/analysis, ethics, and quality.

HFT 4802. Catering Management (3). Prerequisite: HFT 3806. This course covers management methods and concepts utilized in the administration of food and beverage functions.
Program in Interdisciplinary Humanities

College of Arts and Sciences

Web Page: http://pis.fsu.edu/

Program Director: Martin Kavka; Undergraduate Advisor: Kathryn Stoddard; Affiliated Faculty: Brewer (Music), Cloonan (Modern Languages and Linguistics); Edwards (English), Efimov (Modern Languages and Linguistics), Fleming (Modern Languages and Linguistics), Grindal (Anthropology), Johnson (English), Laughlin (English), Leushuis (Modern Languages and Linguistics), Levenson (Religion), Seaton (Music), Slaveva-Griffin (Classics), Treharne (English), Weingarden (Art History)

A Bachelor of Arts (BA) in Humanities offers a broad interdisciplinary education in the thought, literature, art history, and music of Western and Eastern cultures. The interdepartmental undergraduate major is offered as a preparation for graduate work in the humanities and as a basic cultural background for a variety of professional fields, such as teaching, research, journalism, law, librarianship, foreign service, the religious professions, music, arts administration, and government service. For questions and academic advising, please contact Dr. Kathryn Stoddard in the Program in Interdisciplinary Humanities at (850) 645-8292.

Course Overlap with Liberal Studies and/or Other Majors: A maximum of three hours may overlap between the Humanities major and Liberal Studies requirements. A maximum of six hours may overlap between Humanities and another major. No courses taken toward the Minor in Humanities can overlap with any other requirements (exclusive of writing and Multicultural X and Y classes).

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in humanities satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100, or MUS 2360.

Requirements for a Major in Interdisciplinary Humanities

Please review all college-wide degree requirements in the “College of Arts and Sciences” chapter of this General Bulletin. All Humanities majors must meet the language requirement for students seeking the Bachelor of Arts (BA) degree in the College of Arts and Sciences. For alternatives to satisfy this requirement, refer to ‘Foreign Language’ in the “College of Arts and Sciences” chapter of this General Bulletin. If a student chooses to double major, only six semester hours may be applied to both majors. For general policies pertinent to a double major, refer to “Second Majors and Academic Regulations” in the “Academic Regulations and Procedures” chapter of this General Bulletin.

The major and minor combination comprises a minimum of forty-two semester hours beyond the Liberal Studies requirements and numbered above 1999. All coursework counted toward the Humanities major must be completed with a “C–” or higher. Humanities majors must take a nonwestern humanities course (X; 3 CU) and a multicultural diversity course (Y; 3 CU), or their equivalents, before graduation. If these courses have not been taken to fulfill the Liberal Studies requirement, they may be taken as University electives or in the concentration of the major with the approval of Humanities advisor. The courses to be counted toward the Humanities major will be distributed as follows:

Primary Concentration

Eighteen semester hours in one of the following Humanities departments:
- American Studies
- Art History
- Asian and Middle Eastern Studies
- Classical Studies
- Communication
- English
- Film Studies
- History
- History and Philosophy of Science
- Human Rights
- Humanities
- Modern Languages
- Music History

Philosophy
- Religion
- Theatre*

*Note: Many Theatre classes are closed to students outside of the School of Theatre.

Secondary Concentration

Twelve semester hours in one of the departments listed above. The secondary department cannot be the same as the primary department.

Tertiary Concentration

Twelve semester hours in one of the departments listed above. The tertiary department must be different from both the secondary and primary departments.

Upper-Level Course Requirement

A minimum of twenty-four hours of coursework taken for the major must be numbered above 2999.

All Interdisciplinary Humanities majors are required to schedule regular advising appointments each semester. Humanities majors are required to schedule a graduation check with the college and with the University Registrar upon completion of ninety semester hours. The student must also apply for graduation with the Registrar during the first two weeks of the semester in which the student expects to graduate. Failure to meet regularly with an advisor or to follow the specified procedures will delay progression toward completion of the degree.

Internships, Honors classes, and Directed Individual Study (DIS)

The maximum combined credit that will be applied toward the major for upper-level Honors courses, internships, or Directed Individual Studies in humanities areas is six semester hours. All DIS classes used for credit towards the major must be approved by the Undergraduate Advisor.

Requirements for a Minor in Humanities

No courses taken toward the Minor in Humanities can overlap with any other requirements (exclusive of writing or Multicultural X and Y classes). The undergraduate minor may be accomplished in one of the two following ways:

1. Fifteen semester hours, of which nine must be taken in one of the Humanities departments listed above, and six from one other Humanities department from the same list. Six hours must be numbered above 2999.
2. Twelve semester hours in courses with the HUM prefix.

Definition of Prefix

HUM—Humanities
IDS—Interdisciplinary Studies
IFS—Interdisciplinary Florida State University Courses

Undergraduate Courses

HUM 2920. Freshman Interest Group (1). (S/U grade only.) This course is a seminar-structured class designed to provide a set of experiences that introduces the student to the academic culture at FSU. Taught Fall term only. Topics vary.

HUM 2921r. Learning Community Colloquium (1). (S/U grade only.) This series includes presentations on resources and University-wide programs as well as frequent talks by faculty members describing their own research and/or creative work. The course provides opportunities to meet a variety of potential role models and to engage in thoughtful, substantive discussions in a large-classroom setting. May be repeated to a maximum of two semester hours.

HUM 2920. The Art of Being Human: Examining the Human Condition Through Literature, Art, and Film (3). This course offers an introduction to the thought, literature, and arts of Western culture from Antiquity to the present.

HUM 2210. Humanities: Pre-history to Late Antiquity (3). This course offers an introduction to the thought, literature, and arts of Western culture from pre-historic times to about 400 A.D.

HUM 2255. Humanities: From the Renaissance to the Enlightenment (3). This course offers an introduction to the thought, literature, and arts of Western culture from the Renaissance to the Enlightenment.

HUM 2250. Humanities: 18th-Century Romanticism to Postmodernism (3). This course offers an introduction to the thought, literature, and arts of Western culture from 18th-century Romanticism to the Postmodern period.

HUM 2937r. Humanities Honors Seminar (3). May be repeated to a maximum of nine semester hours as topics vary.
Interdepartmental Minor in
IBERIAN STUDIES, VALENCIA CENTER

COLLEGE OF ARTS AND SCIENCES

Web Page: http://valencia.fsu.edu/
Coordinator: James E. Pitts (International Programs)

The Iberian Studies Valencia Center minor is concerned with the culture of Spain from ancient times to the present. The minor is built around the student’s program of studies at the Florida State University Valencia Study Center, allowing the student to pursue the minor before, during, and after the student attends the Valencia Program. The minor gives greater focus to and enhances the quality of the student’s program of studies in Spain. The sojourn in Valencia is the essential element in the minor, providing direct involvement in contemporary Spanish civilization as well as exposure to Spain’s historical cultural artifacts.

Requirements for a Minor in Iberian Studies

The interdisciplinary minor requires the completion of fifteen semester hours (to include at least two disciplines) in courses approved by the Iberian Studies Valencia Center Coordinating Committee. At least nine semester hours of approved courses must be taken while the student is in residence at the FSU Valencia Study Center. A maximum of nine semester hours may be counted in any single academic discipline. Students who intend to minor in Iberian studies should declare this intention with International Programs at the end of the semester in Valencia. Contact Betty Seymour at bcsymour@fsu.edu for more information.

The student must have completed at least three semester hours (or the equivalent) in elementary Spanish prior to attending the Valencia Center.

A minimum grade of “C-” must be earned for all courses taken for the minor. In addition, a minimum cumulative grade point average (GPA) of 2.0 must be maintained in all courses counted toward the minor.

Core Courses

These courses will be counted in the minor whether they are taken on the Tallahassee campus or in Valencia. Description of these courses may be found under the individual departments in which they are taught.

HUM 3931r Humanities: Special Topics [Culture and Civilization of Spain] (1–3)

MUS 3934r Special Topics in Music [Music of Spain] (1–3)

SPN 2902r Directed Individual Study in Hispanic Language (3)

SPN 3000 Spanish Grammar and Composition (3)

SPN 3040 Spanish Reading and Conversation (3)

SPN 3440 Language and Culture in Business (3) *

SPN 3510 Cultures of Iberia (3)

SPN 4420 Advanced Spanish Composition and Translation (3)

SPN 4444 Business Writing in Spanish (3) *

SPN 4450r Spanish Phonetics (3) *

SPN 4505r Directed Individual Study in Hispanic Language (3)

SPN 4530r Studies in Hispanic Language and Literature (3)

SPN 4942r Internship in Applied Spanish (1–6)

SPT 3100 Spanish Literature in Translation (3)

SPT 3391r Hispanic Cinema (3)

SPW 3030 Approaching Hispanic Literature (3)

SPW 3103 Readings from Early Iberia (3)

SPW 3104 Readings from Modern Spain (3)

SPW 3493 Readings from Modern Spanish America (3)

SPW 4144 Poetics of Hispanic Love and Violence (3)

SPW 4150r Transatlantic Encounters (3)

SPW 4481 Contemporary Spanish Women Writers (3)

Note: Courses marked with an asterisk (*) must be taken at the Valencia Study Center.

Note: Each student must have completed at least one introductory course in Spanish (on the freshman level) prior to studying at the Valencia Center in order to qualify for a minor in Iberian studies. All courses in Spanish (SPN) must be at the 3000 and 4000 level. Note also that courses used to satisfy the University’s foreign language requirement for the BA degree may not also count in the minor.

Graduate Courses

HUM 5227 The Humanistic Tradition: Greek and Roman (3)

HUM 5245 The Humanistic Tradition: Medieval, Renaissance, and Baroque (3)

HUM 5253 The Humanistic Tradition: The Modern World (3)

HUM 5900 Directed Individual Study (1–3) (S/U grade only.)

HUM 5915 Supervised Research (1–5) (S/U grade only.)

HUM 5938 Interdisciplinary Topics (3).

HUM 5940 Directed Teaching (6-12) (S/U grade only.)

HUM 6934 Seminar Topics (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
Related Courses

The following courses will apply toward the Iberian studies minor if: (1) section or seminar topics are relevant to the minor; or (2) research and papers are done on topics relevant to the minor. Students should keep copies of syllabi and their relevant work in case a need to verify the work arises.

With the exception of any Spanish courses below the 3000 level offered, all courses at the Valencia Center may be counted toward the Iberian studies minor if a course syllabus shows that at least fifty percent of the material presented is relevant to the minor, and provided the Valencia Center Minor Coordinating Committee has given prior approval for their inclusion in the minor. In addition, special topics courses offered on the Florida State University campus on a one-time basis may be counted if the coordinating committee approves them. To have such courses considered, petition the Coordinating Committee, International Programs, University Center A5500, Tallahassee, FL, 32306-2420.

Program Educational Objectives

The Bachelor of Science in Industrial Engineering (BSIE) curriculum is accredited by the Engineering Accreditation Commission of ABET, 111 Market Place, Suite 1050, Baltimore, MD, 21202-4012, phone (410) 347-7700. The Bachelor of Science in Industrial Engineering (BSIE) curriculum is designed to comply with the ABET criteria for accrediting engineering programs. The educational objectives are that, within the first few years following their graduation, graduates should have:

- Been employed in industrial, service, or governmental organizations applying the industrial engineering skills in developing, designing, analyzing, implementing, or improving integrated systems that include people, materials, information, equipment, and energy
- Completed or enrolled in a graduate program
- Participated in a multicultural and diverse workplace
- Utilized teamwork, communication, and engineering management skills.

To achieve these objectives, all industrial engineering students must demonstrate or exhibit specific program outcomes. Students are instructed to contact their academic advisor or visit the departmental Web site at http://www.eng.fsu.edu/ime/ to obtain the current list of industrial engineering program outcomes.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in industrial engineering satisfy this requirement by earning a grade of “C-” or higher in COP 3014 (preferred) or CEG 3406.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted to the University without completing the prerequisites, but may not be admitted into the program.
At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fsvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. MAC X311 or MAC X281
2. MAC X312 or MAC X282
3. MAC X313 or MAC X283
4. MAP X302 or MAP X305
5. CHM X045/X045L or CHM X045C, or CHS X440/X440L
6. PHY X048/X048L or PHY X048C, or PHY X043 and PHY X048L
7. PHY X049/X049L or PHY X049C, or PHY X044 and PHY X049L

**Engineering Core Courses**

**Requirements for a Major in Industrial Engineering**

It is the policy of the Department of Industrial and Manufacturing Engineering that a student must receive satisfactory (“C-” or better) grades in all prerequisite courses prior to enrolling in an industrial engineering course. Concurrent registration in a course and its prerequisites is not allowed. All prerequisites to prerequisites must be completed. Failure to abide by this policy will result in the cancellation of enrollment in the course at any time during the semester and with no refund of fees. Corequisite courses must be taken concurrently or satisfactorily completed prior to enrolling in the course.

A candidate for the Bachelor of Science (BS) degree in industrial engineering is required to successfully complete the following courses, in addition to the other College of Engineering core requirements.

Grade Requirements

In addition to University and college requirements regarding grades and grade point average (GPA), the Department of Industrial and Manufacturing Engineering requires that the IE major achieve a grade within the “C” range or higher for all required IE courses. In accordance with College of Engineering policy, a student may request that one course completed with a grade of “D+”, “D”, or “D−” be counted toward the BSIE degree. Recommendation by the IME undergraduate advisor(s) and approval by the department chairperson and the associate dean are required for the course to be counted toward graduation.

**Definition of Prefixes**

EGN—Engineering: General
EIN—Industrial Engineering
EMA—Materials Engineering
ESI—Industrial/Systems Engineering
PRO—Prosthetics/Orthotics

**Undergraduate Courses**

EGN 1004L. First Year Engineering Laboratory (1). This laboratory includes an emphasis on student time management, a variety of products and processes, and computer-aided problem solving. Product/process involves sketching and drawing pertinent diagrams by hand, and learning the history and engineering concepts involved.

EGN 2123. Computer Graphics for Engineers (2). Corequisite: MAC 2311. This course covers principles of engineering graphics: visualization, spreadsheet applications, graphical calculus, and descriptive geometry. Also introduces the engineering design process and CAD systems.

EGN 3443. Statistical Topics in Engineering (3). Prerequisite: MAC 2312. This course explores basic statistical analysis, samples and populations, variability, hypothesis formulation, and data analysis. Use of computer software and interpretation of results.

EGN 3613. Principles of Engineering Economy (2). Prerequisite: MAC 2313. This course emphasizes discrete cash flow diagrams, cash flow equivalence factors, standard criteria for comparing project proposals, special cash flow topics, special analysis, and case studies.

EIN 3010. Industrial and Manufacturing Engineering Tools (3). Prerequisite: Major status. This course teaches from an engineering viewpoint, fundamental topics that are important for the practicing industrial engineer, including technical writing, oral communication and presentation of technical topics, managerial and cost accounting for production organizations and databases and management information systems.

EIN 3104. Introduction to Engineering Management (3). Prerequisites: EGN 2123 and EGN 3613. This course focuses on topics such as the evolution, history, emergence, and ethics of engineering and industrial engineering. Emphasis is placed on the management of technology and on the engineering method for product conceptualization, design, development, and production. Fundamental sciences, engineering methods, information systems, economics, and behavior theory contained in engineering management principles and practices.

EIN 3390C. Engineering Materials and Manufacturing Processes I (3). Prerequisite: EGM 3512. Corequisite: EGM 2123. This course is an introduction to industrial materials and their composition, properties, metallography, and heat treatment. Introduction to the manufacturing processes of machine industries including hot working, cold working, and metal removal.

EIN 3390r. Directed Independent Study (3). Prerequisite: Permission from the department chairperson. Topics vary and each case must be approved by the department chairperson. May be repeated to a maximum of six semester hours.

EIN 3494r. Experiential Learning (0). (S/U grade only.) Prerequisite: Instructor permission. This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study.

EIN 3513. Design of Integrated Production Systems and Facilities Layout (3). Prerequisite: EGN 3613. Corequisite: EIM 2123. This course covers the design of manufacturing systems, economics, and behavior theory contained in engineering management principles and practices.

EIN 3949r. Experiential Learning (0). Prerequisite: IME 1004L or IME 2123. This course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study.

**Honors in the Major**

The Department of Industrial and Manufacturing Engineering offers an Honors in the Major program in Industrial Engineering to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin, or visit http://honorsinthemejor.fsu.edu.
EIN 4394C. Engineering Materials and Manufacturing Processes II (3). Prerequisite: EIN 3390C. This course is an introduction to engineering materials used in industry from the perspectives of composition, microstructures, properties, and heat treatment, various traditional and non-traditional manufacturing processes, basic mathematical descriptions for selected processes, and the application of these concepts to process selection and planning.

EIN 4611. Industrial Automation and Robotics (3). Prerequisite: EIN 3390C. This course introduces and familiarizes students with the basic automation problems and the technologies used in automated production and robotic systems. Various components and systems and their applications to industrial automation are discussed. The course is supplemented by labs that help students apply and evaluate the concepts studied in the classroom.

EIN 4621. Manufacturing Systems Engineering (3). Prerequisite: EIN 4312. This course is an introduction to modern manufacturing systems, with a special focus upon the integration of manufacturing resources through the use of computers. Design, planning, analysis, and control of computer integrated manufacturing systems.

EIN 4890. Industrial Engineering Senior Design Project I (3). Prerequisite: Must be in final year of the degree program. This course is the first in a two-part course sequence, this capstone class represents the culmination of the industrial-engineering design sequence and draws upon student training from all previous courses. This course utilizes the six-sigma methodology to reduce variation and defects in order to deliver products and services that meet customer requirements.

EIN 4891. Industrial Engineering Senior Design Project II (3). Prerequisite: Must be in the final year of the degree program. This course expects students to complete a large-scale design project involving the full implementation of the IPPED process. Project includes a written report and requires the use of various techniques and methods. Two-semester sequence.

EIN 4892. Industrial Engineering Senior Design Project II (3). Prerequisite: Must be in final year of the degree program. This course is the second in a two-part course sequence, this capstone class represents the culmination of the industrial-engineering design sequence and draws upon student training from all previous courses. This course utilizes the six-sigma methodology to reduce variation and defects in order to deliver products and services that meet customer requirements.

EIN 4934r. Honors Thesis (3). May be repeated to a maximum of six semester hours.

EIN 4936r. Selected Topics in Industrial Engineering (3). This course is offered Fall and Spring semesters. Topics are determined by a departmental committee on special topics, taking into consideration the needs of students who are about to graduate. May be repeated to a maximum of nine semester hours.

ESI 3312C. Operations Research I: Deterministic (3). Prerequisite: MAS 3105. This course covers the following topics with emphasis on validation of algorithms and derivation of heuristics: linear programming, assignment problems, CPM, network flows, discrete optimization, branch and bound solution method, and dynamic programming. Design exercises.

ESI 3628. Computing Topics in Industrial Engineering (3). Prerequisite: COP 3014. This course focuses on state of the art computing techniques for industrial engineers. Applications of structured programming, mathematical analysis software, and engineering databases. Use in engineering of GUI languages, Internet communication, and UNIX.

ESI 4234. Quality Control and Reliability Engineering (3). Prerequisite: EGN 3443. This course is an introduction to quality and reliability engineering. Statistical quality control techniques, process capability analysis, and design and analysis of experiments for quality and reliability improvement.

ESI 4313C. Operations Research II: Nondeterministic (3). Prerequisites: EGN 3443 and MAS 3105. This course focuses on the development and application of nondeterministic, analytic models including PERT/CPM, discrete and continuous time Markov chains, queuing models including queuing networks, inventory models, and decision analysis. Case studies and design exercises.

ESI 4523. Simulation of Industrial Engineering Systems (3). Prerequisite: ESI 4234. This course focuses on simulation modeling and computer solution of industrial engineering systems. Modeling strategies, probability considerations, simulation languages, simulation verification, and engineering case studies.

Graduate Courses

EIN 5020. Research Methodology (3).

EIN 5182. Engineering Management (3).

EIN 5228. Environmentally Conscious Design and Manufacturing (3).

EIN 5353. Engineering Economic Analysis (3).

EIN 5392. Manufacturing Processes and Systems (3).

EIN 5396. Manufacturing Materials Processing (3).

EIN 5459. Concurrent Engineering (3).

EIN 5524. System Modeling and Simulation (3).

EIN 5622. Computer-Aided Manufacturing (3).

EIN 5905r. Directed Individual Study (1–3). (S/U grade only.)

EIN 5930r. Special Topics in Industrial Engineering (1–6).

EIN 5931. Leadership and Communications (3).

EIN 5936r. Graduate Seminar (0). (S/U grade only.)

EIN 6629. Tolerancing and Metrology for Precision Manufacturing (3).

EMA 5015C. Nanomaterials and Nanotechnology (3).

EMA 5162. Composite Materials Engineering (3).
School of Information

COLLEGE OF COMMUNICATION AND INFORMATION

Web Page: http://ischool.cci.fsu.edu/
Director: Kathleen Burnett; Professors: G. Burnett, K. Burnett, N. Everhart, Gross, Kazmer, Latham, Marty, McClure, Riccardi; Associate Professors: C. Hinnant, Lustria, Mardis, Mon, Stvilia; Assistant Professors: Allen, L. Hinnant, Ho, Oh, Rodriguez-Mori, Urban; Specialized Faculty: Barrager, Doffle, Gibradze, Jowett, Koontz, Kotrla, Marks, Swaine; Professors Emeriti: Aaron, Blazek, Conaway, DePew, Hart, C. Jorgensen, Robbins, Summers, Wiegard, Zachert

The School of Information offers a bachelor’s degree in Information Technology (BSIT) with a major in Information Technology (IT) and a major in Information, Communication, and Technology (ICT); a master’s degree in Library and Information Studies (MLIS) accredited by the American Library Association (ALA); a master’s degree in Information Technology (MSIT); a specialist degree; and a Doctor of Philosophy (PhD) degree. A bachelor’s to master’s degree program (BS to MS) is also offered combining a bachelor’s degree in Information Technology with a master’s degree in Information Technology. Refer to the “School of Information” section of this General Bulletin or to the School Web site at http://ischool.cci.fsu.edu/ for more details concerning degree programs and other information. For complete details of graduate degree requirements, please see the description of the School of Information and its facilities and opportunities, refer to the Graduate Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Information Technology satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100, or COM 4470. A bachelor’s to master’s degree program (BS to MS) is also offered combining a bachelor’s degree in Information Technology with a master’s degree in Information Technology. Refer to the “School of Information” section of this General Bulletin or to the School Web site at http://ischool.cci.fsu.edu/ for more details concerning degree programs and other information. For complete details of graduate degree requirements, please see the description of the School of Information and its facilities and opportunities, refer to the Graduate Bulletin.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program. At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites. The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Information Technology
1. PSY XXXX: Any course in psychology
2. STA X023 or STA X122
3. ECO X013
4. CGS XXXX: Any database course
5. COP XXXX: Any course in computer programming
6. COP XXXX: Any course in object-oriented computer programming
7. MAC XXXX: A pre-calculus or discrete math course
8. PHI XXXX: Any course in general ethics

Technology Requirement

All students in the information technology undergraduate program are required to provide their own laptop computer and appropriate software. Specific information may be found online at http://ischool.cci.fsu.edu/academics/online/requirements/.

Requirements for a Major in Information Technology

To major in Information Technology (IT), a student must complete a minimum of forty-two semester hours in information technology, including the six core courses, six electives and two capstone courses.

Core Courses (eighteen hours required):
- LIS 3021 Technical Communication for the Information Professions (3)
- LIS 3201 Research and Data Analysis for Information Professionals (3)
- LIS 3267 Information Science (3)
- LIS 3353 Information Technologies (3)
- LIS 3706 Information Systems and Services (3)
- LIS 3784 Information Organization and Communication (3)

Electives (eighteen hours required):
Eighteen hours of IT elective courses chosen in consultation with an advisor. Students may focus their electives on topics such as networking and security, design and development, health informatics, and social informatics.

Capstone Courses (six hours required):
- LIS 4708 Perspective on Information Technology (3)
- LIS 4910 Information Technology Project (3)

Note: All courses must be completed with a minimum grade of “C–”.

Requirements for a Minor in Information Technology

The School of Information offers a minor in Information Technology on a space available basis. The minor consists of twelve semester hours in...
Information Technology courses. To minor in Information Technology, a student must complete both LIS 2780 and LIS 3353, and any two of the following courses: LIS 3021, LIS 3201, LIS 3267, LIS 4410 or LIS 4480.

Only coursework with a grade of “C–” or above in these courses will count toward the minor. At least six hours of the minor must be taken with the School of Information at Florida State University. Courses taken at another institution must be evaluated by the School of Information to determine equivalency. Courses taken to meet the minor are not applicable to any other requirement.

Bachelor’s to Master’s Degree Program

The College of Communication and Information also offers a combined bachelor’s to master’s degree program (BS to MS) consisting of a bachelor’s degree in Information Technology with a master’s degree in Communication. The program offers eligible undergraduate students the opportunity to take up to twelve semester hours of graduate coursework, which may be counted toward both the BS and MS degrees. Check the Web site for more details: http://ischool.cci.fsu.edu.

The College of Communication and Information also offers a combined bachelor’s to master’s degree program (BS to MS) through the School of Communication that combines a bachelor’s degree in Information Technology with a master’s degree in Communication. The program offers eligible students the opportunity to take up to twelve semester hours of graduate coursework in the areas of Integrated Marketing Communication or Media and Communication Studies. These courses may then be counted toward both the BS and MS degrees. Check the Web site for more details: http://comm.cci.fsu.edu.

Harold Goldstein Library

The Harold Goldstein Library features a collection of approximately 65,000 books, videos, and CDs. The collection includes materials for library science, information technology, and juvenile literature including graphic novels. The library subscribes to more than 400 serials and journals which are included in the aggregated online catalog comprising the six libraries on the FSU campus and available to all FSU users. For more information, visit http://goldstein.cci.fsu.edu.

Definition of Prefix

CGS—Computer General Studies
COP—Computer Programming
IDC—Interdisciplinary Computing
IFS—Interdisciplinary Florida State University Courses
LIS—Library and Information Studies

Undergraduate Courses

CGS 2835. Interdisciplinary Web Development (3). Prerequisite: Computer fluency. This interdisciplinary course provides basic training in project management, communication, information architecture, interface design, graphic design, Web technologies, content editing, and subject-area expertise, thus empowering students across disciplines to effectively communicate their subject-area expertise through today’s most popular publishing medium, the Web.

COP 2258. Problem Solving with Object-Oriented Programming (3). Prerequisite: Computer fluency. This interdisciplinary course is designed for students who are not necessarily intent on becoming computer programmers, but are interested in understanding the principles that govern object-oriented programming and software development in order to assist with problem solving in their own disciplines.

IDC 2930r. Special Topics in Interdisciplinary Computing - Beginning Level (1–4). This course covers current issues and topics in interdisciplinary computing that are not discussed in other courses. Topics vary. May be repeated within the same term, to a maximum of nine semester hours.

IDC 3931r. Special Topics in Interdisciplinary Computing - Intermediate Level (1–4). This course covers current issues and topics in interdisciplinary computing that are not discussed in other courses. Topics vary. May be repeated within the same term, to a maximum of nine semester hours.

IFS 2014. Information Literacy and Society (3). This course introduces students to the concepts of information literacy and what it means to be information literate in 21st century society. Students address the issue of information literacy by learning searching skills, gathering information from primary and derivative sources, and conducting information quality analyses. Students also work with information in real-world content domains to analyze and represent information effectively.

IFS 2041. Information Ethics for the 21st Century (3). This course identifies past, present and future information ethics challenges and encourages students to develop their own viewpoints from which to address them. The primary purpose of this course is to provide students with the knowledge, skills, and values required to make informed ethical decisions about information production, management and use. Students explore and apply a wide range of ethical theories to examine critical information ethics issues raised by recent advances in information and communication technology.

IFS 3037. Empowering Health Consumers in the eHealth Era (3). This course explores the use of emerging technologies for health information seeking, health promotion and disease prevention, including for chronic conditions and acute illnesses. Students learn how to assess users’ information needs, competencies, and health behaviors in order to develop accessible, useful, and effective solutions. They also study and discuss the impact of information technology on different levels of health care.

LIS 2360. Web Applications Development - Principles for any equivalent course in Web design (HTML and CSS) or with instructor permission. This course introduces the concepts and technical needs of client and server side technologies for Web applications. The course equips students with resources for design, production, and evaluation of Web applications and strategies for locating these resources. Students gain hands-on experience in Web application development, including: client-side markup and programming, server-side programming for data processing, code versioning, accessing Web services, and related authentication techniques.

LIS 2780. Database Concepts (3). This course examines relational database management systems using a typical commercial DBMS, such as Microsoft Access. Topics include data modeling, database design, implementation, forms and reports, and remote access to databases.

LIS 3021. Technical Communication for the Information Professions (3). Prerequisites: LIS 2780, LIS 3267, and LIS 3353. This course covers technical and professional documents generated and used by information professionals. Emphasis is on the writing process, more specifically on audience analysis, document design, collaboration, and peer editing.

LIS 3103. Information and Society (3). This course examines major issues related to living in the “information society,” including information literacy, information security, identity theft, privacy, intellectual property, and information ethics. Students gain skills in search and retrieval of information from online databases, and print resources. The three broad areas covered by the course are personal information management, academic information, and career/professional information.

LIS 3201. Research and Data Analysis in Information Technology (3). Prerequisites: LIS 2780, LIS 2787, and LIS 3353. This course provides students with an understanding of statistical methods and their use by information professionals for the analysis of data and information. It focuses on both quantitative and qualitative methods in information technology professions including surveys, interviews, need assessments, requirements analysis, and transaction log analysis. It provides students with the opportunity to conceptualize an IT application, develop a research plan, and design methods for assessing, collecting, analyzing, and reporting research data.

LIS 3267. Information Science (3). This course presents the history, philosophical bases, concepts, theories, and methodologies of information science. It also emphasizes the definitions and properties of information, formal and informal information systems, information organization, transfer, classification, formatting, and use.

LIS 3353. Information Technologies (3). This course provides a solid foundation in the fundamental concepts, theories and principles in information technology and discusses critical issues surrounding their use and how they impact everyday life. The course is also an understanding of the concepts and principles underlying the design and use of digital devices, computer hardware, software, telecommunications, networking and multimedia, and is an integral part of any IT curriculum.

LIS 3946r. Field Study in Information Studies (1–6). Prerequisite: Advisor permission. This course provides students with an unpaid work experience within a major area of information studies. May be repeated to a maximum of six semester hours.

Advanced Undergraduate Courses

LIS 3706. Information Systems and Services (3). Prerequisites: LIS 2780 and LIS 2784. This course provides an overview of information systems concepts and practice including system management, maintenance, assurance, and reporting services, physical and human resources. The course includes an introduction to information system hardware components, operating systems, scripting languages, with practical training in databases and networked servers. In addition, this course provides practice in managing the people, processes and events (planned or otherwise) involved in information system management.

LIS 3781. Advanced Database Management (3). Prerequisites: LIS 2780 and LIS 3784. This course explores various topics in database management systems (DBMS) using a typical commercial DBMS, such as Oracle or MySQL. Topics include security, stored procedures, and triggers.

LIS 3784. Information Organization and Communication (3). Prerequisite: LIS 2780. This course teaches the concepts and practices of structuring information for use in environments inherent to data- and information-based technology design. Topics include the development and organization of information entities and the role of models in representing information appropriately.

LIS 3793. Information Architecture (3). Prerequisite: CGS 2835, LIS 3267 and LIS 3353. This course provides an introduction to the scope and methods of information architecture in any setting, but emphasizes its application to the Web. The course examines the elements of an information architecture and some common technologies needed to design and create these elements.

LIS 4022. Writing for the Information Professions (3). This course offers practical hands-on experience with forms and practices of technical and professional writing, including documentation, correspondence, audience analysis, writing for social media, evaluation, and review. The course emphasizes clear, concise, and effective writing in information technology settings, both within organizations and for user services.

LIS 4264. Systems Approach in the Information Environment (3). Prerequisite: MAC 1015. This course offers an introduction to the systems approach for problem solving in an information seeker’s environment. The theories and concepts of information science are integrated with a variety of practical tools for the structured design and analysis of systems.
LIS 4276. Quantitative Methods in Information Studies (3). Prerequisites: LIS 3201 and senior standing or instructor permission. This course presents practical methods for collecting and analyzing data. Topics include sampling, hypothesis testing, analysis of variance, contingency tables, correlation, and experimental design.

LIS 4277. Usability and Usefulness of Information Systems (3). Prerequisites: LIS 3201 and LIS 4276. This course introduces students to the concepts of cognitive and human information processing, their application to information systems design, and the assessment of the usability and usefulness of information systems.

LIS 4301. Electronic Media Production (3). Prerequisites: CGS 2835 and LIS 3353. This course offers the understanding, skills, and techniques needed for the production and utilization of various types of electronic graphic resources. Emphasis is on visual literacy, the evaluation of graphic resources, design standards, and the visual representation of information. Students create multimedia projects and design and produce materials for both electronic and print formats, including pages for the World Wide Web, slide shows for visual support of verbal presentations, and documents produced with desktop publishing software.

LIS 4351. User Experience Design (3). Prerequisite: LIS 2360. This course provides a comprehensive overview of the user experience design process, and is intended to familiarize students with the methods, concepts, and techniques necessary to make user experience design an integral part of developing information interfaces. The course provides students with an opportunity to acquire the resources, skills, and hands-on experience they need to design, develop, and evaluate interfaces from a user-centered design perspective.

LIS 4366. Web Site Development and Administration (3). Prerequisite: LIS 4301. This course covers issues and techniques related to the planning, production, and management of large World Wide Web sites, including information on organization and design, hardware and software, server and Web publishing. Students divide into teams to work on a project from information provision and the role of Web developers as providers and managers of information resources.

LIS 4368. Advanced Web Applications Development (3). Prerequisites: COP 2258, LIS 2360, and LIS 2780. This course provides a foundation in developing Web applications with emphasis on the planning and evaluation of existing development tools. Special emphasis is placed on information provision and the role of Web developers as providers and managers of information resources.

LIS 4369. Extensible Enterprise Solutions (3). Prerequisites: COP 2258, LIS 2360, and LIS 2780, each with a grade of “C” or better. This course provides the foundational aspects of application design using procedural and object-oriented programming (OOP) concepts and techniques, employing various application development tools.

LIS 4380. Social Media Management (3). This course explores the tools, information management, and communication functions of social media through hands-on work with designing and managing social media sites. Students participating in this class actively design, implement, and coordinate numerous projects that build a foundation in social media management while allowing students to gain valuable leadership, communication, and organizational skills. They also explore the different issues and concerns that may influence the widespread adoption and implementation of social media at the individual and national levels.

LIS 4381. Mobile Application Development and Management (3). This course focuses on concepts and best practices for managing mobile technology projects. It covers processes and requires students to plan, build, and test mobile applications. Students will gain experience in mobile application programming, advanced object-oriented PHP and Web application development. Students enrolled in this course develop basic programming skills in a modern Web development environment, understand Web application development principles and are able to develop and implement mobile applications. Students will also complete an internship.

LIS 4389. Information Technology Project (3). Prerequisite: LIS 4910 or instructor permission. This is the capstone course in the Information Technology degree program. The course provides students with a broad prospective on the information technology field, the skills required to succeed in the field, and a familiarity with emerging technologies. It also allows students to complete their information technology portfolio. The course consists of discussions of issues in the information technology profession, emerging technologies, and directed work on the student’s degree portfolio.

LIS 4470. Information and Image Management (3). This course presents how theory and practice in the field are integrated in the management and delivery of health care in various situations. Focus is on concepts and best practices for managing mobile technology projects. It covers processes and requires students to plan, build, and test mobile applications. Students will gain experience in mobile application programming, advanced object-oriented PHP and Web application development. Students enrolled in this course develop basic programming skills in a modern Web development environment, understand Web application development principles and are able to develop and implement mobile applications. Students will also complete an internship.

LIS 4480r. Information Technology Leadership (3). This course focuses on leadership, group communication, project planning, strategy, and individual development, with a focus on Information Technology and its uses. Students participating in this class actively design, implement, and coordinate numerous ongoing projects that build a strong team atmosphere and allow students to gain valuable leadership, communication, and organizational skills. It also allows students to complete their information technology portfolio. May be repeated to a maximum of six semester hours; duplicate registration not allowed.

LIS 4481. Managing Information Resources and Services (3). Prerequisites: Three of the following: LIS 3201, LIS 3267, LIS 3353, LIS 4276 and LIS 4351. This course offers an introduction to management science and administrative issues as applied to information resource management, and the role of information professionals. Topics include human resource management, management functions, and strategies, as well as life-cycle management and career opportunities.

LIS 4482. Managing Networks and Telecommunications (3). Prerequisite: LIS 3353. This course provides a foundation in the use of networks and telecommunication to provide information. Focus is on modern data networks, especially building blocks of local area networks (LANs). The course deals with concepts, technical requirements, and a variety of management issues.

LIS 4488. Network Administration for the Information Professional (3). Prerequisites: LIS 3353 and LIS 4482. This course provides the information and skills necessary to perform competently in the role of network administrator or network system manager within a library or information center environment. The course introduces students to the design, operation, and management of networked systems from local area networks to the Internet. Topics include the Information Topics and technical and application issues, with a focus on managing a network.

LIS 4491. Internship in Information Studies (1–6). Prerequisite: Instructor permission. This paid or unpaid internship offers work experience in the information industry that expands and integrates classroom work. May be repeated to a maximum of six semester hours.

LIS 4493. Seminar in Information Studies (3). Prerequisites: Senior standing and instructor permission. This seminar involves intensive reading and preparation of position papers concerning current issues in information studies, followed by discussions of these papers with faculty and information specialists.

LIS 4494. Directed Individual Study (1–3). (S/U grade only.) Prerequisite: Senior standing and instructor permission. This course is designed to provide opportunities for individual study in the information studies major. The course is designed to provide in-depth study in a specialized area of study. The topic of study must be approved by the student’s advisor and the chair of the Department of Information Studies. The course is designed to provide opportunities for individual study in the information studies major. The course is designed to provide in-depth study in a specialized area of study. The topic of study must be approved by the student’s advisor and the chair of the Department of Information Studies.
LIS 491r. Information Technology Practicum (3). This practicum is designed to provide the student with exposure to hands-on technical problem solving in a variety of settings. Students learn through practical experience to identify common technical problems experienced by end users; assess the scope and severity of user issues; and to develop, communicate, and implement strategies for successful problem resolution. May be repeated to a maximum of six semester hours. Duplicate registration not allowed.

LIS 497r. Honors Work in Information Studies (1–6). Prerequisites: Admission to the honors program and information-technology major status. This course provides an opportunity for students to engage in independent and original research in a specialized area beyond the current curriculum in information technology. May be repeated to a maximum of nine semester hours. To graduate with honors in information studies, the student must complete six semester hours of coursework with at least a “B–” or better and an overall 3.2 GPA or higher.

### Graduate Courses

**IDC 5015.** Teaching Interdisciplinary Computing (2–3).
**LIS 5008.** Advanced Online Searching (3).
**LIS 5020.** Foundations of the Information Professions (3).
**LIS 5025.** Educational Concepts and Strategies for School Librarians (3).
**LIS 5105.** Communities of Practice (3).
**LIS 5112.** History of Reading in Everyday Life (3).
**LIS 5113.** History of American Librarianship (3).
**LIS 5203.** Assessing Information Needs (3).
**LIS 5241.** International and Comparative Information Service (3).
**LIS 5255.** Information, Technology, and Older Adults (3).
**LIS 5260.** Information Science (3).
**LIS 5263.** Theory of Information Retrieval (3).
**LIS 5270.** Evaluating Networked Information Services and Systems (3).
**LIS 5271.** Research in Information Studies (3).
**LIS 5273.** Practical Library and Information Science Exploration (3).
**LIS 5275.** Usability Analysis (3).
**LIS 5313.** Digital Media: Concepts and Production (3).
**LIS 5316.** Information Graphics (3).
**LIS 5362.** Design and Production of Networked Multimedia (3).
**LIS 5364.** Web Site Development and Administration (3).
**LIS 5367.** Advanced Web Applications (3).
**LIS 5385.** Social Media Management (3).
**LIS 5403.** Human Resource Management for Information Professionals (3).

Department of
INTERIOR DESIGN

COLLEGE OF FINE ARTS

Web Page: http://interiordesign.fsu.edu/

Chair: Lisa Waxman; Professors: Pable, Waxman; Associate Professor: Myers; Assistant Professors: Dawkins, Fishburne, Huber, Randsell, Webber; Adjunct Faculty: Ertzberger, Kautz, McLane, Mick, Preisser, Robinson, Wray; Professors Emeriti: Butler, Koenig, Munton, Ohazama, Wiedegreen

Interior design is concerned with the design of all interior spaces, both residential and nonresidential, and the field of environmental design. Students are prepared to meet professional requirements and criteria for the practice of interior design, membership in professional organizations, and state licensure. A professional designer was defined by the national accrediting body, the Council for Interior Design Accreditation (CIDA), as one who is “qualified by education, experience, and examination to enhance the function and quality of interior spaces for the purpose of improving the quality of life, increasing productivity, and protecting health, safety, and welfare of the public.”

The Department of Interior Design is accredited by CIDA and the National Association of Schools of Art and Design (NASAD).

The competencies taught include elements and principles of design, design analysis, space planning and programming, drafting and technical drawing, computer-aided drafting and design, graphic presentation of design solutions, design history, sustainability, and comprehensive design studios. There are active student chapters of the American Society of Interior Designers (ASID) and the International Interior Design Association (IIDA). The faculty includes members of ASID, IIDA, the Interior Design Educators Council (IDEC), and the American Institute of Architects (AIA).

The undergraduate interior design program offers the Bachelor of Science (BS) and the Bachelor of Arts (BA) degrees. Students must consult the “Undergraduate Degree Requirements” chapter of this General Bulletin for BA degree requirements.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in interior design satisfy this requirement by earning a grade of “C–” or higher in IND 3469.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fwc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. IND X206
2. IND X406
3. IND X203
4. IND X204
5. ARH X057 or ARH X051: coursework in art history (Renaissance through contemporary) for three credit hours that may be used to meet a general education/liberal studies humanities requirement

Degree Requirements

The undergraduate degree program consists of a minimum of seventy semester hours of coursework in interior design. Students are urged to participate in internships as a vital part of the educational process.

Specific degree requirements include the following:

1. Liberal studies: of the required and elective semester hours, three must be taken in ARH X057, an art history course. Refer to the ‘Liberal Studies for the 21st Century’ section in the “Undergraduate Degree Requirements” chapter of this General Bulletin for specific degree requirements. Contact the program advisory for further information if needed.

2. Interior design studio courses: twenty-four semester hours
3. Technical and graphic design courses: nineteen semester hours
4. Lecture-based support courses: eighteen semester hours
5. History of interiors and architecture: nine semester hours
6. Electives in interior design: None required, but students must have at least 120 hours to graduate.

Requirements for Bachelor of Arts Degree (only)

1. Electives in art-related courses must also meet University humanities requirement
2. Language requirement is the equivalent of two years of language proficiency (no credit requirement).

Refer to the ‘Liberal Studies for the 21st Century’ section in the “Undergraduate Degree Requirements” chapter of this General Bulletin for specific degree requirements.

Requirements for a Major in Interior Design

The program is a limited access major with required sequential course offerings and elective courses in interior design. Three diagnostic courses are offered during the first year of study (IND 1203, 1204, and 2002). In a portfolio review of work generated from these three classes, the top forty students are chosen to move forward into the second year and are formally accepted into the major. Transfer students may take all three diagnostic courses at Florida State University during the Summer term, and then go through First Year Review (their numbers counting within the total forty students chosen to move forward).

A specific listing of courses required for a major in interior design is available on the department Web site at http://interiordesign.fsu.edu. Internship preparation and placements are available for all undergraduate students, and students are urged to elect these studies. A minor is not required, but may be obtained in other appropriate areas (departmental advisement required prior to electing a minor).

Students majoring in interior design must maintain the minimum GPA for semester and overall averages, and achieve a minimum grade of “C–” in all interior design classes.

Honors in the Major

The Department of Interior Design offers a program in honors in the major to encourage talented juniors and seniors to undertake independent research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Definition of Prefixes

IND—Interior Design

Undergraduate Courses

IND 1203. Design Fundamentals I (3). This course is the study and development of two- and three-dimensional design projects using the elements and principles of design.

IND 1204. Design Fundamentals II (3). Prerequisite: IND 1203. This course is the continuing study and development of two- and three-dimensional design projects using the elements and principles of design leading to the development of architectural space.

IND 1206. Introduction to Interior Design (3). This course is a survey of the elements and principles of interior design to create an awareness of the made environment and a comprehensive appreciation of design.

IND 1406. Technical Drawing (3). This course is an introductory architectural drafting course encompassing structural information and technical skill building in orthographic, parallel, and perspective views.

IND 2002. Survey of Interior Design (3). This course offers a survey of the elements and principles of interior design and creates an awareness of the built environment and a comprehensive global appreciation of design. The presentation of major elements in residential and commercial interiors is aimed at self-application and beginning designers.

IND 2300. Graphic Techniques I (3). Prerequisite: First year review. This course is an introduction to achromatic media used in sketching, rendering, and design drawing, with an emphasis on schematics used in problem solving.

IND 2310. Graphic Techniques II (3). Prerequisite: IND 2300. This course is an introduction to contemporary graphics color media, reproduction processes, and presentation drawings, with a focus on the refinement of perspective and freehand drawing proficiency, as well as rapid rendering techniques for interior delineation.

IND 3217. Interior Design Studio I (3). This course is an introduction to the fundamental elements and principles of design, design process, problem solving, space planning, and specifications.

IND 3431. Lighting Fundamentals (3). Prerequisite: IND 3217. This course explores the advanced technical aspects of interior design with emphasis on lighting, electrical plans, reflected ceiling plans, measurements, and acoustics.
IND 3440. Furniture Design (3). Prerequisite: IND 3217. This course focuses on the study of materials, structural considerations, function, and style of furniture and case goods by developing and appreciating their design and construction.

IND 3465. Computer-Aided Design I (3). Prerequisite: First year review. This course is an introduction to computer-aided design and drafting using AutoCAD software. Students develop an understanding of the software and how designers and architects use computers.

IND 3469. Computer-Aided Design II (3). Prerequisite: IND 3465. This course is an advanced computer-aided design class. Students increase their knowledge of 3D AutoCAD, learn the basics of Autodesk Viz software, and receive an overview of Photoshop.

IND 3470. Construction Systems (3). Prerequisite: IND 3217. This lecture course focuses on general construction techniques and terminology, integrating the building systems of structure, plumbing, and mechanical and fire safety.

IND 3474. Construction Documents (3). Prerequisite: IND 3469. This studio course focuses on the generation of a comprehensive set of specifications and construction drawings for a single project.

IND 3480. Materials and Methods (3). Prerequisite: A textiles course. This course involves the study of furnishings and finishes for interiors with an emphasis on both aesthetic and performance qualities of the materials typically utilized in interior space and the sources of antiquities, and reproductions. Includes field trips. May be repeated to a maximum of six semester hours.

IND 3529. Portfolio Development (1). (S/U grade only.) Prerequisite: IND 4218. This course allows students the opportunity to develop a professional portfolio format in hardcopy and digital media.

IND 3627. Principles of Sustainable Design (3). This course gives students a basic introduction to the fundamentals of sustainable design in order to better understand the inter-relationships between the built environment and nature.

IND 3930r. Special Topics in Interior Design (1–3). May be repeated to a maximum of twelve semester hours.

IND 4101r. History of Interiors I (3). This course is a study of architecture, interior, and furniture design from antiquity through the Renaissance. May be repeated to a maximum of six semester hours.

IND 4131r. History of Interiors II (3). This course is a study of architecture, interior, and furniture design of the 17th and 18th centuries. May be repeated to a maximum of six semester hours.

IND 4156r. Historical Restoration, Research and Documentation (3–6). This course includes study, research, and documentation of restoration and preservation procedures, sources of antiquities, and reproductions. Includes field trips. May be repeated to a maximum of six semester hours.

IND 4161r. History of Interiors III (3). This course includes the study of architecture, interior, and furniture design from the 19th century to the present. May be repeated to a maximum of six semester hours.

IND 4218. Interior Design Studio II (3). Prerequisite: IND 3217. This course consists of intermediate projects in creative problem solving applied to both residential and contract interiors. Emphasis on graphic communication and presentation.

IND 4242r. Interior Design Studio III (3). Prerequisite: IND 4218. This course consists of advanced projects in creative problem solving with emphasis on professional objectives and procedures for portfolio presentation. May be repeated to a maximum of six semester hours.

IND 4245. Interior Design Studio V (3). Prerequisite: IND 4243. This course is the undergraduate capstone studio and includes the design of a large-scale commercial space focusing on design development through final drawing production.

IND 4506. Business Practices (3). Prerequisite: IND 4242. This course involves advanced analysis and research into the theory and philosophy of professional interior design practice.

IND 4601. Sociological and Psychological Aspects of Design (3). Prerequisite: First year review. This course is an exploration of the relationship between humans and their environment through the study of personal and social use of space, proxemics, spatial analysis, and the effects of the environment on human behavior.

IND 4905r. Directed Individual Study (1–3). (S/U grade only.) This course enables students to pursue independent work in the area of design or research under the direction of a faculty member. May be repeated to a maximum of twelve semester hours.

IND 4947r. Internship (1–3). This internship enables students to pursue experience with design firm or other related field under the direction of a faculty member. May be repeated to a maximum of twelve semester hours.

IND 4970r. Honors in the Major (3). For honors credit, the Department of Interior Design requires a two-semester honors program consisting of six thesis or project hours to be counted toward elective credit. Upon meeting Florida State University’s requirements for honors courses, the students pursue independent creative and academic research as part of the undergraduate program.

Graduate Courses

IND 5005. Survey of Interior Design (5).

IND 5208. Design Fundamentals (3).

IND 5225. Graduate Studio I (3).

IND 5226. Graduate Studio II (3).

IND 5227. Graduate Studio III (3).

IND 5228. Graduate Studio IV (3).

IND 5229. Graduate Studio V (3).

IND 5281. Graduate Studio VI (3).

IND 5282. Graduate Studio VII (3).

IND 5315. Advanced Visual Communication (3).

IND 5316r. Design Graphics II (1–4).

IND 5317. Design Graphics I (3).

IND 5425. Graduate Technical Design (3).

IND 5428. Materials and Methods (3).

IND 5435e. Graduate Lighting Seminar (4).

IND 5445. Graduate Furniture Design (3).

IND 5477. Computer-Aided Design II (3).

IND 5487. Construction Documents (3).

IND 5508. Professional Practices (3).

IND 5526. Graduate Portfolio Review II (1). (S/U grade only.)

IND 5528. Graduate Portfolio Review I (1). (S/U grade only.)

IND 5609. Graduate Seminar: Social-Psychological Aspects of Design (3).

IND 5628. Principles of Sustainable Design (3).

IND 5634r. Pre-Design Research and Programming (3–6).

IND 5636. Graduate Seminar: Design Theory and Criticism (3).

IND 5637. Graduate Seminar: Research Methods in Design (3).

IND 5638. Graduate Seminar: Design Issues (3).

IND 5910r. Directed Individual Study (1–3). (S/U grade only.)

IND 5911r. Supervised Research (1–5). (S/U grade only.)

IND 5930r. Special Topics in Interior Design (1–4).

IND 5944r. Field Research in Space Organization (1–8).

IND 5945r. Supervised Teaching (1–3). (S/U grade only.)

IND 5948r. Graduate Internship (1–3). (S/U grade only.)

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
Program in INTERNATIONAL AFFAIRS

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY

Web Page: http://www.coss.fsu.edu/inaprog/

Director: Lee Metcalf (Social Sciences); Director of Undergraduate Studies: Whitney Bendec (History); Director of International Economic Education: Onsurang Norrin (Economics); Director of Internships and Professional Development: Na’ama Nagar (Political Science)

The Departments of Anthropology, Economics, Geography, History, Modern Languages and Linguistics, Philosophy, Political Science, Religion, Sociology, and Urban and Regional Planning, as well as the School of Public Administration and Policy, cooperate in the offering of an interdepartmental major and minor at the undergraduate level. The program is designed to equip students with a fundamental knowledge of the field of international affairs, to acquaint them with the basic methods of approach to the field, and to provide a basis for intelligent observation of international affairs. Employment opportunities are to be found in government service, international organizations (public, private, or non-profit), business, journalism, and teaching.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in international affairs satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

Requirements for a Major in International Affairs

Majors in international affairs must complete a minimum of thirty-nine semester hours beyond the liberal studies requirements, with a grade of “C–” or better in each course. A minimum cumulative grade point average (GPA) of 2.0 in all coursework applied to the major must be maintained. All courses counted toward the international affairs major must come from the approved list of courses in the participating departments (see below). Coursework must be selected from at least three participating departments and must include the required core course, Introduction to International Affairs. A minimum of twelve semester hours, maximum of eighteen semester hours must be in one department for a departmental concentration. Students may choose to obtain either a Bachelor of Arts (BA) degree or a Bachelor of Science (BS) degree, but in both cases must meet the modern foreign language requirement for the Bachelor of Arts (BA) degree. At least eighteen semester hours must be above the 2999 level. A maximum combined total of twelve semester hours in internship, directed individual study, or upper-division honors in the major may be credited to the major.

Majors must also complete the basic University computer competency requirement (see above).

Majors starting in or after Fall 2010 must complete INR 3003, Introduction to International Affairs.

Students are advised to coordinate their coursework with foreign language study, focusing on a regional concentration (e.g., Africa, the Middle East, East or South Asia, Russia, Eastern and Central Europe, Western Europe, or Latin America). Majors are encouraged to include such courses as CPO 2002, INR 2002, ECO 2013 and 2023, GEA 1000, and WOH 1030 among the courses they take to fulfill the liberal studies requirements (if those courses are taken to fulfill the liberal studies requirements, however, they cannot also be counted toward the major requirements).

In addition to a 2.0 overall GPA all students must meet “mapping” requirements. See http://www.academic-guide.fsu.edu for more information.

Study Abroad

Students majoring in international affairs are strongly encouraged to study abroad. Visit http://www.international.fsu.edu/ for more information on the various options available through Florida State International Programs. Students should consult with the international affairs director about any other study abroad programs they wish to pursue. Coursework taken in overseas locations must be approved in advance for credit toward the major.

Internship

The Program in International Affairs encourages students to take advantage of internships at the state, national, and international level. There are opportunities to work in the international arena through agencies and businesses in Florida’s capital, the Washington Center Program in Washington, DC, and Florida State’s International Programs in Valencia, Panama, and London. Most significantly, international affairs students can apply for one of the several prestigious internships in London, where we place our students in Parliament, the American Embassy, Amnesty International, NBC, the Associated Press, the British-American Chamber of Commerce, and other significant organizations. Information and application materials are available on the International Studies Blackboard Organization site. Applications must be submitted and all internships must be approved the semester before the internship takes place. See the International Affairs program advisor in 211 Bellamy for further information.

Honors in the Major

The Program in International Affairs offers honors in the major to encourage talented students to undertake independent research. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Second Majors

When students pursue a second major in the College of Social Sciences, they may count nine semester hours of coursework toward both of their majors. For a second major in the College of Arts and Sciences, only six semester hours may count toward both of the majors. Courses that may apply toward a second major must be from the approved course list.

Requirements for a Minor in International Affairs

A minor consists of eighteen semester hours beyond the liberal studies requirements with grades of “C–” or better. Work must be taken in at least three participating departments, and all those courses must be from the approved list of courses below. Modern language courses numbered above 2999 may count toward the minor. Nine of the eighteen semester hours must be numbered above 2999.

Approved Courses

Descriptions of individual courses can be found under the departments in which they are taught. Note: In addition to the courses listed below, special topics courses may be approved by the program director in any particular term. These courses appear on the term course lists and are available at the International Studies Organization Blackboard site as well as the program office in 211 Bellamy.

Required Core Course

| INR 3003 | Introduction to International Affairs (3) |

Anthropology

| ANT 2410 | Introduction to Cultural Anthropology (3) |
| ANT 2416 | Childhood Around the World (3) |
| ANT 2470 | The Anthropology of Globalization (3) |
| ANT 3141 | World Prehistory (3) |
| ANT 3212 | Peoples of the World (3) |
| ANT 3610 | Language and Culture (3) |
| ANT 4142 | European Prehistory (3) |
| ANT 4163 | Mesoamerican Archaeology (3) |
| ANT 4175 | Archaeology Islamic World (3) |
| ANT 4241 | Anthropology of Religion (3) |
| ANT 4277 | Human Conflict: Theory and Resolution (3) |
| ANT 4302 | Sex Roles in Cross-Cultural Perspective (3) |
| ANT 4309 | Conquest of the Americas (3) |
| ANT 4337 | Peoples and Cultures of Mexico and Central America (3) |
| ANT 4352 | Peoples and Cultures of Africa (3) |
| ANT 4363 | Japanese Society and Culture (3) |

Economics (see course descriptions and/or advisor about required prerequisites)

| ECO 2000 | Introduction to Economics (3)* |
| ECO 2013 | Principles of Macroeconomics (3) |
| ECO 2023 | Principles of Microeconomics (3) |
| ECO 3303 | History of Economic Ideas (3) |
| ECO 4132 | Economics of Compassion (3) |
| ECO 4704 | International Trade (3) |
| ECO 4713 | International Finance (3) |

*Should not be taken after ECO 2013 or ECO 2023.

For further information, see the International Affairs program advisor in 211 Bellamy.
require prerequisite language course background.

including two courses in culture and/or literature.Courses listed below do not
departmental concentration in modern languages, students must have a mini
requirement (which must be met by all international affairs majors) cannot be
counted toward the international affairs major. Students may, however, earn
list for international affairs majors, namely:

**Modern Languages**

Those credit hours earned by taking courses to fulfill the modern language
requirement (which must be met by all international affairs majors) cannot be
counted toward the international affairs major. Students may, however, earn
credit toward the major for additional courses in modern languages. For a
departmental concentration in modern languages, students must have a mini-
mum of twelve semester hours of advanced-level coursework in one language,
including two courses in culture and/or literature. Courses listed below do not
require prerequisite language course background.

Definition of Prefixes

IFS—Interdisciplinary Florida State University Courses
INR—International Relations
PAX—Peace Studies

Undergraduate Courses

IFS 2070. Thinking Beyond Ourselves: Global Perspectives (3). This course is designed to introduce the students to the basic concepts, theories, functions and behaviors associated with intercultural communication. Throughout the course, students increase in knowledge, understanding and awareness of different cultures and countries, interpret cultural values and communication strategies used across cultures/countries, and become more effective in engaging in the 21st-century globalized world.

IFS 2098. Formative Experience: Global Engagement (1). (S/U grade only.) This course gives students the opportunity to study different country’s unique customs, values, and traditions and compare it with their own through actively participating in cultural experiences.

IFS 2099. International Program E-Series (3).

IFS 3090. Global Conflicts: Analysis and Resolution (3). This course is designed to introduce students to the basic concepts, theories and frameworks of conflict analysis and resolution. Throughout the course students gain a thorough perspective of the conflict resolution field, theoretical orientations and practical applications to building peace. The course aims to engage students in inquiring persistent questions about the world dynamisms, interactions and relationships that lead to conflict and peace.

INR 3003. Introduction to International Affairs (3). This course introduces students to the core questions and concerns of international affairs. This course surveys the many distinct academic disciplines that together contribute to the development of an interdisciplinary understanding of the international system. The course examines how each of these disciplines understands the international system, the questions it raises, and its strengths and weaknesses. In addition, the course provides an introduction to many of the global issues of interest to international affairs majors, including terrorism, democracy, and globalization. At the end of this course, students have the skills and knowledge required to construct their own specialized plan of study in international affairs.

INR 3931r. Special Topics (1–3). (S/U grade only.) Topics vary. May be repeated within the same term to a maximum of nine semester hours.

INR 3932r. Special Topics in International Affairs (1–12). Topics vary. May be repeated as topics change to a maximum of fifteen semester hours.

INR 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

INR 4937r. Honors Work (1–6). May be repeated to a maximum of nine semester hours.

INR 4941r. Internship (3–6). (S/U grade only.) Prerequisites: Fifteen semester hours beyond liberal studies, a minimum cumulative GPA of 3.0, and instructor permission one semester in advance. This internship places students in approved agencies and organizations. Designed to provide practical experience in the area of international affairs. May be repeated to a maximum of six semester hours.

PAX 3930r. Special Topics in Peace Studies (3). Topics vary. May be repeated to a maximum of fifteen semester hours.

Graduate Courses

INR 5012. Problems of Globalism (3).
INR 5906r. Directed Individual Study (1–3). (S/U grade only.)
INR 5910r. Supervised Research (1–3). (S/U grade only.)
INR 5935r. Special Topics (1–3). (S/U grade only.)
INR 5936r. Special Topics in International Affairs (1–3).
INR 5938. Joint Seminar in International Affairs (3).

For listings relating to graduate coursework for thesis, master’s comprehensive examination, and thesis defense, consult the Graduate Bulletin.

INTERNATIONAL/INTERCULTURAL DEVELOPMENT EDUCATION:

ITALIAN: see Modern Languages and Linguistics
Interdepartmental Minor in
ITALIAN STUDIES, FLORENCE CENTER

COLLEGE OF ARTS AND SCIENCES

Web Page: http://www.florence.international.fsu.edu/

Coordinator: James E. Pitts (International Programs)

The Italian studies Florence Center minor is concerned with the culture of Italy from ancient times to the present. The minor is built around the student’s program of study at the Florida State University Florence Study Center, allowing the student to pursue the minor before, during, and after the student attends the Florence program. The minor gives greater focus to, and enhances the quality of, the student’s program of studies in Italy. The sojourn in Florence is the essential element in the minor, providing direct involvement in contemporary Italian civilization as well as exposure to Italy’s historical cultural artifacts.

Requirements for a Minor in Italian Studies

The interdisciplinary minor requires the completion of fifteen semester hours in courses approved by the Italian Studies Florence Center Minor Coordinating Committee. At least nine semester hours of approved courses must be taken while the student is in residence at the Florence Study Center. A maximum of nine semester hours may be counted in any single academic discipline. Students who intend to minor in Italian studies should declare this intention with International Programs at the end of the semester in Florence. Contact Betty Seymour at bseymour@fsu.edu for further information.

The student must have completed at least three semester hours (or the equivalent) in elementary Italian prior to attending the Florence Center.

A minimum grade of “C–” must be earned for all courses taken for the minor. In addition, a minimum cumulative grade point average of 2.0 must be maintained in all courses counted toward the minor.

Core Courses

These courses will be counted in the minor whether they are taken at the Tallahassee campus or in Florence. Descriptions of these courses can be found under the individual departments in which they are taught:

ARH 3150 Art and Archaeology of Ancient Italy (3)
ARH 4120 Etruscan Art and Archaeology (3)
ARH 4151 Art and Archaeology of the Early Roman Empire (3)
ARH 4154 Archaeology of the Late Roman Empire (3)
ARH 4210 Early Christian and Byzantine Art (3)
ARH 4304 History of Renaissance Architecture (3)
ARH 4310 Early Italian Renaissance Art: 15th Century (3)
ARH 4312 Later Italian Renaissance Art: 16th Century (3)
ARH 4352 Southern Baroque Art (3)
CLA 2010 Introduction to Greek and Roman Civilization (3)
CLA 2123 Debates About the Past: Roman Civilization, History and Culture (3)
CLA 3502 Women, Children, and Slaves in Ancient Rome: The Roman Family (3)
CLA 4447r Studies in Roman History (3)
CLA 4780r Classical Archaeology: Field Work (1–6)
EUH 3431 Modern Italy (3)
EUH 4140 Renaissance (3)
EUH 4412 The Roman Republic (3)
EUH 4413 The Roman Empire (3)
LNW 4320 Roman Lyric, Elegiac, and Pastoral Poetry (3)
LNW 4340 Roman Epic (3)
LNW 4360 Roman Satire (3)
LNW 4380 The Roman Historians and Cicero (3)
MUS 4242 Italian Language and Diction for Singers (3)
PHH 3061 Medieval and Renaissance Philosophy (3)
REL 3505 The Christian Tradition (3)
REL 4562 Modern Roman Catholicism (3)

In addition, any Italian courses at the 2000 level or above will count toward the Italian Studies minor.

Note: Each student must have completed at least one introductory course in Italian—on the freshman level—prior to studying at the Florence Center in order to qualify for a minor in Italian studies. Note also that courses used to satisfy the University’s foreign language requirement for the BA degree may not also count in the minor.

Related Courses

These courses may be counted in the minor only when they are taken at the Florence Study Center:

ARH 2000 Art, Architecture, and Artistic Vision (3)
ARH 3056 History and Criticism of Art I (3)
ARH 3057 History and Criticism of Art II (3)
ARH 4211 Early Medieval Art (3)
ARH 4230 Later Medieval Art (3)
ART 1300C Drawing I (3)
CLT 3370 Classical Mythology (3)
ENC 3310 Article and Essay Technique (3)
ENC 4311 Advanced Article and Essay Workshop (3)
EUH 2000 Ancient and Medieval Civilizations (3)
HUM 2235 Humanities: From the Renaissance to the Enlightenment (3)
HUM 4931r Topics in the Civilization of Britain or Italy (3)
IND 410fr History of Interiors I (3)
PGY 2100C Photo for Non-Art Majors (3)

All other courses offered at the Florence Study Center may be counted toward the minor if a course syllabus shows that at least fifty percent of the material presented is relevant to the minor, and provided the Florence Center Minor Coordinating Committee gives approval for their inclusion in the minor. In addition, special topics courses offered on Florida State University’s campus on a one-time basis may be counted if the Coordinating Committee approves them. To have such courses considered, petition the Coordinating Committee, International Programs, University Center A5500, Tallahassee, FL, 32306-2420.

Program in
LATIN AMERICAN AND CARIBBEAN STUDIES

College of Social Sciences and Public Policy

Web Page: http://coss.fsu.edu/lacs/

The Program in Latin American and Caribbean Studies (LACS) is designed to inspire and develop knowledge and experience of the region. Interdisciplinary by design, cooperating departments support innovative blends of teaching and research with the goal of providing undergraduates a solid grasp of Latin America’s present and past, and emphasizing major aspects of the region’s unique structures. Additionally, majors and minors are encouraged to participate in the related programs in Costa Rica and Panama. As the intellectual home for an interdisciplinary community of scholars, students, and visitors, LACS supports a range of research and teaching amid a broader array of sponsored lectures, cultural events, and internships.

The baccalaureate program may be viewed as preparation for graduate school in various fields or as leading to professions in government and international service, multinational commerce, law, teaching, and translation.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Latin American and Caribbean studies satisfy this requirement by earning a grade of “C-” or higher in CGS 2060 or CGS 2100.

Requirements for a Major in Latin American and Caribbean Studies

Students majoring in the program are to construct their study program around three components: (1) a language requirement, (2) an area-specific coursework requirement, and (3) a concepts and theories tool requirement. The total hour requirements for the major are a minimum of twelve semester hours in an approved area language plus an additional thirty-six semester hours beyond the liberal studies requirements (with a grade of “C-” or better) in each of the Latin American and Caribbean studies courses. As this is an interdisciplinary program, no minor is required.

In addition to a 2.0 overall GPA, all students must meet “mapping” requirements. See http://www.academic-guide.fsu.edu for more information.

Language Requirement

All students are required to take twelve semester hours of coursework in a relevant area language (Spanish, Portuguese, French, or some other relevant area language), or demonstrate proficiency at the intermediate college level. Students are encouraged to bring their chosen language up to an effective level of proficiency in both reading and speaking by either taking additional coursework on the campus of Florida State University or by participating in a semester- or summer-abroad program in their relevant cultural area as such programs become available. These programs should be administered by, affiliated with, or approved by Florida State University. To encourage the achievement of language proficiency, language coursework hours taken beyond the intermediate college level may be counted toward the required thirty-six semester hours for the major.

Area Specific Course Requirement

Students are to select at least twenty-four semester hours of area specific coursework from the approved list of area-specific courses. Note that special topic area-specific courses may be approved from time to time; for the most current list, students are encouraged to view the term-specific courses posted on the International Studies Blackboard Organization site.

Concept and Theory Course Requirement

Students are to select at least six semester hours of coursework from the approved list of concept and theory courses. Students should carefully select these courses in consultation with their academic advisor to ensure that the courses meet any required prerequisites for the approved courses.

Latin American and Caribbean Studies Major with a Minor in Business

This degree program combines the regular Latin American and Caribbean studies major with a planned series of economics and business courses. The requirements for this degree are twelve semester hours or demonstrated intermediate college-level proficiency in an approved language (Spanish, Portuguese, French, or some other relevant area language), twenty-one semester hours in Latin American and Caribbean studies coursework, and fifteen semester hours in multinational business courses. The Latin American and Caribbean studies coursework is to be selected from the area specific courses. With this degree there is no concepts and theories requirement. Students are also to select between two fifteen semester hour business coursework options listed below, an international marketing track or an international finance track. The prerequisites for both tracks include ECO 2013 and 2023, which may be taken as part of the student’s basic studies requirements. In addition, students opting for the international finance track must complete ACG 2021 as a prerequisite. Students should seek advisement from the Latin American and Caribbean Studies program advisor in 211 Bellamy about registering for business courses.

International Marketing/Management Track

MAN 3240 Organizational Behavior
MAN 3600 Multinational Business Operations (Prerequisites: ECO 2013, ECO 2023)
MAR 3023 Basic Marketing Concepts (Prerequisite: ECO 2023)

And six hours selected from:
MAN 4401 Management of Labor and Industrial Relations (Prerequisite: MAN 3240)
MAN 4605 Cross-Cultural Management (Prerequisite: MAN 3240)
MAN 4680 Selected Topics in International Management (Valencia, Spain) (Prerequisites: ECO 2013, ECO 2023, MAN 3600)
MAN 4701 Business and Society (Prerequisite: MAN 3240)
MAR 4156 Multinational Marketing (Prerequisite: MAR 3023, MAN 3600)

Another related course approved by the Latin American and Caribbean studies program advisor

International Finance Track

FIN 3244 Financial Markets, Institutions, and International Finance Systems (Prerequisites: ACG 2021, ECO 2013)
FIN 3403 Financial Management of the Firm (Prerequisites: ACG 2021, ECO 2023)
MAN 3600 Multinational Business Operations (Prerequisites: ECO 2013, ECO 2023)

And six hours selected from:
FIN 4424 Problems in Financial Management (Prerequisites: FIN 3244, FIN 3403)
FIN 4504 Investments (Prerequisites: FIN 3244, FIN 3403, STA 3014)
FIN 4514 Security Analysis and Portfolio Management (Prerequisite: FIN 4504)
FIN 4604 Multinational Financial Management (Prerequisites: FIN 3403, FIN 3244)
GEB 4455 Perspectives on Free Enterprise (Prerequisites: FIN 3244, FIN 3403)

Another related course approved by the LACS program advisor

Study Abroad

Students majoring in Latin American and Caribbean studies are strongly encouraged to study abroad. See https://international.fsu.edu/ for more information on the various options available through Florida State International Programs.

Students should consult with the Latin American and Caribbean Studies Director about any other study abroad programs they wish to pursue. Coursework taken in overseas locations must be approved in advance for credit toward the major.

Internship

The Latin American and Caribbean studies program encourages students to take advantage of internships with an area focus. Information on possible placements can be found on the International Studies Blackboard Organization site. All application materials, which are also available on the International Studies Blackboard Organization site, must be submitted and all internships must be approved a semester prior. See the Latin American and Caribbean Studies program advisor in 211 Bellamy for further information.

Honors in the Major

The Program in Latin American and Caribbean Studies offers honors in the major to encourage talented juniors and seniors to undertake independent and original work as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.
Minor in Latin American and Caribbean Studies

Students pursuing a minor in the program must complete eighteen semester hours of Latin American and Caribbean studies coursework beyond the liberal studies requirement. In this case none of the broader comparative concepts and theories courses will count toward the eighteen semester hour minimum. Students may select freely from all area-specific courses.

Approved Courses

Note: Descriptions of specific courses can be found under the individual departments in which they are taught. In addition to the courses listed below, special topics courses may be approved by the program director in any particular term. These courses appear on the term course lists and are available at the International Studies Blackboard Organization site as well as the program office in 211 Bellamy.

Area Specific Courses (twenty-four credit hours)

Anthropology

ANT 4163 Mesoamerican Archaeology (3)
ANT 4166r Regional Civilizations in Ancient Mesoamerica (3)

Additional Latin American and Caribbean Studies Courses (Six credit hours)

Select from any approved Latin American and Caribbean studies course or an approved internship.

Definition of Prefix

LAS—Latin American Studies

Undergraduate Courses

LAS 4905r. Directed Individual Study (3). May be repeated to a maximum of six semester hours when content varies. Can be repeated within the same semester.

LAS 4935r. Honors Work (3). This course allows students to participate in supervised research and produce a paper describing the results of that work. Open to participants in the University and department honors program. May be repeated to a maximum of nine semester hours.

LAS 4940r. Internship in Latin American and Caribbean Studies (1–6). Prerequisites: Completion of sixty semester hours, completion of fifteen semester hours in LACS, an overall or LACS GPA of 3.0, and advisor permission one semester in advance. This internship in an approved organization provides practical experience in a number of fields, in which the student may apply interdisciplinary knowledge of the region and specific disciplinary training. May be repeated to a maximum of twelve semester hours.
The following courses have been approved for the law and society program.

A primary concentration in law and society is available in the social science interdisciplinary major. It consists of introduction to law and society (POS 3691), either economics and the law (ECP 3451) or sociology of law (SYP 3540), and four other courses from the approved list of courses. To complete the social science major with a concentration in law and society, students shall be required to select two twelve semester hour minors from two social science departments. One of the minors must be in economics, political science, or sociology, and students must select twelve semester hours for the minor from a department’s courses included in the law and society curriculum. Students interested in the social science interdisciplinary major should refer to that departmental entry of this General Bulletin.

Requirements for a Minor in Law and Society

A minor in law and society shall consist of at least five courses from the designated curriculum, including law and society (POS 3691), and either sociology of law (SYP 3540) or economics and the law (ECP 3451), as well as the remaining courses. The remaining courses must be selected from the list of approved courses below.

Requirements for a Major

A primary concentration in law and society is available in the social science interdisciplinary major. It consists of introduction to law and society (POS 3691), either economics and the law (ECP 3451) or sociology of law (SYP 3540), and four other courses from the approved list of courses. To complete the social science major with a concentration in law and society, students shall be required to select two twelve semester hour minors from two social science departments. One of the minors must be in economics, political science, or sociology, and students must select twelve semester hours for the minor from a department’s courses included in the law and society curriculum. Students interested in the social science interdisciplinary major should refer to that departmental entry of this General Bulletin.

Approved Courses

The following courses have been approved for the law and society program. In addition to the required courses, students shall select courses for the law and society minor and the law and society concentration in the social science major from this list. See the “Interdisciplinary Program in Social Science” chapter of this General Bulletin for course prerequisites. Descriptions of the following courses can be found under the individual departments in which they are taught.

Economics

- ECO 4504 Public Sector Economics (3)
- ECO 4554 Economics of State and Local Government (3)
- ECP 3302 Economics of Natural Resources, Energy, and the Environment (3)
- ECP 3403 Business Organization and Market Structure (3)
- ECP 3451 Economics and the Law (3)
- ECP 4413 Government Regulation of Business (3)
- ECP 4613 Urban Economics (3)

Geography

- GEO 4340 Living in a Hazardous Environment (3)
- GEO 4372 Natural Resource Assessment and Analysis (3)
LEARNING AND COGNITION:  see Educational Psychology and Learning Systems

Interdepartmental Minor in LINGUISTICS

Curriculum Committee: Carolina Gonzalez, Michael Leeser, Antje Muntendam, Lara Reglero, and Gretchen Sunderman (Modern Languages and Linguistics)

Web Page: http://www.academic-guide.fsu.edu/minors.html#linguistics

Linguistics is concerned with the study of the nature of language. There are linguistic applications in the areas of anthropology, sociology, psychology, mathematics, computer sciences, philosophy, and audiology and speech pathology.

Undergraduate and graduate students who wish to minor in linguistics should contact the coordinator and minor advisor Dr. Lara Reglero to help them in designing courses of study that fill their personal and professional needs.

Requirements for a Minor in Linguistics

Undergraduate

Undergraduate students in linguistics must take at least twelve semester hours from the linguistics courses listed below; two of these must be core courses.

Core Courses

LIN 3041, LIN 4030, LIN 4040, LIN 4512, LIN 4905, LIN 4930

Other Courses

ANT 4640, LIN 3010, LIN 3200, LIN 4664, EXP 4640, PHI 3220, *SPN 4700, *SPN 4780

Note: Additional courses may count with approval of the linguistics curriculum committee.

*Spanish linguistics courses will NOT count toward both a major in Spanish and a minor in linguistics.

Graduate

Graduate students in linguistics must take at least fifteen semester hours from the linguistics courses listed below; two of these must be core courses.

Core Courses

LIN 5035, LIN 5045, LIN 5510

Other Courses

LIN 5908r, LIN 5932, SPN 5805

Note: Additional courses may count with approval of the linguistics curriculum committee.

MANAGEMENT

COLLEGE OF BUSINESS

Chair: Jack Fiorito; Professors: Douglas, Ferris, Fiorito, Hochwarter, Perrewé, Stepina; Associate Professors: Matherly, Van Iddekinge; Assistant Professors: Daniels, Wang; Senior Lecturers: Simmons, Trammel; Associate Lecturer: Diez-Arguelles; Assistant Lecturers: Decker, Newton, Shubrick; Francis Eppes Professor of Management: Ferris; Haywood and Betty Taylor Eminent Scholar in Business Administration: Perrewé; J. Frank Dame Professor of Management: Fiorito; Bank of America Professor of Management: Van Iddekinge; Jim Moran Professors of Business Administration: Hochwarter; C.P. Company Professor of Business Management: Anthony, Martinko

The management curricula provide students with an understanding of the nature of managerial work, including both the art and the science of managing. The curricula emphasize the management of human resources, managerial problem solving, and decision making. Within the management degree program, students choose to major in general management or human resource management consistent with their specific interests. The overall objective of these curricula is to prepare students for entry-level positions in small and large organizations, leading to line or staff management careers in either the public or private sector. Many graduates enter jobs as managerial associates, sales associates, or human resource professionals.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in general management and human resources management satisfy this requirement by earning a grade of “C–” or higher in CGS 2100 (state mandated business prerequisite requirement) or CGS 2518.

Required Risk in Business and Society Course

All undergraduates at Florida State University intending to enter a business major must complete RMI 2302, Risk in Business and Society, with a “C–” or better by the end of their sophomore year. Transfer students will be required to complete this course in their first semester at FSU.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit http://www.fivc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ACG X201 or ACG X202, or ACG X001 and ACG X011
2. ACG X071 or ACG X301
3. CGS X100 (or demonstrated competency) or CGS X100C or CGS X350 or CGS X570 or CGS X060 or CGS X531 or CGS X000 or ISM X000 or CGS X518
4. ECO X103
5. ECO X023
6. MAC X233 or MAC X230
7. STA X023 or STA X122 or QMB X100

Requirements for a Major in Management

All students must complete:

1. The University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin
2. The state of Florida common prerequisites for general management majors
3. At least sixty semester hours of courses in non-business disciplines
4. The general business core requirements for general management majors
5. The general business breadth requirements for general management majors
6. The major area requirements for general management majors

Note: To be eligible to pursue a general management major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements

All management majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

- BUL 3310 The Legal and Ethical Environment of Business (3)
- FIN 3403 Financial Management of the Firm (3)
- GEB 3213 Business Communications (3)
- MAN 3240 Organizational Behavior (3)
- MAR 3023 Basic Marketing Concepts (3)

General Business Breadth Requirements

All management majors must complete two courses as follows. Each course selected must be completed with a grade of “C–” or better.

- MAN 4720 Strategic Management and Business Policy (3)
- Plus one elective from the following list of courses:
  - FIN 3244 Financial Markets, Institutions, and International Finance Systems (3)
  - HFT 3240 Managing Service Organizations (3)
  - ISM 3003 Foundations of Management Information Systems (3)
  - MAN 3600 Multinational Business Operations (3)
  - MAR 3400 Professional Selling (3)
  - QMB 3200 Quantitative Methods for Business Decisions (3)
  - RIE 3043 Real Estate (3)
  - RMI 3011 Risk Management/Insurance (3)

Capstone Course

All management majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements

All management majors must complete six courses as listed below. A grade of “C–” or better must be earned in each course used to satisfy the general management major area requirements.

- MAN 4301 Human Resource Management (3)
- MAN 4701 Business and Society (3)
- Plus four electives from the following list of courses:
  - MAN 4143 Contemporary Leadership Challenges (3)
  - MAN 4401 Management of Labor and Industrial Relations (3)
  - MAN 4441 Negotiation and Conflict Management (3)
  - MAN 4605 Cross Cultural Management (3)
  - MAN 4930r Special Studies in Business (3)
  - MAN 4941 Field Study in Management (3)

Requirements for a Major in Human Resource Management

All students must complete:

1. The University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin
2. The state of Florida common prerequisites for human resource management majors
3. At least sixty semester hours of courses in non-business disciplines
4. The general business core requirements for human resource management majors
5. The general business breadth requirements for human resource management majors
6. The major area requirements for human resource management majors

Note: To be eligible to pursue a human resource management major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.
General Business Core Requirements
All human resource management majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

MAN 3240. Financial Management of the Firm (3)
MAN 3600. Multinational Business Operations (3)
MAN 3949r. Experiential Learning (0, S/U grade only.) Prerequisite: Instructor permission. This non-credit, experiential learning course offers students an opportunity to gain “real-world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

Prerequisite: MAN 3240. This course provides broad exposure to the theories and practice of effective leadership and supervision in today’s business and explores contemporary leadership challenges from a practical point of view, with opportunities to develop and practice effective leadership skills.

MAN 3949r. Experiential Learning (0, S/U grade only.) Prerequisite: Instructor permission. This non-credit, experiential learning course offers students an opportunity to gain “real-world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

MAN 4143. Contemporary Leadership Challenges (3). Prerequisite: MAN 3240. This course provides broad exposure to the theories and practice of effective leadership and supervision in today’s business and explores contemporary leadership challenges from a practical point of view, with opportunities to develop and practice effective leadership skills.

MAN 4201. Organizational Analysis and Change (3). Prerequisite: MAN 3240. This course covers the analysis of concepts and processes for effecting change in organizations.

MAN 4301. Human Resource Management (3). Prerequisite: MAN 3240. This course is a survey of the human resource management function in organizations. Topics include: selection, recruiting, training, compensation, and performance appraisal.

MAN 4320. Staffing (3). Prerequisites: MAN 3240 and MAN 4301. This course is a study of the design and operation of systems for employee recruitment and selection, including current practice and rules.

MAN 4330. Compensation (3). Prerequisites: MAN 3240 and MAN 4301. This course is a study of the methods and implications of making wage and salary decisions for recruiting and retaining employees.

MAN 4500. Training and Development (3). Prerequisites: MAN 3240 and MAN 4301. This course is a study of the various forms of training and development and their implementation both on and off the job.

MAN 4490. Current Issues in Human Resource Management (3). Prerequisites: MAN 3240 and MAN 4301. This course is a seminar that probes current topics in human resource management in depth. Emphasis is on the impact of recent legal and societal developments on human resource management practice.

MAN 4401. Management of Labor and Industrial Relations (3). Corequisite: MAN 3240. This course covers a managerial perspective of labor and manpower concepts and issues in industrial and postindustrial society and work organizations.

MAN 4441. Negotiation and Conflict Management (3). Prerequisite: MAN 3240. This course focuses on negotiation and conflict management in business and other organizational settings. The emphasis is on gaining an understanding of the negotiation process and strategies and developing effective negotiation and conflict management skills.

MAN 4605. Cross-Cultural Management (3). Prerequisite: MAN 3240. This course studies the unique issues of managing in non-native culture. Discusses management situations where members of more than one cultural group are included, along with strategies for maximum effectiveness in such situations.

MAN 4610. Resources and World Enterprises (3). This course focuses on the economics and politics of world energy. It examines OPEC, the world oil industry, consuming countries, and alternative energy sources.

MAN 4690r. Selected Topics in International Management (3). Prerequisites: ECO 2013, ECO 2023, and MAN 3600. This course covers selected topics in international management which vary depending upon the instructor for the course. Topics such as cultural influences on management, international personnel management, and other related management topics are discussed. May be repeated to a maximum of six semester hours.

MAN 4701. Business and Society (3). Prerequisite: MAN 3240. This course is an examination of current and future issues in business and society with emphasis on the social responsibility of business and future challenges for business in a pluralistic society.

MAN 4905r. Directed Individual Study (1–3). May be repeated to a maximum of nine semester hours.

MAN 4930r. Special Studies in Business (1–3). Prerequisite: Instructor permission. May be repeated to a maximum of nine semester hours as topics vary.

MAN 4941. Field Study in Management (1–3). (S/U grade only.) Prerequisite: Instructor permission. This course provides students with on-the-job experience in major area.

MAN 4970r. Honors Thesis (1–6). Prerequisite: Admission to the honors program. May be repeated to a maximum of nine semester hours. Six semester hours of thesis are required to complete honors in the major.

Graduate Courses

GEB 5074. Graduate Internship (1–6). (S/U grade only.) Prerequisite: Instructor permission. This graduate internship is designed for College of Business students who desire to gain real-world experience in the accounting field through on-the-job practice. Students work under the direction of an approved industry professional, a faculty advisor, and the internship director. May be repeated to a maximum of six semester hours.

IFS 2022. When Culture and Business Collide: Communication in an International Context (3). In this course, students engage in critical and creative thinking about contemporary problems and solutions in intercultural business communication. Students also grapple with these issues in both an international and domestic context.

MAN 3025. Concepts of Management (3). This course introduces the nature and process of management, with emphasis upon management of physical and human resources. (Credit not allowed for business majors.)

MAN 3240. Organizational Behavior (3). This course covers behavioral concepts, techniques, and applications for managing human resources in all types of organizations.
MAN 6979. Doctoral Seminar in Research (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

College of Business

Web Page: http://business.fsu.edu/academics/departments/marketing/
Chair: Michael Brady; Professors: Brady, Brusco, Cronin, Giunipero, Goldsmith, Hartline, Hofacker; Associate Professors: Kim, Lee, Smith; Assistant Professors: Bolander, Bonney, Mende, Scott, Shang, Stolze; Research Associate: Larsen; Associate in Marketing: Pallentino; Assistants in Marketing: Hopkins, McLaughlin; John R. Kerr Research Chair in Marketing: Cronin; Richard M. Baker Professor of Marketing: Goldsmith; Carl DeSantis Professors of Business Administration: Brady, Hofacker; Charles A. Bruning Professor of Business Administration: Hartline; Synovus Professor of Business Administration: Brusco

The marketing curriculum prepares students for successful careers in both the public and private sectors. Courses are oriented toward: (1) problem solving and management decision making; (2) providing knowledge of the tools, types of organization, and institutions utilized in performing marketing activities; and (3) developing the ability to plan and implement marketing policy, strategy, and procedures. Consistent with their interests and career goals, students may choose to major in either marketing, professional sales, or retail management within the marketing degree program.

The curriculum includes qualitative and quantitative elements with an emphasis on the successful deployment of marketing strategies, especially among the service sector enterprises that dominate our state and national economies. The curriculum is designed to impart knowledge and competence in marketing that will enable graduates to (1) progress well in the early stages of their careers; (2) analyze, plan, organize, coordinate, and control marketing activities; (3) think analytically and respond creatively; (4) communicate effectively; and (5) gain broad perspectives essential to the attainment of top management responsibilities.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in marketing, retail management, and professional sales satisfy this requirement by earning a grade of “C–” or higher in CGS 2100 (state mandated business prerequisite requirement) or CGS 2518.

Required Risk in Business and Society Course

All undergraduates at Florida State University intending to enter a business major must complete RMI 2302, Risk in Business and Society, with a “C–” or better by the end of their sophomore year. Transfer students will be required to complete this course in their first semester at FSU.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:
1. ACG X021 or ACG X022, or ACG X001 and ACG X011
2. ACG X071 or ACG X301
3. CGS X100 (or demonstrated competency) or CGS X100C or CGS X530 or CGS X570 or CGS X060 or CGS X531 or CGS X000 or ISM X000 or CGS X518
4. ECO X013
5. ECO X023
6. MAC X233 or MAC X230
7. STA X023 or STA X122 or QMB X100

Requirements for a Major in Marketing

All students must complete:
1. the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin;
2. the state of Florida common prerequisites for marketing majors;
3. at least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments (3);
4. the general business core requirements for marketing majors;
5. the general business breadth requirements for marketing majors;
6. the major area requirements for marketing majors.

Note: To be eligible to pursue a major in marketing, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements
All marketing majors must complete the following five courses. A grade of “C–” or better must be earned in each course.
- BUL 3310 The Legal and Ethical Environment of Business (3).
- FIN 3403 Financial Management of the Firm (3).
- GEB 3213 Business Communications (3).
- MAN 3400 Professional Selling (3).
- MAR 3023 Basic Marketing Concepts (3).

General Business Breadth Requirements
All marketing majors must complete two courses as follows. Each course selected must be completed with a grade of “C–” or better. No course may be used to satisfy part of the general business breadth requirements and part of the major area requirements.
- MAN 3600 Multinational Business Operations (3).
- or
- MAR 3400 Professional Selling (3).
- QMB 3200 Quantitative Methods for Business Decisions (3).

Capstone Course
All marketing majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements
All marketing majors must complete six courses as listed below. A grade of “C–” or better must be earned in each course used to satisfy the marketing major area requirements. No course may be used to satisfy part of the marketing major area requirements and part of the general business breadth requirements. Also, no course may be used to satisfy a marketing major elective and a requirement or elective in one of the other majors in the marketing department.
- MAN 3504 Service Operations Management (3).
- MAR 3503 Consumer Behavior (3).
- MAR 4613 Marketing Research (3).

Requirements for a Major in Professional Sales
All students must complete:
1. the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin;
2. the state of Florida common prerequisites for professional sales majors;
3. at least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments (3);
4. the general business core requirements for professional sales majors;
5. the general business breadth requirements for professional sales majors; and
6. the major area requirements for professional sales majors.

Note: To be eligible to pursue a major in professional sales, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements
All professional sales majors must complete the following five courses. A grade of “C–” or better must be earned in each course.
- BUL 3310 The Legal and Ethical Environment of Business (3).
- FIN 3403 Financial Management of the Firm (3).
- GEB 3213 Business Communications (3).
- MAN 3400 Professional Behavior (3).
- MAR 3023 Basic Marketing Concepts (3).

General Business Breadth Requirements
All professional sales majors must complete the two courses as follows. Each course must be completed with a grade of “C–” or better. No course may be used to satisfy part of the general business breadth requirements and part of the professional sales major area requirements.
- MAR 3400 Professional Selling (3).
- QMB 3200 Quantitative Methods for Business Decisions (3).

Capstone Course
All professional sales majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements
All professional sales majors must complete six courses as listed below. A grade of “C–” or better must be earned in each course used to satisfy the professional sales major area requirements. No course may be used to satisfy part of the professional sales major area requirements and part of the general business breadth requirements. Also, no course may be used to satisfy a sales major elective and a requirement or elective in one of the other majors in the marketing department.
- MAR 4403 Sales Management (3).
- MAR 4415 Advanced Sales Techniques (3).
- MAR 4613 Marketing Research (3).
- MAR 4946 Professional Sales Practicum (3).

Requirements for a Major in Retail Management
All students must complete:
1. the University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin;
2. the state of Florida common prerequisites for marketing majors
3. at least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments (3)
4. the general business core requirements for marketing majors
5. the general business breadth requirements for marketing majors
6. the major area requirements for marketing majors

Note: To be eligible to pursue a major in retail management, students must meet their admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements
All retail management majors must complete the following five courses. A grade of “C-” or better must be earned in each course.

SUL 3310 The Legal and Ethical Environment of Business (3).
FIN 3403 Financial Management of the Firm (3).
GEB 3213 Business Communications (3).
MAN 3240 Organizational Behavior (3).
MAR 3023 Basic Marketing Concepts (3).

General Business Breadth Requirements
All retail management majors must complete two courses as follows. Each course selected must be completed with a grade of “C-” or better. No course may be used to satisfy part of the general business breadth requirements and part of the marketing major area requirements.

MAN 3600 Multinational Business Operations (3).
OR
MAR 3400 Professional Selling (3).
QMB 3200 Quantitative Methods for Business Decisions (3).

Capstone Course
All retail management majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements
All retail management majors must complete six courses as listed below. A grade of “C-” or better must be earned in each course used to satisfy the retail management major area requirements. No course may be used to satisfy part of the retail management major area requirements and part of the general business breadth requirements. Also, no course may be used to satisfy a Retail Management major elective and a requirement or elective in one of the other majors in the Marketing Department.

MAR 3231 Retailing Management (3).
MAR 4203 Logistics and Supply Chain Management (3).
MAR 3503 Consumer Behavior (3).
MAR 4945 Retail Practicum (3).

Plus two electives from the following list of courses:
CTE 4822 Quantitative Merchandising Management (3).
ENT 4014 Creating New Ventures I: Opportunity Recognition and Market Feasibility (3).
MAN 3504 Service Operations Management (3).
MAN 3600 Multinational Business Operations (3).
MAN 4301 Human Resource Management (3).
MAR 3233 Promotional Management (3).
MAR 3400 Professional Selling (3).
MAR 3461 Principles of Purchasing (3).
MAR 3711 Sports, Recreation, and Entertainment Marketing (3).
MAR 4156 Multinational Marketing (3).
MAR 4403 Sales Management (3).
MAR 4415 Advanced Sales Techniques (3).
MAR 4462 Seminar in Purchasing/Materials Management (3).
MAR 4613 Marketing Research (3).
MAR 4614 Advanced Marketing Research (3).
MAR 4717 Strategic Sports Marketing (3).
MAR 4841 Services Marketing (3).
MAR 4939r Marketing Seminar (3).
MAR 4941 Marketing Internship (3).

* MAR 3400 cannot be used to satisfy the General Breadth Elective and the major requirements.

Definition of Prefixes
GEB—General Business
MAN—Management
MAR—Marketing
QMB—Quantitative Methods in Business

Undergraduate Courses

MAN 3504. Service Operations Management (3). Prerequisites: CGS 2100 and QMB 3200. This course covers methodology and theory of the design and management of productive systems, especially in the services industry. Includes quantitative techniques and procedures for process analysis.

MAN 3600. Multinational Business Operations (3). Prerequisites: ECO 2013 and ECO 3203. This course surveys the essentials of international production and trade and the problems managers encounter in international business environments.

MAR 3023. Basic Marketing Concepts (3). Prerequisites: ECO 2013 and one behavioral science course. This course is a required prerequisite for all marketing courses. Gives the student an understanding of the decision areas and the ability to utilize marketing concepts to make business decisions.

MAR 3231. Retailing Management (3). Prerequisite: MAR 3023. This course is an intensive training in the rudiments of retail operations.

MAR 3323. Promotional Management (3). Prerequisite: MAR 3023. This course focuses on issues related to management of promotional tools including advertising, personal selling, sales promotion, public relations, and publicity.

MAR 3400. Professional Selling (3). Corequisite: MAR 3023. This course addresses the application of behavioral and persuasive communication theories, as well as the techniques necessary to develop effective personal selling skills within organizations.

MAR 3461. Principles of Purchasing (3). Prerequisite: MAR 3023. This course is an introduction to the concepts, principles, and techniques of purchasing physical resources for all types of organizations.

MAR 3503. Consumer Behavior (3). Prerequisite: MAR 3023. This course acquaints the student with the fundamental theories from the behavioral sciences as applied to the consumer decision making process.

MAR 3711. Sports, Recreation and Entertainment Marketing (3). Prerequisite: MAR 3023. This course provides students a framework for understanding how marketing strategies and tactics can be successfully applied within sports, and within recreational and entertainment organizations.

MAR 4156. Multinational Marketing (3). Prerequisites: MAR 3023 and MAN 3600. This course introduces the student to marketing management decision making in international environments through the use of cases and/or business games.

MAR 4203. Logistics and Supply Chain Management (3). Prerequisite: MAR 3023. This course introduces the student to the management of logistics activities involved in the flow of goods, information, and funds throughout the supply chain.

MAR 4403. Sales Management (3). Prerequisites: MAR 3023 and MAR 3400. This course exposes the student to concepts, activities, and analysis pertaining to sales and the management of the sales force.

MAR 4415. Advanced Sales Techniques (3). Prerequisites: MAR 3023 and MAR 3400. This course builds upon and enhances student skills and knowledge developed in the basic professional selling course. Focus is on using a strategic and consultative sales model to develop, manage, and deliver realistic sales presentations.

MAR 4462. Seminar in Purchasing/Materials Management (3). Prerequisite: MAR 3461. This course covers advanced concepts in purchasing and materials management. Emphasis is on recent research and current practice to achieve strategic sourcing objectives.

MAR 4524. Consumer Demand Analytics with Big Data (3). This course is an advanced undergraduate class for mainly business students. However, students from economics, engineering, and other disciplines may also find it useful.

MAR 4613. Marketing Research (3). Prerequisites: MAR 3023 and QMB 3200. This course examines marketing research as an information-providing activity for the purpose of management decision making.

MAR 4614. Advanced Marketing Research (3). Prerequisite: MAR 4613. This course provides experience in designing and conducting actual marketing research studies.

MAR 4717. Strategic Sports Marketing (3). Prerequisites: MAR 3023 and MAR 3711. This course enables students to conduct strategic analyses relating to the marketing of sports. Topics include a wide range of issues within the realm of professional sports, in an interactive seminar and a workshop-like environment.

MAR 4721. Electronic Marketing (3). Prerequisite: MAR 3023. This course examines Internet communication, direct sales through electronic commerce, as well as Internet-based promotional communications.

MAR 4841. Services Marketing (3). Prerequisite: MAR 3023. This course examines marketing in the service industries with particular emphasis on unique aspects of services marketing, the service-marketing mix, and the implementation of service strategies.

MAR 4860. Customer Relationship Management (3). Prerequisite: MAR 3023. This course introduces students to the basic theories and terminology of customer relationship management. Special emphasis is placed on customer retention and technological tools for enhancing customer relationships.

MAR 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.
MATERIALS SCIENCE AND ENGINEERING

THE GRADUATE SCHOOL
Web Page: http://materials.fsu.edu
Director: Eric Hellstrom

Materials Science and Engineering is an interdisciplinary graduate program that leads to the degrees of Master of Science (MS) and Doctor of Philosophy (PhD) in Materials Science and Engineering. Students interested in this program have a wide variety of backgrounds: engineering disciplines (including: biomedical, civil, chemical, computer, engineering physics, environmental, industrial, manufacturing, materials science, mechanical), applied mathematics, biology, chemistry, geology, and physics. Participating faculty hold appointments in Biological Science, Chemical and Biomedical Engineering, Chemistry and Biochemistry, Civil and Environmental Engineering, Electrical and Computer Engineering, Industrial and Manufacturing Engineering, Mechanical Engineering, Physics, and Scientific Computing.

The curriculum requires core and specialization courses, plus a thesis or dissertation. The core courses are designed to give students from the various disciplines a common background in materials. The courses for the degree are taught within the participating departments.

MATHEMATICS EDUCATION:
see Middle and Secondary Education
Combined BS/MS Degrees

This program in mathematics is built on the department’s four majors at the graduate level: (pure) mathematics, applied and computational mathematics, biomathematics, and financial mathematics. With the sharpened focus of university experience, a student from any of the department’s four undergraduate options might discover mathematical interests to pursue in any one of the graduate options.

This combined degree program allows the motivated and focused student in either the mathematics or the actuarial science program to complete both a bachelor’s and master’s degree in nine to eleven semesters. Up to twelve semester hours of courses from a master’s program may be dual-eligible for credit toward the bachelor’s degree.

Academic Performance

A grade of “C–” or better is required in all courses to be counted toward these degrees. A student who has accumulated more than one grade below a “C–” (including grades of U) in the calculus sequence MAC 2311, MAC 2312, MAC 2313 at Florida State University or elsewhere, whether repeated or not, will not be permitted to continue as a major in the department. A student who has accumulated more than five grades below “C–” (including grades of U) in any mathematics or collateral course required for the degree taken for college credit at Florida State University or elsewhere, whether repeated or not, will not be permitted to continue as a major in the department. The collateral courses include COP 3014 or ISC 3313, PHY 2048C, STA 4321 for all options. For biomathematics, it includes the collateral biology, chemistry, and physics. For actuarial science, it includes the collateral courses with prefixes ACG, ECO, FIN, RMI, or STA. For FSU-Teach, it includes the collateral coursework with prefixes BSC, HIS, MAT, RED, SMT, or TSL.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in actuarial science, applied mathematics, biomathematics, and mathematics/FSU-Teach satisfy this requirement by earning a grade of “C–” or higher in COP 3014 or ISC 3313.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Mathematics

1. COP XXXX: one scientific programming course for three credit hours designed for computer science majors
2. MAC X311
3. MAC X312
4. MAC X313
5. BSC XXXX/XXXXL or CHM XXXX/XXXXL or GLY XXXX/XXXXL or PHY XXXX/XXXXL: one laboratory based science course for four credit hours designed for science majors
6. MAP X302

Note: A “C” grade or better in all coursework is required for admission.

Actuarial Science

1. COP XXXX: one scientific programming course for three credit hours designed for computer science majors
2. ECO X013
3. ECO X023
4. MAC X311
5. MAC X312
6. MAC X313

Departmental Programs

There are five majors leading to the bachelor’s degree: applied and computational mathematics, pure mathematics, biomathematics, mathematics/FSU-Teach, and actuarial science (please consult the “Program in Actuarial Science” section of this Undergraduate Bulletin). In any of these majors, students who intend to pursue graduate work in higher mathematics are encouraged to include appropriate mathematics sequences. Under the direction of a faculty member, a student may pursue a flexible major program to fit particular interests or an individual research project under honors in the major.
FSU-Teach Mathematics

1. COP XXXX: one scientific programming course for three credit hours designed for computer science majors
2. MAC X311
3. MAC X312
4. MAC X313
5. BSC XXXX/XXXXL or CHM XXXX/XXXXL or PHY XXXX/ XXXXL or GLY XXXX/XXXXL: one laboratory based science course for four credit hours designed for science majors
6. MAP X302
7. SMT X043
8. SMT X053

Note: A “C” grade or better in all coursework is required for admission. Transfer students will be able to take SMT X043 and SMT X053 when admitted to upper division.

Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin. The student should also obtain, from the departmental office and Web site, revisions to the degree guidelines since this printing.

The Bachelor of Arts (BA) degree in mathematics or actuarial science can be obtained by completion of the Bachelor of Science (BS) degree requirements plus additional courses required by the University as set forth in the “Undergraduate Degree Requirements” chapter of this General Bulletin.

Students should complete the state of Florida common program prerequisites, including the physics (all the Mathematics majors) or the economics (Actuarial Science majors) requirements, during the first two college years. Actuarial Science majors should also complete the accounting course during the first two college years. Note that all majors have a computing requirement that can be used as the computing prerequisite course, but not vice versa.

A student who expects to continue on to doctoral work in mathematics is encouraged to complete the foreign language requirement in French, German, or Russian.

Mathematics courses at the 4000 level applied toward any departmental major must be taken at Florida State University unless specifically exempted by the chair on written request.

In order to obtain final graduation clearance from the Department of Mathematics, all majors must complete an exit survey.

Honors in the Major

The Department of Mathematics offers honors in the major designed to introduce the student to the process of independent and original research. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

FSU-Teach Program in Teaching Mathematics

For those interested in teaching mathematics, FSU-Teach is an innovative approach to teacher education that involves collaboration between scientists, mathematicians and education faculty at Florida State University. In FSU-Teach, students will develop deep science or mathematics knowledge and the knowledge, skill, and experience needed to be an effective science or math teacher. The program will pay for tuition for the first two courses, and work study positions with scientists, mathematicians and local schools are available. For more information, see our Web site: http://FSU-Teach.fsu.edu.

Second Majors

Students may double major in actuarial science and any of the four mathematics majors (pure, applied/computational, biomedical or Math/FSU-Teach) by completing all of the prerequisite and degree requirements for each selected program. A student may also complete a second major in another department. The flexible plan major is particularly appropriate for students in other majors who seek deeper mathematics study, or students in mathematics who have interdisciplinary interests. Mathematics has no restrictions on the number of hours that can overlap with another major.

Requirements for a Minor in Mathematics

A minor in mathematics consists of twelve semester hours in courses with prefixes MAA, MAC, MAD, MAP, MAS, MAT, MGF, MHF, and MTG, but not including any of the courses numbered 1XXX, or MAC 2233. A grade of “C–” or better must be earned in each course counted toward the minor.

Baccalaureate Degree in Mathematics

Courses required for each of the degree options in mathematics are MAP 2302 and MAS 3105. The student must exhibit proficiency in a scientific computer programming language, and must also satisfy the University’s computer skills competency requirement. Students will normally complete COP 3014 or ISC 3313 to satisfy both those requirements, although the former may be shown by courses in C, C++, FORTRAN, Java, or another approved high-level language. STA 4321 is required. Representative requirements for the four mathematics major options follow. Students should refer to the departmental Web site (http://www.math.fsu.edu) or the departmental office (208 LOV) for the most current information.

Major in Mathematics. In addition to the state of Florida common program prerequisites and the courses above, the student will complete PHY 2048C and will complete the courses MAS 4302; MAA 4224 or 4226; and four of the following, of which at least two must be at the 4000 level: MAA 2247, 4402; MAD 2104, 3105, 3703, 4704; MAP 4104, 4153, 4180, 4202, 4216, 4341, 4342; MAS 4106, 4203, 4303; MAT 4934; MGF 3301; MHF 4302; MTG 4302. At least one of the sequences following, or an approved substitution, must be included: MAA 4226-4227, MAA 4402 and MTG 4302, MAD 3703- 4704, MAP 4341-4342, or MAS 4302-4303. Additional computer languages are recommended.

A student intending to do graduate work in pure mathematics should take MAA 4226-4227 and MAS 4302-4303 as well as MAA 4402 and MTG 4302.

Major in Applied Mathematics. In addition to the state of Florida common program prerequisites and the courses above, the student will complete PHY 2048C (PHY 2049C is highly recommended) and the courses MAD 3703; MAP 4103 and 4341; and three of the following: MAA 4224 or 4226, 4227, 4402; MAD 4704; MAP 4153, 4180, 4202, 4216, 4342; MAS 4106; MAT 4934.

Major in Biomathematics. This modern major can lead to employment in the area of biological applications, to medical school, or to graduate school in mathematical biology or the sciences. In addition to the state of Florida common program prerequisites, the student will complete collateral science courses including BSC 2010, 2010L, 2011; CHM 1045C, 1045L; PHY 2048C; and at least one upper-division course on a list of such courses, typically PCB 3063. No additional minor is required. MAP 2480 and MAP 4481 are required, along with additional elective requirements; students should consult the departmental office or the Web site for exact elective requirements.

Major in Mathematics/FSU-Teach. A new mathematics major for students in the FSU-Teach program. In addition to what was mentioned above (i.e. the state of Florida common program prerequisites, COP 3014, MAP 2302, MAS 3105, and STA 4321), the student will complete PHY 2048C and a course in each of four mathematical areas of Analysis, Algebra, Geometry and Modeling and two additional electives (one at the 3000 level or above). The courses acceptable for each mathematical area are: for Algebra: MAS 3301, MAS 4203 or MAS 4302; for Analysis: MAA 4402, MAA 4224 or MAA 4226; for Geometry: MTG 4212; for Modeling: MAP 4103, MAP 4175, MAP 4180 or MAP 4481; and for electives: MAA 2227, MAA 2104, MAD 3105, MAP 4170, MAP 4153, MAP 4202, MAP 4216, MAP 4341, MAS 4106, MAS 4303, MGF 3301, MHF 4302, MTG 4302 or additional courses from the Algebra, Analysis, Geometry, and/or Modeling groups. The FSU-Teach educational courses are a collateral major and can count as the minor for the Mathematics/FSU-Teach option.

Note: In order to obtain final graduation clearance from the Department of Mathematics, all majors must complete an exit survey.

Baccalaureate Degree in Actuarial Science

In addition to the state of Florida common program prerequisites, there are interdisciplinary degree requirements. Representative requirements include: MAP 4170, 4175, COP 3014 or equivalent; and four repetitions of actuarial tutorial MAT 4930r; STA 4321 is required.

The student must also take the following courses in business and economics: ACG 2021; ECO 2013 or 3203, and ECO 2023 or 3101; FIN 3403 and 4504; RMI 3011. These courses satisfy the requirements for a minor in business, and no additional minor is required.

Note: For the most recent information concerning course requirements for this program, please refer to http://www.math.fsu.edu.

Additional requirements include a total of six courses from three course groups. Students must complete:
Minor or Second Major

Information concerning acceptable minors and second majors for students majoring in a department program is available from the departmental office. The required computer science, physics, and statistics courses are collinear and may be counted toward a minor in the appropriate department.

Prerequisite Courses

Before taking any mathematics course, the student must complete with a grade of “C–” or better each course prerequisite to that course. Moreover, a student who earns a “C–” or better in a course with one or more stated or implied prerequisites may not subsequently earn credit in the prerequisite course(s). For example, a student who has earned a “C–” or better in MAC 2312 may not subsequently enroll in MAC 1105, 1114, 1140, or 2311.

Credit Note 1. In exception to the preceding paragraph, a transfer student may take MAC 1105 for credit even though the student has a “C–” or better in a course that has been equated to a course for which MAC 1105 is prerequisite, provided the student has taken the AMP (Advanced Mathematics Placement) test and has not yet satisfied the Area I liberal studies requirement in mathematics.

Credit Note 2. In cases in which a student has earned a “D+”, “D”, or “D–” in a course and subsequently takes a similar course at the same level, the hours toward graduation for the first course will be disallowed as soon as the student passes the second course. These cases are: MAC 2233 after MAC 2311; MAC 2311 after MAC 2233.

Credit Note 3. Credit cannot be obtained for both MAD 2104 and MGF 3301.

Definition of Prefixes

MAA—Mathematics: Analysis
MAC—Mathematics: Calculus and Precalculus
MAD—Mathematics: Discrete
MAE—Mathematics Education
MAP—Mathematics Applied
MAS—Mathematics: Algebraic Structures
MAT—Mathematics
MGF—Mathematics: General and Finite
MHT—Mathematics: History and Foundations
MTG—Mathematics: Topology and Geometry
OCG—Physical Oceanography

Undergraduate Courses

MAA 4224. Introduction to Analysis I (3). Prerequisites: MAC 2313, MAS 3105, and prior experience with mathematical proofs (MGF 3301, MAD 2104 or other proving experience). Not open to students with credit in MAA 2246. This course is a rigorous treatment of elementary calculus. Topics include the completeness of the real numbers, sequences and series, limits and continuity, derivatives, integrals, the Fundamental Theorem of Calculus, and sequences and series of functions. Students intending graduate study in mathematics should take MAA 4226.

MAA 2246. Advanced Calculus I (3). Prerequisites: MAC 2313, MAS 3105, and prior experience with mathematical proofs (MGF 3301, MAD 2104 or other proving experience). This course covers functions, sequences, limits, continuity, uniform continuity; differentiation; integration; convergence, uniform convergence. For strong students with advisor approval only.

MAA 4227. Advanced Calculus II (3). Prerequisite: MAA 4226. This course is a continuation of MAA 4226.

MAA 4302. course variables (3). Prerequisite: MAC 2313. This course covers analytic functions, Cauchy-Riemann conditions; complex integration, Cauchy’s theorem and integral formula; power series, analytic continuation, Riemann surfaces; residues and applications; conformal mapping.

MAA 4394r. Topics in Analysis (1-3). Prerequisite: Instructor permission. Special topics course. May be repeated to a maximum of twelve semester hours. May be repeated within the same semester.

MAC 1105. College Algebra (3). Prerequisite: MAT 1033 with a grade of “C–” or better or a suitable mathematics examination placement score. Recommended background: two years of high school algebra. This course is a review of algebraic operations, equations, and inequalities; functions and functional notation; graphs; inverse functions; linear, quadratic, rational function; absolute value; radicals; exponential and logarithmic functions; system of equations and inequalities; applications. On basis of test scores the student may be required to take a community college course before MAC 1105.

MAC 1114. Analytic Trigonometry (2). Prerequisite: MAC 1105. This course covers trigonometric functions, inverse trigonometric functions and their graphs; identities and cofunctional equations; solution of triangles, trigonometric form of complex numbers; DeMoivre’s theorem and nth roots; introduction to plane vectors.

MAC 1140. Precalculus Algebra (3). Prerequisite: MAC 1105 or suitable mathematics examination placement score. This course covers functions and graphs, especially higher degree polynomial, rational, exponential, and logarithmic functions; systems of equations; solution of linear systems, matrix methods; determinants; sequences and series; induction; and the binomial theorem. The course also explores applications, approximation, and methods of proof. May be taken concurrently with MAC 1114.

MAC 1147. Precalculus Algebra/Trigonometry (5). Prerequisite: MAC 1105 or suitable mathematics examination placement score. This course is a one-semester course encompassing the topics of MAC 1140 (Precalculus Algebra) and MAC 1114 (Analytic Trigonometry). See the topics for MAC 1140 and MAC 1114.

MAC 2233. Calculus for Business (3). Prerequisite: MAC 1105. This course covers limits, continuity, first and higher derivatives, and the differential, with applications to graphing, rates of change, and optimization methods; techniques of integration and applications; introduction to multivariable calculus. Not open to students who have credit in MAC 2311 with a grade of “C–” or better.

MAC 2311. Calculus with Analytic Geometry I (4). Prerequisites: MAC 1147; or MAC 1140 and MAC 1144; or suitable mathematics examination placement score. This course covers polynomial, trigonometric, exponential, and logarithmic functions; first and second derivatives and their interpretations; definition and interpretation of the integral; differentiation rules; implicit differentiation; applications of the derivative; anti-derivatives; fundamental theorem of calculus. This course must be taken for reduced credit by students with prior credit for some of the content.

MAC 2312. Calculus with Analytic Geometry II (4). Prerequisite: MAC 2311 or suitable mathematics examination placement score. This course covers functions of several variables and their graphical representations; vectors; partial derivatives and gradients; optimization; multiple integration; polar, spherical, and cylindrical coordinate systems; curves; vector fields; line integrals; flux integrals; divergence theorem and Stokes’ theorem. This course must be taken for reduced credit by students with prior credit for some of the content.

MAC 2313. Calculus with Analytic Geometry III (5). Prerequisite: MAC 2312. This course covers Taylor’s theorem, infinite sequences and series, vector functions, partial derivatives and gradients; optimization; multiple integration; polar, spherical, and cylindrical coordinate systems; curves; vector fields; line integrals; flux integrals; divergence theorem and Stokes’ theorem. This course must be taken for reduced credit by students with prior credit for some of the content.

MAC 2104. Discrete Mathematics I (3). Prerequisite: MAC 2311 or COP 3014 and MAC 1140. Recommended prerequisite: MAC 2311. This course covers techniques of definition and logical argument, sets and functions, propositional logic, introduction to graphs and relations, and applications. Mathematics majors should take MGF 3301 instead of MAC 2104.

MAC 3105. Discrete Mathematics II (3). Prerequisite: MAC 2104 or MGF 3301. Recommended prerequisite: MAC 2311. This course covers techniques of definition and logical argument, graphs and digraphs, relations, Boolean algebra, and applications.

MAC 3703. Numerical Analysis I (3). Prerequisites: MAC 2312 with a grade of “B–” or better or MAC 2313 with a grade of “C–” or better, MAS 3105, and competence in a programming language suitable for numeric computations, such as C, C++, Fortran, Java, or Python. This course covers root finding, interpolation and polynomial approximation, numerical differentiation and integration, direct and iterative methods for systems of linear equations.

MAC 4704. Numerical Analysis II (3). Prerequisites: MAC 3703 and MAP 2302. This course covers approximation theory, numerical solution of nonlinear equations, boundary value problems and initial value problems for ordinary differential equations.

MAC 4934r. Topics in Discrete or Computational Mathematics (1-3). Prerequisite: Instructor permission. Special topics course. May be repeated to a maximum of twelve semester hours. May be repeated within the same semester.

MAE 4813. Number Systems (4). This course investigates, compares, and contrasts principles and operations related to finite and infinite subsets of the real numbers with an emphasis on understanding. Not open to students majoring in mathematics.

MAE 4815. Elements of Algebra (3). This course covers the algebra of sets and the algebra of real numbers. Concepts rather than rote manipulations are emphasized. Not open to students majoring in mathematics.

MAE 4816. Elements of Geometry (3). This course explores a variety of traditional and innovative geometric topics via a hands on approach. Topics include congruence, similarity, Pythagorean triples, and areas of curvilinear figures. Not open to students majoring in mathematics.

MAE 4873. Introduction to Applications of Mathematics for Teachers (2). Prerequisite: A 2000-level course in mathematics or two years experience in teaching high school mathematics. This course offers an introduction to applications of mathematics for teachers. Teachers with prior experience only.

MAE 4874. Fundamental Principles of Algebra (2). Prerequisites: A 2000-level course in mathematics or two years experience in teaching secondary school mathematics. This course is not open to students majoring in mathematics.

MAP 2302. Ordinary Differential Equations (3). Prerequisite: MAC 2312 with a grade of “B–” or better or MAC 2313 with a grade of “C–” or better. This course covers first order, linear, separable, and exact first order equations, first order linear equations, power series solutions, Laplace transforms, numerical methods. Not open to students having credit in MAP 3305.

MAP 2480. BiocalcI Computer Laboratory (1). Prerequisite: MAC 2311. This computer laboratory applies calculus methods and mathematical programming software to assist students in solving problems from biology, medicine, and psychology.
MAP 3305. Engineering Mathematics I (3). Prerequisite: MAC 2313 or MAC 2312 with a grade of “B-” or better. This course covers ordinary differential equations, Laplace transform, and linear algebra: determinants, matrices, eigenvalues, and eigenvectors. Not open to students having credit in MAP 2302.

MAP 3306. Engineering Mathematics II (3). Prerequisites: MAC 2313 and MAP 2302 or MAP 3305. This course offers Fourier series and Fourier transforms, introduction to partial differential equations. Not open to students having credit in MAP 4303.

MAP 4303. Mathematica and Modeling (3). (S/U grade only.) Prerequisite: MAC 2313, MAP 2302, MAS 3105, and PHY 2048C. This course covers the application of mathematics to real life situations, construction of mathematical models, use of elementary and advanced mathematical methods, and case studies.

MAP 4153. Vector Calculus with Introduction to Tensors (3). Prerequisite: MAC 2313. This course covers vector calculus: gradient, divergence, curl; differential operators in orthogonal curvilinear coordinates; line, surface, and volume integrals; Stokes’ and Green’s theorems; subscript notation; Cartesian tensors; and applications.

MAP 4170. Introduction to Actuarial Mathematics (4). Prerequisite: MAC 2312. This course covers single- and multiple-life survival analysis; mortality laws, deterministic methods, and contingent payments and annuities; premium principles and reserves for continuous, discrete, and semi-continuous insurance products; multiple decrement theory (competing risks) and applications.

MAP 4202. Optimization (3). Prerequisites: MAC 2313, MAD 3703, and MAS 3105. This course covers linear programming, unconstrained optimization, searching strategies, equality and inequality constrained problems.

MAP 4216. Calculus of Variations (3). Prerequisites: MAP 2302 and MAA 4226 or MAA 4224 or MAA 4341. This course covers fundamental problems, weak and strong extremum, necessary and sufficient conditions, Pontryagin principle, dynamic programming, control theory and Pontryagin maximum principle.

MAP 4361. Elementary Partial Differential Equations I (3). Prerequisites: MAC 2313 and MAP 2302 or MAP 3305. This course covers separations of variables, Fourier Series, Sturm-Liouville problems, multidimensional initial boundary value problems, nonhomogeneous problems, Eigenfunction, Green function, infinite domain problems, the wave equation, radiation condition, spherical harmonics.

MAP 4362. Elementary Partial Differential Equations II (3). Prerequisite: MAP 4341. This course covers solution of first-order quasi-linear partial differential equations, classification and reduction to normal form of linear second-order equations, Green’s function, infinite domain problems, the wave equation, radiation condition, spherical harmonics.

MAP 4481. Mathematical Modeling in Biology (3). Prerequisite: MAC 2312. Recommended prerequisite: MAP 2480. This course is an introduction to the use of mathematical models in biology. Linear and nonlinear difference and ordinary differential equations, linear stability analysis, phase plane analysis. Applications may include population biology, infectious disease, chemical kinetics, and physiology.

MAP 4934. Special Topics in Applied Mathematics (1–3). Prerequisite: Instructor permission. Special topics course. May be repeated to a maximum of twelve semester hours.

MAT 3033. Intermediate Algebra (3).

MAT 3503. Functions and Modeling (3). Prerequisite: MAC 2312. This course includes group and individual activities designed to strengthen knowledge of, and connections among, topics in secondary and college mathematics. Problem-solving; gathering and analyzing data; and modeling using linear, polynomial, and trigonometric functions, and parametric and polar equations are also explored. Students discuss and present work in class, and make use of various technologies.

MAT 3711. Introduction to Computation (3). Prerequisite: MAC 2312. This course covers the generalities of programs for symbolic computation; programming mathematics; elementary computer algebra: manipulating polynomials, Groebner bases; elementary computer analysis; integration techniques.

MAT 3930r. Special Topics in Mathematics (1–3). May be repeated within the same term to a maximum of twelve semester hours.

MAT 4906r. Directed Individual Study (1–4). May be repeated within the same term to a maximum of thirty semester hours.

MAT 4930r. Special Topics in Mathematics (1–3). (S/U grade only.) May be repeated to a maximum of twelve semester hours.

MAT 4931r. Special Topics in Mathematics (1–3). May be repeated to a maximum of six semester hours when subject matter changes.

MAT 4934r. Honors Work (3). May be repeated to a maximum of nine semester hours.

MAT 4945r. Undergraduate Professional Internship (1–3). (S/U grade only.) Prerequisite: Instructor permission. This course is a supervised internship individually assigned to accommodate the student’s professional development in an area of application (e.g., actuarial science; industrial applications). May be repeated to a maximum of three semester hours.

MGF 1106. Mathematics for Liberal Arts I (3). Prerequisite: MAT 1033 with a grade of “C-” or better or a suitable mathematics examination placement score. This course covers counting principles; permutations and combinations; probability; statistics; geometry; applications and history of mathematics. Recommended background: two years of high school algebra. Course is not intended for students whose programs require precalculus or calculus courses.

MGF 1107. Topics in Practical Finite Mathematics (3). Prerequisites: MAT 1033 with a grade of “C” or better, or a suitable mathematics examination placement score. This course examines topological spaces, metric spaces, connectedness, compactness, separation axioms, and applications. Recommended background: two years of high school algebra. This course covers financial mathematics; linear and exponential growth; numbers and number systems; history of mathematics; elementary number theory; voting techniques; graph theory; game theory; set theory; probability; and computer applications.

MGF 1214. Environmental Mathematics (3). This course is an elementary introduction to mathematical models useful in understanding and solving environmental problems. The H.T. Odum energy diagrams for energy flows provide visual models that are translated into flow equations, which can then be solved by ordinary calculators. Recommended background: two years of high school algebra. This course covers financial mathematics; linear and exponential growth; numbers and number systems; history of mathematics; elementary number theory; voting techniques; graph theory; game theory; set theory; probability; and computer applications.

MTH 4212. College Geometry (3). Prerequisites: MAC 2312 and MAS 3105. This course examines fundamental topics in geometry from an advanced viewpoint, primarily designed for teachers and prospective teachers of mathematics.

MTH 4302. Elementary Topology I (3). Prerequisite: MAC 2313 and prior experience in rigorous proofs (MAP 2302 or MAT 2104 or other proving experience). This course covers elementary point set theory; separation axioms; connectedness, compactness, separation properties, topology of the plane, and product spaces.

MTH 4302a. Elementary Topology II (3). Prerequisite: MTG 4212. This course covers fundamental topics in topology through such a variety of classical and modern topics as set theory, algebra, real number topology, and graph theory. Axioms and proofs are emphasized throughout. Not open to students who have received credit for MAD 2104.

MTH 4302b. Mathematical Logic (3). Prerequisite: MGF 3301 or instructor permission. This course covers propositional and predicate logic, models, as well as Gödel’s completeness theorem and related theorems.

MTG 4212. College Geometry (3). Prerequisites: MAC 2312 and MAS 3105. This course examines fundamental topics in geometry from an advanced viewpoint, primarily designed for teachers and prospective teachers of mathematics.

MTG 4302. Elementary Topology I (3). Prerequisite: MAC 2313 and prior experience in rigorous proofs (MAP 2302 or MAT 2104 or other proving experience). This course covers elementary point set theory; separation axioms; connectedness, compactness, separation properties, topology of the plane, and product spaces.

MTG 4302a. Elementary Topology II (3). Prerequisite: MTG 4212. This course covers fundamental topics in topology through such a variety of classical and modern topics as set theory, algebra, real number topology, and graph theory. Axioms and proofs are emphasized throughout. Not open to students who have received credit for MAD 2104.

MTG 4302b. Mathematical Logic (3). Prerequisite: MGF 3301 or instructor permission. This course covers propositional and predicate logic, models, as well as Gödel’s completeness theorem and related theorems.

MTG 4212. College Geometry (3). Prerequisites: MAC 2312 and MAS 3105. This course examines fundamental topics in geometry from an advanced viewpoint, primarily designed for teachers and prospective teachers of mathematics.

MTG 4302. Elementary Topology I (3). Prerequisite: MAC 2313 and prior experience in rigorous proofs (MAP 2302 or MAT 2104 or other proving experience). This course covers elementary point set theory; separation axioms; connectedness, compactness, separation properties, topology of the plane, and product spaces.

MTG 4302a. Elementary Topology II (3). Prerequisite: MTG 4212. This course covers fundamental topics in topology through such a variety of classical and modern topics as set theory, algebra, real number topology, and graph theory. Axioms and proofs are emphasized throughout. Not open to students who have received credit for MAD 2104.

MTG 4302b. Mathematical Logic (3). Prerequisite: MGF 3301 or instructor permission. This course covers propositional and predicate logic, models, as well as Gödel’s completeness theorem and related theorems.

MTG 4212. College Geometry (3). Prerequisites: MAC 2312 and MAS 3105. This course examines fundamental topics in geometry from an advanced viewpoint, primarily designed for teachers and prospective teachers of mathematics.

MTG 4302. Elementary Topology I (3). Prerequisite: MAC 2313 and prior experience in rigorous proofs (MAP 2302 or MAT 2104 or other proving experience). This course covers elementary point set theory; separation axioms; connectedness, compactness, separation properties, topology of the plane, and product spaces.

MTG 4302a. Elementary Topology II (3). Prerequisite: MTG 4212. This course covers fundamental topics in topology through such a variety of classical and modern topics as set theory, algebra, real number topology, and graph theory. Axioms and proofs are emphasized throughout. Not open to students who have received credit for MAD 2104.

MTG 4302b. Mathematical Logic (3). Prerequisite: MGF 3301 or instructor permission. This course covers propositional and predicate logic, models, as well as Gödel’s completeness theorem and related theorems.
Department of MECHANICAL ENGINEERING

FAMU–FSU COLLEGE OF ENGINEERING

Web Page: http://www.eng.fsu.edu/me/

Chair: Emmanuel Collins; Professors: Alvi, Cattafesta, Collins, Hellstrom, Kalu, Krothapalli, Larbalestier, J. Ordóñez, Shih, Van Dommelen, Van Sciver; Associate Professors: Clark, Hahn, Holliis, Hruda, Moore, Oates, Xu; Assistant Professors: Guo, Kumar, Lin, Taira; Teaching Faculty: Campbell, Larson; Research Faculty: Chuy, C. Ordóñez; Affiliated Faculty: Hussaini, Kopriwa, Tam; Professor Emeritus: Buzyna, Cartes, Chen, Grielisse

The Bachelor of Science (BS) program in the Department of Mechanical Engineering is designed to provide background for a wide variety of careers. The discipline of mechanical engineering is very broad, but generally emphasizes an appropriate mix of thermal science, mechanics and materials, dynamic systems, and design. Graduates typically enter various energy, aerospace, or product manufacturing industries, or government laboratories.

The undergraduate program is designed to impart a broad knowledge in basic and engineering sciences and to provide a solid understanding of contemporary engineering practices. The program also seeks to provide students with a foundation in communications skills, principles of economics, and other fundamentals upon which they will draw in their professional careers. Special emphasis is placed on communications skills by requiring extensive written laboratory reports and design project presentations. Computer literacy is bolstered by a variety of course assignments throughout the program and especially in the design courses, wherein students are exposed to a number of design software programs widely used in the engineering industry.

Beyond the basic core curriculum, the Mechanical Engineering courses are grouped into five major area streams: thermal and fluid systems, mechanical systems, mechanics and materials, dynamic systems, and engineering design. The courses in each of these areas give students a foundation in the relevant engineering sciences with a strong orientation in design and extensive laboratory experience. The design curriculum culminates with a one-year (two-semester) capstone design course in which the students design and implement a full system or product, usually under industrial sponsorship.

Several undergraduate teaching laboratories provide extensive experimental apparatus for laboratory courses. The fluid mechanics laboratory, heat transfer laboratory, solid mechanics laboratory, dynamic systems laboratory, and controls and robotics laboratory are all well equipped with the latest tools and equipment for experimentation, data acquisition, post processing, and analysis. The College of Engineering provides several computer labs running a variety of standard design and analysis software packages, including Algor FEA modules, PTC’s Pro/Engineer and Pro/Mechanica, MSC.Software’s ADAMS, and MathWorks’ MATLAB.

Program Educational Objectives

Consistent with the missions of Florida State University, Florida A&M University, and the College of Engineering, and in accordance with the Accreditation Board for Engineering and Technology (ABET) criteria, the department has developed the following program educational objectives. We expect our graduates in the first five years upon graduation from our program to:

- make career progress in industrial, research, or graduate work in mechanical engineering or allied fields
- design and analyze devices, products, or processes that meet the needs of an employer, organization, or customer, based on sound scientific knowledge and engineering practices
- become engineering professionals by engaging in professional activities and continuous self-development
- function in multicultural and multidisciplinary environments across regional and national borders

Program Outcomes

After completing the mechanical engineering program, graduates should have the following attributes:

- an ability to apply knowledge of mathematics, calculus based science and engineering to mechanical engineering problems
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design thermal and mechanical systems, components, or processes to meet desired needs
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
• an ability to communicate effectively with written, oral, and visual means
• the broad education necessary to understand the impact of engineering solutions in a global and societal context, and a knowledge of contemporary issues
• a recognition of the need for, and the ability to engage in life-long learning
• an ability to use modern engineering techniques, skills, and computing tools necessary for engineering practice

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in mechanical engineering satisfy this requirement by earning a grade of “C–” or higher in EML 3002L.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. MAC X311 or MAC X281
2. MAC X312 or MAC X282
3. MAC X313 or MAC X283
4. MAP X302 or MAP X305
5. CHM X045 or CHM X045C or CHS X440 or X440L
6. PHY X043 or PHY X048C or PHY X048L or PHY X048L
7. PHY X049 or PHY X049C or PHY X044 and PHY X049L

Core Program

A candidate for the Bachelor of Science (BS) in mechanical engineering is required to successfully complete the following engineering core courses (in addition to the mechanical engineering curriculum):

CHM 1045 General Chemistry I (3)
CHM 1045L General Chemistry I Laboratory (1)
EEL 3003 Introduction to Electrical Engineering (3)
EGN 1004L First Year Engineering Laboratory (1)
MAC 2311 Calculus with Analytical Geometry I (4)
MAC 2312 Calculus with Analytical Geometry II (4)
MAC 2313 Calculus with Analytical Geometry III (5)
MAP 3305 Engineering Mathematics I (3) or MAP 3302 Ordinary Differential Equations (3)
PHY 2048C General Physics A (5)
PHY 2049C General Physics B (5)

Students must earn a minimum grade in the “C” range in each of the college core courses, as well as the required and technical elective courses below. Students must meet the minimum overall grade point average (GPA) under the general requirements of the University. Students also must meet the prerequisite requirements specified by the College of Engineering. Please refer to the “College of Engineering” chapter in this General Bulletin for the specific college-level requirements.

Students are urged to obtain the most current information on the mechanical engineering requirements from their advisors or from the student affairs coordinator.

Mechanical Engineering Curriculum

Key features of the curriculum in mechanical engineering include the integration of relevant topical material, integration of engineering design with engineering science, the introduction to engineering design at an early stage in the curriculum, and the use of cooperative learning methodologies. The curriculum is in keeping with current trends in engineering education, industry expectations and needs, and the ABET 2003 accreditation guidelines.

The following core courses comprise the mechanical engineering curriculum:

- EML 3002 Mechanical Engineering Tools (2)
- EML 3002L Mechanical Engineering Tools Lab (3)
- EML 3004 Introduction to Mechanical Engineering (3)
- EML 3011C Mechanics and Materials I (4)
- EML 3012C Mechanics and Materials II (3)
- EML 3013C Dynamic Systems I (4)
- EML 3014C Dynamic Systems II (3)
- EML 3015C Thermal-Fluids I (4)
- EML 3016C Thermal-Fluids II (4)
- EML 3017C Mechanical Systems I (4)
- EML 3018C Mechanical Systems II (4)
- EML 3234 Materials Science and Engineering (3)
- EML 3811 Mechanotronics I (2)
- EML 4304L Thermal-Fluids Lab (3)
- EML 4550 Engineering Design Methods (3)
- EML 4551C Senior Design Project I (3)
- EML 4552C Senior Design Project II (3)
- XXX XXX Math Option (3)
- XXX XXX Technical Electives (12)

Technical electives are generally intended to develop depth in an area of interest and should form a coherent area of concentration. A minimum of three technical electives (nine semester hours) must be in the Department of Mechanical Engineering.

The math option is intended to provide additional math expertise oriented toward various areas of engineering. Students must choose from the following list of approved classes: MAP 3306 or STA 3032, Alternates: MAD 3401, MAD 3703, MAP 4341 or MAS 3105.

EML 3004 includes a math/physics test based on the material covered in Calculus I, Calculus II, and Physics I. Students may take this test at any time before or during their enrollment in EML 3004.

Honors in the Major

The Department of Mechanical Engineering offers a program in honors in mechanical engineering to encourage talented juniors and seniors to undertake independent and original research as a part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Five-Year Combined BS–MS Program

The department offers a five-year combined undergraduate-graduate program leading to the Bachelor of Science (BS) and Master of Science (MS) degrees. The objective of this program is to produce, in five years of full-time study, an engineer who is fully qualified to enter into professional practice in industry. Students begin taking core graduate courses in their fourth year. Successful completion of the fourth year of the five-year curriculum will give the student enough credit and breadth of subject matter to satisfy university requirements for the BS degree, should individual circumstances arise that preclude a student from taking the fifth year. This program also includes a Summer internship in industry between the fourth and fifth years.

Admission to the dual degree program is open to seniors who have attained a GPA of 3.2 in the mechanical engineering curriculum and whose applications are reviewed by a faculty committee. Applicants are normally invited in the Spring, during the second semester of the students’ junior year, for Fall entry. Details on the curriculum may be obtained from the Mechanical Engineering Department Office.

Definition of Prefixes

EGM—Engineering Science
EGN—Engineering: General
EMA—Materials Engineering
EML—Engineering: Mechanical

Undergraduate Courses

EGM 3512. Engineering Mechanics (4). Prerequisites: MAC 2312 and PHY 2048. Corequisite: MAC 2313. This course covers statics and dynamics of particles and rigid bodies using vector analysis, free body diagrams, equilibrium of particles and rigid bodies, particle and general rigid body motion, work/energy, and impulse and momentum methods.

EMA 4225. Mechanical Metallurgy (3). Prerequisite: EML 3012C. This course focuses on tensile instability, crystallography, theory of dislocations, plasticity, hardening mechanisms, creep and fracture, electron microscopy, composite materials.
EML 3011C. Engineering Dynamics (3).
Prerequisite: EML 3012C and PHY 2049C. This course covers the application of calculus to engineering problems, using symbolic manipulation. Topics include: mechanics of particles; modeling systems of particles; energy methods; and Newton's laws. The emphasis is on the development and application of the equations of motion for various systems. The course also introduces the use of computer-aided analysis software. This course is subject to an additional materials fee.

EML 3324. Materials Science and Engineering (3).
Prerequisite: CHM 1045. This course introduces the concepts of materials science and their relevance to engineering design. It covers the fundamentals of materials science, including the structure and properties of materials, and the principles of material selection and design.

EML 3811. Mechatronics I (2).
Prerequisites: MAC 2312 and PHY 2049. This course is an introduction to Mechatronics through lab experience of interfacing mechanical and electrical systems. Focus is on embedded controllers and the programming, interfacing, sensors, and actuators of simple mechatronic systems. This course is subject to an additional materials fee.

EML 3949r. Experiential Learning (0). (SU grade only.) Prerequisite: Instructor permission. This non-credit, experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. This must result in the completion of a work experience for which the student is given course credit.

EML 4161. Cryogenics (3).
Prerequisites: EML 3012C and EML 3016C. This course focuses on the fundamental aspects of cryogenic system engineering: properties of materials and fluids at low temperatures; cryogenic heat transfer and fluid dynamics; low temperature refrigeration and system engineering.

EML 4288. Vehicle Design (3).
Prerequisites: EML 3014C and EML 3018C. This introductory course in vehicle design emphasizes vehicle dynamics. Content covers the primary performance related features of vehicle design (suspension, steering, chassis, and tires). Using the latest industry-standard software, the course examines various design parameters that influence vehicle performance and handling.

EML 4304. Thermal-Fluids Laboratory (3).
Prerequisites: EML 3002 and EML 3004. Corequisites: MAP 3305 or MAP 2302. This course is the first part of an integrated sequence in thermal sciences. Emphasis is placed on the study of fluid mechanics and energy transfer. The essential role of each of these related elements and their connections is examined in the context of real-world systems. The course covers topics such as fluid mechanics, heat transfer, and thermodynamics. It provides the student with a broad introduction to and understanding of the application of materials in structural design, the processing of mechanical components, and the manufacture of high technology products.

Prerequisite: EML 3016C. This course is an analysis of the performance of propulsion systems using fundamental principles of thermodynamics, heat transfer, and fluid mechanics. Systems studied include turbojet, turbofan, ramjet engines, as well as piston type internal combustion (IC) engines.

EML 5450. Energy Conversion Systems for Sustainability (3).
Prerequisites: EML 3016C and senior standing in engineering. This course provides an introduction to energy conversion systems for sustainability. It covers topics such as renewable energy sources, energy efficiency, and the impacts of climate change. The course also introduces the role of engineering in the development of sustainable energy systems.

EML 5452. Sustainable Power Generation (3).
Prerequisites: EML 4450 or EML 5451. This course is a continuation of energy conversion systems for sustainability and focuses on solar electricity, biopower, biofuels, and hydrogen as energy media. The course emphasizes the fundamental aspects of sustainable energy systems and the role of engineering in their development.

EML 5451. Design and Analysis of Control Systems (3).
Prerequisite: EML 3121. This course emphasizes design of advanced control systems (using time and frequency domains). Implementation of control systems using continuous (operational amplifier) or digital (microprocessor) techniques are addressed and practiced.

Prerequisite: EML 3016C. This course is an analysis of the performance of propulsion systems using fundamental principles of thermodynamics, heat transfer, and fluid mechanics. Systems studied include turbojet, turbofan, ramjet engines, as well as piston type internal combustion (IC) engines.

EML 5450. Energy Conversion Systems for Sustainability (3).
Prerequisites: EML 3016C and senior standing in engineering. This course provides an introduction to energy conversion systems for sustainability. It covers topics such as renewable energy sources, energy efficiency, and the impacts of climate change. The course also introduces the role of engineering in the development of sustainable energy systems.

EML 5452. Sustainable Power Generation (3).
Prerequisites: EML 4450 or EML 5451. This course is a continuation of energy conversion systems for sustainability and focuses on solar electricity, biopower, biofuels, and hydrogen as energy media. The course emphasizes the fundamental aspects of sustainable energy systems and the role of engineering in their development.

EML 5451. Design and Analysis of Control Systems (3).
Prerequisite: EML 3121. This course emphasizes design of advanced control systems (using time and frequency domains). Implementation of control systems using continuous (operational amplifier) or digital (microprocessor) techniques are addressed and practiced.

Prerequisite: EML 3016C. This course is an analysis of the performance of propulsion systems using fundamental principles of thermodynamics, heat transfer, and fluid mechanics. Systems studied include turbojet, turbofan, ramjet engines, as well as piston type internal combustion (IC) engines.

EML 5450. Energy Conversion Systems for Sustainability (3).
Prerequisites: EML 3016C and senior standing in engineering. This course provides an introduction to energy conversion systems for sustainability. It covers topics such as renewable energy sources, energy efficiency, and the impacts of climate change. The course also introduces the role of engineering in the development of sustainable energy systems.

EML 5452. Sustainable Power Generation (3).
Prerequisites: EML 4450 or EML 5451. This course is a continuation of energy conversion systems for sustainability and focuses on solar electricity, biopower, biofuels, and hydrogen as energy media. The course emphasizes the fundamental aspects of sustainable energy systems and the role of engineering in their development.

EML 5451. Design and Analysis of Control Systems (3).
Prerequisite: EML 3121. This course emphasizes design of advanced control systems (using time and frequency domains). Implementation of control systems using continuous (operational amplifier) or digital (microprocessor) techniques are addressed and practiced.

Prerequisite: EML 3016C. This course is an analysis of the performance of propulsion systems using fundamental principles of thermodynamics, heat transfer, and fluid mechanics. Systems studied include turbojet, turbofan, ramjet engines, as well as piston type internal combustion (IC) engines.

EML 5450. Energy Conversion Systems for Sustainability (3).
Prerequisites: EML 3016C and senior standing in engineering. This course provides an introduction to energy conversion systems for sustainability. It covers topics such as renewable energy sources, energy efficiency, and the impacts of climate change. The course also introduces the role of engineering in the development of sustainable energy systems.

EML 5452. Sustainable Power Generation (3).
Prerequisites: EML 4450 or EML 5451. This course is a continuation of energy conversion systems for sustainability and focuses on solar electricity, biopower, biofuels, and hydrogen as energy media. The course emphasizes the fundamental aspects of sustainable energy systems and the role of engineering in their development.

EML 5451. Design and Analysis of Control Systems (3).
Prerequisite: EML 3121. This course emphasizes design of advanced control systems (using time and frequency domains). Implementation of control systems using continuous (operational amplifier) or digital (microprocessor) techniques are addressed and practiced.

Prerequisite: EML 3016C. This course is an analysis of the performance of propulsion systems using fundamental principles of thermodynamics, heat transfer, and fluid mechanics. Systems studied include turbojet, turbofan, ramjet engines, as well as piston type internal combustion (IC) engines.

EML 5450. Energy Conversion Systems for Sustainability (3).
Prerequisites: EML 3016C and senior standing in engineering. This course provides an introduction to energy conversion systems for sustainability. It covers topics such as renewable energy sources, energy efficiency, and the impacts of climate change. The course also introduces the role of engineering in the development of sustainable energy systems.

EML 5452. Sustainable Power Generation (3).
Prerequisites: EML 4450 or EML 5451. This course is a continuation of energy conversion systems for sustainability and focuses on solar electricity, biopower, biofuels, and hydrogen as energy media. The course emphasizes the fundamental aspects of sustainable energy systems and the role of engineering in their development.

EML 5451. Design and Analysis of Control Systems (3).
Prerequisite: EML 3121. This course emphasizes design of advanced control systems (using time and frequency domains). Implementation of control systems using continuous (operational amplifier) or digital (microprocessor) techniques are addressed and practiced.

Prerequisite: EML 3016C. This course is an analysis of the performance of propulsion systems using fundamental principles of thermodynamics, heat transfer, and fluid mechanics. Systems studied include turbojet, turbofan, ramjet engines, as well as piston type internal combustion (IC) engines.
EML 4550. Engineering Design Methods (3). Prerequisites: EML 3002L and EML 3004. This course is a formal lecture component of the mechanical engineering 'capstone' senior design course project. The course covers the product design cycle from problem identification and need assessment, to specification, concept generation and selection, preliminary design, materials selection, and final design. The design process is placed in context by presenting topics such as legal and ethical issues, product reliability and liability considerations, engineering economics, and optimal design.

EML 4551C. Senior Design Project I (3). Prerequisites: EML 3012C, EML 3014C, EML 3016C, EML 3018C, and EML 4550. This course is the first in a two-part course sequence presenting an integrated system design approach for engineering product realization. Course blends the perspectives of market research and planning, design cycle, project management and teamwork, and technical reporting. This is the 'capstone' course for mechanical engineering students. This course offers weekly sessions in which teams are coached during the different phases of the project, plus frequent and extensive design reviews. This course is structured to closely resemble 'on the job' engineering education.

EML 4552C. Senior Design Project II (3). Prerequisite: EML 4551C. This course is the second part of the engineering design systems course. The material covered is a continuation of topics in the first part and the completion of a student-designed product.

EML 4711. Introduction to Gas Dynamics (3). Prerequisite: EML 3016C. This course is a thorough one-dimensional treatment of compressible flows and applications to nozzle, diffuser, sound waves, tunnel, and shock tube flows.

EML 4800. Introduction to Robotics (3). Prerequisite: EML 3014C. Corequisite: EML 4535C. This course explores the basic elements of a robot, robot actuators, and servo control; sensors, senses, vision, and voice; microprocessor system design and computers; kinematic equations; motion trajectories.

EML 4830. Introduction to Mobile Robotics (3). Prerequisite: Instructor permission. This course covers the following topics: analytical dynamic modeling and dynamic simulation of mobile robots; mobile robot sensors; basic computer vision methods; Kalman filtering and mobile robot localization; basic mapping concepts; path planning and obstacle avoidance; intelligent control architectures.

EML 4930r. Special Topics in Mechanical Engineering (1–4). Prerequisite: Instructor permission. This course explores topics in mechanical engineering with emphasis on recent developments. Content and credit vary. May be repeated within the same term to a maximum of twelve semester hours.

EML 4945r. Practical Work in Mechanical Engineering (1–3). Prerequisite: Advisor permission. May be repeated to a maximum of three semester hours.

EML 4970r. Honors Work (3). Prerequisite: Acceptance into honors program. This course includes participation in a supervised research project and the production of a thesis describing the results of that work. May be repeated to a maximum of six required semester hours.

Graduate Courses

EGM 5444. Advanced Dynamics (3).
EGM 5611. Introduction to Continuum Mechanics (3).
EGM 5653. Theory of Elasticity (3).
EGM 5810. Viscous Fluid Flows (3).
EGM 6845. Turbulent Flows (3).
EGN 5456. Introduction to Computational Mechanics (3).
EMA 5226. Mechanical Metallurgy (3).
EMA 5514. Optical and Electron Microscopy (3).
EML 5060. Analysis in Mechanical Engineering (3).
EML 5061. Analysis in Mechanical Engineering II (3).
EML 5072. Applied Superconductivity (3).
EML 5103. Advanced Engineering Thermodynamics (3).
EML 5152. Fundamentals of Heat Transfer (3).
EML 5155. Convective Heat and Mass Transfer (3).
EML 5162. Cryogenics (3).
EML 5311. Design and Analysis of Control Systems (3).
EML 5361. Multivariable Control (3).
EML 5451. Energy Conversion Systems for Sustainability (3).
EML 5453. Sustainable Power Generation (3).
EML 5537. Design Using FEM (3).
EML 5543. Materials Selection in Design (3).
EML 5709. Fluid Mechanic Principles with Selected Applications (3).
EML 5710. Introduction to Gas Dynamics (3).
EML 5725. Introduction to Computational Fluid Dynamics (3).
EML 5802. Introduction to Robotics (3).
EML 5831. Introduction to Mobile Robotics (3).
EML 5905r. Directed Individual Study (1–6). (S/U grade only.)
EML 5910r. Supervised Research (1–5). (S/U grade only.)

Department of Biomedical Sciences-Chairs: Richard Nowakowski; Professors: Blaber, Delp, Diaz, Galasko, Hurt, Kabbaj, Levenson, Nowakowski, Overton, Patrick, Ren, Romrell, Stefanovic; Associate Professors: Arbeiterman, Blackmon, Gunjar, Horabin, Kaplan, Kato, Laywell, C. Lee, Megraw, Olson, Wang, Zhou; Assistant Professors: Kumar, Meckes, Paik, Pinto, VanLandingham, Zhu; Eminent Scholar: Bhidre; Research Faculty II: Bienkiewicz; Research Faculty I: Armata, Bruck, Ducrot, Jin, Kao, McCarthy, Morgan, Vied, Wu, Zhang; Assistant in Medicine: Livingston; Associates in Research: Didier, Foster

Department of Clinical Sciences-Chair: Ricardo Gonzalez-Rothi; Professors: Applebaum, Berg, Bertolote, Bland, Bradley, Gonzalez-Rothi, Hartsfield, Maitland, Muszynski, Watson, Wetherby; Associate Professors: Danforth, Stavros, Sweemer

Department of Family Medicine and Rural Health-Chair: Daniel Van Durme; Professors: Dunn, Fogarty, Little, McLeod, Stine, Van Durme; Associate Professors: Brown, K. Campbell, R. Campbell, Harrison, Rodriguez; Assistant Professors: Alexander, L. Johnson, Myers, Quintero, Speights; Instructional Specialist II: Clark; Assistant in Medicine: Lajoie

Department of Geriatrics-Chair: Kenneth Brummel-Smith; Professors: Brummell-Smith, Granville, Kapp, Pomidor; Associate Professors: Agens, Suchak; Assistant Professors: Terracciano, Turner

Department of Behavioral Sciences and Social Medicine-Chair: Leslie Beitsch; Professors: Bellamy, Beitsch, Glueckauf; Associate Professors: Flynn, Gabriel, Haier, Reyes; Assistant Professors: Bernat, Blackburn, Carretta, Driscoll, Nair-Collins, Painter, Rosado, Saunders, Sualdea, Sutton; Senior Research Associate: Aubrey; Assistants in Research: Cober, Geletko; Research Faculty I: Martinez, A. Nowakowski

The Florida State University College of Medicine, in partnership with local communities, provides a four-year program of study leading to the Doctor of Medicine (MD) degree. The college is fully accredited by the Liaison Committee on Medical Education of the Association of American Medical Colleges and the American Medical Association. The mission of the College of Medicine is to educate and develop exemplary physicians who practice patient-centered health care, who discover and advance knowledge, and who are responsive to community needs, especially through service to elder, rural, and other medically underserved populations.

For complete details of degree requirements, plus a description of the college and its services, refer to the “College of Medicine” chapter of this General Bulletin.

**Definition of Prefixes**

BCC — Basic Clinical Clerkships

ENT — Entrepreneurship  
IFS — Interdisciplinary Florida State University Courses  
IHS — Interdisciplinary Health Sciences  
MDE — Medical Electives

**Undergraduate Courses**

BMS 4901r. Directed Individual Study in Biomedical Sciences (1–3). (S/U grade only.) Prerequisite: Instructor permission. This directed individual study course in biomedical sciences offers a unique opportunity for undergraduate students to perform research in the biomedical science laboratories in the College of Medicine. Students perform special supervised study or research in the area of the faculty member’s research. An oral presentation and a final report of the research in the format of a short scientific publication is required.

IFS 2058. An Apple a Day: Natural Science Honors Seminar (3). This seminar course is structured as a lecture and discussion of current topics in medicine. The course is interactive in which students are expected to prepare for and participate actively with guests, faculty, and fellow students.

IHS 4904r. Directed Individual Study in Health Sciences (1–4). Prerequisite: Instructor permission. Corequisite: Must have an overall 3.0 GPA. This course is for undergraduate students who wish an individualized research experience in the Medical Humanities and Social Sciences, Public Health, or other fields presented in the College of Medicine. Students receive training in research methods and improve their readiness for and appreciation of research in health-related science. May be repeated to a maximum of fifteen semester hours.

IHS 4943. Medical Interpreter Practicum (9). (S/U grade only) Prerequisites: ADV 3410, BMS 4861, SPC 4710, SPN 4420, and SPN 4930. This course is a supervised internship at a College of Medicine clinical site. Students work with healthcare providers providing translation services between patients and healthcare providers.

**Graduate Courses**

BCC 7112. Internal Medicine (8).
BCC 7130. Obstetrics/Gynecology Clerkship (6).

BMS 6821. Medicine and Behavior I (2). (P/F grade only.)
BMS 6822. Medicine and Behavior II (2). (P/F grade only.)
BMS 6831. Doctoring 201 (7). (P/F grade only.)
BMS 6832. Doctoring 202 (7). (P/F grade only.)
BMS 6824r. Cross-Cultural Medicine (2). (P/F grade only.)
ENT 5527. Healthcare Innovation and Medical Entrepreneurship (3).
MDE 6041. Medical Spanish I (2). (P/F grade only.)
MDE 6042. Medical Spanish II (2). (P/F grade only.)
MDE 7012. Mind-Body Health (0).
MDE 7812. Neuropsychology (2).

**Fourth Year Electives**

In the fourth year of study, the College of Medicine offers a wide variety of electives to help students develop skills in their specific areas of study and practice. Electives are available in the fields of family medicine, geriatrics, internal medicine, obstetrics/gynecology, pediatrics, psychiatry, surgery, and others. For a complete and current list of fourth year electives, please visit our Web site at [http://med.fsu.edu/userFiles/file/Electives2012-2013.pdf](http://med.fsu.edu/userFiles/file/Electives2012-2013.pdf).
Program in MIDDLE EASTERN STUDIES

COLLEGE OF ARTS AND SCIENCES

Web Page: http://mec.fsu.edu/
Director and Advisor: TBA
Interim Advisor: Claudia Liebeskind (History)
Coordinating Committee: Claudia Liebeskind (Chair, History), Zeina Schlenoff (Modern Languages), David Levenson (Religion), Adam Gaiser (Religion), Will Hanley (History), John Kelsay (Religion), Daniel Pullen (Classics)

The Departments of Anthropology, Art History, Classics, Economics, English, History, Modern Languages and Linguistics, Music, Religion and Urban and Regional Planning offer an interdisciplinary major and minor in Middle Eastern studies at the undergraduate level. The program is designed for: (1) general liberal arts students who wish to learn more about the Middle East; (2) students who wish to pursue graduate work in this field; and (3) students who seek employment in or relating to the Middle East. The Middle East Center administers the major. A Bachelor of Arts (BA) in Middle Eastern studies responds directly to a national and regional demand for resources and information to educate students, professionals, and the surrounding community about this important region of the world. An increasing number of jobs are available nationally and throughout the world for those with expertise in the Middle East and its languages.

For more information, please refer to http://mec.fsu.edu/.

Admission
Students must complete fifty-two semester hours with an adjusted GPA of 2.0 on all University coursework and have completed at least half the required liberal studies hours or an AA degree.

Requirements for a Major in Middle Eastern Studies

Students majoring in Middle Eastern studies are to construct their study program, in consultation with an advisor, around three components in addition to the University requirement for liberal studies and electives. A total of fifty-four semester hours beyond the liberal studies requirement is required. A list of approved courses is available with the program advisors.

Major Components for a BA in Middle Eastern Studies

1. **Major requirement.** Students are to take a minimum of thirty-six semester hours from among those area-specific upper level courses listed for their major track. The hours should be distributed among at least three departments participating in the program.

2. **Middle East Survey requirement.** Students are required to take Middle East Survey (ASH 3230), a three semester hour course.

3. **Language requirement.** Fifteen semester hours of coursework are required in a relevant area language (Arabic, Hebrew, Turkish, or any other Middle Eastern language that might be offered on campus in the future). The hours must be focused upon one specific language. Students are encouraged to bring their chosen language up to an effective level of proficiency in both reading and speaking by either taking additional coursework on the FSU campus or by participating in a semester or Summer abroad program in their relevant cultural area as such programs are available.

To encourage the achievement of language proficiency, language coursework hours taken beyond the fourth semester of foreign language requirement may be counted towards the required thirty-six hours for the major. A separate minor is not currently required for the Middle Eastern studies major, as a secondary area of major coursework constitutes a collateral minor. A minimum of twenty-one hours have to be taken at Florida State University.

State of Florida Common Program Prerequisites

The state of Florida has not identified common program prerequisites for this University degree program; however, students are encouraged to take lower level introductory courses in some of the related disciplines (e.g., culture/ history courses relating to the Middle East) and to begin study in Arabic or Hebrew earlier so that they might be able to leave the program with the highest level of proficiency possible in their chosen language.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Middle Eastern studies satisfy this requirement by earning a grade of “C-” or higher in CGS 2060, CGS 2100, or EME 2040.

Minor in Middle Eastern Studies

The Middle Eastern studies minor is concerned with the cultures of the Middle East from ancient times to the present. Utilizing the resources of a number of departments and programs, it allows the student to study the region from an interdisciplinary perspective. The minor can provide a Middle East focus for work in another discipline, can build a foundation necessary for advanced degrees in Middle Eastern studies, and can enable those planning to work in the region to gain a fuller understanding of its cultures.

Requirements for a Minor in Middle Eastern Studies

The minor will consist of fifteen semester hours and must include intermediate-level (2000 level) competence in Hebrew (biblical or modern), Arabic, or another Middle Eastern language approved by the committee. No more than eight semester hours of language courses may be counted toward the minor. No course taken for the minor may be used to fulfill any University language requirement. The remaining required hours must come either from the courses listed below or be approved by the coordinating committee. A minimum of seven to nine hours have to be taken at Florida State University.

Core Courses

Note: Course descriptions can be found in the chapter corresponding to the department in which each course is taught.

**Anthropology**

ANT 4175 Archaeology of the Islamic World (3)

**Art History**

ARH 4118 Archaeology of Ancient Egypt (3)
ARH 4173r Studies in Classical Art and Archaeology (3)
ARH 4210 Early Christian and Byzantine Art (3)
ARH 4571 Islamic Art and Architecture, 7th-21st Centuries (3)

**Classics**

ASH 3200 History of the Ancient Near East (3)
CLT 3378 Ancient Mythology, East and West (3)

**Economics**

ECS 4504 Economics of the Middle East (3)

**English**

LIT 4652 Middle Eastern Literature and Translation (3)

**Geography**

GEO 4635 Geography of the Middle East (3)

**History**

AFH 4302 Northern African History: A Survey (3)
ASH 1044 Middle Eastern History and Civilization (3) (*does not count towards MES degree, but is highly recommended)
ASH 3200 History of the Ancient Near East (3)
ASH 3230r Middle East Survey: An Interdisciplinary and Introductory Course (3-6)

Note: ASH 3230 is a required course for all students majoring in Middle Eastern studies.
ASH 4223 Modern Middle East (3)
ASH 4261 Central Asia Since the Mongols (3)

**Modern Languages**

Department of MILITARY SCIENCE

COLLEGE OF ARTS AND SCIENCES
Web Page: http://www.fsu.edu/~armyrotc/
Professor: Lieutenant Colonel Clinton D. Alexander

The military science department’s Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty, nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers’ educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a thirty-two-day summer camp, normally between the junior and senior years. Nursing students attend a nursing internship at Army hospitals following summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Core Program

The program requires four years of military science courses, which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as a freshman or as a sophomore.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below. Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job opportunities for women in the Army are the same as those for men, excluding a few combat arms fields.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor’s physical screening. Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required each week.

Advanced Course

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (seventy-five minutes) periods and a one and a half hour (ninety minutes) leadership laboratory period each week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

Professional Military Education

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, American military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

Monetary Allowances

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of $450–$500 per month for up to twenty months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide over $16,000 during the last two years of school. Both the United States Army Reserve and the National Guard offer additional monetary incentives for cadets who join their organizations.

Army ROTC College Scholarship Program

Financial assistance is available in the form of two-, three-, or four-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, students/cadets receive reimbursement for their tuition and fees, or a room and board reimbursement of $5,000 per semester. Additionally, Army scholarship recipients receive a flat-rate allowance of $1200 per year for textbooks and other expenses, and a $300–$500 per month stipend for up to ten months per year. During the thirty-two-day advanced course summer training between the junior and senior years, Army ROTC also pays attending cadets a stipend and travel pay. There are also numerous national and organizational scholarships that students may compete for as members of Army ROTC.

Textbooks and Uniforms

All textbooks, uniforms, items of insignia, and equipment incident to membership in the Army ROTC Program are furnished by the Department of Military Science.

Minor in Military Science

A minor in military science is offered and may be selected by students with the approval of their major department and the Department of Military Science. Requirement for a minor is twelve semester hours of upper division coursework.

Special Activities

Throughout cadets’ courses in ROTC, they will have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Seminole Guard is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge. Cadets may also join Scabbard and Blade, a military honor society comprising those cadets with qualifying grades that denote scholarship. Scabbard and Blade performs a number of community service projects each year.

Awards and Decorations

Awards and decorations made available by national organizations, Florida State University, and local and national military organizations are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and outstanding campus and cadet corps leadership.

Prerequisite for Admission to the Professional Officer Course

1. Be at least seventeen years of age at time of acceptance;
2. Be able to complete the professional officer course and graduate from Florida State University prior to reaching the age of thirty at the time of commissioning (upper age limit can be waived);
3. Selection by the professor of military science and acceptance by the University;
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission;
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science at (850) 644-8806 or (850) 644-1016 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science at the beginning of the Fall semes-
ter one academic year prior to the Fall semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.

Leadership Laboratory

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for one and one half hours (ninety minutes) each week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

Definition of Prefix

MSL—Military Science and Leadership

Undergraduate Courses

MSL 1001. Foundations of Officership (1). Corequisite: MSL 1001L. This course examines unique duties and responsibilities of officers, organization and role of the Army. Topics include leadership concepts and expected ethical behavior.

MSL 1001L. Foundations of Officership Laboratory (0).

MSL 1002. Basic Leadership (1). Corequisite: MSL 1002L. This course includes topics such as fundamental leadership concepts and doctrine, basic skills underlying effective problem solving, and the officer experience.

MSL 1002L. Basic Leadership Laboratory (0).

MSL 2101. Individual Leadership Studies (2). Corequisite: MSL 2101L. This course develops knowledge of self, self-confidence, individual leadership skills, problem solving and critical thinking skills, as well as communication, feedback, and conflict resolution skills.

MSL 2101L. Individual Leadership Studies Laboratory (0).

MSL 2102. Leadership and Teamwork (2). Corequisite: MSL 2102L. This course focuses on self-development, while incorporating the individual’s knowledge of self, understanding of group processes, current beliefs, and skills.

MSL 2102L. Leadership and Teamwork Laboratory (0).

MSL 2940. Basic Field Internship (4). Prerequisites: Must pass the Army Physical Fitness Test (APFT) and have earned at least fifty-four semester hours at FSU with a 2.0 GPA. This course consists of an intensive internship conducted at Fort Knox, Kentucky, for four weeks. Designed as an alternative to meet requirements for entrance into the upper division of Military Science for students who have not completed introductory level coursework.

MSL 3201. Leadership and Problem Solving (3). Prerequisites: MSL 1001, MSL 1002, MSL 2101, MSL 2102L, or instructor permission. Corequisite: MSL 3201L. This course examines skills that underlie effective problem solving. Students plan military missions and operations, and execute squad battle drills.

MSL 3201L. Leadership and Problem Solving Laboratory (0).

MSL 3202. Leadership and Ethics (3). Prerequisites: MSL 1001, MSL 1002, MSL 2101, MSL 2102, or instructor permission. Corequisite: MSL 3202L. This course focuses on topics such as leadership responsibilities that foster an ethical command climate and develop cadet leadership competencies. Students apply principles and techniques of effective written and oral communication.

MSL 3202L. Leadership and Ethics Laboratory (0).

MSL 4301. Leadership and Management (3). Prerequisite: MSL 3202 or instructor permission. Corequisite: MSL 4301L. This course allows students to discuss staff organization, functions, and processes, analyze counseling responsibilities and methods, and apply leadership and problem solving principles to a complex case study/simulation.

MSL 4301L. Leadership and Management Laboratory (0).

MSL 4302. Officership (3). Prerequisites: MSL 3202, MSL 4301, or instructor permission. Corequisite: MSL 4302L. This capstone course explores topics relevant to second lieutenants entering the Army, including legal aspects of decision making and leadership, as well as Army organization from the tactical to the strategic level.

MSL 4302L. Officer Leadership Laboratory (0).

MSL 4900r. Directed Individual Study (3). Prerequisite: Permission from a military-science professor. This course includes special supervised study/research with a professor of military science dealing with emphasis on current issues relating to the profession of arms and national defense. May be repeated to a maximum of six semester hours.

Department of

MODERN LANGUAGES AND LINGUISTICS

COLLEGE OF ARTS AND SCIENCES

Web Page: http://modlang.fsu.edu/

Chair: Mark Pietralunga; Professors: Boutin, Fernandez, Galeano, Leparulo, Munro, Pietralunga, Poey, Sharpe, Uzendoski, Walters; Associate Professors: Alvarez, Cappuccio, Efımov, Goramiz, Gonzalez, Howard, Lan, Leeser, Leushuis, Maier-Katkin, Reglero, Romanchuk, Sudanmer, Valis, Wikamiya, Wang, C. Weber, Zanini-Cordi; Assistant Professors: Lee, Muntendam, Murray-Roman, Treacy, D. Weber; Teaching Faculty I: Brandl, Brudenell, Malo, Osborn, Prantil, Prosper; Teaching Faculty II: Feng; Teaching Faculty III: Schlenoff

The Department of Modern Languages and Linguistics provides instruction in Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Portuguese, Russian, and Spanish, with an emphasis on culture and literature as well as language. Several courses in linguistics are offered, in addition to courses English-language courses in Brazilian, Chinese, French, German, Hispanic, Italian, Japanese, Russian, and Turkish film; in Italian, Japanese, Russian, Slavic, and Turkish cultures; and in Chinese, French, German, Italian, Japanese, Russian, and Latin American literature in translation. The department offers a wide range of Liberal studies (including E-Series) courses that may, in some cases, be accepted for major or minor credit (see individual course descriptions).

All students who intend to continue study of a language at Florida State University in which they have had previous experience (such as high school study or study abroad) must be placed into the appropriate course by the Department of Modern Languages. Students in French, German, and Spanish who continue with the same language must take the placement test before they enroll in a course in the department. Students in other languages must consult the department for the appropriate placement procedures before enrolling.

Degrees Offered

Bachelor of Arts (BA) degrees are offered in East Asian Languages and Cultures (Chinese and Japanese), French, French and Francophone Studies (temporarily suspended), German, Italian, Russian, and Spanish. All major programs, except for languages with a concentration in business, and French and Francophone Studies will also require a minor degree. Undergraduate minors are offered in Arabic Studies, Chinese, French, German, Hebrew, Italian, Japanese, Linguistics, Portuguese, Russian, Spanish, Strategic European Languages and Cultures (SELC), and World Literature/World Film.

Graduate programs leading to the Master of Arts degree are available in French, German, Italian Studies, Slavic Languages and Literatures (emphasis on Russian), and Spanish (emphasis on literatures and cultures, or linguistics). Programs leading to the Doctor of Philosophy degree are offered with French or Spanish as the major field of concentration. Concentrations in comparative and world literature, Italian, German, and Russian are available for the doctorate in humanities. For information on graduate programs, refer to the Graduate Bulletin.

Foreign Language Learning Center

The department offers a variety of electronic language learning systems and language media resources. It has two fully equipped computer labs where students may work on their language skills under an instructor’s guidance, as well as a walk-in computer lab which they may use at their convenience. A film screening auditorium is available for film and culture classes and special events. The department develops and maintains the Virtual Language Lab, an online language resource site which offers students a wide variety of electronic media resources for the languages taught by the department. The department’s video collection has over two hundred foreign films.

Winthrop-King Institute for Contemporary French and Francophone Studies

The Winthrop-King Institute for Contemporary French and Francophone Studies was created as a result of a generous bequest from the late Mrs. Ada Belle Winthrop-King. It is a center for interdisciplinary scholarship focusing on developments in France and the wider French-speaking world dating approximately from the French Revolution to the present, with a particular emphasis on contemporary issues. The institute offers a wide range of study abroad scholarships for students. Strongly interdisciplinary in outlook, the Institute brings together faculty from a variety of departments at Florida State and from universities throughout the world. It hosts leading scholars, artists.
and public figures and sponsors a wide range of lectures, film screenings, conferences and other events addressing key social, cultural and political issues in France and other French-speaking regions.

Scholarships Offered

Ada Belle Winthrop-King Scholarships are offered on a competitive basis each year for language majors and minors in Arabic, Chinese, French, German, Italian, Japanese, Portuguese, Russian, and Spanish. For further information, please contact the department at (850) 644-2606.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major’s courses needed to satisfy this requirement. Undergraduate majors in modern languages and linguistics satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100 or ISC 3313.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students must be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

**East Asian Languages (Chinese and Japanese)**

XXX XXX: coursework in the language for six to twelve credit hours; students must demonstrate proficiency by testing or completion of a foreign language through the intermediate level. Which language is chosen depends upon the track/focus of the student. At FSU, the intermediate level would be either CHI X220 or JPN X220.

French

XXX XXX: coursework in the language for six to twelve credit hours; students must demonstrate proficiency by testing or completion of the foreign language through the intermediate level. The intermediate level is FRE X220 or equivalent.

French and Francophone Studies (Temporarily Suspended)

Students must demonstrate proficiency by testing or completion of intermediate-level French.

German

XXX XXX: coursework in the language for six to twelve credit hours; students must demonstrate proficiency by testing or completion of the foreign language through the intermediate level. The intermediate level is GER X220 or equivalent.

Italian

XXX XXX: coursework in the language for six to twelve credit hours; students must demonstrate proficiency by testing or completion of the foreign language through the intermediate level. The intermediate level is ITA X220 or equivalent.

Russian

XXX XXX: coursework in the language for six to twelve credit hours; students must demonstrate proficiency by testing or completion of the foreign language through the intermediate level. The intermediate level is RUS X220 or equivalent.

Spanish

XXX XXX: coursework in the language for six to twelve credit hours; students must demonstrate proficiency by testing or completion of the foreign language through the intermediate level. The intermediate level is SPN X220 or equivalent.

College Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Note: The department reserves the right to reassign or drop students who are enrolled in a course for which they have not taken the required prerequisites or one that does not correspond to their linguistic abilities.

Honors in the Major

The Department of Modern Languages and Linguistics offers a program in honors in the major to encourage talented seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Major in a Language with Concentration in Business

A major in French, German, Italian, Spanish, or Russian with a concentration in business may be selected. The program consists of twenty-one semester hours in the language beyond the language requirement plus fifteen approved semester hours of core business courses and twelve approved semester hours in a specialized track of marketing, management, or finance in the College of Business. Students declaring a French major with a concentration in business may take one single French course taught in English with written work done in English to satisfy the requirements of the major. For students declaring a Spanish major with a concentration in business, linguistics (LIN) courses will not count for major credit. A major in Chinese or Japanese with a concentration in business requires eighteen semester hours of the selected language numbered above the 2220 level, plus twenty-seven hours in the business track. Of the twenty-seven hours, at least twelve approved semester hours must be taken of core business coursework, and at least nine approved semester hours in a specialized track of marketing, management, or finance. A maximum of six semester hours of CHI/JPN 3000-level courses in Business Chinese or Business Japanese may be substituted for required business courses in the twelve hour specialized track. No minor is required with a concentration in business. Students should consult with their language advisor for a list of appropriate courses. Students majoring in both Business and Language/Business should refer to the requirements below, under “Double Major”.

Co-Major in Modern Languages and Linguistics

The department offers an interdepartmental program in which students may choose approved co-majors from the following divisions: French, German, Italian, Russian, and Spanish. The co-major consists of twenty-one semester hours numbered above 1999 in each of two divisions selected. Students declaring a French co-major may take one single French course taught in English with written work done in English to satisfy the requirements of the major. For students declaring a Spanish co-major, linguistics (LIN) courses may count for major credit. A co-major in Chinese and Japanese consists of fifteen semester hours of each language numbered above 2220, plus twelve semester hours of CHI/JPT 3000-level coursework in culture and literature. Of the combined thirty Chinese/Japanese language coursework, at least six semester hours must be taken from two 4000-level courses in one language and three semester hours from a 4000-level course in the other language. The student should consult with the Chinese and Japanese advisors to select appropriate courses. One 2000-level course in either language chosen for all co-majors must be used to satisfy the arts and sciences language requirement. The student should consult with an advisor in each language division to select courses. No minor is required.

Double Major

Students pursuing more than one major must meet the program requirement of both majors, with the following exceptions: (1) a maximum of six semester hours may overlap, i.e. they may be counted toward two separate majors; and (2) no minor is required. Student majoring in both Business and Language/Business are allowed double-counting of the five “core” courses, but are not allowed double-counting of any course in the selected specialized track.

Double Major in Modern Languages

A double major in two modern foreign languages may be approved in selected combinations. Please consult an advisor in each language for course advisement.
Requirements for a Major in Modern Languages and Linguistics

Note: A grade of “C−” or better must be earned in each course applied toward any major or minor degree earned in modern languages and linguistics. A grade of “C−” or better is required for students to advance to subsequent language levels. No courses may be taken on a satisfactory/unsatisfactory (S/U) basis except for language internships.

East Asian Languages and Cultures

The East Asian Languages and Cultures degree program offers five separate major tracks: Chinese language and culture (thirty hours), Japanese language and culture (thirty hours), co-major in Chinese and Japanese (forty-two hours), Chinese with a concentration in business (forty-five hours), and Japanese with a concentration in business (forty-five hours). The Chinese and Japanese language and culture majors require thirty semester hours numbered above 2220 including a minimum of six semester hours at the 4000 level. For the Chinese major, a maximum of nine semester hours from 3000-level courses in Chinese culture and literature may count toward the thirty semester hour requirement. The Japanese major will allow a maximum of nine semester hours in Japanese culture and literature to count toward the thirty semester hour requirement. Coursework should be selected by consultation with the Chinese or Japanese advisor in the language area of choice. For further information on requirements, visit http://modlang.fsu.edu/.

French Major

Thirty semester hours numbered above 2999 are required, including FRW 3100, 3101; FRE 3420, 3421, 3780 (or FRE 4410), 4422; and three additional 4000-level courses (nine semester hours), at least two of which (six semester hours) must be in literatures, cultures, and/or societies of French expression. One 3000–4000 level French elective will complete the requirements. Students are also strongly advised to take the sequence FRW 3100–3101 concurrently with the grammar/composition sequence FRE 3420–3421. Any number of 3000–4000 level French courses taught in English with the written work done in French may count toward the major. Native speakers should register for courses numbered 3000 and above. Majors and minors are eligible for the Ad Astra Winthrop King Summer Scholarships to Paris. For more information, please visit http://modlang.fsu.edu/Divisions-and-Programs/French-Program.

French and Francophone Studies Major

(Temporarily Suspended)

Thirty-six semester hours numbered above 2999 are required in this interdisciplinary program with history and art. Twenty-one semester hours of French and fifteen semester hours in either one or two fields related to French and francophone culture will be determined in consultation with the French and francophone culture advisor. The required French courses are FRE 3244, 3420, 3501; FRW 3100, 3101; and two additional 4000-level French courses. Students in this major may take one single French course taught in English with written work done in English to satisfy the requirements of the major. No minor is required. French and francophone studies majors are eligible for the Ad Astra Winthrop King Summer Scholarships to Paris. For more information, please visit http://modlang.fsu.edu/Divisions-and-Programs/French-Program.

German Major

Thirty semester hours numbered above 2999 are required, including GER 3400 and GER 3500. For students entering the major from GER 2220, GER 3400 is required to fulfill the composition component; students who enter with advanced proficiency take GER 4420. Students should consult with an advisor to ensure proper placement. Students should have a minimum of six semester hours of skills courses (e.g., GER 3310, GER 3400) and six semester hours of literature, film, and culture classes (e.g., GER 3500, GER 3930). A minimum of nine semester hours must be taken at the 4000 level. A maximum of six semester hours from among the following coursework may count toward the thirty semester hour requirement: GET 3130, GET 3524. For more information, please visit http://modlang.fsu.edu/Divisions-and-Programs/German-Division.

Italian Major

Thirty semester hours numbered above 2220 are required, including ITA 2240, 3420, 3421, at least one 3000-level literature course in Italian (ITW 3100, 3101), and a minimum of twelve semester hours at the 4000 level. A maximum of six semester hours from among the following coursework may count toward the thirty semester hour requirement: ITT 3430, 3500, 3501, 3520, 3523r. For more information, please visit http://www.modlang.fsu.edu/.

Russian Major

Thirty semester hours numbered above 2220 are required, including RUS 2330, 3400, 3420, and at least twelve semester hours of Russian and Slavic coursework at the 4000 level or above. Russian Language and Literature and Strategic European Languages and Cultures tracks have further requirements. For more information, please visit http://modlang.fsu.edu/Divisions-and-Programs/Slavic-Languages-Russian.

Spanish Major

Thirty semester hours, distributed in the following manner, are required: fifteen semester hours of 3000-level courses including SPN 3300, SPN 3400; one 3000-level Hispanic cultures course; one SPW 3000-level literature course; a departmental linguistics course (usually LIN 3041). Required at the 4000 level are fifteen semester hours in SPN or SPW courses, including at least one senior seminar (SPN 4540, SPN 4930, SPW 4930, or SPN 4700). SPT 3100 and SPT 3130 will not count for major credit. Heritage speakers must take SPN 3350 plus one additional 3000- or 4000-level SPW or SPN course (excluding SPN 3400) instead of the required SPN 3300 or SPN 3400. For more information, please visit http://www.modlang.fsu.edu/.

Minor for Modern Languages Majors

Twelve to fifteen semester hours in an approved departmental field are required. If a second foreign language is selected as the minor, the twelve to fifteen semester hours must be earned in courses numbered above 1999. All courses must be taken for a letter grade, and a minimum grade of “C−” must be earned for all courses taken for the minor.

Requirements for a Minor in Linguistics

See specific course requirements listed under “Interdepartmental Linguistics Minors.”

Note: Linguistics courses will NOT count toward both a major in Spanish and a minor in linguistics.

The graduate minor requires fifteen semester hours. See specific course requirements listed under “Interdepartmental Undergraduate and Graduate Minors.”

Requirements for a Minor in Modern Languages and Linguistics

Twelve semester hours in linguistics or in any one of the following languages are required: French, German, Italian, Portuguese, or Russian numbered above 1999. The Chinese minor requires twelve semester hours in courses numbered above CHI 1121. The Japanese minor requires twelve semester hours in courses numbered above JPN 1121. Spanish requires fifteen semester hours numbered above 2220 including three hours in Spanish literature. SPT 3130 will not count for minor credit. Credit extended in meeting the foreign language requirement for graduation may not be used in satisfying the minor.

Requirements for a Minor in Arabic Studies

The minor requires eighteen semester hours, fifteen of which must be from Arabic language courses. The additional three hours may be selected from a list of approved interdepartmental courses related to the Middle East or North Africa. No course taken for the minor may be used for any University language requirement. At least nine of the eighteen semester hours must be earned at Florida State University. A list of approved courses may be obtained from the departmental undergraduate office, 364 DIF. A minimum grade of “C” must be earned for all courses taken for the minor (no S/U grades will apply). Directed Individual Study (DIS) hours are not applicable to the minor without prior approval from the Arabic advisor.

Requirements for a Minor in Hebrew

The undergraduate minor in Hebrew consists of eighteen semester hours, at least fifteen of which must be Hebrew language courses. The remaining three hours may be in any other Semitic language (Arabic, Aramaic, and Syriac are currently taught at FSU). Students must demonstrate they have completed work in both Biblical and Modern Hebrew, reaching the Intermediate level in one. This will normally mean that they must take at least three hours of Biblical Hebrew and three hours of Modern Hebrew (note that these do not
have to be taken as part of the minor). All courses in both Biblical and Modern Hebrew with a grade of “C-” or higher (no S/U grade will apply) can be counted toward the minor. No course counting toward any University language requirement may be counted for the minor. At least nine of the eighteen required hours must be taken at FSU. A list of approved courses may be obtained from the departmental undergraduate office, 364 DIF.

Requirements for a Minor in Strategic European Languages and Cultures (SELC)

The minor focuses on the languages and cultures of three historically and strategically linked regions that form an “arc” along the eastern edge of the EU: Russia and Ukraine, the Balkans, and Turkey. The minor consists of twelve approved semester hours taken in the Department of Modern Languages and Linguistics beyond liberal studies and major requirements. A list of approved courses may be obtained from the department undergraduate office, 364 DIF.

Requirements for a Minor in World Literature/World Film

The minor will consist of fifteen semester hours. The student may select five courses from any of the following: CHT 3391r, 3930; FRT 3140, 3520r, 3561; GET 3130, 3524r; IFS 3008; IFT 3430, 3523r; JPT 3391r; PRT 3391r; RUT 3110, 3523r; SPT 3130, 3391r. Courses taken for major credit in modern languages and literature courses may be obtained from the department undergraduate office, 364 DIF.

All language and literature courses are taught primarily in the foreign language with the exception of courses in literature in translation and in film.

Undergraduate Courses

**Note:** Graduate students wishing to take courses at the 1000-4000 level must obtain permission of the instructor, the language coordinator for that course and the Modern Languages’ associate chair for graduate studies.

**Arabic**

**ABT 3520r. Arab Cinema and Culture (3).** This course explores Arab cinema from the colonial period to the present. It provides an in-depth exploration of cultural identity and politics in the Arab world. Through cinematographic images and readings, students engage in the history of cultural, political, and religious diversity within Arab societies. Knowledge of Arabic is not required. Taught in English.

**ARA 1120. Elementary Arabic I (4).** This course is for students who have no previous knowledge of Modern Standard Arabic. The aim is basic proficiency in the four language skills: reading, writing, speaking, and listening. Basic vocabulary, sentence structure, grammar, and pronunciation in Modern Standard Arabic are introduced as well as an Arabic dialect. This course follows a communicative approach. It enables students to put the language they are learning into actual use. May not be taken concurrently with ARA 1121 and/or 2220 or by native speakers.

**ARA 1121. Elementary Arabic II (4).** Prerequisite: ARA 1120. This course introduces extended vocabulary and grammar, and basic conversation is emphasized. Students start conversing in spoken Arabic as well as reading and writing in Modern Standard Arabic. This course also develops the students’ knowledge of Arab culture. May not be taken concurrently with ARA 1120 and/or 2220 or by native speakers.

**ARA 2220. Intermediate Arabic (4).** Prerequisite: ARA 1121. This course solidifies knowledge of basic grammar and expands the students’ vocabulary. It emphasizes reading and writing in formal Arabic, as well as speaking and listening in Colloquial. Students participate in cultural activities, write compositions, and give oral presentations in class. May not be taken concurrently with ARA 1120 and/or 1121. Students in this course should have taken two semesters of Arabic in college or the equivalent.

**ARA 2240r. Intermediate Conversation (3).** Prerequisite: ARA 2220 or instructor permission. This course focuses on a practical communicative approach toward the development of their Arabic in meaningful contexts. It provides a bridge between Classical and Colloquial Arabic. Students are introduced to authentic Spoken Arabic and learn the language of everyday life. A variety of original texts, video clips, and audio tapes are used in class to give students a better understanding of the Arab world. May be repeated to a maximum of six semester hours.

**ARA 3222. Mid-Intermediate Arabic (3).** Prerequisite: ARA 2220 or higher. This course is designed for students who have had three semesters of Arabic language or equivalent learning experience. This course aims to continue developing students’ speaking, listening, and reading comprehension, as well as writing and cultural skills. It focuses on grammar, composition and vocabulary building. May be taken concurrently with ARA 2240.

**ARA 4421. Media Arabic (3).** Prerequisite: ARA 2220 or higher. This course introduces students to the Arabic language, the Arab press, and to ordinary news items in print or broadcasted. It provides intermediate level students with an introduction to the language of the Arab media and develops their basic reading and interpreting skills.

**ARA 4905r. Directed Individual Studies (3).** Students arrange with individual faculty members to undertake specialized study in areas outside of, or in addition to, the regular curriculum. May be repeated to a maximum of six semester hours.

**ARA 4970r. Honors Thesis (1–6).** May be repeated to a maximum of nine semester hours, three hours of which may be applied to the requirements for a minor in Arabic with permission of the department. All honors work is directed by the student’s honors committee.

**IFS 3009. Through an Arabic Lens: The Intersection of Film and Culture (3).** This course explores Arab cinema from the colonial period to the present, examining the cultural personifications that distinguish it from Hollywood cinema. It provides an in-depth exploration of cultural identity and politics in the Arab World. Through cinematographic images and readings, students engage in the history of cultural, political, and religious diversity within dynamically changing Arab societies. Taught in English. All movies have English subtitles.

**Chinese**

**CHI 1110. Elementary Conversational Chinese (4).** This course introduces beginners to basic conversational Chinese, enabling them to develop interpretive and communicative skills in Chinese at the elementary level and grasp rudimentary knowledge of social customs and cultural practices in Chinese-speaking communities.

**CHI 1120. Elementary Chinese I (4).** This course emphasizes speaking and listening, although an acquisition of reading and writing skills is also an integral part of the course. Some fundamental syntactic constructions introduced are: word order, nominal classifiers, verb classification, and formation of complex sentences. May not be taken by native speakers. May not be taken concurrently with CHI 1121 and/or 2220.

**CHI 1121. Elementary Chinese II (4).** Prerequisite: CHI 1120 or equivalent. This course further emphasizes the skills introduced in CHI 1120, including speaking, listening, and reading. May not be taken by native speakers. May not be taken concurrently with CHI 1120 and/or 2220.

**CHI 2220. Intermediate Chinese (4).** Prerequisite: CHI 1121 or equivalent. This course emphasizes reading and writing and introduces more of the essential Chinese syntax. More time is devoted to learning Chinese characters in both recognition and production levels. May not be taken by native speakers. May not be taken concurrently with CHI 1120 and/or 1121.

**CHI 2223. Intermediate Conversational Chinese (3).** This course helps students to further develop the three kinds of communicative skills in Chinese at the intermediate level: interpreting spoken language and written texts, communicating with Chinese speakers on matters in everyday life, and preparing and delivering presentations on sociocultural topics.
CHI 3240. Chinese Reading and Conversation (3). Prerequisite: CHI 2200 or instructor permission. This course is offered to meet the needs of students in current intermediate-level of Chinese. Its purpose is not only to improve their pronunciation but also to improve their Chinese proficiency in reading comprehension and oral communication in various settings.

CHI 3404r. Chinese Calligraphy and Poetry (3). Prerequisite: One Chinese language course or equivalent ability. This course develops both the ability to write Chinese characters and the knowledge of Chinese calligraphy. It comprises two tasks: 1) to grasp the structural rules of Chinese characters and the skills of memorizing and writing characters; 2) to understand the history and appreciate the charm of Chinese calligraphy by integrating calligraphic practice with the study of literary texts. May be repeated to a maximum of six semester hours.

CHI 3420r. Chinese Grammar and Composition (3). Prerequisite: CHI 2220 or instructor permission. This course aims to develop students’ Chinese proficiency in reading and writing while focusing on grammar, composition, and vocabulary. May be taken concurrently with CHI 3240. May be repeated to a maximum of six semester hours when content changes.

CHI 3422. Grammar and Composition II (3). Prerequisite: CHI 3420 or instructor permission. This course aims to develop students’ Chinese proficiency at the intermediate-high level in reading and writing, grammar, composition, and vocabulary.

CHI 3440r. Business Chinese (3). Prerequisite: CHI 2220 or permission of instructor. This course develops students’ Chinese proficiency in the context of business activities that require not only adequate language skills at the intermediate-high level but also adequate knowledge of socio-cultural customs in China. May be repeated when content changes to a maximum of six semester hours.

CHI 3441. Business Chinese II (3). Prerequisite: CHI 2220 or equivalent learning experience. This course is a continuation of “Business Chinese I.” It is designed to further improve students’ language skills and cultural awareness for business purposes. For a Chinese major with business concentration, students can take this course to fulfill either the language or business requirements.

CHI 3501. Readings in Chinese Short Stories and Essays (3). Prerequisite: CHI 2220 or equivalent. This course is an introduction of selected materials in modern Chinese literature. The course is designed to train students to be able to read and comprehend Chinese original works and to bring to students’ awareness various cross-cultural differences.

CHI 4410r. Advanced Chinese I (3). Prerequisite: Two CHI 3000-level courses or instructor permission. This course is designed for students who have had three years of Chinese language courses or equivalent learning experience. Students study both advanced-level language skills and Chinese culture in the original language. May be repeated to a maximum of six semester hours when topics vary.

CHI 4411r. Advanced Chinese II (3). Prerequisite: One 4000-level course with the CHI or CHW prefix. This course aims to develop fluency and accuracy in advanced-level Chinese in using complex vocabulary and sentence patterns, grasping basic forms of expository and argumentative prose, and discussing real-life issues of contemporary China both in writing and conversation. May be repeated to a maximum of six semester hours.

CHI 4503. Readings in Chinese History (3). Prerequisite: Instructor permission. This course introduces a sketch of Chinese history. Students are taught to read the text in Chinese so they can expand their vocabulary to include those words necessary to understand Chinese culture and tradition.

CHI 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

CHI 4930r. Special Topics (3). Prerequisite: Divisional permission. This course allows students to study literary topics of a special kind, depending on student interest and faculty expertise.

CHI 4942r. Internship in Applied Chinese (1–6). (S/U grade only.) Prerequisite: Advanced standing in Chinese. This course provides academic credit for students working in governmental agencies or private business where students employ the foreign language. Departmental permission required. May be repeated to a maximum of six semester hours.

CHI 3123r. Pre-Modern Chinese Literature and Culture (3). This course acquaints students with the selected literary works from early China to the nineteenth century. The course provides the knowledge of pre-modern Chinese literature and culture and the analytical skills necessary for examining Chinese literary texts. Major literary genres (poetry, fictional prose, essay, and prose) and representative writers are discussed. This course can be taken to fulfill the requirement for Chinese or Asian Studies major/minor, liberal studies and multicultural awareness. The course is taught in English. May be repeated to a maximum of six semester hours.

CHI 3124r. Modern Chinese Literature (3). This course examines modern Chinese literature in its historical and social context and examines its role in the nation-building process of Modern China. Students read English translations of works that cover the primary literary genres and were created by major writers during this period from mainland China, Taiwan and the Chinese diaspora. Taught in English. May be repeated to a maximum of six semester hours.

CHI 3391r. Chinese Cinema and Culture (3). This course studies representative films from mainland China, Hong Kong, and Taiwan. Presents Chinese cinema both as a unique genre of modern arts and a powerful social and political discourse. Taught in English. May be repeated to a maximum of six semester hours.

CHI 3392r. Writing Women in Pre-Modern China (3). This course introduces students to Chinese women’s writing up to the 19th century. Readings also include some men’s writings on women and those with the exploration of women’s culture in pre-modern society, especially how women negotiated gender power as active agents rather than passive victims. The course can be taken to fulfill the requirements for Chinese or Asian Studies major/minor, liberal studies, and multicultural awareness. The course is taught in English. May be repeated to a maximum of six semester hours.

CHT 3930r. Topics in Chinese Literature (3). This course is for students interested in Chinese culture and literature in translation. Students learn the skills of interpreting literary texts and understand the development of Chinese literature. May be repeated to a maximum of six semester hours. May be repeated within the same semester.

RUT 3523. Russian Cinema

SPT 3391r. Hispanic Cinema: The Films of Pedro Almodovar

General Foreign Language Courses

FOL 2100r. International Study of Language and Culture (3). This course is designed around a communicative approach, which is based on the premise that the best way to learn a foreign language is through repeated, meaningful exposure to the foreign language as well as interaction with classmates and the instructor. The course is dedicated primarily to the host language using grammar and vocabulary and analysis of texts dealing with culture. May be repeated to a maximum of six semester hours.

FOL 3930r. Experiments in Modern Language (3). May be repeated to a maximum of nine semester hours.

FOL 4901r. Tutorial in Modern Languages, Literatures or Linguistics (1–6). (S/U grade only.) Prerequisites: Junior standing or command of language and instructor permission. This course allows students to pursue a topic within modern languages (linguistics, literature, culture, or civilization). Number of semester hours taken depends on the content and breadth of the topic. May be repeated twice with different topics to a maximum of six semester hours.

FOW 3420. Literature and Sexuality (3). This course investigates how modern Western literature, in particular, positions the centrality and critically examines a variety of themes related to sexuality in a socio-cultural and political context.

FOW 4540. Franco-American Culture Wars (3). This course examines a major shift in the cultural balance of power between the United States and France. Topics range from the transition from the 19th century American awe at French achievements in fiction and painting to the ever increasing American influence on France’s literary and visual art.

IFS 2035. (Re)imagining Florida: From Spanish Colonialism to Today (3). This course explores how the idea of Florida took shape and shifted in the minds of Spaniards from the sixteenth-nineteenth centuries. Throughout, students consider how their reconstruction of the Spanish vision of Florida may enrich and even alter their understanding of Florida today.

IFS 2083. Language Birth, Language Death (3). This course explores how languages are born, the ways and reasons why they change, and the limits of language learning and teaching. The course also examines the factors leading to language loss and language death, the reasons why we, as global citizens, should care, and how language specialists are working to reverse this trend. May be taken concurrently with CHI 1121 and EAS 2211, or by native speakers and critically examines a variety of themes related to sexuality in a socio-cultural and political context.

IFS 3008. Cinema Gone Global (3). This course focuses on the aesthetic, technological, economic, and philosophical issues that increasingly connect cinemas across the globe and speak to critical changes in the contemporary world on the basis of various cinema traditions today, negotiating between the global and its “discontents.” Course taught in English.

French

French and Francophone Language and Culture

FRE 1120. Elementary French I (4). This course stresses oral comprehension, speaking, reading, and writing. May not be taken by native speakers. May not be taken concurrently with FRE 1121 and FRE 2211.

FRE 1121. Elementary French II (4). Prerequisite: FRE 1120 or equivalent. This course places further emphasis on oral comprehension, speaking, reading, and writing. May not be taken by native speakers. May not be taken concurrently with FRE 1120 and/or 2211.

FRE 2211. Intermediate French Readings (4). Prerequisite: FRE 1121 or equivalent. This course offers a rapid review of basic French structures and introduces some of the finer points of French grammar. May not be taken concurrently with FRE 1120, FRE 2111, and FRE 2220 or by native speakers.

FRE 2220. Reading and Conversation (4). Prerequisite: FRE 2211 or equivalent. This course expands the students’ oral and written French expression through structured debate and argumentation based upon readings. May not be taken concurrently with FRE 1120, FRE 2111, and FRE 2200 or by native speakers.

FRE 2344. Intermediate French Conversation (3). Prerequisite: FRE 2211. Through readings and films about contemporary issues facing French society, this course aims at developing oral communication skills in a broad cultural context.
FRW 3420. French Grammar and Composition I (3). Prerequisite: FRE 2211 or equivalent. This course is an in-depth study of French grammar emphasizing subtleties of written expression.
FRW 3421. French Grammar and Composition II (3). Prerequisite: FRE 2211 or equivalent. This course is a further study of the subtleties of written expression in the French language.
FRW 3440. Commercial French (3). Prerequisites: FRE 2211 and FRE 3420. This course develops language and correspondence skills appropriate to business transactions in various Francophone areas (Canada, Africa, Caribbean, etc.).
FRW 3501. Contemporary France (3). Prerequisite: FRE 3420. This course, taught entirely in French, provides the student with an understanding of French culture and society from WWII through the present day. Topics include high vs. popular culture, political life, Franco-American relations, economics, media, France and the European Union, social issues, and perspectives of the French, family life, education, religion, cuisine, immigration and multiculturalism. Assignments and activities emphasize French writing and speaking skills.
FRW 3780. French Phonetics (3). Prerequisite: FRE 3420. This course targets pronunciation practice using the phonetic alphabet with the objective of improving production of standard French pronunciation. French majors only.
FRW 4410. Advanced Conversation (3). This course is about oral expression, listening skills and vocabulary acquisition in French in a variety of domains using contemporary materials.
FRW 4422. Advanced Grammar and Composition (3). Prerequisite: FRE 3421 or equivalent. This course, intended for students with a thorough grounding in French grammar, aims at developing writing and speaking ability through the reading of a variety of sophisticated French prose works and the composition of essays based on these model texts.
FRW 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.
FRW 4930r. Special Topics (3). Prerequisite: Divisional coordinator permission. This course allows students to study literary topics of a special kind, depending on student interest and faculty expertise. May be repeated to a maximum of nine semester hours.
FRW 4935r. Honors Thesis (1–6). This course may be repeated to a maximum of nine semester hours, three hours of which may be applied to the requirements for the major with permission of the department. All honors work is directed by the student’s honors committee.
FRW 4942r. Internship in Applied French (1–6). (S/U grade only.) Prerequisite: Advanced standing in French. This course provides academic credit for students working in governmental agencies or private business where students employ the foreign language. Departmental permission required. May be repeated to a maximum of six semester hours.
French and Francophone Cultures in Translation
Note: FRT courses do not count toward the major unless the student reads the works in French, writes all assignments in French, and can provide a letter from the instructor granting him/her permission to take the course for major credit.
FRT 3140. Masterworks of French Literature in Translation (3). This course is a survey of selected masterpieces of French literature, ranging from the Middle Ages to the present. The readings and instruction are in English. Can be used for minor credit in French with permission of the coordinator.
FRT 3520r. French and Francophone Cinema (3). This Francophone cinema course is offered in two versions: one focusing on the relationship between cinema and Francophone cultures, and the other a chronological and thematic approach to the movements and directors of metropolitan French cinema. This course is taught in English and, with instructor permission, three hours may be used for major or minor credit. May be repeated to a maximum of six semester hours.
FRT 3561. French Women Writers (3). Prerequisites: ENC 1101 and ENC 1121, or equivalent. This course addresses issues of race, gender, and class in a selection of works by prominent French/ Francophone writers. Taught in English. Can be used for minor credit with permission of the coordinator.

Literatures, Cultures and/or Societies of French Expression
FRW 3100. Survey of French Literature: Origins Through 18th Century (3). Prerequisite: FRT 2211; FRE 3420 or FRE 3421 recommended. This course is an introduction to the study of early-modern French literature by reading and discussing works representative of the various schools and movements. (Fall semester only.)
FRW 3101. Survey of French Literature: 19th Century through the Present (3). Prerequisites: FRT 2211; FRE 3420 or FRE 3421, FRW 3100, or instructor permission. This course is an introduction to the study of modern French literature by reading and discussing works representative of the various schools and movements. (Spring semester only.)
FRW 4420. Medieval and Renaissance Literature (3). Prerequisite: FRW 3100. This course is an introduction to the poetry and prose of medieval and early-modern periods. Emphasis is on the themes of love and friendship.
FRW 4433. 17th- and 18th-Century Literature (3). Prerequisites: FRW 3100 or FRW 3101. This course surveys major works in the areas of theatre, philosophy, and prose fiction. Special attention is given to the possible meanings of central concepts such as Classicism and Enlightenment.
FRW 4460. 19th-Century Literature (3). Prerequisite: FRW 3101. This course focuses on major themes and issues in 19th-century literature and culture.

German

German Language
GER 1100. Elementary Conversational German I (4). (Conversational method.) This course is an introduction to German with emphasis on speaking. Additional hours arranged for conversational practice. Students with more than two years of high school German or the equivalent should consult the department for placement. May not be taken by native speakers. May not be taken concurrently with GER 1110, 1120, 1121 or 2220.
GER 1110. Elementary Conversational German II (4). Prerequisites: GER 1110, GER 1120 or equivalent. This course is an introduction to German with emphasis on speaking (conversational method). Additional hours arranged for conversational practice. Students with three or four years of high school German or the equivalent should consult the department for placement. May not be taken by native speakers. May not be taken concurrently with GER 1110, 1111, 1120, or 2220.
GER 1120. Elementary German I (4). This course is an introduction to German. May not be taken by native speakers. Students with more than two years of high school German or the equivalent should consult the department for placement. May not be taken concurrently with GER 1110, 1120, or 2220.
GER 1121. Elementary German II (4). Prerequisites: GER 1110, GER 1120 or equivalent. This course is an introduction to German with emphasis on speaking (conversational method). Additional hours arranged for conversational practice. Students with three or four years of high school German or the equivalent should consult the department for placement. May not be taken concurrently with GER 1110, 1111, 1120, or 2220.
GER 2220. Intermediate German (4). Prerequisites: GER 1121, GER 1111 or equivalent. This course expands skills in reading, writing, and conversation. This course complements the baccalaureate degree requirement and serves as the transition to upper-level study. May not be taken by native speakers. May not be taken concurrently with GER 1110, 1111, 1120, or 1121.
GER 3310. German Grammar (3). Prerequisite: GER 2220 or equivalent. This course focuses on the rules of German grammar and syntax and employing them correctly in speaking and writing.
GER 3400. Composition and Conversation (3). Prerequisite: GER 2220 or instructor permission. In this course, the objective is the ability to write and converse on general cultural topics at a level that demonstrates near mastery of German grammar and the beginning of a personal style in the language. The course is conducted in German.
GER 3440. German Business Language and Practice (3). Prerequisite: GER 2220 or instructor permission. This course is an introduction to business languages and practices in German-speaking countries.
GER 3500. German Studies (3). Prerequisite: GER 2220 or instructor permission. This course, taught primarily in German, serves as an introduction to German studies. The course provides the student with an understanding of the major cultural aspects (literature, visual arts, history, politics, etc.) of German-speaking countries from the twentieth century to the present; the emphasis is placed on Germany in the second half of the twentieth century.
GER 3502r. Topics in German Studies (3). Prerequisite: GER 2220 or instructor permission. GER 3500 or GER 3310 are recommended. This course, taught primarily in German, presents a survey of one topic in the area of German studies. Topics may include themes from art, music, or literature placed in a cultural and historical perspective. Topics change frequently. May be repeated to a maximum of six semester hours with permission of instructor.
GER 3780. Phonetics (3). Prerequisite: GER 2220. In this course, the objectives are the acquisition of a correct German sound formation by comparison with English phonetics and the improvement of the student’s conversational German through pronunciation exercises. The course is conducted in German.
GER 3930r. Special Topics (3). Prerequisite: GER 2220 or instructor permission. GER 3500 or GER 3510 are recommended. This course allows students to study non-literary topics of a special kind, depending on student interest and faculty expertise. May be repeated to a maximum of nine semester hours when content changes.
GER 4420. Advanced Composition (3). Prerequisite: Two 3000-level GER courses or instructor permission. In this course, the objective is to gain the ability to write with a developed personal style in German on intellectually demanding topics, including composition on literature. Near mastery of German grammar is a prerequisite. The course is conducted in German.
GER 4480. Modern German of the News Media (3). Prerequisite: Two 3000-level courses or instructor permission. This course is an advanced-level skills course. Discussion of current events and mass media in German-speaking countries and work with authentic texts (newspapers and audio-visual material).
GER 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.
GER 4935r. Honors Thesis (1–6). May be repeated to a maximum of nine semester hours, three hours of which may be applied to the requirements for the major with permission of the department. All honors work is directed by the student’s honors committee.

GER 4942r. Internship in Applied German (1–6). (SU grade only.) Prerequisite: Advanced standing in German. This course provides academic credit for students working in governmental agencies or private business where students employ the foreign language. Departmental permission required. May be repeated to a maximum of six semester hours.

German Literature in Translation

GET 3130. Masterpieces of German Literature in Translation: 19th and 20th Centuries (3). This course offers an introduction to masterpieces of German literature from the 19th century to the present. It uses works by authors of various ethnic, minority, and gender backgrounds that bring forth German representations of gendered or cultural others and transcultural issues. May be counted for major or major credit. Taught in English.

GET 3524r. German Cinema (3). This course covers the contextual and stylistic features of German cinema from its classical period, in the 1920s, to the New German Cinema, through the present. The course focuses on methods of film analysis and on film criticism. Taught in English. May be repeated to a maximum of six semester hours.

GET 4800. Translation German-English/English-German (3). Prerequisite: GER 3400 or instructor permission. This course is an advanced-level skills course. Translating a variety of texts that illustrate important distinctions between German and English grammar, syntax, vocabulary, etc.

IFS 3043. German Society Through Film: The Legacy of Nazi Crimes Against Humanity (3). This course explores cinematic responses to Nazi crimes against humanity in German society. Drawing on the perspective of victims, perpetrators, bystanders, helpers, resisters, as well as preceding generations, the course investigates how cultural memory is created to revise and revise the voices and to reflect the indelible mark of the Nazi past in Germany. The course is taught in English.

IFS 3054. Robots, Monsters, Avatars: Technology and the (Post-)Human Condition (3). This course investigates the intricate relationship between the human existence and technology from both theoretical and practical perspectives. It explores fundamental questions concerning the human condition and solutions for strategies to related practical problems.

German Literature (Writings)

GEW 3320. Drama (3). Prerequisites: GER 2220 or instructor permission. GER 3400, GER 3310, or GER 3500 are recommended. This course focuses on contemporary German drama in a socio-historical context. Addresses the difficulties authors confront when dramatizing current social trends, as well as the problems of interpreting and staging a play.

GEW 3370. German Short Fiction (3). Prerequisite: GER 2220 or instructor permission. GER 3400, GER 3310, or GER 3500 are recommended. This course introduces students to the principles of literary study through reading and discussion of short pieces of fiction, primarily from the twentieth century.

GEW 4591r. Studies in an Author or Theme (3). Prerequisites: Two 3000-level courses or instructor permission. This course offers the opportunity to study either a single author or in-depth or to follow a specific theme that may extend over a brief period or over centuries. Course material may include non-literary textual and audio-visual material. May be repeated to a maximum of six semester hours.

GEW 4592r. Studies in a Period or Movement (3). Prerequisites: Two 3000-level courses or instructor permission. This course concentrates on a specific literary movement such as Romanticism, Realism, Expressionism, or on a period such as the Baroque, the Enlightenment, or the Weimar period. May be repeated to a maximum of six semester hours.

GEW 4930r. Special Topics (3). Prerequisites: Two 3000-level courses or instructor permission. In this course, students arrange with individual faculty members to undertake study in areas outside the regular curriculum. May be repeated to a maximum of nine semester hours.

Hebrew

HBR 1120. Elementary Modern Hebrew I (4). This course is an introduction to the alphabet, basic vocabulary, grammar, and syntax of modern Hebrew. Oral comprehension, speaking, and writing are emphasized through a communicative approach. Students are also introduced to modern Hebrew culture. No previous knowledge is required. May not be taken by native speakers. May not be taken concurrently with HBR 1121 and/or 2220.

HBR 1121. Elementary Modern Hebrew II (4). Prerequisite: HBR 1120 or equivalent. This course continues the introduction to modern Hebrew begun in HBR 1120. Cultural orientation and the practical use of Hebrew in meaningful situations. Oral comprehension, listening, speaking, and writing are emphasized through a communicative approach. May not be taken by native speakers. May not be taken concurrently with HBR 1120 and/or 2220. Completion of this course fulfills the foreign language requirement for the College of Arts and Sciences.

HBR 2220. Intermediate Modern Hebrew (4). Prerequisites: HBR 1120 and HBR 1121 or equivalent. This course is an introduction to modern Hebrew prose (fiction and non-fiction) as well as the continued development of speaking, listening, writing, and grammatical skills. May not be taken by native speakers. May not be taken concurrently with HBR 1120 and/or 1121. Completion of this course fulfills the foreign language requirement for the College of Arts and Sciences.

Italian

Italian Language

ITA 1110. Elementary Conversational Italian I (4). This course is an introductory composition and listening course, designed for beginning Italian through speaking and understanding skills at the elementary level. May not be taken by native speakers. May not be taken concurrently with ITA 1110, 1120, 1121, and/or 2220. (Dartmouth method)

ITA 1111. Elementary Conversational Italian II (4). Prerequisite: ITA 1110 or equivalent. This course builds upon the speaking and reading skills learned at the 1110 level. May not be taken by native speakers. May not be taken concurrently with ITA 1110, 1120, 1121, and/or 2220. (Dartmouth method)

ITA 1120. Elementary Italian I (4). This introductory course gives the student basic grammatical structures to enable speaking, understanding, reading, and writing at the elementary level. May not be taken by native speakers. May not be taken concurrently with ITA 1111, 1120, and/or 2220.

ITA 1121. Elementary Italian II (4). Prerequisite: ITA 1120 or equivalent. This course builds upon the student’s ability to speak, understand, read, and write Italian at an elementary level. May not be taken by native speakers. May not be taken concurrently with ITA 1111, 1120 and/or 2220.

ITA 2220. Reading and Conversation (4). Prerequisite: ITA 1111 or ITA 1121. This course stresses skills in reading and conversational Italian at the second-year level. Readings are supported by discussions of the materials. This course completes the baccalaureate degree requirement. May not be taken concurrently with ITA 1111, 1120, and/or 1121. May not be taken by native speakers.

ITA 2240. Conversation (3). Prerequisite: ITA 2220. This course stresses development of conversational skills at the third-year level. May not be taken by native speakers.

ITA 3420. Grammar and Composition (3). Prerequisite: ITA 2220. This course presents a comprehensive survey of grammar and idiomatic constructions. Composition practice augments the skills developed.

ITA 3421. Grammar and Composition (3). Prerequisite: ITA 3420. This course is a continuation of ITA 3420 with greater stress on theme-writing skills.

ITA 3440. Business Italian (3). Prerequisite: ITA 2220 or equivalent. This course introduces current Italian business forms and provides practice in commercial correspondence with its specialized vocabulary and syntax.

ITA 3441r. Directed Individual Tutorial Practice (3). Prerequisites: ITA 1111, ITA 1120, ITA 1121, ITA 2220, or equivalent. This course develops skilled undergraduate tutors for the Dartmouth method ITA 1110/1111 sequence. May be repeated to a maximum of six semester hours.

ITA 4410. Advanced Italian Conversation (3). Prerequisite: ITA 2240. This course is designed to develop proficiency in conversation skills at the fourth-year level by means of extensive vocabulary building and practice.

ITA 4450. Advanced Italian Composition and Style (3). Prerequisite: ITA 3421 or equivalent. This course stresses the morphological and syntactical order of Italian by means of extensive drill in controlled and free composition.

ITA 4500. Italian Culture and Civilization (3). Prerequisite: ITA 3100 and ITA 3101, or equivalent. This course surveys Italian culture and civilization and provides a historical perspective to aspects of Italian society.

ITA 4505r. Directed Individual Study (3). For this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

ITA 4930r. Special Topics (3). Prerequisite: Divisional coordinator permission. This course allows students to study literary topics of a special kind, depending on student interest and faculty expertise. May be repeated to a maximum of nine semester hours.

ITA 4935r. Honors Thesis (1–6). This course may be repeated to a maximum of nine semester hours, three of which may be applied to the requirements for the major with permission of the department. All honors work is directed by the student’s honors committee. May be repeated to a maximum of nine semester hours.

ITA 4942r. Internship inApplied Italian (1–6). (SU grade only.) Prerequisite: Advanced standing in Italian. This course provides academic credit for students working in governmental agencies or private business where students employ the foreign language. Departmental permission required. May be repeated to a maximum of six semester hours.

Italian Literature and Culture in Translation

ITT 3430. Masterpieces of Italian Literature and Culture in Translation (3). After a general overview of Italian history and culture, this course introduces students to a sample of novels, plays, paintings and movies that present key aspects of Italian culture and its achievements. Taught in English.

ITT 3500. Italian Culture and Civilization: From Origins to the Age of Romanticism (3). This course is an introduction to artistic, intellectual, social, and political trends in Italy from pre-Roman time to the Age of Romanticism with specific reference to Medieval and Renaissance Italy as a center of culture in Europe. Offered in English.

ITT 3501. Modern Italian Culture: From the Unification to the Present (3). This course is an introduction to modern cultural development in Italy and its achievements. Taught in English.

ITT 3520. The Italian-American Experience in Literature and Film (3). This course examines the literary and cinematic contributions that Italian Americans have made during the past century. The course is designed to assist students in exploring ways in which Italian and American cultures have combined to form a distinctive ethnic culture.
Italian Literary Arts (Writings)

ITW 3100. Survey of Italian Literature: Origins through 18th-Century (3). Prerequisite: ITA 2220 or equivalent. This course introduces students to representative literary figures and movements from the beginnings through the 18th century.

ITW 3101. Survey of Italian Literature: 19th- and 20th-Centuries (3). Prerequisite: ITA 2220. This course introduces students to representative literary figures and movements from the 19th and 20th centuries.

ITW 4400. Renaissance Literature (3). Prerequisites: ITW 3100 and ITW 3101, or equivalent. This course offers selected readings and discussions of the literature of the Italian Renaissance including such figures as Alberti, Lorenzo deMedici, Poliziano, Machiavelli, Michelangelo, Boccaccio, Dante, Petrarch, and Tasso.

ITW 4400r. 18th- and 19th-Century Literature (3). Prerequisites: ITW 3100 and ITW 3101, or equivalent. This course offers readings and discussions of figures and movements of the 18th and 19th centuries including Goldoni, Alfieri, Foscolo, Manzoni, Leopardi, and Verga. May be repeated to a maximum of six semester hours.

ITW 4480. 20th-Century Literature (3). Prerequisites: ITW 3100 and ITW 3101, or equivalent. This course offers readings and discussions of figures and movements in 20th-century Italian literature.

ITW 4481. Readings in Contemporary Italian Prose (3). Prerequisites: ITW 3100 and ITW 3101, or equivalent. This course offers readings and discussions of works of contemporary Italian writers.

ITW 4700. The Trecento Writers (3). Prerequisites: ITW 3100 and ITW 3101, or equivalent. This course offers a survey of the Trecento writers: Dante, Petrarch, and Boccaccio. Readings and discussions are available in both English and Italian.

Japanese

JPN 1120. Elementary Japanese I (4). This course stresses speaking and listening, although the acquisition of reading and writing skills is also an integral part of the course. Some fundamental syntactic and morphological points introduced are word order, nominal particles, verbal endings, verb classification, speech levels, and the formation of some complex sentences. In addition, an introduction is given to the Japanese syllabaries and kanji. May not be taken by native speakers. May not be taken concurrently with JPN 1121, 2220 and/or 2300.

JPN 1121. Elementary Japanese II (4). Prerequisite: JPN 1120 or equivalent. This course continues to stress speaking, reading, listening, and writing skills using the syntactic and morphological points introduced in JPN 1120. Further study is made of the Japanese syllabaries and kanji. May not be taken by native speakers. May not be taken concurrently with JPN 1120, 2220 and/or 2300.

JPN 2220. Intermediate Reading and Conversation (4). Prerequisite: JPN 1121 or equivalent. May not be taken by native speakers. This course continues to stress speaking and listening and introduces more of the essentials of Japanese syntax. In this course more time is devoted to reading and writing. About 400 kanji are introduced. May not be taken concurrently with JPN 1120, 1121 and/or 2300.

JPN 2300. Review Grammar and Syntax (4). Prerequisite: JPN 2220. This course is designed to develop practical skills in reading, writing, listening and speaking, and to further develop the student’s understanding of Japanese syntax. May not be taken by native speakers. May not be taken concurrently with JPN 1120, 1121 and/or 2220.

JPN 3132. Listening Drill II (1). Prerequisite: JPN 1111. This course prepares students at the intermediate level in Japanese. The emphasis is placed on basic listening skills. Emphasis is placed on conversational Japanese and basic daily situations to familiarize students with common structures, vocabulary, and grammar, and to facilitate improved oral comprehension in Japanese.

JPN 3133. Listening Drill III (1). Prerequisite: JPN 2300. This course prepares students at the intermediate level in Japanese. The emphasis is placed on basic listening skills. Emphasis is placed on conversational Japanese and basic daily situations to familiarize students with common structures, vocabulary, and grammar, and to facilitate improved oral comprehension in Japanese.

JPN 3102. Readings in Short Stories and Essays (3). Prerequisite: JPN 2300. This course introduces selected materials in modern Japanese literature, humanities, and social sciences. The objectives of this course are to train students to be able to read some annotated works in original Japanese and to bring to students’ awareness various cross-cultural differences. May not be taken by native speakers.

JPN 3240. Conversational Japanese (3). Prerequisite: JPN 2300 or equivalent, or instructor permission. This course enables students to develop intermediate-level communicative skills in Japanese. Students communicate in Japanese on sociocultural issues and topics pertinent to daily life, interpret spoken language, and learn expressions critical spoken fluency in Japanese.

JPN 3250. Practical Skills in Japanese Communication (3). Prerequisite: JPN 2300. This course prepares students at the high-intermediate level in Japanese. Students develop oral communication skills that enable them to perform appropriately in Japanese in various authentic, real-life situations.

JPN 3301r. Kanji Drill (1). This course is designed to develop students’ Kanji skills in both writing and reading. Students learn and practice approximately 300 Kanji during the semester, in addition to building knowledge of Kanji radicals and origins, which facilitates additional Kanji comprehension and memorization. May be repeated to a maximum of two semester hours.

JPN 3302r. Kanji Drill II (1). Prerequisite: JPN 3301 or JPN 2302, or equivalent. This course continues to develop students’ Kanji skills in both writing and reading. Students learn and practice approximately 300 Kanji during the semester, in addition to building knowledge of Kanji radicals and origins.

JPN 3440. Business Japanese (3). Prerequisite: JPN 2220. This course trains students to utilize appropriate expressions in various business-related situations in Japan.

JPN 3441. Business Japanese II (3). Prerequisite: JPN 3440. This course is a continuation of Business Japanese I. It is designed to further develop students’ language skills and cultural knowledge of the socio-cultural context of Japan, preparing students to utilize appropriate expressions and behaviors in various business-related situations in Japan.

JPN 4130. Reading Modern Japanese Literature (3). Prerequisites: JPN 3202 or instructor permission. This course is an introduction to modern and contemporary Japanese literature through the reading of short novels and plays.

JPN 4412. Advanced Japanese (3). Prerequisite: JPN 3202. This course leads qualified students to develop their advanced-level skills in Japanese by reading and discussing various types of writings, ranging from newspaper articles to literary stories and essays.

JPN 4413. Advanced Japanese B (3). Prerequisite: JPN 3202. This course prepares students at the upper-intermediate to advanced level in Japanese. It aims to improve students’ communicative fluency and accuracy in Japanese through emphasis on speaking, listening, reading, and writing.

JPN 4414. Advanced Japanese C: Reading and Writing (3). Prerequisite: JPN 3202. This course targets intermediate and advanced students of Japanese. Students improve reading skills by practicing various reading techniques. Focus is placed on written language, and the acquisition of reading ability.

JPN 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

JPN 4930r. Special Topics (3). Prerequisite: Divisional coordinator permission. This course allows students to study literary topics of a special kind, depending on student interest and faculty expertise. May be repeated to a maximum of eighteen semester hours.

JPT 3391r. Japanese Film and Culture (3). This course is for students interested in Japanese film and culture, and culture in translation. Students learn the skills of analyzing films and come to understand the development of Japanese film and culture. May be repeated to a maximum of six semester hours. Taught in English.

JPT 3122r. Modern Japanese Literature in Translation (3). This course covers short stories and novels of major authors in modern Japanese literature after 1868, giving students an understanding of various aspects of modern Japan. May be repeated to a maximum of six semester hours. Taught in English.

JPT 3510r. Japanese Economy and Environment (3). This course introduces students to current topics related to Japan’s economy and social environment. Students learn about Japan’s economic and environmental structures and significant issues, such as employment, education, international trade, and energy, to better understand contemporary Japanese society. May be repeated to a maximum of six semester hours when topics vary.

JPT 3511r. Japanese Popular Culture (3). This course explores Japanese popular culture from a range of perspectives. Students investigate cultures of reception, shifting markets and the global exchange of cultural forms and social ideas. Students explore the connections between various forms of cultural production and social interaction and other social, political, and economic institutions in Japan, as well as the relationship between new technologies and media and the global exchange of cultural forms and social ideas.

JPT 4020r. Japanese Calligraphy (1). Prerequisite: JPN 1110 or equivalent. This course is designed to teach beginning students the Japanese kanji syllabaries and kanji properly according to the stroke order. The art of sumi writing is also introduced. May be repeated to a maximum of two semester hours.

JPT 4142r. Contemporary Japanese Literature in Translation (3). This course introduces students to contemporary literature in Japan. It approaches principal developments in literary production since the 1980s from multiple perspectives. Focus is placed on how these texts resonate with both sociocultural contexts in Japan and global issues in literary and media studies.

JPT 4310. Japanese Manga (3). This course traces the history of manga from its hybrid prehistory to its developments as a postwar industry and cultural form, investigating manga’s connections to adjacent media practices and its social and cultural importance both domestically and abroad.

Linguistics

Note: All linguistics courses taken for Spanish major credit must be taken through the Department of Modern Languages and Linguistics.
LIN 3041. Introductory Linguistics for Foreign Language Majors (3). This course helps develop an understanding of the nature of language, to dispel a number of myths and misconceptions about language. It provides tools and techniques for describing linguistic data. May count toward the major in Slavic (Russian) and Spanish. May count toward the major in Spanish with a concentration in business, and the Spanish co-major.

LIN 4030. Introduction to Historical Linguistics (3). This course is designed to familiarize students with the world language families, notions of relatedness, sound correspondences, comparative method, internal reconstruction, and the reconstruction of the Proto-Indo-European languages. Several theories of sound change are also discussed.

LIN 4040. Introduction to Descriptive Linguistics (3). This course attempts to develop an understanding of the organization of language, to provide tools and techniques for describing language data, and to examine various models of linguistic description. May count toward the major in Russian and Spanish.

LIN 4512. Introduction to Transformational Grammar (3). The purpose of this course is to expose students to the underlying principles of syntax. Students are taught the mechanics of syntactic theories dating from the late 1960s to the present.

LIN 4644. Kichwa Language and Culture (3). This course combines learning the basics of the Kichwa language with linguistic theory relevant to Kichwa.

LIN 4664. Ethnopoetics (3). This course uses linguistic patterns to trace the formal structures of texts. Topics are addressed in this course in Anglo-American, French, Portuguese, and/ or Spanish literary and/or linguistic transcription and performance, symbolism, ethnomusicology, writing and ethnography.

LIN 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

LIN 4930r. Topics in Linguistics (3). In this course, students arrange with individual faculty members to undertake study in areas outside the regular curriculum. May be repeated to a maximum of twelve semester hours. May be repeated within the same semester.

Portuguese (Brazilian)

POR 1120. Elementary Portuguese I (4). This course is a first semester course in Portuguese for beginning students with no prior exposure to the language. This course emphasizes the four basic communicative skills of listening, reading, speaking, and writing in a culturally authentic context.

POR 1121. Elementary Portuguese II (4). Prerequisite: POR 1120. This is a second semester course in Portuguese for beginning level students. This course emphasizes the four basic communicative skills of listening, reading, speaking, and writing in a culturally authentic context.

POR 2220. Intermediate Portuguese (4). Prerequisites: POR 1120 and POR 1121. This course is a third semester course in Portuguese for intermediate level students. This course emphasizes the four basic communicative skills of listening, reading, speaking, and writing in a culturally authentic context.

POR 3140. Portuguese for Advanced Students of Spanish I (3). Prerequisite: A 3000-level course in Spanish (completed or concurrent enrollment) or instructor permission. An intensive course in Brazilian Portuguese for advanced students of Spanish, other Romance languages, and/or heritage speakers of Portuguese. It is based on positive transfer of applicable linguistic structures of Spanish, avoidance of negative transfer, and concentration on structures unique to Portuguese. Understanding, speaking, reading, and writing skills are practiced.

POR 3141. Portuguese for Advanced Students of Spanish II (3). Prerequisite: POR 3140. This course is based on positive transfer of applicable linguistic structures of Spanish and/or other Romance languages, avoidance of negative transfer, and concentration on structures unique to Portuguese. Understanding, speaking, reading, and writing skills are practiced.

POR 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

POR 4930r. Special Topics (3). Prerequisite: Divisional coordinator permission. This course allows students to study literary, cultural, or linguistic topics of a special kind, depending on student interest and faculty expertise. May be repeated to a maximum of three semester hours.

PRT 3391r. Brazilian Literature and Film in Translation (3). This course uses linguistic patterns to trace the formal structures of texts. Topics are addressed in this course in Anglo-American, French, Portuguese, and/or Spanish literary and/or linguistic transcription and performance, symbolism, ethnomusicology, writing and ethnography.

PRT 3400. Russian Grammar and Popular Culture (3). Pre-or corequisite: RUS 2220. This multimedia course offers a thorough overview of grammar and basic cultural literacy. Language structures are studied through popular fiction and film genres. Students produce a short film in Russian.

RUS 3230. Russian Grammar and Popular Culture (3). Pre- or corequisite: RUS 2220. This multimedia course offers a thorough overview of grammar and basic cultural literacy. Language structures are studied through popular fiction and film genres. Students produce a short film in Russian.

RUS 3240. Reading and Conversation (3). Pre-requisite: RUS 2220 or equivalent. In this course, oral expression is emphasized.

RUS 3400. Conversation and Composition (3). Pre- or corequisite: RUS 2320 or equivalent. This course focuses on oral expression, writing practice, and review of grammar.

RUS 3420. Russian Grammar and Composition (3). Pre- or corequisite: RUS 2320 or equivalent. This course focuses on oral and written composition skills.

RUS 4410r. Advanced Russian Conversation and Composition (3-6). Prerequisite: RUS 3400. This course focuses on the styles and levels of oral expression on a wide range of topics. May be repeated to a maximum of six semester hours.

RUS 4421. Advanced Russian Grammar and Composition (3). Prerequisite: RUS 3420. This course focuses on the practical application of advanced language skills.

RUS 4780. Phonetics (3). Prerequisite: RUS 2220 or instructor permission. This course provides an understanding of the phonetic and phonemic structure of Russian with extensive oral practice.

RUS 4840. History of the Russian Literary Language (3). Prerequisite: RUS 3400. This course studies the development of the phonological and grammatical systems from the earliest records to the present.

RUS 4905r. Directed Individual Study (3). In this course, students arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

RUS 4930r. Special Topics (3). May be repeated to a maximum of twelve semester hours for the major. Only three semester hours taken in any Summer session count towards the major.

RUS 4935r. Honors Thesis (1-6). May be repeated to a maximum of nine semester hours, though the hours of work may be applied to the requirements for the major with permission of the department. All honors work is directed by the student’s honors committee.

RUS 4942r. Internship in Applied Russian (1-6). (S/U grade only.) Prerequisite: Advanced standing in Russian. This course provides academic credit for students working in governmental agencies or private business where students employ the foreign language. Departmental permission required. May be repeated to a maximum of six semester hours.

Russian Courses in Translation

RUT 3110. Russian Literature in English Translation (3). This course focuses on readings and discussion of major Russian literary works.

RUT 3504. Modern Russian Life (3). This course is an overview of current social and cultural issues in Russian, including the legacy of the Soviet period, the relationship between literature and daily life, women’s issues, ecology, mass media, and the efforts of the country to define itself in its new setting and role. No knowledge of Russian is required. May count toward the Russian major. Taught in English.

RUT 3505. Russian Culture and Civilization (3). This course examines the Russians, their culture, and traditions, from the Middle Ages to the present. Fiction and film give students a perspective from the “inside.” Taught in English.

RUT 3514. Russian Folklore and Fairy Tales (3). This course considers a range of critical approaches and provides a general introduction to the study of folk belief, folklore and fairy tales, and their continuing influence in Russian and world culture. The course focuses primarily on Russian folk and fairy tales, but also includes cross cultural comparisons. Taught in English.

RUT 3523r. Russian Cinema (3). This course consists of viewing and discussion of Russian classics and contemporary films. Credit may be applicable to the Russian major. Knowledge of Russian is not required. May be repeated to a maximum of six semester hours.

RUT 3800. Introductory Russian to English Translation (3). This course focuses on the essentials of translation techniques. Requires grade of “B” or better in RUS 2220 (equivalent) or permission of the instructor.

RUT 4213r. Russian Love Prose in English Translation (3). This course explores the development of the Russian love prose in the 19th-21st centuries in such literary trends as Romanticism, Realism, Symbolism, Silver Age, Socialist Realism, and the Soviet Underground, and Postmodernism. May be repeated to a maximum of six semester hours when content varies.

Russian Literature (Writing)

RUW 3100. Survey of Russian Literature I (3). This course surveys representative works of Russian 19th and early 20th century fiction. Taught in Russian.

RUW 3101. Survey of Russian Literature II (3). This course surveys representative works of Russian 20th century short and long fiction. Taught in Russian.

RUW 4470r. Modern Russian Literature (3). Prerequisite: RUW 3100 and RUW 3101, or equivalent. This course studies the great works of major Russian writers of the 19th and 20th centuries, encompassing study of specific movements such as Romanticism, Realism, Modernism, and Socialist Realism. May be repeated to a maximum of nine semester hours.

Serbo-Croatian

SEC 4905r. Directed Individual Study (3). This course allows students to arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.
SLAVIC

SLL 3500. Slavic Culture and Civilization (3). This course examines the Slavic peoples, their cultures and traditions, from prehistory to present day. Novels and film give students a perspective from the "inside." Taught in English.

SLL 3510. The Slavic Vampire (3). This course is an exploration of the mythology of the Vampire, from its origins in Slavic folklore to its appropriation by the West. It examines why the Vampire has endured not only in Eastern Europe but also in the Western imagination. Taught in English.

SLL 4005r. Directed Individual Study (3). This course allows students to arrange with individual faculty members to undertake specialized study in areas outside of or in addition to the regular curriculum. May be repeated to a maximum of six semester hours.

SPANISH

SPANISH LANGUAGE

SPN 1120. Elementary Spanish I (4). This is the first of a three-semester sequence of courses for students with no prior knowledge of the Spanish language, either at the high-school or native-speaker level. The course emphasizes oral communication and grammatical expertise, as well as listening comprehension. Students read short texts and write paragraphs and short compositions in Spanish. May not be taken concurrently with SPN 1121, 1124, and/or 2220. May not be taken by native speakers. Some sections may be computer-assisted.

SPN 1121. Elementary Spanish II (4). Prerequisite: SPN 1120 or equivalent. This course emphasizes oral communication and grammatical expertise, as well as listening comprehension. Students read short texts and poems and write compositions in Spanish. May not be taken by native speakers. May not be taken concurrently with SPN 1120, 1124, and/or 2220.

SPN 1124. Comprehensive Elementary Spanish (4). This is a one-semester course designed for those students who have had at least two years of high-school Spanish (or the equivalent), but who do not feel ready to go directly into SPN 2220 Intermediate Spanish. May not be taken by native speakers. Students passing SPN 1124 with a grade of "C" or better are eligible to enroll in SPN 2220.

SPN 2160. Spanish for Careers (4). Prerequisites: SPN 1120 and SPN 1121, or SPN 1124, or instructor permission. This course introduces students to linguistic and cultural skills in Spanish needed for specific work environments such as law enforcement, education, or medicine. Course content varies with semester. May not be taken by native speakers. With approval of the department, may fulfill the Arts and Sciences language requirement.

SPN 2220. Intermediate Spanish (4). Prerequisite: SPN 1121 and SPN 1124 or equivalent. This course emphasizes oral communication and grammatical expertise, as well as listening comprehension. Students read short stories, poems, and articles, and write extended compositions and papers in Spanish. May not be taken concurrently with SPN 2160, 2220, 1120, 1121, and/or 1124. May not be taken by native speakers.

SPN 2240. Intermediate Spanish II (3). Prerequisite: SPN 2220 or equivalent. This course completes the intermediate Spanish skills sequence and finishes the review of the grammar sequence begun in SPN 2220. Students deepen their functional skills in comprehending, speaking, reading, and writing Spanish and gain an overview of Hispanic culture in various countries. Not open to native or heritage speakers of Spanish.

SPN 3300. Spanish Grammar and Composition (3). Prerequisite: A grade of "C-" or higher in SPN 2240. This course covers the theory and practice of Spanish grammar and its application to compositions. Can be taken concurrently with SPN 3400.

SPN 3350. Spanish for Heritage Speakers (3). This course offers intensive Spanish for heritage speakers who have had little or no formal training in the language. Writing skills are emphasized over oral communication.

SPN 3400. Spanish Reading and Conversation (3). Prerequisite: A grade of "C-" or higher in SPN 2240. This course develops communicative proficiency and accuracy in both reading and writing Spanish. Can be taken concurrently with SPN 3300. Not open to native or heritage speakers of Spanish.

SPN 3440. Language and Culture in Business (3). Prerequisites: SPN 3300 and SPN 3400, or SPN 3350. Intermediate-level language course is aimed at raising cross-cultural awareness in international business. Also is designed to better prepare students to meet the challenges of our global economy.

SPN 3510. Cultures of Iberia (3). Prerequisites: SPN 3300 and SPN 3400, or SPN 3350. This course provides students with fundamental knowledge about the cultures and history of the Iberian peninsula in an effort to enhance their cultural and historical knowledge. This course also aims to improve their basic communicative skills in Spanish.

SPN 3520. Cultures of Latin America (3). Prerequisites: SPN 3300 and SPN 3400, or SPN 3350. This course provides students with fundamental knowledge about the cultures and history of Latin America in an effort to enhance their cultural and historical knowledge. This course also aims to improve their basic communicative skills in Spanish.

SPN 4036. Spanish Medical Interpreting (3). Prerequisite: SPN 3300 or SPN 3350. This course is designed to provide Spanish speaking students with training in medical terminology, cultural issues in medicine, and healthcare interpreting skills.

SPN 4420. Advanced Spanish Composition and Translation (3). Prerequisites: SPN 3300 and SPN 3400. This course stresses composition in Spanish with less emphasis on translation from Spanish into English. For students with prior knowledge of essential points of Spanish grammar.

SPN 4444. Business Writing in Spanish (3). Prerequisites: SPN 3300 and SPN 3400. This course covers letter writing, business terminology, as well as conducting business in the Hispanic world.

SPN 4540r. Regional Cultural Studies (3). Prerequisites: SPN 3300 and SPN 3400, or SPN 3350. This course provides students with exposure to texts and cultural productions from specific regions of Latin America. Students will write in Spanish. The U.S. Texts may include historical documents, legends and myths, poetry, fiction, essays, or popular music. May be repeated to a maximum of six semester hours. Duplicate registration is not permitted in the same semester.

SPN 4700. Introduction to Hispanic Linguistics (3). Prerequisites: SPN 3300 and SPN 3400; or SPN 3500 (for Spanish heritage speakers); LIN 3041 (highly recommended). This course examines the origin, development and present-day variation of the Spanish language and provides an introduction to Spanish linguistics from a theoretical and empirical point of view.

SPN 4710. Hispanic Sociolinguistics (3). Prerequisites: SPN 3300 and SPN 3400, or SPN 3350. This course examines the social and historical factors that have shaped the modern Spanish varieties, such as regional, social, and historical factors. It introduces and engages these topics as they relate to issues of gender, national politics, and culture from Latin America and Spain. May be repeated to a maximum of six semester hours.
Prerequisites: Two 3000-level literature courses or instructor permission. This course offers a comprehensive exploration of Turkish culture and society by foregrounding the many diverse social currents, traditions, and ethnic groups that have shaped its profoundly multicultural identity. Includes topics such as education; public policy; its relations to the EU, the Arab World, and the U.S.; its literary and musical heritage; Islam, religion, and spiritualism; and its everyday cultural and social life such as family traditions, rituals, popular mentalities, holidays, folklore, hospitality, and gastronomy. Taught in English, all course materials in English, and all films subtitled in English.

Turkish

TUT 3003. Turkish Culture and Civilization (3). This course offers a comprehensive exploration of Turkish culture and society by foregrounding the many diverse social currents, traditions, and ethnic groups that have shaped its profoundly multicultural identity. Includes topics such as education; public policy; its relations to the EU, the Arab World, and the U.S.; its literary and musical heritage; Islam, religion, and spiritualism; and its everyday cultural and social life such as family traditions, rituals, popular mentalities, holidays, folklore, hospitality, and gastronomy. Taught in English, all course materials in English.

TUT 3053. Turkish Cinema (3). This course offers a comprehensive exploration of Turkish films that confront identity issues in a Muslim country unique for being a secular democracy and a bridge culture between East and West. Students analyze how filmmakers address the socio-cultural dilemmas facing the individual in Turkish society (modern/traditional, eastern/western, urban/rural, religious/secular, nationalist/minority, etc.). The course also explores in detail the aesthetic vision of a sample of successful Turkish filmmakers. Taught in English, course materials in English, and all films subtitled in English.

MOTION PICTURE ARTS

COLLEGE OF MOTION PICTURE ARTS

Web Page: http://film.fsu.edu/

Dean: Frank Patterson; Associate Dean: Reb Bradlock; Assistant Dean: Dr. Andrew Syder; Associate Professors: Auzenne, Baggott; Filmmakers in Residence: Allen, Burmeister, Cialariello, Cohen, France, Glass, Honn, Kaleko, Maurer, Mendez, Meyer, Nunez, Robkin, Scoon, Simmons, Slade, E. Stone, J. Stone, Williams; Associate Scholar: Tripp; Dean Emeritus: Fielding

The Florida State University College of Motion Picture Arts offers a Bachelor of Fine Arts (BFA) degree at the undergraduate level, with majors in Production and in Animation and Digital Arts. The BFA programs combine schooling in motion picture production with solid grounding in liberal studies. The curriculum of each program directs students through a course of study that teaches the special language of motion picture storytelling through the production of a series of short, narrative projects. The College funds virtually all student production expenses, including those of the thesis projects, a portion of production design, and catering. Screenwriting, production, and film analysis are each viewed as part of an integrated process. The goal of the programs is to produce educated, literate, and creative artists who are prepared for careers in the motion picture industry. Core courses in the BFA majors include producing, directing, screenwriting, editing, camera and lighting, sound, production management, motion picture history, theory, and aesthetics.

The purpose of this curriculum is to furnish the conceptual framework, the professional training and the working environment for eventual participation in a profession that is a powerful influence in our culture. The goals of the College of Motion Picture Arts are to fully educate students and to help them become integral members of the academic community of Florida State University, responsible members of the entertainment profession, and participants in a creative and artistic process. The program in Motion Picture Arts is under constant review and subject to change. For further information, please refer to http://film.fsu.edu.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in the College of Motion Picture Arts satisfy this requirement by earning a grade of “C-” or higher in FIL 4972r, Thesis Film Production Management.

Facilities

The College of Motion Picture Arts operates extensive production facilities for its graduate and undergraduate programs in University Center A on Florida State University’s campus in Tallahassee, and in an off-campus site in Midway, Florida, known as the Torchlight Center. Considered one of the finest facilities in the world devoted exclusively to film education, it includes: professional sound stages, a green-screen/motion capture stage, a cinematography and set operations teaching stage, grip and electric trucks fully equipped with industry standard G&E equipment, an ADR and Foley recording studio, re-recording stages, QC and dailies screening rooms, digital animation/VFX production labs, color correction suites, a 120-seat screening room, digital animation/VFX production suites, seminar rooms, writer rooms, interactive classrooms, individual post production suites, teaching labs and student production planning rooms. The College is equipped for and supports industry-standard acquisition in HD, 2k, 4k, digital formats, and digital sound recording formats.

In addition, the College hosts a resource center of over 5,000 motion picture titles, and other resources which include screenplays, books, and an archive of 35mm and 16mm film prints.

Requirements for a Major in Motion Picture Arts - Production

This major emphasizes three areas: production skills, screenwriting, and interpretative analysis. Traditional classes in these areas will be supplemented with: (1) problem-solving seminars simulating entertainment business dilemmas; (2) laboratory courses in production techniques; and (3) screenings and workshops conducted by active film professionals.

The degree will require completion of a minimum of one hundred twenty semester hours. For a sample listing of the required curriculum plan, please refer to http://film.fsu.edu.

To fulfill the requirements of the Production major in the College of Motion Picture Arts, a student must:

1. Possess sufficient mobility, strength, and dexterity in both hands and legs to lift, carry, and operate filmmaking equipment
2. Possess sufficient visual capacity to perform the functions of a film crew member without the assistance of visual aids other than contact lenses or eyeglasses
3. Possess sufficient aural capacity to hear and understand spoken instructions without assistance other than a hearing aid
4. Be able to comprehend oral and written instructions, policies, and procedures related to the College of Motion Picture Arts, filmmaking protocols, and the operation of equipment
5. Possess the ability to adequately communicate orally, in English, with others

Requirements for a Major in Motion Picture Arts - Animation and Digital Arts

This major emphasizes three core areas: live-action and CG production skills, screenwriting and pre-visualization, and interpretative analysis. Traditional classes in these areas will be supplemented with: (1) problem-solving seminars simulating entertainment business dilemmas; (2) laboratory courses in production techniques; and (3) screenings and workshops conducted by active professionals.

The degree will require completion of a minimum of one hundred twenty semester hours. For a sample listing of the required curriculum plan, please refer to http://film.fsu.edu.

To fulfill the requirements of the Animation and Digital Arts major in the College of Motion Picture Arts, a student must:

1. Possess sufficient mobility, strength, and dexterity in both hands and legs to lift, carry, and operate filmmaking equipment
2. Possess sufficient visual capacity to perform the functions of a film crew member without the assistance of visual aids other than contact lenses or eyeglasses
3. Possess sufficient aural capacity to hear and understand spoken instructions without assistance other than a hearing aid
4. Be able to comprehend oral and written instructions, policies, and procedures related to the College of Motion Picture Arts, filmmaking protocols, and the operation of equipment
5. Possess the ability to adequately communicate orally, in English, with others

Admission

Admission to the College of Motion Picture Arts is limited access, making admission highly selective and competitive. Applicants must apply to Florida State University’s Office of Admissions by their Fall admission deadline and must submit a separate application to the College of Motion Picture Arts. Each applicant must submit a resume, three letters of recommendation, copies of high school and college transcripts, a creative portfolio (which can include film work, photographs, animation, etc.), a writing sample, and a 500-1000 word essay describing his or her motivation for becoming a filmmaker. Any application that does not contain all these items will be considered incomplete and will be denied automatically. All application materials must be received online by the College of Motion Picture Arts no later than the University’s Fall admission deadline for the applicant to be considered for admission the following Fall semester. More information concerning the undergraduate application is available online at http://film.fsu.edu.

Freshmen majors will not enroll in major classes prior to their sophomore year in order to concentrate full-time on fulfilling their liberal studies requirements.

Grade Requirements

Motion Picture Arts majors must maintain a 3.0 cumulative grade point average in all coursework, including liberal studies requirements taken during their freshman year at the University.

Retention

All students must meet the University’s minimum retention standards as well as the College of Motion Picture Arts Professional Code of Conduct. In addition, continuation as a major will depend on the development of each student’s talents, skills, professional discipline, and academic record. A student’s work and commitment are under continuous review, and any candidate who fails to maintain high standards will be dismissed from the program.
Probation and/or Dismissal

Motion Picture Arts majors will adhere to the University Academic Honor System, Student Conduct Code, and Summons to Responsible Freedom. At the end of each semester, the faculty and director will meet to discuss the work, behavior, grades, and progress of the majors. At that time, students may be notified of probation or dismissal by a letter stating their status, with an invitation to meet with the Associate Dean. In addition, a student may be placed on probation or dismissed at any time under the following circumstances:

1. If the cumulative GPA falls below 3.6, it will result in a one-semester probation. Students will be reinstated in good standing if the cumulative major GPA rises to 3.0 by the end of the following semester. Failure to raise the GPA will result in dismissal from the program.

2. Attendance will be taken in all classes at the beginning of class. Anyone not in class at that time will be considered absent. Anyone leaving class early may also be counted as absent. Approval of absences is up to the instructor and will require documentation to confirm the legitimacy of the absence.

3. Professional behavior is expected of film majors at all times. Therefore, behavior so negative, disruptive, or destructive as to compromise the work of fellow students or the effectiveness of the faculty and/ or inability to work positively in a collaborative environment shall constitute grounds for probation or immediate dismissal without any prior period of probation. Peer evaluations may be considered in this evaluation process. A student on professionalism probation will be reinstated in good standing if, in the judgment of the faculty and the director, behavioral problems have been corrected. A student’s failure to correct problems will result in dismissal from the program.

4. Any unauthorized use, possession, or willful destruction of College of Motion Picture Arts equipment, facilities, film stock, or finished film will result in immediate notification to the proper authorities. The outcome of their decisions will determine the actions of the College of Motion Picture Arts with respect to the student(s) involved.

Liberal Studies for the 21st Century Program

All undergraduate majors in the College of Motion Picture Arts are required to meet Florida State University’s liberal studies requirements as specified in the “Undergraduate Degree Requirements” chapter of this General Bulletin.

Transfer Students

The College of Motion Picture Arts will accept transfer students for admission each Fall semester, and those students must have completed at least thirty semester hours of their liberal studies requirements prior to their initial Fall semester in the College. Applications must be submitted separately to both the College of Motion Picture Arts and the Florida State University Office of Admissions. The College of Motion Picture Arts application is available online at http://film.fsu.edu. Transfer students are subject to the same application requirements and must submit the same application materials as those applying as a freshman applicant.

Financing and Ownership of Student Films

The College of Motion Picture Arts pays for virtually all student laboratory, workshop, and thesis project production expenses at the graduate and undergraduate level. So far as it is known, it is the only film school in the United States to do so.

Under State of Florida law, regulations, and rules, all films and videos produced by Motion Picture Arts students become property of Florida State University and are copyrighted in the name of Florida State University. The same regulations and rules provide that in the event of the commercial exploitation of these films, any net revenues derived from a particular film will be split in a proportion to be determined by Florida State University (currently 50/50) between the College of Motion Picture Arts and all of the graduating student workers on the film including, but not limited to, the writer, director, producer/production manager, sound designer, editor, cinematographer, art director, and musical score composer.

State law provides that any stand-alone screenplays created by students will remain the student’s property and may be exploited commercially by them; however, screenplays, script, and story ideas that are proposed and incorporated by students into their workshop or thesis films become the property of Florida State University and will be copyrighted with the University’s name.

State law requires that all entering students be provided with a copy of the relevant regulatory rule and that applicants for admission to the College of Motion Picture Arts sign a statement acknowledging their receipt and understanding of the rule prior to official admission and enrollment.

Honors in the Major

The College of Motion Picture Arts offers an Honors in the Major program to encourage talented seniors to write a feature-length screenplay or undertake independent and original research as part of the Bachelor of Fine Arts degree. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Health Insurance

Students seeking degrees in certain majors, including film, assume any exposure to the particular hazards associated with that major. As protection for our students, the College of Motion Picture Arts requires that majors present proof of health and accident insurance prior to registration in the Fall semester each year. Students are expected to maintain this insurance throughout their enrollment in the program.

Film Studies Minor in the College of Motion Picture Arts

The film studies minor will give students the opportunity to select a program of study that examines the many facets of American and international cinema. The interdisciplinary nature of the program allows students to experience different approaches to film study: film and cultural differences, basic film vocabulary, film history, film and social forces, film genres, film theories, film directors, and film aesthetics. No production classes are offered in the film studies minor.

Requirements for a Minor in Film Studies

The interdisciplinary minor requires the completion of fifteen semester hours in courses approved for film studies. All students are required to take either FIL 2001, Introduction to Film or FIL 2030, Film History. The remaining hours may be selected from the film studies offerings. Courses counted toward the film studies minor cannot be counted toward a student’s major.

For additional information on a film minor and to view the most up-to-date course listings, please visit http://film.fsu.edu/Programs/Minor-in-Film-Studies.

Definition of Prefix

FIL—Film
IFS—Interdisciplinary Florida State University Courses

Undergraduate Courses

FIL 2001. Introduction to Cinema Studies: Analysis and Practice (3). This course introduces students to film analysis theories and techniques, including the basics of dramatic structure, genre, prevalent filmmaking theories, and film production processes. Through weekly film screenings, class discussion, and hands-on production exercises, students develop and practice skills to help them compare and interpret films representing a variety of genres, aesthetic traditions, and cultural contexts.

FIL 2030. History of Motion Pictures (3). This course is an overview of international film as an industry, mass medium, and art form.

FIL 2043r. History and Practice of Visual Effects and Animation (1–6). Prerequisite: Major status. This course introduces computer graphics in the contexts of historical approaches to visual effects and animation. Students apply historical techniques to create original animations and visual effects.

FIL 2090r. Professional Communication (1). Prerequisite: Major status. This course provides instruction in oral presentation and communication skills for professional settings in the motion picture industry. May be repeated to a maximum of three semester hours.

FIL 2110r. Story Development and Screenwriting I (3). Prerequisite: Major status. This course introduces the basic techniques of story development and screenwriting through exercises in story structure, dialogue, and character development.

FIL 2423. Filmmaking I (3). Prerequisite: Major status. This course provides a basic understanding of film production technology, equipment operation, terminology, and techniques.

FIL 2533r. Motion Picture Sound (1–6). Prerequisite: Major status. This course teaches the principles of aesthetics of sound and the basic practices involved in creating a motion picture sound track.

FIL 2552. Film Editing (3). Prerequisite: Major status. This course allows students to analyze, discuss, and put into practice the skills and techniques required to edit a narrative motion picture.

FIL 2557r. Motion Picture Editing (1–6). This course teaches introductory principles, aesthetics, and theory of motion picture editing and their application in editing narrative shorts.

FIL 2710. Visualization I (3). Prerequisite: Major status. This course provides an introduction to the visual communication skills and techniques required for the development and previsualization of narrative motion pictures.
FIL 2726. Compositing I (1–3). Prerequisite: Major status. This course introduces layer-based compositing concepts and techniques, including their application in visual effects for practice and research.

FIL 2727r. Compositing II (1–3). Prerequisites: FIL 2726 and major status. This course introduces node-based compositing theory and practice with an emphasis on best practices and professional standards used in the visual effects industry.

FIL 2730. Introduction to 3D Computer Graphics (3). Prerequisite: Major status. This course provides instruction in using industry-standard 3D tools to generate assets, light scenes, and render images. Students apply course concepts to create an original virtual scene extension shot.

FIL 2731. Introduction to 3D Computer Animation (3). Prerequisite: Major status. This course provides instruction in the foundation principles of animation. Students apply course concepts to create original animation that conveys emotion and demonstrates basic understanding of body mechanics.

FIL 3132. Screenwriting II (3). Prerequisite: Major status. This course focuses on development of sophisticated story ideas, treatments, character biographies, storyboards, step-outlines, first drafts, and revisions of both original ideas and adaptations.

FIL 3363r. Documentary Filmmaking (1–6). Prerequisite: Major status. This course provides students the opportunity to view historical and current films followed by discussions on the film industry. The course also addresses positions such as director, producer, and previsualization of narrative motion pictures.

FIL 3516. Film Camera and Lighting (3). Prerequisite: Major status. This course provides a theoretical and practical knowledge of all aspects of cinematography: cameras and lenses, film stocks, exposure, lights, lighting, and composition.

FIL 3690r. Digital Studio Department Leadership (1–12). Prerequisites: Major status and instructor permission. This course provides instruction and practice in the leadership and management of teams within the field of visual effects and animation. The course also addresses positions such as digital effects producer, supervisor, as well as modeling, animation, and compositing leads.

FIL 3702r. Lighting, Texturing, and Rendering I (1–6). Prerequisites: FIL 2730 and major status. This course provides an introduction to concepts of CGI lighting and rendering to enhance original animation and visual effects. The course also addresses basic lighting theory needed to create virtual lighting effects.

FIL 3711. Visualization II (3). Prerequisite: Major status. This course provides an intermediate-level instruction in the visual development skills required for the preproduction and previsualization of narrative motion pictures.

FIL 3725. Stop Motion Animation (1–6). Prerequisites: FIL 2703, FIL 2726 and major status. This course teaches principles of stop-motion and forward-animation. Through the creation of original animations, it also explores stop-motion cinematography, Claymation and stop-construction.

FIL 3736r. Character Animation I (1–6). Prerequisites: FIL 2730, FIL 2731 and major status. This course provides instruction in developing and creating believable and compelling animated characters. Topics and skills covered include body mechanics, facial animation, lip-synching, conveying human emotion, acting theory for animators, and storytelling.

FIL 3737r. Character Animation II (1–3). Prerequisites: FIL 2731, FIL 3736, and major status. This course provides instruction in theories and practice in character and creature animation with an emphasis on animating believable multi-character dialogue and combat scenes and on implementing professional workflow standards.

FIL 3803. The Contemporary Cinema: Theory and Practice (3). This course is a survey and analysis of post-1950 motion pictures with emphasis on technique and industrial evolutions.

FIL 3833r. Film Styles (3–6). Prerequisite: Major status. This course allows students to analyze motion picture form and content through the styles of selected filmmakers with an emphasis on genres, national movements, and other topics of interest. May be repeated to a maximum of six semester hours.

FIL 3922r. Film Genres and Filmmakers (1). Prerequisite: Major status. This course provides students with the opportunity to view historical and current films followed by discussions in an academic forum. May be repeated to a maximum of six semester hours.

FIL 3923r. Special Topics (3–12). Prerequisite: Major status. This course is an analysis of specialized topics in motion pictures. May be repeated during the same term to a maximum of twelve semester hours.

FIL 3963. BFA Qualifying Exam (0). Prerequisite: Major status. This course evaluates the progress of the student and recommends continuance in the film school or directs the student toward other areas of study.

FIL 3971r. Thesis Film Support (2–12). (S/U grade only.) Prerequisite: Major status. This course covers the principles and responsibilities of grips, gaffers, assistant directors, assistant cameramen, and production managers, as well as the performance of these responsibilities on the set of BFA thesis films. May be repeated to a maximum of twelve semester hours.

FIL 4135. Screenwriting III (3). Prerequisite: Major status. This course discusses the development of story script ideas, treatments, character biographies, storyboards, step-outline, first drafts, and revisions of both original ideas and adaptations.

FIL 4160. Feature Screenwriting (3). Prerequisite: Major status. This course teaches aspects of feature screenwriting format, pitch ideas, creating and developing character, story, and dialogue.

FIL 4164. Feature Screenwriting: Development (3). Prerequisite: Major status. This course teaches the various techniques of scene breakdown, setting up, sequencing, character development, and dialogue development. Also teaches rewriting techniques to strengthen first drafts.

FIL 4170r. Advanced Filmmaking (3–9). Prerequisite: Major status. This course covers advanced principles and practice of making a short, sync-sound, 16mm film. May be repeated to a maximum of nine semester hours; duplicate registration allowed within the same term.

FIL 4474. Production: Advanced Cinematography (3). Prerequisite: Major status. This course introduces advanced lighting techniques and allows hands-on exercises emphasizing the creative use of lighting for mood and storytelling.

FIL 4539. Production: Advanced Sound (3). Prerequisite: Major status. This course provides students with a thorough understanding of digital sound recording, sound mixing, and various stages of sound post-production as it applies to 16mm filmmaking.

FIL 4567. Production: Advanced Editing (3). Prerequisite: Major status. This course offers advanced study in film editing techniques and styles.

FIL 4602. Film Business Planning (3). Prerequisite: Major status. This course exposes students to current business trends and issues in the film industry, introduces case studies that examine all business aspects surrounding a feature film; introduces current readings on the film industry.

FIL 4613. Film Exhibition and Advertising (3). Prerequisite: Major status. This course provides background in the marketing, advertising, and exhibition of film to audiences.

FIL 4653. Film Law (3). Prerequisite: Major status. This course provides a working knowledge of the specialized concepts and vocabulary pertaining to entertainment-related forms of intellectual property and the contractual relationships necessary to finance, create, and license various forms of entertainment.

FIL 4564. Film Producing and Finance (3). Prerequisite: Major status. This course is an introduction to the techniques necessary to create a responsible business approach for the production process and to create a greater individual awareness of the motion picture producer as a career opportunity.

FIL 4712r. Visualization III (3). Prerequisite: Major status. This course provides an advanced-level instruction in the visual development skills required for the preproduction and previsualization of narrative motion pictures. May be repeated to a maximum of six semester hours.

FIL 4713r. Character Art (1–6). Prerequisites: FIL 2730 and major status. This course provides instruction in the visual development of character art.

FIL 4737r. Character Animation II (1–3). Prerequisites: FIL 2731, FIL 3736, and major status. This course teaches the various techniques of scene breakdown, setting up, sequencing, character development, and dialogue development. Also teaches rewriting techniques to strengthen first drafts.

FIL 4772r. Animation I (3). Prerequisite: Major status. This course teaches the various techniques of scene breakdown, setting up, sequencing, character development, and dialogue development. Also teaches rewriting techniques to strengthen first drafts.

FIL 4823r. Professional Internship (1–12). Prerequisite: Major status. This course provides students the opportunity to work in the film industry for a minimum of six semester hours; may be repeated to a maximum of nine semester hours; duplicate registration allowed within the same term.

FIL 4872. Film Aesthetics (3). Prerequisite: Major status. This course teaches the various techniques of scene breakdown, setting up, sequencing, character development, and dialogue development. Also teaches rewriting techniques to strengthen first drafts.

FIL 4905c. Directed Individual Study (1–3). (S/U grade only.) Prerequisites: Major status and junior standing. May be repeated to a maximum of six semester hours.

FIL 4910r. Application of Research and Creative Methods (1–3). (S/U grade only.) Prerequisites: Major status and junior standing. In this course, students participate in a faculty or graduate student research and/or creative project. May be repeated to a maximum of six semester hours.

FIL 4923r. Undergraduate Film Seminar (1–6). Prerequisite: Major status. This course consists of the development of a creative film project under the direction of a faculty member or industry professional in various areas. May be repeated to a maximum of six semester hours.

FIL 4933. Professional Development (3). Prerequisite: Major status. This course prepares students to enter the professional film work arena; addresses the search for employment within the film industry and the search for funds to produce independent work.

FIL 4940c. Application of Instructional Methods (1–3). (S/U grade only.) Prerequisites: Major status and junior standing. In this course, students participate in a faculty or graduate student research and/or creative project. May be repeated to a maximum of six semester hours.

FIL 4945c. Professional Internship (1–12). (S/U grade only.) Prerequisite: Major status. This course provides students with a minimum of twelve semester hours of on-the-job experience with a company involved in film/video production, distribution, or exhibition. May be repeated to a maximum of twelve semester hours.

FIL 4970r. Thesis Defense (0). (P/F grade only.) Prerequisite: Major status. This course allows students to participate in the professional process under the direct supervision of a faculty member. May be repeated to a maximum of six semester hours.

FIL 4972s. Thesis Film Production Management (3–6). Prerequisite: Major status. Production management for BFA thesis films. May be repeated to a maximum of fifteen semester hours.

FIL 4973s. Thesis Film (1–15). Prerequisite: Major status. Study and practice of all the creative aspects of BFA thesis films. May be repeated to a maximum of fifteen semester hours.

FIL 4975r. Undergraduate Honors Thesis (1–6). Prerequisites: Admission to the undergraduate Film School honors program and major status. Student must complete a minimum of six semester hours; may be repeated to a maximum of nine semester hours.
FIL 4976. Thesis Script Rewrite (3). Prerequisite: Major status. This course teaches students to articulate on paper an idea that is both discernible and visual in the form of a collection of interesting moments that add up to tell a story.

IFS 2013. Reality and Illusion in World Cinema (3). This course examines world cinema with a focus on the elusive and continually shifting boundary between reality and illusion. The course investigates creative approaches to story-telling and the craft of filmmaking not typically seen in traditional Hollywood or American independent film productions.

IFS 2027. Animation and Identity (3). Prerequisite: Honors student status. This course examines the medium of animation and the contributions of influential animators with a focus on how identity and societal milieu influence artistic expression in animation. Through animation screenings, discussion, and hands-on animation exercises, students are exposed to diverse animation styles and approaches, create original short animations, and come to better understand the creative process utilized in animation.

IFS 2028. Child and Youth Media Cultures in the U.S. (3). Prerequisite: Honors or major status. This course examines the role of media in the lives of U.S. children and youth by looking at young people's media use in diverse contexts throughout the U.S. and asking how child and youth identities and cultures are influenced by and co-constructed with media. The course also incorporates practical exercises in applying theory and research to study young people's media practices and to develop media products intended for child and youth audiences.

Graduate Courses

FIL 5021. History and Criticism I (3).

FIL 5022. History and Criticism II (3).

FIL 5155L. Screenwriting: Techniques and Treatments (2–6).

FIL 5156L. Screenwriting: Narrative Techniques (2–6).

FIL 5157L. Screenwriting: Advanced Workshop (2–6).

FIL 5159L. Screenwriting: Motion Picture Workshop (3).

FIL 5408r. Preproduction and Production Planning (3–12).

FIL 5420L. Basic Film Production (2–6).

FIL 5458r. Principles and Practice of Technical and Creative Support (3).

FIL 5459r. Practicum in Technical Support (1–12).

FIL 5484Lr. Directing Actors (2).

FIL 5498. Advanced Directing (2).

FIL 5499. Acting for the Camera (3).

FIL 5519L. Camera and Light Mechanics (2–6).

FIL 5546. Advanced Sound (2–6).

FIL 5555L. Film Editing (2–4).

FIL 5560L. Advanced Editing (2–6).

FIL 5590L. Lighting Workshop (2–6).

FIL 5591r. Production Design Workshop (2–12).

FIL 5592L. Sound Workshop (2).

FIL 5593L. Post-production Sound Workshop (2).

FIL 5594r. Directing: Multicamera Workshop (3–9).

FIL 5595Lr. Directing: Single-Camera Workshop (2).

FIL 5635. Distribution and Financing Workshop (3).

FIL 5636Lr. Advanced Workshop in Area of Specialization (2–12).

FIL 5642L. Producing 1 (2).

FIL 5646L. Producing 2 (2).

FIL 5648Lr. Production Management (2).

FIL 5774r. Basic Video Production (3–6).

FIL 5781. Intermediate Television Editing (3).

FIL 5782. Advanced Television Editing (3).

FIL 5805r. Critical Studies in Film and Television (3).

FIL 5806. Critical Methods in Motion Picture, Television, and Recording Arts (3).

FIL 5807. Critical Methods of Film Analysis (3).

FIL 5875r. Film Aesthetics (1).

FIL 5906r. Directed Individual Study (3–12). (S/U grade only.)

FIL 5912r. Supervised Research or Creative Activity (3). (S/U grade only.)

FIL 5921r. Colloquium in Motion Picture, Television, and Recording Arts (3).

FIL 5930r. Proseminar in Motion Picture, Television, and Recording Arts (1).

FIL 5931r. Special Topics in Motion Picture, Television, and Recording Arts (3–12).

FIL 5955r. Apprenticeship (1–12). (S/U grade only.)

FIL 5962r. MFA Qualifying Project (3–15).

MUSIC

COLLEGE OF MUSIC

Web Page: http://www.music.fsu.edu/

The College of Music has been a fully accredited member of the National Association of Schools of Music since 1930, and its degree requirements are in accordance with the latest published regulations of that association.

Undergraduate Degrees

The following are the undergraduate degrees offered by the College of Music:

Bachelor of Arts in Music
Bachelor of Music—Composition
Bachelor of Music—Music Theory
Bachelor of Music—Music Therapy
Bachelor of Music—Performance

Brass

Guitar (classical)

Harp

Music Theatre

Organ

Percussion

Piano

Strings (cello, double bass, viola, violin)

Voice

Woodwinds

Bachelor of Music Education

Choral

Instrumental

General

In addition to the Bachelor of Music (BM) and Bachelor of Music Education (BME) degrees, the Bachelor of Arts (BA) degree in music is offered through the College of Music. The College of Music also provides a music minor for the divisions of the University that require a minor course of study.

For complete details of undergraduate degree requirements, plus a description of the college, its facilities, opportunities, and available financial assistance, refer to the “College of Music” chapter of this General Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in the music BA program must satisfy this requirement by earning a grade of “C-” or higher in CGS 2060, CGS 2100, CGS 3406, EME 2040, ISC 3313, MUE 4690, or
MUS 2360. Undergraduate majors in music teacher education satisfy this requirement by earning a grade of “C–” or higher in MUE 4690. Undergraduate majors in music composition, music performance, music theatre, music theory, and music therapy satisfy this requirement by earning a grade of “C–” or higher in MUS 2360.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

**Music**
1. MUT X111 or MUT X121
2. MUT X112 or MUT X122
3. MUT X116 or MUT X126
4. MUT X117 or MUT X127
5. MUT X241 and MUT X242 and MUT X246 and MUT X247, or MUT X221 and MUT X222 and MUT X226 and MUT X227, or MUT X271 and MUT X272 and MUT X276 and MUT X277
6. MUN XXXX: one course for four credit hours
7. MVX XX1X: one course for two to four credit hours
8. MVX XX2X: one course for two to four credit hours
9. XXX XXXX: recommended courses vary from track to track
10. Secondary piano: proficiency by examination, or MVK X111 and MVK X112 and MVK X121 and MVK X122, or MVK X111r and MVK X112r and MVK X121r and MVK X122r and MVK X221 as needed to achieve piano proficiency. **Note:** Duplicated courses such as MVK X111r may be repeated up to four times.

**Music Composition**
1. MUT X111 or MUT X121
2. MUT X112 or MUT X122
3. MUT X116 or MUT X126
4. MUT X117 or MUT X127
5. MUT X241 and MUT X242 and MUT X246 and MUT X247, or MUT X221 and MUT X222 and MUT X226 and MUT X227, or MUT X271 and MUT X272 and MUT X276 and MUT X277
6. MUN XXXX: one course for four credit hours
7. MVX XX1X: one course for two to four credit hours
8. MVX XX2X: one course for two to four credit hours
9. XXX XXXX: recommended courses vary from track to track
10. Secondary piano: proficiency by examination, or MVK X111 and MVK X112 and MVK X121 and MVK X122, or MVK X111r and MVK X112r and MVK X121r and MVK X122r and MVK X221 as needed to achieve piano proficiency. **Note:** Duplicated courses such as MVK X111r may be repeated up to four times.

**Music Teacher Education**
1. EDF X005
2. EDF X085
   **Note:** In addition to EDG X085, a minimum of six credit hours with an international or diversity focus is required. Eligible courses will be determined by the institution where the student is currently earning his or her Associate in Arts (AA) or baccalaureate degree. Foreign language courses may be used to meet this requirement. Contact the department and/or advisor for details.
3. EME X040
4. MUT X111 or MUT X121
5. MUT X112 or MUT X122
6. MUT X116 or MUT X126
7. MUT X117 or MUT X127
8. MUT X241 and MUT X242 and MUT X246 and MUT X247, or MUT X221 and MUT X222 and MUT X226 and MUT X227, or MUT X271 and MUT X272 and MUT X276 and MUT X277
9. MUN XXXX: one course for four credit hours
10. MVX XX1X: one course for two to four credit hours
11. MVX XX2X: one course for two to four credit hours
12. XXX XXXX: recommended courses vary from track to track
13. Secondary piano: proficiency by examination, or MVK X111 and MVK X112 and MVK X121 and MVK X122, or MVK X111r and MVK X112r and MVK X121r and MVK X122r and MVK X221 as needed to achieve piano proficiency. **Note:** Duplicated courses such as MVK X111r may be repeated up to four times.

**Music Performance**
1. MUT X111 or MUT X121
2. MUT X112 or MUT X122
3. MUT X116 or MUT X126
4. MUT X117 or MUT X127
5. MUT X241 and MUT X242 and MUT X246 and MUT X247, or MUT X221 and MUT X222 and MUT X226 and MUT X227, or MUT X271 and MUT X272 and MUT X276 and MUT X277
6. MUN XXXX: one course for four credit hours
7. MVX XX1X: one course for two to four credit hours
8. MVX XX2X: one course for two to four credit hours
9. XXX XXXX: recommended courses vary from track to track
10. Secondary piano: proficiency by examination, or MVK X111 and MVK X112 and MVK X121 and MVK X122, or MVK X111r and MVK X112r and MVK X121r and MVK X122r and MVK X221 as needed to achieve piano proficiency. **Note:** Duplicated courses such as MVK X111r may be repeated up to four times.

**Music Theory**
1. MUT X111 or MUT X121
2. MUT X112 or MUT X122
3. MUT X116 or MUT X126
4. MUT X117 or MUT X127
5. MUT X241 and MUT X242 and MUT X246 and MUT X247, or MUT X221 and MUT X222 and MUT X226 and MUT X227, or MUT X271 and MUT X272 and MUT X276 and MUT X277
Graduate Degrees

The following are the graduate degrees offered by the College of Music:
Master of Arts in Art Administration
Master of Arts in Music

Accompanying
Choral conducting
Composition
Instrumental conducting
Jazz studies
Music theory
Music therapy
Musico/ology (both historical and ethnomusicology)
Opera
Performance
Piano pedagogy

Master of Music Education
Doctor of Philosophy in Music Education
Doctor of Philosophy in Music
Musico/ology
Music Theory and Composition

Doctor of Music in Composition
Doctor of Music in Performance

Details of graduate programs can be found in the Graduate Bulletin.

MVC, MVJ, MVK, MUS

Undergraduate Courses

Liberal Studies

IFS 2057. Seeing Sound, Hearing Pictures: The Interaction of Music and Photography (3). This course selects a specific category of sound, music, and a specific visual medium, photography, to explore the nature of each and to examine how the aural and visual interact today.

IFS 2059. Music and International Human Rights (3). This course investigates the role of music plays worldwide in negotiating, consolidating, and questioning power between powerful macro-reaching political entities (corporations, nation states) and micro-locales (villages, regions, sub-cultures).

IFS 2061. Visualizing Music: Representing Music through Images (3). This course engages ways other than standard Western music notation that music may be represented visually, including tablatures, analytical graphs and diagrams, graphic and text scores, and notation methods for world or popular music and works in the art music tradition pre- and post-dating the development of standard Western music notation.

IFS 2064. Art Music in Contemporary Society (3). This course examines the reception of musical performance and contemporary music in the late nineteenth, twentieth and twenty-first centuries. Through this study students also select a metropolitan musical capital for their own research projects and evaluate the influences of society on music and music on society through the reception of music in the Western canon.

IFS 2072. A Social History of America’s Popular Music (3). This course surveys the development of popular music from the 1950s to the present, examining the music and the cultural, social, economic, technological, and political conditions surrounding that music. The course widens student’s comprehension of the times, places, cultural contexts, intellectual debates, and economic conditions that foster (or hinder) artistic innovation.

IFS 2073. Music in the World (3). This course provides an introductory survey of various musical traditions in a global perspective, exploring music both as a phenomenon of sound and as a phenomenon of culture.

Composition

MUC 1211. Composition (2). Prerequisites: MUT 1111, MUT 1241L, and instructor permission. This course examines the elements of form and composition. For composition majors only.

MUC 2221r. Composition (2). Prerequisite: MUC 1211. This course studies techniques of composition. For composition majors only. May be repeated to a maximum of four semester hours.

MUC 3231r. Composition (3). Prerequisites: MUC 2221 and instructor permission. For composition majors only. May be repeated to a maximum of six semester hours.

MUC 3610. Film Scoring (3). Prerequisite: Instructor permission. This course studies techniques of film scoring and review of application requirements. May be repeated to a maximum of six semester hours.

MUC 3620r. Jazz Composition (3). This course examines techniques of creative jazz composition and literature. May be repeated to a maximum of six semester hours.

MUC 4103r. Composition (2). Prerequisite: MUT 2117. For non-composition majors only. May be repeated to a maximum of four semester hours.

MUC 4241r. Composition (3). Prerequisite: MUC 3231. For composition majors only. May be repeated to a maximum of six semester hours.

MUC 4950. Composition Senior Recital (0), (S/U grade only.)

Music Education

MUE 1090. Orientation to Music Education/Music Therapy (1). (S/U grade only.)

MUE 1093. Freshman Seminar (1).

MUE 2040. Introduction to Teaching Music (3). Prerequisite: MV(B, J, K, O, S, V, W) 1310–1319 series or instructor permission. This course provides students with an introduction to music teaching and learning.

MUE 2290. Personal Growth in Music (2). This course provides a systematic study of the elements of music. For non-music majors.

MUE 2390. Teaching Music to Diverse Populations (3). This course provides students with an introduction to the learning problems and needs of special education, early intervention, at-risk, and ESL children and those from diverse cultures, with applicable teaching methodology specific to music education curricula and goals.

MUE 2410. Choral Techniques for Non-Voice Principals (2). Prerequisite: Non-vocal music education majors or instructor permission. Corequisite: University Chorale (Summer) or approved substitute. This course examines individual and group vocal techniques for the non-vocal music education major.

MUE 2412. Introduction to Wind and Percussion Instruments (2). This course examines methods of tone production and pedagogy of brass, woodwind, and percussion instruments. Required of music education choral majors.

MUE 2440. Introduction to String Instruments (2). This course examines methods of tone production and pedagogy of string instruments. Required of music education choral majors.

MUE 3091. Orientation to Music Education/Therapy (1). (S/U grade only.) This course provides students with an orientation to the career options in music therapy.
**MUE 3311. Reading and Teaching Music: Elementary (3).** This course seeks to introduce the prospective music teacher to a variety of skills and techniques necessary for successful teaching in elementary school settings.

**MUE 3334. Assessment and Teaching Music: Secondary Schools (3).** Prerequisite: MUE 3311. This course is designed for undergraduate music education majors planning to teach general music classes in secondary schools and provides knowledge and experiences aimed at improving the student’s understanding, skills, and confidence as a teacher and musician.

**MUE 3343. The Instrumental Program Strings and Orchestra (3).** This course is required of music education instrumental majors.

**MUE 3344. Teaching General Music K–12 (3).** Prerequisites: MUE 3311 and MUE 3334. This course examines the rationale, sequence, and learning theory in relation to music for the general student (K–12).

**MUE 3441. Methods of String Instruction (3).** In this course, students have the opportunity to read current writings on string pedagogy, develop performance skills on two stringed instruments, and observe professionals teaching strings in the public schools. This course is required of all undergraduate instrumental music education majors.

**MUE 3443. Introduction to Teaching String Instruments (3).** Prerequisite: Admission to professional sequence or instructor permission. This course provides students with teaching and performance techniques for string instruments.

**MUE 3456. Techniques and Teaching: Oboe, Bassoon (2).** This course examines the application of performance and teaching techniques and practices unique to oboe and bassoon.

**MUE 3457. Techniques and Teaching: Flute, Clarinet, Saxophone (2).** This course examines the application of performance and teaching techniques and practices unique to flute, clarinet, and saxophone.

**MUE 3456. Techniques and Teaching: Brass Instruments (2).** This course examines the application of performance and teaching techniques and practices unique to brasses.

**MUE 3491. Communication Skills for the Musician: Choral (2).** This course introduces development of choral vocal and non-verbal communication skills; conducting skills; and knowledge of choral literature.

**MUE 3493. Communication Skills for the Musician: Instrumental (2).** This course examines communication in the conducting of instrumental music in public schools. It emphasizes verbal and non-verbal rehearsal techniques and the application of pedagogical skills in the classroom.

**MUE 3494. Band and Orchestral Literature and Conducting (2).** Corequisite: MUE 3496.

**MUE 3495–3496. Music Education Laboratory (one hour each.)** These courses are required of all music education majors. Each may be repeated to a maximum of four semester hours. 3495 Choral, 3496 Instrumental.

**MUE 4044. Music Education in the American Society (3).** This course analyzes the interaction of society, culture, and musical behavior with the activities, attitudes, and behaviors in the United States school system.

**MUE 4092r. Arts in Medicine Services (1–3).** This course orients, teaches, and coordinates students who wish to volunteer for Arts in Medicine practice at Tallahassee Memorial HealthCare. The purpose of the course is to allow each student to use his/her particular talents to benefit Tallahassee Memorial HealthCare patients, families, and staff. For each current academic credit, students are required to complete two hours per week of volunteer service throughout the semester. May be repeated to a maximum of three semester hours.

**MUE 4342. The Instrumental Program in the Schools Band (2).** Prerequisites: MUE 3343 and MUE 3494.

**MUE 4391. Music in Special Education (3).** This course examines techniques of teaching music to children in special education programs. Open to music and non-music majors.

**MUE 4392. Classroom Management, Safety, Law, and Ethics (3).** This course examines the following issues: specific techniques in classroom management, discipline, crises prevention and intervention; techniques for providing a safe and positive classroom environment for all students; and knowledge concerning professional ethics, and legal expectations.

**MUE 4397. Survey of Vocal Diction for Choral Music Educators (2).**

**MUE 4411. Choral Techniques (4).** Prerequisite: MUE 3491–3492 or instructor permission. This course provides students with an understanding of choral and choral problems: organization, rehearsal, repertory, dictation, intonation, tone quality, balance, blend, and style. Conducting experience in MUE 3495 is required.

**MUE 4431. Vocal Pedagogy in Music Education (2).** Prerequisite: Junior standing in music education. This course studies voice teaching methods for music education majors.

**MUE 4480. Marching Band Techniques (1).** This course studies current marching band techniques, methods, and styles and their application to secondary public school music education programs.

**MUE 4481. Jazz Ensemble Techniques (1).** This course studies the implementation and administration of the jazz ensemble in the public school music program.

**MUE 4690. Technology for the Music Classroom (3).** Prerequisite: Placement in 2000-level courses or instructor permission. This course combines reading, discussion, and hands-on projects to achieve an understanding of how computers work and how they can be incorporated effectively in the music classroom from K–12.

**MUE 4940. Internship in Music (12).** (S/U grade only.) Prerequisites: Senior standing and instructor permission.

**MUE 4951. Nonverbal Communication in Human Interaction (2).** This course contributes to the students' knowledge and skill in decoding and encoding nonverbal communication and develops survival skills in American Sign Language.

**MUY 4300. Medical Music Therapy (3).** This course provides students with an understanding of the role and scope of music therapy in medical treatment; to learn to design music activities in medical situations to reduce pain, anxiety, and distress; to participate in field experiences observing medical music therapy practices in a hospital setting; and to learn medical documentation for clinical music therapy.

**Conducting**

**MUG 3104. Conducting (1).** Prerequisite: MUT 1112. This course studies the elements of conducting and rehearsal techniques.

**MUG 4102. Advanced Conducting (2).** Prerequisite: MUG 3104. This course continued theory and practice of conducting.

**Music History**

**MUH 2011. Introduction to Music History—Music Appreciation: 18th and 19th Centuries (3).** This course surveys musical expression in relation to the background of the life and art that created it, encompassing the great periods of music history of the 18th and 19th centuries, composers and their musical masterpieces, styles, and forms. For non-music majors. Meets liberal studies requirements.

**MUH 2012. Music in Western Culture, 15th and 20th Centuries (3).** This course surveys the development of Western music from the 15th century to the present. Focuses on the major composers and their musical masterpieces, styles, and forms. For non-music majors. Meets liberal studies requirements.

**MUH 2051. Music in World Cultures (3).** This course surveys the development of music in various cultures of the world in a historical context. Focuses on the major cultural regions of the world and their musical traditions, composers, and performers. For non-music majors. Meets liberal studies requirements.

**MUH 3211. Survey of Music History II: 1750 to Present (3).** Prerequisites: MUH 3212, or instructor permission.

**MUH 3212. Survey of Music History II: 1750 to Present (3).** Prerequisite: MUH 3211. This course surveys music history from 1750 to the present. Required of music majors.

**MUH 3421. History of Music: Medieval (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 3431. History of Music: Renaissance (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 3431. History of Music: Baroque (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 3451. History of Music: Classical (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 3461. History of Music: 19th Century (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 3471. History of Music: 20th Century (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 3505. American Roots Music (3).** This course studies the diverse musics of North American minority groups, with an emphasis on Native American, African-American, Latin American, Asian, Jewish, and certain Euro-American traditions.

**MUH 3211. Survey of Music History I: Antiquity to 1750 (3).** Prerequisites: MUL 2110 and MUH 2512. This course surveys music history from antiquity to 1750. Required of music majors.

**MUH 3212. Survey of Music History II: 1750 to Present (3).** Prerequisite: MUH 3211. This course surveys music history from 1750 to the present. Required of music majors.

**MUH 4321. History of Music: Medieval (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 4331. History of Music: Renaissance (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 4341. History of Music: Baroque (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 4351. History of Music: Classical (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 4361. History of Music: 19th Century (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 4371. History of Music: 20th Century (3).** Prerequisites: MUH 3211 and MUH 3212, or instructor permission.

**MUH 4381. African Soundscapes (3).** This course introduces graduate students and upper-level undergraduates to the diversity of musical cultures from the African continent. Students explore various case studies from the continent and develop tools to interpret the musical value and contextual meaning of African music. Background interest in music, anthropology, performance studies, or African studies is recommended.

**MUH 4541. Music of Latin America I (3).** This course studies the diverse musical cultures of Latin America, including Native American, European, African, and Asian derived, and syncretic or mestizo forms.

**MUH 4542. Music in Latin America II (3).** This course studies the religious and art music of Latin America from the Colonial Period to the present.

**MUH 4543. Music in the Caribbean (3).** This course surveys the musical cultures of the Caribbean Basin from Cuba to Trinidad-Tobago, the coastal regions of northern Venezuela and Colombia, and the eastern coasts of Central America and Mexico.

**MUH 4571. Music of Indonesia (3).** This course offers a survey of selected music cultures of Indonesia. The primary focus is on gamelan music, especially that of Java and Bali. Popular and experimental Indonesian musical forms, as well as Indonesian-inspired music by Western composers, are also investigated.
MUH 4572. Music of Japan (3). This course studies the traditional music of Japan, emphasizing historical background and cultural contexts, instruments and ensembles, structures and styles, theatrical and dance forms, and contemporary music.

MUH 4582. Seminar in World Music Studies (3). This course provides students with an advanced study of contrasting music cultures from around the world, emphasizing both music as sound and music as culture.

MUH 4591. World Music Pedagogy (3). Prerequisites: MUH 2512 and MUH 4582. This course considers theory and practice of teaching undergraduate world music survey courses, including knowledge of and critical approaches to teaching materials in various media.

MUH 4630. Music in the United States (3). Prerequisites: MUH 3211, MUH 3212, and MUT 2117. This course surveys musical activities in the United States.

MUH 4680. Introduction to Historical Musicology (3). This course introduces students to the history, scope, and sources of musical research.

MUH 4681. Senior Seminar in Music History (3). Prerequisite: MUH 4680. This course allows students to give research experience in music history.

MUH 4801. History of Jazz I (1890–1950) (2). This course studies the evolution of jazz, 1890–1950, including the study of ragtime, New Orleans, Chicago, pre-Swing, Swing, Be-Bop, and West Coast styles.

MUH 4802. History of Jazz II (1950 to the Present) (2). This course studies the evolution of jazz, 1950 to the present, including the study of Cool, Hard Bop, Free, Post Bop, and Pop-Jazz styles.

Music Literature

MUL 2010. Music Literature, Listening and Understanding (3). This course is an introduction to music as a manifestation of human culture, as an expressive art form, and as an intellectual discipline. The course also develops a knowledge of a variety of significant musical repertoire, skills for perceptive listening, and the ability to respond to musical expression with critical insight.

MUL 2110. Survey of Music Literature (2). Prerequisites: MUT 1111 and MUT 1112 or equivalent. This course is required of music majors and minors.

MUL 3481. Survey of Keyboard Literature: Baroque and Classic (2). This course allows students to survey composers, styles and works written for keyboard instruments in the period up to 1828. Required of piano and harpsichord performance majors.

MUL 3482. Survey of Keyboard Literature: Romantic, 20th, and 21st Century (2). This course allows students to survey composers, styles and works written for the piano in the period from 1828 to the present. Required of piano performance majors.

MUL 3604. Vocal Solo Literature: German (2). Prerequisite: Junior standing. This course is required of voice performance majors.

MUL 3471. Music Since World War II (3). This course surveys recent musical techniques and aesthetics as revealed in selected works.

MUL 4420. Chamber Music Literature for Strings (3). This course studies chamber music literature for strings alone, strings with keyboard, and strings with other instruments.

MUL 4430. Guitar Literature I (2). This course studies guitar literature from the Renaissance to the Pre-Classic period.

MUL 4431. Guitar Literature II (2). This course studies guitar literature from the Classic period to the present.

MUL 4460. Percussion Literature and Resource Seminar (3).

MUL 4490. Survey of Organ Literature (1). This course surveys the major schools of organ composition, with particular emphasis on the contribution of organ music to the liturgy of the Western church.

MUL 4504r. Orchestral Wind Repertory (2). This course enables woodwind, brass, and percussion students to perform as well as to study works from the standard orchestral literature. May be repeated to a maximum of twenty-four semester hours.

MUL 4563. Chamber Music Literature for Piano and Winds (2). This course is a study of chamber music literature for wind instruments with keyboards.

MUL 4600. Survey of Sacred Vocal Literature (1). This course surveys the sacred vocal literature available for the liturgical year.

MUL 4605–4608. Vocal Solo Literature (two hours each). Prerequisite: Junior standing. This course is required of voice performance majors. 4605 French, 4608 Contemporary Song.

MUL 4642. Survey of Sacred Choral Literature (1). This course surveys sacred choral literature suitable for medium-size choirs in churches and synagogues, embracing Catholic, Protestant, or Jewish faiths.

MUL 4531r. Special Topics in Music Literature (1–3). This course studies music literature. May be repeated to a maximum of twelve semester hours.

Keyboard Technology

MUM 4210. Applied Piano Tuning I (3). Prerequisite: Instructor permission. This course examines string vibration as it relates to applied piano tuning.

MUM 4211. Applied Piano Tuning II (3). Prerequisite: MUM 4210. This course examines tuning systems and temperaments appropriate for historical instruments and for the modern piano.

MUM 4212. Applied Piano Tuning III (3). Prerequisite: MUM 4211. This course examines continued development of tuning skills.

MUM 4213. Applied Piano Tuning IV (3). Prerequisite: MUM 4212. This course develops tuning skills up to the concert level, and prepares students for the Piano Technicians Guild tuning exam.

MUM 4220. Theory of Piano Technology I (2). Prerequisite: Sophomore standing or instructor permission. This course examines the history and fundamental principles of the modern mechanisms of the piano.

MUM 4221. Theory of Piano Technology II (2). Prerequisites: MUM 4220 or instructor permission. This course provides introductory instruction in preparing a piano for concert performance, including tuning, voicing, and regulation.

MUM 4251. Piano Technology I (3). Prerequisite: Instructor permission. This course is an introduction to the history of the piano, fundamental principles of the mechanisms of the modern piano, and construction techniques.

MUM 4252. Piano Technology II (3). Prerequisite: MUM 4251. This course consists of projects that include highlighting beginning restoration techniques and introduction to action regulation.

MUM 4253. Piano Technology III (3). Prerequisite: MUM 4252. This course examines advanced repair and restoration techniques are examined.

MUM 4254. Piano Technology IV (3). Prerequisite: MUM 4253. This course studies topics including major repairs and advanced and cutting edge action geometry.

MUM 4260. Organ Design and Maintenance (2). Prerequisite: Instructor permission. This course is open to all upper-division organ majors and principals.

Ensembles

Note: All ensemble courses are repeatable.

MUN 2110r. Marching Chiefs (0–1). Prerequisite: Audition. This course provides band experience in marching and concert for all University students. May be repeated to a maximum of four semester hours.

MUN 2120r. Concert Band (0–1). This course provides concert experience in a variety of literature for all University students. May be repeated to a maximum of four semester hours.

MUN 2130r. Symphonic Band (0–1). Prerequisite: Audition. This course provides concert experience in a wide variety of literature. May be repeated to a maximum of four semester hours.

MUN 2140r. Wind Orchestra (0–1). Prerequisite: Audition. This course provides professional-level performance in a wide variety of literature. May be repeated to a maximum of four semester hours.

MUN 2210r. University Symphony (0–1). Prerequisite: Audition. This course discusses the study and performance of works representative of a broad spectrum of orchestral literature. Participation by string majors required. May be repeated to a maximum of four semester hours.

MUN 2220r. Chamber Orchestra (0–1). Prerequisite: Audition. This course consists of the study and performance of works suitable for chamber orchestra. Open to selected undergraduate students. May be repeated to a maximum of four semester hours.

MUN 2230r. Opera Orchestra (0–1). Prerequisite: Audition. This course reviews the study and performance of works drawn from grand opera, operettas, and musicals. May be repeated to a maximum of four semester hours.

MUN 2310r. University Singers (0–1). Prerequisite: Audition. This course consists of the study and performance of works representative of a wide spectrum of choral literature. Open to all University students. May be repeated to a maximum of four semester hours.

MUN 2311r. Choral Union (0–1). This course consists of the reading, study, and performance of choral repertoire for mixed voices. Open to all University students. May be repeated to a maximum of four semester hours.

MUN 2320r. Women's Glee Club (0–1). This course consists of the study and performance of representative choral works for women's voices. Open to all women enrolled in the University. May be repeated to a maximum of four semester hours.

MUN 2330r. Men's Glee Club (Collegians) (0–1). This course consists of the study and performance of representative choral works for men's voices. Open to all men enrolled in the University. May be repeated to a maximum of four semester hours.

MUN 2350r. Opera Chorus (0–1). Prerequisite: Audition. This course consists of the study and performance of works drawn from grand opera, operettas, and musicals. Productions are presented in costume and makeup. May be repeated to a maximum of four semester hours.

MUN 2390r. University Chorale (0–1). This course consists of the study and performance of works representative of a wide spectrum of choral literature for mixed voices. Open to all University students except voice performance majors. May be repeated to a maximum of four semester hours.

MUN 2420r. Woodwind Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for woodwinds. May be repeated to a maximum of four semester hours.

MUN 2430r. Brass Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for brasses. May be repeated to a maximum of four semester hours.

MUN 2440r. Percussion Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for percussion. May be repeated to a maximum of four semester hours.

MUN 2451r. Duo Piano (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of duo piano and piano duet literature. May be repeated to a maximum of four semester hours.
MUN 2460r. Chamber Music (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of vocal and/or instrumental ensemble literature. May be repeated to a maximum of four semester hours.

MUN 2471r. Collegium Musicum (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of music of the Middle Ages and Renaissance periods, with emphasis on historical validity, technical proficiency, and expressive musicianship. May be repeated to a maximum of four semester hours.

MUN 2472r. Baroque Ensemble (0–1). Prerequisite: Instructor permission. May be repeated to a maximum of four semester hours.

MUN 2480r. Guitar Ensemble (0–1). Instructor permission. This course consists of the study and performance of ensemble literature for guitar. May be repeated to a maximum of four semester hours.

MUN 2510r. Piano Vocal/Instrumental Accompanying (0–1). May be repeated to a maximum of four semester hours.

MUN 2710r. Jazz Ensemble (0–1). Prerequisite: Audition. This course consists of the study and performance of jazz band literature. May be repeated to a maximum of four semester hours.

MUN 2720r. Jazz-Pop Ensemble (0–1). Prerequisite: Audition. This course consists of the study and performance of jazz and popular vocal music. Ensemble may include choreography, performance with larger ensembles, and off-campus concerts. May be repeated to a maximum of four semester hours.

MUN 2800r. World Music Ensemble (0–1). Prerequisite: Instructor permission. May be repeated to a maximum of four semester hours.

MUN 4113r. Marching Chiefs (0–1). Prerequisite: Audition. This course offers marching band experience open to all University students with prior marching band experience. May be repeated to a maximum of four semester hours.

MUN 4123r. Concert Band (0–1). This course offers concert experience in a variety of literature for all University students. May be repeated to a maximum of four semester hours.

MUN 4143r. Wind Orchestra (0–1). Prerequisite: Audition. This course offers professional-level performance in a wide variety of literature. May be repeated to a maximum of four semester hours.

MUN 4144r. Chamber Winds (0–1). This course offers professional-level performance in a wide variety of wind-oriented chamber music. Open to graduate students and selected upper-level undergraduate students. May be repeated to a maximum of four semester hours.

MUN 4212r. University Symphony (0–1). Prerequisite: Audition. This course consists of the study and performance of works representative of a broad spectrum of orchestral literature. Participation by string majors required. May be repeated to a maximum of four semester hours.

MUN 4223r. Chamber Orchestra (0–1). Prerequisite: Audition. This course consists of the study and performance of works suitable for chamber orchestra. Open to selected undergraduate students. May be repeated to a maximum of four semester hours.

MUN 4233r. Opera Orchestra (0–1). Prerequisite: Audition. This course consists of the study and performance of works drawn from grand opera, operettas, and musicals. May be repeated to a maximum of four semester hours.

MUN 4313r. University Singers (0–1). Prerequisite: Audition. This course consists of the study and performance of works representative of a wide spectrum of choral literature. Open to all University students. May be repeated to a maximum of four semester hours.

MUN 4314r. Choral Union (0–1). This course consists of the reading, study, and performance of choral repertoire for mixed voices. Open to all University students. May be repeated to a maximum of four semester hours.

MUN 4323r. Women's Glee Club (0–1). This course consists of the study and performance of representative choral works for women's voices. Open to all women enrolled in the University. May be repeated to a maximum of four semester hours.

MUN 4333r. Men Glee Club (Collegians) (0–1). This course consists of the study and performance of representative choral works for men's voices. Open to all men enrolled in the University. May be repeated to a maximum of four semester hours.

MUN 4343r. Chamber Chorus (0–1). Prerequisite: Audition. This course consists of the study and performance of accompanied and unaccompanied choral works for mixed voices. Open to all University students except those of voice performance majors. May be repeated to a maximum of four semester hours.

MUN 4393r. University Chorale (0–1). This course consists of the study and performance of a wide spectrum of choral literature for mixed voices. Open to all University students except those of voice performance majors. May be repeated to a maximum of four semester hours.

MUN 4423r. Woodwind Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for woodwinds. May be repeated to a maximum of four semester hours.

MUN 4433r. Brass Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for brasses. May be repeated to a maximum of four semester hours.

MUN 4443r. Percussion Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for percussion. May be repeated to a maximum of four semester hours.

MUN 4445r. Duo Piano (1). Prerequisite: Instructor permission. This course consists of the study and performance of duo piano and piano duet literature. May be repeated to a maximum of four semester hours.

MUN 4463r. Chamber Music (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of vocal and/or instrumental ensemble literature. May be repeated to a maximum of four semester hours.

MUN 4474r. Collegium Musicum (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of music of the Middle Ages and Renaissance periods, with emphasis on historical validity, technical proficiency, and expressive musicianship. May be repeated to a maximum of four semester hours.

MUN 4475r. Baroque Ensemble (0–1). Prerequisite: Instructor permission. May be repeated to a maximum of four semester hours.

MUN 4483r. Guitar Ensemble (0–1). Prerequisite: Instructor permission. This course consists of the study and performance of ensemble literature for guitar. May be repeated to a maximum of four semester hours.

MUN 4513r. Piano Vocal/Instrumental Accompanying (0–1). May be repeated to a maximum of four semester hours.

MUN 4713r. Jazz Ensemble (0–1). Prerequisite: Audition. This course consists of the study and performance of jazz band literature. May be repeated to a maximum of four semester hours.

MUN 4723r. Jazz-Pop Ensemble (0–1). Prerequisite: Audition. This course consists of the study and performance of jazz and popular vocal music. Ensemble may include choreography, performance with larger ensembles, and off-campus concerts. May be repeated to a maximum of four semester hours.

MUN 4803r. World Music Ensemble (0–1). Prerequisite: Instructor permission. May be repeated to a maximum of four semester hours.

MUS 2110, and TPP 2111. This course is a workshop-style course for upper-class Music Theatre majors, where all the various components of their preceding class work can be integrated. The focus is on Advanced Acting for Music Theatre and Audition Techniques.

MUS 3340. Music Instrument Digital Interface (3). This course allows students to develop techniques in electronic music composition and all aspects of MIDI.

MUS 3530. Beginning C Computer Programming Techniques for Musicians (3). This course introduces students to computer- and multimedia-based interactive graphics programming in the C language, including the designing and implementation of music computer programs.

MUS 3531r. Multimedia for Musicians (3). Prerequisite: MUS 3530 or instructor permission. This course provides students with a basic knowledge of multimedia hardware and software systems, particularly as they relate to music. Students develop multimedia projects. May be repeated to a maximum of six semester hours.
MVS 3393. Computers in Music Design Seminar (3). Prerequisite: MUS 3391. This course consists of discussions and experiences in music instruction. May be repeated to a maximum of six semester hours.

MUS 3340. Electronics for Musicians (3). This course introduces students to basic concepts and practical experiences in digital and analog electronics for musicians.

MUS 3341. Digital Music Synthesis I (3). Prerequisite: Instructor permission. This course explores a practical, analytical, and performance-oriented application of the fundamental materials of music theory to song composition. The course culminates in the composition and performance of an original song, in correct musical notation. Not open to students who have successfully completed one or more semesters of music theory.

MUS 3342. Digital Music Synthesis II (3). Prerequisite: MUS 3341. This course introduces students to basic concepts of music theory and analysis and suggests techniques for practical applications, including composition, arranging, and improvisation. This course offers the opportunity to explore the technology and art of digital music production.

MUS 3343. Special Topics in Music (1–3). Prerequisite: Instructor permission. May be repeated to a maximum of nine semester hours.

MUS 4222. French Language and Diction for Singers (3). Prerequisite: FRE 1120. This course is the study of French diction and pronunciation of French language and on grammar and vocabulary necessary for translating texts of French melodies and operas.

MUS 4232. German Language and Diction for Singers (3). Prerequisite: GER 1120. This course is the study of German diction and pronunciation of German language and on grammar and vocabulary necessary for translating texts of German Lieder and operas.

MUS 4242. Italian Language and Diction for Singers (3). Prerequisite: ITA 1120. This course is the study of Italian diction and pronunciation of Italian language and on grammar and vocabulary necessary for translating texts of Italian songs and operas.

MUS 4611. Psychology of Music Survey (3). Prerequisite: A basic course in psychology. This course introduces students to basic terminology related to human anatomy with an added emphasis on transfers to music therapy.

MUS 4612. Psychology of Music Learning (3). Prerequisite: MUS 4611. This course considers applied research methods in psychology of music through examination of selected research studies and behavioral projects.

MUS 4743. Writing for Musicians (2). This course offers experience in the areas of writing that are particularly useful to musicians: analyses, program notes, performance reviews, and research papers.

MUS 4801. Dynamic Integration (0–1). This course enhances students' awareness of their minds and bodies in relation to performing on a musical instrument, addressing such topics as muscle balance, concentration, and performance anxiety.

MUS 4904. Honors Study (1–6). Prerequisite: Instructor permission. May be repeated to a maximum of nine semester hours.

MUS 4905r. Directed Individual Study (1–3). Prerequisite: Instructor permission. May be repeated to a maximum of nine semester hours.

MUS 4928r. Workshop in Music (2–6). This course provides techniques in instruction and administration of music programs.

MUS 4936r. Senior Tutorial in Music (1–3). Prerequisite: Upper division music major status. Selected topics in music. May be repeated to a maximum of six semester hours.

MUS 4970r. Senior Project/Thesis/Recital (2). Prerequisite: Senior standing, instructor permission, and completion by jury of MV 3000 level applied music. May be repeated to a maximum of four semester hours.

MUT 2116. Music Theory III (3). Prerequisite: MUT 1112. This course studies the materials and structures of music.

MUT 2117. Music Theory IV (3). Prerequisite: MUT 2116. This course studies the materials and structures of music.

MUT 2246L. Sight Singing and Ear Training I (1). Prerequisites: MUT 1112, MUT 1241L, and MUT 1242L. This course develops basic skills in sight singing and ear training.

MUT 2247L. Sight Singing and Ear Training II (1). Prerequisites: MUT 2116 and MUT 2246L. This course examines the development of skills in sight singing and ear training.

MUT 2641r. Jazz Improvisation I (1). Prerequisite: MUT 2112. This course provides students with technical skills in jazz improvisation. May be repeated to a maximum of three semester hours.

MUT 3350. Post-Tonal Aural Skills (2). This class focuses upon aural skills for training in the performance and understanding of post-tonal music.

MUT 3355. Jazz Theory/Arranging I (3). Prerequisites: MUT 2117 and MUT 2247. This course is designed to promote skills in arranging for the jazz ensemble.

MUT 3354. Jazz Theory/Arranging II (3). Prerequisite: MUT 3353 or instructor permission. This course provides advanced skills in arranging for the jazz ensemble.

MUT 3421–3422. 18th-Century Counterpoint (two hours each). Prerequisites: MUT 2117, MUT 2247, and MUT 3421 or MUT 3422. This course studies contrapuntal techniques of the 18th century.

MUT 3451. Form and Style: Classic (3). Prerequisites: MUT 2117 and MUT 2247. This course studies the larger forms and procedures as expressed in the musical language of the Classic period.

MUT 3511. 19th-Century Styles (3). Prerequisites: MUT 2117 and MUT 2247. This course studies 19th-century music in a stylistic manner.

MUT 3571. 20th-Century Styles (3). Prerequisites: MUT 2117 and MUT 2247. This course studies 20th-century music in a stylistic manner.

MUS 4401. Music Therapy Drummming (1). This course emphasizes group drumming and improvisation techniques, applications for therapy and group drumming leadership skills for use in wellness, counseling, and other music therapy settings.

MUS 4571. Music Since World War II (3). This course covers recent musical techniques and aesthetics as revealed in selected works.

Music Therapy

MUY 3601. Music Recreation Techniques (3). Prerequisite: Class guitar (MUS 1116) or instructor permission.

MUY 4301. Anatomy for Music Therapy Practice (1). This course is an introduction to basic terminology related to human anatomy with an added emphasis on transfers to multiple aspects of the practice of music therapy.

MUY 4401. Music Therapy: Methods and Practicum I (3). Prerequisites: Senior standing in music therapy, completion of MUS 4612, or instructor permission.

MUY 4402. Music Therapy: Methods and Practicum II (3). Prerequisite: MUY 4401. This course focuses on the applications of music therapy in all fields of health, corrections, and special education.

MUY 4611. Music Therapy Drumming (1). This course offers the opportunity to explore the technology and art of digital music production. This course offers a six-month resident internship in an approved, affiliated clinical center.

Applied Music

MVB(1, J, K, O, P, S, V, W) 101–1019r. Applied Music (two hours each). Private instruction. For students preparing for freshman level of applied music. With the exception of MVO 1010, 2020, 3030, and 4040, each course may be repeated to a maximum of four semester hours. Credit earned in the MVB(1, J, K, O, P, S, V, W) 101–1019r series will not apply to the requirement of the major or principal instrument. (See specific requirements.) Credit may be modified to one hour for all instruments.

MVB 1011r. App Mus Prep, Trumpet
MVB 1021r. App Mus Prep, French Horn
MVB 1033r. App Mus Prep, Trombone
MVB 1041r. App Mus Prep, Baritone Horn
MVB 1051r. App Mus Prep, Tuba
MVJ 1011r. App Mus Prep, Voice, Jazz
MVJ 1016r. App Mus Prep, Saxophone, Jazz
MVK 1011r. App Mus Prep, Piano
MVK 1013r. App Mus Prep, Organ
MVO 1010r. Modified Credit, All Instruments (1–2)
Prerequisites: Audition and instructor permission. This course focuses on elementary keyboard techniques and musicianship. For music majors other than keyboard principals and performance majors. May be repeated to a maximum of two semester hours.

MVB 1311r. App Mus Prin, Percussion
MVB 1313r. App Mus Prin, Violin
MVB 1314r. App Mus Prin, Violoncello

MVJ 1449r. App Mus Prin, Percussion
MV(B, K, O, P, S, V, W) 2420r–2426r. Applied Music Major (four hours each: piano, harpsichord, organ, strings, harp, guitar; three hours each: piano pedagogy, voice, woodwinds, brasses, percussion). Private instruction. Instructor major. (See course description for MV(B, K, O, P, S, V, W) 1410–1416 series.) For performance majors. May be repeated to a maximum of twelve semester hours by piano, harpsichord, organ, string, harp, and guitar majors; nine semester hours by piano pedagogy, voice, woodwind, brass, and percussion majors. Credit may be modified by electing MVO 4240, all instruments.

MVS 2520r. String Repertory (1). This course is required of string performance majors. May be repeated to a maximum of two semester hours.

MVS 2526r. Guitar Repertory (1). Prerequisite: Instructor permission. Corequisite: MVS 2426r. This course is required of guitar performance majors. May be repeated to a maximum of two semester hours.

MVK 2702. Directed Observation in Piano Pedagogy: College (1). This course provides students with the opportunity to observe private and class piano instruction on the college level.

MVK 2701. Piano Accompanying Vocal (1). This course studies techniques, artistic skills, and repertory for accompanying. Required of piano performance majors.

MVK 3131r. Class Piano (1). Prerequisite: MVK 2121 or instructor permission. This course is a continuation of MVK 2121 with emphasis upon increased skills, including open score reading and accompanying. For music majors other than keyboard principals and performance majors. May be repeated to a maximum of two semester hours.

MVS 3136. Advanced Class Guitar (1). Prerequisite: MVS 2126 or instructor permission. This course focuses on advanced folk guitar styles and techniques.

MV(B, H, K, O, P, S, V, W) 3230r–3239r. Applied Music Secondary (two hours each). Private instruction. (See course description for MV[B, H, K, O, P, S, V, W] 1210–1219 series.) For students whose curriculum requires study of a secondary instrument. Each course may be repeated to a maximum of four semester hours. Credit may be modified by electing MVO 3230, all instruments. All MVS courses may be taken for one or two credit hours.

MV(B, K, O, P, S, V, W) 3430r–3436r. Applied Music Major (five hours: harp; four hours each: piano, harpsichord, strings, woodwinds, brasses, percussion, guitar; three hours each: organ, voice, piano pedagogy). Private instruction. Major instrument. (See course description for MV[B, K, O, P, S, V, W] 1410–1416 series.) For performance majors. May be repeated to a maximum of fifteen semester hours by harp majors; twelve semester hours by piano, harpsichord, organ, and harp majors; sixteen semester hours by string, woodwind, brass, percussion, and guitar majors; twelve semester hours by voice and piano pedagogy majors. Credit may be modified by electing MVO 4440, all instruments.

MVS 3501r. Orchestral Repertoire for Violin (1). (S/U grade only.) Prerequisite: Instructor permission. May be repeated to a maximum of two semester hours.

MVS 3530r. String Repertory (1). This course is required of string performance majors. May be repeated to a maximum of two semester hours.

MVV 3532r. Musical Theatre Repertoire (1). Prerequisite: Instructor permission. This course is for music theatre majors. May be repeated to a maximum of four semester hours.

MVV 3533r. Guitar Repertory (1). Prerequisite: Instructor permission. Corequisite: MVS 3436. This course is required of guitar performance majors. May be repeated to a maximum of two semester hours.

MV(B, K, P, S, V, W) 3631. Piano Pedagogy (3). Prerequisite: Junior standing or instructor permission.

MV(B, P, S, V, W) 3632. Piano Pedagogy II (3). Prerequisite: MVK 3631. This course studies intermediate piano pedagogy subjects.

MVK 3930r. Continuo Playing Keyboard (1). Prerequisite: Instructor permission. May be repeated to a maximum of two semester hours.

MVW 3700r. Introduction to Baroque Flute (1). Prerequisite: Instructor permission. This course studies the development of basic performance skills on the Baroque flute and comprehensive stylistic techniques through a graduated study of available 18th-century pedagogic and performance materials. May be repeated to a maximum of four semester hours.

MVW 3701r. Introduction to the Baroque Recorder (1). Prerequisite: Instructor permission. This course studies the development of basic performance skills on the Baroque recorder and comprehensive stylistic techniques through a graduated study of available 18th-century pedagogic and performance materials. May be repeated to a maximum of four semester hours.

MV(B, K, P, S, V, W) 3950. Certificate Recital (0). (S/U grade only.) Prerequisite: Instructor permission.

MV(B, K, P, S, V, W) 3970. Junior Recital (0). (S/U grade only.) Prerequisite: Instructor permission. Required junior recital for performance majors.

MV(B, H, K, O, P, S, V, W) 4240r–4249r. Applied Music Secondary (two hours each). Private instruction. (See course description for MV[B, H, K, O, P, S, V, W] 1210–1219 series.) For students whose curriculum requires study of a secondary instrument. Each course may be repeated to a maximum of four semester hours. Credit may be modified by electing MVO 4240, all instruments. All MVS courses may be taken for one or two (1–2) credit hours.

MV(B, J, K, O, P, S, V, W) 4340r–4349r. Applied Music Principal (two hours each). Private instruction. Principal instrument. (See course description for MV[B, J, K, O, P, S, V, W] 1310–1319 series.) For students whose major is not performance. Each course may be repeated to a maximum of twelve semester hours, except MVJ series which may only be repeated to a maximum of six semester hours. Credit may be modified by electing MVO 4340, all instruments.

MV(B, K, O, P, S, V, W) 4440r–4446r. Applied Music Major (five hours each: piano, harpsichord, harp; four hours each: organ, strings, woodwinds, brasses, percussion, guitar; three hours each: voice, piano pedagogy). Private instruction. Major instrument. (See course description for MV[B, K, O, P, S, V, W] 1410–1416 series.) For performance majors. May be repeated to a maximum of twenty semester hours by piano, harpsichord, organ, and harp majors; sixteen semester hours by string, woodwind, brass, percussion, and guitar majors; twelve semester hours by voice and piano pedagogy majors. Credit may be modified by electing MVO 4440, all instruments.

MVS 4540r. String Repertory (1). This course is required of string performance majors. May be repeated to a maximum of two semester hours.

MV 4542r. Musical Theatre Repertoire (1). Prerequisite: Instructor permission. This course is for music theatre majors. May be repeated to a maximum of four semester hours.

MV 4546r. Guitar Repertory (1). Prerequisite: Instructor permission. Corequisite: MVS 4446. This course is required of guitar performance majors. May be repeated to a maximum of two semester hours.

MV 4600. Organ/Harpischord Pedagogy (2). Prerequisite: Instructor permission. This course equips students with teaching skills in organ/harpischord.

MVO 4640. Wind Instrument and Percussion Pedagogy (3). Prerequisite: Junior standing in major instrument. This course focuses on the methods and materials of wind instrument and percussion pedagogy.

MV 4641. Advanced Piano Pedagogy I (3). Prerequisite: MV 3632 or instructor permission. This course provides current and expanded pedagogy concepts and materials and techniques for teaching advanced or adult students.

MV 4641. Vocal Pedagogy (2). Prerequisite: Junior standing in voice. This course studies voice teaching methods.

MV 4642. Advanced Piano Pedagogy II (3). Prerequisite: MV 4641. This course provides current and expanded pedagogy concepts and materials and techniques for teaching advanced or adult students.

MV 4670r. Practicum in Piano Pedagogy (2). May be repeated up to four semester hours.

MV 4931. Service Playing (2). Prerequisite: Instructor permission. This course is open to all upper-division organ majors and principals.

MV(B, K, P, S, V, W) 4971r. Senior Recital (0). (S/U grade only.) Prerequisite: Completion of MV_ 333_ required and instructor permission. This course is a required senior recital for performance majors.

Graduate Courses

Composition

MUC 5110r. Composition (2).

MUC 5251r. Composition (3).

MUC 5615r. Film Scoring (3).

MUC 5625r. Jazz Composition (3).

NEUROSCIENCE:
see Graduate Bulletin
The College of Nursing offers a Bachelor of Science in Nursing (BSN) for traditional and accelerated second-degree students. The undergraduate program is approved by the Florida Board of Nursing and accredited by the Commission on Collegiate Nursing Education (CCNE). At the completion of the program the student will have met all major requirements for the BSN. The graduate of the undergraduate nursing program will have met the academic eligibility requirements for taking the registered nurse state licensing examination. The mission of the College of Nursing is to develop nursing leaders for professional practice and research in diverse settings.

The program is an upper-division limited access major, accepting students in the junior year, with required sequential course offerings and elective courses in nursing. The nursing courses are based on concepts and principles from liberal studies, the supporting biological and behavioral sciences, and nursing. This theoretical base is used with the nursing process in the systematic development of nursing care for individuals and groups in a variety of health care settings. The College of Nursing honors the major in the effort to encourage talented students to undertake independent research. For requirements and other information, see the “University Honors Office and Honor Societies” section of this General Bulletin. For complete details of programs offered and admission requirements, plus a description of the college, facilities, opportunities, and financial assistance, refer to the “College of Nursing” chapter of this General Bulletin. For current course offerings, please refer to the FSU College of Nursing Web site, at http://nursing.fsu.edu/.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in nursing and accelerated nursing satisfy this requirement by earning a grade of “C” or higher in NUR 4169.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. BSC X085C or BSC X085/X085L or BSC X093C or BSC X093/X093L
2. BSC X086C or BSC X086/X086L or BSC X094C or BSC X094/X094L
3. CHM XXXX or BCH XXXX or BSC XXXX or PCB XXXX or PHY XXXX
4. DEP X004 or DEP X054 or DEP X000 or DEP X414
5. HUN X201 or NUR X192
6. MCB X010C or MCB X010/X010L or MCB X013C or MCB X013/X013L or MCB X000/X000L or MCB X004/X004L
7. PSY XXXX or SOP XXXX or SYG XXXX
8. STA X014 or STA X023 or STA X122 or STA X022

Note: Epidemiology (three credit hours) is recommended but not required.

Definition of Prefixes

NUR—Nursing: Graduate

Undergraduate Courses

Theory/Laboratory Courses Required

NUR 3056. Foundations of Nursing Practice (3). Prerequisite: Admission to the Nursing major. Corequisite: Seminar I Nursing courses. This course introduces the nursing student to the foundations of professional nursing practice which includes multidimensional aspects of clients/families, the relationship between quality of care and client outcomes, patient safety, communication, and use of evidence to support practice.

NUR 3056L. Foundations of Nursing Practice Lab (2). (S/U grade only.) Prerequisite: Admission to the Nursing major. Corequisite: Seminar I Nursing courses. This course provides the application component of NUR 3056. Under the guidance of lab instructors, the student is given opportunities to integrate theoretical knowledge from NUR 3056 in practice sessions. Demonstration; low, medium, and high fidelity simulation scenarios; deliberate practice methods; debriefing; and reflective instructional approaches are used.

NUR 3065. Health Assessment, Wellness and Prevention Across the Lifespan (3). Prerequisite: Admission to the Nursing major. Corequisite: Seminar I Nursing courses. This course introduces the nursing student to concepts and models of wellness and health promotion for individuals, families, and communities. Included are communication and interview techniques in compiling a health history, technical skills in performing a physical exam, and the development of nursing care for individuals and groups in a variety of health care settings.

NUR 3065L. Health Assessment, Wellness and Prevention Across the Lifespan Lab (1). (S/U grade only.) Prerequisite: Admission to the Nursing major. Corequisite: Seminar I Nursing courses. This course provides the application component of NUR 3065. Under the guidance of lab instructors, the student is given opportunities to integrate theoretical knowledge from NUR 3065 in practice sessions using demonstration; low, medium, and high fidelity simulation scenarios; deliberate practice; debriefing; and reflective instructional approaches.

NUR 3125. Pathophysiological Concepts in Nursing (4). Prerequisite: BSC 2085 and BSC 2086. This course introduces the undergraduate nursing student to general body systems and functions and the diseases and disorders that affect each system. In addition, the role of the nurse in patient education is emphasized.

NUR 3145. Pharmacological Concepts in Nursing (2). Prerequisite: Admission to the Nursing major. Corequisite: Seminar I Nursing courses. This course introduces the nursing student to foundational concepts in pharmacology and their application in health care settings. Pharmacological concepts include pharmacodynamics, pharmacokinetics and pharmacogenomics, drug toxicity, and major drug classifications. Application concepts include drug therapy and patient safety, the role of the Federal Drug Administration (FDA), dosage calculation, and the nursing role in drug therapy.

NUR 3225. Nursing Care of the Adult with Acute and Chronic Health Disorders (3). Prerequisite: Seminar I Nursing courses. Corequisite: Seminar II Nursing courses. This course focuses on nursing care of adults and their families with acute and chronic health disorders. Pathophysiologic, psychological, and sociocultural processes and environmental issues associated with acute and chronic health disorders in adults are presented. Critical reasoning and problem solving skills are used in designing care to promote positive health outcomes.

NUR 3225L. Nursing Care of the Adult with Acute and Chronic Health Disorders Lab (4). (S/U grade only.) Prerequisite: Seminar I Nursing courses. Corequisite: Seminar II Nursing courses. This course provides the application component of NUR 3225. Under the guidance of clinical instructors, the student is given opportunities to integrate theoretical knowledge from NUR 3225 in both simulated and clinical sessions. Deliberate practice, debriefing, and reflective instructional approaches are used in both settings.

NUR 3678. Nursing Care of Vulnerable Populations (4). Prerequisites: NUR 3056C, NUR 3065C, NUR 3125, and NUR 3322. Corequisite: NUR 3636L. This course examines the application of nursing and related theories to the care of vulnerable populations throughout the life cycle. Emphasis is placed on nursing care of the elderly, clients with psychosocial disorders, and at-risk culturally diverse populations in the community. The impact of poverty, environment, support networks, health policy, and community resources on vulnerable populations and health outcomes is explored. The focus is on promoting client independence and maximizing quality of life of vulnerable individuals, families, and communities.

NUR 3678L. Nursing Care of Vulnerable Populations Lab (3). (S/U grade only.) Prerequisite: Seminar I Nursing courses. Corequisite: Seminar II Nursing courses. This course provides the application component of NUR 3678. Under the guidance of clinical instructors, the student is given opportunities to integrate theoretical knowledge from NUR 3678 in clinical sessions. Emphasis is placed on nursing care of the elderly, clients with psychosocial disorders, and at risk culturally diverse populations in the community. The impact of poverty, environment, support networks, health policy, and community resources on vulnerable populations and health outcomes is explored. The focus is on promoting client’s independence and maximizing quality of life of vulnerable individuals, families, and communities.
NUR 3805. Nursing: Role and Scope (3). Prerequisite: Admission to RN to BSN Program. This course is designed for the returning registered nurse student. Current and emerging concepts, principles, and theories including ethical reasoning and principles of practice, legal issues in nursing practice, the role of the nurse in the organization, and the influence of political and socioeconomic trends on the profession. This course provides the opportunity to examine conflict resolution, case management, collaboration, budgeting, cost-effectiveness and resource allocation, risk management, and quality and performance indicators. Teaching and professional development are emphasized and applied in relevant settings.

NUR 3888. Nursing Leadership in Systems of Care (3). Prerequisites: Semester I, II, and III Nursing courses. Corequisites: Semester IV Nursing courses. This course focuses on concepts, principles, and theories of leadership, management, role development and administration in a variety of culturally diverse health care delivery systems at local, regional, national, and global levels. Skills required by the professional nurse leader, including decision making, communication, collaboration, group facilitation, and management of diverse populations. Focus is on the application of competencies and skills to actual practice environments among diverse client populations. Themes include leadership, decision making, group facilitation, and collaborative practice.

NUR 3888L. Nursing Leadership in Systems of Care Lab (2). (S/U grade only). Prerequisites: Semester I, II, III Nursing courses. Corequisites: Semester IV Nursing courses. This course provides the practical application of NUR 3888. Under the guidance of clinical instructors, the student is given opportunities to integrate theoretical knowledge from NUR 3888 in clinical settings. Deliberate practice, debriefing, and team building are the active instructional approaches. The course requires the integration of disciplines in order to further develop the student's ability to organize and implement care plans in complex environments. Focus is on the application of competencies and skills to actual practice environments among diverse client populations. Themes include leadership, decision making, group facilitation, and collaborative practice.

NUR 4090C. Advanced Health Assessment (3). Pre- or corequisite: NUR 3805. This course is designed to develop students' knowledge of skills for advanced health assessment including health history and physical examination.

NUR 4080. Nursing Concepts I (4). Prerequisite: NUR 4080C. Corequisite: NUR 4080L. This course is designed for the returning registered nurse student. It emphasizes concepts related to health promotion, chronic illness, family, principles of group dynamics, domestic violence, addiction, grief, and loss, and psychosocial needs. The planning for family health is addressed in these concepts when caring for individuals, families, and communities. Special focus is on the application of competencies and skills to actual practice environments among diverse client populations. Themes include leadership, decision making, group facilitation, and collaborative practice.

NUR 4080L. Nursing Practicum I (1). (S/U grade only.) Prerequisite: NUR 4080C. Corequisite: NUR 4080L. This course is designed for the returning registered nurse student. The student is provided the opportunity to apply professional nursing strategies while assuming client care responsibilities in an acute care setting. Focus is on the planning for family health is addressed in these concepts when caring for individuals, families, and communities. Special focus is on the application of competencies and skills to actual practice environments among diverse client populations. Themes include leadership, decision making, group facilitation, and collaborative practice.
NURSING, FOOD AND EXERCISE SCIENCES

COLLEGE OF HUMAN SCIENCES

Web Page: http://www.chs.fsu.edu/nfes

Interim Chair and Professor: Moffatt; Professors: Arjmandi, Delp, Hsieh, Ilich-Ernst, Sathe; Associate Professors: Figueroa, Kim, Panton, Rankins, Wu; Assistant Professors: Ormsbee, Rao, Salazar; Teaching Faculty III: Farrell, Garber, Kasper, Sehgal; Teaching Faculty II: Spicer; Research Faculty: Ofori; Adjunct Professors: Magnuson, Plett, Schaefer, Stapell, Stowers, Trone; Didactic Program in Dietetics Director: Farrell; Dietetic Internship Director: Spicer; Professors Emeriti: Dorsey, Erdman, Harris, Haymes, Kassouny, Toole; Affiliate Faculty: Boche, Gibson, Krussell, Latimer, Lunt, Popper, Pfeil; Courtesy Faculty: Blasco, Burkhart, Clay, Conti, Dagg, Florian, Ghosh, Lima, Rahnamaa; Advisory Board Members: Daggy, Derman, Hamilton, Hemmig, Katch, Koo, Weaver

The Department of Nutrition, Food and Exercise Sciences offers four Bachelor of Science degrees: Athletic Training, Dietetics, Exercise Science, and Food and Nutrition.

The athletic training degree program is accredited by the Commission on Accreditation of Athletic Training Education (CAATE) and prepares students to take the Board of Certification (BOC) examination. A major in athletic training is offered to students interested in working with injury prevention, recognition, immediate care, rehabilitation, health care management, and professional development in a sports medicine environment. Athletic training students have opportunities to gain clinical experience in a variety of sports settings, both on and off campus. Access to the athletic training program is limited by restricting the number of students admitted annually to match the available resources. The admission requirements and procedures for the athletic training program at Florida State University include common entry indicators. The common indicators included in each student’s portfolio will be ranked as follows:

1. FSU cumulative grade point average of 2.5 or better based on at least fifteen hours of FSU coursework (weighted rank of GPA at 50%)
2. SAT/ACT scores (weighted rank of SAT/ACT at 25%)
3. Interview score (weighted rank of interview score at 25%)

In order to be eligible for the interview, the student must complete an application portfolio that includes: completion of Technical Standards for Admission, lab skill testing scores, clinical observation log sheets, a resume, two letters of recommendation, official copies of all post-secondary transcripts, SAT scores, and current enrollment in or completion of ATR 1800.

Composite applicant scores, based on the above indicators, are calculated and ranked. The number of athletic training applicants admitted is determined by available vacancies created by graduation. The top-ranking students are then admitted to fill the vacancies. The Athletic Training Program includes a strict didactic and clinical course progression. New student admission is completed by May 31 of each year. New athletic training students enroll in the first block of courses the following Fall semester. Community college students are required to complete the same application process as resident students. Those who are formally admitted will be required to complete a minimum of six semesters to complete all clinical rotations. Please see the Athletic Training Education Program Web site for retention policies.

The purpose of the dietetics degree program is to provide the foundation knowledge and skills required for the didactic component of entry-level dietetics education. This Didactic Program in Dietetics (DPD) is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND), 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606-6995; (312) 899-0040 (ext. 3400). Graduates of the DPD program earn a DPD verification statement and are eligible to apply to graduate school and/or post-baccalaureate, accredited dietetic internships. An accredited dietetic internship is required for eligibility to take the national Registration Examination for Dietitians. Careers are available for registered dietitians in clinical, research, community food service management, consulting, and educational settings. The dietetics degree program is a limited access program; students apply spring of their sophomore year. Admission requirements and procedures for the Dietetics degree at Florida State University include: minimum GPA of 2.75, a grade of “S” in DYE 3005, a resumé, and a personal statement. It is highly recommended that students earn a “B” or better in the sciences; Chemistry I, Chemistry II, Organic Chemistry, and corresponding labs. Once formally admitted, the program is two years. Please see the dietetics Web page for more information regarding admission to the degree.

The FSU post-baccalaureate dietetic internship program is the supervised practice component of dietetics education available only to graduates in the department and is required for eligibility to take the national
Registration Examination for Dietitians administered by the Commission for Dietetics Registration. The purpose of the internship is to provide students with supervised practice experiences that train interns for the competencies required by entry level positions in dietetics and nutrition practice. Careers are available for registered dietitians in clinical, research, community food service management, consulting, and educational settings. Fifteen graduate students are accepted annually to the graduate internship program through an internship application process.

The exercise science major prepares students for graduate study in exercise physiology, physical therapy, and other health fields, including medical school, as well as positions as personal trainers and health fitness instructors with both hospital-based wellness programs and corporate fitness programs. The food and nutrition science major has a strong science base that prepares students for job opportunities in the food industry, government agencies, and careers in the medical field as well as graduate study in the field.

Computer Skills Competency
All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in athletic training, exercise science, and food and nutrition science satisfy this requirement by earning a grade of “C-” or higher in CGS 2060 or BSC 2010L. Undergraduate majors in dietetics satisfy this requirement by earning a grade of “C-” or higher in CGS 2060.

State of Florida Common Program Prerequisites
The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

**Athletic Training**

1. BSC X010/X010L or BSC X010C
2. PHX X053/X053L or PHY X053C or PHY X048/X048L or PHY X048C

**Note:** Physics is a prerequisite; however, a program may choose to waive this coursework as a prerequisite but still require it as a graduation requirement.

3. PSY X012
4. STA X023 or STA X122 or STA X201
5. HUN X201 or HUN X941 or HUN X02O or HSC X577
6. BSC X093/X093L and BSC X094/X094L, or PET X322C and PET X323C, or ZOO X733C and PCB X703C, or APK X100C and APK X105C, or BSC X085/X085L and BSC X086/X086L, or BSC X085C and BSCX086C

**Dietetics**

1. BSC X085/X085L and BSC X086/X086L, or BSC X085C and BSC X086C, or BSC X093C and BSC X094C, or BSC X549 or PCB X702 or PET X322/X322L
2. CGS X060 or CGS X061
3. CHM X200C or CHM X200/X200L, or CHM X210/X210L and CHM X211/X211L
4. CHM X045/X045L and CHM X046/X046L, or CHM X032
5. ECO X013 or ECO X023 or ECO X000
6. HUN X201
7. MAC X105 or MAC X142
8. MCB X004/X004L or MCB X020C or MCB X013C or MCB X020/ X020L
9. PSY X012 or PSY X020 or PSY X113

**Exercise Science**

1. BSC X085/X085L or PET X322/X322L, or APK X100C and APK X100L, or BSC X093/X093L
2. BSC X086/X086L or PET X232/X232L or APK X105/X105L or BSC X094/X094L
3. PSY X012
4. BSC X010/X010L
5. BSC X011/X011L
6. CHM X045/X045L
7. CHM X046/X046L
8. HUN X201
9. MAC X147 or MAC X311, or MAC X140 and MAC X114

**Core Program for All Majors**

1. **Liberal Studies.** Required courses that may be taken in fulfillment of liberal studies include: English, basic nutrition, general chemistry, organic chemistry, general psychology, family relationships, mathematics, and statistics.
2. **Graduation Requirements.** See the “Undergraduate Degree Requirements” chapter of this General Bulletin. For multicultural, HUN 2125 is recommended if the requirement is not satisfied with liberal studies. For computer skills, all majors require a similar course or certification (select BSC 2010L, if taken at FSU).
3. **College of Human Sciences Core.** The college core is to be met by taking FAD 2230 and a three credit hour course offered by the College of Human Sciences but outside of the students selected major.
4. **Core Courses.** CGS 2060 (or equivalent such as BSC 2010L if taken at FSU); HUN 1201; MAC 1105 or better; BSC 2085/2086 or PET 3322 and PET3322L (see specific major requirements); and STA 2122 or STA 2023.

**Bachelor of Science**

The Department of Nutrition, Food and Exercise Sciences offers four Bachelor of Science degrees: athletic training, dietetics, exercise science, and food and nutrition. To complete requirements for these degrees the following are required: (1) liberal studies requirements; (2) general graduation requirements for the University; (3) the preceding college core requirements; and (4) specific requirements for the chosen major. Additional courses may be required to complete the one hundred twenty semester hours required for the degrees. A minimum grade of “C-” is required unless otherwise indicated.

The following are the specific requirements for each major. Students must meet the curriculum requirements in effect at the time they enter the major.

**Athletic Training,** APK 3113, ATR 4502, and ATR 4852; BSC 2010C and BSC 2010L; CHM 1045 and CHM 1045L; ATR 2020; HUN 1201, FAD 2230, MAC 1105, MAC 1114, and MAC 1140; ATR 1800 and ATR 2820; PHY 2053C/2053L; PSY 2012; STA 2122. Upper division: HSC 4711; ATR 3132, PET 3322/3322L, PET 3323C, PET 3361, APK 3110C, ATR 3102*, ATR 4302C*, ATR 1810*, ATR 4503*, ATR 4932*, ATR 3012C*, ATR 3942* (x 4), ATR 3832*, ATR 3231C*, ATR 3312C*, ATR 4842*, ATR 3512*, and ATR 4862*. Athletic training students must complete all didactic and clinical experiences. All courses marked with an (*) must be completed with a “B-” or better.

All junior college/transfer students must complete the same didactic and clinical experiences as resident students. Completion of clinical courses requires a minimum of six semesters. All athletic training courses required for the major must be taken at Florida State University.

**Dietetics.** See liberal studies requirements, college and department core, and common prerequisites. CHM 1045/1045L**, CHM 1046/1046L**; and CHM 2200/2200L**, BCH 3023C; DIE 3005, DIE 4224*, DIE 4224*4244L*, and DIE 4310**: ECO 2XXX; FAD 2230 and FAD 4601; FOS 3026/3026L, FOS 4114C, and FOS 4129; FSS 4135 and FSS 4135*. HUN 1201*, HUN 2125, HUN 3224, and HUN 3403*; MCB 2010C, MCB 2010L, MCB 2053C, and MCB 2054C; PSY 2012*, STA 2122*. Upper division: APK 3110C, BCH 3023C or BCH 4053/4053L and BCH 4045, or BCH 4624; FAD 2230; HUN 3224,
HUN 3226, PET 3102, PET 3322/3322L, PET 3323C, and PET 4551; and three courses for a minimum of nine credit hours from the following list: APK 3113, HSC 4711; ATR 3132, PET 3361, PET 3922 (Special Topics: Exercise and Disease), or HUN 2125; and electives to meet graduation requirements. Exercise science majors who plan on pursuing advanced degrees in physical therapy or medicine may need to take specified electives to meet admission requirements for these programs. HUN 1201 must be completed with a “B-” or better, PET 3322 and lab must be completed with a “C+.” Courses marked with an (*) must be completed with a grade of “C-” or better; a single repeat for only one of these courses is allowed.

Food and Nutrition Science. Lower division: see liberal studies, college core, and major courses plus: MCB 1005; HUN 1201 and HUN 1201L; CHM 1045/1045L; CHM 1046/1046L; CHM 2210, and CHH 2211/2211L; ECO 2013 or equivalent; FAD 2230; HUN 2125 and HUN 1201; MAC 1105, MAC 1114, MAC 1140, and MAC 2311; MCB 2004/2004L; PHY 2053C; PSY 2012, STA 2122 or STA 2023. Upper division: BCH 3023C; CHM 3120C; FOS 3026, FOS 3026L, FOS 4114C, and FOS 4209; HUN 3224, and HUN 3226; PET 3322 and PET 3322L or PCB 3063 or PCB 3134; and electives to meet graduation requirements. At least ten additional semester hours must be at the 3000-4000 level for a total of forty hours at the 3000-4000 level. HUN 1201 must be completed with a “B-” or better, PET 3322/3322L must be completed with a “C-” or better.

Honors in the Major

The Department of Nutrition, Food and Exercise Sciences offers a program in honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. Students complete a senior thesis, which usually involves six semester hours, and present an honors seminar. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Master’s and Doctoral Degrees

The Department of Nutrition, Food and Exercise Sciences offers work leading to the Master of Science in nutrition and food science, the Master of Science in exercise science, the Doctor of Philosophy in human sciences, and the Doctor of Philosophy in exercise science. Consult the Graduate Bulletin for details.

Definition of Prefixes

APK—Applied Kinesiology
ATR—Athletic Training
DIE—Dietetics
FOS—Food Science
FSS—Food Service System
HSC—Health Sciences
HUN—Human Nutrition
PET—Physical Education Theory

Undergraduate Courses

APK 2001. Medical and Scientific Terminology (3). Prerequisite: PET 3322 or BSC 2085. This course is the study of medical and scientific terminology, the language of medicine that focuses on prefixes, suffixes, word roots and their combining forms by review of each body system and specialty area. Emphasis is on word construction, usage, comprehension, pronunciation, and spelling. In addition, students gain information regarding anatomy and physiology, pathology, diagnostic/surgical procedures, pharmacology, scientific equipment and instruments, and abbreviations.

APK 3113. Methodology of Strength and Conditioning (3). Corequisite: ATR 1810. This course covers topics involving the development of speed, strength, power, and endurance, and explores specific methods of strength and conditioning.

APK 3146. Eating Disorders and Body Image (3). Prerequisite: HUN 1201. This course is designed to present current science based information on the prevention, contributing factors, characteristics and treatment of eating disorders, dieting and body image. Diverse populations with eating disorders, cultural and societal emphasis on thinness, and the role of the media are addressed.

ART 1800. Introduction to Athletic Training (1). (S/U grade only.) Prerequisite: 2.5 GPA. This course offers an introduction to the educational and professional requirements necessary to become a licensed Athletic Trainer. Emphasis is on the operations of athletics training facilities and the job responsibilities of all members of a sports-medicine team. This course provides the framework for the formal application process for the Athletic Training Education Program.

ART 1810. Athletic Training Clinical I (1). (S/U grade only.) Prerequisite: ART 1800. This course offers a study of the cognitive, affective, and motor skills required to perform athletic-training techniques in practice settings. The techniques employed in this course reflect those presented in the lecture and laboratory course taken the previous semester.

APK 4914r. Tutorial in Exercise Physiology (1). (S/U grade only.) This course integrates aspects of nutrition, diet, fitness, and health/wellness for personal well being. This course cannot be used as a department elective.

DIE 2423. Medical Nutrition Therapy I (3). Prerequisites: HUN 1201, HUN 3403, PET 3322, PET 3322L. This course presents current science based information on the prevention, contributing factors, characteristics and treatment of eating disorders, dieting and body image. Diverse populations with eating disorders, cultural and societal emphasis on thinness, and the role of the American Dietetic Association in dietetics education and practice.

DIE 3005. Introduction to Dietetics (1). (S/U grade only.) This course is an introduction to the professional opportunities for registered dietitians, the importance of public policy, and the role of the American Dietetic Association in dietetics education and practice.

DIE 349. Nutrition, Food and the Consumer (3). Prerequisites: CHM 1045 and HUN 1201 with a grade of “B-” or better. This course explores food composition, nutritional quality, and safety. Influence of food processing on food quality and safety. Consumer aspects of food including food selection, food management, and safety.

HUN 1201. The Science of Nutrition (3). This course focuses on the elements of nutrition and factors influencing the ability of individuals to maintain good nutrition status.

HUN 2125. Food and Society (3). This course examines the impact of society on human food ways; role of food and nutrition in national development and global politics. For non-majors.

HUN 3403. Life Cycle Nutrition (3). Prerequisite: HUN 1201. This course examines nutrient sources during pregnancy, lactation, and growth from infancy to the elderly. Effects of nutrition on mother and child. Interrelationships of diet, nutrition, emotional development, behavior, stress, and aging.

PET 1081. Living Learning Center Colloquium (1). This course explores different aspects of the introduction to dietetics, the professional opportunities for registered dietitians, the importance of public policy, and the role of the American Dietetic Association in dietetics education and practice.

PET 2084. Personal Fitness and Wellness (3). This course integrates aspects of nutrition, diet, fitness, and health/wellness for personal well being. This course cannot be used as a department elective.

PET 3102. Introduction to Exercise Sciences (1). (S/U grade only.) This course introduces students to fields of study and careers in areas of exercise physiology, motor behavior, athletic training, health and fitness, and physical therapy. Students will examine preparation for careers, including the role of various accreditation organizations. Current professional issues will be discussed. This course is open to non-majors.

PET 3322. Functional Anatomy and Physiology I (3). Prerequisite: HUN 1201 and CHM 1045. Corequisite: PET 3322L. The first part of a two-semester sequence, this course covers the functional anatomy and physiology of the skeletal, muscular, cardiovascular, respiratory, digestive, urinary, and endocrine systems, as well as part of the nervous system.

PET 3322L. Functional Anatomy and Physiology Laboratory I (1). Prerequisites: HUN 1201 and CHM 1045. Corequisite: PET 3322. The first part of a two-semester sequence, this lab covers the functional anatomy and physiology of the skeletal, muscular, cardiovascular, respiratory, digestive, urinary, and endocrine systems, as well as part of the nervous system.

PET 3323C. Functional Anatomy and Physiology II (4). Prerequisite: PET 3322. This course is a continuation of a two-semester sequence of functional anatomy and physiology that includes the integumentary, nervous, lymphatic, immune, and reproductive systems.

Advanced Undergraduate Courses

APK 3110C. Applied Exercise Physiology (4). Prerequisite: PET 3322. This course studies the nature of muscular, metabolic, cardiovascular, and respiratory adjustment to acute and chronic exercise.

APK 4914r. Tutorial in Exercise Physiology (1). (S/U grade only.) This course consists of small group discussions or project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. Repeatable to a maximum of four semester hours when the topic changes.

ART 2012C. Orthopedic Assessment—Upper Extremity (3). Prerequisite: ART 2820. In this course, the basic sciences of the upper extremity will be integrated. This course covers basic anatomy and specific tests for the upper extremity. Students will develop skills in the assessment of upper extremity injuries.

ART 3102. Athletic Training I (3). Prerequisite: ART 1800. This course offers an introduction to the field of athletic training as established by the National Athletic Trainers’ Association. Treatment and rehabilitation of athletic injuries will be introduced.

ART 3112. First Responder (3). Prerequisite: Instructor permission. This course allows students to develop basic emergency medical skills and knowledge that enables them to assist people who sustain an accidental injury or who suffer a sudden illness. This course covers all the information from the United States Department of Transportation (DOT) First Responder National Standard Curriculum.
FOS 4114C. Food Science (4). Prerequisites: CHM 2200C, FOS 3026, and FOS 3026L. This course discusses the chemistry of foods and their behavior during processing.

FOS 4209. Food Safety and Quality (3). Prerequisites: HUN 1201 and FOS 3026 or departmental permission. In this course, topics include food spoilage and food poisoning, food-borne pathogens, food laws and regulations, HACCP, and safe food handler practices, with an emphasis on current issues related to the quality and safety of food.

Institutional courses in human development (2). Prerequisites: DIE 3005, ECO 2000 or ECO 2103, FOS 3026, and FOS 3026L. This course discusses cost analysis, cost containment, organizational structure, food laws, and food and beverage procurement in health care settings.

FSS 4312. Food Service Management (3). Prerequisites: DIE 3005, FOS 3026, FOS 3026L, and HUN 1201. This course focuses on managerial concepts and administration principles involved in institutional food production.

FSS 4315L. Institutional Organization and Administration Laboratory (3). Prerequisites: FSS 4315, FOS 3026, FOS 3026L, and instructor permission. This course gives practical laboratory experience in the application of management concepts to health care and institutional food administration.

HSC 4711. Wellness/Health Risk Reduction (3). In this course the emphasis is on positive lifestyle practices to reduce one’s risk for disease and for the maintenance of health and vitality. Topics include health behavior, stress, psychological health, chronic diseases, sexually transmitted infections, immunity, and psychoactive substance use and abuse.

HSC 4999r. Tutorial in Health Promotion (1). (S/U grade only.) This tutorial consists of small group discussions and project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. May be repeated when topics change to a maximum of four semester hours.

HUN 3224. Intermediary Metabolism of Nutrients I (3). Prerequisites: CHM 2200C and HUN 1201 with a grade of “B–” or better. This course is part of a two-semester sequence emphasizing the biochemical and physiological roles of the major nutrients in intermediary metabolism: their integration and regulation; bases for determining requirements for energy-yielding nutrients and energy and dietary standards; cell growth and body composition.

HUN 3226. Intermediary Metabolism of Nutrients II (3). Prerequisites: HUN 1201 with a grade of “B–” or better. This course is part of a two-semester sequence that emphasizes the biochemical role of vitamins, minerals, and water in metabolic pathways; their integration and regulation; bases for determining requirements for vitamins, minerals, and water and dietary standards for the population related to health and nutrition in the United States.

HUN 3334r. Special Topics in Food and Nutrition (3–6). Prerequisite: HUN 1201 with a grade of “B–” or better. This course focuses on topics in community nutrition, food science and technology, developmental and metabolic aspects of nutrition. May be repeated to a maximum of six semester hours as content changes. Consult instructor.

HUN 4905r. Directed Individual Study (1–3). May be repeated to a maximum of six semester hours.

HUN 4913r. Honors Thesis (3–6). May be repeated to a maximum of six semester hours.

HUN 4914r. Tutorial in Nutrition (1). (S/U grade only.) This tutorial consists of small group discussions or project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. May be repeated when topics change to a maximum of four semester hours.

HUN 4931. Honors Seminar (1). This course introduces advanced issues relevant to athletic training and sports medicine. Current topics include athletic training administration, athletic training pharmacology, advanced assessment techniques, orthopedic surgical observation, and general medical conditions.

HUN 4932. Issues in Sports Medicine (3). Prerequisite: ATR 1800. This course addresses issues relevant to athletic training and sports medicine. Current topics include athletic training administration, athletic training pharmacology, advanced assessment techniques, orthopedic surgical observation, and general medical conditions.

HUNT 4941r. Nutrition Practicum (1–4). (S/U grade only.) Prerequisites: HEE 4054 and a grade of “B–” or better and PET 3322. This practicum consists of supervised field experience with a selected group discussion or project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. May be repeated when topics change to a maximum of four semester hours.

HUN 4941r. Tutorial in Nutrition (1). (S/U grade only.) This tutorial consists of small group discussions or project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. May be repeated when topics change to a maximum of four semester hours.

HUN 4941r. Tutorial in Nutrition (1). (S/U grade only.) This tutorial consists of small group discussions or project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. May be repeated when topics change to a maximum of four semester hours.

HUN 4941r. Tutorial in Nutrition (1). (S/U grade only.) This tutorial consists of small group discussions or project work. Topics selected in contemporary issues or current research. Maximum enrollment of ten students per tutorial. May be repeated when topics change to a maximum of four semester hours.

PET 3361. Nutrition and Sports (3). Prerequisites: HUN 1201 with a grade of “B–” or better and PET 3322. This course studies the effects of sports training upon individual nutrient stores and requirements and the effects of nutrient intake upon sports performance.

PET 3392r. Special Topics in Wellness and Exercise Science (3–6). This course discusses topics in wellness, health promotion, exercise physiology, biomechanics, and motor behavior. Consult instructor. May be repeated as content changes to a maximum of six semester hours. May be repeated within the same semester.

PET 4076. Physical Dimensions of Aging (4). This course deals with the quality of life of older adults. Topics include the physical and cognitive changes associated with aging; physical decline of physiological systems (cardiovascular, muscular, joints, bone, neuromuscular); health, exercise, and well-being; and the pathology of aging. Assists students in developing an understanding of the physical aspects of aging to apply to settings such as physical therapy, sports medicine, and health and fitness programs in hospitals and retirement communities.

PET 4551. Exercise Testing and Prescription (3). Prerequisite: APK 3110C. This course examines techniques of evaluation for physical fitness and health with a particular emphasis on aerobic capacity, flexibility, strength, and body composition and to design, implement, and administer programs for developing physical fitness and lifestyle changes.

PET 4848r. Practicum in Exercise Sciences (1–6). Prerequisites: A.2.75 GPA, ATR 2020 or equivalent, APK 3110C, and instructor permission. This course consists of supervised field experience in exercise physiology or motor control. May include research, athletic training, or community fitness projects. May be repeated to a maximum of six semester hours with permission of the instructor.

Graduate Courses

APK 5111C. Advanced Exercise Physiology (3).
**Department of PHILOSOPHY**

**COLLEGE OF ARTS AND SCIENCES**

Web Page: [http://philosophy.fsu.edu](http://philosophy.fsu.edu)

Chair: J. Piers Rawling; Professors: Bishop, Clarke, Fleming, LeBar, McNaughton, Mele, Rawling, Russe; Associate Professors: Justus, Morales, Roberts; Assistant Professor: Kearns, May, Schwenkler, Stein; Teaching Faculty II: Mahaffey

The undergraduate program in philosophy is designed to enable students to gain an understanding of the substantive issues philosophers have struggled with through the ages. Students majoring in philosophy can expect to develop their abilities to engage in critical examination and evaluation. Such skills have proven to be of great value in almost any type of human endeavor. The program serves as a basis for professional training in other fields, such as law, education, politics, journalism, or theology, or as foundation for future professional training in philosophy. The department offers degree programs at all levels, including an accelerated combined bachelor's/master's degree program.

The department participates in the honors program, as well as the undergraduate programs in the following departments or programs: women's studies, humanities, Latin American and Caribbean studies; political science, international affairs and religion. In addition, it offers more than ten courses in the University's Liberal Studies for the 21st Century Program.

Students have considerable latitude to design the content of a major that meets their needs and interests. For example, a student might focus primarily on ethics; on social and political philosophy; on logic and philosophy of science; on the history of philosophy or some distinct period such as ancient, modern, or contemporary; on epistemology; or on cognitive studies. Many students will find it possible to combine a major in philosophy with a major in another discipline. The department welcomes such arrangements.

The department's distinguished faculty is actively engaged in teaching, research, writing, publishing, and editing. Students majoring in philosophy can be assured that not only will they receive an excellent education in the history of philosophy but they will also have the opportunity to acquaint themselves with the latest developments in the discipline. The journal *Social Theory and Practice* is edited and published by the department.

The department offers regular colloquia in which local faculty, graduate students, and guests from other universities present papers and lead discussions on philosophical topics. In addition, the department regularly sponsors conferences; topics have included biomedical ethics, moral education, philosophy of language, color, Wittgenstein, Plato, Aristotle, Kant, ethical theory, history and philosophy of science in science teaching, human rights, virtue and social diversity, Kantian themes in ethics, and philosophy of biology. Werkmeister conferences on a variety of topics are held annually.

In addition to more formal academic settings, the undergraduate philosophy club offers opportunities for majors and prospective majors to meet and discuss readings or movies of philosophical interest.

**Computer Skills Competency**

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in philosophy satisfy this requirement by earning a grade of "C-" or higher in CGS 2060 or CGS 2100.

**State of Florida Common Program Prerequisites**

No statewide common program prerequisites have been identified for this program; however, the faculty in this program recommends that students take several lower level courses with the PHH, PH1, PHM or PHP prefix.

**Requirements for a Major in Philosophy**

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

**Note:** The required courses listed below may not be offered every semester. Students should check with the department at least two semesters before graduation to make sure they will have the opportunity to complete the requirements.

Thirty semester hours in philosophy are required for the major, including the following:

1. **Logic (three semester hours). One of:**
   - PHI 2100 Reasoning and Critical Thinking (3)
   - PHI 3130 Introduction to Symbolic Logic (3)
2. History of Philosophy (six semester hours)
   Ancient Philosophy—one of:
   PHI 3130 Plato and His Predecessors (3)
   PHI 3140 Aristotle to Augustine (3)
   Modern Philosophy:
   PHI 4600r Contemporary Philosophy (3)
   PHI 3220 Introduction to Philosophy of Language (3)
   PHI 3300 Knowledge and Belief (3)
   PHI 3320 Philosophy of Mind (3)
   PHI 4500 Metaphysics (3)

4. Contemporary Metaphysics and Epistemology (three semester hours) One of:
   PHI 3130 Plato and His Predecessors (3)
   PHI 3220 Introduction to Philosophy of Language (3)
   PHI 3300 Knowledge and Belief (3)
   PHI 3320 Philosophy of Mind (3)
   PHI 4500 Metaphysics (3)

5. Seminar for Majors, to be taken in the senior year (three semester hours)
   PHI 4938r Seminar for Majors (3)

Required courses for a Minor in Philosophy:

- Logic (three semester hours), One of:
  PHI 2100 Reasoning and Critical Thinking (3)
  PHI 3130 Introduction to Symbolic Logic (3)

- History (three semester hours), One of:
  PHI 3061 Medieval and Renaissance Philosophy (3)
  PHI 3130 Plato and His Predecessors (3)
  PHI 3140 Aristotle to Augustine (3)
  PHI 3400 Modern Philosophy (3)
  PHI 3500 Nineteenth-Century Philosophy (3)

At least six semester hours must be at the 3000 level or above. Students must receive a letter grade of “C–” or better in all courses that count toward the minor.

Minor in Political Philosophy

Twelve semester hours in philosophy are required for the minor, including:

1. Logic (three semester hours), One of:
   PHI 2100 Reasoning and Critical Thinking (3)
   PHI 3130 Introduction to Symbolic Logic (3)

2. Nine semester hours from:
   PHI 3162 Logic and the Law (3)
   PHM 2121 Philosophy of Race, Class and Gender (3)
   PHM 2300 Introduction to Political Philosophy (3)
   PHM 3123 Philosophy of Feminism (3)
   PHM 3331r Modern Political Thought (3)
   PHM 3351 Philosophy of Human Rights (3)
   PHM 3400 Philosophy of Law (3)
   PHM 4340r Contemporary Political Thought (3)
   PHP 3510 Introduction to Marxist Philosophy (3)

At least six semester hours must be at the 3000 level or above. Students must receive a letter grade of “C–” or better in all courses that count toward the minor.

Minor in Law and Philosophy

Twelve semester hours in philosophy are required for the minor, including:

A required course:
   PHM 3400 Philosophy of Law (3)

1. Logic (three semester hours), One of:
   PHI 2100 Reasoning and Critical Thinking (3)
   PHI 3130 Introduction to Symbolic Logic (3)
   PHI 3162 Logic and the Law (3)

2. Six semester hours from:
   PHI 2620 Environmental Ethics (3)

At least six semester hours must be at the 3000 level or above. Students must receive a letter grade of “C–” or better in all courses that count toward the minor.

Honors in the Major

Honors work in the major is offered to encourage talented juniors and seniors to undertake independent and original research. Successful completion of honors work results in honors credits and graduation with distinction. For requirements and other information, see the “University Honors Office and Honors Societies” chapter of this General Bulletin.

Definition of Prefixes

IFS—Interdisciplinary Florida State University Courses

PHH—Philosophy, History of

PHI—Philosophy

PHM—Philosophy of Man and Society

PHP—Philosophers and Schools

Undergraduate Courses

IFS 2031. Who is Human? Culture, Gender and Human Rights (3). This course examines the assumptions underlying arguments about culture, gender and human rights. In particular, students explore, compare, and evaluate fundamental issues in philosophy of human rights.

IFS 2047. Philosophy and Film (3). This course uses movies as a vehicle for discussing philosophical issues, such as, the nature of existence, the problem of knowledge, the existence of God, and the rules for proper conduct.

IFS 2048. World Without God? (3). This course examines three main questions: (1) Can we explain the existence of our earth, and the universe as a whole, without recourse to God? (2) Can there be an objective moral code that we all have good reason to follow even if there is no God? (3) Can we have a spiritual or religious attitude to the world in the absence of belief in God?

IFS 2065. Human Nature: Modern and Contemporary Perspectives (3). This course explores and evaluates accounts of human nature that historically influential philosophers have given to the question of human nature and the ways in which their answers are reflected in contemporary debates about what we are.

IFS 2079. Fantasy Girls: Philosophical Examinations of Women and Girls in Fantasy and Science Fiction (3). This course provides a critical philosophical examination of representations of girls and women in fantasy and science fiction. Throughout the semester, students make use of traditional philosophical texts as well as non-traditional materials, such as film, literature, television, and comics to examine questions of women’s nature, girlhood, beauty, violence, oppression, and sexual agency.

IFS 3130. Making the Argument: Symbolic Logic and the Forms of Good Reasoning (3). This course is an examination of the fundamentals of modern symbolic logic (propositional and predicate calculus), with special attention to: (a) symbolizing arguments and evaluating them using both the rules of a system of natural deduction, and semantic method; and (b) explaining the canons of good reasoning, critiquing weak arguments, and developing stronger ones.

PHI 2010. Introduction to Philosophy (3). This course introduces some of the central problems in philosophy. Students also learn how to construct and criticize arguments and develop their own philosophical positions.

PHI 2016. Philosophy Through Film (3). This course is an introduction to a broad range of philosophical topics using film as a vehicle for discussion. Philosophical topics may include issues in Ethics, Philosophy of Mind, Metaphysics, Epistemology, Philosophy of Religion, and/or Political Philosophy. A variety of films are used to raise important philosophical questions and to help in understanding primary philosophical texts that seek to answer these questions.

PHI 2100. Reasoning and Critical Thinking (3). This course is designed to provide students with an understanding of the logical foundation of arguments and decisions. The course emphasizes acquisition of the skills necessary to construct clear, persuasive arguments. Students practice reasoning to support conclusions and decisions. Students also evaluate reasons, data, arguments and conclusions presented in a variety of everyday circumstances.

PHI 2620. Environmental Ethics (3). This course focuses on philosophical issues raised by environmental problems and the sciences designed to resolve them. The course also analyzes the historical development of environmental perspectives and the ethical theories that have been generated by these approaches.

PHI 2630. Ethical Issues and Life Choices (3). This course draws on ethical theories to explore the major ethical issues that one faces as one makes decisions about the kinds of activities to engage in and the kind of life to lead. Issues such as those involving life and death (e.g., abortion, euthanasia, animal rights) and social justice (e.g. discrimination, responsibility to future generations) are examined.
PHI 2635. Bioethics (3). This course is an examination of the philosophical foundations of bioethical theory and an exploration of the tennant issues in contemporary bioethics, with a concentration on discussions of race, gender, and vulnerable populations (e.g. the poor, immigrants). The course employs both ethical theory, philosophical analysis, and analytic writing to examine a number of moral issues arising in health care including: abortion, research, experimentation, and research on human subjects, reproductive technology, aging, organ donation, and euthanasia. Throughout the course we examine assumptions about rights, persons, and ethical principles at work in medical decisions.

PHI 3130. Introduction to Symbolic Logic (3). This course examines the fundamentals of modern symbolic logic (propositional and predicate calculus), with special attention to the evaluation of symbolized arguments using the techniques of natural deduction. Topics include validity, soundness, proof, symbolization, truth-tables, truth-trees, and truth-functional and quantificational inference.

PHI 3220. Introduction to Philosophy of Language (3). This course explores major philosophical contributions to the understanding of language and its functions in communication. Different theories of meaning, truth, reference, understanding, and interpretation. Readings include classics of 20th century philosophy.

PHI 3300. Knowledge and Belief (3). This course critically analyzes contemporary theories about the fundamentals of human knowledge: what ought to count as knowledge; how we get it; the roles of certainty, doubt, and skepticism; and the means by which we might maximize it.

PHI 3320. Philosophy of Mind (3). This course analyzes the central issues in the philosophy of mind. Topics include: the mind-body problem, the unity of the mind, the nature of consciousness, artificial intelligence, and free will.

PHI 3330. Free Will (3). This course covers a number of different philosophical positions on free will and moral responsibility, and some of the arguments for and against these positions.

PHI 3400. History and Philosophy of Science (3). This course provides a close look at some of the crucial philosophical problems of the sciences as they have developed throughout history, from Aristotle through Galileo, Pasteur, and Einstein, including what methods count as scientific, along with a consideration of how science has changed the world around us and the role of value.

PHI 3641. Business Ethics (3). This course consists of an identification and a discussion of defensible solutions for moral and ethical problems as they arise in the conduct of business and economic transactions. International business settings and the ethical problems arising from the need to design products and services that appeal to diverse national and world populations are considered.

PHI 3670. Ethical Theory (3). This course studies the nature of morality and moral reasoning through critical analyses of the writings of classical and contemporary ethical theorists directed to answering the questions, “What is good?” and “What ought to be?”

PHI 3700. Philosophy of Religion (3). This course is an analysis of major issues in philosophy of religion. Topics may include the rationality of religious belief, faith, religious experience, religious language, evil, and the relation between religion and morality. Also offered by the Department of Religion.

PHI 3800. Philosophy of the Arts (3). This course introduces students to central issues in philosophy of the arts and aesthetics. Topics may include the nature of art, aestheticism in evaluating art, interpretation in literature, the nature of dance, and expressiveness in music. Readings include both historical and contemporary sources.

PHI 3881. Philosophy of Music (3). This course is an introduction to the contemporary literature regarding the philosophy of music. Questions posed include: What is music? Does music express emotions? How is music to be evaluated? How does one “understand” music? Why is cross-cultural understanding of music difficult? What constitutes an authentic performance?

PHI 3882. Philosophy in Literature (3). This course explores how metaphysical and moral ideas function within the structure of selected novels and plays.

PHI 3930r. Selected Topics (1–3). May be repeated to a maximum of nine semester hours.

PHI 4134. Modern Logic I (3). Prerequisite: PHI 3130 or equivalent or instructor permission. This course is an intermediate course in modern symbolic logic, with special attention to the evaluation of symbolized arguments. Topics include schemata and interpretation, models, satisfiability, normal forms, expressive completeness, proof procedures, metalogical laws, and soundness and completeness theorems.

PHI 4137. Modern Logic II (3). Prerequisite: PHI 4134. This course is an advanced course in modern symbolic logic. Topics discussed include the compactness theorem, the logic of identity and descriptions, second-order logic, type theory, the semantic definition of natural number, and Gödel’s incompleteness results.

PHI 4500. Metaphysics (3). This course examines selected philosophical problems from an advanced point of view. May be repeated to a maximum of nine semester hours.

PHI 4999r. Tutorial in Philosophy (1–3). This course consists of critical readings and discussions of important classical and contemporary philosophical texts. Variable content. Credit: one to two semester hours for a reading course; two to three semester hours for a reading course with substantial writing. May be repeated with instructor permission to a maximum of twelve semester hours.

History of Philosophy

PHI 3061. Medieval and Renaissance Philosophy (3). This course surveys Western philosophical thought from the third to the 16th century, beginning with the work of Christian, Jewish, and Arabic philosophers, and then turning to the rise of humanism, individualism, and science.

PHI 3130. Plato and His Predecessors (3). This course focuses on Ancient Greek philosophy from its beginnings to the work of one of its greatest practitioners. Questions posed include: What is there? What can I know about it? What should I do?

PHI 3140. Aristotle to Augustine (3). This course focuses on philosophy from the “Master of Those Who Knew” (Aristotle) through to the end of the ancient world and the dominance of Christianity. Topics include: the structure of the world order, God, man’s place.

PHI 3400. Modern Philosophy (3). This course is a critical study of the theories of 17th- and 18th-century Western philosophers through a careful examination of representative texts.

PHI 3500. 19th-Century Philosophy (3). This course explores diverse styles, ideas, and systems of such philosophers as Hegel, Kierkegaard, Schopenhauer, Marx, Mill, Bradley, and Nietzsche.

PHI 3700r. American Philosophy (3). This course examines major trends in American philosophy from Jonathan Edwards through 19th- and 20th-century American idealism and pragmatism. Readings include works by Peirce, James, and Dewey. May be repeated once with the permission of the instructor to a maximum of six semester hours.

PHI 4600r. Contemporary Philosophy (3). This course surveys the main recent philosophical movements through selected central representatives. Those considered may include Feigen and his background, Russell and Moore, early Wittgenstein, logical positivism, Heidegger, existentialism, J.L. Austin, and Wittgenstein and his successors. May be repeated with instructor permission to a maximum of nine semester hours.

Social and Political Philosophy

PHI 3162. Logic and the Law (3). This course is an in-depth examination of the application of logic in a legal context with special emphasis on methods of inductive reasoning and causal reasoning as well as an exploration of the historical and social context of the presentation of written arguments, and the evaluation of arguments from both historical and contemporary legal decision.

PHM 2121. Philosophy of Race, Class, and Gender (3). In this course, students study selected contemporary philosophical, literary, and journalistic discussions of questions regarding race, class, and gender, with a particular emphasis on the status of these discussions in the United States. Students also survey theoretical accounts of the concepts of race, class and gender, as well as their interrelatedness, and examine their application to various contemporary social issues.

PHM 2300. Introduction to Political Philosophy (3). This course introduces students to the major philosophical questions that concern political authority, role of law, political obligation, neocolonialism, disobedience, revolution, rights, the appropriate ends of government, patterns of distribution and justice.

PHM 3020. Philosophy of Sex (3). This course is an examination of the contemporary philosophical debates about sex and sexual relationships. Topics include, but are not limited to, the definition of “sex,” the ontology of sex, the nature of sexual identity, and the relation between sex and the meaning of life, and the nature of romantic love.

PHM 3123. Philosophy of Feminism (3). This course is a comprehensive survey of the most important schools of thought and issues in feminist philosophy, with emphasis on feminist politics and ethics. Liberal, socialist, Marxist, and radical feminism and their differing views about equality and subjectivity are discussed. Criticisms of now traditional theories from women of color and of “difference” theorists are analyzed. Also considered are problems of particular concern to feminists: the family, sexuality, occupation and freedom, harassment, rape, pornography, and domestic violence.

PHM 3331r. Modern Political Thought (3). This course focuses on major political ideals of the modern world emphasized through a study of selected political theorists such as Machiavelli, Hobbes, Locke, Rousseau, Hume, Burke, Hegel, Marx, Engels, Bentham, Mill, Jefferson, Madison, Lenin, and Mussolini. May be repeated to a maximum of nine semester hours. Also offered by the Department of Political Science.

PHM 3351. Philosophy of Human Rights (3). This course is a survey of philosophical discussions of human rights and the moral and political questions arising from their violations. We examine the philosophical foundations for human rights claims, as well as women’s human rights, political evil and mass atrocities. We analyze questions of justice and forgiveness in the context of social healing and democratisation.

PHM 3400. Philosophy of Law (3). This course is a comprehensive survey of the most important schools of thought, traditional problems, and current issues in Anglo-American philosophy of law. Chief theories discussed are natural law, positivism, realism (including the law and economics movement), and critical legal studies (including legal feminism). Also explored are different views about the interpretation of law and the role of the judiciary in American politics. Includes analysis of legal cases and consideration of issues such as justice, equality, liberty, privacy, and punishment.
PHM 4340r. Contemporary Political Thought (3). This course is an exploration of a set of issues, a trend, or a school of thought in contemporary political philosophy. May be repeated to a maximum of nine semester hours. Also offered by the Department of Political Science.

Philosophers and Schools

PHP 3510. Introduction to Marxist Philosophy (3). This course is a critical overview of the premises and theses of Marxism concerning the understanding of history, economic realities, political struggles, and ideologies as found in the principle works of its founders.

PHP 3786r. Existentialism (3). This course introduces students to existential philosophy through detailed and critical analysis of selected major works in the field with special attention to Heidegger and/or Sartre. May be repeated to a maximum of nine semester hours.

PHP 4303r. Studies in Major Philosophers (3). This course is a detailed study of a major philosopher (e.g., Plato, Aristotle, Kant, etc.) or school of philosophy (e.g., the Stoics, the Marxists). May be repeated to a maximum of nine semester hours.

Graduate Courses

PHH 5105r. Greek Philosophy (3).
PHH 5405r. Modern Philosophy (3).
PHH 5505r. 19th-Century Philosophy (3).
PHH 5605r. Contemporary Philosophy (3).
PHH 6005r. Studies in the History of Philosophy (3).
PHI 5135. Modern Logic I (3).
PHI 5136r. Modern Logic II (3).
PHI 5555. Core Course in Metaphysics and Epistemology (3).
PHI 5665. Core Course in Ethics (3).
PHI 5908r. Directed Individual Study (1–3). (S/U grade only.)
PHI 5913r. Supervised Research (1–5). (S/U grade only.)
PHI 5934r. Topics in Philosophy (3).
PHI 5945r. Supervised Teaching (1–5). (S/U grade only.)
PHI 5956. Introduction to Philosophical Methods (3).
PHI 5998r. Tutorial in Philosophy (1–3).
PHI 6205r. Philosophical Logic (3).
PHI 6225r. Philosophy of Language (3).
PHI 6306r. Epistemology (3).
PHI 6325r. Philosophy of Mind (3).
PHI 6406r. Philosophy of Science (3).
PHI 6425r. Philosophy of Social Sciences (3).
PHI 6455. Philosophy of Biology: Basic Topics (3).
PHI 6457r. Philosophy of Biology: Selected Topics (3).
PHI 6506r. Metaphysics (3).
PHI 6607r. Ethics (3).
PHI 6935r. Seminar in Philosophical Topics (3).
PHM 6206r. Social and Political Philosophy (3).

Programs Offered

The Department of Physics offers programs leading to the following degrees: Bachelor of Science (BS), Master of Science (MS), and Doctor of Philosophy (PhD). The department offers the following majors: Physics, Physics and Astrophysics, Physical Science, and Physical Science with FSU-Teach. The departmental course offerings include courses for non-science majors, for non-physical-science majors, for K–12 educators, and for physical science majors. Honors work is available. Details may be obtained from the chair of the department.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Physics as well as Physics and Astrophysics satisfy this requirement by earning a grade of “C–” or higher in PHZ 4151C. Undergraduate majors in Physical Science and Physical Science/FSU-Teach satisfy this requirement by earning a grade of “C–” or higher in COP 3014, ISC 3313, or PHZ 4151C.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. These prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fsvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

### Physics, Physics and Astrophysics

1. CHM X045C, or CHM X040 and CHM X041, or CHM X045/X045L
2. CHM X046C or CHM X046/X046L
3. MAC X311 or MAC X281
4. MAC X312 or MAC X282
5. MAC X313 or MAC X283
6. PHY X048/X048L and PHY X049/X049L, or PHY X048C and PHY X049C

### Physical Science

1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MAC X281
4. MAC X312 or MAC X282
5. MAC X313 or MAC X283
6. PHY X048C and PHY X049C, or PHY X048/X048L and PHY X049/
   X049L
7. MAC X312
   **Note:** MAC X312 is a prerequisite for PHY X049C

### Physical Science/FSU-Teach

1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MAC X281
4. MAC X312 or MAC X282
5. MAC X313 or MAC X283
6. PHY X048C and PHY X049C, or PHY X048/X048L and PHY X049/
   X049L
7. MAC X312
   **Note:** MAC X312 is a prerequisite for PHY X049C
8. SMT X043
9. SMT X053
   **Note:** Transfer students will be able to take SMT X043 and SMT X053 when admitted to upper division.

### Physics and Astrophysics Major

A Physics and Astrophysics major is required to take:

1. The following core courses: Discovering Physics (PHY 1090), General Physics A (PHY 2048C), General Physics B (PHY 2049C), Communication in Physics (PHY 3091), Intermediate Modern Physics (PHY 3101), Physics Problem Solving (PHY 3045), Mathematical Physics (PHY 3113), Mechanics I (PHY 3221), Intermediate Laboratory (PHY 3802L), Electricity and Magnetism I (PHY 4323), Thermal and Statistical Physics (PHY 4513), Quantum Theory of Matter A (PHY 4604), and Advanced Laboratory (PHY 4822L).
2. At least four of the following courses: Introduction to Astrophysics (AST 4211), Optics (PHY 3424), Mechanics II (PHY 4222), Electricity and Magnetism II (PHY 4324), Quantum Theory of Matter B (PHY 4605), Phenomena in Condensed Matter Physics (PHY 3400), Particle and Nuclear Physics (PHY 4390), and Special and General Relativity (PHY 4501).
3. The following computational course: Computational Physics Lab (PHY 4151C).
4. One of the following sets of chemistry courses: General Chemistry I/Laboratory (CHM 1045/1045L) or Honors General Chemistry I/ Laboratory (CHM 1050/1050L).
5. The following mathematics classes: Calculus with Analytic Geometry I (MAC 2311), Calculus with Analytic Geometry II (MAC 2312), Calculus with Analytic Geometry III (MAC 2313), and Ordinary Differential Equations (MAP 2302) or Engineering Mathematics I (MAP 3305).

Students who are planning to conduct graduate work in physics are strongly advised to include Quantum Theory of Matter B (PHY 4605), Mechanics II (PHY 4222), and Electricity and Magnetism II (PHY 4324) in their programs. An Honors Thesis or Senior Thesis (minimum of 6 credit hours) may be substituted for the Advanced Lab (PHY 4822L).

AA transfer students are not required to take PHY 1090. No physics, chemistry, or math course with a grade below “C–” may be used to satisfy the above requirements. A student who has received three or more unsatisfactory grades (U, F, D–, D, D+) in courses required for the Physics major, whether offered by the Department of Physics at Florida State University or elsewhere, whether repeated or not, will not be permitted to graduate with a degree in this major.

In addition to satisfying the above requirements, students must satisfy the general requirements of both the College of Arts and Sciences and the University.

### Physics and Astrophysics Major

A Physics and Astrophysics major is required to take:

1. The following core courses: Discovering Physics (PHY 1090), General Physics A (PHY 2048C), General Physics B (PHY 2049C), Communication in Physics (PHY 3091), Intermediate Modern Physics (PHY 3101), Physics Problem Solving (PHY 3045), Mechanics I (PHY 3221), Electricity and Magnetism I (PHY 4323), Thermal and Statistical Physics (PHY 4513), Quantum Theory of Matter A (PHY 4604), Mathematical Physics (PHY 3113), Astrophysics Laboratory (AST 3721L) or Intermediate Laboratory (PHY 3802L), Introduction to Astrophysics (AST 4211), and Extragalactic Astronomy (AST 4419) or Observational Techniques in Astrophysics (AST 4722).
2. At least three of the following courses: Physics of Stars (AST 4217), Cosmology and Structure Formation (AST 4414), Particle and Nuclear Physics (PHY 4390), Special and General Relativity (PHY 4601), and Nuclear Astrophysics (PHY 4316).

### Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin. Degree requirements and outlines of undergraduate programs that will meet all departmental and University requirements are available at [http://www.academic-guide.fsu.edu](http://www.academic-guide.fsu.edu).

The University oral competency communication requirement is satisfied for Physics, Physics and Astrophysics, and Physical Science/FSU-Teach majors by taking PHY 3091, Communication in Physics. Physical Science majors may take any university course satisfying the University communication requirement. The University computer competency requirement is satisfied for Physics and Physics and Astrophysics majors by taking PHZ 4151C; it is satisfied by Physical Science and Physical Science/FSU-Teach majors by taking COP 3014, ISC 3313, or PHZ 4151C.
3. The following computational course: Computational Physics Laboratory (PHZ 4151C).
4. One of the following sets of chemistry courses: General Chemistry I/Laboratory (CHM 1045/1045L) or Honors General Chemistry I/Laboratory (CHM 1050/1050L).
5. The following mathematics classes: Calculus with Analytic Geometry I (MAC 2311), Calculus with Analytic Geometry II (MAC 2312), Calculus with Analytic Geometry III (MAC 2313), and Ordinary Differential Equations (MAP 2302) or Engineering Mathematics I (MAP 3305).

Students who are planning to conduct graduate work in astrophysics are strongly advised to include Planetary Geology (GLY 1042), Mechanics II (PHY 4222), and Quantum Theory of Matter B (PHY 4605) in their programs. AA transfer students are not required to take PHY 1090.

No physics, chemistry, or math course with a grade below “C–” may be used to satisfy the above requirements. A student who has received three or more unsatisfactory grades (U, F, D–, D, D+) in courses required for the Physics and Astrophysics major, whether offered by the Department of Physics at Florida State University or elsewhere, whether repeated or not, will not be permitted to graduate with this degree.

In addition to satisfying the above requirements, students must satisfy the general requirements of both the College of Arts and Sciences and the University.

Physical Science Major

The Physical Science program is designed to provide students with opportunities to explore the natural and technological worlds broadly, from the Earth and space sciences to modern physics to computer science and mathematics. A Physical Science major is required to take:

1. The following core courses: General Physics A (PHY 2048C), General Physics B (PHY 2049C), and Intermediate Modern Physics (PHY 3101).
2. One of the following sets of chemistry courses: General Chemistry I/Laboratory (CHM 1045/1045L) and General Chemistry II/Laboratory (CHM 1046/1046L) or Honors General Chemistry I/Laboratory (CHM 1050/1050L) and Honors General Chemistry II/Laboratory (CHM 1051/1051L).
3. One of the following computational courses: Programming I (COP 3014), Computational Physics Lab (PHZ 4151C), or Introduction to Scientific Programming (ISC 3313).
4. The following mathematics courses: Calculus with Analytic Geometry I (MAC 2311) and Calculus with Analytic Geometry II (MAC 2312).
5. At least nine courses from the following list (at least twenty-seven credit hours): Calculus with Analytic Geometry III (MAC 2313), Ordinary Differential Equations (MAP 2302) or Engineering Math I (MAP 3305), Applied Linear Algebra I (MAS 3105), Introduction to Astrophysics (AST 4211), Physics Problem Solving (PHY 3045), Mechanics I (PHY 3221), Optics (PHY 3424), Intermediate Laboratory (PHY 3802L) or Astrophysics Laboratory (AST 3721L), Mathematical Physics (PHZ 3113), Condensed Matter Physics (PHZ 3400), Particle and Nuclear Physics (PHZ 4390), Survey of Organic Chemistry and Lab (CHM 2200 and 2200L) or Organic Chemistry I (CHM 2210), Introduction to Analytical Chemistry and Lab (CHM 3120 and 3120L), General Physical Chemistry (CHM 3400), Programming I (COP 3014, unless used to satisfy the computer skills requirement), Object Oriented Programming (COP 3330), Introduction to Unix (COP 3353), Physical Geology (GLY 2010C), Historical Geology and Lab (GLY 2100 and 2100L), Mineralogy and Crystallography (GLY 3200C), Physical Climatology (MET 2101), General Meteorology (MET 2700), Introduction to Atmospheric Dynamics (MET 3300). Other courses may be accepted. Those earning the Physical Science major in addition to another major are not allowed to count required courses for this separate major on this list for the purposes of the Physical Science program.

No physics, chemistry, computer science, geology, meteorology, or math course with a grade below “C–” may be used to satisfy the above requirements. A student who has received more than five unsatisfactory grades (U, F, D–, D, D+) in courses required for the Physical Science/FSU-Teach major, whether offered by the Department of Physics at Florida State University or elsewhere, whether repeated or not, will not be permitted to graduate with this degree.

In addition to satisfying the above requirements, students must satisfy the general requirements of both the College of Arts and Sciences and the University.

Physical Science/FSU-Teach Major

Physical Science/FSU-Teach majors are required to declare a second major in Science Teaching and to take:

1. The following core courses: General Physics A (PHY 2048C), General Physics B (PHY 2049C), Intermediate Modern Physics (PHY 3101), Intermediate Laboratory (PHY 3802L) or Astrophysics Laboratory (AST 3721L), and Communication in Physics (PHY 3091).
2. One of the following sets of chemistry courses: General Chemistry I/Laboratory (CHM 1045/1045L) and General Chemistry II/Laboratory (CHM 1046/1046L) or Honors General Chemistry I/Laboratory (CHM 1050/1050L) and Honors General Chemistry II/Laboratory (CHM 1051/1051L).
3. One of the following computational courses: Programming I (COP 3014), Computational Physics Lab (PHZ 4151C), or Introduction to Scientific Programming (ISC 3313).
4. The following mathematics courses: Calculus with Analytic Geometry I (MAC 2311) and Calculus with Analytic Geometry II (MAC 2312).
5. One Physics Learning Assistantship course (PHY 3012).
7. Four of the following five physics courses: Physics Problem Solving (PHY 3045), Optics (PHY 3424), Phenomena in Condensed Matter Physics (PHZ 3400), Particle and Nuclear Physics (PHZ 4390), and Introduction to Astrophysics (AST 4211).

No physics, chemistry, computer science, or math course or ISC 3523C with a grade below “C–” may be used to satisfy the above requirements. A student who has received more than five unsatisfactory grades (U, F, D–, D, D+) in courses required for the Physical Science/FSU-Teach major, whether offered by the Department of Physics at Florida State University or elsewhere, whether repeated or not, will not be permitted to graduate with this major. In addition to the above requirements, students must satisfy the general requirements of both the College of Arts and Sciences and the University and the requirements for the Science Teaching major.

Minor

The required mathematics for the Physics and Physics and Astrophysics programs is sufficient to constitute an acceptable minor in mathematics, but a student who so desires may take an additional approved minor. For the Physical Science and Physical Science/FSU-Teach programs, the required collateral courses may constitute a minor if not also used to meet Liberal Studies or other requirements. However, a student may select another minor.

Minor in Physics

To obtain a minor in physics, a student is required to take General Physics A (PHY 2048C), General Physics B (PHY 2049C), and Intermediate Modern Physics (PHY 3101). Grades below “C–” will not be accepted for a minor.

Minor in Biomedical Physics

The Physics Department offers a minor in Biomedical Physics designed for students preparing for graduate studies in the biological sciences, for medical school, or for medical professions such as physical therapy. Students are required to take either General Physics A and B (PHY 2048C and PHY 2049C), or College Physics A and B (PHY 2053C and PHY 2054C), or Biomedical Physics I and II (PHZ 4702 and PHZ 4703). Grades below “C–” will not be accepted for a minor.

Honors in the Major

The Department of Physics offers a program in Honors in the Major to encourage talented juniors and seniors to undertake independent research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

FSU-Teach Program in Teaching Physics

For those interested in teaching physics, FSU-Teach is an innovative approach to teacher education that involves a collaboration between scientists, mathematicians, and education faculty at Florida State University. In FSU-Teach, students will develop deep science or mathematics knowledge and the knowledge, skill, and experience needed to be an effective science or math teacher. The program will pay for tuition for the first two courses, and work-study positions with scientists, mathematicians, and local schools are available. For more information, see the Web site: http://FSU-Teach.fsu.edu.

PSC — Physical Sciences

Undergraduate Courses

Courses for Non-Science Majors

AST 1002. Planets, Stars, and Galaxies (3). This course is an introduction to astronomy. Basic astronomical concepts, celestial motion and rotation, and other cosmic forces, planets, moons, and other components of the solar system; nature and evolution of the sun and of other stars; structure of galaxies and of the universe as a whole. (Astronomy for liberal studies.)

AST 1002L. Introductory Astronomy Laboratory (1). Corequisite: AST 1002. This course is a laboratory requirement to accompany AST 1002. One period per week for two hours. Experiments, measurements, and observations of planetary, stellar, galactic, and extragalactic astronomy. (Astronomy laboratory for liberal studies.)

AST 3033. Recent Advances in Astronomy and Cosmology (3). Prerequisites: AST 1002 and basic math requirements or instructor permission. This course discusses modern concepts and recent developments such as black holes, quasars, and the Big Bang.

PHY 1020. Physics and Technology for Future Presidents (3). This course is for non-science majors and contains the essential physics students need in order to understand today's core science and technology issues, and to become the next generation of world leaders. The course empowers students possessing any level of scientific background with the tools they need to make informed decisions and to argue their views persuasively with anyone, expected or unexpected.

PHY 1020L. Physics and Technology for Future Presidents Laboratory (1). Corequisite: PHY 1020. This course is designed to accompany the PHY 1020 lecture course. Although the lab material generally follows the lecture, some topics may be treated earlier or later in the lab syllabus.

Courses for Non-Physical-Science Majors

PHY 2053C. College Physics A (4). Prerequisites: MAC 1114 and MAC 1140 with grades of “C” or better or suitable mathematics examination placement score. Corequisite: PHY 2053L. This course is an introduction to mechanics, heat, and waves for non-physical-science majors. Examples from biology, geology, and medicine are incorporated. First course in a two-semester sequence. Calculus not required. Two lectures, one recitation, and one laboratory each week. Students who have previously received credit for PHY 2048C may not register for PHY 2053C.

PHY 2053L. College Physics A Laboratory (0).

PHY 2054C. College Physics B (4). Prerequisite: PHY 2053C or PHY 2048C. Corequisite: PHY 2054L. This course is an introduction to electromagnetism, light, and modern physics for non-physical-science majors. Two lectures, one recitation, and one laboratory each week. Students who have previously received credit for PHY 2049C may not register for PHY 2054C.

PHY 2054L. College Physics B Laboratory (0).

PHY 2048C. College Physics A (5). Prerequisite: MAC 2311. This course is an introduction to mechanics, waves, and thermodynamics for physical science majors, designed to be taken as a sequence with PHY 2049C. Calculus is used. Course consists of lectures, recitations, and laboratory.

PHY 2048L. General Physics A Laboratory (0).

PHY 2049C. College Physics B (5). Prerequisite: PHY 2048C and MAC 2312. This course is an introduction to electricity, magnetism, and optics for physical science majors. Calculus is used. Course consists of lectures, recitations, and laboratory.

PHY 2049L. General Physics B Laboratory (0).

Courses for Majors

AST 3721L. Astrobiology Laboratory (1). Prerequisite: PHY 3101. This course offers an introduction to experimental methodology, data analysis and interpretation, calibration techniques, scientific model validation, as well as data presentation and communication. The laboratory experiments have astrobiological relevance and include magnetometric fields, optical interference and diffraction, wave polarization, line spectroscopy, photoelectric effect, and radioactive decay.

AST 4211. Introduction to Astrophysics (3). Prerequisites: MAC 2312 and PHY 2049C. Science majors only. This introductory course covers key aspects and concepts of modern astronomy and astrophysics, including coordinate systems, instrumentation, our sun and planets, stars and stellar evolution, binary systems and variable stars, stellar explosions, as well as galaxies and the evolution of the universe.

AST 4217. The Physics of Stars (3). Prerequisites: PHY 3101 and PHY 3221. This course serves as an introduction to star formation, evolution, and death through simple theoretical modeling and through a strong emphasis on the underlying physics concepts.

AST 4414. Cosmology and Structure Formation (3). Prerequisites: AST 4211 and PHY 3101. This course covers the evolution of the universe from the “Hot Big Bang” to the current epoch. Topics include cosmological expansion, the Hubble constant and other cosmological parameters, the microwave background radiation, early universe nucleosynthesis, the growth of large-scale structure, the “dark ages” and the re-ionization of the universe, the horizon and other fine-tuning problems, distance determinations, redshift surveys, inflation, cosmological acceleration, as well as dark matter and dark energy.

AST 4419. Extragalactic Astronomy (3). Prerequisite: AST 4211. This course offers a survey of the physics and phenomenology of galaxies and galaxy structures. Topics include stellar populations, classifications systems, interstellar and intergalactic material, chemical abundances and evolution, galaxy formation, structure, dynamics and evolution, extragalactic distance determination, interacting systems, as well as active galactic nuclei and quasars.

AST 4722. Observational Techniques in Astrophysics (3). Prerequisite: AST 4211. This course covers principles and techniques used in obtaining modern astronomical data. Includes an overview of current and next-generation astronomical instrumentation, discussion of calibration schemes and observing strategies, and an introduction to analysis techniques.

PHY 1090R. Discovering Physics (1). (S/U grade only.) This course serves as an introduction to the exciting work currently being done by physicists. Topics include the physics and the day-to-day work done to answer questions in astrophysics, elementary particle physics, nuclear physics, and condensed matter physics. May be repeated to a maximum of two semester hours.

PHY 3045. Physics Problem Solving (3). Prerequisites: PHY 2048C and PHY 2049C. Corequisites: PHY 3010 and MAP 2302, or instructor permission. This course includes instruction and practice in solving advanced, calculus-based, multi-step problems in classical mechanics and E&M.

PHY 3091. Communication in Physics (2). Prerequisite: PHY 2048C. Corequisite: PHY 2049C. This course consists of instruction and practice in oral communications for physicists. Students choose physics topics in consultation with instructor and present them to the class.

PHY 3101. Intermediate Modern Physics (3). Prerequisite: PHY 2049C. This course focuses on special relativity, quantum properties of light and matter, and origins of the universe.

PHY 3424. Optics (3). Prerequisite: PHY 2049C. This course focuses on topics such as: geometrical optics, wave optics, optical instrumentation, properties of light, lasers, fiber optics.

PHY 3802L. Intermediate Laboratory (2). Corequisite: PHY 3101. This course focuses on experiments in optics, modern physics, and electricity and magnetism. The emphasis is on the development of experimental technique, assessment of the validity of experimental data, and the development of skill in the written presentation of results.

PHY 3803L. Intermediate Laboratory B (1). Prerequisite: PHY 3802L. This course focuses on experiments in atomic spectroscopy, mechanics, radio-frequency and microwave measurements, vacuum technique, and data accumulation with microprocessors. The area of emphasis is arranged between the student and the instructor.

PHY 4222. Mechanics II (3). Prerequisites: PHY 3221, PHY 3113, or instructor permission. This course focuses on Lagrangian dynamics, Hamiltonian dynamics, dynamics of rigid bodies, coupled oscillations, waves in one-dimensional continuous systems, and special relativity.
PHY 4241. Advanced Dynamics (3). Prerequisites: PHY 3221 and PHY 4323. This course examines a variety of topics including Hamiltonian dynamics and electrodynamics of particles, waves in continuous media, relativistic dynamics, and electrodynamics of particles.

PHY 4232. Electricity and Magnetism I (3). Prerequisites: PHY 3221 and PHZ 3113. This course focuses on electric fields for static charge distributions, electric fields in matter, magnetic fields for constant current configurations, magnetic fields in matter, and Maxwell's equations.

PHY 4234. Electricity and Magnetism II (3). Prerequisite: PHY 4232. This course focuses on electromagnetic wave solutions to Maxwell's equations; reflection, transmission, dispersion, and absorption of electromagnetic waves; scalar and vector potentials; electromagnetic dipole radiation; electrodynamics; and relativity.

PHY 4513. Thermal and Statistical Physics (3). Prerequisites: MAC 2313, PHY 3221, and PHYS 3113. This course studies the fundamental laws of thermodynamics and their application to simple systems, the kinetic theory of an ideal gas, and an introduction to the classical and quantum statistical mechanics of weakly interacting systems.

PHY 4604. Quantum Theory of Matter A (3). Prerequisite: PHY 3101, PHY 3221, and PHYS 3113. This course focuses on quantum mechanics and its applications to particles, nuclei, atoms, molecules, and condensed matter.

PHY 4822R. Advanced Laboratory (2). Prerequisite: PHY 3802L. This course consists of experiments in atomic physics, nuclear physics, and other areas of modern physics. Students are expected to work without detailed instructions. May be repeated to a maximum of six semester hours for special projects arranged in advance between the student and the instructor.

PHZ 3113. Mathematical Physics I (3). Prerequisite: PHY 3101. Corequisite: MAP 2302 or MAP 3305. This course focuses on: mathematical methods applied to physical systems; vectors, specialized techniques of integration, integral transforms, special functions, boundary-value problems, numerical methods.

PHZ 3400. Phenomena in Condensed Matter Physics (3). Prerequisite: PHY 3101. This course covers topics such as: crystal structures, phonons and thermal properties, electron energy bands, metals, semiconductors, superconductors, and magnetism.

PHZ 415C. Computational Physics Laboratory (3). Prerequisites: MAP 2302 or MAP 3305, PHYS 3113, and PHYS 3115. This course introduces students to the use of computers to solve computationally intensive problems, including basic instruction in physics problem solving using numerical solutions of differential equations, numerical integration, Monte Carlo methods, linear algebra, and symbolic algebra. Provides instruction in computational techniques and software development skills and practice in using network and software development tools including telnet, ftp, spreadsheets, databases, code management tools, and the World Wide Web.

PHZ 4316. Nuclear Astrophysics (3). Prerequisite: AST 4211. Corequisite: PHY 4604. This course offers an introduction to the role of nuclear reactions and decays in astrophysics. Topics cover the origin of elements in the context of Big Bang, major burning stages in the life of a star, stellar explosions, and processes in interstellar matter.

PHZ 4390. Particle and Nuclear Physics (3). Prerequisites: MAP 2302 or MAP 3305 and PHY 3101, or instructor permission. This course examines the properties of nuclei and particles, nuclear and particle decays, the Standard Model, and accelerator and detector techniques.

PHZ 4601. Special and General Relativity (3). Prerequisite: PHY 3221. Corequisite: PHY 4323. This course examines the special theory of relativity, tensor analysis and curvature, general theory of relativity, experimental tests, black holes, gravitational radiation, and cosmology.

Research and Special Topics

AST 4218R. Astrophysics Seminar I. Prerequisite: AST 4211. This seminar introduces students to current research topics in astronomy and astrophysics through presentation and discussion of recently published research papers, their own research work, and occasional review publications. Topics cover observational and theoretical astrophysics alike. May be repeated to a maximum of two semester hours.

PHY 3949R. Experiential Learning (0). (S/U grade only.) This course is a non-credit experiential learning experience, which offers students an opportunity to gain "real world" on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

PHY 4905R. Directed Individual Study (1–3). May be repeated to a maximum of eighteen semester hours.

PHY 4910R. Research Participation (1–3). This course consists of projects in theoretical or experimental physics arranged in advance between the student and a member of the teaching faculty of the physics department. May be repeated to a maximum of eight semester hours.

PHY 4936R. Special Topics in Physics (1–3). Prerequisite: Senior standing or instructor permission. This course consists of advanced applications of physics to topics of interest, such as relativistic astrophysics, particle physics, advanced solid state physics, or advanced nuclear physics. May be repeated to a maximum of twelve semester hours.

PHY 4937R. Undergraduate Tutorial in Physics (1–3). (S/U grade only.) Prerequisite: Upper-division undergraduate standing. This course consists of selected topics in modern physics. Examination of primary research literature. May be repeated to a maximum of fifteen semester hours. A maximum of eight students allowed in each tutorial.

PHY 4970R. Honors Work (1–6). May be repeated to a maximum of nine semester hours.

PHY 4975R. Senior Thesis (1). Pre-or corequisite: PHY 4910. This course consists of a written report and an oral presentation discussing research work done under PHY 4910. The grade is assigned by a committee of three faculty members.

PHY 4990R. Senior Seminar (1). Prerequisite: PHY 3101. Corequisites: PHY 3091 and PHY 4910R. In this course, students present results of their physics research to the class for discussion. May be repeated to a maximum of two semester hours.

Graduate Courses

AST 5210. Introduction to Astrophysics (3).

AST 5219R. Astrophysics Seminar (3).

AST 5245. Radiative Processes in Astronomy (3).

AST 5416. Cosmology and Structure Formation (3).

AST 5418. Extragalactic Astronomy (3).

AST 5725. Observational Techniques in Astrophysics (3).

AST 5760. Computational Astrophysics (3).

AST 5765. Advanced Analysis Techniques in Astronomy (3).

PHY 5157. Advanced Numerical Applications in Physics (3).

PHY 5226. Intermediate Mechanics (3).

PHY 5227. Advanced Mechanics (3).

PHY 5228. Mechanics II (3).

PHY 5346. Theoretical Dynamics (3).

PHY 5326. Electricity and Magnetism I (3).

PHY 5327. Electricity and Magnetism II (3).

PHY 5346. Electrodyamics A (3).

PHY 5347. Electrodyamics B (3).

PHY 5515. Thermal and Statistical Physics (3).

PHY 5524. Statistical Mechanics (3).

PHY 5607R. Quantum Theory of Matter A (3).

PHY 5608R. Quantum Theory of Matter B (3).

PHYSIOLOGY: see Biological Science
Requirements for a Major in Political Science

A political science major consists of thirty semester hours in political science with a grade of “C-” or better in each course, with the following restrictions:

- At least twenty-one semester hours in courses numbered 3000 and above
- At least twenty-one semester hours in an assembled classroom (as distinguished from individual credit for honors, directed studies, and internships)
- At least fifteen semester hours in an assembled classroom at Florida State University (may include courses taken through the study abroad program).

The political science program includes five subfields of study: American government (course prefix is POS), comparative politics (CPO), international relations (INR), public policy (PUP), and public administration (PAD). PAD courses are offered by the Askew School of Public Administration. ISS 2937 may count as a political science course if the instructor is a faculty member in political science.

Majors must take at least three introductory courses, POS 1041, and two additional courses chosen from: CPO 2002, INR 2002, PUP 3002, and PAD 3003.

Note: CPO 2002, INR 2002, POS 1041, and PUP 3002 are prerequisites to most of the upper-level courses in their respective subfields.

Majors also must take at least six semester hours in any three subfields. The introductory courses listed above can be counted toward this subfield requirement. Only those courses listed under the subfield headings below can be used toward that subfield (i.e., courses listed under the “Others” section, though having a course prefix of POS, do not count towards the American Government subfield). Majors may verify whether selected courses will count toward major and subfield requirements with the department’s Academic Coordinator.

POS 3713, Understanding Political Science Research, is required of all majors. This course should be taken as early as possible in the student’s academic program, and no later than the first semester of junior year (prior to the completion of seventy-five credit hours).

No student who has accumulated three or more grades below “C-” (D+, D, D-, F, U) in political science courses taken for credit, at Florida State University or elsewhere, will be permitted to continue toward a degree with a major in political science.

Political science majors are required to have a minor or second major and to meet the requirements stipulated by that department or program. Public administration is not permitted as a minor because classes in that area count toward the political science major.

Honors in the Major

The department offers a program of honors in the major to encourage qualified juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Internships

An optional internship in political science is designed to allow students to earn up to six semester hours of credit in political science while also garnering practical experience in government and politics. The prerequisites for internship are: completion of at least sixty semester hours; completion of fifteen semester hours in political science with a “C-” or better, including POS 3713; an overall grade point average of 3.0 or a GPA of 3.0 in political science courses; and permission from the department. Internship credits taken through the Askew School of Public Administration, International Affairs, or Interdisciplinary Social Sciences cannot be counted toward political science major or minor requirements.

For complete details, interested students should contact the department. The deadline to apply for internship credit through the department is the third day of classes of the semester a student will intern. The department does not award retroactive credit for completed internships under any circumstances.

Requirements for a Minor in Political Science

Students majoring in other departments or programs may minor in political science with fifteen semester hours of political science courses with grades of “C-” or better. A maximum of six semester hours of PAD and/or PHM prefixes combined may be counted toward the minor. At least six semester hours must be at the 3000 level or above, and at least six of those must be earned at Florida State University.

Definition of Prefixes

CPO—Comparative Politics
INR—International Relations
PHM—Philosophy of Man and Society
POS—Political Science
POT—Political Theory
PUP—Public Policy

Undergraduate Courses

American Government

POS 1041. American Government: National (3). This course investigates how the national government is structured and how the American political system operates. Covers the philosophical and constitutional foundations of American government, the branches of the national government, the mechanisms by which citizens are connected to their government, and the policy outputs of government.

POS 3122. State Politics (3). Prerequisite: POS 1041 or instructor permission. This course focuses on government and politics in the American states. Looks at the governor, the legislature, and the courts; the history of federalism; and policies, practices, and social institutions that affect state government. Includes a study of state policies in such areas as welfare, education, crime, and the environment.

POS 3142. Urban Politics (3). Prerequisite: POS 1041 or instructor permission. This course examines the structure and operation of city governments and the political forces that drive decision making. Includes an examination of different forms of local government and the role of political parties, interest groups, and individuals. Examines the varying social and economic factors affecting U.S. cities.
CPO 3103. Comparative Government and Politics: Western Europe (3). Prerequisite: CPO 202 or instructor permission. This course focuses on political behavior and institutions in Western Europe. It examines transnational developments in Europe, such as the postindustrial society phenomenon, terrorism, Eurocommunism, and European federation.

CPO 3123. Comparative Government and Politics: Great Britain (3). Prerequisite: CPO 202 or instructor permission. This course examines the political and governmental system of Great Britain, offering a comparative framework. Comparison and contrast with the United States emphasized.

CPO 3303. Politics of Latin America (3). Prerequisite: CPO 202 or instructor consent. This course examines Latin American politics after the mid-20th century. Examines the historical, economic, and international contexts in which Latin American political systems function, and identifies challenges to democracy and development. The specific Latin American countries covered will vary.

CPO 3403. Comparative Government and Politics: The Middle East (3). Prerequisite: CPO 202 or instructor permission. This course discusses the political systems of the Middle East and their social, economic, and cultural foundations.

CPO 3520. Emerging Democracies in Northeast Asia: Korea, Taiwan, Japan (3). Prerequisite: CPO 202 or instructor permission. This course is an introduction to the politics of Korea, Taiwan, and Japan. Looks at 20th century political developments to better understand contemporary events in these countries. Deals with political issues such as electoral systems, party systems, “economic miracles,” the process of democratization, the potential future role of these countries in world affairs, North Korea nuclear development, and unification of the Korean Peninsula.

CPO 3541. Politics of China (3). Prerequisite: CPO 202 or instructor permission. This course is an introduction to the politics of the People’s Republic of China, its political history and contemporary organization. Covers such topics as Chinese communism, the Cultural Revolution, the post-Mao era, the two Chinas, and popular movements and reform. Also examines current issues.

CPO 3553. Politics of Japan (3). Prerequisite: CPO 202 or instructor permission. This course examines Japanese society and culture, political behavior, and political institutions since World War II. Emphasis is placed on political transformation since the early 1970s.

CPO 3615. Post-Soviet Politics (3). Prerequisite: CPO 202 or instructor permission. This course examines developments in the so-called “transition countries” of Eastern Europe and Eurasia, drawing on readings to introduce students to the major debates on economic and political reform in the region.

CPO 3703. Comparative Democratic Institutions (3). Prerequisite: CPO 202 or instructor permission. This course examines political institutions (including executive, legislative, and judicial, as well as electoral systems), and evaluates their importance and role in democratic societies.

CPO 3733. Emerging Democracies of Central Europe (3). Prerequisite: CPO 202 or instructor permission. This course examines the new democracies of Central Europe after the collapse of communism. Emphasis is placed on democratic development in Poland, Czechoslovakia [sic], Romania, Yugoslavia, and Hungary. Discussion covers the historical process of political institutions of each state, especially the transition to democracy and the obstacles faced by all emerging democracies.

CPO 3743. States and Markets (3). Prerequisite: CPO 202 or instructor permission. This course analyzes the multifaceted ways in which political and economic spheres interrelate. Students are exposed to relevant debates on democracy and growth, the state’s role in the economy, corruption, natural resources, and redistribution.

CPO 3930r. Special Topics in Comparative Government and Politics (3). Prerequisite: CPO 202 or instructor permission. Topics vary with the instructor and semester. May be repeated up to a maximum of 12 semester hours.

CPO 4057. Political Violence (3). Prerequisite: CPO 202 or instructor permission. This course introduces the student to scholarly writing on violent political conflict. Reviews theories of guerrilla struggle and counter-insurgency, as well as the philosophy of non-violent direct action and several theories of conflict resolution. Course also explores the human costs of political violence.

CPO 4206. Political Psychology (3)

CPO 4504. Institutional Approaches to Democracies and Dictatorships (3). Prerequisite: CPO 202 or instructor permission. This course examines questions about democracy and dictatorship from an institutional perspective. What is democracy and how is it measured, and how does regime affect the welfare of citizens? An emphasis is on the variety of institutional arrangements found in dictatorships.

CPO 4704. Comparative Welfare States (3). Prerequisite: CPO 202 or instructor permission. This course explores the variety of welfare states: the evolution of welfare states in different societies, how the welfare state has developed in the modern era, and how welfare states in other countries can lead to better understanding of American welfare politics and policies.

International Relations

INR 202. Introduction to International Relations (3). This course introduces students to the study of international relations. Major topics include the different actors that participate in international relations and the different goals they pursue, the processes of conflict and cooperation, and recent trends in international politics.

INR 3004. Geography, History, and International Relations (3). Prerequisite: INR 202 or instructor permission. This course introduces students to the impact of geography and history on international relations and considers the ways these forces influence national and international processes. Topics include the role of geography in international economics and trade, regional integration, geopolitics, territorial and resource disputes, and decisions-makers learn from history.
Political Theory

PHM 331r. Modern Political Thought (3). This course focuses on major political ideas of the modern world emphasized through a study of selected political theorists such as Machiavelli, Hobbes, Locke, Rousseau, Hume, Burke, Hegel, Marx, Engels, Bentham, Mill, Jefferson, Madison, Lenin, and Mussolini. May be repeated to a maximum of nine semester hours.

PHM 4340r. Contemporary Political Thought (3). This course is an exploration of a set of issues, a trend, or a school of thought in contemporary political philosophy. May be repeated to a maximum of nine semester hours.

POT 3102. Political Thought in Fiction (3). This course is an inquiry into politics and political thought as they appear in fiction, including literature, cinema, theatre, and television.

POT 3502. Politics and Ethics (3). This course examines governing as the process of collective decision-making and as a society’s search for public ethics.

Others

POS 3713. Understanding Political Science Research (3). Prerequisite: POS 1041 or CPO 2002 or INR 2002 or PUP 3002 or instructor permission. This course consists of doing political science as opposed to reading it. Includes introductory examinations of survey research, computer applications, data analysis, and philosophy of science.

Required for all political science majors.

POS 3930r. Advanced Undergraduate Seminar (3). Prerequisite: At least twelve semester hours of political science or instructor permission. This course is a seminar on topics of major theoretical or policy relevance to political scientists. Opportunity for discussion and instructor interaction. Topic varies. May be repeated to a maximum of six semester hours.

POS 3949r. Experiential Learning (0). (S/U grade only.) Prerequisite: Instructor permission. This is a non-credit experiential learning course, which offers students an opportunity to gain “real world” on-the-job experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

POS 4715. Politics and the Theory of Games (3). Prerequisites: CPO 2002 or INR 2002 or PUP 3002 or instructor permission. This course develops elementary theories of individual and group decision-making that are used to analyze various political phenomena such as the arms race, legislative politics, majority rule in democracies, voting and elections, and coalition governments.

POT 4905r. Directed Individual Study (1–3). Prerequisite: At least twelve semester hours of political science or instructor permission. This course involves some combination of research, reading, writing, field study, other scholarly activities, and evaluation. May be repeated to a maximum of twelve semester hours.

POT 4935r. Honors Work (1–6). When offered as a seminar, selected topics are used to develop outstanding scholarship; also offered for individual students engaged in senior honors thesis. Contact the department for details on prerequisites and requirements. May be repeated to a maximum of nine semester hours.

POT 4941r. Internship (1–6). Prerequisites: Completion of at least sixty semester hours, completion of fifteen semester hours in political science (including POS 3713) with a grade of “C–” or better, a 3.0 GPA average or a 3.0 GPA in political science courses, and departmental permission. For complete details interested students should contact the department.

Public Policy

PUP 3002. Introduction to Public Policy (3). This course is an introduction to the development of public policy in the United States. Covers main policy areas including housing, education, the economy, homeland security, etc.

PUP 4008. Public Policy Analysis (3). Prerequisite: PUP 3002. This course introduces students to the evaluation and analysis of public policy, using the political economy approach.

PUP 4024. Interest Groups, Social Movements, and Public Policy (3). Prerequisite: PUP 3002 or instructor permission. This course examines the varied effectiveness of interest groups and movements on public policy formation, with emphasis on resources, organizational structure, ideology, strategies, and tactics.

PUP 4034. Organizations and Public Policy (3). Prerequisite: PUP 3002. This course is concerned with the accountability and performance of bureaucracies and their implications for democracy, examining the role of organizations and bureaucracies in public policy, focusing on factors such as decision-making activities, rationality, motivation, and conflict within and among organizations.

PUP 4203. Environmental Politics and Policy (3). Prerequisite: PUP 3002 or instructor permission. This course focuses on the actions taken by government to protect and improve environmental quality in the United States. It includes such topics as the underlying scientific principles, the major actors in policy making, existing legislation, and future challenges. Background in science is not necessary.

PUP 4604. Health Services Organization and Policy (3). This course examines the development of health care policy and its practice in American health care institutions. Topics include costs, prices, and expenditures, insurance, programs (Medicare, Medicaid, SCHIP, and long-term care), and reforms in the American system.
MINOR IN POPULATION STUDIES

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY
Web Page: http://popcenter.fsu.edu

Director: Karin L. Brewster (Sociology); Professors: Carlson (Sociology), Eberstein (Sociology), Schmertmann (Economics), J. Taylor (Sociology);
Associate Professors: Brewster (Sociology), Burdette (Sociology), Coutts (Urban and Regional Planning), M. Taylor (Sociology), Tillman (Sociology);
Assistant Professor: MacFarland (Sociology); Professors Emeriti: Nam, Sly, Turner

This multidisciplinary minor provides an overview of population studies, a field that is concerned with the size, composition, and distribution of human populations—globally, nationally, and locally—and with how and why these characteristics change. Fundamentally, populations change in response to changes in fertility, mortality, and migration, but contemporary population research stretches the field beyond these three variables to encompass a broad range of related topics, including family structure, health, the environment, and socioeconomic development. Through the coursework for this minor, students will realize the impact of population variables and processes on nearly every issue of public concern, including population aging, rising health care costs, national security, the economy, and climate change. A minor in population studies will complement majors in the College of Social Sciences and Public Policy, Environmental Studies, and Environmental Sciences and Policy.

Requirements

The minor in Population Studies consists of fifteen semester hours of coursework comprising nine hours of required coursework and six hours of electives.

Required core (three courses):
All students must take:
- ECP 3113 Economics of Population
- GEO 1400 Human Geography*
- SYD 3020 Population and Society

Electives (two courses):
The remaining six credit hours may be selected from the following courses:
- GEO 3502 Economic Geography OR ECP 3302 Economics of Natural Resources, Energy, and the Environment
- SYD 3600 Cities in Society OR URS 1006 World Cities: Quality of Life* OR GEO 4602 Urban Geography
- SYO 3100 Families and Social Change
- SYP 3730 Aging and the Life Course
- ECS 4013 Economics of Development
- GEO 1330 Environmental Science*

*Course also may be counted toward student’s Liberal Studies requirement. All courses must be completed with a grade of “C-” or better. For more information, contact Dr. Karin Brewster, Director, Center for Demography and Population Health.
Program in
PROFESSIONAL COMMUNICATION

COLLEGE OF APPLIED STUDIES

Web Page: http://pc.fsu.edu/Academics/Undergraduate-Programs/Professional-Communication

Faculty: Halvorson, Lindsay, Wallace

Students in the Professional Communication program at the Panama City campus receive a broad understanding of fundamental communication processes. The overall program combines courses that are theoretically based with those that are professionally oriented. Courses include interviewing, persuasion, communication research methods, principles of advertising, introduction to public relations, communication for organizing and a communication internship. Students in professional communication may pursue careers in information and media, as well as prepare for graduate study. Representative job titles relating to this major include: Information/specialist, radio/TV executive, media manager, public opinion researcher, speech writer, online content manager, and many others.

The College of Applied Studies also offers programs of study leading to the terminal master’s degree in Corporate and Public Communication. Consult the Graduate Bulletin or School Web site for information regarding graduate programs.

Note: Students not formally admitted to the professional communication degree program are prohibited from enrolling in more than eighteen semester hours of coursework in professional communication. SPC 1017 and SPC 2608 do not count toward this eighteen semester hour limit.

Admission Information

Students transferring from another institution are strongly encouraged to earn an AA before matriculating at Florida State University, and should apply for admission to the School of Communication before transferring to Florida State University. Students who transfer must have an overall GPA of 2.0 or higher on all college coursework considered for admission. Students may also enter the professional communication degree program as first time in college (FTIC) students. For more information, contact Angie Sexton, Academic Coordinator at: asexton@pc.fsu.edu or (850)770-2178.

Requirements

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in professional communication satisfy this requirement by earning a grade of “C–” or higher on all college coursework considered for admission. Students may also enter the professional communication degree program as first time in college (FTIC) students. For more information, contact Angie Sexton, Academic Coordinator at: asexton@pc.fsu.edu or (850)770-2178.

Oral Communication Competency

Students must demonstrate the ability to orally transmit ideas and information clearly. This requirement may be met through appropriate high school speech training or with an approved college-level course. COM 3110, Communication for Business and the Professions will satisfy this requirement.

Language Requirement

All students must meet the foreign language admission requirement. Students do not have an additional language requirement for the BS degree. The BA degree requires proficiency in a foreign language.

Required Minor

Professional Communication majors must fulfill minor requirements outside the Communication major. Students should check with the minor department for specific requirements. Minors must be approved by an advisor. A fifteen hour interdepartmental minor is also possible, providing that the coursework is outside the Communication major and approved in advance.

Major Program of Studies in Professional Communication: thirty-six hours

No grade below a “C–” will be accepted for any course in the major. Maintenance of a 2.0 cumulative GPA is required. The College of Applied Studies reserves the right to refuse admission or discontinue enrollment of any student at any time, if, in the judgment of the faculty, the student does not meet departmental or major standards.

Eight core courses (twenty-four hours):

- ADV 3008 Principles of Advertising (3)
- COM 3120 Communication for Organizing (3)
- COM 3310 Communication Research Methods (3)
- COM 4945r Communication Internship (3)
- COM 4970 Communication for Organizing and a Communication Internship (3)
- COM 4975 Communication Research Methods (3)
- SPC 4360 Interviewing (3)
- SPC 4540 Persuasion (3)

Advanced courses (twelve hours):

Students select four courses from a list of approved courses. Students who are admitted into the combined BS/MS degree in professional communication may be permitted to dually count up to twelve credit hours of graduate communication coursework towards both the BS and the MS degree. Interested students should consult their faculty advisor for more information about the combined program. More information about the professional communication BS/MS Degree can be found at http://pc.fsu.edu/Academics/Undergraduate-Programs/Professional-Communication.

Definition of Prefixes

COM—Communication
IFS—Interdisciplinary Florida State University Courses
SPC—Speech Communication

Courses for Professional Communication Majors

Note: Other courses may be offered on the main campus. Please refer to the Communication section of this General Bulletin for a complete list of courses. Visit http://pc.fsu.edu for specific courses required for this program.

COM 4431. Rhetoric of a Global Corporation (3). This course provides opportunities to observe ways in which religious and musical rhetoric are employed by a major U.S. corporation with a global target market. The course emphasizes observation research that focuses primarily on communication theory and methods. The course requires that students spend forty-five documented hours performing lab/field work research and/or library research in the symbols and messages of an appropriate corporation.

COM 4905. Directed Individual Study (1–3). (S/U grade only.) In this course, students select a topic of interest to pursue under supervision of a faculty member. It could be research/creative, pedagogy, service, or applied. Results in a final project, scope and type to be defined by student and faculty supervisor. May be repeated to a maximum of nine semester hours.

COM 4941r. Application of Instructional Methods (0–3). (S/U grade only.) This course provides experience in methods and strategies of teaching communication concepts within the University context. Individually designed to accommodate student’s background and objectives. May be repeated to a maximum of three semester hours; duplicate registration not allowed.

COM 4945r. Communication Internship (1–12). (S/U grade only.) This course is a supervised internship. The credit is proportional to scope and significance of work and may not be applied to graduate degrees. The course is individually designed to accommodate student’s background and objectives. May be repeated to a maximum of twelve semester hours.

IFS 2074. Communication and Dance (3). This course focuses on three separate emphasis areas: (1) the individual; (2) partnerships, and; (3) groups and social settings. The communication concepts learned through dance in this course are also applied to other social situations and settings.

SPC 3231. Contemporary Rhetorical Theory (3). This course examines rhetorical theorists of the 20th century, including Burke, Richards, Foucault, Habermas, Fisher, and Weaver.

PSYCHOBIOLOGY/NEUROSCIENCE: see Graduate Bulletin
The Department of Psychology offers introductory survey courses to give the liberal studies student a broad background in the study of behavior, as well as upper-division courses for the advanced student who has more specialized interests. The undergraduate major includes a rigorous course of study that covers the methodology and content needed to understand the causes of behavior in humans and animals. It is the intent of the program that the level of knowledge attained by the successful major will be such that the student is well prepared for graduate-level studies in any of the specialty areas in psychology. Likewise, the undergraduate program will provide excellent preparation for those interested in advanced training in a professional school (e.g., law or medical school), although additional coursework outside psychology may be required. Although some students may not wish to pursue graduate studies, this program assures that the successful major will attain a strong science-based liberal arts education, which can prepare students for a variety of careers, although additional training (e.g., internships) may be required.

Majors are required to take two laboratory courses, and qualified students are strongly encouraged to work in the department’s research laboratories or to participate in research in educational and clinical settings. Students also are strongly encouraged to consult early and regularly with the departmental Advising Office to be sure they are meeting program requirements and to ask what courses are required or how to better prepare oneself for graduate school or employment. Advisors are available M-F from 9:00 a.m. to 12:00 noon and 1:30 p.m. to 4:30 p.m. You may call (850) 644-4260 or e-mail advising@psy.fsu.edu. The optional areas of emphasis include clinical psychology, cognitive psychology, developmental psychology, neuroscience, and social psychology. Students on the Panama City campus may specialize in applied behavior analysis and performance management. For the student wishing to study abroad, the department offers a summer program to study psychology in London. The Psychology London Program includes two 4000-level elective courses that are not offered at other FSU campuses and that emphasize cultural determinants of behavior. There also may be opportunities to study for a semester in one of FSU’s many study centers and programs abroad (including, but not limited to, Florence, Valencia, London, Panama, and Prague) while completing Liberal Studies requirements, one’s minor, and/or one’s foreign language requirement. For detailed information about the psychology major and the department, please refer to http://www.psy.fsu.edu.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in psychology satisfy this requirement by earning a grade of “C–” or higher in CGS 2060, CGS 2100, CGS 3406, COM 4470, COP 3014, or ISC 3313.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flspec.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:
1. BSC X0XX or BSC X20X or ZOO X010
2. PSY X012
3. PSY XXXX or any other lower level Psychology class within the Psychology Inventory (e.g., CLP, DEP, EAB, EXP, INP, PCO, PPE, and PSB prefixes)
4. STA XXXX

Admission Requirements for a Major in Psychology

Admission to the undergraduate program in psychology is based on a minimum GPA and the successful completion of prerequisite course requirements. A Psychology major who applies for readmission to the college must meet the degree requirements of the catalog in force on the date of readmission. Students whose psychology credits are ten years old or older will need to have their existing credits evaluated by the Department of Psychology to determine if any requirements need to be repeated to ensure that their knowledge of Psychology is current.

Note: While some of these requirements overlap with the state of Florida Common Program Prerequisites (listed above), there are additional requirements for formal admission to the psychology major. Please note that students who qualify for upper-division status and who wish to enter FSU as a Psychology major, must complete all of the following prerequisites prior to being accepted at FSU.

1. A minimum GPA of 2.8 in all college-level courses attempted
2. Meet requirements for progression to upper division status
3. Completion of the three courses listed below (each with a “C–” or better); these three courses should be taken as part of the liberal studies requirements or the AA degree:
   a. PSY 2012, General Psychology
   b. One biology course, with one of the following strongly preferred: BSC 1005, 2010, 2085, 2086, PCB 2099, PSB 2000, ZOO X010, or equivalent
   c. Any statistics course, with STA 2122 or STA 2171 strongly preferred. The Research Methods course (PSY 3213C), which is required of all majors, requires that STA 2122 or STA 2171 or equivalent be taken as a course prerequisite (or corequisite, if necessary). It is important that students see a psychology advisor for guidance as to when it is best to schedule these courses.

Requirements for a Major

Note: Please see the undergraduate link on the department’s Web site at http://www.psy.fsu.edu or contact the Psychology Advising Office at (850) 644-4260 for requirements.

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Please also see the section in this General Bulletin on University-wide undergraduate degree requirements regarding the following: multicultural, oral communication competency, and computer skills competency. For the Bachelor of Science (BS) degree in psychology, the requirements listed below, along with the requirements of the College of Arts and Sciences, must be fulfilled. For the Bachelor of Arts (BA) degree, nine additional semester hours in the humanities and history are required above and beyond the requirements for the BS degree.

The Department of Psychology offers a broad selection of courses in order for each student to select a curriculum appropriate for his/her needs. All students must fulfill the major requirements listed below, which ensure a balanced program of study. Any of the courses listed below, if presented by the student toward fulfillment of the major, must be completed with a minimum grade of “C–”. Additionally, no student who has accumulated more than four grades below “C–” (D+, D, D-, F, U) in psychology courses or prerequisite courses for the major taken for credit at Florida State University or elsewhere will be permitted to continue toward a degree with a major in psychology.

In an effort to maintain quality and to give students a direct way to affect the program, the Department of Psychology asks all of its graduating seniors to complete a survey to provide information about their experiences in and impressions of the department.

Class Attendance

The Department of Psychology enforces a strict first-day attendance policy. Students missing the first day of any class or laboratory will be dropped. For courses involving both a lecture and laboratory component, students missing the first day of either component will be dropped from the four-credit course.
Required Upper-Level Courses for a Psychology Major

**Note:** EXP 3202C, 3203C, 3422C, 3604C, PSY 3213C, and PSB 3004C are each four hour courses with both lecture and laboratory components. These courses previously were three hour lecture courses and separate one hour laboratory courses.

Thirty-six semester hours of psychology courses (not including General Psychology) are required for the major. At least eighteen of these thirty-six hours must be taken in residence at FSU. Courses taken outside the Department of Psychology will not count toward the Psychology thirty-six hour requirement. Courses with a WST prefix will not count toward the Psychology major, even though they are listed on the Psychology course search. Students pursuing a double major may use up to six hours of Psychology coursework toward another major, provided that major accepts those courses. Students should check with advisors in both majors on these course requirements. Students can use only one psychology course (either SOP 3004 or PSB 2000) to count toward both psychology major and liberal studies requirements. The thirty-six hours must include:

**Group 1: Research Methods.** STA 2122 or 2171 or equivalent is a prerequisite (or corequisite, for students with prior statistics credit). Group 1 totals four hours of credit.

**PSY 3213C** Research Methods in Psychology with Laboratory (4)

**Group 2: Neuroscience.** Students must take PSB 2000. If PSB 2000 is used for the biology requirement for entrance into the major, students will need to take one biology course while in the major (e.g., BSC 1005, BSC 2010, BSC 2085, BSC 2086; PCB 2099; PSB 2000; ZOO X010, or equivalent).

**Group 3: Social, Cognitive, Clinical, and Developmental Psychology.** Students must take one course in at least three of these four areas of psychology. The following list is a guide to the courses that qualify under each area; students can consult the advising office about whether other courses are eligible to count toward a particular area.

- **Clinical Psychology:** CLP 3305 (Clinical and Counseling Psychology), CLP 4134 (Abnormal Child Psychology), CLP 4110 (Eating Disorders), CLP 4143 (Abnormal Psychology), CLP 4392 (Psychology of Criminal Behavior), PPE 3003 (Psychology of Personality)
- **Cognitive Psychology:** EXP 3604C (Cognitive Psychology with Laboratory), EXP 4404 (Human Memory and Learning), EXP 4640 (Psychology of Language)
- **Developmental Psychology:** DEP 3103 (Child Psychology), DEP 4404 (Psychology of Adult Development and Aging)
- **Social Psychology:** SOP 3004 (Social Psychology), SOP 4722 (Prejudice and Stereotyping), SOP 3742 (Psychology of Women)

**Group 4: Lecture/Laboratory Courses.** Students must take one course from the list below. Each course contains a lecture and laboratory component.

**EXP 3202C** Sensation and Perception with Laboratory (4)

**EXP 3422C** Conditioning and Learning with Laboratory (4)

**EXP 3604C** Cognitive Psychology with Laboratory (4)

**Note:** If students use courses from Group 4 to fulfill requirements from Group 3, they can still count them toward the Group 4 requirements. By double-counting these courses, students will not be able to graduate with fewer hours in the major; rather, they will take more psychology electives (Group 6) to total thirty-six semester hours. Group 4 adds between zero and four hours of credit, depending on how many courses are double counted.

**Group 5: Careers in Psychology.** Students must complete Careers in Psychology (PSY 2023) by the end of Term 5 (first semester, junior year).

**Group 6: Psychology Electives.** Students must take enough psychology elective courses to total thirty-six hours of psychology courses (not including General Psychology). Group 6 adds between fourteen hours and twenty-one hours of credit.

a. Up to nine total hours of applied courses can count toward psychology electives. Courses in this category include directed individual study (DIS: PSY 4911-4914) and research topics (PSY 4920). These are taken by instructor permission only. Students can take a total of up to twenty-four hours of these applied courses (a combination of up to twelve hours DIS or up to eighteen hours PSY 4920) for university credit, but only nine hours total will count toward the psychology major.

b. Honors thesis work (PSY 4039r). Students can use honors thesis work to bring the total number of hours of applied courses that count toward the major to twelve hours maximum. For example, if a student took nine combined hours of PSY 4920 and PSY 4911, he/she can count an additional three hours of honors thesis work toward the major.

c. Psychology electives can include any psychology courses not listed above, as well as classes listed under Groups 2, 3, or 4 as long as they have not been used to fulfill any other requirements.

d. For students who have not taken any 4000-level psychology courses at Florida State University to fulfill Psychology requirements, at least three hours of psychology electives must be taken at the 4000-level at Florida State University. This cannot include PSY 4911-15, PSY 4920, or PSY 4039.

e. ISC 4244C (Computer Applications in Psychology with Lab) counts as a 4000-level psychology elective.

**Honors in the Major**

The Department of Psychology offers an Honors in the Major program to encourage talented students to undertake independent and original research as part of the undergraduate experience. Students conduct this research under the supervision of a psychology faculty member. Completing an honors project contributes greatly to one’s preparation for graduate studies in psychology and related fields. Students must have a 3.5 GPA in psychology courses and must be admitted into the University Honors in the Major Program prior to beginning this research. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin. Students should identify a psychology faculty mentor for supervision of their honors thesis research before applying to the University Honors in the Major Program.

**Requirements for a Minor in Psychology**

Twelve semester hours of psychology are required for a minor in psychology. One of these courses must be PSY 2012. General Psychology (3). Grades below “C–” will not be accepted for credit toward the minor. A minimum of six of the required semester hours must be completed at Florida State University. No courses used for satisfying the liberal studies requirements may count toward the minor, nor may any courses taken for an S/U grade. Also, courses with a WST prefix will not count toward the psychology minor.

**Areas of Special Emphasis**

Several areas of emphasis are available for students. The areas are clinical psychology, cognitive psychology, developmental psychology, neuroscience, and social psychology. The recommended curriculum includes coursework and DIS or Research Topics to provide students with a strong background in scientific method and content pertinent to their areas of particular interest.

**Bachelor’s Degree in Psychology at Panama City**

Students may complete the requirements for the Bachelor of Science (BS) in psychology at the Panama City campus. Classes typically are small and meet once per week for two and a half to three hours. Students should refer to the common course requirements for this degree program.

Unique to the Panama City campus is a master’s degree program with a specialty in applied behavior analysis. Students in this five-semester master’s program complete coursework and clinical practica in preparation to become board certified behavioral analysts.

For additional information about the psychology programs at the Panama City campus, visit [http://www.pc.fsu.edu](http://www.pc.fsu.edu).

The Panama City campus houses the Early Childhood Autism Program, where students in the master’s and undergraduate psychology programs are able to learn about autism treatment. For more information about this program, visit [http://pc.fsu.edu/ECAP/](http://pc.fsu.edu/ECAP/).

**Admission Requirements at Panama City**

Admission requirements for the Panama City campus are:

1. An AA degree from a Florida public institution, or satisfaction of the Florida State University liberal studies requirement
2. A minimum GPA requirement in all attempted courses: Check with a Panama City psychology advisor regarding current GPA requirement at Panama City, which may differ from the 2.8 required at the main campus.
3. Completion of the three courses listed below (each with a “C–” or better). These three courses should be taken as part of the liberal studies requirements or the AA degree:
Required Upper-Level Courses for a Psychology Major at Panama City

Graduation requirements for the psychology major are the same as those at the Tallahassee campus.

Note: For further information about admission, degree requirements, minor requirements, or the foreign language requirements for the bachelor’s degree program, contact the FSU Panama City campus at (850) 872-4750, or toll free at (866) 539-7588, or refer to http://www.pc.fsu.edu.

Undergraduate Courses

General Psychology

IFS 2036. Language: Body, Mind, and World (3). This course provides an examination of language from biological, psychological, and social perspectives, and considers ways that our knowledge of language can be deployed to tackle real-world issues in areas such as health, law, and education.

PSY 2012. General Psychology (3). This course is a broad overview covering important psychological principles and findings within major subfields of psychology, and the basic scientific methods employed. A “bio-psycho-social” approach is emphasized throughout so that all behaviors (including how we think, feel, and act) are discussed in terms of biological, psychological, and social determinants and consequences.

PSY 2023. Careers in Psychology (1). (S/U grade only.) Prerequisite: PSY 2012. This course is intended for psychology majors who are uncertain about their career goals. Students learn what career opportunities are available in psychology and related fields and what these careers involve. Students are encouraged to take this course early in their undergraduate years so they can pursue opportunities at FSU that will help prepare them for their chosen career paths.

PSY 2029. New Student Seminar in Psychology (1). (S/U grade only.) This course allows incoming freshmen and transfer students an opportunity to become familiar with the field of psychology, the Florida State University Department of Psychology, and techniques for achieving success in college.

PSY 3213C. Research Methods in Psychology with Laboratory (4). Prerequisites: Psychology major, PSY 2012, and STA 2122 or STA 2171 or equivalent. This course is an introduction to philosophical and methodological issues in the empirical study of psychology. Laboratory portion includes running simple experiments, analyzing data, and interpreting the results.

PSY 4604. History and Systems of Psychology (3). Prerequisites: PSY 2012, junior or senior standing. This course covers the philosophical and scientific antecedents of modern psychology and the history of psychology as an independent scientific discipline.

Behavioral Neuroscience

CBH 4304. Behavioral Genetics (3). Prerequisites: PSY 2012 and STA 2122 or STA 2171 or equivalent. This course examines the application of genetic methods to human and animal behavior. Genetic methods discussed include twin and adoption as well as molecular studies. Behaviors to be examined include personality, intelligence, and psychopathology.

EXP 3202C. Sensation and Perception with Laboratory (4). Prerequisites: PSY 2012 and PSY 3213C. This course provides students with a sound foundation in how sensory systems interpret the world. The course explores each of the primary sensory systems by defining the physical energy that is detected, examining how that energy is transduced into neural impulses, and sampling how aspects of that information are encoded to provide a representation of the world.

EXP 3203C. Animal Sensory Processes with Laboratory (4). Prerequisite: PSY 3213C. This course covers animal psychophysics and electrophysiology in the study of animal senses; lecture plus laboratory experiments.

EXP 3422C. Conditioning and Learning with Laboratory (4). Prerequisites: PSY 2000 and PSY 3213C. This course explores how experience affects the behavior and physiological functioning. It provides an overview of learning from a behavioral (classical and operant conditioning) and neuroscientific perspective.

PSB 2000. Introduction to Brain and Behavior (3). This course helps students understand basic nervous system mechanisms that underlie behavior and how systematic observation and experimentation are involved in constructing our understanding of these mechanisms. The course also conveys an appreciation for utilizing critical thinking and scientific knowledge when making important decisions. (Cannot be taken after PSY 3204C.)

PSB 3004C. Psychological Pharmacology with Laboratory (4). Prerequisites: PSY 2000 and PSY 3213C. This course is designed to provide a proper overview of the biological aspects of psychology (a.k.a. biopsychology, physiological psychology or behavioral neuroscience) as well as the necessary background for the upper level coursework in behavioral and cognitive neurosciences.

PSB 4240. Neurobiology of Brain Dysfunction (3). Prerequisites: PSY 2012 and PSB 2000 or PSB 3004C or three semester hours in biology. This course focuses on clinical neuroscience, which is the exploration of the neurobiological foundations of brain dysfunction and major diseases affecting the central nervous system, including mental health and mental illness.

PSB 4447. Clinical Psychopharmacology (3). Prerequisites: PSY 2002 and PSB 3004C or three semester hours in biology. This course covers neuropharmacology, including the behavioral effects of brain-mind altering drugs (i.e., psychotropic) and the biological action of drugs used to treat psychological disorders.

PSB 4461. Hormones and Behavior (3). Prerequisites: PSY 2012 and PSB 2000 or PSB 3004C or three semester hours in biology. This course provides students with current knowledge of interactions between hormones and behavior with emphasis on the brain regulation of hormone-behavior interaction in mammalian species including humans.

PSB 4641. Pain and Suffering (3). This course combines formal lectures, student-teacher discussions, and student presentations to understand what we currently know and how we can increase our knowledge about the multifaceted (genetic, biological, physiological, psychological, sociocultural) mechanisms underlying pain.

PSB 4710. Biology of Eating Disorders and Obesity (3). This course explores the biological and genetic factors that may increase susceptibility to develop an eating disorder or obesity. It also provides a survey of biological changes that arise in individuals with an eating disorder or obesity.

PSB 4731. Biopsychology of Sexual Behavior (3). Prerequisites: PSY 2012 and PSB 2000 or PSB 3004C or three semester hours in biology. This course studies biological and sociocultural determinants of sexual development particularly as it relates to sexual orientation, sexual preference, and purported gender differences in personality, cognition, and mental disorders.

Human Learning and Cognition

EXP 2020. Mind and Cognition (3). Prerequisite: Instructor permission. This course focuses on intelligent behavior in humans, animals, and machines and on the mechanisms underlying this behavior.

EXP 3604C. Cognitive Psychology with Laboratory (4). Prerequisite: PSY 3213C. This course covers contemporary approaches to human learning, memory, and higher mental processes; lecture plus laboratory experiments.

EXP 4404. Human Memory and Learning (3). Prerequisites: PSY 2012. This course introduces issues related to human memory and learning. Theories of memory, including memory systems, capacity and duration of memory, and basic memorial processes are discussed. Applied issues are covered, including disorders of memory (e.g., Alzheimer’s disease), repressed memories, and memory improvement.

EXP 4640. Psychology of Language (3). Prerequisites: PSY 2012. This course focuses on the mental processes involved in language use (e.g., speech, comprehension, conversation, and writing).

Clinical

CLP 3003. Psychology of Adjustment (3). Prerequisite: PSY 2012. This course covers human adjustments to the rapidly changing environment. Emphasis is on changes in mental and behavior patterns associated with normal and abnormal behavior that are CONTRASTED. Special emphasis on the determinants of adjustments.

CLP 3305. Clinical and Counseling Psychology (3). Prerequisite: PSY 2012. This course is a survey of the theory, research, and treatment procedures in the clinical process.

CLP 3314. Health Psychology (3). Prerequisite: PSY 2012. This course is a survey of health psychology and behavioral medicine. Topics include mind/body connections, health and disease, stress and coping, and psychology in medical settings.

CLP 4110. Eating Disorders (3). Prerequisites: PSY 2012. Junior or senior standing is strongly recommended. This course presents an in-depth investigation of eating disorders including anorexia nervosa, bulimia nervosa, and eating disorders not otherwise specified. Spanning topics such as biological bases of disordered eating, cultural and historical patterns in prevalence of eating pathology, and cognitive disturbances and personality features associated with eating disorders.
CLP 4134. Abnormal Child Psychology (3). Prerequisite: DEP 3103. This course focuses on the development, maintenance, assessment, and treatment of various psychological disorders of childhood and adolescence. Theoretical perspectives and research findings are discussed pertaining to anxiety, depression, autism, conduct disorder, attention-deficit disorder/hyperactivity disorder, and learning disabilities.

CLP 4143. Abnormal Psychology (3). Prerequisite: PSY 2012. Junior or senior standing is strongly recommended. This course focuses on the causes of personality disorders, diagnosis and treatment of mental illness, and developments in experimental psychopathology.

CLP 4182. Addictive Behaviors (3). Prerequisites: PSY 2012 and junior or senior standing. This course addresses the broad concept of “addiction,” emphasizing substance use problems, but touching on other gratifying compulsive behaviors such as overeating, gambling, and certain sexual deviations. Critical thinking about the available theoretical, empirical, and popular literature as a well as relevant public policy is the focus.

CLP 4343r. Current Issues in Clinical Psychology (3). Prerequisites: PSY 2012 and junior or senior standing. This course studies current issues in clinical psychology. May be repeated to a maximum of six semester hours.

CLP 4392. Psychology of Criminal Behavior (3). Prerequisite: PSY 2012. This course focuses on understanding the nature of behavior problems such as crime and violence. The course examines the psychodynamic, biological, and social/behavioral aspects of criminal behavior.

CLP 4500. Abnormal Psychology Field Experience (1). (S/U grade only.) Prerequisites: CLP 4143, PSY 2023, and instructor permission.

PSY 4302. Theory, Application, and Evaluation of Tests (3). Prerequisite: PSY 3213C. This course explores basic test and measurement theory which is essential in the construction, appropriate use, and evaluation of achievement, aptitude, intelligence, interest, and personality tests.

Life–Span Development

DEP 3103. Child Psychology (3). Prerequisite: PSY 2012. This course provides broad coverage of topics concerning the biological, social, and cognitive aspects of children.

DEP 3305. Psychology of Adolescent Development (3). Prerequisite: PSY 2012. This course examines recent research dealing with adolescents. Emphasis is placed on the influence of growth and on the role of cultural pressures on behavior.

DEP 4404. Psychology of Adult Development and Aging (3). Prerequisite: PSY 2012. This course focuses on the major psychological issues of adulthood and aging, including age-related changes in psychological, social, and physical functioning; interpersonal and family relationships; career development and retirement; mental and physical health; death and bereavement; and coping with the process of aging.

Social/Personality

PPE 3003. Psychology of Personality (3). Prerequisite: PSY 2012. This course is an introduction to methods, theory, and research in personality.

SOP 3004. Social Psychology (3). This course involves the scientific study of how people think about, influence, and relate to one another. Subjects include individual, cultural, behavioral, and biological levels of analysis.

SOP 3742. Psychology of Women (3). Prerequisite: PSY 2012. This course is a systematic study of research and theories about gender, including psychological differences and similarities between sexes.

SOP 3751. Psychology and the Law (3). Prerequisite: PSY 2012. This course is an examination of the interface between psychology and legal issues. Research on judges, juries, defendants, and police are among topics covered, as well as the role of psychologists in the legal system.

SOP 3782. Psychology of the African-American (3). Prerequisite: PSY 2012. This course is a critical examination of the psychosocial forces that shape and determine the unique behavior of African-Americans.

SOP 4214. Experimental Social Psychology (3). Prerequisites: PSY 2012 and SOP 3004. This course covers in-depth analysis of several central areas of social psychology with an emphasis on designing and carrying out research in these areas.

SOP 4224. Prejudice and Stereotyping (3). Prerequisites: PSY 2012 and SOP 3004. This course explores the nature of prejudice and stereotyping in our society using a social psychological perspective.

Behavioral–Performance Management

EAB 3703. Applied Behavior Analysis (3). This course introduces the basic principles of behavior and explores subjects to settings where techniques based on learning theory can be used therapeutically.

INP 3303. Business Psychology (3). Prerequisite: PSY 2012. This course focuses on topics such as vocational selection, psychological principles of supervision and leadership, emotional problems of employees, and stress and adjustment.

INP 3313. Behavior Analysis in Business and Industry (3). Prerequisites: EAB 3703, EXP 3422C, and PSY 2012. This course examines behavior principles as they are applied in business, industry, and government.

INP 4314. Advanced Topics in Performance Management (4). Prerequisites: INP 3313 and instructor permission. This course focuses on the implementation and analysis of performance management procedures via a project carried out in a business setting, motivation, compensation, and systems issues in performance technology.

Multiple Areas

ISC 3076. Science, Technology, and Society (3). This course examines interrelations among science, technology, and society. Science is considered as an enterprise in modern society that produces technological advances and new perspectives on reality.

PSY 3949r. Experiential Learning (0). (S/U grade only.) This non-credit experiential learning course offers students an opportunity to gain “real world” on-the-job work experience related to a specific academic field of study. Students must register for this course through the FSU Career Center.

PSY 4039r. Honors Work (1–6). May be repeated to a maximum of nine semester hours.

PSY 4910r. Augmented Research Topics (1–3). Prerequisite: PSY 2012. In this course, students participate in a research project in a specific area of psychological research. Participation is more advanced than in PSY 4920, and involves the generation of an extensive written product. The nature of the research and written product is specified by the directing professor.

PSY 4911r–4914r. Directed Individual Study (one to three hours each). (S/U grade only.) Prerequisite: Instructor permission. This course is a study on a selected topic as designated by the student and the directing professor. Each course may be repeated to a maximum of three semester hours.

PSY 4915r. Honors Advanced Research Topics (1–3). Prerequisites: PSY 2012, acceptance into the University Honors Program, instructor permission. This course involves participation in a research project on a selected topic as designated by the directing professor and the student. Participation includes more advanced work than PSY 4920 and a written product, the nature of which is detailed in a written contract between professor and student.

PSY 4920r. Research Topics (1–3). (S/U grade only.) Prerequisite: Instructor permission. This course consists of participation in a group research project on a selected topic as designated by the directing professor. May be repeated to a maximum of eighteen semester hours, with a maximum of six hours repeatable in a given semester.

PSY 4930r. Special Topics in Psychology (3). Prerequisite: PSY 2012. Topics vary. May be repeated to a maximum of twenty-four semester hours. May be repeated within the same semester.

PSY 4944r. Psychology Internship (1–3). (S/U grade only.) Prerequisite: PSY 2012. This course allows students to take an internship experience for course credit. Before registering for the course, students need to arrange the internship experience. The psychology advising office can provide guidance on the process of setting up the internship.

May be repeated to a maximum of twelve semester hours.

PSY 4970r. Honors Seminar (1). (S/U grade only.) Prerequisites: 3.2 overall GPA and 3.5 Psychology GPA. This course provides exposure to state-of-the-art research of psychology faculty to increase breadth in the discipline and to help select a thesis topic and research mentor. May be repeated to a maximum of four semester hours.

SCE 4939r. Seminar in Contemporary Science, Mathematics and Science Education (1). This course includes presentations of contemporary and interesting issues in science, mathematics, or academic methods. Content varies from semester to semester. May be repeated to a maximum of four semester hours.

Graduate Courses

General

PSY 5605. History and Systems of Psychology (3).

PSY 6045. Teaching Psychology Practicum (3).

Applied Behavior Analysis

EAB 5700. Basic Principles of Behavior (3).

EAB 5701. Basic Methods of Applied Behavior Analysis (3).

EAB 5708. Experimental Analysis of Behavior (3).

EAB 5710. Behavioral Analysis in Developmental Disabilities and Autism (3).

EAB 5711. Behavioral Analysis in Mental Health and Aging (3).

EAB 5721. Behavioral Analysis in Education and Performance Management (3).

EAB 5722. Behavior Analysis in Education (3).

EAB 5740. Behavior Analysis in Performance Management and Supervision (3).

EAB 5780. Ethical and Professional Issues in Applied Behavior Analysis (3).

EAB 5940. Applied Behavioral Analysis Practicum (3). (S/U grade only.)

EAB 5941. Applied Behavioral Analysis Practicum (3). (S/U grade only.)

EAB 5942. Applied Behavioral Analysis Practicum (3). (S/U grade only.)

EAB 6130r. Seminar on Skinner’s Theory of Behaviorism (3).

Clinical: Personality

CLP 5189. Diversity in Individuals and Cultures: Issues for Clinical Psychology (3).

CLP 5196. Techniques of Behavioral Change (3).

CLP 5375. Research Design and Methods in Clinical Psychology (3).

CLP 5475. Child Development and Psychopathology (3).

CLP 5624. Ethics and Standards of Professional Practice (3). (S/U grade only).

CLP 5941r. Psychology Clinic Practicum (1–3). (S/U grade only.)

CLP 5942r. Psychology Clinical Advanced Practicum (1–3). (S/U grade only.)

CLP 6169. Adult Development and Psychopathology (3).
CLP 6349r. Seminar in Clinical Theory (3).
CLP 6920r. Current Issues in Clinical Psychology (1). (S/U grade only.)
CLP 6944r. Clinical Practicum: Change of Behavior (1–3). (S/U grade only.)
CLP 6947r. Clinical Practicum: Change of Behavior (1–3). (S/U grade only.)
PSY 5325. Assessment I (3).
PSY 6940r. External Placement Practicum (1–6). (S/U grade only.)
PSY 6948r. Psychology Internship (1–9). (S/U grade only.)

Human Learning and Cognition
EXP 5508. Cognition and Perception (3).
EXP 5642. Psychology of Language (3).
EXP 6609r. Seminar in Higher Mental Processes (3).
EXP 6920r. Issues in Cognitive Science (1). (S/U grade only.)

Life-Span Development
DEP 5165. Developmental Psychology (3).

Psychobiology/Neuroscience
EXP 5406. Neurobiology of Learning and Memory (3).
EXP 5717. Animal Psychophysics (3).
PCB 5845. Cell and Molecular Neuroscience (4).
PSB 5056. Biological Psychology (3).
PSB 5057. Neuroscience Methods: Molecules to Behavior (2).
PSB 5077. Responsible Conduct of Research (2).
PSB 5230C. Vertebrate Neuroanatomy (4).
PSB 5341. Systems and Behavioral Neuroscience (3).
PSB 5347. Neuropharmacology (3).
PSB 6059r. Seminar in Physiological Psychology (3).
PSB 6070r. Current Problems in Neuroscience (2). (S/U grade only.)
PSB 6920r. Neuroscience Colloquium (1). (S/U grade only.)
PSB 6933r. Seminar in Neuroscience (1–2).

Social-Personality
SOP 5069. Personality and Social Psychology (3).
SOP 6920r. Current Issues in Social Psychology (1). (S/U grade only.)
SOP 6933r. Seminar in Social Psychology (3).

Multiple Area Courses
PSY 5900r. Individual Research Study (3–9).
PSY 5908r. Directed Individual Study (1–12). (S/U grade only.)
PSY 5916r. Selected Research Topics (3).
PSY 5917r. Supervised Research (1–5). (S/U grade only.)
PSY 5947r. Supervised Teaching (1–5). (S/U grade only.)
PSY 6919r. Seminar in Current Research Topics (1–3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

Reubin O’D. Askew School of
PUBLIC ADMINISTRATION AND POLICY

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY
Web Page: http://askew.fsu.edu/
Director: William Earle Klay; Professors: Berry, Bowman, deHaven-Smith, Feiock, Klay, Reid, Yang; Associate Professors: Brower, Lee; Assistant Professor: Berlan; Visiting Professors and Adjunct Faculty: Banner, Campos, Dilling, Gleason, Heffron-Casserleigh, Lavin, Long, Otte, Sample, N. Smith, Stansbury; Professors Emeriti: Chackerian, Grizzle, Sherwood

The Reubin O’D. Askew School of Public Administration and Policy is one of the most highly ranked schools of its type in the nation. The school does not offer a major to undergraduate students, but it does offer a minor as well as a concentration in the interdisciplinary program in social science (ISS). The school also offers a five-year bachelor’s/professional master’s degree program. Qualified undergraduate students in any major may begin graduate studies in the professional Master of Public Administration (MPA) degree and apply those credits toward their bachelor’s degree as well.

Combined BA or BS and Master of Public Administration (MPA) Degree Program

Qualified students in any undergraduate major may use up to twelve hours of free electives to take graduate courses in public administration that will count for completion of both the bachelor’s degree and the professional MPA degree. Completion of graduate courses through the combined program will also count for completion of an undergraduate minor in public administration. Qualified undergraduates who take public administration courses to satisfy major requirements in the bachelor’s degree programs in either political science or interdisciplinary social science may take up to twelve hours of graduate credit that will be counted for completion of both their bachelor’s degree major and the MPA degree. In addition, undergraduate students who take the PAD 3941, Public Service Internship course may waive the graduate internship course requirement. Normally, for inexperienced students, completion of the MPA degree requires completion of forty-five graduate credit hours following receipt of their bachelor’s degree. Students in the combined degree program who complete twelve graduate credits and an undergraduate internship prior to receipt of their bachelor’s degree will only need to complete thirty additional graduate credits to receive the MPA degree. For more information, refer to the Graduate Bulletin and the Askew School’s Web site at http://askew.fsu.edu/.

Acceptance to this pre-graduate program is competitive. Applications will only be considered from undergraduates who are entering their senior year, or who are honor students with junior status, and who have a cumulative undergraduate grade point average of at least 3.2 in all prior studies at FSU. Application forms are to be submitted to the school’s academic program coordinator. Accepted undergraduates may then enroll for up to twelve hours in courses that are either core or elective courses in the MPA program. Students accepted to the pre-graduate program should subsequently make formal application for admission to the graduate school during their senior year.

Requirements for a Minor and Undergraduate Certificates in Public Administration

A minor in public administration is available to students in all majors except political science, where undergraduate courses in public administration are applied directly to the political science major. For other students, the minor in public administration consists of four courses, totaling twelve semester hours passed with a grade of “C” or better. One of the following Department of Political Science courses may be substituted: state politics, urban politics, Florida government and the American presidency. Courses should be approved by the school in consultation with the student.

Topics in regularly scheduled undergraduate courses include:
- Administrative law
- American public service
- Budgets and finances in managing public affairs
- Civic and non-profit management
- Local government administration
- Emergency management
- Public administration in American society
- Selected topics in public administration

The school, upon application from the student, recognizes successful completion of requirements for the undergraduate minor with an undergraduate Certificate in Public Administration. If approved by the school, some transfer
Definition of Prefixes
PAD—Public Administration
POS—Political Science

Undergraduate Courses
PAD 3003. Public Administration in American Society (3). This introductory course in public administration studies the management of large-scale government bureaucracies including organization, career systems, and financing. It also focuses on the role of bureaucracies in modern society in the formulation and implementation of public policy.

PAD 3013. Futures Studies (3). This course applies futures studies perspectives and methods to the study of societal trends and conditions. Emphasis is on the development of anticipatory public policy.

PAD 3931c. Selected Topics in Public Administration (1–6). Topics may vary. May be repeated to a maximum of nine semester hours.

PAD 3941c. Public Service Internship (3–6). (S/U grade only.) Prerequisite: PAD 3003 or equivalent. This course consists of participant observation of the administration of policy in public service organizations. Internship with faculty supervision, on-campus seminars, discussion papers. May be repeated to a maximum of six semester hours.

PAD 4170. Nongovernmental Organizations in Development (3). This survey course is about international development NGOs. The course presents contemporary perspectives about NGOs, describes how NGOs operate, and introduces the challenges that their managers face and potential solutions for them.

PAD 4223. Budgets and Finances in Managing Public Affairs (3). This course focuses on concepts and practices in budgeting and financial processes such as planning, goal setting, and implementation.

PAD 4332. Strategic Leadership for Communities (3). This course will teach the principles and skills of strategically managing agencies and communities. Strategic planning, community visioning, and organizational assessments are covered. Managerial leadership roles and responsibilities in organizing community planning and change are also covered.

PAD 4372. Leadership and Communication in Emergency Management (3). This course is designed to introduce students to the fundamental concepts, theories, principles, and practices of public information and communication in a risk environment as well as effective leadership principles in an emergency management shared power context.

PAD 4374. Introduction to Terrorism: Preparedness and Response (3). This course reviews the contemporary evolution of terrorism and the current direction of global terrorism with regards to domestic policies and programs.

PAD 4375. Advanced Topics in Terrorism (3). Prerequisite: PAD 4374. This course reviews the contemporary evolution of terrorism and the current direction of global terrorism with regards to domestic policies and programs.

PAD 4382. Disaster Recovery and Mitigation (3). This course is designed to provide an overview of recovery and mitigation activities in the post-disaster environment. Focusing on the “Recovery Phase” initially, course materials examine the policy and planning mechanisms involved in short and long term rehabilitation of distressed communities. A similar examination from the “Mitigation Phase” is also made.

PAD 4391. Foundations in Emergency Management (3). This course is designed to introduce students to the fundamental concepts, theories, principles, and practices of emergency management.

PAD 4393. Emergency Management Programs, Planning, and Policy (3). This course examines functional demands that emergency managers should be aware of in crafting emergency management programs. Students investigate how public policy choices impact emergency planning and the consequences of a disaster event.

PAD 4395. Disaster Systems (3). Prerequisite: PAD 4391. This course introduces students to the fundamental concepts, theories, principles, and practices of the role of Incident Command (ICS) as an organizational structure, Emergency Operations Centers (EOC) in coordinating response and recovery to crises, and information and knowledge management systems that support disaster management.

PAD 4414. American Public Service (3). This course studies the structure and political culture of the civil service, evolution of government employment, current personnel policies, rights and responsibilities of public servants, and labor management relations. The impact of the public service on American society is explored.

PAD 4456. Quality Management Systems (3). This course addresses the theory, design, and implementation of quality management systems in public organizations compared to that in other sectors of the economy. Examines the need for and origins of quality management philosophies, techniques, transition strategies, case studies, and future scenarios.

PAD 4603. Administrative Law (3). This course studies the constitutions, statutes, executive orders, and procedures that control the administrative authorities of government. (Also offered by the Department of Political Science.)

PAD 4606. American Legal Systems (3). This course is an overview of American legal systems. Topics include the interrelationships between law and social sciences, the nature of legal systems, how to read and analyze a court case, interpret statutes, and analysis of important legal controversies.

PAD 4712. Information Resource and Communication Management (3). This course in communications, information resource management, and information technologies is aimed at administrators in the public and not-for-profit sectors. It deals with the basics of information technologies, organizational and other communications or information exchange networks; the interaction of government and non-profits with clients, citizens, other agencies or institutions; and information security.

PAD 4803. Local Government Administration (3). This course introduces students to administrative problems and processes in municipal, county, and special district governments.

PAD 4833. International and Comparative Disaster Management (3). This course discusses practical and theoretical issues associated with international disaster management. Risk, hazards, and disasters are addressed from a global perspective with particular emphasis placed on the differences in key issues between developing and developed countries.

PAD 4844. Public Health and Emergency Management (3). This course is designed to provide an overview of international public health events that have either evolved into disasters, or are born of disasters. In addition, this course looks at preventing and preparing for public health disasters. A variety of threats and case studies are reviewed with an evaluation of future threats. Additionally, epidemiology and the discovery and reporting of events are reviewed.

PAD 4890. Homeland Security: Policy and Practice (3). This course is designed to introduce students to the concept and application of homeland security policies and their influence on U.S. domestic policy.

PAD 4891. Non-Profits, NGO’s and Disaster (3). This course is designed to introduce students to the fundamental concepts, theories, principles, and practices in emergency management relationships with NGO’s and non-profit organizations.

PAD 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

PAD 4936r. Special Topics in Public Administration (3). This course explores best practices and theories regarding emotional intelligence, communication, behavior and ethics in professional Emergency Management. At the conclusion of this course, students have the knowledge and skills necessary to be successful in a professional emergency management setting. May be repeated to a maximum of nine semester hours.

POS 4413. The American Presidency (3). This course focuses on the roles of the American president, especially their relationship to government administration. (Also offered by the Department of Political Science.)

Graduate Courses
PAD 5035. Policy Development and Administration (3).

PAD 5041. Public Service Ethics (3).

PAD 5050. The Profession of Public Administration (3).

PAD 5106. Public Organizations (3).

PAD 5142. Managing the Nonprofit Organization (3).

PAD 5173. Nongovernmental Organization (3).

PAD 5174. The Independent Sector (3).

PAD 5206. Fundraising and Fund Development (3).

PAD 5208. Budget and Finance in Nonprofit Organizations (3).

PAD 5227. Managing Public Financial Resources (3).

PAD 5275. Political Economy of Public Administration (3).

PAD 5327. Public Program Evaluation (3).

PAD 5335. Strategic Leadership for Communities (3).

PAD 5373. Leadership and Communication in Emergency Management (3).
For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
Students applying for admission to either the Public Safety and Security programs or the Underwater Crime Scene Investigation Certificate must apply through Florida State University’s Panama City Office of Admissions and Records online at http://pc.fsu.edu/Admissions.

Academic Performance and Retention

A grade of “C–” or above is required for credit in all core courses. A student who accumulates more than four unsatisfactory grades (U, F, D–, D, D+) in courses taken for college credit at FSU or elsewhere after admission to the program, whether repeated or not, will not be permitted to continue or graduate as a major in the College.

Degree Requirements

General graduation requirements include:

- A minimum cumulative grade point average of 2.0 on a 4.0 scale in all work attempted.
- Completion of the Composition and Mathematics requirements.
- Completion of the Oral Competency, Computer Skills Competency, and Multicultural course requirements.
- Satisfaction of the state of Florida’s foreign language requirement. Credit hours required to satisfy this requirement are in addition to the sixty-six (Post AS) or sixty (Post AA) required.
- Completion of at least twenty-seven of the Public Safety and Security credit hours at FSU: completion of forty-five hours at the 3000/4000 level; and, completion of the last thirty hours for the degree at FSU.

Additional graduation requirements will depend on whether the student was admitted as an AS to BS student, as an AA transfer student from a Florida public college, or as a non-Florida AA transfer student. The six extra hours for the AS to BS degree are prescribed by the SBE for articulation from an AS in Criminal Justice Technology to BS in Criminal Justice.

Admitted to the articulated AS to BS program— one hundred thirty total hours are required with sixty-six hours beyond the specified AS degree requirements. The ten total extra hours for the AS to BS degree (four extra for AS and six extra for BS) are prescribed by the SBE for articulation from an AS in Criminal Justice Technology to BS in Criminal Justice. The post AS credit hours are to be distributed as follows:

- Forty-eight credit hours in Public Safety and Security with specific requirements of:
  - Twelve hours in core courses, taken at FSU, and completed with a “C” or better,
  - Thirty-three hours in restricted electives,
  - Three hour integrated capstone course,
  - Eighteen hours in liberal studies to complete the thirty-six hour general education requirement.

Admitted with an AA from a Florida public college— one hundred twenty total hours are required. The post-AA credit hours are to be distributed as follows:

- Forty-eight credit hours in Public Safety and Security with specific requirements of:
  - Twelve hours in core courses completed with a “C” or better,
  - Thirty-three hours in restricted electives and/or required major courses,
  - Three hour integrated capstone course,
  - Twelve hours in a minor or elective hours approved by the College.

Admitted as a transfer student—one hundred twenty total hours are required. The remaining hours are to be distributed as follows:

- Forty-eight credit hours in Public Safety and Security with specific requirements of:
  - Twelve hours in core courses completed with a “C” or better,
  - Thirty-three hours in restricted electives and/or required major courses,
  - Three hour integrated capstone course,
  - Twelve hours in a minor or elective hours approved by the College.

In addition, transfer students must complete FSU’s general education requirements, either as part of the twelve hours of unrestricted electives or in addition to them.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in public safety and security satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

Internships

A variety of internships are available at the local, state, and federal levels. Students can choose from the fields of law enforcement, courts, corrections, criminal justice planning, criminological research, and private sector opportunities. Internships are available for juniors and seniors who have completed the core courses and have satisfied the CLAS requirement. The intern receives a satisfactory/unsatisfactory (S/U) grade, and full credit is given upon successful completion of both the academic component and work hours.

Students are advised that information pertaining to all matters of public record, such as arrests and convictions, may be required by the agencies accepting interns. Although a reasonable effort is made to place a student in an internship, FSU Panama City will not be liable if a student cannot be placed. Students are responsible for all living and transportation expenses during internship experiences.

Certificates

The College of Applied Studies, Public Safety and Security, offers an Underwater Crime Scene Investigation (UCSI) Certificate that may be earned independently or as part of a bachelor’s or master’s degree. For more information, visit http://pc.fsu.edu/Academics/Underwater-Crime-Scene-Investigation-UCSI or contact Dr. Tom Kelley by e-mail at kelley@pc.fsu.edu.

Student Honor Society

Garnet Key Honor Society of the Panama City campus, founded in 1986, recognizes students primarily for service and scholarship, but also for spirit and leadership. Activities are generally service projects and functions for the Panama City campus. Applicants must have completed fifteen semester hours at that campus with a GPA of 3.5 or higher. For more information, contact Cristina Rios by e-mail at crios@pc.fsu.edu.

Student Activities

The Scuba, Hyperbaric, and Recreational Club (SHARC) Dive Club was established to coordinate and facilitate SCUBA training due to FSU Panama City student interest in scientific and recreational diving. Membership is open to all regardless of certification status. Certified divers that are members have access to club resources such as regulators, dive lights, and buoyancy compensators. For more information, contact Darren DeDario by e-mail at sharcsfspc@gmail.com, contact the FSU Panama City Dive Locker at (850) 770-2206, or visit the club’s Web site at http://pc.fsu.edu/Students/Student-Organizations/SHARC.

Definition of Prefixes

CCJ—Criminology and Criminal Justice
CJC—Corrections
CJE—Law Enforcement
CJJ—Juvenile Justice
CJL—Law and Process
DSC—Domestic Security
ISC—Interdisciplinary Sciences

Undergraduate Courses

CCJ 3024. The Criminal Justice System (3). This course provides an advanced overview of principles and practical applications of criminal law, criminal procedure, and criminological theory. Special emphasis is placed on how the components of the criminal justice system: the prosecutorial and defense function, the judiciary, and the field of corrections are synthesized into a functioning process of public safety and security.

CCJ 3032. Crime in Media (3). This course provides students with an understanding of the impact of the media on crime, criminals, the criminal justice system, and the general public. The focus of this course is the historical impact of media and its influences on the outcomes of both routine and sensational cases within the American criminal justice system and how media reporting affects the policy making processes and the social definitions of crime.

CCJ 3071. Computer Applications in Criminal Justice (3). This course is designed to prepare the student for the use of IT in various professions within the Criminal Justice community. This includes, the fundamentals of computing, the use of data processing, word processing, e-mail, Computer Automated Dispatch, Records Management Systems, use of the Internet and IT Security protocols.
CJE 413L. Impression and Pattern Evidence Lab (2). Corequisite: CJE 4135. This course teaches forensic techniques used by crime scene professionals to detect, document, and preserve trace evidence commonly encountered in violent crimes. Students become familiar with the forensic application and collection of evidence, as well as documentation protocols.

CJE 4220. Introduction to Forensic Entomology (3). This entry-level course provides fundamentals necessary to prepare the student in successfully completing a series of courses leading to a graduate certificate in medicocriminal forensic entomology. Instruction covers a broad range of topics in basic entomology as related to forensic science.

CJE 4221. Forensic Entomology: Field Collection Techniques (3). Prerequisite: CJE 4220. This course provides instruction on entomological equipment, supplies, techniques, and documentation protocols for medico-criminal forensic entomology. Equipment and methods for acquiring weather, climatological and other relevant data are covered as well.

CJE 4222. Forensic Entomology: Case Studies and Legalities (3). Prerequisite: CJE 4220. This course delves into the legal aspects of medicocriminal entomology with the aim of preparing the student to present entomological evidence in a court of law. Information is covered on how to present evidence in an admissible manner using expert witnesses. The importance of establishing "chain of custody" and pitfalls with presenting evidence are explored through case study reviews.

CJE 4223. Forensic Entomology: Taxonomy and Post Mortem Interval (3). Prerequisite: CJE 4220. This course encompasses the identification of field-collected specimens, analyzing meteorological and crime scene temperature data; and, calculating estimates of post-mortem interval (i.e., time since death). Students also learn about using dichotomous keys, microscopy, and entomological equipment for specimen storage and analysis.

CJE 4241. Trace and Biometric Evidence (1). Prerequisites: CJE 4762 and CJE 4762L. This course teaches the properties of trace evidence that are most useful in forensic comparison. It also covers biometric identification through biological characteristics that can be used for recognition.

CJE 4241L. Trace and Biometric Evidence Lab (2). This course teaches microscopy as it relates to trace evidence and the different types of trace evidence and techniques that are used to recover, store, and analyze the evidence using various techniques like microanalysis, gas chromatography and mass spectrometry. It also looks at the quickly evolving area of biometrics and how computer software is used to make identifications in areas like fingerprints and DNA.

CJE 4410. Community Policing (3). This course introduces students to the dynamics of community policing from both a theoretical and practical perspective. Emphasis is on both understanding the origins of community policing and practical application through the use of problem solving and partnership strategies.

CJE 4411. Criminal Investigation: Theory and Practice (3). This course gives the student an opportunity to explore and understand investigative facets of law enforcement service delivery. The students focus on the historical relevance of the investigative process, the evolution of investigation, the procedural guidelines for effective investigations, and the mechanics of the modern day investigative process.

CJE 4415. Conduct of Investigation (3). Prerequisite: CJE 4411. This course builds on the Criminal Investigations: Theory and Practice course to provide students the techniques in applying investigative procedures within legal constraints; the use of specialized documentation and analyses required in the investigation of injury and death, crimes against persons and property; and the combination of evidence from crime scenes, medico-lawsuit, and medicocriminal; then process examinations, records, and interviews to produce legal proof and articulate its reliability.

CJE 4638. Forensic Death Investigation (2). Prerequisites: CJE 4762 and CJE 4762L. This advanced course focuses on all aspects of the initial investigation on sudden and violent death scenes to include special procedures and techniques to be evaluated in a major crime investigation. The course introduces the procedures and technologies used to document the different modes of death. Students become familiar with the forensic application and collection of evidence, as well as documentation protocols.

CJE 4638L. Forensic Death Investigation Lab (2). Corequisite: CJE 4638. This advanced course focuses on all aspects of the initial investigation on sudden and violent death scenes to include special procedures and techniques to be evaluated in a major crime investigation. The course introduces the procedures and technologies used to document the different modes of death. Students perform various documentation protocols with the forensic application and collection of evidence.

CJE 4655. Crime and Accident Scene Imaging and Reconstruction (1). This course teaches the principles of basic oceanography, physics, and physiology as they relate to exposure to compressed gas environments and how to deduce safe parameters from those environments. Students become familiar with the forensic application and collection of evidence, as well as documentation protocols.

CJE 4710. Applied Probability for Research and Investigation (3). Prerequisite: CCI 4744. This course explores how probability and statistics underlie the decisions of researchers and those who analyze and evaluate the expression of probabilistic and statistical information being used to support such decisions. It provides an overview of techniques for combining multiple forms of evidence to achieve proof are examined.

CJE 4744. Evidential Reasoning for Research and Investigation (3). This course introduces the forensic science community to probability and statistical concepts and how they relate to crime, crime-prevention and solvability. The student is also introduced to the technical and scientific aspects of forensic science and the various tools and techniques used in forensic science.
CJE 4733. The Intelligence Process (3). Prerequisites: CJE 3732, MAC 1105, and CCJ 4710 or STA 2023 or STA 2122. This course covers a number of structured analytic techniques that provide an objective approach to conducting the intelligence process. The techniques presented in this course are used to process all-source intelligence which is applicable to law enforcement intelligence, counterterrorism, tactical military, and competitive intelligence analysis.

CJE 4734. Intelligence Collection Strategies (3). Prerequisites: CJE 3732 and STA 2023. This course examines the formal intelligence collection process with emphases on Open Source and Human Intelligence. Students become familiar with the process, developing comprehensive strategies for the production of intelligence by satisfying levied requirements using a variety of intelligence sources available to local public safety and security personnel.

CJE 4762. Forensic Science in Investigation (3). This course combines various theories of the conduct of crime with knowledge of how physical evidence is produced during the commission of a crime to produce information that enables the investigation and prosecution of criminal activity. The course emphasizes decision-making in forensic science examinations and evaluates their reliability.

CJE 4762L. Forensic Science in Investigation Laboratory (2). Corequisite: CJE 4762. This laboratory applies various techniques for the examination of physical materials generated during the commission of a crime in order to produce information required to detect and investigate criminal activity. This laboratory emphasizes implementation of protocols and the calculation of error rates. Additional equipment fee required.

CJE 4763. Scientific Underwater Investigation (3). Prerequisite: CJE 3761. This course builds upon the Introduction to Underwater Investigation course by providing the technology to collect data in an underwater environment according to the scientific method. The course delineates the similarities and differences of investigative techniques used in forensic science and other science disciplines that function underwater.

CJE 4763L. Scientific Underwater Investigation Laboratory (1). Prerequisite: CJE 3761L. Corequisite: CJE 4763. This laboratory builds upon the Introduction to Underwater Investigation Laboratory course by providing the tools and techniques to collect data in an underwater environment for prolonged periods of time. The underwater data collection techniques use traditional underwater technology adapted from forensic science and various other scientific disciplines. Additional equipment fee required.

CJE 4764. Underwater Crime Scene Methodology (3). Prerequisites: CJE 4762 and CJE 4763. This course synthesizes the various theories for the conduct of crime with the knowledge of how physical evidence is produced during the commission of a crime on or under the water in order to produce information that enables the investigation and prosecution of criminal activity.

CJE 4764L. Underwater Crime Scene Methodology Laboratory (1). Prerequisites: CJE 4762 and CJE 4763. Corequisite: CJE 4764L. This laboratory applies various techniques for the examination of physical materials generated during the commission of a crime on or under the water in order to produce information that enables the investigation and prosecution of criminal activity. Additional equipment fee required.

CJE 4765. Underwater Crime Scene Investigation (3). Prerequisite: CJE 4764. This course combines the various analytical underwater examinations into a holistic investigation process designed to locate and detect persons and physical evidence involved in, or victims of, crimes in or on the water. Emphasis is placed on the theory of the technology and the scientific decision-making required for its optimum application.

CJE 4765L. Underwater Crime Scene Investigation Laboratory (1). Prerequisite: CJE 4764L. Corequisite: CJE 4765. This laboratory course applies methodology based on advanced technology to enhance the location and detection of physical evidence used, or intended for use, in the commission of underwater crimes. Emphasis is placed on the use of the Incident Command System and the UCSI Process for management of a crime scene investigation. Additional equipment fee required.

CJJ 3013. Youth Culture and Crime (3). This course explores the unique characteristics of juvenile offending and victimization by examining the cultural traits that differentiate youths from society in general. In doing so, the class investigates various distinct subcultures globally and the relationship between specific forms of offending and subcultural traits.

CJL 3133. Evidence and Criminal Procedure (3). This course covers the structures and functions of state and federal court systems with emphasis on the specific roles and duties of the participants in criminal trials. Special emphasis is placed on the rules of evidence applicable in criminal cases and the consequences of not following these rules. Examination and analysis of actual appellate court cases utilizing the law school technique of case briefing will be used as a basis for applying the concepts studied.

DSC 3013. Homeland Security and Criminal Justice (3). This is an introductory course covering the relationship of homeland security and criminal justice agencies as it impacts public safety and security. Students are introduced to salient issues regarding the interconnection of the homeland security mission and the roles of criminal justice agencies at the local, state, and federal levels in dealing with both terrorist threats and with natural and man-made disasters.

ISC 4930r. Special Topics in Applied Studies (1–3). This course allows for special topics in Interdisciplinary Studies to be taught, focusing on Applied Methods and Theory, specific to the concept of Applied Studies and Science, Technology, Engineering, and Mathematics. May be repeated to a maximum of twelve semester hours.

Graduate Courses

CCJ 5707. Managing Intelligence Analysis Functions (3).

CCJ 5616. Profiling Criminal Behavior (3).

CCJ 5748. Advanced Evidentiary Reasoning for Criminal Intelligence (3).

CJE 5225. Introduction to Forensic Entomology (3).

CJE 5226. Forensic Entomology Field Collection Techniques (3).

CJE 5227. Forensic Entomology: Case Studies and Legalities (3).

CJE 5228. Forensic Entomology: Taxonomy and Post Mortem Interval (3).

CJE 5743. Introduction to Public Safety and Leadership (3).

CJE 5744. Strategic Planning in Public Safety and Leadership (3).

CJE 5745. Use of Force in Public Safety and Security (3).

CJE 5766. Forensic Science in Investigation (3).

CJE 5766L. Forensic Science in Investigation Laboratory (2).

CJE 5767. Scientific Underwater Investigation (3).

CJE 5767L. Scientific Underwater Investigation Laboratory (1).

CJE 5768. Underwater Crime Scene Methodology (3).

CJE 5768L. Underwater Crime Scene Methodology Laboratory (1).

CJE 5769. Underwater Crime Scene Investigation (3).

CJE 5769L. Underwater Crime Scene Investigation Laboratory (1).

DSC 5595. Human Intelligence Collection (3).

ISC 5930r. Special Topics in Applied Studies (3).
Program in RECREATION, TOURISM AND EVENTS

COLLEGE OF APPLIED STUDIES

Web Page: http://pc.fsu.edu/Academics/Undergraduate-Programs/Recreation-Tourism-Events

Program Coordinator: John Crossley; Associate In: Prince; Assistant In: Trafford

The Recreation, Tourism and Events program offers courses leading to the Bachelor of Science (BS) degree in Recreation, Tourism and Events. The degree is designed to prepare individuals for professional positions in such settings as special events management, resort and commercial recreation, corporate and employee recreation, public park and recreation, youth-serving and military agencies, campus recreation, and travel and tourism. With a bachelor’s degree from this program, students may qualify for employment as event and recreation program supervisors/managers/coordinators, facility managers, adult and youth sports supervisors, activities directors, special events coordinators, tourism services managers, and guest service coordinators. For more information, contact the Program Coordinator, Dr. John Crossley, by e-mail at jcrossley@pc.fsu.edu or by phone at (850) 770-2239.

Advising

Florida State University Panama City provides academic advising to students interested in pursuing coursework in the College of Applied Studies. For more information, contact Angie Sexton by e-mail at asexton@pc.fsu.edu or by phone at (850) 770-2178.

Degree Requirements

To earn a bachelor’s degree in Recreation, Tourism and Events, students must successfully complete the following: (1) twenty-eight semester hours of required coursework: LEI 3004, 3312, 3420, 3435, 3843, 4524, 4551, 4602, 4881, 4930; (2) two semester hours of fieldwork: LEI 4921r; (3) fifteen semester hours of internship: LEI 4940r; (4) fifteen semester hours of approved specialization coursework. Students must be certified in First Aid/CPR prior to enrolling in LEI 4940.

To be eligible for the internship, which is scheduled the last semester of the program of study, students must have earned a 2.0 cumulative GPA in all college coursework and a 2.0 GPA in all core courses bearing the prefix LEI. A minimum grade of “C–” or better must be earned in all program coursework.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in recreation and leisure services satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvec.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Recreation, Tourism and Events – Professional

1. CGS X060 or CGS X100

Requirements for a Minor in Recreation, Tourism and Events

A minor in Recreation, Tourism and Events requires twelve hours of coursework. The minor consists of LEI 3004 and any three of the following courses: LEI 3312, LEI 3420, LEI 3435, LEI 3843, LEI 4524. A grade of “C–” or better must be earned in each course counted toward the minor.

Certificates

The College of Applied Studies offers an online graduate certificate program in Event Management. For more information, contact the Program Coordinator, Rosemary Prince, by e-mail at rprince@fsu.edu or visit http://pc.fsu.edu/Academics/Graduate-Certificate-in-Event-Management.

University Honors and Honor Societies

The College of Applied Studies encourages eligible students to participate in university honors and in the honors in the major program. For a list of University-wide honor societies officially recognized by Florida State University, requirements and other information, see the “University Honors Office and Honor Societies” chapter of the General Bulletin. College-wide honor societies officially recognized by the College of Applied Studies are listed below, followed by the discipline-specific societies. For complete details of activities and membership requirements, contact the individual organizations.

Leadership/Scholar Societies

Garnet and Gold Scholar Society facilitates involvement and recognizes the engaged, well rounded student who excels within and beyond the classroom in the areas of Leadership, Internship, Service, International, and Research. For more information, visit http://garnetandgoldscholar.fsu.edu or contact the FSU Panama City campus advisor Jennifer Scoggins-Polous by e-mail at jsco@pc.fsu.edu.

Garnet Key Honor Society of the Panama City campus, founded in 1986, recognizes students primarily for service and scholarship, but also for spirit and leadership. Activities are generally service projects and functions for the Panama City campus. Applicants must have completed fifteen semester hours at that campus with a GPA of 3.5 or higher. For more information, e-mail crios@pc.fsu.edu.

Definition of Prefixes

LEI—Leisure

Courses for Recreation, Tourism and Events Majors

LEI 1181. Leisure and Recreation: A Cross-Cultural Approach (3). This course is an examination of the leisure and recreation behaviors of people in different cultures. The cultural, political, social, and economic influences on leisure and recreation behaviors are examined.

LEI 1264. Backpacking (1). (S/U grade only.) This is an introductory course designed to prepare participants for backpacking in low-level terrain in a safe and environmentally sound manner. The course covers equipment, clothing, food preparation, route selection, safety, and risk management, environmental practices, and “no trace” camping.

LEI 1267. Canoeing/Kayaking (1). (S/U grade only.) This course is designed to give students an applicable knowledge of the sport/activity of canoeing and kayaking, as well as develop students’ physical and mental ability to learn and execute canoeing and kayaking skills. This is a beginner flat water and Class 1 level canoe course.

LEI 1269. Rock Climbing I (1). (S/U grade only.) This is a basic rock-climbing class. The material covered is for students with little or no experience or knowledge of rock climbing. This class is experiential in nature therefore, being present and active in class is necessary. Skills may include but are not limited to knot-tying, belaying, bouldering, safety concerns, route reading, and technique.

LEI 3004. Introduction to Recreation, Tourism and Events (3). This course provides an introduction to the nature and diversity of recreation pursuits and the social and cultural forces that influence leisure related choices. Students examine the various ways in which recreation is organized for delivery by professionals working in the recreation and event industry. Career opportunities in recreation and park and event management are explored.

LEI 3140. History and Philosophy of Recreation, Leisure and Play (3). This course introduces the philosophical foundation of leisure, recreation, and play, and traces the major historical events and perspectives in recreation and leisure through the present time. Current trends and issues are discussed as they relate to social, economic, environmental, and public policy factors.

LEI 2265r. Challenge Course Facilitation Training (1–4). This course provides the student with the knowledge and skills to lead new games and field games and to facilitate group initiatives, and low and high ropes challenge courses. The student learns to facilitate diverse groups to develop teamwork, and leadership skills, improve group dynamics, increase trust and improve communication, and direct a wide variety of challenge course activities. The course stresses safety, particularly in the use of ropes course apparatus, equipment, sequencing, and processing. The challenge-by-choice philosophy is followed throughout. This course comprises four separate components, which must be taken in sequence but may be taken in subsequent semesters.

LEI 2266. Outdoor Adventure Education (3). This course includes education in teaching leadership and programming skills in outdoor adventure, including hiking, camping, backpacking, kayaking, canoeing, survival skills, orienting skills, group dynamics, safety, risk management, accessibility, and environmental ethics.
LEI 3312. Introduction to Special Events (3). This course introduces students to special event planning and prepares them to design and implement a variety of special events for leisure, recreation, and park organizations, community organizations, non-profit agencies, associations, corporations, and other organizations.

LEI 3403. Applied Recreation Programming (1). Prerequisites: LEI 3004 and LEI 3420. Corequisite: LEI 3435. This course is designed to provide students with a comprehensive experience in recreation program implementation.

LEI 3420. Recreation Activities Leadership (3). This course includes selection, development, and understanding of recreation activities and how specific activities meet the needs of individuals. This course develops leadership skills and the ability to plan and lead activities appropriate to age, interest, ability, and culture.

LEI 3435. Recreation Program Design (3). Pre- or corequisite: LEI 3004. This course is designed to facilitate the understanding of principles and methods of recreation program design and operation. Students apply the processes of goal and objective technology, and selection and sequencing activities in creating a program design within the recreation, tourism and events field.

LEI 3701. Human Development and Functioning in Leisure (4). This course examines the role of human development and functioning for the entire age spectrum, including disabilities.

LEI 3843. Commercial Recreation and Tourism (3). This course is designed to introduce the concepts, principles, and practices of commercial recreation and tourism.

LEI 3949r. Cooperative Education Work Experience (0). (S/U grade only.)

LEI 4313. Special Event Resource Development and Fundraising (3). This course supplies students with an understanding of the methods for obtaining and managing the resources required for the operation of special events, including fundraising activities and volunteers.

LEI 4314. Event Operations and Management (3). This is an advanced course in event planning and management. Focus is placed on managerial aspects such as financing, economic impact, promotion and legal issues.

LEI 4524. Leadership and Supervision in Recreation, Tourism and Events (3). Prerequisites: LEI 3004, LEI 3140, LEI 3435, and LEI 3403. Corequisite: LEI 4930. This course introduces the concepts, principles, and best practices for leading and supervising professional employees of recreation, sport, and leisure organizations.

LEI 4551. Administration of Leisure Service Systems (3). Prerequisite: LEI 3435. This course introduces students to the fundamental concepts, theories, principles, and practices of administering, marketing, and budgeting for leisure service agencies.

LEI 4561. Special Event Promotions (3). This course presents students with an overview of standard event promotional techniques including online marketing strategies.

LEI 4602. Planning and Maintenance of Facilities in Leisure Systems (3). This course provides basic information for the planning and maintenance of leisure areas and facilities.

LEI 4816. Leisure Education (3). This course focuses upon developing an understanding of the goals, objectives, and philosophy of leisure education. It also includes the methods and techniques utilized to educate for leisure as well as planning and implementing leisure education in a variety of settings.

LEI 4831. Assessment, Research and Evaluation in Recreation, Tourism, and Events (3). Prerequisite: LEI 3435. This course enables students to research, evaluate the functions, participant interests, and behaviors in recreation, tourism and event organizations.

LEI 4906r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

LEI 4921r. Fieldwork in Recreation, Tourism and Events (1–3). (S/U grade only.) This course is designed to provide the student with an opportunity to gain practical experience by working in an organized recreation, parks, tourism or special events agency. May be repeated to a maximum of six semester hours.

LEI 4930. Senior Seminar in Recreation, Tourism, and Events (1). Prerequisite: LEI 3141. This seminar is designed to introduce the current problems facing the leisure profession and the practitioner and to teach students to effectively discuss issues in a seminar setting.

LEI 4932r. Special Topics in Leisure Services (3). In this course, current topics in leisure services are studied in depth. May be repeated to a maximum of nine semester hours.

LEI 4940. Internship in Recreation, Tourism and Events (15). Prerequisite: Must be certified in First Aid/CPR. This course is a full-time experience in a leisure agency under the supervision of a professional in that field.

**Graduate Courses**

LEI 5171. Philosophical, Social, and Behavioral Foundations of Leisure (3).

LEI 5185. Current Issues in Leisure (1).

LEI 5316. Event Planning Management (3).

LEI 5317. Event Management Issues in Ethics and Risk Management (3).

LEI 5530. Problems of Staff Development (3).

LEI 5563. Event Marketing (3).

LEI 5815. Leisure Education (3).

LEI 5889. Research in Leisure Services (3).

LEI 5908r. Directed Individual Study (1–3).

LEI 5915r. Supervised Research (1–4). (S/U grade only.)
Department of RELIGION

COLLEGE OF ARTS AND SCIENCES

Web Page: http://religion.fsu.edu/

Chair: Aline Kalbian; Professors: Corrigan, Cuevas, Dupuisgrent, Goff, Kalbian, Kavka, Kelsay, Porterfield, Twiss; Associate Professors: Day, Erndl, Gaiser, Hellweg, Kelley, Levenson, Yu; Assistant Professors: Buhman, McVicar; Professors Emeriti: Carey, Jones, Moore, Rubenstein, Sandon

Since its founding in 1965, the Department of Religion at Florida State University has been a leader among America’s public institutions in the academic study of religion. The courses offered by the department examine the diverse array of religious cultures around the globe from historical, ethical, philosophical, cultural, and social perspectives. In addition, the department offers students, if they desire, the opportunity to study the languages relevant to religious traditions, with regular introductory and advanced classes in biblical Hebrew, Sanskrit, Tibetan, and New Testament Greek, as well as advanced classes in Aramaic, Coptic, Syriac, and Qur’anic Arabic.

Located in the humanities area of the College of Arts and Sciences, the department participates actively in the University’s Liberal Studies for the 21st Century Program. A number of religion courses are approved for humanities credit in liberal studies and for literature and multicultural requirements. The department is committed to offering several liberal studies honors courses and honors augmented courses each semester. Members of the department regularly teach in the Bryan Hall living and learning community. Our students are encouraged to take advantage of the University’s international programs, especially those in London and Florence. A concentration in religion provides the opportunity to acquire a broad liberal arts education. Inside the classroom, the department emphasizes clear and critical thinking and excellence in writing and speaking, whether the class has to do with religious history, ethical thought, philosophical analysis, or cultural studies. In addition, the curriculum of the major leads students to broaden their horizons and think about the complexity of the diverse and globalized world in which we live, a world in which religion plays an increasingly central role. These skills have benefited our graduates in the various fields they have gone on to pursue, ranging across education, the health professions, journalism, law, business, politics, and social work.

The department is housed in Dodd Hall. The facilities of the department include a small library of standard reference works for the use of religion students.

College Requirements

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in religion satisfy this requirement by earning a grade of “C-” or higher in CGS 2060 or CGS 2100.

State of Florida Common Program Prerequisites

No statewide common program prerequisites have been identified for this program; however, the faculty in this program recommends that students take several lower level religion courses with the REL prefix.

Degree in Religion

Major

To complete a Bachelor of Arts (BA) degree with a major in religion, a student must complete (in addition to other college requirements) thirty semester hours of religion courses structured in the following manner:

- At least three semester hours in each of the three areas: Western, Asian or African, Issues and Approaches. For purposes of the major requirement, religion courses are categorized as follows:
  - Western: REL 2121, 2210, 2240, 3128r, 3209, 3224, 3293r, 3363, 3367, 3430, 3505, 3607, 4203r, 4214, 4215, 4290r, 4323, 4324r, 4366, 4393, 4510, 4511, 4562, 4613, 4914r
  - Asian or African: REL 2315, 2350, 3333, 3337, 3340, 3345, 3358, 4335, 4357r, 4359r, 4908r, 4912r
  - Issues and Approaches: REL 3112, 3142, 3145, 3160, 3170, 3171r, 3180, 3194, 3345, 3431, PHI 3700

Note: The areas in which REL 3936r, 4190r, 4304r, 4491r, 4905r, and 4932r fall depend on the topic. Students should inquire at the department office, or consult with the departmental undergraduate advisors for a current list of all courses and their areas.

- At least eighteen semester hours at the 3000/4000 level
- REL 4044, which can only be taken after successful completion of at least twelve hours of coursework in the department
- At least one religion course with a seminar format (either a course listed as a seminar or one approved as such by the department)
- An exit interview or survey

Note: Courses in which the student receives a grade below “C-” will not be counted toward the major.

Minor

The religion major requires the completion of a minor in another department or program. Check the appropriate department for minor requirements.

Honors in the Major

The Department of Religion offers an honors program in religion to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Joint Major in Religion and Classics

The Departments of Religion and Classics cooperate in a joint major designed for students with a special interest in religion in the ancient world. Students interested in this program should discuss it with the undergraduate director of either department.

Cooperation with Other Programs and Departments

Because religion touches upon many facets of human life, the study of religion is inherently interdisciplinary. The department therefore participates in a number of interdepartmental programs, including the following: American Studies, Asian Studies, African-American Studies, History and Philosophy of Science, Humanities, Middle Eastern Studies, and Women’s Studies. In addition, students of religion will find related courses in other departments, including Anthropology, Art History, Classics, English, History, Philosophy, and Sociology. Students undertaking a major or minor in religion should discuss such courses with the undergraduate advisor in religion.

Minor in Religion

Students majoring in other disciplines and wishing to minor in religion must take a minimum of twelve semester hours in the religion curriculum. At least six semester hours of credit must be earned in courses at the 3000 level or higher. Courses in which the student receives a grade below “C-” will not be counted toward the minor.

Minor in Jewish Studies

Advisor: Martin Kavka (Department of Religion)

The Jewish studies minor is concerned with the diversity and complexity of Jewish religious and cultural expression from the time of the Bible to the present day. The minor is interdisciplinary, allowing students to take classes with faculty in various departments at FSU (including but not limited to the departments of religion, history, modern languages, and political science) and to begin to deepen their knowledge of Biblical and/or Modern Hebrew.

Requirements:

The minor consists of fifteen semester hours, including two semester of Biblical or Modern Hebrew, or of another Jewish language approved by the advisor for the minor, unless equivalent competence is demonstrated. Courses fulfilling the minor requirements can be comprised of any of the core courses listed below, and any additional courses approved by the advisor for the minor. No more than eight semester hours of 1000-level or 2000-level language courses may be counted toward the minor, and no language courses taken toward the minor may be used to fulfill any University language requirement. Each semester, additional courses will count as core classes (Examples: REL 3293 - Topics in Biblical Studies, REL 4290 - Undergraduate Biblical Studies Seminar, or HIS 4935 - Senior Seminar). To receive a list of such courses, or request that a course count as a core course for the minor, please contact the advisor for the minor.
Students may count toward the minor three semester hours of course with significant, yet not majority, Jewish-studies content (Examples: ASH 4223 - Modern Middle East, EUH 4465 - Weimar and Nazi Germany, or FOW 4930 - Transnational Literature). Students who are not applying any language classes to the minor may count six semester hours of such classes toward the minor. To receive a list of such courses for a given semester, or to request that a course count in this category, please contact the advisor for the minor.

History:

- EUH 4241 The Holocaust In Historical Perspective (3)

Modern Languages:

- HBR 1120 Elementary Modern Hebrew I (4)
- HBR 1121 Elementary Modern Hebrew II (4)
- HBR 2220 Intermediate Modern Hebrew (4)
- IFS 3043 Nazi Crimes Against Humanity (3)

Political Science:

- INR 4272 Studies in International Politics: The Middle East (3)

Religion:

- HBR 1102 Beginning Hebrew I (4)
- HBR 1103 Beginning Hebrew II (4)
- HBR 2222 Intermediate Hebrew (4)
- REL 2210 Introduction to the Old Testament (3)
- REL 3194 The Holocaust (3)
- REL 3209 The Dead Sea Scrolls (3)
- REL 3224 The Hebrew Prophets (3)
- REL 3607 The Jewish Tradition (3)
- REL 4203 Readings in Classical Hebrew Texts (1-3)
- REL 4212 The Book of Genesis: Literary and Historical Approaches (3)
- REL 4215 Judaism in the Greco-Roman World (3)
- REL 4813 Modern Judaism (3)

Definition of Prefixes

GRW—Classical Greek Literature (Writings)
HBR—Modern Hebrew Language
HPS—History and Philosophy of Science
IFS—Interdisciplinary Florida State University Courses
PHI—Philosophy
REL—Religion: Undergraduate
RLG—Religion: Graduate
SRK—Sanskrit Language

Undergraduate Courses

GRW 3525r. New Testament Greek (3). Prerequisite: GRE 2220 or completion of twelve-hour foreign language sequence in Greek. This course offers an introduction to reading the New Testament in Greek; it involves a comparison of New Testament Greek to Attic Greek grammar, as well as an introduction to New Testament scholarship. May be repeated to a maximum of six semester hours provided texts change.

HBR 1102. Beginning Hebrew I (4). This course is an introduction to the basic grammar, syntax, and phonology of modern and classical Hebrew. Meets the foreign language requirement for the BA degree. No language laboratory required.

HBR 1103. Beginning Hebrew II (4). This course is an introduction to the basic grammar, syntax, and phonology of modern and classical Hebrew. Meets the foreign language requirement for the BA degree. No language laboratory required.

HBR 2222. Intermediate Hebrew (4). This course focuses on translation and commentary on selected Hebrew readings. Meets the foreign language requirement for the BA degree. No language laboratory required.

IFS 2039. Noah’s Flood Through the Ages (3). This course is an examination of the biblical flood story from its roots in the ancient Near East to antiquity up until today. Special focus on how the flood story has been a locus for contemporary debates involving religion and science since the 1600s.

IFS 3050. India Through Bollywood Film (3). This course examines Indian identity, cultural, and religious values as expressed in film. The popular cinema produced in Bombay (now Mumbai), dubbed “Bollywood,” predates, spanning the period from Indian and Pakistani Independence (1947) to the 21st century.

IFS 3055. Science Fiction, Dystopia, Fate, and the Problem of Evil (3). This course explores the concepts of fate, providence, and the problem of evil in religion and popular culture through the critical study of several highly successful science fiction and dystopian novels authored during the twentieth and twenty-first centuries. It situates these novels in the context of philosophical and theological developments from ancient times to the present.

IFS 3069. Just Torture (3). In this course, students learn to think critically about a range of topics that include: history of torture; torture, pain, and unpacking the world; social psychological accounts of conditions making torture possible; genealogy of modern torture; democracy and recent proposals to legalize torture; comparative moral and religious perspectives on torture and its critique; and prospects for the abolition of torture.

PHI 3700. Philosophy of Religion (3). This course is an analysis of major issues in philosophy of religion. Topics may include the rationality of religious belief, faith, religious experience, religious language, evil, and the relation between religion and morality. Also offered by the Department of Religion.

REL 1300. Introduction to World Religions (3). This course surveys the major living religious traditions of the world, with attention to their origins in the ancient world and their classic beliefs and practices.

REL 2121. Religion in the United States (3). This course examines the scope and nature of religious movements, trends, and figures in American religious history, with an emphasis on the role that religious groups and institutions have played in conceptions of America and formations of American identity.

REL 2210. Introduction to the Old Testament (3). This course studies the history, religious thought, and social institutions of ancient Israel as reflected primarily in its literature.

REL 2240. Introduction to the New Testament (3). This course introduces students to the writings of the New Testament in the context of the historical development of early Christianity.

REL 2315. Religions of South Asia (3). This course studies the history and culture of the religious traditions of South Asia. A study of the manifestations of Hinduism, Buddhism, Jainism, Islam, Sikhism, and Christianity in India, Pakistan, Bangladesh, and Sri Lanka.

REL 2350. Religions of East Asia (3). This course is an introduction to the history, thought, and practice of religion in China, Korea, and Japan. Confucianism, Taoism, Buddhism, and popular religious traditions from ancient through modern times are covered.

REL 3112. Religion and 20th Century Fantasy Literature (3). This course offers an overview of theological and anti-theological elements in twentieth and twenty-first century fantasy literature from authors Lewis, Tolkien, Rowling, and Pullman.

REL 3128r. Topics in Religion in the Americas (3). Prerequisite: REL 2121 or instructor permission. May be repeated to a maximum of six semester hours.

REL 3142. Religion, the Self, and Society (3). This course covers interpretation of religious phenomena by the major social theorists of modern times. The course is divided into two parts: the psychology of religion and the sociology of religion.

REL 3145. Gender and Religion (3). This course considers the impact of gender on religion. Includes cross-cultural studies, theoretical works, and gender issues within religious traditions.

REL 3155. Psychology in American Religious History (3). This course explores the psychological aspects of religious life in five different religious traditions in the United States. It examines the cultural experiences and social structures that have shaped psychological approaches to religion in the U.S. in the 20th and 21st centuries.

REL 3160. Religion and Science (3). This course provides an historical and philosophical analysis of major questions in the relationship between religion and science.

REL 3170. Religious Ethics and Moral Problems (3). This course discusses contemporary moral problems such as deception, sexual activities and relations, and capital punishment from the standpoints of major religious traditions.

REL 3171r. Topics in Ethics (3). This course considers themes and problems in modern ethics. May be repeated to a maximum of nine semester hours. May be repeated within the same semester.

REL 3180. Religion and Bioethics (3). This course offers an introduction to theoretical and practical issues in bioethics from the perspective of a variety of religious and secular positions.

REL 3194. The Holocaust (3). This course examines the origins, the process, and the consequences of the destruction of the European Jews during World War II.

REL 3209. The Dead Sea Scrolls (3). Prerequisite: REL 2210 or equivalent. This course examines key manuscripts of the Qumran corpus and focuses on issues such as the history, beliefs, and praxis of the Jewish sectarian movement that is associated with the scrolls; the archaeology of the Qumran site; and the significance of the scrolls for understanding Second Temple Judaism.

REL 3224. The Hebrew Prophets (3). Prerequisite: REL 2210 or equivalent. This course analyzes the prophetic books of the Hebrew Bible/Old Testament: Isaiah, Jeremiah, Ezekiel, and the twelve minor prophets. The course examines the role of prophecy elsewhere in the Hebrew Bible (as in the Elijah stories) and situates the biblical prophets within the broader context of prophecy, as a religious and social phenomenon in the ancient Near East.
This course studies the development of Judaism as a religious and cultural phenomenon in Europe, North America, and the Middle East from the early 19th to the early 20th centuries. It examines the impact of modernity and nationalism on Jewish identity and culture, from the rise of Zionism to the Holocaust. A basic knowledge of Hebrew grammar is presumed. May be repeated to a maximum of twelve semester hours as topics vary.

REL 4510. Christianity after the New Testament (3). Prerequisite: REL 2240 or instructor permission. This course covers major developments in the history and theology of Christianity from the first to the second millennium of the Christian Era. Topics vary. May be repeated to a maximum of twelve semester hours as topics vary.

REL 4511. Christianity in Late Antiquity (3). This course studies Christian thought, institutions, and culture in the Mediterranean world from the death of Constantine in 337 to the end of the Roman Empire in 476. Topics vary. May be repeated to a maximum of twelve semester hours as topics vary.

REL 4562. Modern Roman Catholicism (3). This course studies the Catholic Church from the Council of Trent to the present day; special consideration given to Vatican II, current events, and the role of the papacy. Topics vary. May be repeated to a maximum of twelve semester hours as topics vary.

REL 4613. Modern Judaism (3). This course studies the development of Judaism as a religious and cultural phenomenon in Europe, North America, and the Middle East from the early 19th to the early 20th centuries. It examines the impact of modernity and nationalism on Jewish identity and culture, from the rise of Zionism to the Holocaust. A basic knowledge of Hebrew grammar is presumed. May be repeated to a maximum of twelve semester hours as topics vary.

REL 4614. The Book of Genesis: Literary and Historical Approaches (3). Prerequisite: REL 2210 or equivalent. This course offers a close and critical reading of the Book of Genesis in terms of its composition, history of its interpretations, its Near Eastern context, its narrative artistry, as well as its relevance for ethics and theology.
Graduate Courses

HPS 5340. Freud and the Invention of the Modern Mind (3).
RLG 5035. Seminar: Introduction to the Study of Religion (3).
RLG 5195r. Seminar: Religion and Culture (3).
RLG 5204r. Readings in Classical Hebrew Texts (1–3).
RLG 5292r. Tutorial in Near Eastern Languages and Literature (1–3).
RLG 5297r. Seminar: Biblical Studies (3).
RLG 5305r. Seminar: History of Religions (3).

Department of
RETAIL, MERCHANDISING AND PRODUCT DEVELOPMENT

COLLEGE OF HUMAN SCIENCES
Web Page: http://www.chs.fsu.edu/rmpd

Chair and Professor: Sherry Schofield; Professors: Goldsmith, Kim; Assistant Professors: Lee, Manchiraju, McCormick; Teaching Faculty I, Internship Coordinator: Parker; Teaching Faculty I: Steed; Teaching Faculty I, Retail Center Director: Langston; Professors Emeriti: Davis, Edgeworth, Heitmeyer

The Department of Retail, Merchandising and Product Development (RMPD) offers the Retail, Merchandising and Product Development major. This exciting major is responsive to the changes taking place in retail and retail-related industries. As a major, one participates in an industry-savvy curriculum resulting in graduates who can contribute to the retail and apparel-related companies who hire them.

From the beginning of the product development process all the way through to the consumer, RMPD graduates find exciting career opportunities from New York to Los Angeles, and around the world.

The Retail, Merchandising and Product Development (RMPD) major prepares men and women for executive training programs and other professional positions leading to a variety of opportunities within retail, textiles, apparel, merchandising, and related industries. The curriculum produces highly marketable graduates who are able to add value to successful management of organizations, whether through corporate operations, the product development function, or field operations. Representative careers include allocating, buying, sourcing, forecasting, store management, product development, sales management, visual merchandising, public relations, publications, and styling. Representative employers include department and discount store retailers, mass merchandisers, food retailers, specialty stores, electronic shopping networks, fashion publications, fiber, fabric, and apparel manufacturers, retail merchandise manufacturers, entertainment retailers, U.S. and state governments, trade organizations, and shopping centers and malls.

The department provides outstanding facilities and leading-edge technology for its majors to immerse them in relevant industry technology. The Product Development Lab’s multi-media computers are equipped with the latest in computer product development and merchandising software, Adobe Photoshop and Illustrator, Kaledo, Mockshop, word processing, spreadsheet, and presentation packages. The lab helps deliver curriculum that prepares students for the work interfaces they will encounter in industry. Macy’s Merchandising Laboratory, one of the few university merchandising labs in the United States, provides operational experience with merchandising presentation techniques and inventory management in a retail store facsimile, preparing students for operational challenges in-store. The Office Depot Technology Complex provides a hands-on laboratory with retail industry adopted software where students use real-world retail reporting and other technology-related skills. The Textile Evaluation and Research Laboratory Complex provides students with a critical understanding of textile science and its impact on a variety of consumer products within the latest color communication technology and modern chemical and physical testing facilities. The Historic Clothing and Textiles Collection provides museum-quality conservation and storage for an outstanding teaching and study collection. Apparel and accessories in the collection date from the late 1700’s, with pieces tracing the history of Florida and its residents, including garments and textiles of the Seminole Indians. Textile pieces include the unique Carter Collection of pre-Columbian Peruvian textiles from the late 1400’s. A highly accessible teaching and research facility provides students with a challenging academic environment. The department is also the home of the Center for Retail, Merchandising and Product Development (The Retail Center). The activities of The Retail Center provide an exchange among the retail and retail-related industries and RMPD to maintain relevance and rigor in the curriculum. Additionally, The Retail Center provides many networking and project opportunities for RMPD students.

Due to the faculty’s strong commitment to the personal and professional development of students, students receive outstanding career mentoring and advising. Honors in the major projects and other directed individual study experiences allow students who meet eligibility requirements to pursue particular areas of individual interest. Team projects, computer projects, field trips, and speakers from the retail, apparel, and textile industries are a regular part of the learning environment. Internships are required in the Retail, Merchandising and Product Development major. The highly popular RMPD Summer study abroad program provides unique opportunities for students in all majors to study global aspects of the field via coursework and international travel experiences. International internships are also encouraged through the International Programs at Florida State. Department-sponsored student
Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in retail, merchandising and product development satisfy this requirement by earning a grade of “C” or higher in CGS 2060 or CGS 2100.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fivec.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. ACG X201
2. CGS X060 or CGS X100
3. CTE X401
4. FAD X230
5. ECO X013
6. ECO X023
7. MAC X105 or MGF X106 or MGF X107
8. PSY X012 or SYG X000 or SYG X010

Honors in the Major

The Department of Retail, Merchandising and Product Development offers a program of Honors in the Major to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin. Interested students who meet eligibility requirements should discuss this opportunity with a faculty advisor early in their junior year.

Entrance and Retention Requirements for Majors

Students are eligible to enter the Department of Retail, Merchandising and Product Development when they have met the University requirements for transfer to an upper-division program, including an FSU GPA of 2.0 or higher and completion of all math requirements. Additionally, specified foundation courses required for each major must have been completed with a grade of “C” or better. See individual major descriptions for a listing of these courses and additional eligibility requirements. Separate application to the department is not required.

To remain in good standing in the program, students in RMPD must achieve and maintain a GPA of 2.0 to enroll in CTE 4822 and a GPA of 2.0 to enter the merchandising intern block. Students must be in good standing to take senior-level classes and to graduate. A grade of “C” or better must be achieved in all courses required for the major, including foundation courses, college core requirements, and professional electives.

A grade of “C” or better must be achieved in all courses required for the major, including foundation courses which, in addition to the math requirements, are ECO 2013 and ECO 2023, PSY 2012 or SYG 1000 or SYG 2023, CGS 2060 or CGS 2100, and ACG 2021. Oral competency may be met through any course approved as such by the University. Detailed curriculum guide sheets and sequencing plans are available through the advising office and on the department Web site, at http://www.chs.fsu.edu/rmpd/. Students are expected to meet the curriculum requirements in place at the time they enter the major. An FSU GPA of 2.0 or higher is required to remain in good standing.

Each Retail, Merchandising and Product Development student is assigned to a full-time professional advisor until the major is completed. Advisors assist students with the proper sequencing of courses and provide other academic planning-guidance. Students are responsible for reviewing the General Bulletin and other advising materials distributed by the department and abiding by the academic policies and requirements described within them, including course prerequisites. The department reserves the right to drop students from classes for which they have not completed the prerequisites.

The curriculum for the major in the department is comprised of three parts: lower division requirements, College of Human Sciences core requirements, and major course requirements. Students must meet the curricular requirements in effect at the time they enter the major. Detailed curriculum sheets are available from the advising office and on the department Web site, at http://www.chs.fsu.edu/rmpd/.

College of Human Sciences Core

All students in the department are required to complete the College of Human Sciences core requirements consisting of six semester hours. The required core courses for this major are FAD 2230 and one other course as specified by the department in the curriculum sheet at http://www.chs.fsu.edu/rmpd. A grade of “C” or better must be earned in each of these courses.

Retail, Merchandising and Product Development

The Department of Retail, Merchandising and Product Development (RMPD) curriculum produces highly marketable graduates who are able to add value to successful management of organizations, whether through corporate operations, the product development function, or field operations. Students who complete a minor in communication also may focus their career development on fashion publishing. Internships within the retail industry and its associated industries provide real-world business experiences. Graduates of the program are sought by recruiters from the top retail firms. The recruiters visit campuses to give presentations and interview students who may be interested in joining their organizations.

Internship

RMPD offers an outstanding internship program that has been in place for over four decades and works with over 200 companies globally. Interns work in cities such as Los Angeles, Atlanta, Dallas, New York City, Orlando, Miami, and London. To prepare for the internship, Retail, Merchandising and Product Development students are required to complete a coordinated block of internship courses (CTE 4811, 4826, and 4866) followed by the internship which may take place during the Summer, Fall, or Spring semesters. The internship provides students with a chance to apply managerial, operational, and analytical skills to workplace experiences.

The merchandising block courses (CTE 4811, 4826, and 4866) are taken during the first half of the internship semester. All material normally covered in a full semester, including the final examination, is completed during the accelerated period. The second half of the semester is the off-campus internship or practicum (CTE 4882). The Department of Retail, Merchandising and Product Development assists students in identifying potential internship positions and, through a process explained during merchandising coursework, for approving the placement of students. The intern may or may not receive compensation, depending on the policy of the host company. During the internship, the student is responsible for all assignments given by the department and the host company. The interning student is also responsible for housing, relocation arrangements, and expenses. Each intern is cooperatively evaluated by both the company and the RMPD Internship Coordinator. An unsatisfactory rating by either the company or the RMPD Internship Coordinator will result in a failing grade in CTE 4882.

The student is responsible for obtaining the internship with the assistance of the Internship Coordinator. To ensure a placement that best meets the professional needs of each student, the department partners with retail organizations over a wide geographic area. Applicants for the internship may not accept positions in their home cities or to the immediate or general vicinity of the campus. Candidates are advised that the Department of Retail, Merchandising and Product Development exercises the final authority for approving the internship and the company in which the student will intern. A contractual agreement verifies the terms of the internship and must be submitted to the Internship Coordinator upon completion of the first week of field work. Submission of an application by a candidate is an agreement to accept an assignment in a location where the objectives of the internship can best be achieved. Failure to accept an assignment relieves the Department of Retail, Merchandising and Product Development and the University of any further responsibility to assist in procuring an internship.

An intern is expected to meet the standards set by pertinent state laws and by the cooperating firms. Candidates should be aware that, consistent with applicable laws, information pertaining to all public records (such as arrest and/or conviction in a court of law) may be routinely furnished to the cooperating stores as well as to prospective employers. The Department of Retail,
Merchandising and Product Development will take all reasonable steps to place a student in an internship but will not be liable if a student cannot be placed.

Internship application takes place via an online process the term prior to the semester in which the student desires to intern. The following eligibility requirements must be met in order to intern:

1. Students must have a minimum of ninety credit hours overall and twenty-five credit hours in the department and must have completed the following classes with a “C” or better: CTE 1401C, CTE 2800, 3201, 3431, 3763, 3806, 3809, 3835, 4443, 4822, 4829; MAC 1105 or MGF 1106 or 1107; ACG 2021; MAR 3023; CGS 2060 or 2100; ECO 2013 and 2023; and SYG 1000 or SYG 2010 or PSY 2012.
2. An overall GPA of 2.0
3. Early in the semester immediately prior to the internship semester (not a Summer term), the student must meet with their designated advisor and sign an internship clearance form.

There is a limit to the number of students who can intern in any given semester and application procedures must be carried out via the online process. For more information regarding internship requirements, please contact the RMPD Internship Coordinator or the CHS Advising Office.

Requirements for Minors
Due to the heavy demand for courses by RMPD majors, minors in RMPD are no longer available.

Graduate Certificate
A graduate certificate is available to qualified students. Please contact the RMPD Department for more information.

Definition of Prefixes

COA—Home Economics: Consumer Affairs

CTE—Home Economics: Clothing and Textiles

HME—Home Economics: Home Management and Equipment

Undergraduate Courses

COA 4131. Family Financial Analysis (3). Prerequisites: Junior standing; economics recommended. This course discusses principles and problems of money management, credit, insurance, housing, transportation, taxes, and investments.

COA 4935r. Special Topics in Consumer Economics: Topics Vary (1-9). This course studies various consumer or resource management issues/trends. May be repeated to a maximum of twelve semester hours as topics vary.

CTE 1401C. Introductory Textile Science (4). This course is an introduction to fibers, yarns, fabric structures, coloration, and finishes related to performance, selection, and care. It includes laboratory experience in the identification and analysis of fibers, yarns, fabrics, finishes, and textile coloration.

CTE 2800. Textile, Apparel, and Retail Analysis (3). This course offers an overview of the textile, apparel, retail, and support services industries and the career opportunities available within these industries. The nature, scope, and structure of each segment of each industry in the domestic and international marketplace is analyzed.

CTE 3201. Design Elements and Principles (3). This course is an introduction to design as process and product: with applications in functional, structural, and decorative design; optical illusions; art elements and principles; design analysis.

CTE 3431. Product Development (3). Prerequisites: CTE 1401C, CTE 3763, CTE 3809, and CTE 4443. This course explores topics in product development. Focus on stages of product development for specific end use areas.

CTE 3512. History of Dress (3). This course explores the development of Western dress from the 15th century to the present as a reflection of socio-cultural factors including cultural values, ethnicity, gender, class, art, customs, economy, politics, religion, geography, and technology.

CTE 3763. Product Analysis and Costing (3). Prerequisite: CTE 1401C. This course offers an evaluation of apparel products in relation to costing and product development.

CTE 3806. Merchandising Principles (3). Prerequisites: CTE 1401C, CTE 2800, CTE 3201 and CTE 3806. This course is an overview of businesses that design, produce, distribute, and sell fashion and basic goods. Theoretical foundations and practical application of the principles of retail merchandising.

CTE 3808. Consumers in a Complex Marketplace (3). Prerequisites: One of the following: PSY 2012 or SYG 1000 or SYG 2010. This course explores the decision making behavior of consumers in a complex and diverse marketplace, including consumer rights and responsibilities.

CTE 3809. Trend Analysis and Forecasting (3). Prerequisites: CTE 2800, ECO 2013, and ECO 2023. Corequisite: CTE 3806. This course explores the process and methods of trend analysis and fashion forecasting with a dual focus on both consumer and business aspects.

CTE 3835. Merchandise Presentation and Inventory Analysis (3). Prerequisites: A grade of “C” or better in ACG 2021, CGS 2060 or CGS 2100, CTE 3806, ECO 2013, ECO 2023, and MAC 1105 or MGF 1106. This course is an analysis of consumer trends, inventory needs, and merchandise presentation methods to drive a business from a store and buying perspective using visual merchandising methods, current inventory analysis software, retail reports, and the Macy’s Merchandising Methods.

CTE 3831r. Elective Internship in Retail, Merchandising and Product Development (1-6). (S/U grade only.) Prerequisites: CTE 1401C, CTE 2800, and CTE 3806. This elective course introduces students to a hands-on approach to basic retail merchandising (prior to the intern block) in the following areas: selling, merchandising, product knowledge, inventory control and management.

CTE 4443. Quality Assurance for Textiles and Apparel (4). Prerequisite: CTE 1401C. This course offers an evaluation of textile materials for specific end users, industry compliance, certified performance, and government standards.

CTE 4463r. International Textile and Apparel Product Development (3). Prerequisites: CTE 1401C, CTE 3201, and CTE 3806. This course studies current practices and technology in textiles and apparel product development in an international setting. Course requirements may require students to travel to international sites at their own expense. May be repeated to a maximum of nine semester hours.

CTE 4518. Historic Clothing and Textiles in European Museums (3). This course studies preservation, curatorial choices, display techniques, and the educational significance of historic clothing and textiles in European museums. Discussion of the importance of historic clothing and textiles in European museums as a reflection of the art, customs, religion, technological development, and economy of the periods presented.

CTE 4537r. Historic Textiles and Clothing Collection Management (1-3). Prerequisite: Instructor permission. This course is a practicum at Florida State University Historic Clothing and Textiles Collection. Students learn proper textile preservation, conservation, storage, and display techniques for flat textiles and garments. Other experiences include museum education, informatics, and database management. May be repeated to a maximum of six semester hours.

CTE 4707. International Topics in Design Industry (3). Prerequisite: CTE 1401C, CTE 3201, and CTE 3806. This course offers an in-depth study of designers and of the design industry in international sites. Students gain a perspective on the influence of fashion on economic, social, artistic, and global culture.

CTE 4803r. International Topics in Merchandising (3). Prerequisite: CTE 3806. This course is the study of current practices and technology in merchandising in an international setting. The course requires students to travel to and live at international sites at their own expense. May be repeated to a maximum of nine semester hours.

CTE 4811. Retail Merchandising Planning Strategies (3). Prerequisites: Senior standing, a 2.50 GPA, as well as a grade of “C” or better in CTE 3835, CTE 4822, and MAR 3023. Corequisites: CTE 4826 and CTE 4882. This course provides an overview of strategic planning as a framework for retail-firm analysis. Through the completion of off-to-store business plans, students hone their leadership, negotiation, and interpersonal skills.

CTE 4822. Quantitative Merchandising Management (3). Prerequisites: A 2.50 GPA as well as a grade of “C” or better in ACG 2021, CGS 2060 or CGS 2100, CTE 3806, ECO 2013, ECO 2023, and MAC 1105 or STA 2023. This course examines principles of effective merchandising management through mathematical procedures. Examines problems and formulates solutions in merchandise buying: planned stocks, open-to-buy, markdowns, and other buying formulas. Must be taken in Summer or semester immediately prior to intern block.

CTE 4826. Merchandising Buying (3). Prerequisites: A 2.50 GPA as well as a grade of “C” or better in CTE 3835, CTE 4822, and MAR 3023. Corequisites: CTE 4811, CTE 4866, and CTE 4882. This course examines techniques and theories of retail buying, concentrating on buying functions, and the strategic role of the buyer in retail management. This course is part of the intern block for merchandising majors only.

CTE 4829. Global Sourcing (3). Prerequisites: CTE 3806, ECO 2013, and ECO 2023. This course covers global trade, trade practice and theories, as well as the global sourcing related to the textile, apparel, and retail industries.

CTE 4832. Merchandising of Small Business Enterprises (3). This course offers a discussion of issues resulting from the interaction between merchandising and small business. Family businesses and other types of ownership are discussed. Guest speakers include family business owners, bankers, accountants, lawyers and government officials who deal with small and family businesses.

CTE 4843. Retail Branding (3). Prerequisite: CTE 3806. This course explores retail and fashion brand development, promotion, experience, and performance. Students develop their own brand.

CTE 4866. Executive Perspectives on Retail Management (3). Prerequisites: CTE 3835, CTE 4822, and MAR 3023. Corequisites: CTE 4811, CTE 4826, and CTE 4882. This course prepares students to assume a professional role in retail, merchandising, product development, or the industry support services through developing career strategies that emphasize solid management and leadership concepts and principles. The course provides exposure to both retail and manufacturing industry leaders, and assistance in preparing for the role of an intern.

CTE 4882. Professional Internship (6). (S/U grade only.) Prerequisites: Major status, CTE 4811, CTE 4826, and CTE 4866. This internship in a retail setting allows students to understand merchandising functions through management, buying, or product development. Both professional development and career preparation are emphasized.

CTE 4890. Executive Merchandising Management (3). Prerequisites: A 2.50 GPA as well as a grade of “C” or better in CTE 3806, CTE 3835, and CTE 4811. Corequisite: MAR 3023. This course examines the roles and responsibilities of executive merchandising managers in retail culture; critical competitive challenges in the global, quality, social, and technological environment of various retail settings. This course is part of the intern block for merchandising majors only.

CTE 4905r. Directed Individual Study (1–6). Prerequisite: A 2.50 GPA. May be repeated to a maximum of six semester hours.

CTE 4937r. Special Topics (1–3). This course is an analysis of current issues and practices in textiles and consumer sciences. May be repeated to a maximum of twelve semester hours as topics vary.

CTE 4970r. Honors Work (1–6). This course provides qualified, upper-division majors in textiles and consumer sciences an opportunity to undertake an independent and original research project in their particular area of interest. May be repeated to a maximum of nine semester hours. A minimum of two semesters is required to complete an honors project.

HME 4221. Family Resource Management (3). This course is an analysis of family decision making, goals, values, and resources.

Graduate Courses

COA 5906r. Directed Individual Study (1–3). (S/U grade only.)

CTE 5807. Retail Merchandising Concepts (2–4).

CTE 5815. Retail Technologies (3).

CTE 5816. Merchandising Organization (3).

CTE 5825. Merchandising Buying (3).

CTE 5833. Merchandising of Small Business Enterprises (3).

CTE 5834. Merchandising Theory and Research (3).

CTE 5847. Retail Branding and Promotion (3).

CTE 5884. Advanced Fashion Merchandising Practicum (6). (S/U grade only.)

CTE 5906r. Directed Individual Study (1–3).

CTE 5911. Research Analysis in Clothing and Textiles (3).

CTE 5912r. Supervised Research (1–3). (S/U grade only.)

CTE 5930r. Clothing and Textiles Seminar (1).

CTE 5942r. Supervised Teaching (1–3). (S/U grade only.)

CTE 5945r. Museum Studies Internship (1–6).

CTE 6436. Product Innovation and Management (3).

CTE 6900r. Readings in Clothing, Textiles, and Merchandising (1–3). (S/U grade only.)

CTE 6932r. Clothing and Textiles Seminar (1).

CTE 6936r. Special Topics in Clothing/Textiles/ Merchandising (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manuel for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

Risk Management/Insurance

1. ACG X021 or ACG X022, or ACG X001 and ACG X011
2. ACG X071 or ACG X301
3. CGS X100 or CGS X100C or CGS X530 or CGS X570 or CGS X606 or CGS X531 or CGS X000 or ISM X000 or CGS X518
4. ECO X013
5. ECO X023
6. MAC X233 or MAC X230
7. STA X023 or STA X122 or QMB X100

Real Estate
1. ACG X021 or ACG X022, or ACG X001 and ACG X011
2. ACG X071 or ACG X301
3. CGS X100 (or demonstrated competency) or CGS X100C or CGS X530 or CGS X570 or CGS X060 or CGS X531 or CGS X030 or ISM X000 or CGS X518
4. ECO X013
5. ECO X023
6. MAC X233 or MAC X230
7. STA X023 or STA X122 or QMB X100

Degree Programs

Risk Management/Insurance Program
The curriculum in risk management/insurance provides students with the knowledge necessary to analyze the impact of risk and uncertainty upon business and society. Students who major in risk management/insurance prepare for a career in insurance, consulting, financial services, or corporate risk management. Courses cover a variety of topics, including analysis of the risk management process with a focus on enterprise risk management. Students may coordinate their academic programs with the licensing examinations of the State of Florida and with the professional examinations of the Certified Insurance Counselor (CIC), the Certified Risk Managers (CRM), the Certified Chartered Property and Casualty Underwriters (CPCU), the Associate in Risk Management (ARM), the Chartered Life Underwriters (CLU), and other professional programs.

Requirements for a Major in Risk Management/Insurance
All students must complete:
1. The University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin
2. The state of Florida common program prerequisites for risk management/insurance majors
3. At least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments (3)
4. The general business core requirements for risk management/insurance majors
5. The general business breadth requirements for risk management/insurance majors
6. The major area requirements for risk management/insurance majors

Note: To be eligible to pursue a risk management/insurance major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements
All risk management/insurance majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BUL 3310</td>
<td>The Legal and Ethical Environment of Business (3)</td>
</tr>
<tr>
<td>FIN 3403</td>
<td>Financial Management of the Firm (3)</td>
</tr>
<tr>
<td>GEB 3213</td>
<td>Business Communications (3)</td>
</tr>
<tr>
<td>MAN 3240</td>
<td>Organizational Behavior (3)</td>
</tr>
<tr>
<td>MAR 3023</td>
<td>Basic Marketing Concepts (3)</td>
</tr>
</tbody>
</table>

General Business Breadth Requirements
All risk management/insurance majors must complete the two courses as follows. Each course must be completed with a grade of “C–” or better.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>REE 3043</td>
<td>Real Estate (3)</td>
</tr>
<tr>
<td>RMI 3011</td>
<td>Risk Management/Insurance (3)</td>
</tr>
</tbody>
</table>

Capstone Course
All risk management/insurance majors must complete the capstone class in Competitive Dynamics (MAN 4752).

Major Area Requirements
All risk management/insurance majors must complete six courses as listed below. A grade of “C–” or better must be earned in each course used to satisfy the risk management/insurance major area requirements.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>RMI 4115</td>
<td>Life Insurance Products (3)</td>
</tr>
<tr>

<tr>
<td>RMI 4941</td>
<td>Risk Management and Insurance Internship (3)</td>
</tr>
</tbody>
</table>

Selection of electives should be made after consultation with a faculty advisor in order to satisfy the student’s interests and to qualify the student for the state licensing examinations and professional designations.

Real Estate Program
The real estate program provides a foundation for students seeking a broad understanding of the real estate market and its participants. Students are introduced to such concepts as urban economics, market behavior, valuation, finance, investment analysis, and real estate law. In general, the curriculum is designed to develop the fundamental skills necessary to make effective real estate business, investment, and consumption decisions. More specifically, the program equips students to enter a wide variety of real estate related professions (e.g. investment and portfolio analysis, institutional lending and mortgage banking, brokerage, appraisal, property management, and property development).

Students may coordinate their academic programs with licensing examinations of the State of Florida. Completion of the real estate major partially fulfills the requirements to be licensed as a real estate sales associate, or certified as a general appraiser, in the State of Florida.

Requirements for a Major in Real Estate
All students must complete:
1. The University-wide baccalaureate degree requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin
2. The state of Florida common program prerequisites for real estate majors
3. At least sixty semester hours of courses in non-business disciplines which includes CGS 2518, Spreadsheets for Business Environments (3)
4. The general business core requirements for real estate majors
5. The general business breadth requirements for real estate majors
6. The major area requirements for real estate majors

Note: To be eligible to pursue a real estate major, students must meet the admission requirements for the AACSB accredited business programs in the College of Business. These admission requirements are described in the “College of Business” chapter of this General Bulletin.

General Business Core Requirements
All real estate majors must complete the following five courses. A grade of “C–” or better must be earned in each course.

Capstone Course
All real estate majors must complete the capstone class in Competitive Dynamics (MAN 4752).
Major Area Requirements

All real estate majors must complete the five courses listed below. A grade of “C-” or better must be earned in each course used to satisfy the real estate major area requirements.

REE 3043. Real Estate (3). This course is a survey introduction to real estate, real estate evaluation, and real estate investment decision making. The course, in addition to REE 4433, meets the FREC educational requirement for real estate sales licensing.

REE 4010. Real Estate Valuation (3). Prerequisite: REE 3043. This course acquaints students with the valuation process and the basics of valuation terminology. It also demonstrates the application of a variety of valuation techniques to both residential and income properties.

REE 4143. Real Estate Market Analysis (3). Prerequisites: REE 3043 and REE 4103. This course includes topics such as techniques of real estate market analysis, survey research, and applications of computers to real estate problems. (Note: REE 4103 and REE 4143 cannot be taken concurrently.)

REE 4204. Real Estate Finance (3). Prerequisites: REE 3043 and FIN 3403. This course is an intermediate treatment of real estate finance, investment, and tax analysis. Coverage includes mortgage markets, financing devices, and quantitative evaluation of real estate projects.

REE 4313. Real Estate Investment (3). Prerequisites: REE 3043 and REE 4103 or REE 4204 or departmental permission. This course introduces students to the analytical tools and procedures used to evaluate real estate investments. The course focuses on the topics of real estate investment analysis, primarily from the private investors’ perspective.

REE 4433. Legal Environment of Real Estate (3). Prerequisites: BUL 3310 and REE 3043. This course is an intermediate treatment of the legal environment of real estate and real estate decision making. The course emphasizes common law rules and legal considerations inherent in contemporary real property decisions. The course, in addition to REE 3043, meets the FREC educational requirements for real estate sales licensing.

REE 4905r. Directed Individual Study (1–3). May be repeated to a maximum of nine semester hours.

REE 4941. Real Estate Internship (3). (S/U grade only.) Prerequisite: Instructor permission. This internship is designed for College of Business students who desire to gain real-world experience in the real estate field through on-the-job practice. Students work under the direction of an approved industry professional, a faculty advisor, and the internship director.

REE 4970r. Honors Thesis (1–6). Prerequisite: Admission to the honors program. May be repeated to a maximum of nine semester hours. Six semester hours of thesis are required to complete honors in the major.

RMI 2000. Practice of Risk Management (2). (S/U grade only.) This course reflects the most current developments in risk management.

RMI 2001. Principles of Risk Management (1). (S/U grade only.) This course is a survey of the general principles of risk management and their role in business.

RMI 2110. Personal Insurance Planning (3). This course is an introduction to personal risk exposure. The course integrates life, health, property, liability, private, and governmental programs.

RMI 2190. Benefits (2). (S/U grade only.) This course reflects the most current developments in insurance benefits.

RMI 2212. Personal and Business Property Insurance (3). This course provides an overview of property risks and coverages. Insurer operations are discussed in detail. Social problems associated with the risks are discussed as well as the impact of inland marine, transportation, and multi-peril coverages.

RMI 2214. Commercial Property Insurance (2). (S/U grade only.) This course provides a thorough review of commercial property principles and exposures.

RMI 2215. Commercial Casualty Insurance (2). (S/U grade only.) This course provides a thorough review of commercial liability principles and exposures.

RMI 2301. Analysis of Risk Management (2). (S/U grade only.) This course covers the concepts relating to the analysis of risk.

RMI 2302. Risk in Business and Society (3). This course is designed to enhance student understanding of risk and its implications for individuals, business, and society. The course focuses on the impact of uncertainty on decisions and the risk-reward tradeoff. Students analyze the implications of risk in a variety of settings.

RMI 2310. Risk Financing (2). (S/U grade only.) This course reflects the most current developments in risk financing.

RMI 2340. Risk Control (2). (S/U grade only.) This course reflects the most current developments in risk control.

RMI 2662. Introduction to Risk Management and Insurance (3). This course is an introduction to the principles, practices, and economics of insurance. The focus of the course is the relationship of fire, life and casualty contracts to business and contingency risks.

RMI 2700. Agency Management (2). (S/U grade only.) This course reflects the most current techniques and theories for agency management.

RMI 3011. Risk Management/Insurance (3). This course is an introduction to the principles of risk management and insurance and their application to personal and business pure risk problems.

RMI 4115. Life and Health Insurance Products (3). Prerequisite: RMI 3011. This course analyzes personal and business life and health insurance needs, characteristics of plans appropriate to meet needs. Life insurance rating, receiving, underwriting, and financial statement analysis are also studied.

RMI 4135. Employee Benefit Plans (3). Prerequisite: RMI 3011. This course studies basic concepts and managerial concerns underlying the group insurance mechanism and the characteristics of various qualified retirement planning vehicles.

RMI 4224. Property and Casualty Insurance Products (3). Prerequisite: RMI 3011. This course analyzes more common basic insurance contracts—their use and coverage afforded as a fundamental basis for understanding legal, underwriting, marketing, financial, and other insurance functions.

RMI 4292. Property and Casualty Insurer Operations (3). Prerequisite: RMI 3011. This course discusses the composition, financial structure, and operations of the insurance industry. Special consideration is given to consumer problems and solutions.

RMI 4295. Advanced Property and Casualty Insurance (3). Prerequisite: RMI 4224. This course studies business insurance problem evaluation and planning with proposed solutions utilizing comprehensive coverage package programs.

RMI 4308r. Seminar in Risk and Its Control (3). Prerequisite: Instructor permission. Topics vary. May be repeated to a maximum of six semester hours.

RMI 4347. Commercial Risk Management (3). Prerequisite: RMI 4224. This course studies the application of the risk management process. Includes risk control, risk financing, and business risk management problems.

RMI 4420. Legal and Political Aspects of Insurance (3). Prerequisites: BUL 3310 and RMI 3011. This course studies insurance contracts and marketing—judicial doctrines of contract construction, claims processes, insurance institutions, governmental regulation, and sponsorship of insurance.

RMI 4905r. Directed Individual Study (1–3). May be repeated up to three times.

RMI 4941. Risk Management/Insurance Internship (3). Prerequisites: RMI 3011 and six additional hours of business/risk management and insurance coursework. This internship is designed for College of Business students who desire to gain real-world experience in the risk management/insurance field through on-the-job practice. Students work under the direction of an approved industry professional, a faculty advisor, and the internship director.

RMI 4970r. Honors Thesis (1–6). Prerequisite: Admission to the honors program. May be repeated to a maximum of nine semester hours. Six semester hours of thesis are required to complete honors in the major.

Graduate Courses

BUL 5810. The Legal and Ethical Environment of Business (1–4).

BUL 5907r. Directed Individual Study (1–3).

REE 5105. Real Estate Valuation (3).

REE 5205. Topics in Real Estate Finance (3).

REE 5209. Advanced Real Estate Finance and Investment (3).

REE 5305. Real Estate Investment (3).

REE 5315. Real Estate Project Feasibility Analysis (3).

REE 5435. Real Estate and Its Legal Environment (3).

REE 5907r. Directed Individual Study (1–3)

REE 5935r. Special Topics in Real Estate (1–3).

RMI 5017. Fundamentals of Risk and Insurance (3).

RMI 5087. International Risk Management (3).

RMI 5156. Employee Benefit Plans (3).

RMI 5225C. Property/Liability Insurance Contract Analysis (3).
RMI 5345. Risk Management in the Business Enterprise (3).
RMI 5710C. Insurance Company Operations (3).
RMI 5720C. Insurance Accounting and Finance (3).
RMI 5810. Personal Financial Planning (3).
RMI 5906r. Directed Individual Study (1–3). (S/U grade only.)
RMI 5907r. Special Studies in Management (1–3).
RMI 5917r. Supervised Research (1–3). (S/U grade only.)
RMI 5935r. Special Topics in Risk Management and Insurance (1–3).
RMI 5946r. Supervised Teaching (1–3). (S/U grade only.)
RMI 5970r. Doctoral Seminar in Risk Management and Insurance Theory (3).
RMI 6296. Doctoral Seminar in Insurance: Life/Health Insurance Topics (3).
RMI 6395. Doctoral Seminar in Risk and Insurance Theory (3).
RMI 6517r. Supervised Research (1–3). (S/U grade only.)
RMI 6546r. Supervised Teaching (1–3). (S/U grade only.)
RMI 6570r. Doctoral Seminar in Risk Management Theory (3).

**Interdisciplinary Program in Russian and East European Studies**

**College of Social Sciences and Public Policy**

Web Page: [http://www.coss.fsu.edu/russia/](http://www.coss.fsu.edu/russia/)

Director: Lee Metcalf (Social Sciences)

The interdisciplinary program in Russian and East European studies is an international area studies program that is designed to develop a student’s competence in the language, history, culture, and contemporary political and economic setting of a particular country or cultural region. This area studies program is focused on Russia and Eastern Europe. A major or minor in this program serves the needs of: (1) general liberal arts students who wish to learn more about this important area of the world; (2) students who wish to pursue graduate work in this or related fields; and (3) students who seek employment in or related to Russia or Eastern Europe. This program also combines area or country specific courses, which give students the needed cultural immersion with more general comparative courses, and which also provides them with the necessary intellectual tools, the concepts and theories, to make sense out of their particular disciplinary concentrations. Students are to select language and thematic specializations in line with their intellectual interests and career goals and design their program of study around them.

**Computer Skills Competency**

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Russian and East European studies satisfy this requirement by earning a grade of “C-” or higher in CGS 2060 or CGS 2100.

**Requirements**

Students majoring in the program are to construct their study program around three components: (1) a language requirement; (2) area-specific course work and (3) a concepts and theories tool requirement. The total hour requirements for a major are a minimum of twelve semester hours in an approved area language plus an additional thirty-six semester hours beyond the liberal studies requirements (with a grade of “C-” or better in each course). As an interdisciplinary program, no minor is required.

In addition to a 2.0 overall GPA, all students must meet “mapping” requirements. See [http://www.academic-guide.fsu.edu/](http://www.academic-guide.fsu.edu/) for more information.

**Language Requirement**

All students are required to take twelve semester hours of course work in a relevant area language (Russian, German, Czech, Serbo-Croatian, or some other East European language) or demonstrate proficiency at the intermediate college level. Students will be encouraged to bring their chosen language up to an effective level of proficiency in both reading and speaking by either taking additional course work on Florida State University’s campus or by participating in a semester or summer abroad program in their relevant cultural area that is administered by, affiliated with, or approved by Florida State University, as such programs become available. To encourage the achievement of language proficiency, language coursework hours taken beyond the twelve semester hour minimum or demonstrated intermediate college-level proficiency will be counted toward the required thirty-six semester hours for the major.

**Area Specific Course Requirement**

Students are to select at least twenty-four semester hours of course work from the approved area specific course list. Other special topic area-specific courses may be approved from time to time. Students are encouraged to view the term specific course lists posted at their International Studies Blackboard Organization site.

**Concepts and Theories Tool Requirement**

Students are to take at least six semester hours of course work from among those courses listed for Concepts and Theories. Students should select these courses with some care and in consultation with their academic advisor in order to meet the required prerequisites for some of the approved courses.

**Study Abroad**

Students majoring in Russian and East European Studies are strongly encouraged to study abroad. The Summer programs in Croatia and Russia offer relevant course work. See [http://international.fsu.edu/](http://international.fsu.edu/) for more information on the various options available through Florida State International Programs.
Students should consult with the Russian and East European Studies Director about any other study abroad programs they wish to pursue. Course work taken in overseas locations must be approved in advance for credit toward the major.

**Internship**

The Russian East European Studies program encourages students to take advantage of internships with an area focus. Information on possible placements can be found on the International Studies Blackboard Organization site. All application materials, which are also available on the International Studies Blackboard Organization site, must be submitted and all internships must be approved the semester before the internship takes place. See the Russian and East European Studies program advisor in 211 Bellamy for further information.

**Honors in the Major**

The Program in Russian and East European Studies offers honors in the major to encourage talented juniors and seniors to undertake independent and original work as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

**Second Majors**

Majors in Russian and East European Studies may pursue a second major. When students pursue a second major in the College of Social Sciences and Public Policy they may count nine semester hours of course work toward both of their majors. For a second major in the College of Arts and Sciences, only six semester hours may count toward both of the majors.

**Minor**

Students pursuing a minor in the program must complete eighteen semester hours of Russian and East European course work beyond the liberal studies requirement. In this case none of the broader concepts and theories courses will count toward the eighteen semester hour minimum. Students may select freely from all area specific courses.

**Approved Courses**

*Note:* Descriptions of specific courses can be found under the individual departments in which they are taught. In addition to the courses listed below, special topics courses may be approved by the program director in any particular term. These courses appear on the term course lists and are available at the International Studies Blackboard Organization site as well as the program office in 211 Bellamy.

**Area Specific (twenty-four credit hours)**

- **CPO**
  - 3101 European Union (1)
  - 3733 Emerging Democracies of Central Europe (3)
- **CPS**
  - 4321 Contemporary Policy Studies: Contemporary Southeast Europe (3)
- **ECS**
  - 4333 Transition of Soviet and Eastern European Economies (3)
- **EUH**
  - 3205 19th-Century Europe: A Survey (3)
  - 3551 Modern Poland (3)
  - 3571 Russia to Nicholas I (3)

Chair: Gunzburger; Associate Chair for Graduate Studies: Peterson; Associate Chair for Undergraduate Studies: Erlebacher; Professors: Beerli, Erlebacher, Gunzburger, Meyer-Baese, Peterson, Plewa, Slice; Associate Professors: Shanbhag, Wang, Ye; Assistant Professors: Huang, Lemmon; Professor Emeritus: Navon; Courtesy Faculty: Algee-Hewitt, Barbu, Berg, Brown, Cao, Cheng, Curtis, Dai, Flyer, Hill, Kamitsa, Lehoucq, Mascagni, Nedoroda, Oates, Parks, Ridley, Ringler, Ronquist, Thuo, Trenchea, Van Engelen, Wang, Webster, Wilgenbush, Zhou, Zipanski; Research Associate: John Burkarth

Program Overview

Over the last few decades, computation has joined theory and experimentation to form the three pillars of scientific discovery and technological design. Moreover, many of the important problems facing society can only be solved by teams of individuals from a variety of disciplines. Integral to these teams are computational scientists, who provide the simulation, optimization, and visualization algorithms used to solve problems on computers. The main activity of scientific computing is the development of computational tools that have applicability over a range of scientific disciplines.

The Department of Scientific Computing consists of faculty interested in the invention, analysis, implementation, and use of computational algorithms that can be applied to problems arising in several traditional disciplines such as biology and ecology, chemical engineering, chemistry, computer science, geology and geophysics, material science, mathematics, mechanical engineering, and physics and astrophysics. Faculty and graduate students are supported in their research by several federal, state, laboratory, and commercial organizations. Further breadth and depth is added to the research and educational missions of the department through faculty from other departments at Florida State University and individuals from several national laboratories who hold courtesy appointments in the department. These faculty members ensure that the department is ideally positioned to offer innovative degree programs that impart a synergy between the mathematical and applications aspects of scientific computing, thus providing the student with extensive interdisciplinary training.

Students are trained in a truly interdisciplinary environment. The undergraduate program offered by the Department of Scientific Computing is designed to provide broad training in the core methods of computational science across disciplines, followed by in-depth specialization in areas of particular interest to students. Even within specializations, the focus remains on interdisciplinary approaches to solving science and engineering problems. All students are also exposed to research-type experiences as part of the undergraduate degree program.

The Department of Scientific Computing offers the Bachelor of Science (BS) degree program in Computational Science. It also offers a minor in computational science. Please refer to the Department of Scientific Computing Web site at http://www.sc.fsu.edu for updates about the status of the minor and certificate programs.

Computational Resources

The Department of Scientific Computing oversees a large and diverse computing infrastructure in support of research and education. Computing resources include large supercomputers, a number of clusters and computational servers, a laboratory for scientific visualization, and more. To best accommodate research, education, and application development, the department maintains a heterogeneous desktop and workstation environment, as well as a state of the art computer classroom. In addition, the department’s Visualization Laboratory provides high-powered visualization resources to the FSU community for research, analysis of large data collections, and education.

Departmental Programs

The Department of Scientific Computing offers the Bachelor of Science (BS) degree program in Computational Science and a minor in computational science.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at ei-
Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in computational science satisfy this requirement by earning a grade of “C–” or higher in ISC 3313 or COP 3014.

Academic Performance

A grade of “C–” or better is required in all courses required for the BS Degree in Computational Science. A student who has received more than five unsatisfactory grades (U, F, D-, D+) in science, mathematics, statistics, computer science, or engineering courses (and their prerequisites) required for the BS Degree in Computational Science, taken at Florida State University or elsewhere, including repeated unsatisfactory grades in the same required course, will not be permitted to graduate with a degree in computational science.

Requirements for the Baccalaureate Degree in Computational Science

Please review all University and college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin. Changes to the computational science degree requirements are under way. Students should refer to the Department of Scientific Computing Web site at http://www.sc.fsu.edu or obtain, from the department office, revisions to the degree guidelines effected since this printing.

Students should complete the state of Florida common program prerequisites during their first two college years. In order to obtain final graduation clearance from the Department of Scientific Computing, all computational science majors must complete an exit survey.

Requirements for the BS Degree in Computational Science are provided as follows:

1. ISC 3222 Symbolic and Numerical Computations (3)
2. ISC 4220C Algorithms for Science Applications I (4)
3. ISC 4221C Algorithms for Science Applications II (4)
4. ISC 4223C Computational Methods for Discrete Problems (4)
5. ISC 4232C Computational Methods for Continuous Problems (4)
6. ISC 4304C Programming for Science Applications (4)
7. ISC 4931r Junior Seminar in Scientific Computing (1–2)
8. ISC 4932r Senior Seminar in Scientific Computing (1–2)
9. ISC 4943r Practicum in Scientific Computing (3)
10. MAS 3105 Applied Linear Algebra I (4)
11. Approved statistics course designed for statistics majors: STA 3XXX (3) or STA 4XXX (3)
12. Approved science with lab designed for science majors (BSC, CHM, GLY, MET, or PHY) (4)
13. Approved Department of Scientific Computing electives (6)
14. Approved electives from the Department of Scientific Computing or other departments (12)

Requirements for a Minor in Computational Science

A minor in computational science requires a minimum of fourteen hours of coursework, including ISC 3222 and ISC 4304C. The student must take at least one Computational Science Algorithm course [ISC 4220C or ISC 4221C] as well as a Computational Science course from the approved list. Students must also satisfy stated prerequisites before enrolling in each course accepted for minor credit. Grades below “C–” will not be accepted for minor credit.

CAP — Computer Applications
DIG — Digital Media
ISC — Interdisciplinary Natural Science
MAD — Mathematics: Discrete
MAP — Mathematics Applied

Undergraduate Courses

Note: Additional undergraduate courses are being developed. Please refer to the Department of Scientific Computing Web site at http://www.sc.fsu.edu for an up-to-date list of undergraduate courses offered.

ISC 3313. Introduction to Scientific Computing (3). Prerequisite: MAC 2311. This course introduces basic techniques used to design and implement computer games and/or simulation environments. Topics include a historical overview of computer games and simulator, game documents, description and use of a game engine, practical modeling of objects and terrain, as well as the use of audio. Physics and artificial intelligence in games are covered briefly. Programming is based on a scripting language. Topics are assimilated through the design of a 3D game to be designed and implemented in a team environment.

ISC 3222. Symbolic and Numerical Computations (3). Prerequisites: MAC 2311 and MAC 2312. This course introduces state-of-the-art software environments for solving scientific and engineering problems. Topics include symbolic and numerical methods used in algebra, arithmetic, and calculus; 2-D and 3-D graphics; non-linear function fitting and root finding; basic procedural programming; methods for finding numerical solutions to DE’s with applications to chemistry, biology, physics, and engineering.

ISC 3313. Introduction to Scientific Computing (3). Prerequisite: MAC 2311. Corequisite: MAC 2312. This course introduces the student to the science of computation. Topics cover algorithms for standard problems in computational science, as well as the basics of an object-oriented programming language, to facilitate the students’ implementation of algorithms.

ISC 4220C. Algorithms for Science Applications I (4). Prerequisite: MAC 2312. Corequisite: MAC 2311. This course provides basic computational algorithms including interpolation, approximation, integration, differentiation, and linear systems solutions presented in the context of science problems. The laboratory component includes algorithm implementation for simple problems in the sciences and applying visualization software for interpretation of results.

ISC 4221C. Algorithms for Science Applications II (4). Prerequisites: MAC 2312 and ISC 3222. Corequisite: ISC 4304C. This course offers stochastic algorithms, linear programming, optimization techniques, clustering and feature extraction presented in the context of science problems. The laboratory component includes algorithm implementation for simple problems in the sciences and applying visualization software for interpretation of results.

ISC 4304C. Programming for Science Applications I (4). Prerequisites: MAS 3105 and ISC 4304C. This course describes several discrete problems arising in science applications, a survey of methods and tools for solving the problems on computers, and discrete studies of methods; and their use in science and engineering. The laboratory component illustrates the concepts learned in the context of science problems.

ISC 4304C. Programming for Science Applications II (4). Prerequisites: MAS 3105 and ISC 4304C. This course provides numerical discretization of differential equations and implementation for case studies drawn from several science areas. Finite difference, finite element, and spectral methods are introduced and standard software packages are used. The laboratory component is used to illustrate the concepts learned on a variety of applications problems.

ISC 4224C. Computer Applications in Psychology with Laboratory (4). Prerequisites: PSY 2012 (BSC 2010L, CGS 2100, CGS 2960, or ISC 3313) and PSY 3213C. This course is an introduction to computer applications in psychology. The course introduces the student to the design and use of a powerful commonly used software package with application to computational and research elements important to the field of psychology. Topics include complex searches, image and audio manipulation, data analysis, and all in the context of using a variety of software tools and packages.

ISC 4302. Scientific Visualization (3). Prerequisites: MAC 1105 and MAC 2312. This course covers fundamental concepts and techniques for analyzing, visualizing, and interpreting complex data that is collected using a wide variety of scientific measurement techniques. Students will also learn the underlying concepts, data structures, and algorithms in scientific visualization presented in the visualizations and apply using datasets from different disciplines. Classic visualization techniques for scalar, vector, and tensor data such as marching cubes, ray casting, splatting, streamline, and line integral convolution etc. are introduced and popular visualization software is used.

ISC 4304C. Programming for Science Applications (4). Prerequisites: MAC 2312, COP 3014 or ISC 3313 or approved programming course. This course provides knowledge of a scripting language that serves as a front-end to many popular packages and frameworks, along with a compiled language such as C++. Topics include the practical use of an object-oriented scripting and compiled language for scientific programming applications. There is a laboratory component for the course; concepts learned are illustrated in several science applications.
Interdisciplinary Program in SOCIAL SCIENCE

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY
Web Page: http://www.coss.fsu.edu/iss/
Director: Robert E. Crew, Jr., Office of the Dean, College of Social Sciences and Public Policy

The Interdisciplinary Program in Social Science (ISS) provides a multidisciplinary view of contemporary social issues and problems. The program offers students an opportunity to draw on the several disciplines of social science as they seek an understanding of public affairs and answers to questions about society. The departments whose courses may be utilized in the program are anthropology, economics, geography, history, political science, sociology, and urban and regional planning, along with the School of Public Administration and Policy.

The program will be particularly appealing to students who have wide-ranging interests in social issues. Its flexibility permits students to pursue specialized and pre-professional interests and to expose themselves to the variety of perspectives of the social sciences.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in the interdisciplinary program in social science satisfy this requirement by earning a grade of “C-” or higher in CGS 2060 or CGS 2100.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. XXX XXXX: two introductory courses for a total of six credit hours in a social science discipline

Requirements

A major in the interdisciplinary program requires forty-two semester hours, including nine semester hours in courses taken to satisfy liberal studies requirements. For the usual major, work must be taken in at least three departments within the program. There must be a primary concentration of eighteen semester hours in one department, a second concentration of twelve semester hours in another department, while the remaining twelve semester hours may be distributed among any of the remaining social science departments. Students must complete a total of twenty semester hours in courses numbered above 2999. A minimum cumulative grade point average (GPA) of 2.0 on all coursework applied to the major must be maintained.

Students may also, rather than selecting courses in the manner identified above, seek an interdisciplinary concentration in four topical areas of study. These are environmental affairs, law and society, urban studies, and public service. Each of these concentrations are multicourse programs focusing on the named topics. For details about these concentrations, see the program director.

Majors must complete the basic university computer competency requirement. CGS 2060 with a grade of “C-” or better will satisfy this requirement. In addition to a 2.0 overall GPA, all students must meet “mapping” requirements. See http://www.academic-guide.fsu.edu/ for more information.

Degrees

The courses of study offered by the interdisciplinary program in social science lead to the Bachelor of Arts (BA) and Bachelor of Science (BS) degrees.
Requirements for a Minor in Social Sciences for Psychology or Criminology Majors at the Panama City Campus

A minor in the interdisciplinary program in social sciences is available for psychology students at the Panama City campus. Students may obtain the minor by successfully completing a total of fifteen semester hours of coursework in interdisciplinary social science participating departments, which include interdisciplinary social science, anthropology, economics, geography, history, political science, sociology, and urban and regional planning.

Honors in the Major

The ISS program participates in the upper-division honors in the major. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Definition of Prefixes

CPS—Comparative Policy Studies (Multinational)
HSC—Health Sciences
ISS—Interdisciplinary Social Sciences

Undergraduate Courses

CPS 4321. Comparative Policy Studies: Contemporary Southeast Europe (3). This course examines contemporary problems and prospects for Southeast Europe.
CPS 4905r. Directed Individual Study (3). May be repeated to a maximum of nine semester hours.
ISS 1921r. Colloquium in Social Science and Public Affairs (1). Corequisite: Students must enroll in the Social Sciences/Public Policy LLC Program. This course provides a venue for discussing key issues and controversies that students are likely to encounter as they pursue a major in one of the social sciences. Students learn critical issues in debating public policy issues while also gaining an appreciation for topics that shape everyday life. Designed for students enrolled in the Social Science and Public Policy Living-Learning Community (SSPPLC). May be repeated to a maximum of two semester hours.
ISS 2932r. Seminar in Social Science and Public Affairs (3). Corequisite: Students must enroll in Social Sciences/Public Policy LLC Program. This course examines key issues and controversies that students are likely to encounter as they pursue a major in one of the social sciences. Topics vary, and look at major fields of study within the Social Sciences. Designed for students enrolled in the Social Science and Public Policy Living-Learning Community (SSPPLC). May be repeated to a maximum of twelve semester hours.
ISS 2937r. Social Science Honors Seminar (3).
ISS 4905r. Directed Individual Study (1–3). May be repeated to a maximum of six semester hours.
ISS 4906r. Directed Individual Study (3). May be repeated to a maximum of six semester hours.
ISS 4907r. Honors Work (1–6). May be repeated to a maximum of nine semester hours.
ISS 4911r. Special Topics (1–3). May be repeated with permission of the Director of the Interdisciplinary Program in Social Science to a maximum of eighteen semester hours.
ISS 4944r. Internship (3–6). In this internship, students are placed in a variety of employment situations related to their academic interest and conduct, under faculty supervision, research related to a problem or issue facing the sponsor of the internship. May be repeated to a maximum of six semester hours.

Graduate Courses

CPS 5424. Research Seminar in Comparative Managerial and Organization Practices (3).
CPS 5905r. Directed Individual Study (3). (S/U grade only.)
CPS 5911r. Supervised Research (1–5). (S/U grade only.)
HSC 5930r. Special Topics in Social Science (1–3).
HSC 5945r. Internship (3–6).
ISS 5125. Introduction to Economics for Executives (3).
ISS 5326. Marketing in the Public and Nonprofit Sector (1–3).
ISS 5386r. Information and Communication Management (3).
ISS 5905r. Directed Individual Study (3).
ISS 5951r. Problem Analysis Project (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

SOW—Social Work

Social Work

College of Social Work

Web Page: http://csw.fsu.edu/

Professors: Abell, Ai, Clark, Mazzza, Randolph, Smith, Thyer, Vinton;
Associate Professors: T. Gomory, Munn, Noel, Radely, Tripodi, Wilke;
Assistant Professors: Boel-Studt, Lacasse, OniFade, Osteen, Schelbe;
Teaching Faculty II: Shaheen, Vinton; Teaching Faculty II: Ashmore, Boone, Deckerhoff; Dwyer, Graham, F. Gomory, Keroack, Verano; Teaching Faculty I: Kelley, Kinzie, Mathis, Osborne, Ross-Donaldson, Stanley;
Research Faculty: Oehme

The College of Social Work offers programs of study leading to: (1) the Bachelor of Social Work (BSW) degree, designed to enable students to offer direct services to individuals, families, groups, and communities at the general level of social work practice; (2) the Master’s of Social Work (MSW) degree, designed to develop advanced skills to engage in professional social work practice with concentrations in either clinical social work or public policy and administration; and (3) the Doctor of Philosophy (PhD) degree, which is designed to advance the social work profession through the development of researchers/scholars and educators.

Particular attention in all of our course offerings is given to the application of practice without discrimination and with respect, knowledge, and skills related to clients’ age, class, color, culture, disability, ethnicity, family structure, gender, marital status, national origin, race, religion, sex, and sexual orientation.

For complete details of undergraduate degree requirements, plus a description of the College of Social Work, its opportunities, and available financial assistance, refer to the “College of Social Work” chapter of this General Bulletin, or our Web site at http://csw.fsu.edu. Refer to the Graduate Bulletin for graduate programs.

Minor in Social Welfare

A minor in social welfare requires twelve hours in social work courses with a grade of “C−” or better in each course; SOW 3203, SOW 3350, and two SOW electives. At least six hours must be completed at FSU. An application is required for the minor and to be registered for SOW 3350 and SOW 3203. Please note that the minor does not qualify a student to apply for advanced standing graduate programs in social work or for professional certification or licensure.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in social work satisfy this requirement by earning a grade of “C−” or higher in CGS 2060, CGS 2100, or an equivalent course approved by the program director.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. POS X041 or POS X042 or PUP X099
2. BSC X005 or BSC X085 or BSC X010 or PCB X099
3. ECO X000 or ECO X023
4. PSY X012 or PSY X020
5. SYG X000 or SYG X010

Definition of Prefix

SOW—Social Work
Undergraduate Courses

SOW 1054. Human Services Experience (1). (S/U grade only.) Prerequisite: Instructor permission. This course entails a direct human service experience in a social services agency or community organization or program. Thirty hours of volunteer services are required per credit hour. Through the volunteer experience, students are able to observe the implementation of social policy, social problems, budget, limits, and outcomes and learn first-hand how social work students can provide services and to learn about the role social workers play in generalist practice settings with systems of all sizes. May be repeated to a maximum of two semester hours.

SOW 2303. The Social Work Profession (3). In this course, students begin to identify with the social work profession, its history, mission, and core values, and conduct themselves in accordance with the ethical principles that guide professional practice. Students also learn how the social work profession engages in policy and practice to address issues of social and economic well-being. They begin to recognize the social, political, economic, and environmental influences on client systems of all sizes and apply them to their work practice.

SOW 3350. Interviewing and Recording in Social Work (3). This course covers the basic elements of interviewing and recording as utilized in various helping professions including social work. The values and ethics of the social work profession are discussed, along with how interviews can help to promote social and economic justice.

SOW 4104. Human Behavior and the Social Environment (3). This course focuses on reciprocal relationships between human behavior and social environments. Content includes system theory, an ecological perspective, and life course theories that focus on human development at the individual and family level, including interactions between and among systems of all sizes, including groups, societies, and economic systems.

SOW 4108. Women’s Issues and Social Work (3). This course is designed to acquaint majors with the life cycle of women throughout life and the role that social work plays in addressing these issues.

SOW 4152. Human Sexuality (3). This course is a survey of issues and problems associated with human sexuality, intended for social workers and others in helping professions. Emphasis is placed on sexually oppressed groups, sexual life cycle from a psychosocial perspective, and the development of the individual's understanding of sexuality.

SOW 4223. Social Welfare Policies and Programs (3). This course provides a beginning understanding of the relationship between social welfare and social policy from a social work perspective. Students engage in policy practice to address social and economic well-being and to deliver effective social work services across diverse populations. Attention is given to the policies and programs of social welfare; social work's role in social welfare; and policies and programs play in advancing human rights and social and economic justice.

SOW 4247. Homelessness in America: People, Programs, and Policies (3). This course covers poverty in the United States, with particular emphasis on homelessness. It includes content related to values and ethics in programs and policies as well as cultural diversity and social work practice. Particular attention is given to those who suffer from poverty and other societal oppression, such as those who are also people of color, women, gays, lesbians, HIV positive, or disabled.

SOW 4290. Ethical Issues in Social Work Practice (3). This course provides students with a framework of knowledge and skills to prepare them for effective and ethical decision making that is congruent with codes of ethics and standard practice in the social work profession. Also explored are the principles of ethical decision making and various value systems.

SOW 4323. Social Work Practice with Groups (3). Prerequisites: SOW 3350 and SOW 4341. This course is practice-oriented to develop group leaders who have an understanding of group development and effectiveness in the application of knowledge and skills to group intervention and work. The course focuses on both task and treatment groups. Majors only.

SOW 4341. Social Work Practice with Individuals and Families (3). Prerequisites: SOW 3203 and SOW 3350. This course focuses on the development of the generalist practice skills of engagement, assessment, intervention, and evaluation with individuals and families in social work. The empirical bases of a range of theories and models of social work practice are presented. These theories include working with social, economic, and psychological problems and issues, as well as ways to promote social and economic justice within the context of the role of social work intervention.

SOW 4347. Social Networking and Case Management in Social Work (3). This course introduces students to the history, theoretical underpinnings, and strategies of case management in various service delivery systems. Contemporary issues and implications for the changing practice environment are highlighted.

SOW 4360. Social Work Practice with Communities and Organizations (3). Prerequisites: SOW 3350 and SOW 4341. This is one of three courses in the practice foundation curriculum. The course is designed to introduce students to a range of theories and models of social work practice from an ecological framework.

SOW 4403. Introduction to Social Work Research (3). This course introduces students to qualitative and quantitative research methods in order to provide an understanding of a scientific, analytic, and ethical approach to building knowledge for practice. Students' mastery of course content prepares them to develop, use, and effectively communicate empirically-based knowledge. Research knowledge is used by students to provide high-quality services; to initiate change; to improve practice, policy, and social service delivery; and to evaluate their own practice from an evidence-based perspective.

SOW 4414. Statistics for Social Workers (3). This course introduces students to quantitative tools used to describe and interpret data used in social work practice, research, and policy formulation. Emphasis is placed on the interpretation and application of descriptive and inferential statistics; basic probability, confidence intervals, hypothesis testing, analysis of variance, correlation, and regression.

SOW 4454. Grant Writing and Grant Management (3). This course covers the basics of proposals: purpose statements, background and justification, aims or objectives, personnels, budgets, timeline, and evaluation. Emphasis is placed on the development of successful proposals to obtain federal, state, and local funding for social work programs.

SOW 4515. Undergraduate Field Instruction (6-12). (S/U grade only.) Prerequisites: A 3.0 GPA in social work courses and completion of all the required social work courses and prerequisites. Corequisite: SOW 4522. In this course, supervised direct social work experience is provided in various human service settings. May be repeated to a maximum of twelve semester hours.

SOW 4522. Integrative Field Seminar (3). Corequisite: SOW 4510. This course assists students in the integration of their social work courses with social work practice. The course utilizes an ecosystems perspective, focusing on the students' ability to apply the knowledge and skills of generalist social work practice to systems of all sizes.

SOW 4602. Social Work in Health Settings (3). This course focuses on social work practice in health settings from a “person-in-environment” perspective, preparing students with an understanding of the roles that social workers play in health settings, the structure of health care delivery systems, organizational and professional ethics and standards, challenges we face in health care policy, and patient issues and how to help address these issues. Specific knowledge and skills in a health care setting are addressed, including biopsychosocial assessments, chart documentation, treatment planning, and discharge planning.

SOW 4615. Family Violence Across the Lifespan (3). This course provides an ecological perspective emphasizing the interconnections between individuals experiencing violence and their social environments. Emphasis is placed upon broad coverage of all important aspects of family violence, including domestic violence, sexual violence, violence against older people, and violence against children.

SOW 4620. Diversity in Social Work Practice (3). This course enhances student understanding of diversity and prepares students to engage in policies and practices that promote cultural competence. Students are encouraged to discuss the intrinsics of their own particular diverse dominant and minority social statuses and their relations to other persons, especially future social work clients. Although the course is not designed to train students in specific practice skill sets, emphasis is placed on enhancing respectful and empathic communication.

SOW 4622. Social Work with Black Families (3). This course critically analyzes African-American/black family life, culture, structure, and functioning. The focus is on knowledge and skill development for family intervention. Specifically, students review the literature on development of black family structures and major factors that impact on family development. Theoretical models, identify practice strategies and gaps and/or deficiencies in the existing social work practice literature, and focus on the advantages and disadvantages of utilizing these models in practice with black families.

SOW 4627. Mental Health of Diverse Populations (3). This course critically examines various factors that impact the mental health of diverse populations. Students critically review/analyze recent mental health literature concerning the cultural context in which the mental health needs of diverse populations have evolved; the major services required to meet the mental health needs of diverse populations and the availability and accessibility of these services; and the need for culturally competent mental health practice.

SOW 4633. The Social Worker in the Public School System (3). This course introduces students to social work practice in the school setting, including theories of development, issues of child abuse and neglect, and implications for social work intervention with children and families in schools. The focus is on the practical applications of social work in schools, with an emphasis on the biopsychosocial model of human development and behavior and the social work role in promoting the development of students.

SOW 4637. The Social Worker in Correctional Settings (3). This course introduces students to the theory and practice of social work in correctional settings. The course focuses on the unique social work role in correctional settings, including the integration of social work practice with the correctional system, the impact of correctional settings on social work practice, and the role of the social worker in correctional settings. The course also includes an introduction to the role of the social worker in correctional settings, including the integration of social work practice with the correctional system, the impact of correctional settings on social work practice, and the role of the social worker in correctional settings.

SOW 4647. Physical Aspects of Aging (3). This course covers age and health demographics of aging and the physical, cognitive, and psychosocial aspects of aging. Topics include aging and health, behavior, economic constraints, physical and emotional problems, and community and family adversity.

SOW 4645. Gerontological Social Work (3). This course introduces students to social gerontology and gerontological social work. Topics cover the demography of aging and the physical, cognitive, and psychosocial aspects of aging; social and health care policies that impact older persons, their caregivers, and the aging network of services; the impact of ageism, sexism, racism, ablebodism, beautyism, and homophobia on our work with older people; as well as the promotion of dignity, self-determination, and socio-economic justice for older people.

SOW 4650. Child Welfare Practice (3). This course provides a framework of values, knowledge, and skills necessary to practice with vulnerable children and their families. The major focus is on social work in public child welfare agencies and children's mental health agencies. The course utilizes an ecosystems perspective for understanding and assessing the special needs of at-risk children and families.

SOW 4658. Mental Health and Child Welfare (3). This course provides students with knowledge and skills related to the theory, research, and implications of child and adolescent maltreatment for child development and psychopathology.

SOW 4665. Theory and Practice of Social Work in Criminal Justice Settings (3). This course focuses on criminal theories and the development of both evidence-based and generalist social-work practice skills pertinent to working in criminal-justice settings. This course is focused on the social work role in correctional settings, prison/reentry programs, and juvenile-justice settings. The course covers the philosophy and practice of restorative justice and victim-offender mediation programs, emphasizing the needs of both offenders and victims.
Graduate Courses

SOW 5034. The Social Work Profession (3).
SOW 5105. Human Behavior and the Social Environment I (3).
SOW 5109. Women’s Issues and Social Work (3).
SOW 5125. Psychopathology in Clinical Practice (3).
SOW 5153. Human Sexuality (3).
SOW 5235. Policies and Programs in Social Services (3).
SOW 5238. Advanced Policy Analysis (3).
SOW 5248. Homelessness in America: Peoples, Program and Policies (3).
SOW 5281. Ethics in Social Work Practice (3).
SOW 5282. Legislative Advocacy (3).
SOW 5308. Social Work Practice (3).
SOW 5324. Social Work Practice with Groups and Communities (3).
SOW 5325. Advanced Group Practice and Treatment (3).
SOW 5334. Organization and Community System Change (3).
SOW 5335. Theories and Models of Social Work Practice (3).
SOW 5340. Theory and Practice of Poetry Therapy (3).
SOW 5345. Advanced Social Services Administration (3).
SOW 5353. Marital and Couple Counseling in Social Work Practice (3).
SOW 5367. Theory and Practice of Crisis Intervention (3).
SOW 5369. Integrative Seminar in Advanced Social Work Practice (3).
SOW 5376. Budgeting and Finances in the Social Services (3).
SOW 5377. Personnel Administration in the Social Services (3).
SOW 5404. Introduction to Social Work Research (3).
SOW 5435. Social Program Evaluation (3).
SOW 5455. Grant Writing and Grant Management (3).
SOW 5532r. Graduate Field Instruction I (5–10). (S/U grade only.)
SOW 5535r. Graduate Field Instruction II (6–12). (S/U grade only.)
SOW 5537r. Field Instruction: Special Placement (3–12). (S/U grade only.)
SOW 5603. Social Work in Health Settings (3).
SOW 5611. Family Counseling in Social Work (3).
SOW 5614. Family Violence Across the Life Span (3).
SOW 5623. Social Work with Black Families (3).
SOW 5628. Mental Health of Diverse Populations (3).
SOW 5635. The Social Worker in the Public School System (3).
SOW 5646. Gerontological Social Work (3).
SOW 5648. Physical Aspects of Aging (3).
SOW 5655. Social Work with Children and Adolescents (3).
SOW 5666. Theory and Practice of Social Work in Criminal Justice Settings (3).
SOW 5688. Living with AIDS: Prevention, Intervention and Care (3).
Department of SOCIOLOGY

COLLEGE OF SOCIAL SCIENCES AND PUBLIC POLICY

Web Page: http://www.fsu.edu/~soc/  
Chair: Isaac Eberstein; Professors: Barrett, Carlson, Eberstein, Padavic, Quadagno, Reynolds; Associate Professors: Brewer, Burdette, Rohlinger, Schrock, J. Taylor, M. Taylor, Tillman, Tope, Ueno; Assistant Professors: McFarland, Ramirez; Teaching Faculty I: Schwabe; Teaching Faculty II: Lessan; Teaching Faculty III: Weinberg; Professors Emeriti: Ferrand, Ford, Hardy, Hizelrigg, Isaac, Kinloch, Martin, Nam, Orcutt; Turner; Affiliate Faculty: Chiricos, Miles, Milton, Perez-Felkner

Few fields have as broad a scope as sociology, the study of human groups and social life. The sociology major’s interests range from the nuclear family to the many types of societies, from crime to religion, from the divisions of race and class to the integrating symbols of culture, from the sociology of occupations to politics. At Florida State University, the Department of Sociology examines all of these matters and others. Current research is ongoing in such diverse areas as gender, ethnicity, the welfare state, and population.

There are several reasons for pursuing a sociology degree. First, sociology addresses circumstances and events that affect students’ lives today and in the future. Second, a sociology major provides a broad-based, liberal arts education that promotes understanding and sharpens analytical skills. Third, a sociology major is excellent preparation for a career in professions that require an ability to think and write analytically. Sociology graduates have found employment in academia, business, law, medicine, politics, and government. Fourth, sociology prepares students for advanced graduate work in anticipation of careers in research and teaching.

Sociology majors learn how to analyze the hiring, termination, and promotional practices of organizations; anticipate the changes humans will undergo in their life; practice market research; detect social trends; analyze statistical data, evaluate public policies; assess the impact of technological innovations; interpret political and social change in the world system; conduct surveys and interpret their results; project fertility and mortality patterns; and appreciate classic theories of social order and change.

The facilities and resources available to sociology majors include access to the microcomputer lab in the College of Social Sciences and Public Policy and opportunities to work closely with faculty on research projects. The department provides a wide range of courses on important aspects of social life, leading to greater understanding of human society and a variety of skills that are increasingly essential for citizens in a postindustrial, information-based, and rapidly changing global society.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in sociology satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fivc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions necessary for admission into this upper-division degree program:

1. SYA XXXX or SYD XXXX or SYG XXXX or SYO XXXX or SYP XXXX
2. SYA XXXX or SYD XXXX or SYG XXXX or SYO XXXX or SYP XXXX

Core Program

For acceptance as a sociology major, students must have successfully completed Florida State University’s math and English requirements for liberal studies with a grade point average (GPA) of 2.0 or better and meet “mapping” requirements. Sociology majors are encouraged to complete all liberal studies requirements before admission to the College of Social Sciences and Public Policy. To fulfill the computer literacy requirement, students should complete CGS 2060, CGS 2064, or CGS 2100, with a grade of “C–” or better.

Degrees

Students may earn a Bachelor of Arts (BA) or a Bachelor of Science (BS) degree in sociology.

Major

Students must complete thirty semester hours in sociology, with a grade of “C–” or better in each course, including: SYA 4010 Sociological Theory, SYA 4300 Methods of Social Research, and SYA 4400 Social Statistics.

Transfer students must earn a minimum of fifteen semester hours in sociology at Florida State University. Transfer of the required upper-division courses (SYA 4010, 4300, and 4400) is subject to the approval of the department chair or Director of Undergraduate Studies. Sociology majors must also complete a minor in another discipline. The number of hours for this minor is determined by the department in which the student minors.

Minor

General Minor in Sociology

A minor in Sociology may be earned by completing any fifteen semester hours in sociology with a grade of “C–” or better in each course. At least nine of the fifteen semester hours must be completed at Florida State University.

Minor in the Sociology of Health and Aging

The minor in the Sociology of Health and Aging consists of fifteen semester hours of coursework in Sociology. All courses must be completed with a grade of “C–” or better. At least nine of the fifteen semester hours must be completed at Florida State University.

The fifteen credits for this minor must be comprised of any of the following courses, which are offered at least once per year:

- SYA 4930r Selected Topics in Sociology (3) (maximum of six hours of SYA 4930)
- SYD 3020 Population and Society (3)
- SYO 4402 Medical Sociology (3)
- SYP 3730 Aging and the Life Course (3)
- SYP 4550 Alcohol and Drug Problems (3)
- SYP 4764 Aging Policies and Services (3)

Honors in the Major

The Department of Sociology offers a program of honors in the major to encourage talented juniors and seniors to undertake independent and original research as part of their undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

SYA—Sociological Analysis
SYD—Sociology of Demography/Area Studies/Sociological Minorities
SYG—Sociology: General
SYO—Social Organization
SYP—Social Processes

Undergraduate Courses

Introductory Course

SYA 1000. Introductory Sociology (3). This course is an introduction to the fundamentals of sociology. In the course, emphasis is placed on exposure to the basic findings of empirical research studies in a wide range of areas traditionally examined by sociologists.

Sociological Theory and Methods of Research

SYA 4010. Sociological Theory (3). This course introduces the student to the kind of theory that has developed in the field of sociology since its foundation, moving through to the contemporary scene. Major theoretical fields, major theorists, and dominant theoretical issues that continue to be part of the sociological approach to explanation are covered. This is a required course for sociology majors.

SYA 4300. Methods of Social Research (3). This course is a broad coverage of research design, data collection, and data analysis. This is a required course for sociology majors.
SYA 4400. Social Statistics (3). This course involves the application of statistical techniques to sociological data as illustrated in the research and writing of social scientists. As a course for majors, it represents an important part of the student’s methodological training with respect to the statistical analysis of data typically used by sociologists. The student is expected to carry out a number of exercises involving the statistical analysis of sociological data and to interpret the results. This is a required course for sociology majors.

The Family

SYG 2430. Sociology of Marriage and the Family (3). This course focuses on marriage and family relationships over the life course. Topics covered include dating, love, sexuality, cohabitation, marriage, divorce, reconstituted families, parenting, and marital and family relationships in later life. The major course objective is to critically analyze some of our most private social relationships from a sociological perspective.

SYO 3100. Families and Social Change (3). This course is a basic sociological approach to conditions, issues, and problems of familial organization within the context of changing institutional structures of modern society. Attention is given to such questions as: How have spousal roles changed, and why? How do changes in the organization of work affect family experience? How are family and kinship patterns affected by an aging population? etc.

SYP 3703. Childhood in Society (3). This course is about childhood and youth in everyday life. The course explores central themes and features of children’s peer cultures and considers the importance of family and peer experiences for children’s social development.

Personality and Society (Social Psychology)

SYP 3000. Social Psychology of Groups (3). This course represents the study of social psychology from a sociological perspective. Specifically, it is an analysis of the influence of groups and the individual on each other, including the study of norms, group pressure, leadership, motivation, and social personality.

SYP 3350. Collective Action and Social Movements (3). This course explores the origins and organization of social movements, the dilemmas and challenges facing social movements, the relationship between social movements and political institutions, and the role of social movements in causing social change.

SYP 4650. Sports and Society (3). This course explores the topic of sport from a critical perspective focusing especially on inequalities in gender, race, class, and power. This class jointly examines sports as a social mirror that reflects status inequalities as well as the role of sports in perpetuating social inequalities.

Population and Human Ecology

SYO 3200. Population and Society (3). This course examines the causes and consequences of population change in the United States and the world with an assessment of the impact of demographic change on various social institutions.

SYO 3600. Cities in Society (3). This course explores changes in societal scale and structure associated with development of cities and urban societies, the impact on individuals and social groups of the urban context, and the ways that life in cities is influenced by social inequalities related to ethnicity, social class, and other dimensions of social organization.

Social Issues and Change

SYO 3800. Sociology of Sex and Gender (3). This course provides a look at the sociological facets of gender and its effect in society.

SYO 4510. Environmental Sociology (3). This course examines the larger social forces that shape our natural environment, the social foundations of environmental problems; and the social responses to environmental issues, conflicts, and movements.

SYO 4700. Race and Minority Group Relations (3). This course explores historical and contemporary race relations in the United States from a sociological perspective. Specifically, students study the underlying issues that characterize the relations between and among different ethnic and racial groups in the United States.

SYO 4730. African-Americans in Modern Society (3). This course examines the African-American experience in the U.S. with the goal of understanding how historical conditions and events shaped current circumstances. Focus is on African-Americans as historically excluded from full access to economic opportunity, family, education, religion, political, military, and criminal justice) and the consequences of their placement. The course applies sociological theories of race/ethnicity to past and current developments.

SYO 2010. Social Problems (3). This course represents a study of a variety of contemporary social problems in an urbanized society, which may include such topics as education, the family, politics, the economy, race relations, drug use and alcoholism, over-population, and other issues.

SYO 4352. The Sixties: Social Change, Social Movement (3). This course offers a detailed examination of major events and processes of the 1960’s, especially the civil rights struggle, the Vietnam War and antinuclear movement, and the counter culture, from a historical-sociological perspective. The course explores of social change and social movements.

SYO 4374. Gender and Work (3). This course is an introduction to the cultural and structural mechanisms that reproduce gendered outcomes in the workplace. It addresses occupational segregation, the wage gap, sex differences in promotions, unpaid family work, explanations of inequality, strategies for change and resistance to change, and the intersections of gender, race, and class.

SYO 4402. Medical Sociology (3). This course explores why and how social structure influences the distribution of health and illness and illustrates how the medical care system is organized and responds.

SYP 3454. The Global Justice Movement (3). This course critically examines the history, organization, strategies, ideology, opponents, culture, and future prospects of the global justice movement.

SYP 3730. Aging and the Life Course (3). This course explores how changing life course patterns have influenced retirement, health care, politics, and family structure. It also considers the policy choices that have to be made in the twenty-first century as the baby boom generation reaches retirement age.

SYO 3460. Alcohol and Drug Problems (3). This course presents a review and analysis of sociological approaches to the study of alcohol and drug problems. It addresses theoretical perspectives on recreational and deviant drinking and drug use and introduces important empirical methods in the study of alcohol and drug problems and current debates over alcohol and drug policy.

SYO 4570. Deviance and Social Control (3). This course focuses on major theories and research traditions, including structural and social psychological causes of deviant behavior, processes of labeling deviants, and social conflict over definition and treatment of deviance.

SYP 4764. Aging Policies and Services (3). This course examines issues faced by older people and the current federal and state policies and services designed to address these issues. The course explores the policies and issues, in the context of both political economy and the long-term care continuum of services from independence to dependence.

Social Organization

SYO 3200. Sociology of Religion (3). This course focuses on the basic sociological perspective of the social organization and forms of religious life in modern society. In the course, religious groups are studied as organizations that contribute to social stability, social conflict, and social change.

SYO 3460. Sociology of Mass Media (3). This course provides a sociological view of mass communications by critically examining the origin, history, and functions of the American mass media and its effect on social life.

SYO 3530. Social Classes and Inequality (3). This course explores the basic theory of social stratification that is presented and used in description of the stratification system in the United States and other nations. The course gives an opportunity for social mobility in the social structure that is assessed and compared with rates of mobility in other countries.

SYO 4250. Sociology of Education (3). This course presents a sociological approach to the study of education as a social institution, its structure, functions, and role in contemporary life.

SYO 4300. Sociology of Politics (3). This course deals with American political institutions, political organizations, pressure groups, and the public’s participation in political processes. Discussion focuses on current political issues from a sociological perspective.

SYO 4370. The Changing Workplace (3). This course examines the historical development of work and employment relations in the United States. Topics covered include some of the persistent challenges of work, such as the balance between work and family life; inequalities in wages and employment; the struggle to find meaningful work; and the opportunities and challenges presented by the new economy, marked by a combination of high-end professional and technical occupations and low-wage service jobs.

SYP 3540. Sociology of Law (3). This course examines the interrelationship between the legal order and the social order. Limitations of civil and criminal law for conflict management and for implementing social policy are considered.

Others

IFS 2003r. Sexual Health in the Modern World (3). This course analyzes and synthesizes information concerning the impact of a number of current sexual and reproductive health issues. Course materials include the interdisciplinary theorizing of feminists, medical social scientists, anthropologists, demographers, and public health scholars.

IFS 2004. The Hunger Games Trilogy: Collective Action and Social Movements (3). This course is an introduction to the sociological study of collective behavior and social movements. This course is organized to highlight themes in the Hunger Games series by Suzanne Collins, which students analyze during the semester. Students have an opportunity to research a movement of their choosing during the semester.

IFS 2034. Exploring Racial Inequality in the U.S. (3). This course explores the issue of contemporary racial inequality in the United States. More specifically, the course has been designed to provide students with information about trends and patterns of racial inequality in the U.S. today, allowing them to explore competing explanations for continuing racial inequality, and encouraging them to propose and critically assess ideas about potential mechanisms for change.

IFS 2056. Gendered Bodies over the Life Course (3). This course examines how gender, as it is embedded in individual, interpersonal, and institutional dimensions of society, gets woven into experiences of our bodies over the entire life course.

IFS 3016. Examining the Educational Achievement Gap (3). This course is an introduction to the sociological study of collective behavior and social movements. This course is organized to highlight themes in the Hunger Games series by Suzanne Collins, which students analyze during the semester. Students have an opportunity to research a movement of their choosing during the semester.

IFS 3454. Sociology of Hip Hop Culture (3). This course challenges students to examine themes and messages expressed within the subculture of Hip Hop through the application of major sociological perspectives and theories. The course also examines the reciprocal relationship between Hip Hop culture and the broader American society, through engagement with scholarly literature, examination of empirical evidence and execution of student research projects.

SYA 4905r. Directed Individual Study (3). Consent of instructor and departmental chair required. May be repeated to a maximum of nine semester hours.
SYO 4930r. Selected Topics in Sociology (3). May be repeated to a maximum of nine semester hours.
SYO 4931r. Honors Work (3). May be repeated to a maximum of nine semester hours.
SYO 4932r. Tutorial in Sociology (1). Prerequisite: Upper-division sociology major or minor status. This course is a reading and analysis of primary literature on selected topics in contemporary sociology. May be repeated to a maximum of three semester hours.
SYO 4935r. Capstone for Outstanding Majors (3). In this course, through course readings, discussion, and projects, students learn more about how to apply social theory and methods to conduct research and design programs to address social inequality. The course focus varies from offering to offering, depending on the instructor’s area of expertise. Students are invited to enroll in this course based on GPA. May be repeated to a maximum of six semester hours when content changes.

Graduate Courses

Core
SYA 5018. Classical Social Theory (3).
SYA 5126. Contemporary Sociological Theory (3).
SYA 5305. Introduction to Research Methods (3).
SYA 5315. Qualitative Research Methods in Sociology (3).
SYA 5335. Comparative Historical Sociology (3).
SYA 5406. Multivariate Analysis (3).
SYA 5407. Advanced Quantitative Methods (3).
SYA 5455. Social Statistics and Data Analysis (3).
SYA 5458. Social Statistics and Data Analysis for Public Health (3).
SYA 5515. Sociological Research Practicum (0–3). (S/U grade only.)
SYA 5516. Reporting Sociological Research (3). (S/U grade only.)
SYA 6936r. Selected Topics in Research Methods (3).

Demography
DEM 5906r. Directed Individual Study (1–3). (S/U grade only.)
DEM 5910r. Supervised Research (1–5). (S/U grade only.)
DEM 5930r. Special Topics in Demography (3).
DEM 5972r. Master’s Research Paper in Demography (3–6). (S/U grade only.)
DEM 8977. Master’s Research Paper Defense (0). (S/U grade only.)
SYD 5045. Introduction to Demography (3).
SYD 5105. Population Theory (3).
SYD 5133. Population Data (3).
SYD 5135. Techniques of Population Analysis (3).
SYD 5215. Health and Survival (3).
SYD 5225. Fertility (3).
SYO 5177. Family Demography (3).

Health and Aging
SYA 5326. Injury Epidemiology (3).
SYA 6912. Epidemiology Research Paper (6). (S/U grade only.)
SYD 5134. Environmental Epidemiology (3).
SYD 5136. Life Course Epidemiology (3).
SYD 5137. Fundamentals of Epidemiology (3).
SYD 5138. Infectious Disease Epidemiology (3).
SYD 5139. Chronic Disease Epidemiology (3).
SYO 5405. Health Institutions and Social Policy (3).
SYO 5416. Stress and Mental Health (3).
SYO 5426. Gender and Mental Health (3).
SYO 6407. Race, Ethnicity and Health (3)
SYP 5733. Social Psychology of Aging (3).
SYP 5735. Sociology of Aging (3).
SYP 5737. The Dynamics of Aging and Social Change (3).
SYP 5738. Aging Policies and Services (3).

Inequalities and Social Justice
SYD 5705. Sociology of Race and Ethnicity (3).
SYD 5817. Contemporary Theories of Gender (3).
SYO 5107. Sociology of the Family (3).
SYO 5306. Political Sociology (3).
SYO 5335. Sociology of Political Economy (3).
SYO 5376. Sociology of Gender and Work (3).
SYO 5535. Inequalities: Race, Class, Gender (3).
SYO 5547. Race and Gender in Organizations (3).
SYO 6255. Sociology of Education (3).
SYO 6506r. Advanced Research Seminar in Social Organization (3–9).
SYO 6538r. Advanced Research Seminar In Stratification and Inequality (3–9).
SYP 5005. Social Interaction (3).
SYP 5065. Sexuality Over the Life Course (3).
SYP 5305. Collective Behavior and Social Movements (3).
SYP 5447. Sociology of National Development (3).
SYP 6356. Sociology of the Contemporary Women’s Movement (3).

General
SYA 5625r. Proseminar in Sociology (0–3). (S/U grade only.)
SYA 5645. Critical Thinking and Proposal Preparation (3).
SYA 5907r. Directed Individual Study (3). (S/U grade only.)
SYA 5909r. Directed Individual Study (1–3). (S/U grade only.)
SYA 5912r. Supervised Research (1–5). (S/U grade only.)
SYA 5946r. Supervised Teaching (1–5). (S/U grade only.)
SYA 5971r. Master’s Paper Research (0–6). (S/U grade only.)
SYA 6507. Writing Seminar for Social Scientists (3).
SYA 6660. Teaching at the College Level in Sociology (3).
SYA 6933r. Selected Topics in Sociology (3).
SYA 6938r. Selected Topics in Social Institutions, Social Organization, and Social Policy (3).
SYA 8945r. Doctoral Review Paper (1–12). (S/U grade only.)
SYA 8967r. Preparation for Major Area Preliminary Exam (1–12). (S/U grade only.)
SYA 8976. Master’s Paper Completion (0). (S/U grade only.)
SYA 8981. Doctoral Review Paper Defense (0). (P/F grade only.)
SYP 5006. Identity and the Self (3).
SYP 5007. Sociology of Emotion (3).
SYP 5105. Theories of Social Psychology (3).
SYP 5516. Sociological Theories of Deviance (3).

Department of SPORT MANAGEMENT

COLLEGE OF EDUCATION

Web Page: http://www.coe.fsu.edu/SM

Chair and Professor: Jeffrey D. James; Associate Professors: Giardina, Newman; Assistant Professors: Kim, Rodenberg; Research Associate: Reynaud; Teaching Faculty II: Nobles; Teaching Faculty I: Pappas

The Department of Sport Management offers a Bachelor of Science (BS) in Sport Management. Students seeking admission to the Sport Management major must hold a 2.75 GPA in all college coursework and a “C” in all math and English courses. A minimum grade of “C-” or better must be earned in each prerequisite course to be eligible for admission into the program. A minimum grade of “C-” or better must be earned in each departmental core course, in each departmental elective course, and in each non-departmental elective course. If at any point a student has a combination of three or more “D” and/or “F” grades in departmental core, departmental elective, or non-departmental elective courses, the student may be dismissed from the Sport Management program and required to change their major.

Students admitted to the program must maintain a cumulative GPA of 2.75 or higher. If the cumulative GPA falls below 2.75, the student has one subsequent semester to raise the cumulative GPA to 2.75 or higher. If the cumulative GPA is below 2.75 after two semesters, the student will be dismissed from the Sport Management program.

When the final cumulative GPA is calculated for graduation, if a student’s cumulative GPA is below 2.75 the student will not be awarded the degree in Sport Management, even if the student has completed the degree requirements. To be awarded this degree, a student must finish with a cumulative GPA of 2.75 or higher.

The department utilizes centralized advising procedures and all entering students must be advised by the designated coordinator of undergraduate studies.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in Sport Management satisfy this requirement by earning a grade of “C-” or higher in CGS 2060, CGS 2100, or EME 2040.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Sport Management

1. FIN XXXX or MAR XXXX or GEB XXXX
2. MAN XXXX or BUL XXXX or CGS XXXX or STA XXXX or ACG XXXX or REE XXXX
3. HFT XXXX or RMI XXXX or ECO XXXX or SDS XXXX or COM XXXX

Limited Access Programs

No student, transfer or otherwise, may be admitted to limited access, College of Education programs without first completing the general education and program prerequisites. Eligible courses will be determined by the community college or university where the student currently is earning the AA or baccalaureate degree and will be published in the institution’s catalog and in the Community College Counseling Manual.

Sport Management Program

The Sport Management program provides academic coursework necessary to prepare a person to pursue a graduate degree in Sport Management or entry-level employment in a variety of work environments. The course of study leading to a baccalaureate degree with a major in Sport Management encompasses three areas of work: (1) required block and foundation courses; (2) business practices; and (3) electives. The undergraduate major in Sport Management is designated Limited Access and applicants must meet the following eligibility requirements for formal admission to the upper-division program:

- Certification to upper-division OR conferral of the Associate in Arts degree from a Florida public postsecondary institution;
- Completion of a minimum of sixty semester hours;
- Completion of the statewide common prerequisite courses for the program area;
- Hold a minimum cumulative GPA of 2.75 on all attempted college credits;
- Submission of the program-specific application package to the Department of Sport Management on or before March 1 of the Spring term preceding Fall admission to the major.

Definition of Prefixes

PEL—Physical Education Activities (General): Object Centered, Land
PEM—Physical Education Activities (General): Performance Centered, Land
PEN—Physical Education Activities (General): Water, Snow, Ice
PEO—Physical Education Activities (Professional): Object Centered, Land
PEP—Physical Education Activities (Professional): Performance Centered, Land
PET—Physical Education Theory
SPM—Sports Management

Undergraduate Courses

Elective Courses for Non-majors

Note: The 1000-level courses with the repeat designation of “r” may be repeated for a maximum of four semester hours, but only two hours may count toward the University’s 120 hour graduation requirement.

PEL 1002r. Introduction to Outdoor Games (1), (S/U grade only.) This course offers an introduction to outdoor games (field games such as cricket, lacrosse, and frisbee). Students become familiarized with basic rules of the sports covered, as well as, improving individual and team skills.

PEL 1004r. Introduction to Indoor Games (1), (S/U grade only.) This course offers an introduction to indoor games (court games such as dodgeball, kickball, etc.). Students become familiarized with basic rules of the activities covered, as well as, improving individual and team skills.

PEL 1111r. Bowling (1), (S/U grade only.)
PEL 1121r. Golf (1), (S/U grade only.)
PEL 1124r. Varsity Golf (1), (S/U grade only.)
PEL 1131r. Introduction to Billiards (1), (S/U grade only.)
PEL 1214r. Varsity Softball (1), (S/U grade only.)
PEL 1219r. Varsity Baseball (1), (S/U grade only.)
PEL 1321r. Volleyball (1), (S/U grade only.)
PEL 1324r. Varsity Volleyball (1), (S/U grade only.)
PEL 1341r. Tennis (1), (S/U grade only.)
PEL 1344r. Varsity Tennis (1), (S/U grade only.)
PEL 1441r. Racquetball (1), (S/U grade only.)
PEL 1511r. Soccer (1), (S/U grade only.)
PEL 1544r. Varsity Soccer—Women (1), (S/U grade only.)
PEL 1621r. Basketball (1), (S/U grade only.)
PEL 1624r. Varsity Basketball (1), (S/U grade only.)
PEL 1644r. Varsity Football (1), (S/U grade only.)
PEL 1646r. Flag Football (1), (S/U grade only.)
PEL 1650. Ultimate Frisbee (1), (S/U grade only.)
PEM 1101r. Physical Conditioning (1), (S/U grade only.)
PEM 1121. Stretch and Relaxation (1), (S/U grade only.)
PEM 1131r. Basic Weight Training (1), (S/U grade only.)
PEM 1144r. Aerobic Conditioning (1), (S/U grade only.)
PEM 1148. Fitness Walking (1), (S/U grade only.)
PEM 1171r. Aerobic Dance (1), (S/U grade only.)
PEM 1304r. Varsity Track (1), (S/U grade only.)
PEM 1314r. Varsity Cross-Country (1), (S/U grade only.)
PEM 1405r. Self-Defense/Martial Arts (1), (S/U grade only.)
PEM 1461r. Introduction to Fencing (1), (S/U grade only.)
Courses for Sport Management Majors

Note: The courses with the designation of "r" may be repeated.

PET 2013. Sports Officiating (2). Prerequisites: PET 4300 and PET 4302C.

PET 2340. Theory and Practice of Tennis (2). This course is designed to provide students with the necessary knowledge and skills to coach tennis teams. The students learn the principles of coaching/teaching and begin to develop their coaching philosophy.

PET 2624. Theory and Practice of Basketball (2). This course studies teaching and coaching techniques in basketball including current trends and offensive and defensive systems.

PET 3219. Theory and Practice of Baseball (2). This course studies all phases of baseball technique, strategy, teaching, and coaching procedures.

PET 3644. Theory and Practice of Football (2). This course focuses on organization, game theory, and the fundamental techniques of playing, teaching, and coaching.

PET 4020. Sport Tactics (3). This course is designed to promote interest in sports, an understanding of game play, and the ability to play games for a lifetime of physical activity. Students of all levels learn sport tactics and strategies for a variety of sports and games.

PET 3304. Theory and Practice of Track and Field (2). This course studies concepts of the fundamental techniques in track and field, emphasis on varsity coaching and instructional methods.

PET 2303C. Applied Anatomical and Physiology Concepts (4). Prerequisite: CHD 2220. This course applies anatomical and physiological functions of the human body are applied to movement and physical fitness. Lecture and laboratory activities relate information to teaching physical education in schools.

PET 2622C. Care and Prevention of Sport Injuries (3). Prerequisite: PET 2303C. This course discusses specific sport injuries, their treatment, and preventive procedures.

PET 4051. Human Movement Studies (3). This course explores the developmental, biomechanical, and motor learning principles affecting human movement. Emphasizes movement assessment in field-based settings.

PET 4765. Principles and Problems of Coaching (3). This course covers the study of vital socio-psychological aspects of coaching.

PET 4771C. Applied Physical Fitness Concepts (3). Prerequisite: PET 4302C. This course is designed to examine techniques of evaluation for physical fitness and health with a particular emphasis on aerobic capacity, flexibility, strength, and body composition. It entails the design, implementation, and administration of programs for developing physical fitness and lifestyle changes.

PET 4945. Student Teaching in Physical Education (9). (S/U grade only.) Corequisite: SPM 4154. This course is a one-semester school experience in the role of a professional educator.

SPM 4003. Careers in Professional Sport (3). This course covers issues related to professional sports, including sport agents, contracts, the draft process, salary negotiations, and insurance.

SPM 4004. Issues in Sport Management (3). This course introduces students to the major topics, trends, problems, and issues involved in athletics and sport management.

SPM 4011. Sport History (3). This course provides a survey of significant time periods beginning with the Ancient Greeks and ending with the current society. The survey reviews sport issues and practices across time, aiming to inform students about the role of sport in our current society.

SPM 4012. Sport in Society (3). This course covers the role of sports in the United States, focusing on sports as social and cultural phenomena. Focus is on the relationships between sports and social variables such as race and gender, social institutions such as education and family, as well as social issues such as drug use and violence.

SPM 4013. Cross-Cultural Sport (3). This course approaches sport through a variety of global perspectives and cultural lenses. Students are exposed to different national contexts, histories, leagues, and governing bodies, as well as the social, cultural, political, and economic imperatives organizing sport and its management, including global mega-events (e.g., Olympics, World Cup) and national structures (e.g., Barclays Premier League).

SPM 4015. Sport and Film (3). This course allows students to use film and media studies theory to critically engage and interpret a series of popular sport-related films. By the end of the course, students are able to write and think critically about the role that film in general, and sport-based films in particular, play in promoting and challenging dominant formations of gender, sexuality, nationalism, race, social class, and ability in Western society.
For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
Requirements for a Major in Statistics

Please review all college-wide degree requirements summarized in the “College of Arts and Sciences” chapter of this General Bulletin.

Major

The major requires thirty-three total semester hours. Twenty-one of those hours are required statistics courses, including STA 3024 and either STA 4321 or 4442. The additional fifteen semester hours are elective and may be selected from any other 3000- or 4000-level courses with the STA prefix.

Additional requirements include MAC 2311, MAC 2312, and MAS 3105. A grade of “C–” or better must be earned in each statistics or mathematics course counted toward the major. At least seventeen semester hours of courses counted toward the major must be taken at Florida State University. Statistics courses taken at other universities or colleges must be approved by the department.

Options

Students interested in pursuing a course of study in applied statistics are encouraged to take STA 3032, 3064, 4202, and 4203. This provides a strong background in practical data analysis which will be attractive to future employers, as well as completing most of the requirements for a SAS certificate in Programming and Data Analysis.

Students anticipating graduate study in statistics are strongly encouraged to take the STA 4321 and 4322 sequence and additional mathematics courses such as MAC 2313, MAA 4226, 4227, and MTG 4302.

Double Major Overlap Policy

For students double majoring in statistics and another discipline, the department’s overlap policy permits six credit hours of coursework counted toward the other major to also be counted toward the statistics major requirements. This overlap limit excludes prerequisite coursework and collateral mathematics courses (MAC 2311, MAC 2312, and MAS 3105).

Minor

The minor may be in any of the departmental or interdepartmental fields approved by the College of Arts and Sciences. A minor in mathematics may include MAC 2311, 2312, and MAS 3105.

Honors in the Major

The Department of Statistics offers honors in the major to encourage talented students to undertake independent research. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Requirements for a Minor in Statistics

Required are twelve semester hours in statistics courses, including one of STA 2122, 2171, 3024, 3032, 4442, or 4321 with the remaining three coming from an STA course numbered at the 3000 level or higher. Courses should be selected in consultation with the director of the undergraduate statistics program. A grade of “C–” or better must be earned in each course counted toward the minor. At least six semester hours in statistics courses counted toward the minor must be taken in the Department of Statistics at Florida State University. Statistics courses taken at other universities or colleges must be approved by the department. Contact the department for a full list of requirements and courses applicable to the minor.

Examples of Options

1. A minor in statistical methodology with minimal mathematical prerequisites: STA 2122 or 2171, plus nine semester hours selected from any of STA 3024, 3064, 4202, 4203, 4222, 4502, and 4664.
2. A minor with statistical theory as well as methodology: STA 4321 and 4322, plus six hours selected from any of STA 4102, 4202, 4203, 4222, 4502, 4702, and 4853.

Combined Bachelor’s/Master’s Degree Program in Statistics

The combined BS/MS degree program in the Department of Statistics is designed for academically strong students who wish to pursue an accelerated program culminating in a Bachelor of Science (BS) degree in statistics and a Master of Science (MS) degree in applied statistics. This five-year program allows up to fifteen semester hours of coursework to be dually counted toward both the BS and the MS degree.

An undergraduate student wishing to enroll in this program must meet the following criteria:

1. Completion of at least twelve semester hours of mathematics or statistics in the undergraduate statistics major at Florida State University with a GPA of at least 3.0.
2. Completion of at least sixty semester hours at Florida State University with a GPA of at least 3.0. Transfer students must have completed at least two semesters and twenty-four semester hours at FSU with the same minimum GPA.

Undergraduate students may apply as early as the second semester of their sophomore year. If accepted, they should take the GRE at the end of their junior year and apply to the graduate school during the first semester of their senior year.

For more information, please visit http://stat.fsu.edu/graduate/redbook/5Year.php.

Undergraduate Certificate in SAS Programming and Data Analysis

The FSU Department of Statistics offers a certificate in Statistical Analysis System (SAS) Programming and Data Analysis. The certificate is cosponsored by the SAS Institute, providing students with an excellent recognition. The certificate is designed to provide students with in-demand programming and statistical computing skills using one of the leading statistical software packages. Focus is placed on applications that require data management and statistical analyses. A certificate with honors option is available.

The undergraduate certificate requires twelve semester hours consisting of one required core course, STA 3024, and three elective courses with a SAS component selected from the following list: STA 3064, 4173, 4202, 4203, 4664, 4702, and 4853. Students seeking the honors designation must take STA 5066 in place of STA 3024 as the required core course. The coursework will also meet the requirements for students seeking a minor in statistics and can be embedded into a program for those students seeking a major in statistics. In addition, an applicant must submit a binder of coursework involving SAS. The binder will include major assignments or projects from the courses in the certificate program with all four courses being represented. The completed portfolio will demonstrate several dimensions of SAS skills that are deemed valuable for public sector, private sector, or graduate school work. The certificate application form and more program details may be found at http://sas.stat.fsu.edu.

Definition of Prefixes

EGN—Engineering: General
IFS—Interdisciplinary Florida State University Courses
QMB—Quantitative Methods in Business
STA—Statistics

Undergraduate Courses

SCE 4939r. Seminar in Contemporary Science, Mathematics, and Science Education (1).
Note: For the description of the course above, see “Science Education” in the School of Teacher Education chapter of this General Bulletin.
EGN 3443. Statistical Topics in Engineering (3). Prerequisite: MAC 2312. This course explores basic statistical analysis, samples and populations, variability, hypothesis formulation, and data analysis. Use of computer software and interpretation of results.
IFS 2084. Understanding Uncertainty: Games of Skill and Chance (3). This course introduces and employs two mathematical tools useful in quantifying uncertainty: probability and statistics. Questions are considered in the context of games of chance, such as card and casino games, and games of skill, such as sporting events.
QMB 3200. Quantitative Methods for Business Decisions (3). This course examines classical and modern decision-making techniques based on probabilistic concepts. Emphasizes applications to all areas of business.
STA 1013. Statistics through Example (3). This course provides students with a background in applied statistical reasoning. Fundamental topics are covered including graphical and numerical description of data, understanding randomness, central tendency, correlation versus causation, line of best fit, estimation of proportions, and statistical testing.
STA 1220. In My Opinion: Introduction to Designing, Conducting and Analyzing Surveys (3). This course teaches the methods and concepts behind creating and conducting surveys and the statistical tools needed to analyze data gathered from them. Students participate in data collection from different sources for individual- and class-designed surveys.
STA 2023. Fundamental Business Statistics (3). This course covers statistical applications in business, involving graphical and numerical descriptions of data, data collection, correlation and simple linear regression, elementary probability, random variables, binomial and normal distributions, sampling distributions, and confidence intervals and hypothesis tests for a single sample.
STA 2122. Introduction to Applied Statistics (3). Prerequisite: MAC 1105 or equivalent. This course covers normal distributions, sampling variation, confidence intervals, hypothesis testing, two-way analysis of variance, correlation, simple and multiple regression, contingency tables and chi-square tests, and non-parametric statistics. No credit given for STA 2122 if a grade of “C-” or better is earned in STA 2121, STA 3032, or QMB 3200.

STA 2171. Statistics for Biology (4). Prerequisite: MAC 2311 and biology major status or departmental approval. This course provides an introduction to statistics emphasizing applications to biology. Topics include: descriptive statistics, elementary probability, the binomial and normal distributions, confidence intervals and hypothesis tests for means and proportions, correlation and regression, contingency tables and goodness-of-fit tests as well as analysis of variance.

STA 3024. SAS for Data and Statistical Analyses (3). Prerequisite: STA 2023 or STA 2122. This course introduces students to the SAS programming language in a lab-based format. The objective is for students to develop programming and statistical computing skills to address data management and analysis issues using SAS. The course also provides a survey of some of the most powerful tools in use today and provides decision-making strategies in selecting the appropriate methods for extracting information from data.

STA 3032. Applied Statistics for Engineers and Scientists (3–5). Prerequisite: MAC 2312. This course covers calculus-based probability, discrete and continuous random variables, joint distributions, sampling distributions, and the central limit theorem. Topics include descriptive statistics, interval estimates and hypothesis tests, ANOVA, correlation, simple and multiple regression, analysis of categorical data, and statistical quality control.

STA 3064. Introduction to Statistical Modeling with SAS (3). Prerequisites: STA 2122 and STA 3024. This course covers the following topics utilizing the SAS software: ANOVA, linear modeling, logistic regression, bootstrap sampling, simulation using the data step, and some additional analytic topics.

STA 4102. Computational Methods in Statistics I (3). Prerequisites: At least one statistics above STA 1013, some programming experience, or instructor permission. This course utilizes Matlab and a programming language (C/Fortran) is used. The course focuses on topics such as floating point arithmetic, numerical matrix analysis, multiple regression analysis, non-linear optimization, root finding, numerical integration, Monte Carlo sampling, survey of density estimation.

STA 4103. Computational Methods in Statistics II (3). Prerequisite: STA 4102 or instructor permission. This course utilizes Matlab and a programming language (C/Fortran) is used. The course is a continuation of STA 4102 in computational techniques for linear and non-linear statistics. The course also explores topics such as statistical image understanding, elements of pattern theory, simulated annealing, Metropolis-Hastings algorithm, Gibbs sampling.

STA 4173. Fundamentals of Biostatistics (3). Prerequisite: A previous upper division course in statistics or instructor permission. This course introduces students to the statistical methods used to design and analyze studies of the occurrence of disease in human populations.

STA 4202. Analysis of Variance and Design of Experiments (3). Prerequisite: STA 2122, STA 2171, STA 3032, or QMB 3200. This course focuses on topics such as one and two-way classifications, nesting, blocking, multiple comparisons, incomplete designs, variance components, factorial designs, and confounding.

STA 4203. Applied Regression Methods (3). Prerequisite: STA 2122, STA 2171, STA 3032, STA 4322, or QMB 3200. This course focuses on topics such as general linear hypothesis, multiple correlation and regression, residual analysis, and model identification.

STA 4222. Sample Surveys (3). Prerequisite: A statistics course above STA 1013 or instructor permission. This course focuses on simple, stratified, systematic, and cluster random sampling as well as ratio and estimation and multistage sampling.

STA 4321. Introduction to Mathematical Statistics (3). Prerequisite: MAC 2313. This course focuses on topics such as distribution of random variables, conditional probability and independence, multivariate distributions, sampling distributions, Bayes’ rule, counting problems, expectations. Credit not given for both STA 4321 and STA 4442.

STA 4322. Mathematical Statistics (3). Prerequisites: STA 4321 and MAC 2313. This course focuses on topics such as sufficiency, point estimation, confidence intervals, hypothesis testing, regression, linear models, and Bayesian analysis. Subsequent credit for STA 5325 is not permitted.

STA 4442. Introductory Probability I (3). Prerequisite: MAC 2312. This course covers various topics including, but not exclusively: random variables, probability distributions, independence, sums of random variables, generating functions, central limit theorem, and the laws of large numbers. Credit is not given for both STA 4321 and STA 4442, and subsequent credit for STA 5440 is not permitted.

STA 4502. Applied Nonparametric Statistics (3). Prerequisite: A statistics course above STA 1013 or instructor permission. This course explores topics such as the application of nonparametric tests, estimates, confidence intervals, and multiple comparison procedures.

STA 4634. Applied Machine Learning (3). Prerequisite: STA 3032 or instructor permission. This course is a hands-on introduction to statistical methods for supervised, unsupervised, and semi-supervised learning. It explores fundamental techniques including but not limited to supported Vector Machines, Decision Trees, Linear Discriminant Analysis, Random Forests, Neural Networks, and different flavors of Boosting.

STA 4664. Statistics for Quality and Productivity (3). Prerequisites: STA 4322 or instructor permission, as well as STA 2122 or STA 2171 or STA 3022 or STA 4442. This course explores topics such as Deming’s ideas, graphical methods, control charts, and design of experiments for product and process improvement.

STA 4702. Applied Multivariate Analysis (3). Prerequisite: STA 4203 or STA 4322. This course focuses on many topics including autoregressive, moving average, and mixed models; autocovariance and autocorrelation functions; model identification; forecasting techniques; seasonal model identification; estimation and forecasting, intervention and transfer function model identification; estimation and forecasting. Subsequent credit for STA 5856 is not permitted.

STA 4853. Time Series and Forecasting Methods (3). Prerequisites: QMB 3200 or equivalent, STA 2122, STA 2171, STA 3032, and knowledge of PCs or UNIX. This course focuses on many topics including autoregressive, moving average, and mixed models; autocovariance and autocorrelation functions; model identification; forecasting techniques; seasonal model identification; estimation and forecasting, intervention and transfer function model identification; estimation and forecasting. Subsequent credit for STA 5856 is not permitted.

STA 4905. Directed Individual Study (2–3). (S/U grade only.) May be repeated to a maximum of twelve semester hours.

STA 4930. Selected Topics in Statistics, Probability, or Operations Research (2–3). May be repeated to a maximum of twelve semester hours.

STA 4970r. Honors Thesis in Statistics (3). Students selected by the University and the department honors programs may take this course. Consent of the thesis advisor is mandatory. May be repeated to a maximum of six semester hours.

Graduate Courses

STA 5066. Data Management and Analysis with SAS (3).

STA 5067. Advanced Data Management and Analysis with SASS (3).

STA 5107. Computational Methods in Statistics II (3).

STA 5126. Introduction to Applied Statistics (3).

STA 5166. Statistics in Applications I (3).

STA 5167. Statistics in Applications II (3).

STA 5168. Statistics in Applications III (3).

STA 5172. Fundamentals of Biostatistics (3).

STA 5176. Statistical Modeling with Application to Biology (3).

STA 5179. Applied Survival Analysis (3).

STA 5198. Epidemiology for Statisticians (3).

STA 5206. Analysis of Variance and Design of Experiments (3).

STA 5208. Linear Statistical Models (3).

STA 5225. Sample Surveys (3).

STA 5238. Applied Logistic Regression (3).

STA 5244. Clinical Trials (3).

STA 5323. Introduction to Mathematical Statistics (3).

STA 5325. Mathematical Statistics (3).

STA 5326. Distribution Theory and Inference (3).

STA 5327. Statistical Inference (3).

STA 5334. Limit Theory of Statistics (3).

STA 5440. Introductory Probability I (3).

STA 5446. Probability and Measure (3).

STA 5447. Probability Theory (3).

STA 5507. Applied Nonparametric Statistics (3).

STA 5535. Applied Machine Learning (3).

STA 5566. Statistics for Quality and Productivity (3).

STA 5567. Reliability Theory and Life Testing (4).

STA 5570. Applied Multivariate Analysis (3).

STA 5746. Multivariate Analysis (3).

STA 5807r. Topics in Stochastic Processes (3).

STA 5856. Time Series and Forecasting Methods (3).

STA 5906r. Directed Individual Study (1–2). (S/U grade only.)

STA 5910r. Supervised Research (1–3). (S/U grade only.)

STA 5920r. Statistics Colloquium (1). (S/U grade only.)

STA 5934r. Selected Topics in Statistics, Probability, or Operations Research (2–3).

STA 5937. Topics in Medical Consulting (3).

STA 5939. Introduction to Statistical Consulting (3).

STA 5940r. Supervised Consulting (1–3). (S/U grade only.)

STA 5941r. Supervised Teaching (1–5). (S/U grade only.)

STA 6174r. Advanced Methods in Epidemiology (3).

STA 6246r. Advanced Topics in Applied Statistics (2–3).

STA 6346. Advanced Probability and Inference I (3).

STA 6448. Advanced Probability and Inference II (3).

STA 6466. Advanced Probability (3).

STA 6468r. Advanced Topics in Probability and Statistics (2–3).

STA 6555. Nonparametric Curve Estimation (3).

STA 6557. Object Data Analysis (3).

STA 6709. Spatial Statistics (3).

STA 6906r. Directed Individual Study (1–2). (S/U grade only.)

**School of TEACHER EDUCATION**

**College of Education**

**Web Page:** [http://www.coe.fsu.edu/ste/](http://www.coe.fsu.edu/ste/)

**Interim Chair:** Sherry Southerland; **Professors:** Foorman, Hanline, Jones, Lewis, Southerland; **Associate Professors:** Clark, Guerette, Jakubowski, Kim, Menchetti, Myers, Rice, Sampson, Shaw (Panama City), Wanzek, Witte; **Assistant Professors:** Andrews-Larson, Boggs, Dennis, Galeano, Garland, Reed, Whalon, Whitacre; **Teaching Faculty III:** Fesmire (Panama City), Rios (Panama City); **Teaching Faculty II:** A Davis, Glaser, Underwood; **Teaching Faculty I:** Damelio, Daniel (Visiting), Imperial (Panama City), Taylor, Torres; **Professors Emeriti:** Aspinwall, Clark, N. Davis, Dawson, Denmark, Flake, Gallard, Green, G. Jones, Kirby, Lynch-Brown, Mills, Oseroff, Palmer, Piazza, Platt, Ratcliffe, Schluck, Scott, Scott-Simmons, Simmons, Tait, Wheatley, Wolfgang

The School of Teacher Education is committed to high quality personnel preparation programs; service to the state of Florida; and research in elementary education, early childhood education, reading/language arts, special education, visual disabilities, and related areas. The School strives to provide programs of excellence serving undergraduates, graduates, and advanced graduates by teaching, advising, and providing professional role models. Our goal is to prepare educational leaders who will contribute to the betterment of a pluralistic, global society in the context of the state of Florida’s needs for an educated, global-minded citizenry.

The mission is accomplished by:

- implementing personnel preparation programs that are comprehensive and that prepare practitioners to implement state-of-the-art; research-based practices
- conducting high-quality research in authentic settings; and
- translating research to practice through service to the profession at the local, state, and national levels.

For a complete listing of all requirements concerning matriculation into and graduation from a teacher education program, please refer to the "College of Education" chapter in this General Bulletin.

The following majors are offered by the School of Teacher Education:

- Early Childhood Education +
- Elementary Education +
- English Education
- Exceptional Student Education (combined BS/MS program; see Special Education) +
- FSU-Teach – Program in Secondary Science or Mathematics Teaching
- Reading Education/Language Arts *
- Social Science Education
- Special Education *
- Visual Disabilities (two tracks: Visual Studies and Visual Education; see Special Education) +

* graduate only
+ limited enrollment

Program requirements for state-approved educator preparation programs are subject to revision based on changes in Section 1004.04, Florida Statutes, Public Accountability and State Approval for Teacher Preparation Programs, and State Board of Education Rule 6A-5.066, Approval of Educator Preparation Programs.

**Inventory of State-Approved Initial Certification Programs**

The following programs have been approved by the Florida Department of Education (DOE) as Initial Certification Teacher Preparation Programs at the Baccalaureate level:

- Elementary Education w/ESOL and Reading Endorsements (Grades K-6)
- Exceptional Student Education w/ESOL Endorsement (Combined Program, Grades K-12)
- Pre-K/Primary Education w/ESOL Endorsement (Early Childhood, Age 3-Grade 3)
- Visually Impaired Education (Visual Disabilities Education, Grades K-12)
- English Education w/ESOL Endorsement (Grades 6-12)
• Social Science/Middle Grades Social Science Education (Grades 6-12/5-9)
• FSU-Teach Secondary Science or Mathematics Teaching (Grades 6-12)

**Computer Skills Competency**

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in elementary teacher education, elementary/early childhood education, visual disabilities, and exceptional student education satisfy this requirement by earning a grade of “C-” or higher in EME 2040.

**State of Florida Common Program Prerequisites**

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit [https://www.flvc.org/partner-portal/common-prerequisite-manual](https://www.flvc.org/partner-portal/common-prerequisite-manual) for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

- Early Childhood Teacher Education
- Elementary Teacher Education
- Exceptional Student Education
- Visual Disabilities Education

1. **EDF X005**
2. **EDF X085**

**Note:** In addition to EDF X085, a minimum of six credit hours with an international or diversity focus is required. Eligible courses will be determined by the institution where the student is currently earning his or her Associate in Arts (AA) or baccalaureate degree. Foreign language courses may be used to meet this requirement. Contact the department and/or advisor for details.

3. **EME X040**

**Note:** General education courses will be determined by the community college or university where the student is currently earning the Associate in Arts (AA) or baccalaureate degree and will be published in the institution’s catalog and in the Community College Counseling Manual.

**Limited Enrollment Programs**

Please note that admission to limited enrollment programs requires submission of the specific program application, due on or before March 1st of the Spring semester preceding Fall admission, or October 1st of the Fall preceding Spring admission. As limited enrollment programs, these majors reserve the right to impose standards for admission above and beyond the minimum requirements for admission to teacher preparation programs. Fulfillment of the minimum standards does not guarantee admission to limited enrollment programs, so students are encouraged to plan for alternative courses of study should they not be offered admission to a particular major. Note that both programs in childhood education require submission of standardized test scores, either SAT or ACT, as criteria for admission.

**EARLY CHILDHOOD EDUCATION**

**Web Page:** [http://www.coe.fsu.edu/earlychildhood](http://www.coe.fsu.edu/earlychildhood)

The primary goal of early childhood education is to prepare educational leaders who are capable of working with the child, the family, and the community from age three, pre-K, and kindergarten through 3rd grade. Coursework and extensive field experiences prepare graduates with specializations appropriate for educating the young child and designing curriculum for young children.

**Baccalaureate Curriculum in Early Childhood Education Leading to Florida Teacher Certification**

An undergraduate curriculum is offered for a Bachelor of Science (BS) degree in early childhood (primary) education with English for Speakers of Other Languages (ESOL) endorsement preparing students with major emphasis to teach ages three, pre-K, and kindergarten through 3rd grade.

Each student preparing to teach early childhood (primary) education must take EEC 4204, 4301, 4303, 4400, 4604, 4907r; 4E3; EDE 4316; EEX 4070, 4212; LAE 4314; MAE 4300; RED 4310, 4510; SCE 4310; SSE 4113; TSL 4080, 4091. These courses are restricted to admitted early childhood (primary) education majors only and must be taken in sequence. Students must complete all courses within a given semester with a grade of “C” or better and maintain a cumulative 2.5 GPA or better to be allowed to continue to the next semester. All early childhood (primary) education students are assigned to the most appropriate location for student teaching, or to the London program, when available. For a complete listing of courses and requirements, please contact the undergraduate coordinator with the School of Teacher Education in G107 Stone Building.

**Admission Requirements**

Early childhood education is a limited access, limited enrollment program, and admission is based on availability of faculty and space. Students planning to enter early childhood education must document their experiences working with a group of young children in settings such as camp counseling, teacher aide, substitute teaching, scouting team leader, swimming instructor, or a setting approved by the program prior to acceptance into the program. The program admits students once a year for the Fall semester.

All students are urged to seek advising from the lower division advisors in the Office of Academic Services, 2301 Stone Building; All students must complete: (1) the liberal studies degree requirements summarized in the “Baccalaureate Degree Requirements” chapter of this General Bulletin; (2) the state of Florida common prerequisites for early childhood majors described earlier in this section; (3) the requirements for admission into a teacher education program described in the “College of Education” chapter of this General Bulletin; (4) a “C” or better in nine semester hours of college English and college math; and (5) application into the program as follows.

**Application Requirements**

To be considered for admission into the early childhood major, students must submit an application by March 1st for Fall semester admission (an interview may be required following submission of an application). Applicants are selected on the basis of the following criteria: GPA, SAT/ACT, General Knowledge Test, relevant experience, and professional promise.

1. Application form (available in G107 Stone Building or on the Web at [http://www.coe.fsu.edu](http://www.coe.fsu.edu))
2. Transcript of previous coursework and documentation of test scores (SAT/ACT, General Knowledge Test) and GPA
3. Three references:
   a. One from someone who taught you in either junior high school, high school, or college
   b. One from someone who has observed you interacting with children
   c. One of your choice
4. Essay: your response to Teaching in a Changing World (one to two pages)
5. Checklist of program requirements
6. Documentation of current coursework.

**Requirements**

**Background Check:** The state of Florida requires that all school districts initiate a level II (FDLE and FBI) criminal background check on all adults who work in schools. Because all courses in early childhood education have a required school component, it is not possible to pass any of the courses if the student is blocked from entering Leon County Schools. Any student who is not able to document that he/she has been cleared by the end of the second week of classes in the first term enrolled will be required to drop all courses and withdraw from the program.

**Professional Behaviors and Dispositions:** While enrolled in the early childhood education program, the student is expected to demonstrate behaviors and dispositions that conform to the “Code of Ethics” (State Board of Education Rule 6B-I.001, FAC) and the “Principles of Professional Conduct in Florida” (State Board of Education Rule 6B-I.006, FAC). The program reserves the right to refuse or discontinue enrollment of any student who violates these expectations or in the judgment of a majority of the faculty does not meet the program standards.

### ELEMENTARY EDUCATION

**Web Page:** [http://www.coe.fsu.edu/elementaryed](http://www.coe.fsu.edu/elementaryed)

An undergraduate curriculum is offered leading to a Bachelor of Science (BS) degree in elementary education with English for Speakers of Other Languages (ESOL) and Reading endorsements preparing students to teach grades K through 6. The program is structured as four groups of courses (Fall and Spring semesters) and one Summer course. Courses in elementary education are restricted to elementary education majors only. Prospective applicants who already have a bachelor’s degree in another major are encouraged to seek admission to the master’s degree program leading to certification in elementary education.

#### Admission Requirements

Elementary education is a limited access, limited enrollment program based on availability of faculty and space. New students are admitted for both the Fall and Spring semesters; students should work closely with an advisor to plan completion of basic requirements around the appropriate timetable. Students planning to enter elementary education must: (1) complete the liberal studies requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin; (2) complete the state of Florida common program prerequisites for elementary education majors described earlier in this section; (3) meet the requirements for admission into a teacher education program described in the “College of Education” chapter of this General Bulletin; (4) achieve a “C” or better in nine semester hours of college English and college math; and (5) make application to the program as follows.

#### Application Requirements

To be considered for admission into elementary education, students must submit an application and the following materials no later than March 1st of the Spring term preceding Fall admission and no later than October 1st of the Fall term preceding Spring admission. Applicants are selected on the basis of the following criteria: GPA, SAT/ACT, submission of passing scores on all parts of the General Knowledge exam, relevant experience, and professional promise.

1. A completed departmental application form
2. All transcripts
3. Minimum cumulative GPA of 2.5
4. A class schedule showing all classes for which the student is currently enrolled (e.g., a copy of a Web schedule)
5. A statement of courses to be taken prior to enrollment if not included on the class schedule (e.g. Summer courses for Fall term admission)
6. Either SAT or ACT score
7. Results from the FTCE GK exam (if GK results have not yet been received, a statement of when the exam was taken should be provided).

#### Acceptance of Transfer Courses—Elementary Education Undergraduate Program Leading to Certification

Due to the infusion of competencies in courses across the program leading to endorsements in reading and ESOL, the acceptance of transfer courses toward the undergraduate degree in Elementary Education BS Degree is limited. The three program courses (or their equivalents) that are eligible for transfer, after review and approval of syllabi by program faculty, are EEX 4070, Including Students with Disabilities in the General Education Curriculum; EDF 4210, Education Psychology: Developing Learners; and EEC 4303, Expressive Arts for the Young Child. Applicants who wish to explore transfer of courses must provide appropriate course syllabi from other institutions to FSU Elementary Education Faculty for review prior to admission into the program.

Please do not assume that upper-level coursework will transfer for credit towards the Elementary Education BS Degree at Florida State University. Contact the program faculty with questions and/or concerns.

### Required Major Courses

Each student preparing to teach elementary education must take EEC 4303; EDE 4316, 4907, 4943; EDF 4210; EDG 4410; EEX 4070, 4212; LAE
4314; MAE 4310, 4326; RED 4310, 4510, 4941; SCE 4310; SSE 4113; TSL 4080, 4081. These courses are restricted to formally admitted elementary education majors only and must be taken in sequence. Students must complete all courses within a given semester with a grade of “C” or better and maintain a cumulative GPA of 2.5 to be allowed to continue to the next semester. All courses with the exception of EEC 4303, EDF 4210, and EEX 4070 must be taken within the scheduled group of sequenced courses.

Student Teaching Alternatives

Five geographical areas of Florida have been designated as regions where students may complete their student teaching internship in School of Teacher Education-approved primary and secondary placements. These areas are subject to change and the school will provide a list of approved counties for student-teaching placement when applications for student teaching are submitted. The school reserves the right to restrict elementary education students with a GPA of less than 3.25 to the local area for student teaching.

Honors in the Major

The elementary education program offers honors in the major to encourage talented juniors and seniors to undertake independent research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Requirements

Background Check: The state of Florida requires that all school districts initiate a level II (FDLE and FBI) criminal background check of all adults who work in schools. Because all courses in elementary education have a required school field component, it is not possible to pass any of the courses if the student is blocked from entering the Leon County Schools. Any student who is not able to document that he/she has been cleared by the end of the second week of classes in the first term enrolled will be required to drop all courses and withdraw from the program.

Professional Behaviors and Dispositions: While enrolled in the elementary education program, the student is expected to demonstrate behaviors and dispositions that conform to the “Code of Conduct” (State Board of Education Rule 6B-1.001, FAC) and the “Principles of Professional Conduct in Florida” (State Board of Education Rule 6B-1.006, FAC). The program reserves the right to refuse or discontinue enrollment of any student who violates these expectations or in the judgment of a majority of the faculty does not meet the program standards.

Definition of Prefixes

CGS—Computer General Studies
EDE—Education: Elementary
EDG—Education: General
EME—Education: Technology and Media
LAE—Language Arts and English Education
MAE—Mathematics Education
RED—Reading Education
SCE—Science Education
SSE—Social Studies Education

Undergraduate Courses

EDE 3201. The Teacher in the Elementary and Middle School (3). Corequisite: Block I. This course is an investigation of the role of the teacher from perspectives of planning, curriculum, organization, management, and problem solving.

EDE 4302. Literacy Assessment and Instruction (3). Prerequisites: RED 4310, MAE 4326, TSL 4080. Corequisite: RED 4510. This course is designed to provide students with competencies in the use and development of assessments and in using assessments to inform instruction. Emphasis is placed on the administration and interpretation of formal instruments and informal assessment procedures. This course addresses the Florida Educator Accomplished Practices and Competency 3 of the Florida Reading Endorsement.

EDE 4316. Differentiating Reading and Content Area Literacy Instruction (3). Prerequisites: LAE 4314, RED 4310 and TSL 4080. Corequisite: RED 4510. This course addresses research-based literacy strategies and content essential for differentiating reading instruction across content areas, using assessments to inform instruction, and implementing tiers of intervention.

EDE 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

EDE 4907f. Directed Field Experiences (1–3). (S/U grade only.) Corequisites: Blocks I, II, or III. This course requires participation in a public school classroom with University supervision. May be repeated to a maximum of twelve semester hours to be taken in the following manner: at least one hour in Block I, one hour in Block II, and two hours in Block III.

EDE 4943. Student Teaching in Elementary Education (10). (S/U grade only.) Prerequisites: Blocks I, II, and III. Corequisite: Block IV.

EDE 4970r. Honors Work (3). This course is open to participants in the elementary education honors program. Up to twelve semester hours of honors work may be taken. Six thesis hours are required. Seminars are optional.

EDG 4410. Classroom Management and Legal Issues (3). Prerequisites: MAE 4326, RED 4310, and TSL 4080. Corequisite: EDE 4907. This course is designed to provide specific knowledge and opportunities to apply skills in preparation for entering the education profession. Topics include classroom management, classroom routines, organizing for instruction, planning for instruction, effective communication, knowledge of legal and ethical responsibilities of teachers, and safe learning environments.

EME 4311. Technology and Learning for Elementary and Middle School (3). Prerequisite: EME 2040 or instructor permission. This course is designed to help pre-professional teachers use technology for the development of higher learning skills. Included in the technology content are animated graphics, scanned pictures, and linked files. Students work with students in schools to apply concepts from the class. Students acquire technology skills that allow them to develop electronic professional portfolios.

LAE 3414. Literature in the Elementary School (3). Corequisite: Block I. This course approaches building a literature program for the elementary grades. Critical survey of literature for children and consideration of teaching techniques.

LA 3414. Language Arts for the Elementary School (3). This course introduces fundamental concepts and questions about oral and written language as it relates to classroom instruction and assessment, and provides students with opportunities to practice strategies and techniques for teaching reading, writing, and assessing literacy. Covers a wide range of literature, as well as the writing process and concepts to develop extensive vocabulary, listening, viewing, and speaking. Children’s literature supports effective instructional planning and implementation for literacy development in a print language rich environment.

MAE 4310. The Teaching of Elementary School Mathematics (3). Prerequisites: Blocks I and II. Corequisite: Block III. This course develops specific instructional techniques to maximize success in the child’s learning of mathematics.

MAE 4326. How Children Learn Mathematics (3). Prerequisite: Block I. Corequisite: Block II. This course focuses on children’s development of mathematical content and the development of mathematics curriculum from children’s view points. Technology as a tool for learning mathematics is included in the course.

RED 4310. Early Literacy Learning (3). Prerequisites: EDF 1005 and EDF 2085. This course prepares pre-service teachers to teach beginning reading, targeting the needs of a wide range of learners, including those of varying abilities and from diverse cultures. The content addresses research-based strategies, materials, technology, assessment, classroom management, and collaboration with other professionals and parents.

RED 4510. Teaching Reading in the Elementary School (3). Prerequisites: Blocks I and II. Corequisite: Block III. This course consists of methods and materials for teaching developmental reading based on holistic reading/language comprehension strategies and skill development.

RED 4941. Elementary Education Reading Practicum (3). Prerequisites: LAE 4314, RED 4310, RED 4510 and TSL 4080. This capstone reading course provides students the opportunity to assess and tutor children who are struggling readers.

SCE 4310. Teaching Science in the Elementary School (3). Prerequisites: Blocks I and II. Corequisite: Block III. This course is designed to engage the student in self-directed, meaningful science activities for positive, cognitive, and affective growth.

SSE 4113. Elementary School Social Studies (3). Prerequisite: Block I. Corequisite: Block II. This course discusses content, applications, and materials in the social sciences from grades K–6.

MAE 5318. The Topics and Teaching of Elementary School Mathematics (3).
Secondary English Education Undergraduate Program

The program in English education requires coursework in English, English education, teaching English as a second language, reading, and professional education. After meeting state of Florida common program prerequisites, students in English education must complete a minimum of twenty-one semester hours of English coursework. Courses must include those that focus specifically on these areas: minority American literature, American literature, multicultural literature, Shakespeare, British literature, linguistics, and advanced composition. Students should see an advisor in English education for specific courses satisfying these requirements.

In English education, candidates must complete LAE 3331, 3333, 4323, 4332, 4360, 4863, 4941, 4942 (student teaching), RED 4335. Additional English education coursework may be taken as independent study (LAE 4905) or in special topics in teaching English (LAE 4930).

All candidates also are required to take TSL 4080 and 4081. When taken in conjunction with the courses listed above, students become eligible for the state ESOL endorsement in teaching English as a second language. They also must pass the subject area and professional knowledge portions of the Florida Teacher Certification Examination prior to student internship (LAE 4942), and must pass the General Knowledge portion prior to admission to the program.

Six semester hours of upper division professional education courses are required (as explained in the "College of Education" section of this General Bulletin). Students must complete all required coursework before being admitted to student teaching. Students are encouraged to student teach in the local area (Area I) or in the other areas supported by the College of Education.

In addition to meeting the College of Education criteria for admission to teacher education, students must meet the following standards in order to student teach: 1) have a "C+" or above in all courses required for the major; 2) maintain an overall 'all college' GPA of 2.5 or higher; 3) Passing score on all required subtests of the Florida Teacher Certification Exam (The FTCE General Knowledge Test; The FTCE Professional Education Test, and the FTCE Subject Area Exam in English 6-12). For more information on these exams, go to the Florida Department of Education; and 4) approval by the English education faculty.

Students must meet all of these criteria in order to be eligible to student teach.

Progression to Upper-Division Programs

All first-time-in-college (FTIC) freshmen with a University matriculation date of Summer 2008 or later may make application to upper-division Middle and Secondary Education programs upon completion of all minimum requirements being met. Applicants should submit a completed program application to the Office of Academic Services and Intern Support, 2301 Stone Building. Students affected by this policy are advised to work closely with an advisor to plan completion of Liberal Studies for the 21st Century requirements and program prerequisites.

All applicants must have fulfilled the common program prerequisites, specific program prerequisites, and have satisfied all other criteria for admission to Teacher Education programs prior to their first semester in the program, including achievement of a passing score on the General Knowledge portion of the Florida Teacher Certification Examination. See the section entitled Planning Guide to Educator Preparation Programs under the “College of Education” chapter in this General Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in all middle and secondary education programs except FSU-Teach satisfy this requirement by earning no less than a “C-“ in EME 2040.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

English Teacher Education

1. EDF X005
2. EDF X085

Note: In addition to EDF X085, a minimum of six credit hours with an international or diversity focus is required. Eligible courses will be determined by the institution where the student is currently earning his or her Associate in Arts (AA) or baccalaureate degree. Foreign language courses may be used to meet this requirement. Contact the department and/or advisor for details.

3. EME X040
4. SPC X017 or SPC X608
5. ENG X101 or equivalent composition
6. ENG X102 or equivalent composition
7. LIT XXXX or AML XXXX or ENL XXXX

Definition of Prefixes

LAE—Language Arts and English Education
RED—Reading Education
SSE—Social Studies Education

Undergraduate Courses

Note: English education majors also must complete coursework offered through the Department of English, the Educational Foundations Program, the Educational Psychology Program, and the Multilingual/Multicultural Education Program. Please see the department for details.

LAE 3331. Teaching Literature and Drama in High Schools (3). Prerequisite: Admission to English Education program. This course explores recent adolescent literature, resources and methods for teaching literature in high schools, uses of creative dramatics in teaching literature and language skills.

LAE 3333. Teaching Writing and Language in High Schools (3). Prerequisite: Admission to English Education program. This course focuses on the attitudes, materials, and procedures for teaching written composition, language, and grammar; planning instruction and evaluating student writing.

LAE 4323. Adolescent Literacy and Young Adult Literature (3). Prerequisites: LAE 3331, LAE 3333, TSL 4080, completion of all English Education admission requirements, including prerequisites, GPA, and FTCE General Knowledge exam. Corequisites: RED 4335, TSL 4081. This course seeks to explore ways in which young adult literature meets many of the needs of secondary school students. Students immerse themselves in the literature of young adults in order to enjoy it as a reader, recommend it to students and colleagues, and implement it within the middle school and high school curriculum.

LAE 4332. Applied English Linguistics for Teachers (3). Prerequisite: A minimum of six semester hours in composition and six semester hours in literature. This course is designed for prospective middle and high school teachers in contemporary approaches to English linguistics taught in Florida public secondary schools: grammar, usage, dialectology, diction (vocabulary development), semantics, and lexicography. Linguistic content is related to contemporary theories of learning.

LAE 4360. Classroom Management and Planning Instruction in Middle/High School English (3). Prerequisites: LAE 3331 and LAE 4323. This course is to be taken during the final semester of coursework, with LAE 4941. A careful consideration of the role of the secondary schoolteacher of English with special attention to effective classroom management and planning for instruction and evaluation of student progress.

LAE 4363. A Survey of British Literature for English Teachers (3). This course provides those seeking an undergraduate English Education degree with the opportunity to develop an understanding of the scope of British literature. Participants explore historical, political, and social events that influenced the creation of literature from the Anglo-Saxon era to the present, post-modern period.

LAE 4384. A Survey of American Literature for English Teachers (3). This course is designed for secondary English teachers in need of developing content knowledge. The primary focus is on reading a variety of literary works suitable for teaching grades six through twelve.
FOREIGN AND SECOND LANGUAGE TEACHING

New admissions to this program are suspended at the baccalaureate level; no applications will be accepted.

Definition of Prefixes

EAP—English as a Second Language for Academic Purposes
FLE—Foreign Language Education
LIN—Linguistics
TSL—Teaching English as a Second Language
Education portion of the Florida Teacher Certification Exam, and retention of passing scores on the appropriate Subject Area exam and Professional Education common core of EDF X005, EDG X701, and EME X040 and may be submitted upon achievement of passing scores on the appropriate Subject Area exam.

Grade Point Average (GPA): To be admitted to Teacher Education and the major prior to formal admission, students will have completed or achieved: SMT 1043 and SMT 1053 methods courses, the common-course prerequisites for the respective content-area major, and a passing score on all four sections of the General Knowledge portion of the Florida Teacher Certification Exam.

Note: Please visit http://www.fsu-teach.fsu.edu/ for further details.

### State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.fwc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into these upper-division degree programs:

#### FSU-Teach Applied Geosciences
1. MAC X311
2. MAC X312
3. PHY X048/X048L and PHY X049C/X049L, or PHY X048C and PHY X049C
4. CHM X045/X045L and CHM X046/X046L, or CHM X045C and CHM X046C
5. SMT X043
6. SMT X053

Note: Transfer students will be able to take SMT X043 and SMT X053 while enrolled in upper division.

#### FSU-Teach Biology
1. BSC X010/X010L or BSC X010C or BSC X040/X040L
2. BSC X011/X011L or BSC X011C or BSC X041/X041L
3. CHM X045/X045L or CHM X045C, or CHM X040 and CHM X041
4. CHM X046/X046L or CHM X046C
5. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C, or PHY X053/X053L and PHY X054/X054L, or PHY X048/X048L and PHY X049/X049L
6. MAC X311 or MAC X233 or MAC X253 or MAC X281 or MAC X241
7. MAC X312 or MAC X282 or MAC X234 or STA X023 or STA X024 or STA X321
8. SMT X043
9. SMT X053

Note: Transfer students will be able to take SMT X043 and SMT X053 while enrolled in upper division.

#### FSU-Teach Chemical Science
1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. CHM X210/X210L and CHM X211/X211L, or CHM X210C and CHM X211C
4. MAC X311 or MAC X281
5. SMT X043
6. SMT X053

Note: Transfer students will be able to take SMT X043 and SMT X053 while enrolled in upper division.

### Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in FSU-Teach/applied geosciences satisfy this requirement by earning no less than a “C” in ISC 3523C. Undergraduate majors in FSU-Teach/biology satisfy this requirement by earning no less than a “C” in BSC 2010L or ISC 3523C. Undergraduate majors in FSU-Teach/chemical sciences satisfy this requirement by earning no less than a “C” in CHM 3120L or ISC 3522C. Undergraduate majors in FSU-Teach/mathematics satisfy this requirement by earning no less than a “C” in COP 3014 or ISC 3313. Undergraduate majors in FSU-Teach/physical science satisfy this requirement by earning no less than a “C” in COP 3014, ISC 3313, or PHZ 4151C.

# FSU-TEACH PROGRAM IN SECONDARY SCIENCE OR MATHEMATICS TEACHING (SSMT)

Web Page: http://www.fsu-teach.fsu.edu/

Co-Directors: Dr. Sherry Southerland (College of Education), Dr. Ellen Granger (College of Arts and Sciences); Associate Director: Dr. Robbin Smith

Core Faculty: Andrews-Larson, Clark, Granger, Harper, Smith, Southerland

Master Teachers: Chalfant, Dyrar, Kelso, Rose

Jointly developed by the College of Arts and Sciences and the College of Education, the FSU-Teach program offers a fully-integrated undergraduate curriculum with concentration areas in middle and secondary science or mathematics education. The FSU-Teach program is directed by Dr. Ellen Granger in the College of Arts and Sciences and Dr. Sherry Southerland of the College of Education; contact Dr. Granger at granger@bio.fsu.edu or Dr. Southerland at ssoutherland@fsu.edu for further details.

The program is a double-major only curriculum requiring students to complete a primary major in one of the sciences (biology, chemical science, geosciences, or physical science) or in mathematics in addition to a secondary major in Secondary Science or Mathematics Teaching (SSMT). The secondary discipline areas has special tracks for FSU-Teach students enabling them to complete both of their majors in four years (120 hours). Students may begin taking courses in the program as soon as they matriculate at FSU. Freshman and sophomore students will apply for provisional acceptance to the program after completion of the first two prerequisite courses, SMT 1043 and SMT 1053, during the semester of enrollment in SMT 3100, Knowing and Learning. Juniors or seniors will apply once adequate progress in courses in the primary major is achieved. Once certified to upper-division status by the College of Arts and Sciences, students in the FSU-Teach content-area majors with cumulative GPAs of 2.5 or better and a passing score on all sections of the General Knowledge portion of the Florida Teacher Certification Exam must submit an application for formal admission to Teacher Education and the required second major (SSMT) during the sophomore year at the earliest. At formal admission, students will have completed or achieved: SMT 1043 and SMT 1053 methods courses, the common-course prerequisites for the respective content-area major, and a passing score on all four sections of the General Knowledge portion of the Florida Teacher Certification Exam. Although students are urged to complete their formal admission to Teacher Education and the SSMT major as soon as possible upon being certified for upper-division status, they must be admitted to Teacher Education and the major prior to final term apprenticeship (student teaching). Application for student teaching is submitted upon achievement of passing scores on the appropriate Subject Area Exam and Professional Education portion of the Florida Teacher Certification Exam. Note that FSU-Teach majors are exempt from the statewide pre-education common core of EDF X005, EDG X701, and EME X040 and may be admitted in any semester of the academic year. The program is structured to allow matriculation at multiple entry points for students at different stages of their undergraduate enrollments (freshman through senior). The program encourages all students with qualifying science or mathematics coursework to explore teaching by taking the SMT 1043 and SMT 1053 methods courses and have their in-state tuition reimbursed with a course grade of “C–” or better. These courses are ALSO required for graduation—HIS 3505, ISC 3523C, and MAT 3503 (for mathematics majors).

Graduation from the FSU-Teach program requires successful completion of a semester-long internship in a Florida public school, completion of both sets of coursework requirements for the double-major curriculum, achievement of passing scores on the appropriate Subject Area exam and Professional Education portion of the Florida Teacher Certification Exam, and retention of a cumulative GPA of 2.5 or better in both majors.
FSU-Teach Mathematics

1. COP XXXX: one scientific programming course for three credit hours designed for computer science majors
2. MAC X311
3. MAC X312
4. MAC X313
5. BSC XXXX/XXXVL or CHM XXXX/XXXVL or PHY XXXX/ XXXXL or GLY XXXX/XXXVL: one laboratory based science course for four credit hours designed for science majors
6. MAP X302
7. SMT X043
8. SMT X053

Note: A “C” grade or better in all coursework is required for admission. Transfer students will be able to take SMT X043 and SMT X053 when admitted to upper division.

FSU-Teach Physical Science

1. CHM X045/X045L, or CHM X040 and CHM X041, or CHM X045C
2. CHM X046/X046L or CHM X046C
3. MAC X311 or MAC X281
4. MAC X312 or MAC X282
5. MAC X313 or MAC X283
6. PHY X048C and PHY X049C, or PHY X048/X048L and PHY X049/ X049L
7. MAC X312
8. SMT X043
9. SMT X053

Note: Transfer students will be able to take SMT X043 and SMT X053 while enrolled in upper division. MAC X312 is a corequisite for PHY X049C.

Definition of Prefixes

SMT—Science or Mathematics Teaching

Undergraduate Courses

SMT 1043. Step 1: Inquiry Approaches to Teaching (1). This course allows students to explore teaching as a career with in-state tuition paid. Following an introduction to the theory and practice behind excellent inquiry-based mathematics and science instruction, students teach lessons in pairs to obtain firsthand experience in planning and implementation.

SMT 1053. Step 2: Inquiry-Based Lesson Design in Science/Mathematics (1). Prerequisite: SMT 1043. In this course, students continue developing the lesson-plan skills learned in SMT 1043 as they become familiar with exemplary middle-school science curricula. After observing a lesson being taught in a local school district classroom, students work alone or in pairs to plan and teach three inquiry-based lessons to sixth, seventh, or eighth graders.

SMT 3100. Knowing and Learning in Science and Mathematics (FSU-Teach) (3). Prerequisites: SMT 1043 and SMT 1053, or instructor permission. This course focuses on knowing and learning in secondary science and mathematics as understood from a multidisciplinary perspective. The primary goal of this course is not simply to offer a general survey of theories of scientific and mathematical knowing and learning, but also to provide students with the opportunity to identify theories of knowing and learning and to employ these theories in their own practice of science and mathematics teaching.

SMT 4301. Classroom Interactions (FSU-Teach) (3). Prerequisites: SMT 1043, SMT 1053, and SMT 3100. This course explores the role of content, pedagogy, curriculum, and technology in promoting learning and impacting equity. Topics covered in course include classroom, diversity, equity, and classroom learning opportunities as well as assessment methods for understanding student learning. FSU-Teach students teach a multi-day lesson with a peer, in a secondary-school setting.

SMT 4664. Project Based Instruction (FSU-Teach) (3). Prerequisites: SMT 1043, SMT 1053, and SMT 3100. Corequisite: Successful completion or current enrollment in SMT 4301. This course integrates the major themes in the FSU-Teach program: infusion of technology into representation, analysis, modeling, assessment, and contextualization of the content; field-based experiences; as well as equity in an intellectually challenging culminating experience before students start teaching. Students must complete this course prior to enrolling in the Apprentice Teaching and the seminar course (SMT 4945 and SMT 4930) of the FSU-Teach program.

SMT 4665c. Model Lessons Seminar (1). (S/U grade only) This course includes weekly class sessions featuring invited instructors delivering model science and mathematics lessons followed by post-instructional discussions revolving around the lesson’s learning objectives, subject area, instructional strategies, assessments, and learning outcomes. May be repeated to a maximum of two semester hours.

SMT 4930. Apprentice Teaching Seminar (FSU-Teach) (1–4). (S/U grade only.) Prerequisite: SMT 1043, SMT 1053, SMT 3100, and SMT 4301. Corequisite: SMT 4945. In this seminar, objectives and course activities serve to support the Apprentice Teaching coursework and are repeated here. Teacher candidates meet as a seminar group for weekly ninety-minute sessions during the semester. FSU-Teach students enrolled in the five-hour SMT 4945 must take this corequisite, variable credit seminar.

SMT 4945. Apprentice Teaching (FSU-Teach) (5). (S/U grade only) Prerequisites: SMT 1043, SMT 1053, SMT 3100, and SMT 4301. Corequisite: SMT 4930. This course allows students to participate in teaching science and/or mathematics in secondary schools as their capstone field experience for the FSU-Teach (SMT) major in the sciences and mathematics. The focus of this capstone experience is the synthesis and translation of the content and pedagogical knowledge learned in the program to the secondary classroom. This course contains signature assessments that must be successfully completed in order to earn an Institutional Recommendation for certification.

Graduate Courses

SMT 5305. Classroom Interactions (3).

MATHEMATICS EDUCATION

Students with an interest in teaching mathematics at the middle or secondary levels should pursue the FSU-Teach program track.

Definition of Prefix

MAE—Mathematics Education

Undergraduate Courses

MAE 4320. Teaching Mathematics in the Middle School (3). Prerequisites: MAC 2311, MAE 4816, or instructor permission. This course introduces students to the nature of the student learning and mathematics curricula in grades five through nine. Appropriate pedagogical strategies for the mathematical content of the middle grades are considered.

MAE 4330. How Adolescents Learn Mathematics (3). Prerequisite: MAC 2311. This course examines the following topics: foundation in adolescents’ learning of mathematics; theories of learning in mathematics; the nature of mathematics; and learners’ mathematical processes (problem solving, reasoning, representation, communication, and connections.) It also analyzes middle and high school mathematics curricula from the perspective of adolescent learning.

MAE 4335. Teaching High School Mathematics (3). Prerequisites: MAC 2311 and MAC 2312. This course provides a foundation in the pedagogy of mathematics, focusing on the use of problem solving, cooperative learning, and appropriate tools for teaching algebra, geometry, trigonometry, calculus, statistics and probability, measurement, and number concepts and operations.

MAE 4657. Using Technology in the Teaching of Mathematics (3). Prerequisite: EME 2040. This course explores the uses of various technologies in mathematics classes, demonstrated through hands-on activities and experiences.

MAE 4816. Elements of Geometry (3). This course explores a variety of traditional and non-traditional geometric topics via a hands-on approach. Topics include congruence, similarity, Pythagorean triples, and areas of curvilinear figures. Not open to students majoring in mathematics.

MAE 4862. Using History in the Teaching of Mathematics (3). This course examines the historical origins and evolution of key mathematics concepts. Selected topics are chosen from number systems, numeration, computation, number theory, algebra, geometry, analytic geometry, and calculus.

MAE 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

MAE 4940. Classroom Management and Planning Instruction in Middle/High School Mathematics (4). Prerequisites: EDF 4430, MAC 2311, MAE 4330, MAE 4816, or instructor permission. This course provides for a focused examination of instructional strategies, planning, evaluation, classroom management, school laws, professional ethics, and school safety in the middle and high school mathematics classroom. Prospective teachers are expected to demonstrate an ability to impact student learning in grades 5–12. This course is to be taken during the semester prior to MAE 4945.

MAE 4941r. Field Experiences in Teaching Mathematics (1–3). (S/U grade only.) May be repeated to a maximum of six semester hours.

MAE 4945. Student Teaching in Mathematics (12). (S/U grade only.) Prerequisite: MAE 4940. This course is a supervised semester-long classroom teaching experience in a Florida public school.

Graduate Courses

MAE 5146. School Mathematics Curriculum (3).

MAE 5175. Teaching Community College Mathematics (3).

MAE 5318. The Topics and Teaching of Elementary School Mathematics (3).

MAE 5337. Seminar on the Teaching of Algebra (2).

MAE 5338. Seminar on the Teaching of Geometry (2).

MAE 5641r. Special Topics in Mathematics Education (2–3).

MAE 5658. Using Technology in the Teaching of Mathematics (3).

MAE 5691. Ethnomathematics (3).

MAE 5692. Mathematics Learning and Teaching (3).

MAE 5795. Seminar on Research in Mathematics Education (2).
MAE 5865. Using History in the Teaching of Mathematics (3).
MAE 5908r. Directed Individual Study (1–3). (S/U grade only.)
MAE 5915r. Supervised Research (1–4). (S/U grade only.)
MAE 5942r. Field Laboratory Internship (1–8). (S/U grade only.)
MAE 5946r. Supervised Teaching (1–4). (S/U grade only.)
MAE 6148. Curriculum in Math Education (3).
MAE 6797. Advanced Seminar on Research in Mathematics Education (4).
MAE 6938r. Doctoral Seminar in Mathematics Education (1–3).
MAE 6939r. Seminar in Mathematics Teacher Education (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

READING AND LANGUAGE ARTS

Web Page: http://www.coe.fsu.edu/Academic-Programs/Departments/School-of-Teacher-Education-STE/Degree-Programs/Reading-and-Language-Arts

Reading and language arts is a graduate program offering degrees at the major leading to master’s, specialist, and doctoral degrees in Curriculum and Institution. For more information, refer to the Graduate Bulletin. However, the program does offer undergraduate courses that are part of the teaching education curriculum.

Definition of Prefixes

LAE — Language Arts and English Education
LIS — Library and Information Studies
RED — Reading Education

Graduate Courses

LAE 5319. Teaching Oral and Written Expression in the Elementary School (3).
LAE 5349. Language and Literacy Development through Storytelling/Storywriting (3).
LAE 5415. Investigation in Children’s Literature (3).
LAE 5515. Language and Literacy Assessment (3).
LAE 5738. Linguistic Research in Language Education (3).
LAE 5931r. Special Topics in Elementary Language and Literature (1–3).
LAE 6746. Theory and Research in Language Education (3).
LIS 5566. Multicultural Literature and Information Resources for Children and Young Adults (3).
LIS 5567. International Literature for Children and Young Adults (3).

RED 5646. Trends and Issues in Reading (3).
RED 5695. Policy Issues in Reading (3).
RED 5744. Using Literacy Research to Inform Practice (3).
RED 5865. Leadership Practicum in Reading and Language Arts (3).
RED 5906r. Directed Individual Study (1–3).
RED 5911r. Supervised Research (1–5). (S/U grade only.)
RED 5945r. Supervised Teaching (1–5). (S/U grade only.)
RED 5947. Seminar and Practicum in Reading and Language Arts (3). (S/U grade only.)
RED 6747. Theory and Research in Reading (3).
RED 6933r. Doctoral Seminar in Reading and Language Arts (1–3). (S/U grade only.)

SCIENCE EDUCATION

New admissions to this program have been suspended; no applications will be accepted. Students with an interest in teaching science at the middle or secondary levels should pursue the FSU-Teach program track.

Definition of Prefix

SCE — Science Education

Undergraduate Courses

SCE 4320. Introduction to Middle School Science Teaching (3). This course focuses on the roles and responsibilities of science teachers. There is a thirty-hour field component to this course.

SCE 4362. Teaching and Learning Science (3). This course focuses on planning, instruction, learning, and classroom environment. There is extensive fieldwork (thirty hours) and students work with a teacher in an area high school.
SCE 4363. Advanced Topics in High School Science Teaching and Learning (3). Pre-or corequisites: SCE 4320 and SCE 4362. This course assumes previous field experiences and focuses on issues in curriculum, assessment, and the use of technology in science instruction. The course is offered at the school site, is project-based, and there is an extensive fieldwork component.
SCE 4835C. Teaching Earth and Space Science (3). This course examines the pedagogical content knowledge needed to teach earth/space science.
SCE 4891. Introduction to the Nature of Science and Scientific Inquiry for Elementary Teachers (3). Corequisite: EDE 4907. This course is designed for elementary education majors. The course is an introduction to the science process skills, inquiry skills, and a 21st century view of the nature of science within the context of science content.
SCE 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.
SCE 4920r. Science Education Colloquium (0). (S/U grade only.) This colloquium provides opportunities for sharing and learning about current science education research.
SCE 4939r. Seminar in Contemporary Science and Science Education (1). This course includes presentations of contemporary and interesting issues in science, mathematics, or teaching methods. Content varies from semester to semester. May be repeated to a maximum of four semester hours.
SCE 4944. Student Teaching in Science (10). (S/U grade only.) Corequisite: SCE 4948r.
SCE 4948r. Classroom Management and Planning in Science Education (3). Prerequisites: EDF 1005, EDF 2085, EME 2040, SCE 4320, SCE 4362, SCE 4363, and TSL 4324. Corequisite: SCE 4944. This course provides support and guidance to science education students participating in student teaching. The course focus is on classroom management and planning, professional ethics, and school law.

Graduate Courses

SCE 5140. Curriculum in Science Education (3).
SCE 5147. Perspectives on Learning in Science Education (3).
SCE 5225. Conceptual Learning in Middle School Science (3).
SCE 5336. Instructional Strategies that Promote Learning in Science (3).
SCE 5340. Teaching and Learning Science (3).
SCE 5545. Teaching Science in Diverse Classrooms (3).
SCE 5642. Science Teaching and Education Policy (3).
SCE 5740. Research Methods in Science Education (3).

SCE 5942. Internship for Graduate Students (1–10). (S/U grade only.)
SCE 5943r. Field Laboratory Internship (1–8). (S/U grade only.)
SCE 5945. Initial Practicum in the Teaching and Learning of Science (3).
SCE 5946r. Supervised Teaching (1–4). (S/U grade only.)
SCE 5947. Final Practicum in the Teaching and Learning of Science (3).
SCE 5949r. Field Lab Internship (1–3)
SCE 5954. Portfolio Defense (0). (P/F grade only.)
SCE 6345r. Teaching and Learning Science (3).
SCE 6351. Curriculum Design in Science (3).
SCE 6395. Science Teacher Education (3).
SCE 6761r. Research, Recent Developments, and Current Issues in Science Education (3–5).
SCE 6922r. Colloquium in Science Education (1). (S/U grade only.)
SCE 6933r. Advanced Seminar in Science Education (2).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

SOCIAL SCIENCE EDUCATION

Web Page: http://www.coe.fsu.edu/socialscience-ed

Admission Requirements

Students accepted into the social science teacher education program must have completed: (1) the liberal studies requirements summarized in the “Undergraduate Degree Requirements” chapter of this General Bulletin; (2) the state of Florida common program prerequisites for social sciences described earlier in this section; and, (3) the requirements for admission into a
teacher education program described in the “College of Education” chapter of this General Bulletin, which includes the following minimum standards: 2.5 overall GPA and passing all sections of the FTCE General Knowledge test. This test is required for certification and is part of the Florida Teacher Certification Examination.

Curriculum for Teachers of Middle and Secondary Social Science Education Leading to a Baccalaureate Degree and Florida Teacher Certification

Students preparing to teach middle and secondary school social science must complete between thirty-nine and forty-two semester hours as follows: six semester hours of economics, three semester hours of geography, three semester hours of American government, nine semester hours of American history, nine semester hours of world history, three semester hours of public speaking (this can be exempted based on speaking work completed in high school), six semester hours of history at the 3000/4000 level, and one three-semester hour course in non-European history. The thirty-nine semester hours may include courses in history and social science taken for liberal studies and those taken to meet the state of Florida common program prerequisites for admission to the upper division major. All courses must be passed with a minimum of a “C–” grade.

Professional education requirements and prerequisites for student teaching are: EDF 4430, EDF 4210, RED 4335, TSL 4324, EDG 4321, SSE 3432, SSE 4664, SSE 4194, and SSE 4940. Prior to admission to student teaching, students must achieve an overall GPA of 2.5 or higher and earn a grade of “C” or better in each of the social science education (SSE) courses.

Students who have completed a bachelor’s degree in an appropriate field may also seek certification only in conjunction with coursework applied toward a graduate degree. In meeting requirements for certification, these students should enroll in graduate-level professional courses.

In addition to the minimum standards for entrance and exit of a Teacher Preparation Program specified under the “College of Education” header in this General Bulletin, the social science education program requires that students meet the following criteria for admission and confer-ral of the baccalaureate degree: (1) only degree-seeking students will be admitted to the social science certification program, which is an integral part of the degree requirements; (2) successful progression to internship requires that students pass the Content (Social Studies 6–12), Professional, and General Knowledge sections of the Florida Teacher Certification Examination; and (3) in the interest of effective supervision, student teachers will, of necessity, be placed in clusters within designated school systems in Florida. There can be no assurance given that students will be placed in counties based on personal preference or convenience. A signed student teaching location preference form is required.

The state of Florida requires that all school districts initiate a level II (FDLE and FBI) criminal background check on all adults who work in schools. Courses in the Social Science Education have a required school component. Thus it is not possible to pass these courses of the student is blocked from entering Leon County Schools.

While enrolled in teacher education programs, the student is expected to demonstrate behaviors and dispositions that conform to the “Code of Ethics” (State Board of Education Rule 6B-1.00, FAC) and the “Principles of Professional Conduct in Florida” (State Board of Education Rule 6B-1.006, FAC). The programs reserve the right to refuse or discontinue enrollment of any student who violates these expectations or in the judgment of a majority of the program faculty does not meet the program standards.

Progression to Upper-Division

All first-time-in-college (FTIC) freshmen with a University matriculation date of Summer 2008 or later may make application to upper-division Middle and Secondary Education programs upon completion of all minimum requirements being met. Applicants should submit a completed program application to the Office of Academic Services and Intern Support, 2301 Stone Building. Students affected by this policy are advised to work closely with an advisor to plan completion of Liberal Studies for the 21st Century requirements and program prerequisites.

All applicants must have fulfilled the common program prerequisites, specific program prerequisites, and have satisfied all other criteria for admission to Teacher Education programs prior to their first semester in the program, including achievement of a passing score on the General Knowledge portion of the Florida Teacher Certification Examination. See the section entitled Planning Guide to Educator Preparation Programs under the “College of Education” chapter in this General Bulletin.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the courses needed to satisfy this requirement. Undergraduate majors in all middle and secondary education programs except FSU-Teach satisfy this requirement by earning no less than a “C–” in EME 2040.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into this upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

Social Sciences Teacher Education

1. EDF X005
2. EDF X085

Note: In addition to EDF X085, a minimum of six credit hours with an international or diversity focus is required. Eligible courses will be determined by the institution where the student is currently earning his or her Associate in Arts (AA) or baccalaureate degree. Foreign language courses may be used to meet this requirement. Contact department and/or advisor for details.

3. EME X040
4. AMH X010
5. AMH X020
6. POS X041
7. ECO XXXX or SOC XXXX or ANT XXXX or PSY XXXX or GEA XXXX

Definition of Prefixes

EDF—Education: Foundations and Policy Studies
SSE—Social Science Education

Undergraduate Courses

SSE 3321. Teaching History in the Middle and Secondary School (3). Prerequisites: AMH 2010 or AMH 2020, EME 2040, EME 2060, AMH 1023 or WOH 1030. This course examines historical approaches to the teaching of United States and world history. Students explore the chronological and thematic organization of history courses, primary sources, and narrative in the teaching of history. A focus is on the development of historical cognition.

SSE 4194. Developing a Global Perspective (3). Prerequisite: EDG 4321 and SSE 4362. This course examines theory and practice in global education and the integration of global perspectives into the curriculum and pedagogy in social sciences and social studies education. The course evaluates major issues and controversies embedded in the field, and enables students to critique scholarship, analyze controversies, and propose ideas for integrating global perspectives in curriculum and instruction.

SSE 4362. Fundamentals in Teaching Social Studies (3). Pre- or corequisite: EDG 4321. This course explores rationale for social studies instruction and an examination of traditional social science instructional methods.

SSE 4390. Teaching Global Issues Simulating the United Nations (3). This course simulates the United Nations as students examine prevalent historical, political, and socio-economic global issues permeating the United States and other nations. Students critically analyze textual materials, long-range effects of deeply-embedded issues on the human condition worldwide, and use new knowledge and understanding learned to develop lesson plans appropriate to national and state standards. In simulating the U.N. General Assembly, students develop an understanding of cross-cultural communication, negotiations, compromise, and practices, along with learning about the philosophy, history, and purpose of the United Nations.

SSE 4664. Inquiry in Teaching Social Studies (3). Prerequisites: EDG 4321 and SSE 4362. This course provides theory and practice in discovery, problem solving, and inquiry teaching of social science.

SSE 4904. Directed Independent Study (1–3). (SU grade only) This course allows students to study individually, under the direction of a faculty member. Topics vary and are usually selected on an individual basis. Hours may vary.

SSE 4931r. Special Topics (1–3). This course offers topics of current or special interest to students and instructors. Topics may vary from semester to semester. May be repeated within the same term to a maximum of three semester hours.
Continuation Requirement

All special education majors must earn a minimum grade of “C-,” “satisfactory,” or “pass” in each required course.

Admission Requirements

1. New students are admitted to the Exceptional Student Education Program ONLY in the Fall semester; students should work closely with an advisor to plan completion of basic requirements around the Fall timetable. Program applications are available in G107 Stone or on the Web at http://www.coe.fsu.edu. Deadline for Fall consideration is March 1st of the preceding Spring term.

2. New students typically are admitted to the Visual Disabilities Program in the Fall semester, but admission in the Spring and Summer is possible with permission of an advisor. Students should work closely with Program faculty when considering admission. Program applications are available in 2205L Stone or on the Web at http://www.coe.fsu.edu.

3. A 2.5 GPA minimum during the freshman and sophomore years is required.

4. Previous experience with individuals with disabilities (for example, volunteer work) is helpful.

5. Students must interview with program faculty.

6. All admission criteria for teacher certification must be met (listed in the “College of Education” chapter of this General Bulletin).

Requirements

**Background Check:** The state of Florida requires that all school districts initiate a level II (FDLE and FBI) criminal background check on all adults who work in schools. Because all courses in special education have a required school component, it is not possible to pass any of the courses if the student is blocked from entering Leon County Schools. Any student who is not able to document that he/she has been cleared by the end of the second week of classes in the first term enrolled will be required to drop all courses and withdraw from the program.

**Professional Behaviors and Dispositions:** While enrolled in any of the initial certification Special Education programs, the student is expected to demonstrate behaviors and dispositions that conform to the “Code of Ethics” (State Board of Education Rule 6.B-1.001, FAC) and the “Principles of Professional Conduct in Florida” (State Board of Education Rule 6B-1.006, FAC). The program reserves the right to refuse or discontinue enrollment of any student who violates these expectations or in the judgment of a majority of the faculty does not meet the program standards.

Undergraduate Courses

**EBD 4011. Introduction to the Socially and Emotionally Disturbed (3).** This course is designed to introduce students to the history of providing services to emotionally handicapped children and youths as well as examine the evolving trends in the field. Additionally, theories of causality are investigated and approaches for improving academic and social behavior are analyzed.

**EDF 2085. Teaching Diverse Populations (3).** In this course, students acquire an understanding of the complexity and diversity in the American and Florida populations in general and the school and community populations in particular. Students participate in a field-based experience.

**EEX 3601. Applied Behavior Analysis for Special Educators (3).** Corequisite: EEX 3831. This course is an introduction to behavioral principles and procedures useful for managing the behavior of students with handicaps. For majors only.

**EEX 3831. Practicum in Direct Observation (2).** Corequisite: EEX 3601. This course employs direct observation and recording techniques for analysis of classroom management strategies.

**EEX 3949r. Cooperative Education Work Experience (0).** (S/U grade only.)

**VISUAL DISABILITIES EDUCATION**

The objective of the visual disabilities degree major is to prepare specialists to provide services to individuals who are either blind or have low vision. The bachelor’s degree program prepares individuals as classroom teachers. Following graduation, students are employed in a variety of settings that offer services to children and youth with visual impairments. Visual Disabilities Education is the initial-certification major and culminates in a fifteen-week internship. Visual Disabilities Studies is a non-certification track intended for students planning to enter the master’s program in Visual Disabilities and complete certification requirements at an advanced level.

Each student preparing to major in visual disabilities education must take EVI 4011, EVI 4121, EVI 4211, EVI 4212, EVI 4220, EVI 4230, EVI 4250, EVI 4254, EVI 4311, EVI 4312, EVI 4314, EVI 4324, EVI 4330, and EVI 4940. These courses must be taken in sequence. Students must complete all courses within a given semester with a grade of “C” or better and maintain a cumulative 2.5 GPA or better to continue to the next semester.

**Graduate Courses**

- **EDF 5885.** Education in the Arab World (3).
- **EDF 5887.** Multicultural Education (3).
- **EDF 5920r.** Colloquium: Bilingual/Bicultural Education (1).
- **EDF 5921r.** Special Language and Culture Colloquium (2).
- **SSE 5195.** Developing a Global Perspective (3).
- **SSE 5365r.** Problems of Teaching Social Studies in Secondary School and Junior College (1–3).
- **SSE 5367.** Fundamentals in Teaching Social Studies (3).
- **SSE 5368.** Goals and Methods for the Teaching of History (3).
- **SSE 5655.** Inquiry in Teaching Social Studies (3).
- **SSE 5675.** Seminar in Civic Education (3).
- **SSE 5907r.** Directed Individual Study (1–3). (S/U grade only.)
- **SSE 5915r.** Supervised Research (1–4). (S/U grade only.)
- **SSE 5937r.** Special Topics in Social Science Education (3).
- **SSE 5943.** Field Laboratory Internship (1–8). (S/U grade only.)
- **SSE 5946r.** Supervised Teaching (1–4). (S/U grade only.)
- **SSE 5947.** Internship for Graduate Students (1–10). (S/U grade only.)
- **SSE 6931.** Doctoral Seminar in Social Science Education Research (3).
- **SSE 6933.** History of Social Studies/Social Science Education (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

**SPECIAL EDUCATION**

Web Page: http://www.coe.fsu.edu/special-ed

Program requirements for state-approved educator preparation programs are subject to revision based on changes in Section 1004.04, Florida Statutes, Public Accountability and State Approval for Teacher Preparation Programs, and State Board of Education Rule 6A-5.066, Approval of Educator Preparation Programs.

**Exceptional Student Education (Combined BS/MS Program)**

This degree major is designed to prepare individuals for careers as public school teachers of students with disabilities. The program leads to eligibility for Florida certification in exceptional student education for grades K through 12 with an ESOL endorsement and is NCATE approved.

This degree major is a three-year program that culminates in the Bachelor of Science (BS) and the Master of Science (MS) degree awarded simultaneously. Students must maintain a 3.0 grade point average (GPA) during the junior/senior years of study AND earn department minimum scores on the Graduate Record Examinations (GRE) in order to be admitted to the required graduate component of the three-year, combined program. Contact department faculty for more information.

Note: Effective August 2011, the GRE Revised General Test replaced the GRE General Test. To learn more about this new test, go to http://www.gre.org.

**VISUAL DISABILITIES EDUCATION AND VISUAL DISABILITIES STUDIES**

The objective of the visual disabilities degree major is to prepare specialists to provide services to individuals who are either blind or have low vision. The bachelor’s degree program prepares individuals as classroom teachers. Following graduation, students are employed in a variety of settings that offer services to children and youth with visual impairments. Visual Disabilities Education is the initial-certification major and culminates in a fifteen-week internship. Visual Disabilities Studies is a non-certification track intended for students planning to enter the master’s program in Visual Disabilities and complete certification requirements at an advanced level.

Each student preparing to major in visual disabilities education must take EVI 4011, EVI 4121, EVI 4211, EVI 4212, EVI 4220, EVI 4230, EVI 4250, EVI 4254, EVI 4311, EVI 4312, EVI 4314, EVI 4324, EVI 4330, and EVI 4940. These courses must be taken in sequence. Students must complete all courses within a given semester with a grade of “C-” or better and maintain a cumulative 2.5 GPA or better to continue to the next semester.

Continuation Requirement

All special education majors must earn a minimum grade of “C-,” “satisfactory,” or “pass” in each required course.

Admission Requirements

1. New students are admitted to the Exceptional Student Education Program ONLY in the Fall semester; students should work closely with an advisor to plan completion of basic requirements around the Fall timetable. Program applications are available in G107 Stone or on the Web at http://www.coe.fsu.edu. Deadline for Fall consideration is March 1st of the preceding Spring term.

2. New students typically are admitted to the Visual Disabilities Program in the Fall semester, but admission in the Spring and Summer is possible with permission of an advisor. Students should work closely with Program faculty when considering admission. Program applications are available in 2205L Stone or on the Web at http://www.coe.fsu.edu.

3. A 2.5 GPA minimum during the freshman and sophomore years is required.

4. Previous experience with individuals with disabilities (for example, volunteer work) is helpful.

5. Students must interview with program faculty.

6. All admission criteria for teacher certification must be met (listed in the “College of Education” chapter of this General Bulletin).
EEX 4012. Foundations of Special Education (3). This introductory course includes classic and contemporary readings in the field of special education. An overview of how society views learners with various forms of human exceptionality is presented. Students are introduced to the trends and people that formed the foundation of contemporary special education. Current policies and practices are also examined.

EEX 4014. Introduction to Mental Disabilities (3). This course is designed to provide students with an overview of the basic knowledge pertinent to mental disabilities. Special attention is given to the educational, social, and psychological aspects of mental disabilities.

EEX 4050. Introduction to Learning and Behavior Disorders (3). This course examines the fields of learning and behavioral/emotional disorders from historical, theoretical, practical, and public school perspectives.

EEX 4070. Including Students with Disabilities in the General Education Curriculum (3). This course provides students with the knowledge and skills to include students with disabilities in the general education curriculum by adapting instruction and assessment procedures and processes.

EEX 4201. Typical and Atypical Development and Learning (3). This course examines typical and atypical learning and development throughout the lifespan.

EEX 4212c. Educational Assessment for Students with Disabilities (3). This course is designed to provide an opportunity for students to develop research skills in the administration of formal and informal assessment instruments and processes.

EEX 4223. Individualized Educational Planning (3). This course provides students with the opportunity to demonstrate effective use of diagnostic skills. For majors only.

EEX 4250. Individualized Reading Instruction for Students with Disabilities (3). This course reviews methods for teaching reading to individuals with disabilities.

EEX 4251. Teaching Mathematics to Learners with Disabilities (3). In this course, instructional methods and curriculum to teach mathematics to students with disabilities are examined.

EEX 4253. Access to the General Education Curriculum for Individuals with Moderate/Severe Disabilities (3). This course examines methods for teaching functional reading and life skills to individuals with disabilities.

EEX 4291. Characteristics and Education of Learners with Autism Spectrum Disorder (3). This course examines the characteristics and etiology of autism spectrum disorders (ASD), and effective intervention strategies for individuals with ASD. Additionally, the focus is on assessing and addressing the core challenges of learners with ASD (e.g., language, social communication, repetitive behaviors, and behavior regulation) using evidence-based practices in school settings. Students learn to identify and implement assessment and intervention strategies based on learner strengths and needs.

EEX 4446. Differentiated Instruction for Students with Exceptionalities (3). This course is designed to provide future special education teachers with the knowledge and skills needed to meet the diverse learning needs of students found in today’s general education classrooms.

EEX 4487. Social Studies and Science Curriculum for Special Educators (3). This course provides an overview of and foundation for teaching science and social studies to learners with disabilities (P-12). Students develop knowledge and skills in using a variety of instructional methods and materials appropriate for providing access to the general education science and social studies curriculum for learners with disabilities.

EEX 4605. Classroom Management for Special Educators (3). This course provides an opportunity for students to develop the behavior of learners with disabilities within a classroom setting. Course content is organized around the Pyramid Model that includes three tiers of behavior management based on principles of positive behavior support: 1) Universal supports, 2) Prevention, and 3) Intervention.

EEX 4613. Positive Behavior Support (3). This course provides students with the knowledge and skills to develop, implement, and evaluate the impact of positive behavior supports. Emphasis is placed on understanding the communicative function of challenging behaviors, the teaching of new skills that make the challenging behavior unnecessary, and the prevention of the recurrence of challenging behaviors.

EEX 4751. Collaboration with Families, Schools, and the Community (3). This course provides the knowledge and skills necessary for collaborating with families, other professionals, and community members.

EEX 4770. Study of Human Exceptionality (3). This course increases learner knowledge and awareness of the characteristics and needs of people with exceptionalities, and acquaints learners with the resources, issues, and trends related to appropriately meeting these needs.

EEX 4834. Introductory Practicum in Special Education (2). This practicum provides experience with individuals with a range of disabilities.

EEX 4842. Practicum in Severe Cognitive Disabilities and/or Autism Spectrum Disorder (2). This course provides teacher candidates with fieldwork experience teaching K–12 students with severe cognitive disabilities and autism spectrum disorder. The practicum provides experience in developing, implementing, and evaluating functional and academic skills for K–12 students with these disabilities.

EEX 4861. Student Teaching in Special Education (11–12). (S/U grade only.) In this course, student teachers teach students with disabilities for one semester within a public school setting, full-time, and under the supervision of a certified special education teacher.

EEX 4905c. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

EEX 4920. Pre-Student Teaching Seminar (1). (S/U grade only.) This course prepares last-term majors in special education for the transition from student to professional, lays the groundwork for the culminating activity of student teaching, and acquaints the new professionals with their future role and responsibility to the field of exceptional student education.

EEX 4930r. Special Topics in Special Education (1–3). In this course, topics vary from term to term. May be repeated to a maximum of nine semester hours.

EEX 4940. Practicum with Students with High Incidence Disabilities (2). This practicum provides experience with individuals with high incidence disabilities.

EEX 4970r. Honors Work in Special Education (3). Prerequisite: Admission to the honors program. Corequisites: EDF 5481 or EEX 5931 or equivalent. This course is designed to provide qualified upper-division majors in special education an opportunity to undertake an independent and original research project. May be repeated to a maximum of nine thesis hours with instructor approval.

ELD 4011. Introduction to Specific Learning Disabilities (3). This course is designed to introduce the student to the changing field of learning disabilities with emphasis on the various theories that have shaped the field.

EMR 4360. Functional Reading, Academics, and Life Skills for Individuals with Mental Disabilities (3). This course is designed to provide teachers with functional reading and related academic skills to individuals with mental disabilities.

EVI 1012. The Blindness Experience (3). In this course, students explore blindness, talk with people who are intimately familiar with blindness, and experience adventure under blindfold. Students explore society’s reaction to blindness, probing its roots, and take a closer look at how views of blindness are shaped when experienced through the lenses of gender, race, class, religion, and ethnicity. Through blindfold experiences, students have opportunities to learn about braille and the activities of daily life necessary for achieving independence. Through writing, students explore their own reactions and thoughts of blindness, and reflect on the many questions that arise from delving deeper into the blindness experience.

EVI 4011. Introduction to Visual Disabilities (3). This course is designed to provide an overview of the population of people who have visual impairments and the role of specialized service providers. Special attention is given to the effects of visual impairment on development and learning.

EVI 4110. Assessment of Students with Visual Impairments (3). This course introduces the concepts, variables, and techniques to assess visual behavior and visual functioning in the practice of providing services to students with visual impairments, their families, and education personnel.

EVI 4121. Anatomy and Diseases of the Eye for Blindness Professionals (3). This course introduces prospective teachers of students with visual impairments, orientation and mobility specialists, and rehabilitation teachers to the anatomy and physiology of the human eye, the visual mechanism, its embryological development, and various eye pathologies. Particular emphasis is placed on the impact of these eye pathologies on the visual functioning of the individual.

EVI 4211. Literacy Braille (3). In this course students develop skills in the preparation of materials for blind students using modern Braille code using a braillewriter. Interlining and proofreading are emphasized.

EVI 4212. Nemeth Code and Supporting Math Instruction for Students with Visual Impairments (3). Prerequisites: EVI 4011, EVI 4211, and EVI 4254. This course enables students preparing to be teachers of blind school-age children to support the instruction of mathematics skills. Topics include the foundation of the acquisition of mathematics skills, the Nemeth Code, adaptations of mathematics diagrams and structures, instruction in the abacus, and strategies for teaching mathematics skills to students with visual impairments.

EVI 4220. Introduction to Orientation and Mobility (3). This course provides an overview of the fundamental concepts associated with the prevention of and a realistic understanding of the problems inherent in the orientation and mobility experienced by visually impaired individuals. Stresses techniques for teaching O/M in indoor environments.

EVI 4230. Educational Management of Students with Visual Impairments (3). Prerequisites: EVI 4011, EVI 4211, EVI 4251, EVI 4252, EVI 4311, and EVI 4312. This course provides participants with the knowledge and skills necessary to manage the successful integration of students with visual impairments into the general education environment. Legal, ethical, and safety issues related to the education of students with visual impairments are explored. In addition, students are assisted as they prepare for their student teaching experiences.

EVI 4250. Teaching Social and Communication Skills to Students with Visual Impairments (3). Prerequisites: EVI 4011 and EVI 4254. This course provides participants with the knowledge and skills necessary to design and implement instructional activities to increase the development of social and career skills in children with visual impairments. Emphasis is placed on infusing these skills into everyday activities, educational instruction, and collaboration with families and communities to improve student outcomes.

EVI 4254. Teaching Independent Living Skills to Students with Visual Impairments (3). This course is designed to provide students planning to be teachers of students with visual impairments with the techniques and instructional tools to safely teach independent living skills, including the skills associated with food preparation, household management, personal grooming, clothing care, and health management.

EVI 4311. Teaching Reading and Writing to Students with Visual Impairments (3). Prerequisites: EVI 4011, EVI 4211, and EVI 4314 or 5316. This course prepares future educators with strategies and techniques necessary for determining the mode of reading and for teaching reading and writing skills to students with visual impairments.

EVI 4312. Academic Modifications in the Public School Class (3). Prerequisites: EVI 4011, EVI 4211, and EVI 4314 or 5316. This course provides participants with the knowledge and skills necessary to manage the successful integration of students with visual impairments into the general education environment. Legal, ethical, and safety issues related to the education of students with visual impairments are explored. In addition, students are assisted as they prepare for their student teaching experiences.

EVI 4320. Teaching Independent Living Skills to Students with Visual Impairments (3). Prerequisites: EVI 4011 and EVI 4254. This course provides participants with the knowledge and skills necessary to design and implement instructional activities to increase the development of social and career skills in children with visual impairments. Emphasis is placed on infusing these skills into everyday activities, educational instruction, and collaboration with families and communities to improve student outcomes.

EVI 4324. Teaching Social and Communication Skills to Students with Visual Impairments (3). This course is designed to provide students planning to be teachers of students with visual impairments with the techniques and instructional tools to safely teach independent living skills, including the skills associated with food preparation, household management, personal grooming, clothing care, and health management.
EVI 4314. Low Vision (3). Prerequisite: EVI 4121. This course prepares prospective teachers of students with visual impairments, orientation and mobility specialists, and rehabilitation teachers for facilitating the visual functioning of individuals with low vision. Students learn the basics of optics and how to conduct functional vision evaluations, to modify environments, and to teach the effective use of low vision devices.

EVI 4324. Assistive Technology for Students with Visual Impairments in the Schools (3). Prerequisite: EVI 4211. Corequisites: EVI 4314 or EVI 5316. This course prepares participants in the Visual Disabilities course of studies in the assessment and use of assistive technology for students with visual impairments.

EVI 4330. Teaching Students with Visual Impairments and Other Disabilities (3). This course introduces the techniques and strategies necessary for meeting the needs of students with visual impairments who have additional disabling conditions. An emphasis is placed upon working with students with mental disabilities who also have a visual impairment.

EVI 4940. Student Teaching in Visual Disabilities (12). (S/U grade only.) Prerequisite: EVI 4230. In this course, student teachers teach students with visual disabilities for one semester within a local school or residential school setting, full-time and under the supervision of an experienced certified teacher of students with visual impairments.

MHS 3949r. Experiential Learning (0). (S/U grade only.) Prerequisite: Instructor permission. This is a non-credit experiential learning course, which offers students an opportunity to gain “real-world” on-the-job work experience related to a specific academic field of study. Students register for this course through the FSU Career Center.

MHS 4460r. Crisis Intervention Counseling: Theory and Practice (1–3). This course covers training in basic helping skills for dealing with people in crisis situations, particularly telephone hotline training. May be repeated to a maximum of six semester hours.

Graduate Courses

EBD 5223. Advanced Study of Emotional Disturbance (3).
EBD 5320. Precision Teaching Methods for Emotional Disturbances (3).
EBD 5941. Practicum in Emotional Disturbance/Learning Disability (3).
EVI 5017. Typical and Atypical Early Development (3).
EVI 5087. Middle and Secondary Curriculum for Learners with Disabilities (3).
EVI 5089. Adaptations and Accommodations for Learners with Disabilities (3).
EVI 5095. Teaching Teachers with Autism Spectrum Disorder (1).
EVI 5225. Assessment of Students with Disabilities (3).
EVI 5234. Development and Assessment of Individuals with Severe Cognitive Disabilities and Autism Spectrum Disorder (3).
EVI 5235. Instructional Environments: Ethical, Legal, Safety, and Classroom Management Considerations (3).
EVI 5237. Methods for Teaching Students with Low Incidence Disabilities (3).
EVI 5239. Assessment and Methods in Early Childhood Special Education (3).
EVI 5246. Mathematics for Students with Disabilities (3).
EVI 5248. Positive Behavior Support (3).
EVI 5258. Advanced Reading Instruction for Students with Disabilities (3).
EVI 5259. Literacy for Learners with Disabilities (3).
EVI 5267. Differentiating Mathematics Instruction in Middle and High School (1).
EVI 5285r. Seminar in Transition (3).
EVI 5286. Preparing Individuals for Transition (3).
EVI 5298. Teaching Students with Autism (3).
EVI 5456. Program Development for Young Children with Disabilities (3).
EVI 5466. Universal Design for Learning (1).
EVI 5615. Nonviolent Crisis intervention (1).
EVI 5704. Early Childhood and Elementary Education Curriculum for Special Educators (3).
EEX 6931r. Seminar in Early Childhood/Special Education (3).
EEX 6939r. Doctoral Seminar in Special Topics (1–3). (S/U grade only.)
ELE 5140. Advanced Study of Learning Disabilities (3).
EMR 5235. Teaching the Student with Profound Disabilities (3).
EMR 5603. Advanced Practicum in Mental Disabilities (3).
EVI 5019. Foundations of Rehabilitation Teaching of the Blind (3).
EVI 5131. Teaching Deaf-Blind/Multisensory Impaired Individuals (3).
EVI 5221. Applied Methods of Orientation and Mobility (3).
EVI 5222. Advanced Orientation and Mobility (3).
EVI 5226. Developmentally Appropriate Orientation and Mobility (3).
EVI 5227. Teaching Orientation and Mobility to Individuals with Unique Health Considerations (3).
EVI 5255. Methods of Independent Living of the Blind (3).
EVI 5315. Teaching Communication Skills to Visually Impaired Adults (3).
EVI 5316. Low Vision (3).
EVI 5318. Special Methods of Working with Preschoolers with Visual Impairments (3).
EVI 5319. Communication and Emergent Literacy for Young Children with Visual Impairments (3).
EVI 5325. Technology for Individuals with Visual Impairment (3).
EVI 5332. Social and Vocational Implications of Recreation and Leisure for Visually Impaired (3).
EVI 5346. Aging and Vision Loss (3).
EVI 5355. Issues of Blindness in Society (3).
EVI 5351r. Seminar in Visual Disabilities (3).
EVI 5942. Student Teaching in Visual Disabilities (12). (S/U grade only.)
EVI 5943. Practicum in Orientation and Mobility (2).
EVI 5944. Practicum with Students Who Are Deaf-Blind (1–3).
EVI 5945r. Internship in Orientation and Mobility (3–12). (S/U grade only.)
EVI 5946r. Internship in Rehabilitation Teaching of Adults with Visual Disabilities (3). (S/U grade only.)
IDS 5347. Infant and Toddler Typical and Atypical Development (3).
IDS 5348. Family-Centered Early Intervention (3).
IDS 5349. Infant/Toddler and Family Assessment (3).

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

OTHER COURSES – SCHOOL OF TEACHER EDUCATION

Definition of Prefixes

EDF — Education: Foundations and Policy Studies
EDG — Education: General
EDM — Education: Middle School
IFS — Interdisciplinary Florida State University Courses

Undergraduate Courses

EDF 2085. Teaching Diverse Populations (3). In this course students acquire an understanding of the complexity and diversity in the American and Florida populations in general and the school and community populations in particular. Students participate in a field-based experience.

EDG 4321. Foundations of Teaching (3). This course is for students seeking certification who do not have an undergraduate degree in a teaching field. This course provides the essential knowledge and skills needed to succeed in a classroom setting. It does not have critical care or special education courses that are essential for initial certification. It is part of the Professional Training Option open to all students.

EDM 3001. Introduction to Middle School (3). This course is designed to give the student an introduction to the middle school. It includes the philosophy and practice of the ideal middle school.

IFS 2020. The Blindness Experience (3). In this course, students explore blindness, talk with people who are intimately familiar with blindness, and experience adventure under blindfold. Students explore society’s reaction to blindness, probing its roots, and take a closer look at how views of blindness are shaped when experienced through the lenses of gender, race, class, religion, and ethnicity. Through blindfold experiences, students have opportunities to learn about braille and the activities of daily life necessary for achieving independence. Through writing, students explore their own reactions and thoughts of blindness, and reflect on the many questions that arise from delving deeper into the blindness experience.

IFS 2051. Questioning What We Know: Teaching and Learning Mathematics and Science in the 21st Century (3). This course offers an introduction to pressing issues in mathematics, science, and mathematics and science education. Students engage in critical thinking regarding effective teaching and learning of mathematics and science today and into the future.
Graduate Courses

EDF 5892r. The Design of National Curricula in Developing Countries (3).
EDG 5073. Foundations of Blended and Online Learning and Teaching K-12 (3).
EDG 5074. Pedagogy of Blended and Online Learning and Teaching K-12 (3).
EDG 5075. Technologies for Blended and Online Learning and Teaching K-12 (3).
EDG 5076. Issues, Trends, and Practices in Blended and Online Learning and Teaching K-12 (3).
EDG 5206. Teachers and Curriculum Development (3).
EDG 5339. Making Sense of Data to Inform Instruction (3).
EDG 6008. Academic and Professional Identity (1). (S/U grade only.)
EDG 6221. Curricular Theory (3).

IFS 2060. 21st Century Literacies (3). This course discusses how technology is changing the way people learn and what they need to know.

State of Florida Common Program Prerequisites

The state of Florida has identified common program prerequisites for this University degree program. Specific prerequisites are required for admission into the upper-division program and must be completed by the student at either a community college or a state university prior to being admitted to this program. Students may be admitted into the University without completing the prerequisites, but may not be admitted into the program.

At the time this document was published, some common program prerequisites were being reviewed by the state of Florida and may have been revised. Please visit https://www.flvc.org/partner-portal/common-prerequisite-manual for a current list of state-approved prerequisites.

The following lists the common program prerequisites or their substitutions, necessary for admission into this upper-division degree program:

1. THE X000 or any three credit hour course from THE X001-X035
2. THE X305 or THE X300
3. THE X925
4. TPA X290
5. TPA X200 or TPA X210
6. TPP X190 or TPP X110
7. THE XXXX or TPA XXXX or TPP XXXX
8. THE XXXX or TPA XXXX or TPP XXXX
9. THE XXXX or TPA XXXX or TPP XXXX

Requirements

Admission to Majors

Students should contact the School of Theatre Office of Academic and Student Services regarding admission requirements and procedures for the majors, or visit the School of Theatre Web site at http://theatre.fsu.edu.

Attendance Requirement for All School Events

All undergraduate students in the School of Theatre must register for THE 4990 every Fall and Spring in which they are enrolled as a theatre major. This course is a zero credit, S/U course. Students must attend all school meetings, required plays, and other required events. Failure to comply with this requirement will jeopardize graduation eligibility.
Liberal Studies for the 21st Century Program

All undergraduates in theatre are required to meet the liberal studies requirements as specified in the “Undergraduate Degree Requirements” chapter of this General Bulletin.

Retention Standards

A grade of “C–” or better is required in all major courses and prerequisites except THE 2020, which requires a “B–” or better. Students may only retake a major requirement once in which a grade below the minimum was received. (THE 2020 may be taken only once.) The class must be retaken the following semester, and a minimum grade of “C–” must be achieved for retention. BA students must maintain a minimum GPA of 3.0 in major requirements and a cumulative GPA of 3.0; BFA acting and music theatre students must maintain a minimum GPA of 3.0 in major requirements and a cumulative GPA of 2.5. If a student receives a “D” or “F” in a major requirement, or if the GPA falls below the minimum, the student will be placed on probation for the following semester. If the grade or GPA does not meet minimum standards by the end of the probationary semester, the student will be dismissed from the School of Theatre.

The School of Theatre retains the right to refuse admission or terminate enrollment at any time if a student fails to maintain the standards of the program.

Honors in Theatre

The School of Theatre offers a program in honors to encourage talented juniors and seniors to undertake independent and original research as part of the undergraduate experience. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Bachelor of Arts Requirements

The Bachelor of Arts (BA) is a flexible liberal arts degree intended to offer a comprehensive knowledge of theatre arts. The program requires a balance of theatre core classes and electives that allow students the opportunity to explore selected areas of the theatre. Theatre core requirements include courses in performance, technical theatre, design, and theatre history. All BA students must complete a run and usher experience. Electives can be fulfilled with additional theatre courses or any other University courses. Liberal studies requirements for the baccalaureate degree must be met. Twenty-four semester hours of coursework must be taken outside of the major, in addition to liberal studies. Hours taken to satisfy the Bachelor of Arts (BA) foreign language requirement and the multicultural requirement (if not part of either the major requirements or liberal studies) may be part of those twenty-four hours. For more information, see the Bachelor of Arts Degree section of the “Undergraduate Degree Requirements” chapter of this General Bulletin.

Technical Theatre Requirement

BA Theatre majors must complete the technical theatre requirement. Courses must be taken every semester beginning the first semester in residence until the requirement is complete. Students transferring with a major in theatre may receive transfer credit for no more than one technical practices course.

Major

A minimum of thirty-nine semester hours of coursework in theatre is required. Contact the Office of Academic and Student Services in the School of Theatre for a complete list of requirements.

Note: At least eighteen semester hours of these required courses must be completed in residence.

Bachelor of Fine Arts Requirements

The Bachelor of Fine Arts (BFA) is a preprofessional degree, with intensive, in-depth training. The goal is the development of both an understanding of theatre as a total art and the skills necessary for its expression. Students may concentrate in acting or music theatre. The BFA program is designed to provide the necessary foundation for specialization at the graduate or professional level. Admission to the program is highly selective. A student seeking to enter the program must offer, in addition to an acceptable GPA, an acting and/or music theatre audition, and a complete application packet. Continuation in the program is dependent not only upon academic performance but also upon development of talent and skill potential as evaluated by faculty assessment. A student’s work and commitment are under continuous review, and any candidate who fails to maintain high standards will be dismissed from the program. Although it is possible to complete all requirements within four years, it is possible that a successful course of study will take longer, since graduation depends on much as demonstrated proficiency as on credit hours. Complete details regarding auditions can be found at http://theatre.fsu.edu.

Common Curriculum

Beyond the liberal studies requirements, BFA students are required to complete approximately seventy-four to eighty-six semester hours in theatre and related courses. All BFA students are required to successfully complete core theatre courses and technical laboratories. Contact the Office of Academic and Student Services in the School of Theatre for complete degree requirements.

Concentration in Acting

Students with a concentration in acting must complete TPA 2201, 2248, 2291; TPP 2110, 2111, 2190L, 2710, 3510, 3511, 3710, 3711, 4131, 4310, 4531, 4712, 4713, 4922; THE 3213, 3214, 4260, 4303, and eight elective semester hours in performance. Acting students are required to complete a semester in London between the sophomore and junior years.

Concentration in Music Theatre

Students with a concentration in music theatre must complete MUT 1001, 1111, 1121; MVV 3532, 4542; THE 3214, 4303, 4244, 4245; TPA 2201, 2248, 2291; TPP 2110, 2111, 3510, 3511, 4310, 4257, 4512, 4923. A minimum of five semester hours of private voice, keyboard, and dance are also required until proficiency is demonstrated in these skills.

London Theatre Experience

In addition to its degree programs, the School of Theatre has created the London Theatre Experience, an extraordinary, curriculum in London for select theatre majors. The program includes theatre-going, backstage tours, classes with leading theatre artists, special internships, and performance opportunities. Students earn a semester of academic credit while participating in a program that makes a real difference in their lives as students, artists, and human beings. Graduate credit is available only by special request.

Facilities

There are several performance spaces available for the production of plays. All include rehearsal space. They are: the Richard G. Fallon Theatre in the Fine Arts Building, the Studio, or Augusta Conradi Theatre in the Williams Building; The Lab Theatre; and the Fine Arts Annex.

The Richard G. Fallon Theatre in the Fine Arts Building is a proscenium theatre with continental seating for 500 patrons. Stage equipment includes a turntable, a counterweight system, hydraulic orchestra pit, a computer lightboard, a four-channel sound system, light and sound shops, two large-group dressing rooms, and two private dressing rooms.

The Studio, or Augusta Conradi, Theatre is a proscenium house and seats 200 patrons. The stage equipment includes a rope system, a preset lightboard, a single channel sound system, a light and sound control booth, green room, two group dressing rooms, and a small scene shop. The auditorium is used as a lecture classroom and demonstration laboratory.

The Lab is a flexible theatre space used in prosenium, thrust, arena, and open configurations. There is a variable seating capacity depending on each production’s staging requirements. There is a lighting grid, and portable sound and lighting equipment is utilized. Subscription productions are mounted in the Lab Theatre each year. In addition, the space is used for student development and productions. There is an accompanying rehearsal hall next door.

The Fine Arts Annex is a small prosenium space with flexible seating. The space is used as a classroom space, rehearsal space, and as a performance space.

Definition of Prefixes

IFS—Interdisciplinary Florida State University Courses
THE—Theatre Studies and General Resources
TPA—Theatre Production and Administration
TTP—Theatre Performance and Performance Training

Undergraduate Courses

IFS 2232. Theory and Practice of the Encounter (3). This interdisciplinary course merges performance theory and practice with philosophy and literary theory. It introduces students to the emerging field of performance as research and practice-based research focusing on the phenomenon of the encounter.

THE 2000. Introduction to Theatre (3). This course focuses on the historical development and basic elements for appreciation and evaluation of performances. The course is designed for non-majors.
THE 2020. Introduction to Theatre for Majors (3). This course is a survey of the field of theatre, its various divisions, and the School of Theatre. Preparation for independent research and communication skills. Prerequisite: THE 1000. May be repeated to a maximum of six semester hours.

THE 2100. Introduction to Theatre History (3). This course is a survey of theatre history and drama from Greeks to present.

THE 3061. Introduction to Theatre in London (3). This introductory course is designed to acquaint students with the components of the theatrical experience as they relate specifically to current dramaturgy and stagework in London. It is to be offered only at The Florida State University London Study Center. It should be viewed as a companion class to THE 2000 Introduction to Theatre, for majors and non-majors, but may be taken independently. It makes use of the theatrical resources in the city of London, including attendance at leading theatres, backstage tours, and lectures by prominent theatre artists.

THE 3213. World Theatre History I (3). Prerequisite: THE 2020. This course explores the staging practices and dramatic literature of classical Greece and Rome, medieval Europe and Japan, Renaissance England, Italy, and France, and 18th-century Western Europe.

THE 3214. World Theatre History II (3). This course explores the staging practices and dramatic literature from the 19th century to the present. Specific units include romanticism, melodrama, the rise of realism, avant-garde theatre movements (both American and European), European innovations 1960s–1990s, and contemporary dramatic theory. Prerequisite: TPA 3208. This course is open only to students in the honors program and is required each semester.

THE 3931r. Special Topics in Theatre (3). (S/U grade only.) In this course, topics change each semester depending upon instructor. May be repeated to a maximum of six semester hours.

TPA 4064. Disability and Representation (3). Prerequisite: THE 2020, TPA 3213, or TPA 4073. This course offers an advanced introduction that surveys the ways in which the arts and popular culture (including literature, fine arts, performance, advertising, documentary film, and video) have both reflected and contributed to attitudinal and public policy concerning people with disabilities. The course takes a disability-studies approach, which underscores the cultural and communal aspects of disability. Prerequisite: TPA 3213. This course is open only to students in the honors program and is required each semester.

THE 4110. European Theatre History I (3). Prerequisite: TPA 3214. This course is an in-depth study of European theatre history from the Greeks through the Renaissance.

THE 4111. European Theatre History II (3). Prerequisite: TPA 3214. This course is an in-depth study of European theatre history after the Renaissance, with a major emphasis on the modern era (1870 to the present).

THE 4233. History of African-American Drama (3). This course is a survey of the history of African-Americans in the American theatre from the African Grove Theatre to the present, and of playwrights from William Wells Brown to August Wilson.

THE 4236. A Cultural History of the American Theatre and Drama from Beginnings to Present (3). Prerequisite: TPA 2100. This course examines American theatre and drama in its cultural and social context.

TPA 4233. History of African-American Drama (3). This course is a survey of the historical and cultural contexts of African-American theatre from the 19th century to the present. Specific units include the musical, black musical, and Broadway musical.

THE 4244. Musical Theatre History I (3). Prerequisite: TPA 3214, MUL 2211, DAN 4115, or instructor permission. This course is a survey of the musical theatre from the beginnings to the 1940s, including the development of comic opera, operetta, the revue tradition, and musical comedy.

TPA 4245. Musical Theatre History II (3). Prerequisite: TPA 3214, MUL 2211, DAN 4115, or instructor permission. This course is a survey of musical theatre in America since the 1940s, including Rodgers and Hammerstein, Weill, Lerner and Loewe, Loesser, Bernstein, Black, and the rock musical.

TPA 4260. Historic Costume for the Stage (3). Prerequisite: TPA 3214. This course is a survey of historic costume in American theatre and drama and its cultural and social context.

THE 4285. History of Architecture and Decor (3). This course is an examination of the history and architectural context of various periods of architectural development and interior design from Ancient Egypt through the Art Deco movement of the 1930’s.

THE 4303. Play Analysis (3). This course is a line by line script examination, analyzing how playwrights achieve their desired stage effects in terms of character, structure, and function.

THE 4433. Gender, Race and Performance (3). This course is an introduction to contemporary theories/practices of performance of race/gender on stage and in everyday life using feminist theories of performance.

THE 4438. African Theatre Performance (3). This course examines the cultural and political complexities of selected countries of sub-Saharan Africa through an exploration of pre-colonial performance traditions, written plays, and contemporary popular culture.

THE 4481. Dramaturgy (3). Prerequisites: TPA 3214, THE 4303, and/or instructor permission. This course is an introduction to the study of the dramatic action and events comprising the structure of plays, the construction of scenarios, and the writing of plays.

TPA 495r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

TPA 4913r. Theatre Production Workshop (3). Prerequisite: Instructor permission. This course involves a workshop production of a play with emphasis on the creative, technical, and critical aspects of production. May be repeated to a maximum of six semester hours.

THE 4954. Culminations (3). (S/U grade only.) This course is a capstone course in the field of theatre. Emphasis is placed on the synthesis of skills and competencies developed in the course of study and translating those elements to future activities including work and graduate school.

THE 4990r. Theatre Forum (0). (S/U grade only.) This course is required each semester for undergraduate and graduate majors. Attendance may also be required at designated public performances scheduled at other times.

TPA 2008. Introduction to Technical Design (3). This course introduces the fundamental techniques and systems of scenic design including ground plan, perspective, and model making. May be repeated to a maximum of six semester hours.

TPA 2210. Introduction to Technical Theatre (3). This course introduces the technical elements required to produce a theatrical production. The course discusses elements of scene and costume construction, along with lighting, sound, and stage management. May be repeated to a maximum of six semester hours.

TPA 2248. Stage Makeup (2). This course is an introduction to basic makeup for the stage. Emphasis is on modeling of the face with makeup.

TPA 2282–2292. Technical Theatre Laboratory [one hour each]. Prerequisite: Instructor permission. This course covers a variety of technical theatre techniques and practices including stage and lighting design, 3-D design, theatre administration, and stage management.

TPA 2322. Technical Theatre Practices I – Costumes, Lighting and Stagecraft Run-Crews (3). This course offers an introduction to costume design and costumes. Prerequisites: Students participate in at least one run-crew assignment.

TPA 2323. Technical Theatre Practices II – Scenery, Scene Painting and Front-of-House Associate (3). This course offers an introduction to the theatre craft of scenery and stagecraft practices for theatre, focusing on scenic construction work, workshop construction, and scenic design. Prerequisites: Students participate in at least one front-of-house assignment.

TPA 3208. Drafting for the Stage (3). Prerequisite: TPA 2201. This course is an introduction to computer-aided design (CAD). May be repeated to a maximum of six semester hours.

TPA 3333. Introduction to Costume Craft, Dye and Millinery (3). This course covers the craft of costume creation for theatrical productions. Prerequisites: Students participate in at least one run-crew assignment.

TPA 3353. Lighting and Sound Technology for the Theatre (3). Prerequisite: TPA 2201. This course covers the operation of stage lighting and sound equipment in theatrical and non-theatrical performance. May be repeated to a maximum of six semester hours.

TPA 4020. Lighting Design I (3). Prerequisite: TPA 2201. This course acquaints students with the lighting process and the various tools by which a lighting designer researches and expresses his/her art. The course includes script analysis, producing light plots, and basic drafting.

TPA 4021. Lighting Design II (3). Prerequisites: TPA 3208 and TPA 4020. This course is an overview of the lighting design process for a variety of spaces from concept to finished product. Content includes in-depth instruction in the creation and use of paperwork as well as practical aspects of lighting in both the proscenium and non-proscenium venues.

TPA 4024. Lighting Design III (3). Prerequisite: TPA 4021. This course covers the lighting design process for a variety of production styles such as musicals, opera, dance, comedy and tragedy.

TPA 4055. Costume Design for the Stage (3). Prerequisite: TPA 4260 or instructor permission. This course is an introduction to costume design including ground plan, perspective, and model making. May be repeated to a maximum of six semester hours.

TPA 4073. Rendering for the Stage (3). This course focuses on rendering techniques for the set, costume, and lighting designer in various media. For the course professional equipment is required.

TPA 4077. Scene Painting (3). This course focuses on traditional scene painting techniques for theatre and film. For the course professional equipment is required.

THE 4995. Theatre Production Workshop (3). Prerequisite: Instructor permission. This course involves a workshop production of a major dramatic work together with extensive study of the social, literary, and cultural contexts. The course includes dramaturgical research and written assignments. May be repeated to a maximum of six semester hours.

THE 4995r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.
TPA 4078. Advanced Scene Painting (3). This advanced studio course that develops skills introduced in TPA 4077 with non-traditional scenic techniques and non-traditional materials.

TPA 4084. Life Drawing for Designers (3). This course explores the problems of figure drawing as they relate specifically to the theatrical designer using live, nude and draped models.

TPA 4238. Advanced Costume Construction (3). Prerequisite: TPA 3230 or instructor permission. This course is an advanced practice in constructing specialized costumes for stage use. Students gain practical, hands-on experience in theatrical sewing techniques and in creating projects such as period corsets, historically based costumes constructed to reflect period details, and beginning tailoring techniques.

TPA 4239. Costume Patternmaking (3). Prerequisite: TPA 4238 or instructor permission. This course is an introduction to costume patternmaking including drafting, flat pattern, and draping techniques. This is a project-oriented course where students gain practical experience in all three pattern-making methods on projects for men’s and women’s historically based costumes.

TPA 4240. Advanced Costume Draping and Fitting (3). Prerequisites: TPA 4239 and TPA 4720 or instructor permission. This course is an advanced study in costume patternmaking for theatre, with an emphasis on draping and/or drafting historically based garments for women and men. Projects include period garment research and measuring, sizing, and fitting techniques to accommodate actual performers’ measurements as well as stage movement requirements.

TPA 4246. Stage Wigs and Specialty Makeup (3). This course examines makeup, hair, and wig styles popular throughout history. Students acquire practical, hands-on experience in constructing and styling wigs for the stage and in designing various period hair and makeup styles.

TPA 4250. AutoCAD for the Stage (3). In this course, students learn to apply theatrical drafting standards to AutoCAD. The course also covers basic DOS commands and structure, drafting in 2D AutoCAD, and drafting in 3D AutoCAD (including basic modeling commands).

TPA 4283. Technical Production (3). Prerequisites: TPA 2201 and instructor permission. This course examines the production process from play selection through set design, set load in, run of show, load out, and post mortem analysis. The course focuses on the various and linear aspects of the production, including the management and planning of the budget, pre-construction, construction, and strike aspects of the production.

TPA 4302. Structural Design for the Stage I (3). Prerequisites: TPA 2201 and instructor permission. This course explores the physics and mathematics associated with successful stage structure design. Students study and apply concepts of static engineering, physical science, and material strength in the development of scenic elements.

TPA 4303. Structural Design for the Stage II (3). Prerequisites: TPA 4302 and instructor permission. This course continues the concepts and material covered in TPA 4302.

TPA 4354. Lighting Software for Theatre (3). Prerequisites: TPA 3208 and TPA 4020. This course is an overview of primary light design and visualization software programs. No prior knowledge of computer-aided design is necessary. Significant individual work is required.

TPA 4400. Theatre Management (3). This course is designed to provide an introduction to the economic and managerial aspects of American theatre especially as they apply to nonprofit and professional theatre.

TPA 4601. Stage Management (2). This course focuses on methods and techniques of managing simple dramatic shows to complex multi-scene productions. Must be taken before stage managing a Mainstage production. Consent of instructor required.

TPA 4602. Advanced Stage Management (3). Prerequisite: TPA 4601. This course is intended for students who wish to pursue a career in stage management. Advanced study of stage management and development of skills needed to practice in a LORT theatre.

TPA 4905r. Directed Individual Study (1–3). May be repeated to a maximum of twelve semester hours.

TPA 4922r. BFA Design/Technology Workshop (2). Prerequisite: BFA candidates only. This course includes the evaluation and supervision of all design/technology work. May be repeated to a maximum of eight semester hours.

TPA 4940r. Internship in Stage Design, Technical Theatre, and Management (1–12). (S/U grade only.) Prerequisites: Completion of all coursework in theatre and instructor permission. This course is a resident internship in an approved professional theatre, shop, or enrichment center. May be repeated to a maximum of twelve semester hours.

TPP 2100. Performance I (2). This course presents an overview of acting as an art and craft.

TPP 2110r. Acting Technique I: Basic Process (3). Prerequisite: Instructor permission. This course is an introduction of the basic acting process. Emphasis on living truthfully in imaginary circumstances through honest listening and response. May be repeated to a maximum of nine semester hours.

TPP 2111r. Acting Technique II: Contemporary American Realism (3). Prerequisites: TPP 2110r and/or instructor permission. This course focuses on scene study and basic characterization. May be repeated to a maximum of nine semester hours.

TPP 2185. Orientation to Acting (3). This course is a general survey of the development of acting and actor training, Stanislavsky to Hagen, with exercises in the basics of the actor’s process and audition technique.

TPP 2190L. Theatre Rehearsal and Performance I (1–2). (S/U grade only.) Prerequisite: Instructor permission. Course is intended for the specific role and/or responsibility. Opportunity for students to receive additional supervision and critique, as well as credit, for participation in rehearsal and performance.

TPP 2191L, 2192L. Theatre Rehearsal and Performance (two hours each). (S/U grade only.) Prerequisite: Instructor permission. This course consists of the assignment of a role or responsibility (role(s) and/or responsibility). Opportunities for development of rehearsal and performance technique, as well as credit, for participation in rehearsal and performance.

TPP 2710r. Voice (3). This course introduces student actors to the basic principles of voice training. Group and individual exercises are designed to stimulate and develop the imagination, physical and sensory awareness, creativity, and the ability to work as part of a creative process. Focus is on on articulation, vocal tension, and especially stage musculature that restrict the natural voice. May be repeated to a maximum of nine semester hours.

TPP 3103. Performance II (3). Prerequisite: TPP 2100. This course focuses on the exploration and development of a range of fundamental tools of the acting process, with particular emphasis on vocal production and physical expression in the context of creating and rehearsing scenes and monologues drawn from significant modern and contemporary playwrights, ending with an introduction to the performance of classical Shakespearean texts.

TPP 3325. Acting for the Camera (3). Prerequisite: TPP 2110r. This course offers a preliminary look at developing acting techniques for work in television, film, and video media. Emphasis on exploring the actor's role, performance and of camera and television technique, and perform differently in front of the camera as compared to an onstage production.

TPP 3510r. Movement Techniques for Theatre I (3). Prerequisite: Instructor permission. This course utilizes exercises for self-awareness, physical strength, flexibility, and versatility for the actor. May be repeated to a maximum of six semester hours.

TPP 3511r. Movement Techniques for Theatre II (3). Prerequisite: TPP 3510r and/or instructor permission. This course explores styles of movement and dance, creative presentations, and daily warm-ups. May be repeated to a maximum of six semester hours.

TPP 3711r. Voice I (3). Prerequisite: TPP 2710r. This course continues the study of the first-year basic skills in speaking for the student actor. All actors who are on a professional track for the Bachelor of Fine Arts degree must have thorough knowledge of their speaking voice for the stage, how to use it in their acting studios and stage performances, and how to be a more effective speaker in their everyday life. May be repeated to a maximum of nine semester hours.

TPP 4113r. Acting Techniques III: Acting Problems in Genre and Style (3). Prerequisites: TPP 2110r, TPP 2111r, TPP 3711r, and/or instructor permission. This course is an acting workshop oriented to particular problems the actor confronts in dealing with historic periods in dramatic literature or material of post-realist and contemporary styles and thought. May be repeated to a maximum of nine semester hours.

TPP 4224. Audition Techniques (3). This course is designed as a workshop for advanced actors who are preparing to enter graduate study programs or seek professional work in theatre. Students gain practical experience in the process of auditioning for roles. Focus is on on-the-spot decision-making skills introduced in TPA 4238. This course continues the study of the ensemble actor and is intended for students who are preparing to enter graduate study programs or seek professional work in theatre through the methods of improvisation and即兴表演.

TPP 4427. Voice for Musical Theatre (3). Prerequisite: Junior standing. The course focuses on approaching the singer’s acting voice, with particular emphasis on increasing breath capacity during movement, deepening and expanding resonance and range, and increasing articulation skills. In the course, students learn to fully embody their voice and speech skills to avoid strain and loss that come from executing sound solely from the throat.

TPP 4429r. Devised Theatre Laboratory (3). Prerequisites: TPP 2100 and instructor permission. This advanced course in acting and performance creation teaches students how to develop and approach devising an autonomous work of theatre. The students work in the mode of a theatre company creating a performance in response to a chosen text from the world literature canon. The created piece is presented and discussed publicly. Admission to the course is by audition only, and participation in this course counts as arepreme course.

TPP 4530. Directing I (3). Corequisite: THE 4303. This course is a basic techniques course with emphasis on script analysis, fundamentals of staging, and work with actors.

TPP 4552r. Acting for Film and Television (3). Prerequisites: TPP 3510r, TPP 3511r, and/or instructor permission. This course focuses on advanced movement techniques and exploration of repertory and choreography. May be repeated to a maximum of three semester hours.

TPP 4553. Stage Combat (3). Prerequisites: TPP 2100 or TPP 2110 and instructor permission. This course explores the development of physical dialogue through armed (rapier and dagger, broadsword, quarterstaff, or knife) and unarmed stage combat applied to acting. Focus is placed on the processes of safety, technique, rehearsal, and performance. Students have the option to participate in the Society of American Fight Directors Skill Proficiency Test.

TPP 4600. Fundamentals of Playwriting (3). This course introduces the craft of playwriting. Functions as a workshop and focuses on the mechanics of structure, form, and marketing.

TPP 4712r. Voice II (3). Prerequisites: TPP 2710r and TPP 3711r. This intermediate course in voice focuses on increasing vocal stamina, breath capacity, range, and freedom of an ensemble. An ensemble is introduced in an organic manner as a primary tool in the adoption and use of complex language in acting classical texts. May be repeated to a maximum of six semester hours.

TPP 4713r. Voice VI: Vocal Imagination (3). Prerequisite: TPP 4712r. This course is primarily designed to expand the vocal imagination of the student actor. The International Phonetic Alphabet is introduced. Vocal exercises are introduced in the vocal exercise with the use of the Vocal Imagination.

TPP 4730r. Dialects for Stage (3). Prerequisites: TPP 2110r, TPP 3710r, TPP 3711r, and/or instructor permission. This course focuses on the techniques of acquiring a dialect for stage performance. Scene study and monologues performed in dialects. Content may vary from semester to semester. May be repeated to a maximum of six semester hours.

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.
**Pre-Graduate Program**

This undergraduate program is designed for students who anticipate continuing to graduate school to earn the professional master’s degree in planning. Students in this program are given the opportunity to begin graduate-level coursework in their senior year and thereby may satisfy some of the requirements of a graduate degree while still completing their undergraduate credit hour requirements. This program is closely coordinated with the department’s graduate program, offering students the possibility of preferred admission with advanced standing at the graduate level. Students make application for advanced standing after admission to the master’s program.

The pre-graduate program allows acceleration toward the Master of Science (MS) in planning degree upon satisfactory completion of one required undergraduate course and one to four of the eligible URP graduate courses. URP 3000 is a prerequisite requirement for all courses.

Admission to the pre-graduate program is available only to those undergraduates who are beginning or are in their senior year and who have maintained a cumulative FSU grade point average (GPA) of at least 3.2 or who have earned a satisfactory score on the combined verbal and quantitative portions of the GRE and who have taken or are registered for URP 3000. Students completing this program with an upper-division GPA of at least 3.0 may be offered admission to the master’s program in planning with advanced standing for up to twelve semester hours of coursework in which the grade of “B” or higher was earned.

**Required Course**

**URP 3000** Introduction to Planning and Urban Development (3)

**Elective Courses (Choose One to Four)**

Students interested in the pre-graduate program are advised to see the department’s Director of Undergraduate Programs for advising on appropriate courses to take.

A guide to undergraduate studies in urban and regional planning is available from the department and should be consulted by all students enrolling in the minor in planning studies or pre-graduate programs.

**Multicultural Studies**

A variety of urban and regional planning undergraduate courses explore perspectives of different cultural groups on questions related to urban life and the development of human settlements. Approved for credit under the University’s baccalaureate multicultural requirement for cross-cultural (x) courses are: URS 1006, World Cities; and URP 4618, Planning for Developing Regions.

**Department of URBAN AND REGIONAL PLANNING**

**College of Social Sciences and Public Policy**

Web Page: [http://www.coss.fsu.edu/durp/](http://www.coss.fsu.edu/durp/)

Chair: Jeff Brown; Professors: Chapin, Doan, Miles; Associate Professors: Brown, Coutts; Assistant Professors: Butler, Duncan, Felkner, Planner in Residence: Stevens; Professors Emeriti: Cowart, Dyke, RuBino, Thompson

Urban and regional planning is an interdisciplinary field that is concerned with the management of population growth and decline in urban, suburban, and rural areas. It is concerned with the uses of land to accommodate population; the provision of employment, services, and facilities needed by this population (for example, housing, hospitals, roads and other transportation facilities, schools, parks and recreation, and health services); and the impacts of this population on the environment (air, water, and land), society, and governance.

Planners study these issues and develop policies and plans to accommodate population growth and the problems that arise from this growth. Planners are concerned with the development of coordinated policy responses to these issues; they practice a broad view that focuses on the interrelationships between problems and the necessary interrelatedness of solutions. Above all, planners are concerned with improvements to the quality of life of our communities. They attempt to address these issues in ways that recognize the diverse interests of both genders and those of varying social and economic groups.

Planning is practiced at all levels of government, including local, regional, state, multistate, and national levels. Planners are also found in the private sector; in the employment of development firms, law firms, banks, and specialized resource firms (mining, forestry, etc.); in public interest organizations; and in international settings.

The Department of Urban and Regional Planning offers two non-major programs for undergraduates interested in planning and urban affairs. These programs are designed to complement an existing major for those students who wish to develop an appreciation of planning or who wish to lay the foundation for graduate study in planning. These programs are the undergraduate planning studies minor and pre-graduate programs. Within each of these programs, students may satisfy their minor requirements.

Because of the variety of issues and contexts within which planners work, there is no one undergraduate background that is more important than others. Students may combine their interests in planning and urban affairs with undergraduate majors in the variety of social sciences, physical or natural sciences, business, engineering, design professions, communications, criminology and criminal justice, and others.

**Planning Studies Minor Program**

This program is designed for students who wish to apply their major field to problems and issues in planning and urban affairs. The program consists of a series of courses that provide an overview of planning and that introduce the student to issues, organizations, policies, and implementation strategies.

Students may earn a minor in urban and regional planning by completing a four-course sequence that is composed of three required courses and one elective course. URP 3000 is a prerequisite for all of the required and elective courses. Electives are chosen from among a set of introductory courses representing the major policy areas taught by the department. These include land use and comprehensive planning, planning for developing areas, environmental planning and resource management, housing and community development, and transportation planning.

Students interested in the planning studies minor program are advised to see the department’s Director of Undergraduate Programs for advice on the availability of courses.

</table>
URP 4318. Growth Management and Environmental Planning (3). Prerequisite: URP 3000. This course provides a general introduction to growth management and environmental planning through an overview of general planning history, basic legal theory, principles of growth management and land use planning, and introductory environmental management approaches. The first portion of the course covers basic growth management principles, both to identify issues and to study current trends in planning. The second portion of this course covers current practices and approaches to environmental planning that are important to defining environmental planning problems and evaluating alternative courses of action.

URP 4402. Sustainable Development Planning in the Americas (3). Prerequisite: URP 3000 or instructor permission. This course examines various dimensions of the "sustainable development" paradigm and its local-global policy implications, issues, and controversies with a focus on North America and Latin America. The course is organized into three modules: 1) environmental philosophies that have influenced the movement; 2) North American approaches to planning for sustainable development; and 3) critical issues of sustainable development in Latin America.

URP 4404. River Basin Management and Planning (3). This course introduces river basin management and planning and takes a systemic approach from biological, hydrological, and geopolitical viewpoints. Special emphasis is placed on the planning and management of transboundary (interstate and international) basins. The focus is on world river basin systems as well as on the local Apalachicola-Chattahoochee-Flint basin. Students are introduced to technical concepts and tools, including negotiation and math simulation tools.

URP 4423. Introduction to Environmental Planning and Resource Management (3). Prerequisite: URP 3000 or instructor permission. This course is a general introduction to the problems of resource management and environmental planning, with an overview of problems and potential solutions and their relation to other public policy areas such as land-use control and regional development.

URP 4618. Planning for Developing Regions (3). Prerequisite: URP 3000 or instructor permission. This course introduces the student to the field of development planning and gives the student exposure to the interplay between theory and practice. Topics include concepts of development, measurement and indicators of patterns of development, rural development, urban development, preparation of development plans, and implementation of development plans.

URP 4710. Introduction to Transportation Issues and Transportation Planning (3). Prerequisite: URP 3000 or instructor permission. This course is an introduction to contemporary U.S. transportation problems, sources of funding, and legislation. Presents the theory and methods employed by planners in the process of resolving transportation problems.

URP 4741. Introduction to Issues in Housing and Community Development (3). Prerequisite: URP 3000 or instructor permission. This course focuses on the operation of the housing market, the nature of the housing and community development problem, and the gradual development of a national housing and community development policy since the 1930s. The course also examines relationships between public and private sectors.

URP 4836r. Special Topics in Urban and Regional Planning (3). This course is a selected topics seminar for the discussion of unique and timely planning related issues. Content varies. May be repeated to a maximum of six semester hours.

**Graduate Courses**

**Planning Theory and Practice**

URP 5101. Planning Theory and Practice (3).

URP 5122. Planning Dispute Resolution (3).

URP 5123. Collaborative Governance: Consensus Building for Planners (3).

URP 5125. Plan Implementation (3).

URP 5342. Advanced Planning Problems (3).

URP 5544. Gender and Development (3).

URP 5944. Dispute Resolution Practicum (3).

URP 6102. Seminar in Planning Theory (3).

**Planning Methods**

URP 5201. Planning Research Methods (3).

URP 5211. Planning Statistics (3).

URP 5222. Planning Alternatives Evaluation (3).

URP 5261. Forecasting for Plan Development (3).

URP 5272. Urban and Regional Information Systems (3).

URP 5279. Urban and Regional Information Systems Practicum (3).

URP 6202. Design of Policy-Oriented Research (3).

**Urban Growth Process**

URP 5847. Growth and Development of Cities (3).

URP 6844. Seminar in Regional Theory (3).

URP 6846. Seminar in Urban Theory (3).

**Planning for Developing Areas**

URP 5610. Introduction to Planning for Developing Regions (3).

URP 5611. Strategies for Urban and Regional Development in Less-Developed Countries (3).

URP 5614. Population and Development Planning (3).

URP 5616. Project Planning in Developing Countries (3).

**Planning for Health and Aging**

URP 5521. Public Health Epidemiology (3).

URP 5522. Regulatory Aspects of Health Care (3).

URP 5525. Health Behavior and Education (3).

URP 5526. Healthy Cities, Healthy Communities (3).

**Environmental Planning and Natural Resource Management**

URP 5405. River Basin Planning and Management (3).

URP 5421. Introduction to Environmental Planning and Natural Resource Management (3).

URP 5422. Coastal Planning (3).

URP 5424. Sustainable Development Planning in the Americas (3).

URP 5425. Methods of Environmental Analysis (3).

URP 5427. Environmental Legislation and Policy (3).

URP 5429r. Special Topics in Environmental Planning and Resource Management (3).

**Land Use and Comprehensive Planning**

URP 5312. Perspective and Issues of Comprehensive Planning and Growth Management (3).

URP 5316. Land-Use Planning (3).

URP 5319r. Special Topics in Comprehensive Planning and Growth Management (3).

URP 5350. Pedestrian-Oriented Communities (3).

URP 5731. The Planning of Community Infrastructure (3).

URP 5873. Site Design and Land-Use Analysis (3).

URP 5881. Urban Design (3).

**Transportation Planning**

URP 5711. The Transportation Planning Process (3).

URP 5716. Transportation and Land Use (3).

URP 5717. Methods of Transportation Planning (3).

**Housing and Community Development**

URP 5540. State and Local Economic Development (3).

URP 5615. Infrastructure and Housing in Less Developed Countries (3).

URP 5742. Problems and Issues in Housing and Community Development (3).

URP 5743. Neighborhood Planning (3).

URP 5749r. Special Topics in Housing and Community Development (3).

**Other Courses for Graduate Students**

URP 5905r. Directed Individual Study (1–3). (S/U grade only.)

URP 5910r. Directed Individual Research (1–3). (S/U grade only.)

URP 5930r. Professional Topics in Urban and Regional Planning (0). (S/U grade only.)

URP 5939r. Special Topics in Urban and Regional Planning (0–3).

URP 6938. Doctoral Research Colloquium (0). (S/U grade only.)

URP 6981r. Supervised Teaching (1–3). (S/U grade only.)

For listings relating to graduate coursework for thesis, dissertation, and master’s and doctoral examinations and defense, consult the Graduate Bulletin.

DeGrummond, Fulkerson, Pullen, Sickinger, Slaveva-Griffin, (Classics); Jordan, Laurents, McDowell, Nudd (Communication); Young (Dance); Lake, Losh, MacDonald, Molyneaux, Schwartz, Wood (Education); Daileader, Edwards, Gardner, Goodman, Kidwell, Laughlin, McGregor, Montgomery, Moore, Parker, Rowe, Saladin-Adams, Walker (English); Darling, Rehm (Family and Child Sciences); Wyldre (Fine Arts); Herrera, Jones, Jumonville, Upchurch Jr., Sinke (History); Rastoll (Human Sciences); Johnson, Cashin (Humanities); Case (Mathematics); Boutin, Cappuccio, Cloonan, Hargreaves, Leushuis, Maier-Katkin, Poey, Sharpe, Walters, Wang (Modern Languages and Linguistics); Cottrell (Nursing); Abood, Magnuson (Nutritional Sciences); Marcus (Oceanography); Daney, Mahaffey, Morales (Philosophy); Carbonell, Eckel, Hull, Kee, Kistner (Psychology); Cuevas, Dupuigrenet, Erndl, Kalb, Kavka, Kelsay, Koehliger, Reid (Religion); Ashmore, Dwyer, Edwards, Gomory, Graham, Verano, Vinton, Wilke (Social Work); Barrett, Brewster, Eberstein, Lessan, McCabe, Padavic, Rohlinger, Schrock, Taylor, Tillman, Weinberg (Sociology); Reynaud (Sport Management); Rodriguez Concepcion, Osborne, Sandahl, Witherspoon (Theatre); Doan, Miles (Urban and Regional Planning)

Women's Studies courses are taught by faculty in more than twenty departments throughout the University.

Women's Studies is an interdisciplinary and interdepartmental program that examines the status, accomplishments, and perspectives of women in history, culture, and contemporary society. The Women's Studies Program further seeks to delineate the richness and diversity of women's experiences and viewpoints by exploring the dynamics of gender, race, culture, and class.

By placing women at the center of inquiry, Women's Studies courses offer new perspectives on human history and the human condition. Using gender as a category of analysis, these courses examine the systematic arrangements in society that have shaped the lives of women and men and re-evaluate traditional gender-based stereotypes. The courses foster critical analysis of assumptions about society by examining paradigms based upon the feminist scholarship of the last three decades. By encouraging inquiry into the full range of the human experience, the Women's Studies Program enriches the University curriculum and prepares students for life in a rapidly changing, complex world.

Students pursuing research in Women's Studies at Florida State University will find a rich array of materials on women and gender in the government document holdings, special collections, and numerous microform manuscript collections available at Strozier Library and in the extensive collections of the College of Law Library and Mildred and Claude Pepper Library. The nearby State Archives are an additional source of research material.

Women's Studies graduates have described Women's Studies as a versatile major that prepared them for life, not just a career. In particular, graduates have cited its interdisciplinary focus, its attention to developing critical thinking skills, and its ability to empower students with a new sense of their potential and the courage to design their own careers and life plan. Women's Studies graduates can be found in nearly all occupations.

The Women's Studies Program offers an interdisciplinary bachelor's degree within the Department of Humanities and an interdisciplinary minor at the undergraduate and graduate (MA, and PhD) levels. For more information and updates see the Women's Studies Program Web site at http://ws.artsandsciences.fsu.edu/.

Admission Requirements

Please review all college-wide degree requirements in the “College of Arts and Sciences” chapter of this General Bulletin.

Any student with a 2.0 grade average who meets the admission requirements of the College of Arts and Sciences is eligible to declare a major in Women's Studies. Students who wish to declare a major in Women's Studies must apply for admission with the Women’s Studies office and complete an advising form.

Computer Skills Competency

All undergraduates at Florida State University must demonstrate basic computer skills competency prior to graduation. As necessary computer competency skills vary from discipline to discipline, each major determines the

courses needed to satisfy this requirement. Undergraduate majors in Women’s Studies satisfy this requirement by earning a grade of “C–” or higher in CGS 2060 or CGS 2100.

Requirements for a Major in Women's Studies

Students are required to take thirty-three semester hours of Women's Studies courses and approved cross-listed courses distributed as described below. Only one of these courses that is used to satisfy the requirement for liberal studies may also be counted toward the fulfillment of the major. Honors thesis hours may be applied toward the Bachelor of Arts (BA) degree, but only three semester hours will be accepted for major credit. All courses counted toward the major must carry the grade of “C–” or better. Majors must maintain a 2.0 grade point average for graduation. Women’s Studies majors are required to complete a minor and are strongly encouraged to complete a minor in a single discipline. No course used to satisfy requirements for a minor may be counted for the major.

Double Majors

Students pursuing a double major must meet the program requirements of both majors, with the following exceptions: (1) no more than six semester hours may be counted toward both majors; and (2) no minors are required for the double major.

Distribution

WST Requirement

Twelve semester hours in WST interdisciplinary courses:

a. WST 3015 Introduction to Women’s Studies (3)
b. WST 3251 Women in Western Culture: Images and Realities (3)
c. WST 4931 Seminar in Women’s Studies (3) or WST 4930r Topics in Women’s Studies (3)
d. Either WST 4940r Women’s Studies Internship (3–6) or WST 4930r Topics in Women’s Studies (3) as approved by the program director.

Check with the Women’s Studies office each term for a list of possible courses that can be used to fulfill these credits.

Note: WST 4930r may be repeated to a maximum of nine semester hours and WST 4931 is a non-repeatable course.

Cross-Listed Core Courses

At least twelve semester hours of cross-listed courses listed below are required. Specifically required are three semester hours from each of the four groups below:

Electives

Nine semester hours may be selected from among the following options: (a) WST 4904r Directed Individual Study in Women’s Studies, WST 4930r Topics in Women’s Studies, WST 4940r Women's Studies Internship; (b) the cross-listed courses in Groups A–D; (c) approved related courses, special topics courses, seminars, and workshops. Three semester hours of the major elective requirement may be satisfied with a 2000-level course, including, but not necessarily limited to, AMH 2096 Black Women in America, and PHM 2121 Philosophy of Race, Class, and Gender; however, the course must be taken at Florida State University, and only one of the listed classes may be counted toward credit in the program in Women’s Studies. Majors should consult with the Women’s Studies office each term for a list of approved courses that can be used to fulfill elective credits.

Exit Surveys/Interviews

To be eligible for graduation, students majoring and minoring in Women’s Studies must complete an exit interview or survey.

Honors in the Major

The Women’s Studies Program offers a program in honors in the major to encourage talented students to undertake independent and original research. Students admitted to honors in the major may apply up to six semester hours of honors thesis hours (WST 4970r, Honors Thesis—Women’s Studies) toward the Bachelor of Arts (BA) degree, but only three semester hours of WST 4970r will be accepted for major credit. For requirements and other information, see the “University Honors Office and Honor Societies” chapter of this General Bulletin.

Requirements for a Minor in Women’s Studies

At least fifteen semester hours of approved courses, distributed as follows:

1. At least three semester hours of interdisciplinary Women’s Studies courses selected from WST 3015 Introduction to Women’s Studies, WST 3251 Women in Western Culture: Images and Realities, WST 4930r Topics in Women’s Studies, WST 4931 Seminar in Women’s Studies

2. At least nine semester hours of cross-listed core courses

3. The remaining three semester hours may be selected from approved WST courses, cross-listed core courses, approved special topics courses, or related courses. No 2000-level courses may be used to fulfill credit for the minor.

Minors should consult with the Women’s Studies staff each term for a list of approved courses that can be used to fulfill these three credits.

Only one approved course from the student’s major may count toward the Women’s Studies minor, and only if the course has not been used for credit toward the major. Courses counted for the minor may not be used to fulfill requirements for liberal studies or the major. Students who intend to minor in Women’s Studies should declare their intent with the program director at least two semesters before graduation. Students must have at least a “C–” average in the minor.

Definition of Prefix

WST—Women’s Studies

Undergraduate Courses

WST 3015. Introduction to Women’s Studies (3). This course introduces students to the field of Women’s Studies. Topics include the construction of gender and gender roles in varying social and cultural contexts. Women’s roles are examined from a variety of perspectives, which may include social class, religion, culture, and sexuality. The course includes an overview of theories of feminism.

WST 3251. Women in Western Culture: Images and Realities (3). This course is an interdisciplinary examination of women’s roles in the development of Western culture, focusing on women’s contributions to literature, theatre, art, religion, political thought, and science. Concurrently, this course examines what it meant to be female in each era of Western civilization.

WST 4904r. Directed Individual Study (1–3). Prerequisite: Permission from the program director. This course is for advanced undergraduates who desire to supplement regular course offerings by independent reading or research under guidance. May be repeated to a maximum of three semester hours.
WST 4930r. Topics in Women's Studies (3). This course explores specific topics or themes in gender/women’s studies based on a feminist approach. A variety of topics from different fields of study will be offered from an interdisciplinary perspective. Topics of material not covered in the regular curriculum are offered. May be repeated to a maximum of nine semester hours.

WST 4931. Seminar in Women's Studies (3). Prerequisite: At least two women’s studies core courses. Corequisite: Permission from the program director. This senior seminar examines how cultures structure and represent gender in a variety of arenas. Through critical reading of key contemporary works of feminist theory and intensive investigation of multidisciplinary case studies, students study the variety of representations of women’s experience.

WST 4940r. Women's Studies Internship (3–6). (S/U grade only.) Prerequisite: Two core courses in women’s studies. Corequisite: Permission from the program director. The internship offers practical experience working on women’s issues or with women as a focus group in governmental and private agencies, women’s organizations, or business. Internships may be arranged for junior and senior minors and majors in women’s studies with the women’s studies office. May be repeated to a maximum of six semester hours.

WST 4970r. Honors Thesis—Women's Studies (1–6). Prerequisite: WST 3251. For this course, the honors thesis in women’s studies is a research document of an interdisciplinary nature, drawing on the various categories in humanities and the social sciences represented in the Women’s Studies program. Permission of WST director required. May be repeated to a maximum of nine semester hours.

Graduate Courses

WST 5905r. Directed Independent Study (1–3). (S/U grade only.)
WST 5934r. Topics in Women’s Studies (3).
WST 5936r. Interdisciplinary Topics in Feminist Theory (3).

- John E. Thrasher, President
- Sally McRorie, Interim Provost and Executive Vice President for Academic Affairs
- Kyle C. Clark, Vice President for Finance and Administration
- Mary B. Coburn, Vice President for Student Affairs
- Kathleen Daly, Interim Vice President for University Relations
- Carolyn Egan, General Counsel
- Tom Jennings, Vice President for University Advancement
- Janet Kistner, Interim Vice President for Faculty Development and Advancement
- Sam McCall, Chief Audit Officer
- Gary K. Ostrander, Vice President for Research
- Stan Wilcox, Athletics Director
- TBD, Vice President for Planning and Programs

Provost and Executive Vice President for Academic Affairs:

http://provost.fsu.edu/
- Sally McRorie, Interim Provost
- Kimberly A. Barber, University Registrar
- John Barnhill, Assistant Vice President for Enrollment Management
- Michael Barrett, Associate Vice President for Information Technology Services
- Gregory Beaumont, Associate Dean of Undergraduate Studies and Senior Associate Athletic Director for Academic Services
- Anne Blankenship, Associate Vice President for Academic Affairs
- Richard (Rick) Burnette, Director of Institutional Research
- Judith Devine, Associate Dean of The Graduate School
- D. Craig Filar, Director of the Office of National Fellowships
- Janice Finney, Director of Admissions
- William (Billy) Francis, Director of the FSU Veterans Center
- T. Lynn Hogan, Director of Critical Thinking Initiatives
- Bruce Janasiewicz, Associate Dean of Undergraduate Studies
- Bruce Janasiewicz, Director of Community College and Interinstitutional Relations
- Kenneth C. Johnson, Director of University Technology Administration
- Janet Kistner, Associate Vice President for Academic Affairs
- Karen L. Laughlin, Dean of Undergraduate Studies
- Bruce Locke, Associate Vice President for Academic Affairs
- Nancy Marcus, Dean of The Graduate School
- Darryl Marshall, Director of Financial Aid
- Paul Marty, Director of University Honors Program
- Jeffrey Ayala Milligan, Director of Learning Systems Institute
- Joe O’Shea, Director of Undergraduate Research
- Michael Russo, Director of Technology Services Security and Information Privacy
- Anne Selvey, Director of the Louise R. Goldhagen Regional Multidisciplinary Evaluation and Consulting Center
- Matthew Shaftel, Associate Vice President for Academic Affairs
- Tadarrayl Starke, Director of Center for Academic Retention and Enhancement (CARE)
- TBD, Executive Assistant to the Provost
Vice President for Finance and Administration:

http://www.vpfa.fsu.edu

• Kyle C. Clark, Vice President for Finance and Administration
• Eric S. Algoe, Associate Vice President for Administration
• Dennis Bailey, Senior Associate Vice President for Facilities
• Michael Barrett, Associate Vice President for Information Technology Services
• David Bujak, Director of Emergency Management
• Maria Cicciarella, Executive Assistant to the Vice President
• Perry Crowell, Assistant Vice President for Administrative Services
• Gerald (Jerry) Ganz, Chief Financial Officer of the FSU Foundation
• Angela Gaskins, Director of University Business Administrators
• Renisha Gibbs, Assistant Vice President for Human Resources and Finance and Administration Chief of Staff
• Matthew Inman, Director of Transportation and Parking
• Thomas (Tom) Jacobson, Director of Environmental Health and Safety
• Michael Lake, Director of University Budgets
• Randy McCausland, Director of Infrastructure and Operational Services and Director of Student Services
• Holly Newell, Chief Financial Officer of the FSU Research Foundation
• David Perry, Assistant Vice President for Public Safety and Chief of Police
• Pamela Ray, Director of Sponsored Research Administration Services
• Ian Robbins, Director of Procurement Services
• Colleen Thomas, Assistant Director of Campus Access and Security Systems
• Mary Wilkes, Director of the Employee Assistance Program
• Michael Williams, University Controller

Vice President for University Advancement:

http://advancement.fsu.edu

• Thomas W. Jennings, Vice President for University Advancement and President, FSU Foundation
• Scott Atwell, President of the FSU Alumni Association, Inc.
• Kevin Graham, Executive Director, FSU Real Estate Foundation
• Steven High, Executive Director, The John and Mable Ringling Museum of Art
• Andy Jhanji, Executive Vice President, FSU Foundation
• Andy Miller, President of the Seminole Boosters, Inc.
• Kimberly Sarmiento, Executive Assistant to the Vice President

Vice President for Planning and Programs:

http://provost.fsu.edu/vppp/

• TBD, Vice President for Planning and Programs
• Kay Bartlett, Executive Assistant to the Vice President
• Ruth Feiock, Assistant Vice President for Planning and Programs, and SACS Liaison
• Carol D. Edwards, Dean of College of Applied Studies, Panama City Campus, FL
• William Lindner, Director of the Center for Academic and Professional Development
• Kayce Morton, Director of Institutional Effectiveness
• James E. Pitts, Director of International Programs
• Susann Rudasill, Director of the Office of Distance Learning
• Julia Zimmerman, Dean of University Libraries

Vice President for Student Affairs:

http://studentaffairs.fsu.edu/

• Mary B. Coburn, Vice President for Student Affairs
• Brandon Bowden, Assistant Vice President for Student Affairs
• Michael Burke, Dean of Students
• William (Bill) Clutter, Director of Oglesby Union
• Stefano J. Cavallaro, SGA President 2014-2015
• Allison Crume, Associate Vice President for Student Affairs
• Maedea Davis, Executive Assistant to the Vice President
• Vicki Dobiynanski, Director of Student Government Association
• Michael (Mike) Ferguson, Executive Director of Florida Center for Interactive Media (FCIM)
• Carlos J. Gomez, Director of University Counseling Center
• Cynthia (Cindy) Green, Director of Center for Global Engagement
• Myrna Hoover, Director of Career Center
• Gerald K. Johnson II, Student Body Vice President, 2014-2015
• Christopher Morris, Director of Campus Recreation
• Aron Myers, Director of Marketing and Communications
• Laura Osteen, Director of Center for Leadership and Social Change
• Elizabeth (Beth) Roberts, Director of FSU Child Development Programs
• Lesley Sacher, Director of University Health Services
• Tadarryl Starke, Director of Center for Academic Retention and Enhancement (CARE)
• TBD, Director of University Housing

Vice President for University Relations:

http://www.unirel.fsu.edu

• Kathleen Daly, Interim Vice President for University Relations
• Tony Archer, Director of Creative Services
• Browning Brooks, Interim Associate Vice President for University Communications
• Pat Campbell, Event Coordinator
• Ellen Cole, Director of University Marketing and Brand Services
• Kathleen Daly, Assistant Vice President for Governmental Relations
• Christopher J. Heacox, Director of Opening Nights
• Patrick Keating, General Manager of Broadcast Center
• Paula Moyer, Chief of Staff
• Lynna Sands, Event Coordinator
• Dennis Schnittker, Director of Digital Media

Vice President for Research:

Distinguished Research Professors

Harper, William C., MS, Distinguished Research Professor, 1990–1991, Professor of Studio Art (Retired)
Tam, Christopher K. W., PhD, California Institute of Technology; Distinguished Research Professor, 1990–1991, Robert O. Lawton Distinguished Professor, 2000–2001, Professor of Mathematics and Mechanical Engineering
Eisenberg, Daniel, PhD, Brown; Distinguished Research Professor, 1991–1992, Professor of Modern Languages (Resigned)
Loper, David E., PhD, Case Western Reserve; Distinguished Research Professor, 1991–1992, George W. De Vore Professor of Geological Sciences, 1999, and Director, Geophysical Fluid Dynamics Institute (Retired)
Parker, Glenn R., PhD, California; Distinguished Research Professor, 1991–1992, Professor of Political Science
Benson, Bruce L., PhD, Texas A&M; Distinguished Research Professor, 1992–1993, Professor of Economics
Graziani, Pasquale P., MD, Pavia, Italy; Distinguished Research Professor, 1992–1993, Professor of Biological Science (Retired)
Kemper, Kirby W., PhD, Indiana; Distinguished Research Professor, 1993–1994, John David Fox Professor of Physics, 2000, and Robert O. Lawton Distinguished Professor, 2002–2003 (Retired)
Nam, Charles B., PhD, North Carolina; Distinguished Research Professor, 1993–1994, Professor of Social Science (Retired)
Tumer, Ralph V., PhD, Johns Hopkins; Distinguished Research Professor, 1993–1994, Service Professor of History (Retired)
Bryant, John L., PhD, Georgia; Distinguished Research Professor, 1994–1995, Professor of Mathematics (Retired)
Freeman, Marc E., PhD, West Virginia; Distinguished Research Professor, 1994–1995, Lloyd M. Beider Professor of Biological Science, 2000 (Retired)
Owens, Joseph, PhD, Tulane; Distinguished Research Professor, 1994–1995, Chair and Guenter Schwartz Professor of Physics, 2000
James, Frances C., PhD, Distinguished Research Professor, 1995–1996, Pasquale Grazidzi Professor of Biological Science, 1999 (Retired)
Stern, Melvin E., PhD, Massachusetts Institute of Technology; Distinguished Research Professor, 1995–1996, V. W. Eklund Professor of Oceanography, and National Academy of Sciences (Distinguished)
Pfeffer, Richard, PhD, Massachusetts Institute of Technology; Distinguished Research Professor, 1996–1997, Carl-Gustav Rosby Professor of Meteorology (Retired)
Torgeson, Joseph, PhD, Michigan; Distinguished Research Professor, 1996–1997, Robert M. Gage Professor of Psychology and Education, 2000, and Professor of Psychology (Retired)
Van Scoy, Steven W., PhD, Washington; Distinguished Research Professor, 1996–1997, Professor of Technical Engineering
Hagopian, Vasken, PhD, Pennsylvania; Distinguished Research Professor, 1997–1998, Joseph E. Lammutti Professor of Physics, 1999 (Retired)
Myles, John F., PhD, Wisconsin; Distinguished Research Professor, 1997–1998, Professor of Sociology
Nicholson, Sharon E., PhD, Wisconsin; Distinguished Research Professor, 1997–1998, Heinz and Katharina Lettau Professor of Climatology, 2002, and Professor of Meteorology
Balkwill, David L., PhD, Pennsylvania State; Distinguished Research Professor, 1998–1999, Professor of Biological Science
Hin, Barry T., PhD, Virginia; Distinguished Research Professor, 1998–1999, Professor of Economics
Marshall, Alan George, PhD, Stanford; Distinguished Research Professor, 1998–1999, Kashia Professor of Chemistry, 1999
Gontarski, Stanley E., PhD, Ohio State; Distinguished Research Professor, 1999–2000, Sarah Herndon Professor of English, 1999
Holt, Robert A., PhD, Florida State; Distinguished Research Professor, 1999–2000, Matthew Sufiness Professor of Chemistry, 2002
Clarke, Allan J., PhD, Cambridge; Distinguished Research Professor, 2000–2001, Adrian E. Gill Professor of Oceanography, 2001
Cox, Timothy A., PhD, Pennsylvania; Distinguished Research Professor, 2000–2001, Earl Frieden Professor of Chemistry and Biochemistry, 2002
Olsen, Dale A., PhD, California at Los Angeles; Distinguished Research Professor, 2000–2001, Professor of Music (Retired)
Fenstermaker, John J., PhD, Ohio State; Distinguished Research Professor, 2001–2002, Distinguished Teaching Professor, 2000–2001, Fred L. Standley Professor of English, 2002 (Retired)
Tabor, Samuel, PhD, Stanford; Distinguished Research Professor, 2001–2002, Professor of Physics
Taylor, Kenneth A., PhD, California at Berkeley; Distinguished Research Professor 2001–2002, Professor of Biological Science
Gaid, Nor S., PhD, British Columbia; Distinguished Research Professor, 2002–2003, and Chair of Chemistry
Nof, Doron, PhD, Wisconsin; Distinguished Research Professor, 2002–2003, and Fridjof Nansen Professor of Oceanography, 2001
Techentin, Walter R., PhD, California at Berkeley; Distinguished Research Professor, 2002, 2003, and Margaret Y. Menzel Professor of Biological Science, 1999
Distinguished Teaching Professors

Clark, Ronald J., PhD, Kansas; Distinguished Teaching Professor, 1989–1990, Professor of Chemistry (Retired)
Hoffer, Kurt G., PhD, Vienna; Distinguished Teaching Professor, 1989–1990, Robert O. Lawton Distinguished Professor, 1994–1995, Professor of Biological Science (Retired)
Howard, Donald D., PhD, Minnesota; Distinguished Teaching Professor, 1989–1990, Eminent Scholar and Professor of History (Retired)
Madsen, Clifford K., PhD, Florida State; Distinguished Teaching Professor, 1989–1990, Alumni Professor, 1985–1988, Robert O. Lawton Distinguished Professor, 1988–1989, Professor of Music (Retired)
Mellon, Edward K., PhD, Texas; Distinguished Teaching Professor, 1989–1990, Chair and Professor of Human Sciences
Jones, James P., MA, Florida; Distinguished Teaching Professor, 1990–1991, Professor of History
Juhani, W. T., Jr., PhD, Indiana; Distinguished Teaching Professor, 1990–1991, George M. Harper Professor of English, 2000 (Retired)
Rashotte, Michael E., PhD, Toronto; Distinguished Teaching Professor, 1990–1991, Professor of Psychology
Rogers, William W., North Carolina; Distinguished Teaching Professor, 1990–1991, Professor of History (Retired)
Sando, Leo, PhD, Boston; Distinguished Teaching Professor, 1990–1991, Chair and Professor of Religion, and Director, Program in American Studies (Retired)
Leverson, David S., PhD, Harvard; Distinguished Teaching Professor, 1992–1993, Associate Professor of Religion
Smith, James C., PhD, Florida State; Distinguished Teaching Professor, 1993–1994, Professor of Psychology, Robert O. Lawton Distinguished Professor, 1992–1993 (Retired)
Leach, Stephen P., PhD, Florida State; Distinguished Teaching Professor, 1994–1995, Assistant Scholar/Scientist of Computer Science
Walker, Eric C., PhD, North Carolina at Chapel Hill; Distinguished Teaching Professor, 1995–1996, Professor of English
Darling, Carol A., PhD, Michigan State; Distinguished Teaching Professor, 1996–1997, Professor of Family and Child Sciences, and Margaret Rector Sandle Professor of Human Sciences, 1999
Goldby, Kenneth A., PhD, North Carolina; Distinguished Teaching Professor, 1997–1998, Associate Professor of Chemistry
Moore, Dennis D., PhD, North Carolina; Distinguished Teaching Professor, 1998–1999, Associate Professor of English
Keely, David K., PhD, Johns Hopkins; Distinguished Teaching Professor, 2006–2007, Robert O. Lawton Distinguished Professor, 2003–2004, McKenze Professor, 1989, Professor of English
Christianian, William A., PhD, Utah; Distinguished Teaching Professor, 2007–2008, Chair and Associate Professor of Finance
Ziegler, Mark A., MA, Distinguished Teaching Professor, 2008–2009, Associate In Communications
Coats, Pamela K., PhD, Nebraska-Lincoln; Distinguished Teaching Professor, 2009–2010, Robert C. Earnest Professor of Finance, 2002
Quandagno, Jill, PhD, Kansas; Distinguished Teaching Professor, 2010–2011, Mildred and Claude Pepper Eminent Scholar in Social Gerontology, 1987, and Professor of Sociology
Mosey, Leonor M., PhD, Florida State; Distinguished Teaching Professor, 2011–2012, Associate Professor of Family and Child Sciences
Shafler, Matthew R., PhD, Yale; Distinguished Teaching Professor, 2012–2013, Associate Professor of Music
Schwabe, Amelie M., PhD, Kent State University; Distinguished Teaching Professor, 2013–2014, Senior Teaching Faculty in Sociology
Terebelski, Patricia Spears, PhD, Florida State University; Distinguished Teaching Professor, 2014–2015, Teaching Faculty III in Biological Science

McKenzie Professors

Berkeley, Karen J., PhD, Washington; Distinguished Research Professor, 2003–2004, McKenzie Professor 1989, Professor of Psychology (Retired)
Burroway, Janet G., MA, McKenzie Professor 1987, Service Professor of English (Retired)
Dye, Thomas R., PhD, Pennsylvania; McKenzie Professor 1987, Service Professor of Political Science
Hinkka, Jaakko, PhD, Helsinki, Finland; McKenzie Professor 1987, Professor of Philosophy (Retired)
Howard, Louis N., PhD, Princeton; McKenzie Professor 1987, Professor of Mathematics (Retired)
Hunter, Christopher, PhD, Cambridge; McKenzie Professor 1991, Chair and Professor of Mathematics (Retired)
Kibby, David K., PhD, Johns Hopkins; McKenzie Professor, 1989, Robert O. Lawton Distinguished Professor, 2003–2004, Professor of English
Winstead, William O., MM, McKenzie Professor 1987, Professor of Music (Resigned)

Daisy Parker Flory Alumni Professors

Madsen, Clifford K., PhD, Florida State; Alumni Professor 1985–1988, Distinguished Professor 1988–1989, Distinguished Teaching Professor, 1989–1990, Professor of Music (Retired)
Martin, Patricia Y., PhD, Florida State; Alumni Professor 1989, Professor of Sociology (Retired)
Standley, Fred L., PhD, Northwestern; Alumni Professor 1985, Professor of English (Retired)

Eppes Professors

Baumester, Roy F., PhD, Princeton; Eppes Professor, 2002, Professor of Psychology
Bull, Robert G., MA, Eppes Professor of English
Farrell, Suzanne, PhD, Eppes Professor, 2000, Professor of Dance
Ferris, Gerald R., PhD, Illinois at Urbana-Champaign; Eppes Professor, 2000, Professor of Management and Psychology
Foorman, Barbara R., PhD, California at Berkeley; Eppes Professor, 2006, Professor of Education
Freeth, Philip, PhD, Rhode Island; Eppes Professor, 2003, Professor of Oceanography (Retired)
Guznburger, Max D., PhD, New York; Eppes Professor, 2002, Professor of Scientific Computing
Kroto, Harold W., PhD, University of Sheffield; Eppes Professor of Chemistry, 2004, and Nobel Laureate in Chemistry, 1996 (Retired)
LaPointe, Leonard L., PhD, Colorado at Boulder; Eppes Professor, 2000, Professor of Communication Disorders
Larbiakel, David C., PhD, Imperial College London; Eppes Professor 2006, Professor of Superconducting Materials
McClure, Clarence C., PhD, Rutgers; Eppes Professor, 1999, Professor of Information Studies
Scholz, John T., PhD, California at Berkeley; Eppes Professor, 2001, Professor of Law
Swanson, David L., PhD, University of Illinois Central Campustown; Eppes Professor, 2001, Professor of Biology
Zwilich, Ellen T., MM, Eppes Professor 1999, Professor of Music

The President and the Provost's Named Professorship Program

Anderson, Thomas L., PhD, Georgia; Jessie Lovano-Kerr Professor of Art Education, 2003
Baer, Howard A., PhD, Wisconsin; J. Daniel Kimmel Professor of Physics, 2002
Barnard, Eric, PhD, State University of New York at Albany, Allen L. Liska Professor of Criminology, 2008
Beckham, Joseph C., JD, PhD, Florida; Allan Tucker Professor of Educational Policy Studies and Leadership, 2000, Professor of Educational Leadership
Benn, J., PhD, Free University of Berlin; Paul A. Deese Professor of Psychology, 2005
Berry, Frances, PhD, Minnesota; Frank Sherman Professor of Public Administration, 2004
Berry, William D., PhD, Minnesota; Marj. D. Irish Professor of Political Science, 1999
Bickley, R. Bruce, Jr., PhD, Duke; Buffett T. Tug Professor of English, 2002 (Retired)
Bos, Wendy, PhD, Indiana of Pennsylvania; Kellogg W. Hunt Professor of English, 2000 (Deceased)
Bromberg, Thomas G., D.Crim., Berkeley; Sheldon L. Messinger Professor of Criminology, 2001
Boehrer, Bruce T., PhD, Pennsylvania; Bertram H. Davis Professor of English, 2001
Bowers, Philip L., PhD, Tennessee; Dwight B. Goodner Professor of Mathematics, 2002 and Associate Chair of Mathematics
Brown, Carolyn A., MA, and John Bodner Professor of Music, 2002 (Retired)
Brooks, James S., PhD, Oregon; Grace C. and William G. Moulton Professor of Physics, 2002
Bryant, John L., PhD, Georgia; Orville G. Harrod Professor of Mathematics, 2000, Distinguished Research Professor, 1994–1995 (Retired)
Burnett, William C., PhD, Hawaii; Carl Henry Oppenheimer Professor of Oceanography, 2002
Carroll, Pamela S., EdD, Auburn; Dwight L. Burton Professor of English Education, 2005, Distinguished Teaching Professor, 2005–2006, and Professor of Middle and Secondary Education
Case, Bettye Anne, PhD, Alabama; Olga Larson Professor of Mathematics, 2003
Chang, Nan, PhD, Texas A&M; Krishnamurthy Karamcheti Professor of Engineering, 2000, and Professor of Mechanical Engineering
Charnoff, Jeffrey P., PhD, North Carolina; John Widmer Winchester Professor of Oceanography, 2002, and Professor of Oceanography and Geosciences
Chelliah, Neel H., PhD, Carnegie Mellon; William G. Chase Professor of Psychology, 2005
Chiricos, Theodore G., PhD, Massachusetts, Amherst; William J. Wilson Professor of Criminology and Criminal Justice, 2005
Clarke, Allan J., PhD, Cambridge; Adrian E. Gill Professor of Oceanography, 2001, Distinguished Research Professor, 2000–2001
Coonan, William J., PhD, North Carolina at Chapel Hill; Richard L. Chapple Professor of Modern Languages and Literatures, 1999
Costa, Pamela K., PhD, Nebraska at Lincoln; Robert C. Earnest Professor of Finance, 2002
Collins, Emmanuel, PhD, Purdue; Associate Chair and John H. Seely Professor of Mechanical Engineering, 2003
Connolly, Charles E., PhD, Michigan; William G. and Bodd Bell Professor of Urban and Regional Planning, 2002, and Associate Chair and William G. Chase Professor of Planning (Retiring)
Conlides, Robert J., PhD, Michigan State; James C. Smith Professor of Psychology, 2002, and Director of Neuroscience
Corry, John A., PhD, Chicago; Edwin S. Gaustad Professor of Religion, 2000
Cottrell, Paul, PhD, Yale; Steve Edwards Professor of Physics 2004
Cross, Timothy A., PhD, Pennsylvania; Earl Frieden Professor of Chemistry and Biochemistry, 2002, Distinguished Research Professor, 2000–2001
Cross, Jack E., PhD, Rochester; John and Geraldine P. Schuler Professor of Physics, 2003 (Deceased 9/3/04)
Dagdoo, Ethio R., PhD, Instituto Balseiro; Edward A. Desloge Professor of Physics, 2001, and Scholar/Scientist, School of Computational Science and Information Technology
Robert O. Lawton Distinguished Professors

Beidler, Lloyd Mumbauer, PhD, Johns Hopkins; Distinguished Professor 1971–1972, Professor of Biological Science (Retired)

Bradley, Ralph Alan, PhD, North Carolina; Distinguished Professor 1970–1971, Professor and Head of Biological Science (Retired 10/30/01)

Burroway, Janet G., MA, Distinguished Professor 1995–1996, McKenzie Professor, Service Professor of English (Retired)

Choppin, Gregory R., PhD, Texas; Sc.D., Loyola; Distinguished Professor 1967–1968, Professor of Chemistry (Retired)

Dalal, Naren S., PhD, British Columbia; Distinguished Professor 2012–2013, Distinguished Research Professor 2002–2003, Dirac Professor of Chemistry

Fallon, Richard G., MA, Distinguished Professor 1975–1976, Professor and Dean Emeritus, School of Theatre (Retired)

Fichter, Nancy Smith, PhD, Texas Woman’s University; Distinguished Professor 1991–1992, Chair and Professor of Dance (Retired)

Frieden, Earl, PhD, Southern California; Distinguished Professor 1969–1970, Professor of Chemistry (Retired)

Friedman, E. Irme, PhD, Vienna; Distinguished Professor 1991–1992, Professor of Biological Science (Retired)

Gagnon, Robert M., PhD, Brown; Distinguished Professor 1982–1983, Professor of Research, Development, and Foundations (Retired)

Gilmour, Robert, PhD, Louisiana State; Distinguished Professor 1981–1982, Professor of Mathematics (Retired)

Gontarski, Stanley E., PhD, Ohio State; Distinguished Professor 2008–2009, Sarah Hendron Professor of English 1999, Distinguished Research Professor 1999–2000

Greaves, Richard L., PhD, London; Distinguished Professor 1989–1990, Professor of History (Deceased)

Grundwald, Ernest Max, PhD, California; Distinguished Professor 1960–1961, Professor of Chemistry (Resigned)

Harper, George M., PhD, North Carolina; Distinguished Professor 1979–1980, Professor of English (Deceased)

Herz, Werner, PhD, Colorado; Distinguished Professor 1987–1988, Robert O. Lawton Professor of Chemistry (Retired)

Hess, Seymour L., PhD, Chicago; Distinguished Professor 1978–1979, Professor of Meteorology (Deceased)

Hofer, Kurt G., PhD, Vienna; Distinguished Professor 1994–1995, Distinguished Teaching Professor 1989–1990, President of Biological Science (Retired)

Hoffman, Dorothy Lois Breen, PhD, Illinois; Distinguished Professor 1963–1964, Professor of Modern Languages and Linguistics (Deceased)

Housewright, Wiley Lee, Ed.D, New York; Distinguished Professor 1961–1962, Professor and Dean, School of Music (Retired)

Kettler, Kellogg Wesley, PhD, Iowa; Distinguished Professor 1972–1973, Professor of English (Deceased)

Kiser, Claud Pepper, PhD, Yale; Distinguished Professor 1958–1959, Professor and Chair of Political Science (Deceased)

Jain, Thomas E., PhD, Texas at Austin; Distinguished Professor 2010–2011, Distinguished Research Professor 2006–2007, Bright-Burton Professor of Psychology

Kashia, Michael, PhD, California; Distinguished Professor 1962–1963, Professor of Chemistry and Director, Institute of Molecular Biophysics (Retired)

Kemper, Kitti, PhD, Indiana; Distinguished Professor 2002–2003, Chair and Professor of Physics, and John David Fox Professor of Physics, Distinguished Research Professor, 1993–1994 (Retired)

Kenshale, Daniel Ralph, PhD, Washington; Distinguished Professor 1974–1975, Professor of Psychology (Retired)

Kirby, David K., PhD, Johns Hopkins; Distinguished Professor, 2003–2004, Professor of English, McKenzie Professor, 1989

Krishnamurti, Tiruvalam N., PhD, Chicago; Distinguished Professor 1985–1986, Professor of Meteorology (Retired)

Liddell, Anna Forbes, PhD, North Carolina; Distinguished Professor 1959–1960, Professor of Philosophy (Deceased)

Macdonald, Clifford K., PhD, Florida State; Distinguished Professor 1988–1989, Alumni Professor 1985–1988, Distinguished Teaching Professor 1989–1990, Professor of Music (Retired)

Mandelkern, Leo, PhD, Cornell; Distinguished Professor 1984–1985, Professor of Chemistry (Retired)

Marcus, Nancy H., PhD, Yale; Distinguished Professor, 2001–2002, Mary Sears Professor of Oceanography, 2000, and Dean of Graduate Studies

Marshall, Alan George, PhD, Stanford; Distinguished Professor 2006–2007, Distinguished Research Professor, 1998–1999, Kasha Professor of Chemistry

Nichols, Eugene D., PhD, Illinois; Distinguished Professor 1968–1969, Professor and Head of Mathematics Education (Retired)

National Academy Of Sciences, Florida State University Members

Beidler, Lloyd, PhD, Johns Hopkins; Distinguished Professor 1971–1972, Professor of Biological Science (Deceased)

Caspar, Donald L., PhD, Yale; Professor of Biological Science (Retired)

Fink, Zachary, PhD, California at San Diego, Paul A.M. Dirac Professor of Physics, 1999 (Resigned)

Gorov, Lev P., Dr.Sc., Joffe Physical Technical Institute; Leningrad; Professor of Physics, and Program Director, National High Magnetic Field Laboratory

Howard, Louis, PhD, Princeton, McKenzie Professor 1986, Professor of Mathematics (Resigned)

Kasha, Michael, PhD, California at Berkeley; Distinguished Professor 1962–1963, Professor of Chemistry/Institute of Molecular Biophysics (Retired)

Koch, John R., PhD, Illinois; Nobel Laureate in Physics, 1972; Professor of Physics, National High Magnetic Field Laboratory (Retired)

Kopel, Marvin E., PhD, Massachusetts Institute of Technology; Distinguished Research Professor 1966–1967, V.W. Mueller Professor of Chemistry

Taylor, J. Herbert, PhD, Robert O. Lawton Distinguished Professor 1983–1984, Service Professor of Biological Science (Deceased)

Krots, Harold W., PhD, University of Sheffield; Francis Eppes Professor of Chemistry, Nobel Laureate in Chemistry, 1996 (Retired)

National Academy Of Engineering, Florida State University Members

Quandago, J.J., PhD, Kansas; Distinguished Teaching Professor, 2010–2011, Mildred and Claude Pepper Eminent Scholar in Social Gerontology, 1987, and Professor of Sociology
National Academy of Public Administration

Berry, Frances, PhD, University of Minnesota; Frank Sherwood Professor of Public Administration, 2006
Feiock, Richard, PhD, University of Kansas; Augustus B. Turnbull Professor of Public Administration; Jerry Collins Eminent Scholar Endowed Chair, 2014
Weissert, Carol, PhD, University of North Carolina at Chapel Hill; LeRoy Collins Eminent Scholar of Political Science, 2012
Yang, Kaifeng, PhD, Rutgers University, Professor of Public Administration, 2012

Foreign Academies, Florida State University

Members

Boyd, Monica, PhD, Duke; Mildred and Claude Pepper Distinguished Professor of Sociology, and Royal Society of Canada
O'Brien, James J., PhD, Texas A&M; Professor of Meteorology and Oceanography, Robert O. Lawton Distinguished Professor, 1999–2000, Distinguished Research Professor, 1990–1991, and Russian Academy of Natural Science
Rikvold, Per Arne, PhD, Temple; James Gust Skofronick Professor of Physics, 2003, Professor of Physics and Scholar/Scientist, School of Computational and Information Technology, and Norwegian Academy of Science and Letters, 2004
Sheline, Raymond K., PhD, California at Berkeley; Service Professor of Chemistry and Physics, Robert O. Lawton Distinguished Professor 1966–1967, and Royal Danish Academy of Science and Letters (Retired)

Nobel Laureates

Bloch, Konrad E., PhD, Columbia, Eminent Scholar in Human Sciences, Nobel Laureate in Medicine, 1964
Buchanan, James, PhD, Chicago, Professor of Economics, Nobel Laureate in Economic Science, 1986
Dirac, Paul A.M., PhD, St. Johns College, Cambridge, Professor of Physics, Nobel Laureate in Physics, 1933
Kroto, Harold W., PhD, University of Sheffield; Francis Eppes Professor of Chemistry, Nobel Laureate in Chemistry, 1996
Mulliken, Robert S., PhD, Chicago, Professor of Chemistry, Nobel Laureate in Chemistry, 1966
Schrieffer, J. Robert, PhD, Illinois, Professor of Physics, Nobel Laureate in Physics, 1972
